NAB LIBRARY
Congress Starts; Radio Legislation Improbable

Congress set to work again this week with enough powder-keg issues on hand to keep the session going well into the summer.

The Administration hoped that major activity would be confined to the routine appropriations, national defense and extension of the President's trade treaty power.

That would mean a short session and, possibly, fewer headaches for the Democrats during the coming campaign.

There is an increasingly loud demand, however, for amendment of the Wagner Act and the Wage and Hour Act. There also is pressure for amending the social security, relief, farm and monetary programs. In all these issues are the makings for prolonged squabbling.

There was no indication, at the session's opening, that anyone intended to push any major broadcasting legislation. Observers felt that the radio bills having the best chance of obtaining serious consideration were those which would forbid beer and liquor advertising.

Nevertheless, the long list of radio bills now pending will bear careful watching—which the NAB will do.

Starting his second trip in behalf of Broadcast Music, Inc., Neville Miller met this week with broadcasters in New Orleans and Dallas. Next week he will have meetings in Los Angeles, San Francisco and Portland. All Pacific Coast broadcasters, regardless of NAB membership, should attend. Sydney Kaye represented Broadcast Music at a district meeting in Camden, N. J., yesterday.

A complete list of the pending radio bills in Congress is published elsewhere in the Reports.

A. F. of M.

IRNA negotiations with the American Federation of Musicians have resulted in the following letter from President Weber to his locals:

"Your local is hereby advised not to enter into negotiations with a broadcaster to furnish the services of musicians at the expiration of the present national agreement.

"Your local however may permit its members for the present to work for broadcasters without an agreement.

"This order is binding upon your local pending further advice from the Federation."

(Signed) JOE MILLER
36 More Stations Approve B.M.I.

Substantial support of Broadcast Music, Inc., was voiced by representatives of 36 New Jersey, Pennsylvania and Delaware stations at a District 3 meeting Thursday, January 4, in Camden, New Jersey.

Twelve of the 48 commercial stations in the District were not represented.

After Sydney Kaye, representing the NAB, had explained how Broadcast Music would operate, District Director Clifford M. Chafey called the roll. Representation of the following stations said they would sign or recommend signing to their station owners: WDEL, WILM, WSNJ, WCAM, WAAT, WHOM, WOR, WCBF, WEST, WIBG, WHJB, WKBO, WAZL, WJAC, WGL, KYW, WCAU, WDAS, WFILE, WHAT, WIP, WREN, WTEL, KDKA, KQV, WCAE, WJAS, WWSW, WEEU, WRAW, WGBI, WOKK, WBE, WRAK, WORK.

After lunch, Joseph L. Miller, NAB Labor Relations Director, discussed the A. F. of M. situation. Record licensing also was discussed.

Those present: Sydney M. Kaye, NAB; F. E. Chizzini, NBC; W. C. Gartland, NBC; Ralph Wentworth, Lang-Worth; V. C. Diehm, WAZL; Derby Sproul, KDKA; John Laux, KQV; H. K. Brennen, WJAS; C. O. Langlois, Lang-Worth; C. G. Moss, WKBO; Mike Lahr, WOKK; George E. Joy, WRAK; W. V. Person, WRAK; B. A. Beck, WOKK; George W. Beck, WOKK; Clair R. McCollough, Mason-Dixon Group; Isaac D. Levy, WCAU; Ken Stowman, WCAU; J. C. Tully, WJAC; Roy Thompson, WFBG; George D. Coleman, WGBI; Sam Baltimore, WBRE; Leonard Kapner, WCAE; G. M. Stoer, WCAE; Frank R. Smith, WWSW; Benedict Gimbel, Jr., WIP; Joseph L. Miller, NAB; Frederick Caperoon, WCAM; Bob Horn, WCAM; A. W. Dannenbaum, Jr., WDAS; Pat Stanton, WDAS; S. R. Rosenbaum, WFILE; Paul H. La Stayo, WAAT; Howard S. Frazier, WSNJ; Walter Miller, WGL; Robert Gulick, WORK; Gorman Walsh, WDEL; Louis G. Baltimore, WBRE; Leslie W. Joy, KYW; Griffith B. Thompson, KYW; Joseph Land, WHOM; Jack Compton, WHOM; Charles Stahl, WCAM; Ed. D. Clery, WIBG; T. M. Maxwell, WIBG; Doug Hibbs, WTEL; Henry N. Crocker, WTEL; B. Bryan Musselman, WCBA-WSAN; Ray Gaul, WRAW; Clifford M. Chafey, WEEU; Arthur Simon, WPEN; A. Heine, WCAM.

Mexico Ratifies Havana Treaty

Mexico ratified the Havana Treaty on December 28, and it is now possible that the frequency shift provisions will be put into effect sometime this year, according to Andrew D. Ring, assistant chief engineer of the FCC.

The FCC will make a study to determine what work will be required to make the treaty effective, and to eliminate allocation conflicts. When this study is completed, a date will be set for the shift.

Mexico was the fifth country to ratify. The United States, Canada, Cuba and Haiti had previously approved the treaty.

Ambassador Josephus Daniels advises the State Department that the Mexican Broadcast Association believed it possible for Mexico to place the agreement into effect in 90 days. According to provisions of the treaty it was to have gone into effect one year after ratification by the fourth government. However, the Mexican ratification was necessary in order that the benefits to be derived from the new allocation could be realized.

The operation of this agreement will eliminate the ruinous inter-country interference experienced now on some of the channels. Many American stations in the past have received undue interference from Cuban and Mexican stations.

Under the provisions of the treaty there will be a shift in frequency by most of the Broadcast Stations in the United States. With a few exceptions this shift will not be greater than four channels or forty kilocycles. Inasmuch as most of the shifts are an increase in frequencies it will be possible to regrid some of the crystals.

In this connection it should be kept in mind that on January 1, 1942, it will be required by the Federal Communications Commission that broadcast stations adhere to their carrier frequencies within twenty cycles instead of the fifty cycles as under the present regulation. If a crystal will not maintain this precision it might be better to install a new one which will. There will be an opportunity for some of the stations to secure their crystals from stations which will move off the frequency they are scheduled to be shifted to. It is probable that there will be very few cases where new crystal control equipment is required other than new crystals. The Federal Communications Commission now requires that any new equipment installed be able to maintain frequency within twenty cycles.

January 5, 1940
LONGER INTERVAL FOR ANNOUNCING RECORDS

In the interests of public service and radio station convenience, the Federal Communications Commission Thursday agreed that station announcements of the use of mechanical records can be made at 30-minute intervals instead of the 15-minute requirement as heretofore. This is to avoid interrupting the entertainment continuity of a recorded series of records, or of the long records now quite generally used, particularly of recorded programs relayed by wire facilities.

At the same time, Section 3.93(e) of the broadcast rules has been changed to read:

"The identifying announcement shall accurately describe the type of mechanical record used, i.e., where a transcription is used it shall be announced as a 'transcription' or an 'electrical transcription' and where a phonograph record is used it shall be announced as a 'record'."

The Commission added religious service to the types of continuous recorded programs—speech, play, symphony concert or operatic production—of longer than half an hour for which the 30-minute announcement rule is waived.

This change is effective immediately.

NEBRASKA-ASCAP STATUTE HELD UNCONSTITUTIONAL

On December 28, 1939, a specially constituted three-judge federal court in Lincoln, Nebraska, held the so-called Nebraska anti-ASCAP Statute unconstitutional as in violation of the due process and equal protection clauses of the Federal Constitution and in violation of the Federal Copyright Act of 1909.

This statute sought to compel the sale of public performing rights at the same time that sheet music is sold by providing that the sale price of the performing rights should be stamped on the music and when purchased by the user at that price the user would acquire the right to publicly perform for profit during the remaining life of the copyright. The statute further provided that if the copyright owner failed to stamp the sale price of the performing rights on the music the user would acquire such performing rights at whatever price he paid for the sheet music.

In addition to the foregoing, the statute prohibited the combination of a substantial number of the copyright owners of the United States for the purpose of selling blanket licenses when one of the objectives of the combination was the fixing of prices. The court held such anti-monopoly legislation to be within the power of the legislature but held that since it was combined in the same statute with the unconstitutional provisions it could not be separated from the unconstitutional provisions and the entire statute therefore must fall. The court pointed out that the statute compelled "the owner of a copyright to offer it for sale in a certain way, and if he fails so to do takes it from him without compensation" and stated that this violated the due process and equal protection clauses of the Constitution and also the Federal Copyright Act.

In speaking of the ASCAP control of copyrighted music, the court stated:

"* * * Of the popular music necessary for the successful operation of radio stations, dance halls, hotels, and theaters, the society has control of about 85% or 90% and also has control of from 50% to 75% of the standard or older music that is played occasionally. All of the large and more influential publishers of music in the United States are members of the society. The users of music in Nebraska cannot success-

THE BUSINESS OUTLOOK FOR 1940
fully carry on their business except they deal with the plaintiff society because there is no place where nor person or agency to whom users of music in Nebraska may go in order to deal for public performance rights and negotiate for music in any substantial amount sufficient to meet the ordinary needs of music users in the state, except the society."

After discussing the property rights created in the copyright owner by the Federal Copyright Act, the court said:

"*** Of course, the Act gives him no right to combine with others to insure control of prices and the consequent power of monopoly of an entire field by combination. Plaintiffs urge necessity as a justification or warrant for their organization. It is urged that without some such means of protection the individual copyright owner is helpless to protect his rights, but if the statute violates no rights guaranteed to the plaintiffs by the Constitution or laws of the United States, the motive for the organization or acts of ASCAP, however impelling, is not material."

The opinion recognizes that the state legislature has the constitutional power to prohibit monopolistic practices and combinations in restraint of trade but concluded that the unconstitutional attempt of the legislature to compel the sale of performing rights along with the sale of sheet music was such an essential part of the statute that the monopolistic sections of the statute could not be separated from the unconstitutional sections. Therefore a permanent injunction against the entire statute was granted. It is not known whether the State of Nebraska will appeal the decision.

**FREC RELEASES STUDY WMBD'S PROGRAM POLICIES**

The Federal Radio Education Committee this week released a study of the public service operating policies and experiences of Station WMBD, Peoria, Illinois. The study, printed in a thirty-eight page booklet form, was conducted by Dr. Leonard Power of the FREC staff in the past year, prior to the adoption of the NAB Code.

WMBD is owned and operated by Edgar Bill, chairman of the NAB Code Compliance Committee.

The report is divided into two main sections: (1) station policies governing the selection and editing of programs the purposes of which are to influence public opinion, the handling of religious broadcasts on a non-sectarian, non-commercial basis, the acceptance and editing of advertising matter, cooperation with civic and educational groups who serve in advisory capacities, and (2) public service policies wherein WMBD encourages expressions of public opinions on civic matters, undertakes to promote religious harmony of the area served and special assistance and programs for educational and civic purposes.

In his conclusions, Dr. Power declared "There is no evidence of the use by the station of its position of power, as a monopoly station, to use force to secure or to prevent the use of station facilities. Neither is there any evidence of the misuse of that milder form of coercion called persuasion.

"Refusal to grant the use of station facilities has been based on the application of fair play. An examination of station standards and practices shows that the dominant consideration has been to harmonize radio in Peoria, Illinois, with democratic ideals and methods."

Copies of the study may be secured through the Federal Radio Education Committee, U. S. Office of Education; price per copy, 15 cents. The publication is one of a series to be issued by the FREC, which is supported in part by contributions from the radio industry, through NAB, and in part by educational foundations.

The FREC has also released another study, "Forums of the Air," by Paul H. Sheats. This will be reviewed in next week's Reports.

**SIMPLIFIED REPORT FORMS FOR BROADCAST STATIONS**

A revised form of annual financial report required of standard broadcast stations and networks was adopted by the Federal Communications Commission Thursday. It is applicable to the 1939 income statement, with balance sheet, which is due March 1, 1940.

The forms do not include schedules for program data, since it was requested by representatives of the broadcast industry that such schedules be distributed separately.

The forms are substantially the same as those used for 1938, except that they have been simplified and reduced in the number of pages. In order to obtain greater uniformity and clarity in the responses, detailed instructions have been prepared with respect to the various schedules and will be made available at the time the forms and instructions are distributed.

**FREE OFFERS**

As a goodwill gesture during the holiday season, the Bureau of Radio Advertising omitted all mention of time-chiselers in recent issues of NAB REPORTS.

The time-chiseling still goes on, however, and now that the holidays are past, the undiminished flow of free offers reaching Headquarters reminds the Bureau that it's time to blast away again. As an excellent means of increasing station income, the Bureau suggests to all members that they make a New Year's resolution to "chase the chiselers in 1940."

To do otherwise is to sell short your own station, and undermine the very thing that pays the bills. Free offers constitute one of the biggest obstacles to the Bureau of Radio Advertising and all stations in their efforts to develop new sources of broadcast revenue. Recent bulletins from the Bureau, revealing the true, behind-the-scenes activities of the time-chiselers, support the truth of that statement.

Recently, several station men have been heard to remark that if all broadcasters cleared their air of free offers simultaneously, average station income would increase at least 15% within six months. A bold statement
perhaps, but no one can prove it wrong, especially after studying the following list of free offers reported to Headquarters in the past two weeks:

Blossom Manufacturing Co., 79 Madison Ave., New York
Metro-Goldwyn-Mayer, 1327 S. Wabash, Chicago
Nat'l Chemical & Mfg. Co., 3617 S. May St., Chicago
Travel Radio Service, 65 Broadway, New York City

These concerns have been invited by the Bureau to use radio on a regular basis, and it is suggested that members make every effort to sell local dealers and distributors.

In addition, the following who claim no commercial purpose have also requested free time of stations:

Institute of Oral and Visual Education
National Patriotic Council

The Bureau of Radio Advertising will be glad to supply information to members considering acceptance of their propositions.

Cost-per-Inquiry

The following concerns have recently sought to place advertising with member stations on a contingent basis:

Radio Drugs, 364 Parker Ave., Buffalo, N. Y.
H. L. McClung, Tyler, Texas

The Bureau of Radio Advertising has invited their use of radio time at stations' quoted card rates, advising that NAB members consider their propositions not only unethical but poor business practice.

Station Sales Survey

The Bureau of Radio Advertising is releasing to all members copy of a report by Dr. Herman S. Hettinger on sales administration of radio stations.

The report, in loose-leaf folder form, is the result of a survey conducted in 1939 among 88 stations, and described by Dr. Hettinger before the Sales Managers' Committee at the Atlantic City convention last July.

The report will be of interest to station managers and commercial managers, outlining typical sales department organization and activities, compensation and control of salesmen, and special problems of station sales administration.

Extra copies of the report are available to members free of charge, on request to the Bureau of Radio Advertising.

Bureau of Radio Advertising

Members may be interested in reading an article on page 122 of Variety Anniversary Number, headed “Sales Ammunition for Local Broadcasters,” which concerns Bureau of Radio Advertising activities.

In cooperation with the NAB Sales Managers' Division, and the NAB Departments of Research and Public Relations, the Bureau is now formulating plans for 1940, which, it is hoped, will contribute considerably to radio advertising volume during the coming year.

THE BUSINESS OUTLOOK FOR 1940

Headquarters feel that the annual forecast by Gene Robb, Washington economist and observer, will be of interest to the membership. The forecast is based upon a compendium of information and statistics gathered from several sources. The opinions expressed, of course, represent the conclusions of Mr. Robb and do not represent any official opinion or expression of Headquarters. They are passed on as a matter of interesting information and opinion.

The country's business stage is set to turn in a 1940 performance outranked only by 1929. Vitality and endurance of dominant factors cast in the leading roles cannot be foretold with assurance but their healthy condition in the past year's war-torn windup (20% stronger than a year ago) inspires confidence for a successful season just ahead.

For the new year as a whole, the consensus of economists in Government and in private industry produces the following rough averages:

Business activity will be 10% greater than in 1939.
Production of durable goods will lead the advance with a gain of 17%, especially important in pyramiding new employment. Output of consumer goods is due to climb about 8%.
Retail shoppers will spend 8% more than last year and pay about 5% higher prices for what they buy. Living costs will be rising higher but the rise in consumer income will keep purchasing power slightly above present levels. Commodity prices are zig-zagging upward on an uncertain course with the war introducing an “x” in the equation which algebra can't solve.

Quarter by quarter, analysts differ on the path business will pursue:

Majority contend that a letdown, starting this month and sloping to the middle of the year, will be reversed before Fall and—aided by war orders—give 1941 the prosperous sort of sendoff 1940 is getting.
Minority believe the rate of activity will continue near present high levels through first half of the year (though seasonally adjusted indexes will register several points lower) and taper downward the last 2 quarters—at least until the character of the next Administration is determined at the polls in November.

Uncertainties:

Unpredictables: (1) Scope of the war abroad—more likely to broaden . . . (2) Severity of the drought at home—another 1934 seems probable . . . (3) Election results and influence of victors' economic views—edging, however, toward conservatism.

Production—Industries with good chances for setting all-time output records this year: aircraft, tobacco, domestic liquor and wine, chemicals and plastics, rayon and hosiery, air conditioning, electric goods and power, petroleum.

Costs, chiefly via labor, will average a little higher . . . Earnings, as a whole, should duplicate '39; more frequent gains in durable goods.
Steel production will slip from about 80% capacity in the first quarter to around 75% in the second . . . Aircraft and machine tool plants are booked almost solid through 1940 . . . Auto output is scheduled for 2½ million units in the first half compared with 2 million in the same period of '39 . . . Textiles will continue high mill rates well into next quarter but expect a substantial Summer letdown.

Construction—Low-cost housing, utility plant expansion and highway building are counted on to take up the slack in construction caused by tapering off of PWA projects.

FHA, which is modifying its building standards on new homes, also will insure private funds invested in shum-rehabilitation USHA's suburban substitutes for slums are well under way and will account for at least 15% of 1940 dwellings, sending the total for residential building about 10% ahead of 1939's 10-year high.

Distribution—The trend continues toward mass distribution methods on the basis of strongest sales increases from supermarkets, large chains, mail order houses.
Marketing Developments

Advertising—The lag in advertising, compared with the 1939 business advance, will be turned into gains approximately 5% over last year when (a) total newspaper linage barely nosed ahead of 1938, (b) magazines hardly broke even, (c) radio network billings climbed about 8%, local paid time about 5% ... Advertising data of importance will become available toward the end of 1940 when results of business and population censuses begin to filter through.

Consumers—To meet the plea of consumer groups for more information on labels and in advertising, several important industry groups have been formed to direct this trend: besides the new Consumer-Retailer Council is the 4-A's non-profit corporation—Committee on Consumer Relations in Advertising ... In Washington, the movement for a Gov't bureau of consumer information is far behind in its development; necessary in light of Trade Commission prosecutions which make the movement for a Gov't bureau of consumer information imperative.

Advertising promotion: (a) American Bank of Commerce— expansion among industries on national, regional and local bases ... Fifteen States are spending appropriations for advertising ... Three-fourths of the increase in advertising is coming from local and regional advertisers ... Federal lending agencies are participating in advertising promotion: (a) Home Loan Bank urges building and loan associations to use newspaper linage; (b) FHA supplies builders, lenders and newspapers with advertising materials; (c) HOLC encourages plan of its contract-brokers to use special classified pages in promoting sale of repossessioned homes.

Henry Adams Bellows

It is with regret that members of the NAB learn of the passing of Henry A. Bellows. Mr. Bellows was formerly radio commissioner and a vice president of the Columbia Broadcasting System. He was chairman of the Legislative Committee of NAB for many years and did invaluable work for the entire industry in that capacity. Mr. Bellows died in Minneapolis, December 29, at the age of 54. He had been ill for several months. After leaving Washington, he was Director of Public Relations for General Mills, Inc.

KVNU TRANSMITTER LOOTED

Reed Bullen, manager, KVNU, Logan, Utah, reports that his transmitter building was looted the night of December 11 and asks assistance in regaining the following stolen equipment or in apprehending the thieves:

1. General Purpose, R. C. A. Amplifier, 1 R. C. A. Tri-Amplifier-Mixer Panel, 1 R. C. A. Modulation Monitor, 1 U. T. A. Line Equalizer, 2 Thordarson 8 Watt Amplifier, 1 R. C. A. 70-B Tunable complete, Serial No. P 1344, 1 R. C. A. 70-B Tone Arm and Pick-up, Head-Diamond Point, 1 Western Electric Salt Shaker Microphone, Serial No. 6685, 250 Watt Gear, 1 Clough Brengle Oscilloscope, 2 838 R. C. A. Tubes, 1 Jensen Type B Speaker, 1 Garden Relay, 1 25 Watt Thordarson Amplifier, 1 Field Strength Meter Complete.

EL PROUGH OR JACK SINCLAIR?

Anyone knowing of the whereabouts of a person calling himself El Pough or Jack Sinclair, please get in touch with E. B. Craney, KGIR, Butte, Montana.

INTER-AMERICAN CONFERENCE

The United States has accepted an invitation of the Chilean Government to participate in the Second Inter-American Radio Conference scheduled to be held at Santiago, Chile, January 17-23. The President has approved the appointment of the following delegation to represent this country at the meeting:

Delegate: R. Henry Norweb, American Minister to the Dominican Republic.

Technical advisers: Department of State, Joseph T. Keating, Division of International Communications; also secretary of the delegation; Department of War, Capt. W. T. Guest, Signal Corps, United States Army; Department of the Navy, Rear Admiral Stanford C. Hooper, United States Navy, Director, Technical Division, Office of the Chief of Naval Operations; Federal Communications Commission, E. K. Jett, Chief Engineer, Gerald C. Gross, Chief, International Division; Civil Aeronautics Authority, Lloyd H. Simson, Radio Communications Specialist.

The First Inter-American Radio Conference held at Havana, Cuba, in November 1937, concluded the Inter-American Radio Communications Convention which provided for periodic conferences to consider problems arising in the field of radio communications in the American Continent. Subsequently the Conference adopted a resolution accepting the offer of the Government of Chile for the second meeting to be held in that country during the first quarter of 1940.

PENDING RADIO BILLS IN CONGRESS

SENATE BILLS

S. 517 (Sen. Johnson, Colo.) LIQUOR ADVERTISING—Same as H. R. 251. Referred to Interstate Commerce Committee. Hearings held. Reported to Senate.

January 5, 1940
such articles are not separately copyrighted but were included in the Communications Act. The bill as introduced refers to Section 303 (e), whereas the correct designation is 303 (1). A corrected bill will be introduced. No action.

S. 575 (Sen. Capper, Kans.) LIQUOR ADVERTISING—Same as H. R. 924. Referred to Interstate Commerce Committee. No action.

S. 594 (Sen. Reynolds, N. C.) GOVERNMENT RADIO STATIONS—To establish marine schools in each state and other purposes, including the construction and operation by each school of one or more stations on "a wave-length and power prescribed by the Maritime Commission." Referred to Commerce Committee. No action.

S. 655 (Sen. Schwellenbach, Wash.) COMMUNICATIONS ACT—To strike Section 515 of the Communications Act and to require each station to set aside regular and definite periods of desirable day and evening time for uncensored discussion on "non-profit basis of public, social, political, and economic problems, and for educational purposes." Qualified candidates for public office are not covered by the amendment. Referred to Interstate Commerce Committee. No action.

S. 1095 (Sen. Shedd, Texas) COMMUNICATIONS ACT—To amend Section 303 with respect to candidates for public office the requirement that the station shall keep complete records open to public inspection. Referred to Interstate Commerce Committee. No action.

S. 1268 (Sen. Wheeler, Mont.) COMMUNICATIONS ACT—To reorganize the Communications Commission by creating a new agency to be known as the Federal Communications and Radio Information Agency, consisting of an administrative board of three members. Referred to Interstate Commerce Committee. No action.

S. 1520 (Sen. White, Maine) COMMUNICATIONS ACT—To amend the Communications Act by creating an eleven-man commission and for other purposes. Referred to Committee on Interstate Commerce. No action.

S. 2058 (Mr. Neafie, D. N.J.) PRIZE CONTESTS—Requires publication of names of prize winners and the prize winning entry in all promotional contests carried on through the use of the mails or any facilities of interstate or foreign commerce. Referred to Committee on Post Offices and Post Roads. No action.

S. 2251 (Chavez, N. M.) GOVERNMENT COMMUNICATIONS ACT—Directs Secretary of Navy to construct, maintain and operate high frequency communications programs for all government facilities in Western Hemisphere; to appropriate 5 million dollars for construction purposes and one hundred thousand dollars for operating expense during year ending June 30, 1940. To Committee on Foreign Relations. No action.

S. 2466 (Sheppard, C. D. Texas) COMMUNICATIONS ACT—Same as H. R. 5008. To amend the Communications Act of 1934 by adding Section 307½, which would prohibit licenses in excess of fifty kilowatts to any station broadcasting network programs. Referred to Committee on Interstate Commerce. No action.

S. 2511 (Wheeler, Mont.) GOVERNMENT RADIO STATION—Authorizes the purchase of site and erection of building in Massachusetts for use as radio-monitoring station at cost not to exceed $10,000. To Committee on Interstate Commerce. Passed by Senate.

S. 2689 (Bone, D. Wash.) COPYRIGHT—To amend Sec. 33 of Copyright Act with respect to rules governing importation of copyrighted items. To Committee on Patents. Passed by Senate.

S. 2719 (Maloney, D. Wyo.) ANTITRUST LAWS—Same as H. R. 7035. To Committee on Judiciary. No action.

S. 2846 (Wheeler, D. Mont.) COPYRIGHT—Provides that in network and transcription broadcasts originating station or transcription manufacturer is solely liable for infringement. To Committee on Patents. No action.

SENATE RESOLUTION

S. Res. 94 (White, Maine) COMMUNICATIONS COMMISSION—To reorganize the Communications Commission by creating an eleven-man commission and for other purposes. Referred to Committee on Interstate Commerce. No action.

H. R. 251 (Mr. Cullin, N. Y.) LIQUOR ADVERTISING—To prohibit radio advertising of alcoholic beverages. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 252 (Mr. Cullin, N. Y.) LIQUOR ADVERTISING—Same as H. R. 251, except that it specifically defines "alcoholic beverage" as including "beer, ale, wine, gin, whiskey, or brandy." Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 253 (Mr. Cullin, N. Y.) LIQUOR ADVERTISING—Prohibits advertisements in inter-station transcriptions, including the transmission of "intoxicating liquor," by mail or otherwise, including radio broadcasting. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 924 (Mr. Cullin, N. Y.) LIQUOR ADVERTISING—Same as H. R. 253, except that it pertains to "alcoholic beverages" and is limited to "intoxicating liquor." Referred to the Interstate and Foreign Commerce Committee. No action.

H. R. 926 (Mr. Daly, Penna.) COPYRIGHTS—To amend and consolidate acts respecting copyright, including the creation of a copyright in recording artists for renditions reproduced on phonograph records, disk or similar products, and other substances. Referred to Patents Committee. No action.

H. R. 1651 (Mr. Dickstein, N. Y.) IMMIGRATION OF PERFORMING ARTISTS—Denies admission to United States for professional engagement of actor, singer or dancer where country of origin does not grant, both in law and in fact, substantially similar privileges to citizens of the United States. Referred to Immigration and Naturalization Committee. No action.

H. R. 1964 (Mr. Lucy, Mass.) COPYRIGHTS—To create new renewal rights in author of articles in periodicals, encyclopedias, etc., when such articles are not separately copyrighted. Same as S. 547. Referred to Patents Committee. No action.

H. R. 2721 (Mr. Celler, N. Y.) GOVERNMENT RADIO STATION—To construct and maintain Government radio broadcasting station in vicinity of Washington by Secretary of the Navy, with programs under direction of the United States Commissioner of Education. Referred to Naval Affairs Committee. No action.

H. R. 2981 (Mr. Celler, N. Y.) LIBEL—SLANDER—Exempts station from liability for libel or slander when station proves the exercise of due care to prevent the utterance of such statements. Referred to Judiciary Committee. No action.

H. R. 3582 (Mr. Flannery, Penna.) ADVERTISING—Requires informative advertising of imported articles. Referred to Interstate and Foreign Commerce Committee. Superseded by H. R. 5985. No action.

H. R. 3752 (Mr. Lea, Calif.) COMMUNICATIONS ACT—To amend Section 303 (1). Limits the issuance of operators' licenses to citizens of the United States over the age of twenty-one, provided the Commission may waive the age limit with respect to amateur operators. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4224 (Mr. Lea, Calif.) COMMUNICATIONS ACT—To reorganize the Communications Commission. Same as S. 1268. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4433 (Mr. Lanham, Texas) COPYRIGHTS—To secure prompt deposit of copyrightable material and prompt registration of claims to copyright in the copyright office. Referred to Committee on Patents. Hearing held. Superseded by H. R. 5319. No action.

H. R. 4684 (Mr. McLeod, Mich.) COMMUNICATIONS ACT—To amend Section 307, subdivisions (d) and (e), by requiring that broadcasting licenses be issued for a period not less than three years nor more than five years and to provide against denial of renewal
application because of political views expounded over station. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4571 (Mr. Daly, Penna.) COPYRIGHT ACT—To amend the Copyright Act in various respects, including the creation of copyright in recordings when reproduced mechanically. Referred to Committee on Patents. No action.

H. R. 3199 (Mr. Lanham, Texas) COPYRIGHTS—To secure prompt deposit of copyrightable material with Register of Copyrights and prompt registration of claims to copyright. Referred to Committee on Patents. No action.

H. R. 5433 (Mrs. Norton, N. J.) WAGE AND HOUR ACT—To amend, to remove hours restrictions on employees making $200 or more a month, et al. Reported to House.

H. R. 5508 (Mr. Peterson, Florida) COMMUNICATIONS ACT—To amend the Communications Act of 1934 by adding Section 307 1/2, which would prohibit licenses in excess of fifty kilowatts to any station broadcasting network programs. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 5791 (Mr. Schulte, Ind.) COMMUNICATIONS—To prohibit recording for profit or gain any program without consent in writing of the performers. To Interstate and Foreign Commerce Committee. No action.

H. R. 5895 (Mr. Flannery, Pa.) ADVERTISING—To require announcement of place of origin of all imported articles or articles assembled in the United States from imported products, ingredients, parts or materials. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 6160 (Mr. McGranery, D.-Pa.) COPYRIGHTS—To amend the Copyright Act of 1909 in many respects, including the creation of copyright in phonograph records, the extension of the duration of copyright to 56 years, Referred to Committee on Patents. No action.

H. R. 6219 (Mr. Doughton, D.-N. C.) ALCOHOLIC BEVERAGES—To amend the Federal Alcohol Administration Act so as to prohibit, among other things, the advertising of alcoholic beverages by radio. Referred to Committee on Ways and Means. No action.

H. R. 6243 (Mr. Moser, D.-Pa.) COPYRIGHTS—Regulating use of copyrighted works. Authorizes Federal Communications Commission to grant licenses and fix the fees for use of copyrighted works when an agreement with copyright owner cannot be secured. To Committee on Patents. No action.

H. R. 6695 (Mr. McGranery, D.-Pa.) COMMUNICATIONS ACT—To prohibit recording for profit or gain any program without consent in writing of the performers. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 6978 (Mr. Lea, Calif.) GOVERNMENT RADIO STATIONS—To amend the Federal Communications Act so as to prohibit, among other things, the advertising of alcoholic beverages by radio. Referred to Committee on Ways and Means. No action.

H. R. 7021 (Mr. Doughton, D.-N. C.) GOVERNMENT RADIO STATIONS—To amend the Federal Communications Act so as to prohibit, among other things, the advertising of alcoholic beverages by radio. Referred to Committee on Ways and Means. No action.

H. R. 7192 (Mr. Fay, D.-N. Y.) PATENTS—To provide for the compulsory granting of licenses under patents which are brought by competitors within a single control in order to dominate an industry. Referred to Patents Committee. No action.

H. R. 7456 (Mr. Kennedy, D.-N. Y.) COPYRIGHTS—Provides that in network and transcription broadcasts originating station or transcription manufacturer is solely liable for infringement. Referred to Committee on Patents. No action.

H. Res. 234 (Mr. Larrabee, D.-Ind.) FCC—To authorize the FCC to take steps to provide an adequate method to obtain data and other factual information and material necessary to determine the effects of power in excess of fifty kilowatts, and to provide that the FCC shall not grant a license unless one or more than one station to operate on power of more than fifty kilowatts for such experimental operation as may be necessary. Referred to Committee on Interstate and Foreign Commerce. No action.

NEW SECRETARY TO COMMISSIONER BROWN

FCC Commissioner Thad H. Brown has announced the appointment of Corwin R. Lockwood as his secretary. Mr. Lockwood has been a member of the Commission's Law Department since February, 1938. Native of Bowling Green, Ohio, he received his A.B., M.A. and LL.B. degrees from George Washington University. For four years he was in the Finance Division of the Farm Credit Administration.

As Commissioner Brown's secretary, he succeeds Franklin C. Salsbury, who resigned to accept a position in the Law Department of the Commission.

FCC RECOMMENDS TELEGRAPH MERGER

In a report to the Senate Interstate Commerce Committee, the Federal Communications Commission yesterday recommended that Congress authorize the consolidation of the Western Union and Postal Telegraph companies.

FCC ASSIGNMENTS

The Federal Communications Commission announces that the work, business and functions of the Commission for the month of January have been assigned as follows:

Commissioner Craven

Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Walker

Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal
hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; and (b) the designation pursuant to the provisions of Sections 1.251 to 1.252 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

The following hearings are scheduled before the Commission in broadcast cases for the week beginning Monday, January 8. They are subject to change.

**Monday, January 8**

Further Hearing

NEW—Lakeland Broadcasting Co., Willmar, Minn.—C. P., 680 kc., 250 watts, daytime.

**Wednesday, January 10**

Broadcast

NEW—Chilton Radio Corp., Dallas, Texas.—C. P., 1370 kc., 250 watts, unlimited time.

NEW—V. O. Stamps, Dallas, Texas.—C. P., 1370 kc., 250 watts, unlimited time.

**FUTURE HEARINGS**

During the week the Commission has announced the following tentative dates for hearings. They are subject to change.

**January 15**

Public Hearing before the Commission En Banc

In the Matter of Exception to the Rules and Regulations for Television Stations Tentatively Adopted by the Commission on December 21, 1939, and to Specific Recommendations of Its Television Committee.

**February 28**

Informal Hearing before the Commission En Banc

In the Matter of Aural Broadcasting on Frequencies Above 25,000 kc. (An inquiry into the possibilities of Frequency and Amplitude Modulation.)

**FEDERAL COMMUNICATIONS COMMISSION ACTION**

**APPLICATIONS GRANTED**

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Granted construction permit to make changes in equipment and increase power from 100 to 250 watts on 1210 kc.

WSLI—Standard Life Insurance Co. of the South, Jackson, Miss.—Granted voluntary assignment of license of station WSLI from Standard Life Insurance Co. of the South, to Standard Life Broadcasting Co. (Station operates on 1120 kc., 250 watts, unlimited time).

W2XBT—National Broadcasting Co., Inc., New York City, Portable.—Granted modification of television broadcast station license authorizing use of frequencies 136,000 to 162,000 kc. on an experimental basis conditionally.

WLOK—The Fort Industry Co., Lima, Ohio.—Granted construction permit authorizing operation on 1210 kc. with 100 watts, unlimited time, instead of 100 watts daytime only.

WDMJ—The Lake Superior Broadcasting Co., Marquette, Mich.—Granted modification of license to change time of operation from specified hours to unlimited time, on frequency 1310 kc., 250 watts.

KFS—Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Granted modification of license to change frequency from 1210 kc. to 1370 kc., and hours of operation from specified hours to unlimited time.

WERQ—Harrisburg Broadcasting Co., Harrisburg, III.—Granted modification of license to change time of operation from specified hours to unlimited on 1210 kc., 250 watts.

W6XDL—Don Lee Broadcasting System, Los Angeles, Cal., Portable.—Granted modification of television broadcast station license to change frequencies to 318,000 to 350,000 kc., on an experimental basis only.

WWL—Loyola University, New Orleans, La.—Granted extension of special experimental authority until May 1, 1940, to operate unlimited time on 850 kc.

KWWH—International Broadcasting Corp., Shreveport, La.—Granted license to cover modification of special authority authorizing changes in equipment, increase in power from 10 to 30 KW, and move of transmitter site to Gamm Road, Dixie, La., using DA for nighttime operation on frequency 1100 kc. Also granted authority to determine operating power by direct measurement of antenna input.

KRLD—KRLD Caryl Corp., Dallas, Texas.—Granted extension until May 1, 1940, of special experimental authority to operate simultaneously with WHTC, unlimited time, on 1040 kc.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted extension until May 1, 1940, of special experimental authority to operate simultaneously with KRLD, unlimited time on 1060 kc.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted extension until May 1, 1940, of special experimental authority to operate from local sunset KPO to 11 p.m., EST, on 680 kc., using DA.

WAPI—Ala. Polytechnic Institute, Univ. of Ala. & Ala. College, Birmingham, Ala.—Granted extension until May 1, 1940, of special experimental authority to operate unlimited hours using DA after sunset at Tuscaloosa, Ala., on 1110 kc.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted extension until May 1, 1940, of special experimental authority to operate unlimited time on 1110 kc., using DA at night.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted extension until May 1, 1940, of special authority to operate simultaneously with KTHS on 1060 kc., from 6 a.m. to local sunset at Hot Springs, Ark., and operate from local sunset at Hot Springs to 9 p.m., EST on 1060 kc., and operate synchronously with WJZ on 560 kc., 2½ KW, using DA from 9 p.m. EST.

KTHS—Hot Springs-Chamber of Commerce, Hot Springs National Park, Ark.—Granted extension until May 1, 1940, of special authority to operate on 1060 kc., simultaneously with WBAL from 6 a.m. to local sunset, suspend operation from local sunset to 8 p.m., and operate unlimited time from 8 p.m. to midnight.

WBMM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension until May 1, 1940, of special experimental authority to operate synchronously with KFAB from LS at Lincoln, Neb. to midnight.

KFAB—KFAB Broadcasting Co., Lincoln, Neb.—Granted extension until May 1, 1940, of special experimental authority to operate synchronously with WBMM from local sunset at Lincoln, Neb. to midnight.

**DESIGNATED FOR HEARING**

Louis R. Spiwak & Maurice R. Spiwak, d/b as L & M Broadcasting Co., Ottumwa, Iowa.—Application for construction permit to erect a new station to operate on 1210 kc., 100 watts, unlimited time.
watts night, 250 watts day, unlimited time. Exact transmitter site and type of antenna to be determined with Commission's approval. (Application designated for hearing to determine financial, technical, and program qualifications of applicants; the character and nature of program and technical service proposed to be rendered; the extent and nature and effect of any electrical interference which would result should the proposed station operate simultaneously with stations KGJO, KFJB and the station proposed by pending application of J. D. Flavey.

**MISCELLANEOUS**

W6XDU—Don Lee Broadcasting System, Portable-Mobile, area of Los Angeles.—Granted license to cover construction permit as modified, for new television station; frequencies 321000-327000 kc., 6.5 watts.

W2XAB—Columbia Broadcasting System, Inc., New York City.—Granted license to cover construction permit as modified, for new television station; frequencies 408000-450000 kc., 100 watts day.

W2XAK—Columbia Broadcasting System, Inc., New York City.—Granted license to cover construction permit as modified, for new television station; frequencies 408000-450000 kc., 100 watts day.

W2XMN—King-Trendle Broadcasting Corp., Detroit, Mich.—Granted special temporary authority to operate with power of 250 watts and antenna input.

W2XMN, to be operated simultaneously with station WMPC, to be operated simultaneously with station W2XBM, to be operated simultaneously with station WGMF, to be operated simultaneously with station W2XAJ, to be operated simultaneously with station W2XAK, to be operated simultaneously with station W2XAK.

WMK—World Publishing Co., Omaha, Nebr.—Denied special temporary authority to operate from 7:15 p.m. to 7:30 p.m., CST, on January 1, 1940, for the purpose of broadcasting the Rose Bowl game in its entirety.

WBAA—Purdue University, West Lafayette, Ind.—Denied special temporary authority to operate from 10:00 p.m. to 11:00 p.m., EST, on January 1, 1940, for the purpose of broadcasting the Rose Bowl game in its entirety.

WHB—WHB Broadcasting Co., Kansas City, Mo.—Granted special temporary authority to operate from 5:15 p.m. to 12:00 midnight, CST, January 1, 1940, to conclusion of Rose Bowl football game, in order to be able to broadcast the game in its entirety.

Edwin H. Armstrong, North of Alpine, N. J.—Granted special temporary authority to operate a 1-KW frequency modulated transmitter on 43 mc., at the site of the transmitter of station W2XBM, to be operated simultaneously with station W2XMN (40 kc. on 42.8 mc.), in order to secure data on adjacent channel operations in preparation for the February 28, 1940, hearing on frequency modulation, for a period of 30 days.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from 6:00 p.m. to 7:00 p.m., EST, on January 1, 1940, to permit KFRU to broadcast Rose Bowl football game.

W2XAJ—Columbia Broadcasting System, Inc., New York City.—Granted special temporary authority to operate from 6:00 p.m. to 7:00 p.m., EST, on January 1, 1940, in order to broadcast the Rose Bowl football game.

W2XBM—Columbia Broadcasting System, Inc., New York City.—Granted special temporary authority to operate from 6:00 p.m. to 7:00 p.m., EST, on January 1, 1940, to permit KFRU to broadcast Rose Bowl football game.
APPLICATIONS FILED AT FCC

790 Kilocycles

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Authority to determine operating power by direct measurement of antenna power.

1110 Kilocycles

KSOO—Sioux Falls Broadcast Assn., Inc., Sioux Falls, S. D.—Construction permit to change frequency from 1110 kc., limited time, to 710 kc., unlimited, install directional antenna for night use and move transmitter.

1210 Kilocycles

KVSO—The Ardmorite Publishing Co., Inc., Ardmore, Okla.—Modification of license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

1350 Kilocycles

NEW—Wendell Mayes, Joe N. Weatherby and Wm. J. Lawson, d/b as Brown County Broadcasting Co., Brownwood, Texas.—Construction permit for a new broadcast station to be operated on 1350 kc., 500 watts, unlimited time.

KWJ—Thomas Patrick, Inc., St. Louis, Mo.—Construction permit to change frequency from 1350 to 630 kc., changes in antenna for nighttime use, changes in equipment (contingent on applications WGBF and KFRU being granted). Amended: To request increase in power from 1 KW night, 5 KW day, to 5 KW day and night.

1370 Kilocycles

NEW—Lookout Mountain Co. of Georgia, Lookout Mountain, Ga.—Construction permit for a new broadcast station to be operated on 1370 kc., 100 watts night, 250 watts day, unlimited time. Amended: To request 250 watts day and night, and transmitter site to be determined, Chattanooga, Tenn.

NEW—Chilton Radio Corp., Dallas, Texas.—Construction permit for a new broadcast station to be operated on 1370 kc., 250 watts, unlimited time. Request facilities relinquished by station KFJZ.

Lackawanna Broadcasting Co., Inc., Scranton, Pa.—Dismissed with prejudice application for construction permit to erect a new broadcast station to operate on 1370 kc., with 250 watts day, 100 watts night, unlimited time. (Applicant failed to appear at hearing to offer testimony in support of the application.)

Palm Radio Company, Fort Myers, Fla.—Denied petition requesting that the Commission withhold actual issuance of a construction permit to Fort Myers Broadcasting Company (WFTM), and designate petitioner's pending application for construction permit for hearing immediately.

KMPC—The Station of the Stars, Inc., Beverly Hills, Calif.—Granted modification of construction permit for authority to use antenna and transmitter formerly used by station KECA, and move to KECA's former site, 1418 West 81st St., Los Angeles, Calif.

KWJJ—KWJJ Broadcast Co., Inc., Portland, Ore.—Granted extension of special temporary authority to operate on 1040 kc., limited time, and resume operation from 9 p. m. to 3 a. m., PST: beginning February 1, pending final action on application (B5-M-648), but not beyond February 1, 1941.

WRPM—Radio Air Service Corp., Portable-Mobile.—License to cover construction permit (B2-PRE-284) for new relay broadcast station. Amended: To change name to United Broadcasting Company.

WEHP—The Fort Industry Co., Mobile.—Modification of license to increase power from 25 watts to 50 watts.

WAUW—J. T. Ward, tr. as WLAC Broadcasting Service, Portable-Mobile.—License to cover construction permit (B3-PRE-326) for new relay broadcast station.

**FEDERAL TRADE COMMISSION ACTION**

**COMPLAINTS**

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**Jay Holtz Company**—Charging violation of the Federal Trade Commission Act through promoting the sale of merchandise by use of lottery methods, a complaint has been issued against Jacob and Abraham L. Holtz, trading as Jay Holtz Company, 889 Broadway, New York.

It is alleged that the respondents sell toilet sets, pillow cases, blankets, smoking stands, electric appliances, zipper bags and other merchandise, and that to their customers the respondents supply "Bingo" sets by means of which the customers may resell the respondents' products to ultimate consumers in a manner involving operation of a game of chance, gift enterprise or lottery scheme. (3979)

**Herman Nelson Corporation**—Moline, Ill., manufacturer of ventilating equipment, has been served with a complaint charging misrepresentation in the sale and distribution of its product.

In advertising in periodicals, catalogs and other printed matter, the complaint alleges, the respondent designates and refers to its equipment as "air conditioning," and represents that it will air-condition school buildings and other buildings in which it may be installed.

The term "air-conditioning," the complaint continues, signifies simultaneous control by a mechanical device of various factors affecting both the physical and chemical conditions of the atmosphere within a given structure, such factors including temperature, humidity and the motion or circulation of the air within the structure. The respondents' product, the complaint alleges, is an air ventilating unit only, being a mechanical device for ventilating the room in which it is installed, and heating the air drawn from the outside through a vent in the wall of the building. No provision is made for adding moisture to the air, taking moisture from it, or for cooling the air below the temperature of that outside the building. (3981)

**STIPULATIONS**

The Commission has entered into the following stipulations:

**Club Supreme**—See Success Club.

**W. H. Fabry Manufacturing Co., Inc.**—Alhambra, Calif., manufacturer of "The Fabreeze Air Cooler," agrees to discontinue employing the words "Air Cooler" either as part of the trade name or designation for its device or in any other way as descriptive of that product, the effect of which may tend to create the belief that the action of the device on the air which passes through it produces a useful degree of cooling regardless of atmospheric conditions, or in those areas of the country where the relative humidity is high. The stipulation provides that if the words "Air Cooler" are so used, they shall be accompanied by other explanation indicating clearly that the device's action will be effective as a cooling medium only under certain atmospheric conditions, as for example, in areas of normal low relative humidity. (2623)

**John F. Jevnikar**—708 Ninth-Chester Building, Cleveland, agrees to desist from representing that he is familiar with the individual needs of his prospective customers in the sale of wigs and toupees, or that he has all the necessary data on hand, and, intentionally or otherwise, that he has records of prospective customers sufficient to enable him to repair, adjust or otherwise service their wigs or toupees, when such are not the facts. The stipulation points out that the respondent did not have all the necessary data on hand to serve such customers; that in the hair business toupees and wigs have to be returned by customers at regular intervals for cleaning, adjusting and repairing, and that in order to perform these services properly it is necessary to have records showing the color and texture of the hair and other data, which the respondent Jevnikar himself did not have. (2616)
Key Systems—Dorsey E. Wynkoop, trading as Key Systems and as National Credit Rating Bureau, 358 West 59th Place, Los Angeles, sells mimeographed material purportedly describing plans for use by purchasers in the operation of collection agencies by mail. He agrees to desist from representing that he has plans which have been approved by chambers of commerce or legislative bodies; that profits from business based on his plans ordinarily are from $3,000 to $5,000 a year, or that profits of $10,000 to $25,000 a year are not unusual; and that the offer which the respondent customarily makes is a special offer. He also stipulates that he will discontinue use in advertisements of quotations purporting to be excerpts from ‘so-called unsolicited expressions of appreciation from persons or concerns which use ‘Key Folios’, sold by him, when in fact the excerpts do not properly convey the meaning of the original letters, and that he will cease using, in connection with the sale of his plans, the trade name “National Credit Rating Bureau”, alone or in conjunction with the phrase “A National Organization”, so as to imply that the respondent is associated with or operates a nationwide organization or performs a credit rating service, national or otherwise, when such are not the facts. (2620)

Kress & Owen Company, 361 Pearl St., New York, selling medicinal preparations designated “Glyco-Thymoline”, a liquid, and “Glyco-Thymoline Couch Drops”, agrees to cease representing, directly or by implication, that use of these preparations will prevent, in a pharyngitic sense, colds, sore throats or coughs, prior to the establishment of the infections which cause these conditions, and that they will stop, in a curative sense, colds, sore throats or coughs, if and when the infections which cause these conditions have been established. Other representations to be discontinued are that use of “Glyco-Thymoline” will aid in the relief of irritated and inflamed mucous membranes or be of any benefit thereto in any part of the body; and that, aside from its anti-acid properties, it has any therapeutic properties beyond its ability to aid in cleansing or soothing and thereby helping to heal, when used on the mucous membranes of several different parts of the body. (02478)

Landon School—Corwin Landon, trading as Landon School. National Building, Cleveland, in the sale of a correspondence course in cartooning, agrees to cease representing that the price customarily charged is a special reduced rate, and that 2,000 or any other number of his students are now successful comic artists or cartoonists, when there are no available facts to substantiate this claim. (2619)

National Credit Rating Bureau—See Key Systems.

Robert J. Pierwe, Inc., 78 Reade St., New York, in the sale of drug sundries, agrees to desist from representing, directly or indirectly, that it is the manufacturer of any product offered for sale by it, when such is not a fact. The stipulation relates that the respondent corporation represented itself as the manufacturer of a prophylactic product designated “Hercules” when in fact it merely distributed this article, purchasing it from the manufacturer. (2621)

Richards’ Electro-Fence Company—Fred F. Richards, trading as Richards’ Electro-Fence Company, Payette, Idaho, in the sale of “Electro-Fence Units” for fencing in of livestock, agrees to cease advertising that by the installation of electric fences or of any “Electro-Fence Unit”, anyone can thereby effect a saving of any definite amount, irrespective of the extent of fencing required; that any unit selling at a lower price than “Electro-Fence Units” is without a built-in indicator; that the voltage of any of the respondent’s units is greater than that of any other make; that a warning signal device or mechanisms used to change alternating current to direct current and permit only a small amount of current to reach the fence at one time, are exclusive features of the “Electro-Fence Units”, and other representations. (02480)

Success Club—Selling lists of persons desiring correspondence for social and matrimonial purposes, Gladys Fore, Oxford, Fla., trading also as “The Success Club,” “The Sunshine Club” and the “Club Supreme,” has entered into a stipulation to discontinue misleading representations in the sale of her products.

In advertising, the respondent, according to the stipulation, represented: “The $2 you pay shows your good faith and pays printing, mailing, etc., expended in your behalf.”

Other advertising representations, according to the stipulation, were: “Lovable lady, money, Romantic, with means,” **” “Man, very romantic, congenial, with money.” **” “An attractive lady has just enrolled in my club who owns considerable property.”

In her stipulation, the respondent admitted, among other things, that the trade names mentioned in her advertising are owned and controlled by her and do not represent competitive enterprises, and that she had not made reasonable investigation into the financial or other standing of the members but merely repeated the statements made to her by them. Under the stipulation, the respondent agrees to cease representing that persons listed with her or holding membership in any of her enterprises are assured that golden opportunities are awaiting them; that persons listed with her are worth any specified amounts, or have any specified income, or any social, business or financial standing other than that disclosed by competent investigation; that any offer is special unless it is less in price than the usual or regular price charged, and limited in time; that $2 down payment in The Sunshine Club is used to pay for printing, mailing, etc., or is expended in behalf of the purchaser, or that a coupon mentioned in connection with the sale of membership in that club is of any value. (02475)

Sunflower Hatchery—Ernest A. Berry, trading as Sunflower Hatchery and Sunflower Poultry Farm & Hatchery, Newton, Kans., has entered into a stipulation to cease misleading representations in the sale of his product, baby chicks.

The respondent agrees to desist representing, by use of such expressions as “Livability Guaranteed,” that he guarantees the livability of all grades of chicks sold by him unless and until he actually makes reimbursement in full for all losses by death. A further representation to be discontinued is that the respondent carries insurance to protect his customers from loss due to death of any chicks purchased from him, unless and until he carries insurance with an accredited insurance company for the protection of his customers against his failure to make reimbursement in accordance with his agreement.

The respondent also agrees to discontinue advertising that the breeders producing his chicks are inspected by the American Poultry Association, until the breeders actually are inspected by an impartial representative of that association. (02479)

Sunflower Poultry Farm & Hatchery—See Sunflower Hatchery.

Sunshine Club—See Success Club.

Superior Shirt Company, 1216 Arch St., Philadelphia, in the sale of its garments, agrees to cease using the statement “U. S. Tested” or other representation of similar implication, the effect of which may tend to convey the impression that its garments have been tested by the United States Government or a branch thereof, when such is not a fact. (2613)

Tomil Research Laboratories—Harry Tomblack, trading as Tomil Research Laboratories, New York, N. Y., agrees to cease advertising that application of his preparation “Albaderm” to the skin will of itself relieve acne, blackheads, whiteheads or other skin blemishes; that by continued use of this product alone, for any given period of time, persons with pimples, acne, blackheads or other skin blemishes can obtain permanent relief therefrom, and that “Albaderm,” or the ingredients composing it, will remove bacterial infections causing skin blemishes. Among other representations to be discontinued are that application of “Albaderm,” according to the directions prescribed, has brought happiness to hundreds, and that application of the product to the skin is harmless in all cases. The respondent also stipulates that he will cease
CEASE AND DESIST ORDERS

The following cease and desist orders have been issued during the week:

**Giuffrè Brothers, Inc.—See A. Schottland, Inc.**

**Howard D. Johnson Company, 89 Beale St., Wollaston, Mass.,** has been ordered to cease and desist from representing factory-made food products as being home-made.

The Commission finds that the respondent, who manufactures ice cream and other food products, has represented, among other things, through advertisements in newspapers, through other printed matter and in radio broadcasts: "Howard D. Johnson Company, Makers of Howard Johnson's home made ice cream, candies and pastries," and "Howard Johnson food is wholesome—home cooked," while in fact the products were made in a factory, of the ordinary ingredients and by the ordinary methods of production used in factories manufacturing such products for sale.

The respondent is ordered to cease and desist from representing that its food products are home-made or home-cooked, unless they are in fact made or cooked in the manner and of the ingredients characteristic of the preparation of such products in the home, for consumption in the home, as distinguished from factory-made products. (3827)

**Matti & Briganti Company—See Premier Color Works.**

**Premier Color Works—Fred C. Mattia, trading as Premier Color Works and as Mattia and Briganti Company, 382 Pearl St., New York,** has been ordered to cease and desist from misrepresentations in connection with the sale and distribution of a line of effervescent and laxative products designated "Ave Maria," "Ave Maria Effervescent Preparation" and "Ave Maria Laxative Preparation."

The Commission finds that the respondent Mattia is engaged in the manufacture and sale of the products, and that on cartons and containers in which the products are packaged, the respondent has represented: (1) That the formulas from which said products are manufactured are or were originated or recommended by an official or representative of the Royal University of Naples, or by any other person or persons who, in fact and in truth, have not originated or recommended said formulas; (2) Through the use of medals or any other decoration depicted on the containers and cartons in which said products are packaged, or in any other manner that said products have been awarded any medals, prizes or other awards of merit by any international exposition or by any other exposition or by any divisions thereof, until and unless said products have in fact won the awards represented. The respondent Mattia is ordered to cease and desist from representing:

(1) That the formulas from which said products are manufactured or were originated or recommended by an official or representative of the Royal University of Naples, or by any other person or persons who, in fact and in truth, have not originated or recommended said formulas;

(2) Through the use of medals or any other decoration depicted on the containers and cartons in which said products are packaged, or in any other manner that said products have been awarded any medals, prizes or other awards of merit by any international exposition or by any other exposition or by any divisions thereof, until and unless said products have in fact won the awards represented.

The Commission's case as to Michael P. Briganti, named in the complaint as a respondent in this proceeding, was closed without prejudice to the Commission's right to reopen it and continue prosecution should such action be warranted by the facts. (3826)

**Prime Hat Company, Inc., 97 East Houston St., New York, and Vincent Gerbino, Samuel Scifo, Vito Digregorio and John Scifo, individually and as officers of the corporation, have been ordered to cease and desist from misrepresentation in the sale and distribution of hats made from second-hand materials.**

In the course of the conduct of their business, the respondents sell old, worn and used felt hats, which are then cleaned, steamed, ironed and shaped, and fitted with new trimmings, sweat bands and labels. The hats are then sold to jobbers and wholesale dealers, the findings continue, and they resell them to retail dealers, who sell them to the public without disclosing the fact that the hats are manufactured from felts previously worn, and are not new hats.

The Commission finds that the respondents also use the words "Quality Hats" in designating their merchandise. Immediately upon the words "Quality Hats" or under similar terms, the respondents cause to be embossed the words "Made Over Hat."

The methods of manufacture of the respondents and others who make hats from old, used and worn materials were found to be similar in part to the methods used in many instances by manufacturers of hats from new but shop-worn hat bodies which have never been worn or used. The methods of manufacture of the respondents and others who make hats from old, used and worn materials were found to be similar in part to the methods used in many instances by manufacturers of hats from new but shop-worn hat bodies which have never been worn or used. The respondents are ordered to cease and desist from representing that hats composed in whole or in part of used or second-hand materials are new, or are composed of new materials, by failure to stamp in the sweat bands thereof in conspicuous and legible terms which cannot be removed or obliterated without mutilating the materials are new, or are composed of new materials, by failure to distinguish from hats made from shop-worn hat bodies which have never been worn or used. The respondents are ordered to cease and desist from representing that hats composed in whole or in part of used or second-hand materials are new, or are composed of new materials, by failure to stamp in the sweat bands thereof in conspicuous and legible terms which cannot be removed or obliterated without mutilating the materials are new, or are composed of new materials, by failure to distinguish from hats made from old, worn and previously used hat bodies which have never been worn or used. The respondents are ordered to cease and desist from representing that hats composed in whole or in part of used or second-hand materials are new, or are composed of new materials, by failure to stamp in the sweat bands thereof in conspicuous and legible terms which cannot be removed or obliterated without mutilating the materials are new, or are composed of new materials, by failure to distinguish from hats made from old, worn and previously used hat bodies which have never been worn or used.
the hats, then such stamping must appear on the bodies of the hats in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bodies. The respondents are also ordered to cease representing in any manner that hats made in whole or in part from old, used or second-hand materials are new, or are composed of new materials. (3830)

Ralphson Purina Company, St. Louis, engaged in the manufacture and distribution of livestock feeds, cereal foods, and food for dogs and other animals, is ordered to desist from misrepresentation in the sale and distribution of "Purina Dog Chow." In pamphlets, circulars, labels and other advertising matter, the Commission finds, the respondent represented that the product contains pure beef, pure meat, and meat. The ingredient which respondent represents as pure beef, pure meat, or meat, is really meat meal, or dehydrated meat meal.

Chemically, meat is composed of four food elements, which are protein, fat, moisture and calcium. In the manufacture of the meat, the Commission finds, the heating processes used by all the companies from which respondent purchases the ingredients in "Purina Dog Chow," designated as meat or beef, remove from the original contents the fat and moisture.

The order against the Schottland and Valmor corporations directs that all persons and corporations who purchase and sell products are manufactured in their entirety by the respondent. The order also prohibits use of the word "Silk" or other terms importing silk in the sale of any products, rope and cordage which are made of reclaimed Manila fiber.

In the sale of its products, the respondent, according to findings, used the words "Pure Manila" as a designation when in fact such products are not rope or cordage manufactured from new and unused, pure Manila fiber.

The respondent is directed to cease representing, by means of the phrase "New manufacturers of pure Manila rope and fiber," or through employment of any other words implying that it is the manufacturer of the products it sells, that it manufactures the rope and cordage it sells, unless and until it actually owns and operates, or directly and absolutely controls, a plant wherein such products are manufactured in their entirety by the respondent. (3612)

Universal Cordage Company, Inc., 312 Bridge St., Brooklyn, has been served with an order requiring it to cease and desist from misrepresentations in the sale of its products, rope and cordage which are made from reclaimed Manila fiber.

The order against Gimbel Brothers, Inc., directs that it cease using the words "Wool" or "Woolens" or other words descriptive of wool to describe a fabric or product not composed wholly of wool, and provides for the use of qualifying language in designating fabrics or products composed in part of wool and in part of other fibers. The order also prohibits Gimbel Brothers, Inc., from representing in any manner that fabrics or products sold by it contain wool in greater quantity, percentage or degree than is actually the case.

The Commission ordered that the complaint in this proceeding be dismissed as to Morris Kaplan & Son, Inc., which was named a respondent in the proceeding. Findings are that the products involved in this case were not shipped by Morris Kaplan & Son, Inc., in interstate commerce, and that that corporation retained no control of the goods after they were sold to Gimbel Brothers. (3276 & 3364)

A. Schottland, Inc.—Orders have been issued in two cases requiring New York corporations to discontinue misleading representations in connection with the fiber content of fabrics or garments sold.

Respondents in one of these cases are A. Schottland, Inc., 1441 Broadway, and Valmor Undergarment Company, Inc., 140 Madison Ave., and in the other case, Gimbel Brothers, Inc., Broadway and 33rd St.

A. Schottland, Inc., manufactures fabrics at its factories in Rocky Mount, N. C., and Nanuet, N. Y., while Valmor Undergarment Company, Inc., manufactures women's undergarments and allied products. The Schottland corporation was found to have supplied customers with tags and labels to be attached to garments made from certain of the Schottland company's fabrics, such tags and labels featuring the words "Pure Dye" and "Crepe" in prominent type and the words "DuPont Rayon and Silk" in smaller type, so that purchasers and garments manufacturers were given the impression that the products so designated were silk, when in fact they were composed entirely of rayon.

Findings are that Valmor Undergarment Company, Inc., purchased certain fabrics from the Schottland corporation and used the tags and labels furnished by Schottland and also display folders to designate its finished undergarment and allied products as silk, when they were not composed of silk.

The order against the Schottland and Valmor corporations directs that they cease using the words "Pure Dye" or other words of similar import to designate fabrics not composed wholly of unweighted silk and provides that certain qualifications be made in designating a fabric or material composed in part of unweighted silk and in part of materials other than unweighted silk. The order also directs that the respondents discontinue use of the words "Satin," "Tafetta" or "Crepe" or words of similar import to describe a fabric or product not wholly composed of silk. The order provides for the use of certain qualifying language when such words truly designate the type of weave, construction or finish. The order also prohibits use of the word "Silk" or other terms including that word or a colorable simulation thereof to designate a fabric or product not wholly composed of silk. The order provides for proper qualification in designating a fabric or product composed partly of silk and partly of materials other than silk.

Gimbel Brothers, Inc., department store, was found to have purchased from Morris Kaplan & Son, Inc., 222 West 39th St., wholesale and jobber, a quantity of dress goods or fabrics known as "mill ends" which Gimbel Brothers advertised in a special sale in March, 1938, as being "woolens" and "luxurious woolens," when in fact they consisted of some pieces of all wool, some composed of wool and rayon, some composed of wool, rayon and cotton and others composed of wool and cotton.

Tests made by the National Bureau of Standards. Washington, of 10 pieces of the fabrics in question selected at random, showed only 4 as being all wool, while the remaining 6 were composed in large part of cotton and rayon. Other tests, both microscopic and chemical, conducted by the chief chemist of the Forstmann Woolen Company, showed that the wool contents of 3 pieces of the cloth chosen at random were only 30, 34 and 60 per cent, respectively. Finally, in tests made by Gimbel Brothers, through the Industrial By-Products and Research Corporation, only 7 out of 12 pieces tested proved to be all wool. The other 5 pieces contained from 31.1 per cent rayon to 66.2 per cent cotton and rayon.

The order against Gimbel Brothers directs that it cease using the words "Wool" or "Woolens" or other words descriptive of wool to describe a fabric or product not composed wholly of wool, and provides for the use of qualifying language in designating fabrics or products composed in part of wool and in part of other fibers. The order also prohibits Gimbel Brothers, Inc., from representing in any manner that fabrics or products sold by it contain wool in greater quantity, percentage or degree than is actually the case.

The Commission ordered that the complaint in this proceeding be dismissed as to Morris Kaplan & Son, Inc., which was named a respondent in the proceeding. Findings are that the products involved in this case were not shipped by Morris Kaplan & Son, Inc., in interstate commerce, and that that corporation retained no control of the goods after they were sold to Gimbel Brothers. (3276 & 3364)

U-Need Candy Co., Inc., 1231 West Washington Ave., South Bend, Ind., and Louis J. Weger, Mrs. Louis J. Weger and Charles R. Hoesy, individually, have been ordered to desist from use of lottery methods in the sale and distribution of candy to ultimate consumers.

The Commission finds that the respondents sold to jobbers and dealers assortments of candy so packaged or assembled as to involve the use of games of chance, gift enterprises or lottery schemes.

The Commission orders the respondents to cease and desist from selling or distributing candy or other merchandise so packed and assembled that sales to the public may be made by means of a lottery; supplying or placing in the hands of others, assortments of candy or other merchandise, together with push or pull cards, punch boards or other lottery devices which may be used in selling, or distributing the candy or other merchandise to the general public; supplying or placing in the hands of others, lottery devices, either with candy assortments or other merchandise, or separately, which devices may be used in selling the candy or other merchandise to the public; and selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme. (3855)

Valmor Undergarment Company, Inc.—See A. Schottland, Inc.

Yardley of London, Inc., has been ordered to discontinue certain misleading representations in the sale of cosmetics. The respondent operates a plant in Union City, N. J. and a retail shop at 620 Fifth Ave., New York.

3947
January 5, 1940
Findings are that many users of cosmetics and perfumes consider that such articles made or compounded in England are superior to similar articles produced in the United States, and that, in connection with the sale of its preparations, the respondent made representations which had a tendency to mislead consumers into the mistaken belief that all of its preparations are manufactured and compounded into the finished product in England and then imported into the United States.

In newspaper and other periodical advertisements, on labels and in other ways, the findings continue, the respondent corporation referred to its products as being English and imported articles, using names such as “Yardley’s English Lavender,” “Yardley’s Famous English Lavender Soap,” “English Lavender,” and “Yardley’s English Lavender Bath Salts.”

It was found that the procedure generally followed in manufacturing the respondent’s products included the receipt of certain imported ingredients in bulk from its parent company, Yardley & Co., Ltd., of London, and the mixture of these ingredients, in most cases, with certain domestic ingredients at its plant in Union City, N. J., in accordance with the parent (London) company’s formulas.

The Commission’s order directed that, in connection with its sale of toilet requisites and cosmetics, including, without limitation, perfumes, bath salts, facial creams, brilliants and after shaving lotions, the respondent corporation cease representing, through use of the word “London,” “English,” or “Old English,” or in other ways, that any of its preparations which were in fact made, compounded, diluted or bottled in the United States, or in any place other than England, were so produced in England or are of English origin; provided, however, that the country of origin of the various ingredients thereof may be stated when immediately accompanied by an explanation that such products were made, compounded, diluted or bottled, as the case may be, in the United States or in such place other than England.

The order also prohibits use of the terms or phrases “33 Old Bond Street,” “Straight from Bond Street,” or any other words or phrases of similar import to describe its preparations which were in fact made, compounded, diluted or bottled in the United States or in any place other than England.

A further representation forbidden is use of the word “London” as part of the respondent’s corporate name in connection with the sale of its cosmetic products which were in fact made, compounded, diluted or bottled in the United States or in any place other than England, without clearly and conspicuously stating in immediate connection therewith that such products were made, compounded, diluted or bottled, as the case may be, in the United States or in such place other than England.

FTC CLOSES CASE

The Federal Trade Commission has closed its case against Manuel Blattberg, trading as Monarch Hosiery & Neckwear Co., 112 South 7th St., Philadelphia, who was charged with the use of lottery methods in the sale of merchandise to ultimate consumers.

The case was closed without prejudice to the Commission's right to reopen it and resume proceedings, should future facts so warrant.
The Week in Washington

Enthusiastic approval of Broadcast Music, Inc., was registered last week at district meetings in New Orleans and Dallas, Texas. The North Carolina Broadcasters Association also endorsed the copyright plan. Neville Miller held meetings this week in Los Angeles, San Francisco, Portland and Seattle. From the Northwest he will head for Georgia and Florida. Alabama and Georgia broadcasters are meeting in Columbus, Georgia, on January 18. The following day Florida will meet at Orlando.

All broadcasters who have agreed to sign stock subscriptions should send in their papers to NAB Headquarters at the earliest possible moment. Likewise, those who have said they would recommend subscription to their station owners should endeavor to obtain this approval as soon as possible.

The Johnson Bill to ban beer and liquor advertising on the air came before the Senate Monday, but was passed over at the request of majority leader Barkley. Already approved by the Committee on Interstate Commerce and endorsed by the Federal Alcohol Administrator, the bill is still on the calendar.

Senator Thomas (D-Utah) introduced a bill to revise the Copyright Act, drafted by the so-called "Shotwell Committee". Although mainly satisfactory to the NAB, certain clauses are objectionable, and the NAB will seek revision.

Insertion in the Record of a couple of Townsendite petitions calling for revocation of the licenses of all stations adhering to the NAB Code was the only other event of the week in Congress affecting broadcasting.

At the NAB’s request, the FCC postponed from March 1 to April 15 the final date for filing 1939 financial reports. The NAB Accounting Committee pointed out that stations could use their tax forms, due March 15, to obtain much of the information required in the FCC report. Compiling the FCC report before the tax returns would cause a great deal of avoidable accounting, the Committee told the Commission.

Competition among stations "is the essence of the American system of broadcasting," the FCC emphasized in a decision.

"In the radio broadcast field public interest, convenience and necessity is served not by the establishment and protection of monopolies, but by the widest possible utilization of broadcast facilities," the Commission said.

"Experience has shown that the addition of a competitive station in a community does not bring about disastrous results sometimes predicted by the licensee of an existing station in the community. More often the protests of the existing station to the establish-
Southern Broadcasters Line Up for Broadcast Music

Enthusiastic approval of Broadcast Music, Inc., was registered last week at district meetings in New Orleans and Dallas, Texas.

After Neville Miller, NAB president, had explained the purpose of the new music corporation and how it would operate, substantial majorities of the broadcasters at both meetings voiced approval.

Meetings this week were scheduled for Los Angeles, San Francisco, Portland and Seattle, with Mr. Miller slated to speak at each.

Representatives of the following stations signed, promised to sign, or promised to recommend signing stock subscriptions to their station owners:

- **District 6—KARK, KALB, WJBO, WSMB, WWI, KTBS, KWKH, WJPR, WJDX, WSLI, WAML, WSKB, WQBC, WDOM, WHBO, WMC, WMPS, WREC, WLAC, WSM.**
- **District 13—KFDA, KGNC, KFDM, KRIS, WFAA, KGKO, WBAP, KPRC, KTRH, KXYZ, KFRO, KFYO, KUIN, KONO, KTSN, WOAI, KTEM, KGKB, KRYG, KWFT.**

Those at the New Orleans meeting:

- G. E. Zimmerman, KARK; W. H. Allen, C. Eddy Rogers, KALB; Chas. P. Manship, H. Vernon Anderson, WJBO; J. C. Liner, Sr., KMLB; Raymond F. Huffit, WNOE; J. H. Uhalt, WDSU; Charles C. Carlson, G. W. Oxford, WJBJ; Harold Wheelahan, WSMB; Chas. L. Deneneaud, W. H. Summerville, Jimmie Willson, Louis Read, F. A. Cavey, WWL; John C. McCormack, KTBS; John C. McCormack, KWKH; John R. Pepper, WJPR; Wiley Harris, WJDX; L. M. Sepaugh, WSLI; D. A. Matison, Hugh M. Smith, WAML; George Blumnestock, WSKB; O. W. Jones, Mrs. Frank Cashman, WAC; Norman A. Thomas, WDOM; Hoyt B. Wooten, WHBO; Henry W. Slavick, WMC; James C. Hanrahon, WMPS; Hoyt B. Wooten, WREC; S. O. Ward, WLAC; and Edwin W. Craig, WSM.

Those at the Dallas meeting:

- Neville Miller, NAB; DeWitt Landis, KFYO; Burton Bishop, KTEM; James R. Curtis, KFRO; Tifford Jones, KXYZ; Edgar Bell, WKY; O. L. Taylor, KGNC; J. M. Moroney, WFAA; M. E. Danbom, KGKB; J. M. Hayes, NBC; Sam Bennett, Lone Star Network; Jack Hawkins, KUIN; E. J. Roth, KONO; Foster Fort; Darrold Kahn, KFDM; Ken Simson, KRGV; H. C. Southard, WBAP; George Johnson, KTXS; J. W. Runyon, Times Herald; Dallas, Texas; Clyde Rembert, KRLD; Charlie Jordan, WRR; George Cranson, KGKO; Harold Hough, Ft. Worth Star-Telegram; Herbert Denny, Standard Radio; C. B. Locke, KFDM; Alex Keece, WFAA; Irvin Gross, WFAA; Martin R. Campbell, WFAA; Hugh Hallf, WOAI; Kern Tips, KPRC; Earl Strandberg, KFDA; O. C. Brown and J. I. Meyerson, Oklahoma Publishing Co., Oklahoma City, Okla.; W. M. Witty, RCA-Victor Co.; Ray Nichols, KVWC; Joe B. Carrigan, KWFT; Tifford Jones, KRIS; Tifford Jones, KTRH; and Ray Barnes, KPDN, Pampa.

**THE WEEK IN WASHINGTON**

*(Continued from page 3949)*

ment of a new station spring not from a desire to insure its continued operation in the public interest, but rather from the purely private interest of seeking a monopoly in a field in which the interests of the public are best served by competitive operation."

---

**NORTH CAROLINA BROADCASTERS ENDORSE BROADCAST MUSIC**

The North Carolina Association of Broadcasters, at its recent annual meeting in Charlotte, unanimously endorsed Broadcast Music, Inc. The following resolution was adopted after Don Elias, WWNC, had led the discussion:

"Be it moved that this meeting heartily endorses the formation of the Broadcast Music Corporation and urges all North Carolina broadcasters to subscribe to its stock and give it their support."

---

**NEW COPYRIGHT BILL BEFORE CONGRESS**

A bill (S. 3043) to revise the Copyright Act of 1909 was introduced in the Senate on January 8 by Senator Thomas (D-Utah) by request, and referred to the Committee on Patents. It is printed in the Congressional Record of January 8, page 134.

This bill was drafted by the so-called "Shottwell Committee," the Committee for the Study of Copyright set up by one of the foundations to study ways and means of promoting copyright relations between the United States and foreign countries, particularly Latin-America. It is the result of sixteen months' study by means of extended round-table discussions which took place in New York.

NAB, authors, publishers, motion picture producers, ASCAP, recording companies, and other interested groups, were represented and took part in the discussions. The bill is in the main satisfactory to NAB. However, certain clauses are deemed objectionable, and NAB will continue to endeavor to protect broadcasters' interests in all respects.

In its letter of explanation accompanying the bill, the Committee reported that it was unable to agree on extending the protection of copyright to renditions and mechanical transcriptions, and these subject matters, consequently, are not included in the bill.

The letter also noted that NAB is opposed to any minimum statutory damage for infringement by radio broadcasters.

---

**KRAMER HEADS HOUSE COPYRIGHT COMMITTEE**

Representative Charles Kramer, Los Angeles Democrat, is the new chairman of the House Patents Committee.
which handles copyright legislation. Mr. Kramer succeeds the late Representative William I. Sirovich (D-N. Y.). Representatives Lanham (D-Tex.) and Dunn (D-Penn.) were ahead of Mr. Kramer in seniority on the committee, but they elected to retain other committee chairmanships.

JOHNSON BILL

Here is the text of the Johnson (D-Colo.) bill, S. 517, pending on the Senate calendar:

S. 517
IN THE SENATE OF THE UNITED STATES
March 1 (legislative day, FEBRUARY 27), 1939
Referred to the Committee on Interstate Commerce and ordered to be printed

AMENDMENT
(In the Nature of a Substitute)

Intended to be proposed by Mr. Johnson of Colorado to the bill (S. 517) to amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio, viz: Strike out all after the enacting clause and in lieu thereof insert the following:

That section 316 of the Communications Act of 1934, as amended, is amended to read as follows:

"Sec. 316. (a) No person shall broadcast by means of any radio station for which a license is required by any law of the United States, and no person operating any such station shall knowingly permit the broadcasting of, any advertisement of or information concerning any alcoholic beverage if such advertisement or information is broadcast with the intent of inducing the purchase or use of any alcoholic beverage.

"(b) No person shall broadcast or direct or indirectly induce any other person to broadcast by means of any radio station for which a license is required by any law of the United States, and no person operating any such station shall permit the broadcasting of, any advertisement of or information concerning any alcoholic beverage if such advertisement or information is broadcast with the intent of inducing the purchase or use of any alcoholic beverage.

"(c) Any person violating any provision of subsection (a) or subsection (b) of this section shall, upon conviction thereof be fined not more than $1,000 or imprisoned not more than one year, or both, for each and every day during which such offense occurs.

"(d) All basic permits heretofore or hereafter issued under the provisions of the Federal Alcoholic Administration Act, as amended, shall be deemed to be conditioned upon compliance with the provisions of subsection (b) of this section. If the Administrator of the Federal Alcoholic Administration finds that any person who holds any such basic permit has willfully violated any provision of subsection (b) of this section, the Administrator shall by order, after due notice and opportunity for hearing to such person, revoke such permit or suspend such permit for such period as he may deem appropriate, provided that for a first violation of the conditions thereof the permit shall be subject to suspension only. Subsections (f), (h), and (i) of section 4 of such Act, as amended, shall apply to any proceeding under this subsection.

Amend the title so as to read: "A bill to amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio, and for other purposes."

FAA RECOMMENDS BAN ON LIQUOR ADVERTISING

W. S. Alexander, Federal Alcohol Administrator, in his annual message to Congress, discussing the general subject of advertising, states that "the script for approximately 425 commercial radio broadcasts is reviewed each month."

In his recommendations he asks "that radio advertising of alcoholic beverages" be prohibited.

New Legislation

FEDERAL

S. 3043, Senator Thomas (D-Utah) COPYRIGHTS—To revise the Copyright Act of March 4, 1909. Draft submitted by Shotwell Committee. Referred to Committee on Patents.

STATE

KENTUCKY:
H 4 (Schelen) MUSICAL COMPOSITIONS—Creating a monopoly board for the regulation and sale of musical compositions.

NEW YORK:
A 22 (Jarema) LOTTERIES—Authorizes legislature to permit cities to operate and conduct lotteries, the net proceeds of which are to be devoted to low-rent housing and slum clearance. Referred to Judiciary.
A 30 (Ostertag) EMPLOYMENT AGENCIES—Regulates private fee-charging employment agencies. Referred to Judiciary.
A 31 (Ostertag) EMPLOYMENT AGENCIES—Provides for regulating private fee-charging employment agencies and appropriates $17,500 to labor department. Referred to Ways and Means.
S 31 (Phelps) LOTTERIES—UNEMPLOYMENT RELIEF—Authorizes legislature to pass laws permitting lotteries to be conducted by the state for unemployment relief. Referred to Judiciary.

DATE FOR FINANCIAL REPORT POSTPONED TO APRIL 15

The NAB Accounting Committee has held numerous meetings with Mr. Norfleet and Mr. Sutton of the Accounting Department of the FCC during the past year regarding the proposed financial report forms 705-706 to be filed for 1939. Under Rule 1.361 of the Rules and Regulations adopted August 1, the report is due March 1, 1940.

The NAB Accounting Committee and Headquarters Office pointed out that much of the information requested...
could be taken from the tax forms required to be filed by March 15, and would, therefore, work a hardship on the stations to be compelled to file the report two weeks in advance of other governmental and state reports.

At the request of the NAB, the FCC at its meeting on January 9 extended the filing date until April 15. The FCC Accounting Department desires information contained on Schedule 8 at the earliest possible date and the Commission in extending the filing date of the report to April 15 did so with the understanding that the single sheet for analysis of time sales would be completed and returned promptly so that the Accounting Department could have the information contained in Schedule 8 at the earliest possible moment. Later, when the completed report forms are filed, the information can be re-copied in its regular place in the report.

The Solicitor General of the United States has ruled that reports such as 705-706 should be mailed only as first-class matter and if sent by express instead of mail, the postage must be included in addition to the express charges.

The FCC release covering the extension of the filing date follows:

The due date for 1939 annual financial reports required of standard broadcast-stations was extended from March 1 to April 15 by action of the Federal Communications Commission today. This was in compliance with request of licensees, who pointed out that these reports are made from tax returns and that a severe hardship would be involved if they were required to submit the same in advance of filing their tax returns.

The Commission will provide the stations with a single sheet form for analysis of time sales for the past year, which is to be executed and returned to the Commission immediately.

The new simplified forms for the annual financial report, along with detailed instructions, will be available in a few days.

EXECUTIVE ENGINEERING COMMITTEE APPOINTED BY MILLER

Appointment of an Executive Engineering Committee by Neville Miller completes the engineering department organization of NAB. The engineering department now conforms with the other departments of NAB with a Director of Engineering, an Engineering Committee, and the newly formed Executive Engineering Committee.

The appointees were John V. L. Hogan, chairman, and E. K. Cohan, Paul de Mars, O. B. Hanson, Albert E. Heiser, and J. R. Poppele as members. Lynne C. Smeby, Director of Engineering; and Raymond Wilmotte, who was retained for a period of six months after the new director took office as an engineering adviser, will also meet with the committee.

The first Executive Engineering Committee meeting has been called by Chairman Hogan for Thursday, January 11, in New York City.

SUGGESTIONS ON FCC RULES ASKED BY NAB

The Rules and Regulations on broadcasting as revised by the FCC were adopted August 1, 1939. By this time you have had an opportunity not only to study the Rules but also to see how they work in actual practice. Your criticisms and suggestions concerning changes that you feel are needed would be helpful to Headquarters Office. The Secretary-Treasurer is now reviewing the Rules and Regulations with the thought of submitting suggestions to the recently appointed committee of the FCC which is studying this subject. Andrew Ring is chairman of this committee and the NAB is desirous of helping its members and assisting the Commission in correcting and changing any undue hardships which have developed under the Rules.

FCC SAYS COMPETITION IMPROVES RADIO PROGRAMS

"Competition in radiobroadcasting means, insofar as listeners are concerned in a particular community, a wider choice of programs, and consequently a heightened listener interest which may very well result in a greater amount of advertising expenditures because of increased listener hours with consequent increased revenues for both stations," declared the FCC in denying the petition of Virgil V. Evans, licensee of station WSPA, at Spartanburg, S. C., for rehearing or reconsideration of the Commission's grant to the Spartanburg Advertising Company of a construction permit for a new broadcast station at that place. The Commission further stated:

"In the radiobroadcast field public interest, convenience and necessity is served not by the establishment and protection of monopolies, but by the widest possible utilization of broadcast facilities. Competition between stations in the same community inures to the public good because only by attracting and holding listeners can a broadcast station successfully compete for advertisers. Competition for advertisers which means competition for listeners necessarily results in rivalry between stations to broadcast programs calculated to attract and hold listeners, which necessarily results in the improvement of the quality of their program service. This is the essence of the American system of broadcasting."

Experience has shown that the addition of a competitive station in a community does not bring about disastrous results sometimes predicted by the licensee of an existing station in the community. More often the protests of the existing station to the establishment of a new station spring not from a desire to insure its continued operation in the public interest, but rather from the purely private interest of seeking a monopoly in a field in which the interests of the public are best served by competitive operation."

The Spartanburg Advertising Company station proposes to operate on 1370 kilocycles, with a power output of 100 watts night, 250 watts day, unlimited time. Station WSPA operates on 920 kilocycles, with power of 1 KW, daytime hours.

DIES COMMITTEE LISTS COMMUNISTS-FASCISTS

The Dies Committee, in its annual report, lists the following as "Communist Front" organizations:

American League for Peace and Democracy
International Workers Order
American Student Union
The following organizations and individuals were listed as having taken part, in one way or another, in an attempt to create a "united Fascist movement":

- Knights of the White Camellia (George Deatherage)
- Militant Christian Patriots (Mrs. Leslie Fry)
- William Dudley Pelley
- Gerald B. Winrod
- Charles B. Hudson
- James True
- National Liberty Party (Frank W. Clark)
- E. N. Sanctuary
- Robert E. Edmondson
- The American Rangers (J. H. Peyton)
- The American White Guard (Henry D. Allen)
- The Constitutional Crusaders of America.

1940 NAB REPORTS BINDERS

Binders for 1940 NAB Reports have been mailed to all NAB members. A charge of $1.00 for each binder will be shown on the regular February 1 statement.

DUES CLASSIFICATION BLANKS

Dues classification blanks were mailed to all members on January 1st. Stations will materially assist the NAB accounting department if they will return these to headquarters as soon as possible.

All members should return one of these forms regardless of whether or not the amount of membership dues has changed. Such procedure is required by the By-Laws of the NAB.

PROCEDURE FOR TELEVISION HEARING OUTLINED

The FCC has announced that parties interested in the proposed television rules and regulations may appear in defense of, as well as opposition to the same at the public hearing scheduled to start at 10 o’clock next Monday morning, January 15, before the Commission en banc. Such participation will be limited, however, to evidence and argument in rebuttal to exceptions offered. Persons desiring so to participate may apply for time to the Commission at the hearing, at the close of the presentation of evidence and argument in support of objections.

The Commission also stressed that it will afford parties opportunity to be heard on specific recommendations of the Television Committee in addition to the proposed rules and regulations. The allocation table was cited as an example of such recommendations.

The following organizations have filed appearances:

ZENITH GETS HIGH FREQUENCY EXPERIMENTAL PERMIT

The FCC has announced grant of a construction permit for a new experimental high frequency broadcast station to the Zenith Radio Corporation of Chicago. The assignment is 42,800 kilocycles, 1 kilowatt, special emission for frequency modulation, unlimited time, in accordance with Commission rules and regulations for such experimental work.

The program of research and experimentation which the applicant proposes is expected to obtain data, particularly on the merits of wide band and narrow band modulation, which will be helpful at the informal engineering hearing on aural broadcasting on high frequencies, to open before the Commission on February 28th.

The Zenith corporation is licensee of television broadcast station W9XZV (42,000-56,000, 60,000-86,000 kilocycles, 1 kilowatt aural and visual power, A3 and A5 emission), already located in Chicago.

FCC AMENDS RECORD RULES

Amendment to Section 3.93 of Standard Broadcast Rules

The Commission on January 4, 1940, amended Section 3.93 of the Standard Broadcast Rules, effective immediately, to read as follows:

3.93 Mechanical records. Each broadcast program consisting of a mechanical record, or a series of mechanical records, shall be announced in the manner and to the extent set out below:

(a) A mechanical record, or a series thereof, of longer duration than thirty minutes shall be identified by appropriate announcement at the beginning of the program, at each thirty minute interval, and at the conclusion of the program; Provided, however, That the identifying announcement at each thirty minute interval is not required in case of a mechanical record consisting of a single, continuous uninterrupted speech, play, religious service, symphony concert or operatic production of longer duration than thirty minutes;

(b) A mechanical record, or a series thereof, of a longer duration than five minutes and not in excess of thirty minutes shall be identified by an appropriate announcement at the beginning and end of the program.

(c) A single mechanical record of a duration not in excess of five minutes shall be identified by appropriate announcement immediately preceding the use thereof;

(d) In case a mechanical record is used for background music, sound effects, station identification, program identification (theme music of short duration), or identification of the sponsorship of the program proper, no announcement of the mechanical record is required.

(e) The identifying announcement shall accurately de-
scribe the type of mechanical record used, i.e., where a transcription is used it shall be announced as a “transcription” or an “electrical transcription”, and where a phonograph record is used it shall be announced as a “record.”

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

The Federal Communications Commission has adopted a final order granting the applications of James R. Doss, Jr., licensee of Station WJRD, Tuscaloosa, Alabama, for renewal of license and for modification of license to operate unlimited time on 1200 kilocycles, with power of 100 watts night and 250 watts local sunset (previously operated on 1200 kilocycles, 250 watts, daytime hours).

Final order has also been adopted by the Commission granting the application of Opelika-Auburn Broadcasting Company for a construction permit to erect a new station in Opelika, Alabama, to operate on the frequency 1370 kilocycles, with 250 watts during day and 100 watts at night, unlimited time, subject to approval by the Commission of transmitter site and antenna system.

The Commission also has adopted a final order granting the application of KTSM, El Paso, Texas, to change its
frequency from 1310 kilocycles to 1350 kilocycles, increase its power from 100 watts night, 250 watts LS, to 500 watts, and from sharing time with WDAH to unlimited "upon condition that applicant surrender for cancellation the license of Station WDAH on or prior to the date on which KTSM undertakes to operate on the new assignment."

PROPOSED FINDING OF FACT

The Commission has tentatively granted the application of the Martinsville Broadcasting Company and denied the application of the Patrick Henry Broadcasting Company, both applying for authority to erect a new station in Martinsville, Virginia, to operate on 1120 kilocycles, 250 watts day, 100 watts night, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings are scheduled before the Commission in broadcast and television cases for the week beginning Monday, January 15. They are subject to change.

Monday, January 15
Public Hearing Before the Commission En Banc (Television)

In the Matter of Exceptions to the Rules and Regulations for Television Stations Tentatively Adopted by the Commission on December 21, 1939, and to Specific Recommendations of Its Television Committee.

NEW—Joe W. Engel, Chattanooga, Tenn.—C. P., 1370 kc., 250 watts, unlimited time.

Tuesday, January 16
WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, 1210 kc., 100 watts, unlimited time.

Wednesday, January 17
WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Renewal of license, 1390 kc., 1 kW, daytime.

APPLICATIONS GRANTED

WPTF—WPTF Radio Company, Raleigh, N. C.—Granted modification of license to change hours of operation from limited to unlimited on frequency 680 kc., using directional antenna from sunset at San Francisco, to 7 a.m. to 9 p.m., 300 watts power, unlimited time.

WJMS, Inc., Ashland, Wis.—Granted construction permit, effective January 10, 1940, authorizing erection of a new station to operate on 1570 kc., with 100 watts power, unlimited time, subject to approval by the Commission of exact transmitter location and antenna system. Applicant has now submitted satisfactory proof of authority to issue capital stock proposed to be issued and to do business in the State of Wisconsin.

KANS—The KANS Broadcasting Co., Wichita, Kans.—Granted license to cover construction permit as modified for changes in transmitting equipment and increase in power; frequency 1210 kc., power 250 watts, unlimited time.

KANS—The KANS Broadcasting Co., Wichita, Kans.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54, with certain additional power specifications.

KRLH—Clarence Scharbauer, Midland, Tex.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54, with certain additional power specifications.

WJAR—The Outlet Company, Providence, R. I.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54, with certain additional power specifications.

WTMA—Y. W. Scarborough and J. W. Orvin, d/b as Atlantic.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54, with certain additional power specifications.

WXXF—William G. H. Finch, New York, N. Y.—Granted special temporary authority to change from A3 emission to special emission, frequency modulation 75 kc. bend to make comparative tests on amplitude modulation, for a period not to exceed 30 days, results of test to be presented at February 28, 1940, hearing.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate from local sunset (4:30 p. m., PST) to the conclusion of basketball games only, on January 9, 11, 16, 18, 25, and 27, 1940; and to operate from 7:15 p. m., PST, to the conclusion of basketball games only, on January 5, 6, 8, 9, 13, 16, 17, 19, 20, and 27, 1940, in order to broadcast basketball games only.

WSAN—Frank M. Stearns, Salisbury, Md.—Denied special temporary authority to operate from 7 p. m. to 7:30 p. m., EST, on January 10, 1940, in order to broadcast a speech by Governor O'Conor of Maryland.

WEJL—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to use RCA-Victor transmitter for operation under New York area license of relay broadcast station WEJL in transmitting remarks by guests from their seats in different parts of the large NBC studio to the sound distribution system utilized as a public address system in connection with demonstration for members of the American Society of Civil Engineers, on January 10, 1940.

KIDW—Lamar Broadcasting Co., Lamar, Col.—Granted special temporary authority to remain silent for the period ending not later than January 10, 1940, pending adjustment of studio lease.

Lakeview Broadcasting Co., Willmar, Minn.—Granted petition for leave to amend application for new station to request frequency 1310 kc. instead of 680 kc., power of 100 watts instead of 250, and time of operation unlimited instead of daytime only.

Glenn D. Gillett and G. S. Wasser.—Granted petition to intervene in the hearing on the application for renewal of license of station WQDM, St. Albans, Vt., to operate on 1390 kc., 1 kW, daytime only.

WQDM—Regan & Bostwick, St. Albans, Vt., and Glenn D. Gillett and G. S. Wasser.—Granted joint motion insofar as it requests clarification of issue No. 5 of Bill of Particulars in re hearing on application for renewal of license of WQDM, and overruled motion in all other respects.

Glenn D. Gillett, Washington, D. C.—Granted petition to intervene in the hearing on the application for renewal of license of station WQDM, St. Albans, Vt., to operate on 1210 kc., 100 watts, unlimited time.

WRR—The City of Dallas, Texas.—Overruled petition to intervene in the hearing on the application of Chilton Radio Corp., and V. O. Stamps, both applicants for a new station in Dallas, to operate on 1370 kc., 250 watts, unlimited time. Exceptions to ruling noted by counsel for petitioner.

KEIL—KMTR Radio Corp., Portable-Mobile (area of Los Angeles, Calif.).—Granted modification of construction permit to increase power to 50 watts.

WEMZ—WHEC, Inc., Portable-Mobile (area of Rochester, N. Y.).—Granted license in lieu of reinstatement of high frequency relay broadcast station; frequencies 30820, 33740, 35820, 37980 kc., power 2 watts; to communicate as a relay broadcast station.

MISCELLANEOUS

KANS—The KANS Broadcasting Co., Wichita, Kans.—Granted license to cover construction permit as modified for changes in transmitting equipment and increase in power; frequency 1210 kc., power 250 watts, unlimited time.

KANS—The KANS Broadcasting Co., Wichita, Kans.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54, with certain additional power specifications.

January 12, 1940
APPLICATIONS FILED AT FCC

620 Kilocycles

WSUN—St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Construction permit to increase power from 1 KW to 15 KW, day and night, and make changes in directional antenna system, night use.

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—License to cover construction permit (Bl-P-2389) for increase in power, move of transmitter, install new equipment, and make changes in directional antenna system.

APPLICATIONS FILED AT FCC

630 Kilocycles

WFOR—Florida Broadcasting Co., St. Petersburg, Fla.—License to cover construction permit (Bl-P-4505), to increase power from 1 KW, day and night, to 25 KW, day and night, and make changes in directional antenna system, night use.

APPLICATIONS FILED AT FCC

750 Kilocycles

WXY—West Virginia University, Morgantown, W. Va.—Construction permit to increase power from 1 KW, day and night, to unlimited, and for use of antenna input in compliance with Sec. 3.54.

WATE—Basset Medical Center, Lynchburg, Va.—License to cover construction permit (Bl-P-4756) for increase in power from 1 KW, 5 KW day and night, to unlimited, and make changes in directional antenna system.
WSKB—McComb Broadcasting Corp., McComb, Miss.—License to cover construction permit (B1-P-2615) to use present licensed transmitter as an auxiliary transmitter at new site, increase power, and use antenna granted under B1-P-2369.

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Authority to determine operating power by direct measurement of antenna power (main transmitter).

WTOF—The Community Broadcasting Co., Toledo, Ohio.—Authority to determine operating power by direct measurement of antenna power (auxiliary transmitter).

WMBC—Midland Broadcasting Co., Kansas City, Mo.—Modification of construction permit (B4-P-2357) for increase in power, installation of directional antenna for nighttime use, further requesting authority to make changes in equipment.

WRVA—Larus & Brother Company, Inc., Richmond, Va.—License to use old W.E. D-9492 transmitter as auxiliary transmitter, and move from Mechanicsville, 4½ miles from city limits of Richmond, Va., to 12 miles southeast of Richmond, Va., on James River; use 5 KW power and directional antenna day and night.

WSAV—WSAV, Inc., Savannah, Ga.—License to use W.E. 106-B, transmitter as an auxiliary transmitter at 5057 Woodward Ave. (its present site), with power of 1 KW, emergency use only.

WOC—WOC, Inc., Kansas City, Mo.—Modification of license to change corporate name to WOC Broadcasting, Inc.

WNBX—Twin State Broadcasting Corp., Keene, N. H.—Modification of construction permit (B1-P-2415) for changes in directional antenna to use both day and nighttime; move of transmitter and studio; further requesting authority to make changes in directional antenna and install new transmitter, increase power to 5 KW, extend commencement date to 90 days after grant and completion date to 180 days thereafter.

KTBV—Knight-Trendle Broadcasting Corporation, Detroit, Mich.—Authority to determine operating power by direct measurement of antenna power.

WNBX—Twin State Broadcasting Corp., Keene, N. H.—Authority to cover construction permit (B1-P-2228) as modified for a new broadcast station to be operated on 1210 kc., 250 watts power, unlimited time, move transmitter to near Morrisville, N. C., transmitter site as 701 North San Jacinto, Houston, Tex.

KFSN—Fresno State Broadcasting Co., Fresno, Calif.—Construction permit to request station classification as III-A.

WOC—WOC, Inc., Kansas City, Mo.—Authority to determine operating power by direct measurement of antenna power.

KVOX—Out West Broadcasting Co., Colorado Springs, Colo.—Modification of license to request station classification as III-A.

WOR—World of Radio, Inc., New York, N. Y.—Modification of construction permit (B4-P-2345) for changes in equipment, increase in power, and change in hours of operation.

KTOX—Topeka Times Publishing Co., Topeka, Kans.—Licenses for a new station to be operated on 1210 kc., 250 watts power, unlimited time, make changes in site, power, and hours of operation.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KBEO—Keene Broadcasting Corp., Keene, N. H.—Construction permit to change corporate name to KBEO Broadcasting Company, Inc.

WOC—WOC, Inc., Kansas City, Mo.—Authority to cover construction permit (B1-P-2294) as modified for a new broadcast station to be operated on 1210 kc., 250 watts power, unlimited time, move transmitter to near Morrisville, N. C., transmitter site as 701 North San Jacinto, Houston, Tex.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

WOC—WOC, Inc., Kansas City, Mo.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KTVX—Knoxville Times Newspaper Co., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.
January 12, 1940

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following...
The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**Baby Touch Hair Remover Company**—J. O. Davies, trading as Baby Touch Hair Remover Company, St. Louis, manufacturer and distributor of a hair removing device designated "Baby Touch Hair Remover," is charged in a complaint with misrepresentation.

The complaint alleges the respondent, in advertising in magazines, newspapers and circulars, represents, among other things: "Take your Baby Touch Hair Remover and rub lightly (a baby's touch) over the parts where the hair is to be removed, using a circular motion * * * do not rub more than one-half minute in any one place * * *. Repeat this operation the following day and the third day. You will find the hair will disappear and the light massaging process has given your skin a new appearance and a loveliness of youth. * * *"

The complaint alleges that the respondent's product is merely an abrasive substance said to be "trimorite" and that its use according to directions will remove portions of the skin along with any hair removed and may cause abrasive injury to the skin and local infection. Its use, the complaint continues, will not give the skin the soft, white appearance of youth and beauty and its use will have no effect upon the hair follicles and will not retard or eradicate hair growth or have any effect upon it. (3986)

**Dow Chemical Company**—A complaint has been issued against Dow Chemical Company, Midland, Mich., alleging unfair disparagement of the product of a competitor.

Engaged in the sale of chemical preparations used in dry cleaning clothes, the respondent, is alleged to have represented to purchasers to use its preparation in preference to that of its competitor, Dow Chemical Company, and alleging unfair disparagement of the product of a competitor.

The complaint alleges that the preparation "Kolene," a competitive product for dry cleaning of clothes, is flammable and explosive when used under the usual conditions for dry cleaning; that it is a compound composed solely of tetrachloride and benzine, and is highly corrosive of metals of the dry cleaning machinery in which it is used. The complaint alleges that the preparation "Kolene," is neither explosive nor inflammable; is not dangerous when used under usual working conditions; is not a compound of tetrachloride and benzine only; is not highly corrosive of metals, and that the representations made by the Dow Chemical Company are false, misleading and unfairly disparaging to its competitor. (3991)

**Firestone Tire & Rubber Company**—Three Akron, Ohio, rubber tire manufacturers have been served with complaints alleging misleading representations in the sale of tires. The respondents are The Firestone Tire & Rubber Company and its subsidiary, Firestone Tire & Rubber Company, The Goodyear Tire & Rubber Company, and The B. F. Goodrich Company.

The complaint alleges that the respondents conduct nation-wide tire sales through their dealers, causing advertisements to be placed in newspapers and other periodicals in which it is falsely represented that the respondents' tires are being sold at various purported discounts from the regular prices, such sales usually being conducted just prior to Memorial Day, July 4, Labor Day and at other intervals.

In the complaint against the Firestone companies, it is alleged that the respondents advertised: "Save 25% with the New Firestone Convoy Tire—New High Quality at a New Low Price—Priced to Save You Money." For example, the complaint states that the standard list price of the 6.00-16 "Convoy" tire at a price of $6.37 as compared to the "former price" of $11.80 represented no saving whatever. It is alleged that the respondents advertised that their "Standard" tire was to be sold at a discount up to 50 per cent, for example, the company advertises its 6.00-16 size tire at a price of $7.98 showing a saving of $6.37 as compared to the "former price" of $14.35 and "including your old tire." The complaint also alleges that the purchase of the "Convoy" tire at the full price in effect at the time of the advertisement, and the saving was $2.37 instead of $6.37 on that size tire. The complaint continues that the alleged savings were further exaggerated in that they made no allowance for the customary trade-in value of the customer's old tires.

The Firestone companies allegedly represented that their "Convoy" tube was a first line tube sold at 50 per cent off, when in fact it was not their first line tube and was not sold at 50 per cent off list price of the "Convoy" tube, but instead the alleged savings were based entirely on the list price of their higher priced first line tubes and do not reflect any of the savings claimed. Consequently, the saving to the purchaser would have amounted to only 16.8 per cent rather than the advertised 25 per cent, according to the complaint.

The complaint also alleges that the Firestone companies represented that their tires were proved for safety at the annual Meineke 500 and advertised savings were further exaggerated in that the only Firestone tires so tested were not ordinary tires but specially built racing tires; that non-skid features of their tires make it possible for a car to stop "up to 25 per cent quicker" when in fact said tire will not stop a car 25 per cent quicker than any other non-skid tire, under all conditions, and that Wilbur Shaw and other drivers used the respondents' "Champion" tires in the 1939 Indianapolis races when in fact they used specially built Firestone racing tires which are never sold for use on passenger cars.

The Goodyear Tire & Rubber Company allegedly advertised that its "Pathfinder" tire was sold at a 50 per cent saving from the standard list price, when in fact, for example, the advertised sales price of $7.98 for the 6.00-16 size tire represented a saving of 22.89 per cent rather than 50 per cent, and the advertised saving made no allowance for usual and customary trade-in value of used tires which would further have reduced the actual saving to 14.38 per cent instead of 50 per cent.

The complaint continues that the Goodyear company, in advertising its fourth-grade tire, the "Pathfinder," represented that a 50 per cent discount was available when in fact the discount that was offered represented a discount based on the list price of the "Pathfinder" but on the list price of its highest grade tire. The discount on the "Pathfinder" was not 50 per cent but 14.38 per cent, after taking into consideration the customary 10 per cent allowance for trade-in value of used tire, according to the complaint.

Concerning its "Marathon" tire, the respondent allegedly advertised a discount of 40 per cent off standard list price when in fact, for example, the saving on its 6.00-16 size tire was only 20 per cent with no allowance made for used tires. If the 10 per cent used tire allowance had been made, the actual saving to the purchaser would have been 11.15 per cent instead of 40 per cent, according to the complaint.

On its "G-3 All Weather Tire," the respondent allegedly advertised a 25 per cent discount when in fact the customary used tire allowance was not granted, which would have made the saving only 16.8 per cent instead of 25 per cent.

The B. F. Goodrich Company is alleged to have advertised a saving of 50 per cent on its Fourth-line "Commander" tires, when in fact such saving was based on the list price of its first-line tires. The saving was 22.89 per cent rather than 50 per cent of the list price of the "Commander" tire, with no used tire allowance, and with such allowance would have been only 14.38 per cent, according to the complaint.

The respondent allegedly represented that all grades of its tires were sold upon the basis of two tires for the price of one. However, only the "Commander" tire was sold under this advertisement but not upon the basis of two tires for the price of one but instead two Commander tires were sold for the price of one first-line tire with no allowance for used tires. Consequently, the saving to the purchaser was only 14.38 per cent instead of 50 per cent as would appear from respondent's advertisement, after taking into consideration the usual and customary trade-in value of used tires.

The respondent allegedly advertised that all grades of its tires were sold at 50 per cent off or a second tire at half price, with no trade-in allowance for used tires, when in fact only its "Commander" tires were so sold. The complaint alleges that the "Commander" tires were not sold at 50 per cent off since it was necessary to purchase both the tire at the full price in order to purchase the second tire at half price, resulting in a savings of only 25 per cent or, for example, $5.17 on size 6.00-16 tires. If the usual and customary trade-in allowance, had been
The complaint alleges that the preparations, used conjointly or separately, do not constitute a competent or effective treatment for piles other than to give some small degree of relief by means of their analgesic properties and in the prevention of constipation. (3988)

Yulean Lamp Works, Inc., Harrison, N. J., is charged in a complaint with misrepresentation in the sale and distribution of incandescent electric light bulbs.

The complaint charges that the respondent imports many of its bulbs from Japan and that these bulbs, when received by the respondent, have imprinted on the neck the words “Made in Japan” or “Japan”.

The complaint alleges that in the manufacture of finished lamps distributed by it, the respondent places these bulbs into baseball caps made from manufacturers in the United States and bearing the legend “Made in U. S. A.” In this process the words “Made in Japan” are concealed, only the legend “Made in U. S. A.” remaining visible.

The complaint also charges that in packaging such lamps for shipment to retail dealers and for display and resale by these dealers, the respondent places them in cartons bearing the legend “Made in U. S. A.” or “American Made for American Trade”. (3987)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Civilian Preparatory Service, Inc.—See Diesel Engineers, Associated.

Diesel Engineers, Associated—Orders have been issued requiring two correspondence school firms to discontinue misleading representations in the sale of their courses. Respondents in the cases are Roy E. Reed and Florence A. Reed, trading as Diesel Engineers, Associated, 805-807 South Flower St., Los Angeles, Calif., and Civilian Preparatory Service, Inc., Simms-Keller Building, Huntington, W. Va.

Roy E. Reed was found formerly to have operated under the names Diesel Engineers, Associated, and Diesel Training School. Subsequent to issuance of the Commission’s complaint, he changed the name to Allied Engineering School. The respondent and his wife, Florence A. Reed, conduct both correspondence and classroom instruction, relating to Diesel engines and air-conditioning equipment. They were found to have made misleading representations in advertising their courses.

Among the practices prohibited in the Commission’s order against them are the representation, through newspaper classified advertisements and other printed matter, under headings such as “Help Wanted” or “Employment”, that persons responding to such advertisements may obtain an opportunity to work for pay while receiving instruction relating to Diesel engineering, air-conditioning equipment or any other subject; and the representations that either of the respondents is connected with, or that their school is an association of, engineers banded together for promoting any enterprise of mutual benefit to the members; that initial payments or other amounts paid by students for tuition in the school will be refunded, when such refunds are not in fact made; that students will receive a specified salary while studying or will be reimbursed for their tuition in any way, unless and until these are the facts; that, upon completion of the respondents’ courses, positions will be made available to students, unless this be true, and that the price at which a course is offered is a special price, unless such price is lower than that charged others for the same instruction.

The order also forbids misrepresentation and exaggeration of the demand for, and the qualifications and earnings of, persons trained in the respondents’ school; of the education, training and experience of the respondents’ teachers, and of the equipment available to students. (3258)

Civilian Preparatory Service, Inc., conducting correspondence courses to prepare students for United States Civil Service examinations, was found to have made misrepresentations to its prospective students, both directly and through its representatives.
The order against Civilian Preparatory Service, Inc., prohibits the representation that the respondent or its representatives have any connection with or are under the supervision of the United States Government or Civil Service Commission; that the respondent is cooperating with or working in conjunction with or by authorization of that Commission in preparing pupils for examinations, or that its school has been selected by the Commission to select and prepare candidates for Civil Service examinations and positions. (3387)

Merrill Candy Company, Merrill, Wis., was directed to cease and desist from selling or distributing candy or other merchandise so packed and assembled that sales to the public may involve lottery; from supplying to or placing in the hands of others packages or assortments of candy or other merchandise, such as waffle irons, silverware, coffee tray sets, pencils, griddles or other lottery devices which may be used in selling the products to the public; and from supplying to or placing in the hands of others such devices, either with assortments of candy or other merchandise, or separately. (3128)

The respondent is ordered to desist from representing that, by use of certain of his books of instruction, one can acquire the ability to play certain musical instruments, cure one’s self of the addiction to drugs, foretell future events, and divine the meaning of dreams or tell fortunes. Under the order, the respondent is also prohibited from misrepresenting the power or quality of telescopes or other optical goods, watches, metal “plating” or skeleton keys sold and distributed by him. (3825)

The respondent advertised that his telescopes were of a fine quality and that his skeleton keys would open all sorts of door locks. The findings show that these representations were untrue; that the telescopes were not of high quality and that the keys were effective only upon locks of simplest and cheapest construction. The respondent is ordered to desist from representing that, by use of certain of his books of instruction, one can acquire the ability to play certain musical instruments, cure one’s self of the addiction to drugs, foretell future events, and divine the meaning of dreams or tell fortunes. Under the order, the respondent is also prohibited from misrepresenting the power or quality of telescopes or other optical goods, watches, metal “plating” or skeleton keys sold and distributed by him. (3825)

The order against Martin Benjamin Rothman also prohibited the respondent from representing as the customary price or value of his products, prices and values which are fictitious and greatly in excess of the customary and normal prices. (3878 and 3902)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Barton Manufacturing Company, Inc., 4157 North Kings-highway, St. Louis, engaged in the sale of a shoe polish and dye designated “Barton’s White Glaze Polish,” will cease and desist from representing that “Dyanshine” causes shoes to become marred by unsightly cracks. The respondent will also discontinue representing that “Barton’s White Glaze Polish” will not rub off shoes after its application. (02484)

Milton Products Company—Milton Meyer, doing business as Milton Products Company at 2440 Lincoln Ave., Chicago, has been ordered to cease and desist from representing that through the use of books sold and distributed by him the art of hypnotism may be acquired, future events foretold or any special ability, power or qualities therein. The respondent is ordered to desist from representing that, by use of certain of his books of instruction, one can acquire the ability to play certain musical instruments, cure one’s self of the addiction to drugs, foretell future events, and divine the meaning of dreams or tell fortunes. Under the order, the respondent is also prohibited from misrepresenting the power or quality of telescopes or other optical goods, watches, metal “plating” or skeleton keys sold and distributed by him. (3825)

The respondent is ordered to desist from representing that, by use of certain of his books of instruction, one can acquire the ability to play certain musical instruments, cure one’s self of the addiction to drugs, foretell future events, and divine the meaning of dreams or tell fortunes. Under the order, the respondent is also prohibited from misrepresenting the power or quality of telescopes or other optical goods, watches, metal “plating” or skeleton keys sold and distributed by him. (3825)

Coast-to-Coast Stores (Central Organization, Inc.), Minneapolis, has signed a stipulation to discontinue misrepresentations in the sale of chain store merchandise. The respondent is a corporation engaged in purchasing and supplying the merchandise offered for sale by some 235 stores operated by their individual owners in several Mid-Western and Western States. It has developed these stores into a chain known as “Coast-to-Coast Stores.” In connection with the sale and distribution of its merchandise or advertising matter, the respondent corporation agrees to desist from the use, or from placing in the hands of others for their use, advertising matter which contains statements such as “From Our Tire Factory,” “From Our Rope Factory” or “From Our Paint Factory,” the effect of which tends to convey the impression that the designated products are manufactured by Central Organization, Inc., or by the locally owned and operated stores or merchants named in the advertising. The stipulation points out that neither the corporation nor any of the individual stores manufactures tires, rope or paint.

The respondent corporation also agrees to discontinue use in advertising matter of phraseology such as “Annual Manufacturers Cooperative Sale” or “Hundred of Manufacturers’ Cooperative Specials in Our Store,” the effect of which tends to cause purchasers to believe that all the various prices charged for the advertised products have been reduced or are special or are less than the prices customarily charged for those products, when such is not a fact. (2625)

Evans Drug Company—D. S., S. B., and Hattie M. Evans, trading as Evans Drug Company, sell “Kru-Gon,” a medicinal preparation, and Medora Whirney, owner, and Robert B. Whirney, manager, trading as The Kru-Gon Company, Muncie, Ind., manufacture the product and prepare all advertising claims made to promote its sale. This advertising matter is published in each town or city where The Kru-Gon Company has a local representative. In the sale of “Kru-Gon,” the respondents agree to cease advertising it as a competent remedy for indigestion, gas pains, bloating, neuritis, rheumatism, nervousness, insomnia, kidney trouble and run-down condition; as a competent remedy for constipation, unless limited to temporary constipation, and as being capable of removing poisons from the system in a natural manner, giving back health, ending indigestion attacks, correcting kidney disorders, making the stomach function properly and giving relief after other remedies have failed.

Fog King Lamp Company, Chicago, Ill., in the sale of a fog light or lamp having a special type of reflector and amber colored lenses, agrees that it will desist from the use in advertising matter of representations tending to convey the impression that the beam of light produced by its device will penetrate fog to any greater extent than ordinary white light or that it will successfully penetrate a dense or heavy fog or give any substantial visibility in such fog. (2626)

Gafeo, Inc., New York, N. Y., wholesale dealer in furs, agrees to desist from employing in its advertisements the word “Chinchillonette” or any other word simulating the word chinchilla as
descriptive of a fur which is other than chinchilla fur. The stipulation provides that when the simulating word is so used to designate a fur other than that of the chinchilla, it shall be immediately accompanied by explanatory language in equally conspicuous type clearly indicating that the fur in question is not chinchilla fur, and clearly disclosing the actual trade name or nature of the fur, as for example, “Chinchillonette—Dyed Coney”. (2633)

Globe American Corporation, Macomb, Ill., in connection with the sale and distribution of electric brooders or other poultry equipment, will discontinue claims in its advertising matter that its “Elect-O-Stat Brooder” or other brooder of similar construction, cuts the cost of electric current 30 to 40 per cent or by any other proportion or extent in excess of that actually ascertained and proven by means of competent and acceptable scientific tests. (2636)

Highland Technical Institute, Inc., Los Angeles, Calif., selling its instructions by mail and operating a small trade school for shop training, stipulates that in the sale of its “Extension-Shop Training Course in Air Conditioning and Electric Refrigeration”, it will cease using the word “Institute”, either with or without the words “Highland” and “Technical” as a part of or in connection with its corporate or trade name. It will also desist from using the word “Institute” in a manner suggesting that this trade school is an organization conducted for the promotion of learning, philosophy, art or science, and has equipment and faculty such as to entitle it to be designated an institute.

Other representations to be discontinued are that the respondent pays students $1.40 a day or provides board and room during the shop training period, unless it is clearly explained that these payments or benefits are payable from funds previously collected from the students for that purpose; that any service or commodity is free when in fact it is part of the regular course for which the student pays; that any person, though lacking in proper education, experience or aptitude, can master the respondent’s study courses; that the instruction and training offered “makes it possible for your dream to come true” or enables one to cash in on one’s credit before earning money before finishing either the home work or the shop training.

The respondent also agrees to discontinue using the “Help Wanted” columns in newspapers in such manner as to deceive prospective students into the belief that jobs are offered, and to cease representing that the respondent’s trade school is an engineering concern or offers engineering instruction. (2632)

Kahnetic Mentalisim Institute—Harry Kahn, trading as Kahnetic Mentalisim Institute and as Institute of Kahnetic Ability, Pasadena, Calif., in the sale of a 12-lesson correspondence course prepared by the respondent and known as “Kahnetic Mentalism,” stipulates that he will cease making representations which assert or the effect of which tends to convey the impression that his course will develop the brain by awakening allegedly idle or dormant portions of it, or that it will enable all students, regardless of age, sex or congenital factors, to attain success or to realize the desires of life. The respondent will also desist from representing that the study of his course will bring forth latent ability in all cases or make it possible for a student, due to his increased brain power, to become a mental giant, or acquire an education equivalent to a college course.

The respondent also agrees to eliminate the word “Institute” from its trade names and to cease use of that word in any manner so as to imply that his business is that of an institute or organization for the promotion of learning, philosophy, the arts or the sciences, when such is not a fact. (2635)

Kalamazoo Canvas Boat Company—Pauline S. Winans, trading as Kalamazoo Canvas Boat Company, Kalamazoo, Mich., in the sale and distribution of canvas boats, agrees to cease representing that the boats are puncture-proof or have “no leaks, no repairs,” and to discontinue making claims of superiority, import to cause the belief by purchasers that the boats are impervious to penetration or piercing by sharp or pointed objects, or that no leaks will ever develop or that all repairs may be avoided, when such is not the fact. (2634)

Kantfreeze Laboratory—See Kantfreeze Chemical Company.

Kru-Gon Company—See Kantfreeze Chemical Company.

Metropolis Company—Benjamin Schlien and Harry Kramer, trading as Metropolis Company, Philadelphia, Pa., in the sale of women’s wearing apparel, stipulate that they will cease advertising, branding, or selling any product composed in whole or in part of rayon unless full and nondeceptive disclosure of the fiber and other content of such product is made by clearly and nondeceptively designating and naming therein each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent, and by giving the percentage of any fiber which is present in less than a substantial amount, or in any case less than 5 per cent. (2631)

Natural Foods Institute—William G. Barnard and William G. Barnard, Jr., trading as Natural Foods Institute, 807 St. Clair Ave., N. E., Cleveland, engaged in selling a food grater and a health booklet, agree to cease and desist from representing that a carrot grater with “The Barnard Grater” will produce more juice than an ordinary one, that its use of the grater is a method of getting all the elements from the raw carrot; that no other instrument grates foods properly or as well; that carrots or carrot juice are a remedy or competent treatment for any disease or disorder of the human body; that they contain more vitamins A, B, C and G than any other vegetable; that carrot juice has healing properties or unusual health value or helps counteract body toxins; that the book “Health Via The Carrot” contains tested diets or diet of proven therapeutic value in the treatment of disease; that the book publishes for the first time the facts about the health value of

January 12, 1940

3962
carrot juice and other vegetable and fruit juices; that it outlines proper juice diets that will help correct any disease, or that purchase of the book has brought health to anyone. (02485)

**No-Stitch Manufacturing Company—** Louis Kaine, trading as No-Stitch Mfg. Company, 36-38 38th St., Long Island City, N. Y., engaged in selling a coated fabric necktie designated, "No-Stitch Ties," agrees to cease representing that the ties are made from a recently discovered fabric; that they will not stain, or that every kind of stain can be removed without injuring the ties; that prospective agents, salesmen or representatives can make profits within a specified period of time, which are in excess of the average net profits made in like periods by his active, full-time agents. (02483)

**William A. Reed Company—** Martin A. Levitt, operating as The William A. Reed Company, Philadelphia, Pa., stipulates that he will discontinue advertising that his preparation "Medrex Ointment," when used alone or in combination with "Medrex Soap," is an effective remedy for pimples in any manner other than as a relief for itching and, to a limited extent, as a skin antiseptic, fungicide and desiccant. The respondent also agrees to discontinue advertising that either product or both heals or clears the skin; that either or both constitutes an effective remedy for blackheads, open pores, eczema or other skin conditions, and that "Medrex Ointment" penetrates below the surface of the skin or acts safely or without irritation. (02487)

**Rochester Button Company, manufacturer, Rochester, N. Y.,** agrees to desist from the use on its sample cards and invoices or in advertising matter of the word "Ocean" so as to imply that its products are made of ocean pearl, when such is not a fact. (2629)

**Rubber Products Company—** J. Oliver Thorp, sole trader as Rubber Products Company, New York, N. Y., in the sale of rubber cushion keys for typewriters, agrees to cease using the term "Para Rubber" or the word "Para" as descriptive of any product not actually made of Para rubber, which is known to the trade as rubber prepared from the latex of wild Hevea trees in the Amazon region of South America. The stipulation points out that the respondent's typewriter keys are made of rubber imported from cultivated plantations in the Far East. (2628)

**Charles Wicenstowski—** Charles and Sidney Wicenstowski, and David Feldman, trading as Charles Wicenstowski, New York, N. Y., engaged in the business of purchasing gray handkerchief goods and causing them to be converted by usual processes into the finished product, which they sell, agree to cease using on their letterheads and printed matter the words "Converter and Manufacturer" or the word "Factory," or representing that they have a factory at Ellenville, N. Y. The stipulation points out that the respondents do not own or control a plant or machinery for use in either the conversion or manufacture of the finished products sold by them. (2630)

**World's Dispensary Medical Association, 665 Main St., Buffalo, N. Y., in the sale of medicinal preparations designated "Dr. Pierce's Golden Medical Discovery" and "Dr. Pierce's Favorite Prescription," agrees to desist from representing that "Dr. Pierce's Golden Medical Discovery" will keep the digestive system in tune, counteract excess acidity of the stomach, or will of itself build up the human system, relieve a weakened condition, increase weight, pep, energy, vigor or vitality, or is the one or only recognized tonic. The respondent will also discontinue representing that "Dr. Pierce's Favorite Prescription" is of any appreciable value in relieving the pain or discomfort associated with menstrual distress, unless in direct connection therewith it is stated that such results may follow only when used for some length of time. It is further stipulated that the respondent will desist from representing, by use of the word "Association" or words of similar import, that it is an Association of doctors or medical men, or that complete medical advice is given to persons writing for it. (02482)

**FCC DISMISSES CASES**

The Federal Trade Commission has dismissed a complaint charging four Baltimore wholesale grocery firms with combining to restrict competition in the resale of certain products in the Baltimore trade area. The respondents were Benjamin Green and Harry L. Minch, trading as B. Green & Co., 636 West Pratt St.; Isador Ruden and Barnette H. Rudo, trading as The Atlantic Grocery Company 121 Cheapside St.; Morris Kolker, Harry Mark and Samuel Guttman, trading as The Maryland Grocery Company, 722 East Pratt St., and Michael Joffee and Reubin Joffee, trading as Joffee Brothers, 623 West Pratt St.

The Commission has also issued an order vacating and setting aside its findings as to the facts and its order to cease and desist entered November 7, 1939 in the case of C. C. Johnson, trading under the name Supreme Manufacturing Company and other names, with headquarters at 1014 City National Bank Building, Omaha, Neb.

The cease and desist order issued in November involved representations of the respondent concerning a preservative or mending powder advertised by him as being effective for strengthening silk hosiery or lingerie.

The order vacating and setting aside the findings and the cease and desist order was made upon the respondent's request for a modification of the cease and desist order and upon the belief that both findings and order should be modified in certain respects other than those requested. Accordingly, the case was reopened for such further proceedings as may be necessary.

Also the Federal Trade Commission has closed its case against The Commonwealth Manufacturing Corporation, 4208 Davis Lane, Cincinnati, which had been charged in a complaint issued by the Commission with misrepresentation of the character, utility and merit of a welding machine manufactured and sold by it.

According to information received by the Commission, the respondent corporation has been dissolved and disposition made of all of its assets.

The case was closed without prejudice to the Commission's right to reopen it and resume prosecution, should the facts so warrant.

3963

January 12, 1940
The Week in Washington

A long list of new backers for Broadcast Music, Inc., came in from the Pacific Coast this week after Neville Miller had meetings in Los Angeles, San Francisco, Portland and Seattle. Mr. Miller wound up his coast-to-coast tour in Broadcast Music's behalf this week with meetings in Columbus, Ga., and Orlando, Fla.

The Senate again deferred consideration of the Johnson (D-Colo.) bill to forbid beer and liquor advertising on the air. The bill remains on the calendar.

The National Plan of Settlement between the A. F. of M. and networks and affiliates expired without either renewal or a strike. Representatives of the networks assured the union they had no intention of reducing the employment of staff musicians at their stations. IRNA suggested to affiliates on January 5 that continued employment of staff musicians "in so far as their services are reasonably compatible with program requirements and possibilities" might preserve peace.

The FCC received nearly all the money it asked for from the House Appropriations Committee. During subcommittee hearings on the appropriation, the NAB Code came in for considerable discussion. James Lawrence Fly, FCC chairman, said he believed "right now that a majority of the broadcasters and a majority of the public generally accept the (controversial issues) rule as being a wholesome one."

The FCC started hearings on its television rules, and clarified its rule on record and transcription announcements.

In search of new business for broadcasters, the Bureau of Radio Advertising this week went after department stores and cleaners.

WEST COAST COPYRIGHT MEETINGS SUCCESSFUL

Four groups of West Coast broadcasters held meetings with Neville Miller last week, with excellent results for Broadcast Music, Inc.

Representatives of the following stations signed, promised to sign, or promised to recommend signing stock subscriptions to their station owners:

KIEM, KARM, KMJ, KDON, KLS, KLX, KROW, KFBK, KROY, KGO, KJBS, KPO, KSAN, KSFO, KWQ, KSRO, KKG, KTKC, KOH, KHBC, KGMB, KUL, KGY, KGLU, KTUC, KICA, KWEW, KFL, KERN, KPMC, KMPC, KIEV, KFOX, KGER, KECA, KFAC, KFI, KFVD, KMTR, KNX, KRKD, KFSD, KTMS, KUIN, KOOS, KME, KALE, KEX, KGW, KON, KRNR, KJR, KOMO, KGA, KHO.

Mr. Miller met first with District 16 broadcasters in Los Angeles in January. The following were present:

Fred Palmer, KSUN-KOY-KGUL-KTUC; W. E. Whitmore, KWEW-KGFL; Robert Stoddard, KERN; L. A. Schamblin, KPMC; Leo B. Tyson, KMPC; L. W. Peters, KIEV; Lawrence McDowell, KFOX; C. Merwin Dobyns, KGER; Harrison Holliday, KECA-KFI; Calvin J. Smith, KFAC; J. F. Burke, KFVD; Harry Maizlish, KFWB; Ben S. McGlashan, KGFJ; Van Newkirk, KHJ; Victor Dalton, KMR; D. W. Thornburz, KNN; J. Austin Driscoll, KRKD; J. C. Lee, KFXM; Thomas E. Sharp, KFSD; Ernest L. Spencer, KVOE; and Frank V. Webb, KTMS.

On January 10, Mr. Miller met with District 15 broadcasters in San Francisco, with the following present:

3965 (Continued on page 3966)
The House Appropriations Committee this week recommended that the FCC get $2,116,340 for the fiscal year starting next July 1—an increase of $278,163 over the amount appropriated for the current year.

The only item deleted from the increase asked by the Commission was $8,660 for increased personnel for the Interdepartmental Radio Advisory Committee.

James Lawrence Fly, FCC Chairman, Commissioners Craven and Brown, and a number of Commission officials appeared before a House Appropriations Subcommittee on December 13, to discuss the FCC appropriation for the fiscal year starting next July. First, Mr. Fly pointed out that in addition to the $1,800,000 appropriated for the current fiscal year, the Commission wanted $300,000 more next year. Half of the increase was to go for modernization of monitor equipment and half for increased personnel.

Representative Wigglesworth (R-Mass) asked the FCC to furnish for the record tables showing the transfer of control of stations, the valuation of physical assets of these, how much was paid for them and whether the transfer was by lease or otherwise. He also asked for a table giving experimental licenses approved during the year. These were inserted in the record.

Mr. Wigglesworth then asked for a table showing the number and disposition of complaints against programs. This also was furnished.

Mr. Wigglesworth asked about the status of the monopoly investigation. William J. Dempsey, Commission counsel, said that the committee which conducted the investigation “will probably, although not necessarily, by the middle of January have a report in the hands of the Commission.”

Representative Dirksen (R-III) asked that Mr. Fly put in the record a list of stations owned and operated directly or indirectly by newspapers. This was done. Mr. Dirksen also asked Mr. Fly to insert “any censorship activities of the Commission in the last year, if any.”

“I would state, sir, so far as my knowledge goes, there has been nothing approaching censorship,” Mr. Fly replied. “We have a lot of complaints about what somebody said on the radio, but we have not gone after the station on the basis of any individual remarks. It is my theory—I am not sure it is the right one, although I do feel fairly confident in it—that all we can do is review the conduct of the station as a whole.”

Mr. Dirksen then asked “what has been the general reaction from those engaged in the radio business as well as certain segments of the public with respect to the

Shotwell Bill

For fear remarks in last week's REPORTS about the Shotwell copyright bill (S. 3043) be misunderstood, the NAB considers the bill as a whole quite unsatisfactory. Attorneys Myers, Sprague, and Kaye, who attended the Shotwell Committee meetings on behalf of the industry, have pointed out that the bill is, in most important respects, even more unfavorable to broadcasters than the present law. An extended analysis of the bill will appear in the REPORTS within a few weeks.
Mr. Fly replied he assumed Mr. Dirksen meant that section of the Code dealing with controversial issues, then added:

"There have been very substantial elements in the industry that have complained about it, or have declined to accept it or have followed it only in a half-hearted way. I think there have been substantial complaints from portions, goodly portions of the public. It is my best guess now, and I don't want to pass final judgment either upon the state of opinion in the industry or to the public or the wisdom of the rule. I believe right now that a majority of the broadcasters and a majority of the public generally accept the rule as being a wholesome one."

The following discussion then took place:

"Mr. Wigglesworth: You refer to the rule that no controversial question can be discussed without the consent of the station?

"Mr. Fly: That is not the rule, sir.

"Mr. Dirksen: It is the rule. The basis of the rule is to grant free time to controversial matters so that both sides will be heard.

"Mr. Fly: That is the way that is expressed. In fact it really provides for the non-sale of time for a one-sided discussion of a controversial subject. There is some serious question as to how you get the most freedom of speech, whether you get it by selling the time to the highest bidder or whether you get it by keeping time under control and giving time away so that both sides will be presented to the public. I don't think you can assume that freedom of speech is on one side and something else on the other.

"Take the power to buy time. That lodges freedom of speech in an individual. That lodges freedom of speech in an individual who can buy the time. It does not give any freedom to millions of listeners. You have one man at the transmitter who is claiming some sort of right and you have millions of people at the receiving end of it and the receiving end is where the public interest is involved; it is the public interest as compared to the interest of a single man at the transmitter. Conceivably the man that does have the most money and buys the most time has gotten for himself the greatest freedom of speech. But what about the public interest? What about the public interest? Perhaps the greatest freedom of speech of anybody because he can move in there and take control of that transmitter and millions of people have nothing to do but listen to it. Now, you see the test used, when it is said that because stations won't sell time for the one-sided presentation of a controversial subject there is a restriction on the freedom of speech. But it may be just as easy to suggest that a balanced discussion freely given, where both sides can be represented, gives the public something more in terms of freedom of speech.

"Mr. Woodrum: You would be giving the public a pretty good sock in the eye if you gave free time to anybody who wanted to get it and give an argument.

"Mr. Fly: That cannot be done. You are entirely right.

"Mr. Woodrum: It looks to me like a matter of very great importance if the public get to buy time. The power for example, has perhaps the greatest freedom of speech of anybody because he can move in there and take control of that transmitter and millions of people have nothing to do but listen to it. You can always do that sort of thing. You have to pay for the time.

"There are some now, as you know, very useful types of forum. Mr. Wigglesworth, that that really is the rule in this field. It is a difficult field. It is one through which we want to be guided before we see anything crystallized in an arbitrary manner.

"Mr. Fitzpatrick: It is a force for a good deal of good or evil if it is not controlled.

"Mr. Fly: That is true. I think. All of the studies are considered and deliberate in any move forward in that field. If there is anything we all want it is to see the people get the fairest, in terms of expression of opinion, the fairest and best service that we can. We want to see the most freedom of speech in the true sense of freedom of speech.

"Mr. Woodrum: A lot of sins are committed under the guise of freedom of speech.

"Mr. Fly: Absolutely.

"Mr. Wigglesworth: Let me ask you this: Under the present code supposing Mr. Woodrum wants to talk on the air on a controversial issue, he cannot do it by paying for the time?

"Mr. Fly: He can if he is a candidate.

"Mr. Wigglesworth: Supposing he is not?

"Mr. Fly: I take it under the code he could do that on free time.

"Mr. Wigglesworth: I certainly do not. but if I want to I can do it. I cannot buy time on the air.

"Mr. Wigglesworth: Mr. Fly, I take it under the code he could do that on free time?

"Mr. Fly: Yes; he would need to go on free time.

"Mr. Wigglesworth: Who decides whether or not he shall go on free time?

"Mr. Fly: The broadcaster. The broadcasters decide all these questions. You won't let me decide it. You won't let any governmental agency decide it. And I don't blame you. You tell us to keep our hands off. You don't want us censoring the radio.

"Mr. Wigglesworth: I certainly do not, but if I want to I can buy space in a newspaper while under this code, as I understand it, I cannot buy time on the air.

"Mr. Dempsey: Mr. Congressman, you cannot buy a newspaper if the publisher doesn't want to sell it to you.

"Mr. Dirksen: Mr. Fly, coming around to the point that was in my mind—whether the Commission directly or indirectly, passively or otherwise, as an individual or group of individuals or any member of the Commission has given sanction and blessing to this new NAB Code.

"Mr. Fly: I made a speech on this sir. I think that is all that has been done. Certainly, I did not speak for the Commission. And I am only as just as I would not want to be taken as speaking for the Commission now as a whole, trying to give you my best judgment on this. Now, I made a speech which roughly follows the lines I have followed in this discussion. I would be happy to send you a copy of it. Sir. But I refrained from committing myself in any final sense, and certainly refrained from endeavoring to commit the Commission in any way. I think you may possibly have that same kind of position in this field. If we have any business in it at all, we want to do it right and after thorough consideration."

Mr. Dirksen: Of course, any public utterance you make in the field of radio, Mr. Fly, you will have great difficulty in divorcing yourself in the public mind from your official capacity.

Mr. Fly: I appreciate that. That is the reason the speech was carefully drafted, to help preserve the right to keep the record open.

"I can send it to you, and you can insert it in the record."

Mr. Dirksen: I wonder if it is not too long?

Mr. Fly: May I send it to you? I do not object to inserting it, if you like.

Mr. Fitzpatrick: Can you send one to the members of the committee?

Mr. Wigglesworth: Is that speech the probable basis for the statement by a distinguished democrat and former Member of Congress to the effect that 'only the other day the new Chairman of the Commission gave the new code his implied blessing?'

Mr. Fly: Well, I think that is probably the basis, but I think you will agree when you read it it is hardly that. Although I do say, and I want to say now, it is my own best judgment the Code ought to be given an opportunity to determine in actual practice whether or not it would serve the public interest.

Mr. Wigglesworth: There is a question of principle, as well as one of practice?

Mr. Fly: No, sir. The principle is all involved in the practice. They are tied in together there and the question is how to get the most and best in terms of freedom of expression and in terms of the public interest. Now, we have made some study of that so-called principle. If an opponent of the code is on the freedom of speech side, then certainly in this tentative position that I am in, I am in a false position at this moment. But I do not see that the problem can be boiled down to that.”

This ended discussion of the NAB Code. Mr. Wigglesworth then questioned Mr. Fly about the regulation of licenses for international broadcasting, the possibility of the Commission obtaining a New York office, an investigation to disclose “the real ownership” of all stations, the Bulova stations, the Cumberland Broadcasting Company, the average time for granting a permit, and the financial status of networks.

A transcript of the entire hearing can be obtained from the United States Government Printing Office. It is part of the “Hearings on the Independent Offices Appropriation Bill for 1941.”

FCC REPORTS ON PROGRAM COMPLAINTS LAST YEAR

The FCC reports that it received only 1,768 complaints against radio programs during the year ended last June 30.

Out of that number, 885 were dismissed without even investigation as “frivulous, unsubstantiated, or otherwise not warranting investigation,” while 854 more were dismissed after investigation.

Only 29 were deemed worthy of a formal hearing. During the year covered by the Commission’s report the industry broadcast 3,250,000 hours of programs. Thus there was only one complaint for every 1,838 hours of broadcasting.

Out of the total number of complaints, 625 (or 35 per cent) were against one program—the Orson Welles “War of the Worlds.” There were only 24 complaints against children’s programs. There were 123 against allegedly false, fraudulent or misleading statements; 65 about medical programs; 84 about alleged propaganda; 93 against alleged obscene, indecent or profane language; 58 about failure to receive prizes from contests; and 62 about excessive advertising, excessive use of recordings and general inferior program service.

The Commission pointed out that these figures did not include duplicate complaints in all cases, or “fan mail.”

This report was included in the Commission’s testimony December 13 before a House Appropriations Subcommittee.

Labor

CIRCUIT COURT SAYS WAGNER ACT DOES NOT REQUIRE WRITTEN AGREEMENTS

The U. S. Circuit Court of Appeals in Chicago has ruled that there is nothing in the Wagner Act to force an employer to make a written agreement with a labor union.

In its opinion in the Inland Steel case, the court quoted the Supreme Court as saying that “the Act does not compel agreements between employers and employees.” Both Senator Wagner and Senator Walsh also were quoted to the same effect.

It is doubtful that the Labor Relations Board will appeal this case, which grew out of the “little steel” strike of 1937. The board, it is said, is going to make its case on this point with the Art Metal Construction Company controversy, now pending in the New York Circuit Court of Appeals.

During the board hearing in the Art Metal case, counsel for the company stipulated that “at all times past, during the period in which negotiations have occurred * * * Art Metal Construction Company has refused and now does refuse to enter into or sign any agreement in writing * * * on the ground, among others, that it is not required to do so under the National Labor Relations Act.”

A. F. OF M.

The national plan of settlement between networks, affiliates and the American Federation of Musicians expired January 17. The plan was not renewed, nor was there a strike.

Representatives of the networks appeared before the A. F. of M. executive board at the Everglades Hotel in Miami on Tuesday, January 16, and informed the board that the networks would not reduce employment of staff musicians at either key or M. and O. stations.

It was learned from both the networks and IRNA that the networks had repeated to their affiliates the suggestions made by IRNA regarding continuation of the employment of musicians.
The musicians' board discussed the matter and concluded there would be no strike at this time. The board decided to await and observe the attitude of the stations in continuing employment.

It is generally agreed that wholesale dropping of musicians probably would precipitate trouble.

Early this month, Joe Weber, A. F. of M. president, notified all his locals that they were not to make any new local agreements with broadcasters, but that their members might continue to work for broadcasters without any agreement.

I. B. E. W. WINS ELECTION

The International Brotherhood of Electrical Workers (A. F. of L.) defeated the American Communications Association (C.I.O.) by a vote of 3 to 0 in a Labor Board election January 8 among the technicians at Station WQXR, New York City. Two of the five eligible voters cast their ballots for “neither union.” The Station had been dealing with the ACA.

CRAWFORD NEW GUILD HEAD

Kenneth Crawford, Washington correspondent for the New York Post, has been elected president of the American Newspaper Guild (C.I.O.) to succeed the late Heywood Broun. Upon taking office, Mr. Crawford made the following statement about Guild policy:

“Stated generally, it is my opinion that the Guild's function is to protect and improve the wages, hours and working condition of newspaper people; that this objective should be pursued by trade union methods in cooperation with the C. I. O., and the rest of the labor movement; that it is not the Guild's business to reform the world or the world's newspapers.”

The Guild has contracts with several broadcasting stations.

AVERAGE PAY

The FCC reports that the average pay of all full-time employees, executives excluded, in broadcasting stations for the week of December 11, 1938, was $35.84. Executives received an average of $78.51. The average for the entire full-time personnel was $41.17, compared with $45.12 for the week of March 6, 1938.*

For the week of December 11, 1938, the average pay for operating technicians (research excluded) was $39.07; for production men, $38.17; for announcers, $32.19; for staff musicians, $45.07; and for outside salesmen, $48.41.

The NAB is endeavoring to get a break-down of these figures geographically and by size of station.

* The FCC report for the week of March 6 covered 626 stations, while the report for the week of December 11 covered 660. The addition of smaller stations with comparatively low wage rates must have accounted for the decrease in the average pay. No widespread pay cuts were reported to the NAB.

RETAILERS PRAISE RADIO

“Radio has definitely established itself as a profitable medium for department stores. If it does not get the expected results, look to your program or other factors —don't blame radio generally.”—Irwin D. Wolf, vice-president, Kaufman's, Pittsburgh, Pa.

“Retailers should tell the station man their problems, if they want radio to show maximum results. Open up —tell the radio man something about your business. Given a fair chance to help, he in turn can then best advise you as to the most effective use of the medium.” —Willard H. Campbell, Publicity Director, G. Fox & Company, Hartford, Conn.

These were two of the many significant words of advice given to National Retail Dry Goods Association members at the radio panel discussion held January 17 at Hotel Pennsylvania, New York, where the association met in its twenty-ninth annual convention January 15-19. Several hundred department store and retail advertising executives displayed keen interest in the informative discussion, arranged by Alan Wells, NRDGA Sales Promotion Manager.

Two boards of experts, composed of eight department store officials who have used radio successfully over a period of years, answered the questions gathered from NRDGA members, and put to them in the form of an “Information Please” program. The questions covered these four general subjects:

Advertising

BUREAU OF RADIO ADVERTISING AFTER STORES, CLEANERS AND DYERS

The NAB Bureau of Radio Advertising this week went into action on two large advertising fronts important to the development of more local and regional business.

Samuel J. Henry, Jr., of the Bureau, was on hand at the National Retail Dry Goods Convention in New York, where the problems of local radio advertising were given their first major convention-wide consideration. The Bureau has arranged for a complete transcript of the radio panel discussion reported below. It will be released shortly to all member stations. Out of this, Headquarters believes will come a greater understanding and a wider use of radio by department stores and retailers.

Meanwhile, Ed Kirby presented the case of radio advertising to another large group wherein lies a tremendous new volume of potential advertising revenue. He addressed the 3,000 delegates gathered in Baltimore at the annual convention of the National Association of Cleaners and Dyers.

3969

January 19, 1940
1. Why Radio for Retailers?
2. Retail Radio Programs
3. Costs of Radio Advertising
4. Results from Radio

The experts, on panels 1 and 3 were:
Irwin D. Wolf, vice-president, Kaufman's, Pittsburgh.
George Stockbauer, vice-president, L. Bamberger's, Newark.
Miss Lois Munn, sales promotion manager, Hangerer's, Buffalo.
B. Louis Posen, publicity director, Hochschild, Kohn, Baltimore.

On panels 2 and 4:
Marvin Oreck, vice-president, Oreck's, Duluth.
C. I. Burtanger, sales promotion manager, Rike-Kumler, Dayton.
Kenneth Taylor, vice-president, John Taylor's, Kansas City, Mo.
M. Manus Roisen, sales promotion manager, Edward's Buffalo.
Willard H. Campbell, publicity director, G. Fox & Co., Hartford, and vice chairman, Sales Promotion Division, NRDGA, was chairman of the discussion, with Walter Hartford, and vice chairman. Sales Promotion Division, significant:
retail experts.

January 19, 1940

Marvin Greek, vice-president, Greek's, Duluth.
Miss Lois Munn, sales promotion manager, Hangerer's, Buffalo.
George Slockbauer, vice-president, L. Bamberger's, Newark.
Irwin D. Wolf, vice-president, Kaufman's, PittsburRh.

Among the many suggestions for successful radio advertising offered by the experts, the following were especially significant:
The entire store personnel must be kept informed on the program, items advertised each day, etc. Buyers must be sold and kept sold on the value of the radio campaign to their particular department.
The program should create a definite and distinct air personality for the store. It was recommended that the store should place an experienced radio person in complete charge, to work closely with the station on production, commercial copy, etc.

Much emphasis was given to the desirability of giving radio a full and fair chance to do the required job—with no less than 52 week contracts and daily broadcasts recommended wherever possible. Even the best program, it was pointed out, may take 10 to 20 weeks to build an audience and establish a following, while on the question of frequency of broadcast, anything less than daily use of radio places it in an unfair position as compared with newspapers.

All the usual publicity and promotion efforts should be made, particularly at the start of the campaign, to build an audience for the program. Stations, it was pointed out, are usually glad to cooperate toward that end.

Many retailers expect too much of radio, more than of any other medium, without giving it a real chance to succeed. Care should be taken to enlist the proper merchandising and store-wide cooperation so essential to the success of any advertising effort. Radio can stand on its own feet, but it is entitled to every legitimate and reasonable assistance if the store is to enjoy maximum results.

Radio's ability to build goodwill and acceptance for the entire store is especially important today, when problems of public relations are becoming more vital to all business.

Radio's superior coverage is of value in expanding the store's market, bringing in new customers, charge accounts, phone and mail orders.

Radio is a more flexible medium than any other, allowing last minute copy changes to take advantage of weather changes and other emergencies.

Through its ability to dramatize and paint "ear pictures" radio has sold fashion items as well as "price appeal" and sale merchandise. The right program can also sell high-priced products, such as refrigerators. The experts cited actual cases where radio had proved its value not only in direct selling of all types of merchandise, but in building store traffic and increasing goodwill and prestige.

FtC Rules for Radio Advertising

A station program manager asked the NAB this week if there were any fixed rules for radio advertising copy to insure its compliance with Federal Trade Commission standards.

Russell P. Place, NAB counsel, replied as follows:

In reply to your letter of January 5, permit me to state that yesterday I talked with Mr. James A. Horton, Chief Examiner of the Federal Trade Commission, relative to procuring standards to guide you in editing script with regard to "unfair methods of competition" and "unfair or deceptive acts or practices in commerce."

It appears that they have no printed standards for distribution. But it may be helpful in this connection to quote from a recent address of Mr. Horton's and from the Annual Report of the Federal Trade Commission for 1939.

Mr. Horton has stated, "** The rule of construction applied to a false or misleading advertisement is the advertisement in its entirety. The question of whether any particular statement is true or otherwise is not the wholly pertinent question; the really pertinent question is whether the advertisement as a whole is calculated to deceive."

Again quoting Mr. Horton: "The second part of the Wheeler-Lea Act adds a number of entirely new sections to the Federal Trade Commission Act and is the result of public demand for more stringent penalties for false advertising in the specific fields of food, drugs, devices, and cosmetics.

"The term false advertisement is defined as an advertisement, other than labeling, which is misleading in a material respect; and in determining whether any advertisement is misleading, there shall be taken into account (among other things) not only representations made or suggested by statement, word, design, device, sound, or any combination thereof, but also the extent to which the advertisement fails to reveal facts material in the light of such representations or material with respect to consequences which may result from the use of the commodity to which the advertisement relates under the conditions prescribed in said advertisement, or under such conditions as are customary or usual.

"This provision is designed to protect the purchaser against his own lack of information. It would appear that if the advertiser truthfully represents the characteristics and ingredients of his product in the light of the use for which the produce is intended, he may not be held responsible for consequences resulting from the use of the product under conditions not prescribed or normal. He is, however, required to tell the whole truth without deceptive concealment whenever it is required for the protection of the public."

The annual report of the FTC for 1939, at page 82 lists certain typical methods and practices condemned in orders to cease and desist. This list is not limited to orders issued during the last year, and I will quote those types that seem to apply to radio advertising.
The use of false or misleading advertising, calculated to mislead and deceive the purchasing public to their damage.

6. Making false and disparaging statements respecting competitors' products and business, in some cases under the guise of ostensibly disinterested and specially informed sources or through purported scientific, but in fact misleading, demonstrations or tests, and making false and misleading representations with respect to competitors' products, such as that seller's product is competitor's, and through use of such practices as deceptive simulation of competitor's counter-display catalogs or trade names; and that competitor's business has been discontinued, and that seller is successor thereto or purchaser and owner thereof.

13. Using merchandising schemes based on lot or chance.

18. Various schemes to create the impression in the mind of the prospective customer that he or she is being offered an opportunity to make a purchase under unusually favorable conditions when such is not the case, such schemes including—

(a) Sales plans in which the seller's usual price is falsely represented as a special reduced price made available on some pretext for a limited time or to a limited class only, or involving false claim of special terms, equipment, or other privileges or advantages.

(b) The use of the "free goods" or service device to create the false impression that something is actually being thrown in without charge, when, as a matter of fact, it is fully covered by the amount exacted in the transaction as a whole.

(c) Use of misleading trade names calculated to create the impression that a dealer is a producer or importer, selling directly to the consumer, with resultant savings.

(d) Use of pretended, exaggerated retail prices in connection with or upon the containers of commodities, intended to be sold at low figures as if bargains.

(e) Use of false or misleading representation that article offered has been rejected as nonstandard or is, for some other special and unusual reason, offered at an exceptionally favorable, or other than its normal, price, or that the number thereof that may be had or purchased is limited.

(f) Falsely and misleadingly representing that the goods are not being offered as sales in ordinary course, but are specially priced and offered as a part of a special advertising campaign to secure customers or for some purpose other than the customary profit.

20. Concealing business identity in connection with the marketing of a product, or misrepresenting the seller's relation to others; such as claiming falsely to be the agent or employee of some other concern, or failing to disclose the termination of such a relationship in soliciting customers of such concerns.

21. Misrepresenting in various ways the necessity or desirability or the advantages to the prospective customer of dealing with the seller, such as—

(a) Misrepresenting seller's alleged advantages of location or size, or the branches, domestic or foreign, or the dealers he has.

(b) Making false claim of being the authorized distributor of some products, or of having succeeded thereto, or of being the purchaser and owner of competitor's business, or falsely claiming the right to prospective customer's special consideration, through such false statements as that customer's president or chairman of its board, or the customer's friends, have expressed a desire for, or special interest in, consumption of seller's transaction with the customer.

(c) Alleged Government connection of a concern, or endorsement of it or its product by the Government or by nationally known business organizations.

(d) False claim by a dealer in domestic products of being an importer, or by a dealer of being a manufacturer, grower, or nursery, or by a manufacturer of some product of being also the manufacturer of the raw material entering into the product.

(e) Claiming falsely that the seller is a manufacturer's representative and outlet for surplus stock sold at a sacrifice, when such is not the fact.

(f) Representing that the seller is a wholesale dealer, grower, producer, or manufacturer, or owns a laboratory in which products are analyzed and tested, when in fact such representation is false.

(g) Representing that ordinary private commercial seller and business is an association, or national association, or connected therewith, or sponsored thereby, or is otherwise connected with noncommercial or professional organizations or associations, or connected with an institute, or, in effect that it is altruistic in scope, giving work to the unemployed.

(h) Falsely claiming that business is bonded or misrepresenting its age or history, or the demand established for its products, or the selection afforded, or the quality or comparative value of its goods, or the personnel or staff or personages presently or theretofore associated with such business or the products thereof.

(i) Claiming falsely or misleadingly patent, trade-mark, or other special and exclusive rights.

24. Giving products misleading names so as to give them a value to the purchasing public, or to a part thereof, which they would not otherwise possess, such as names implying falsely that—

(a) The particular products so named were made for the Government or in accordance with its specifications and of corresponding quality, or connected with it in some way, or in some way have been passed upon, inspected, underwritten, or endorsed by it; or

(b) They are composed in whole or in part of ingredients or materials, which in fact are contained only to a limited extent or, at all, or that they have qualities or properties which they do not have; or

(c) They were made in or came from some locality famous for the quality of such products; or

(d) They were made by some well and favorably known commercial manufacturers, or by persons or organizations of repute, or were specially approved by the Commission or by some official organization charged with the duty of making such tests expertly and disinterestedly, or giving such approval; and

(e) They have been inspected, passed, or approved after meeting the tests of some official organization charged with the duty of making such tests expertly and disinterestedly, or giving such approval; and

(f) They were made under conditions or circumstances considered of importance by a substantial part of the general purchasing public; or

(g) They were made in a country, place, or city considered of importance in connection with the public taste, preference, or prejudice.

29. Employing various false and misleading representations and practices to give products a standing, merit, and value to the purchasing public, or to a part thereof, which they would not otherwise possess, such practices including—

(a) Misrepresenting, through salesmen or otherwise, products' composition, nature, qualities, results accomplished, safety, value, and earnings or profits to be had therefrom.

(b) Claiming falsely unique status or advantages, or special merit therefor, on the basis of pretended, but in fact misleading and ill-founded, demonstrations or scientific tests, or pretended widespread tests, or of widespread and critical professional acceptance and use.

(c) Misrepresenting the history or circumstances involved in the making and offer of the products or the source or origin thereof (foreign or domestic), or of the ingredients entering their composition, or the opportunities brought to the buyer through purchase of the offering, or otherwise misrepresenting scientific or other facts bearing on the value thereof to the purchasers; and

(d) Representing products falsely as legitimate, or prepared, manufactured, or inspected in accordance with law, or prepared in accordance with Government or official standards or specifications; and

(e) Claiming falsely Government or official, or other acceptance, use, and indorsement of product, and misrepresenting success and standing thereof through use of false and misleading indorsements or false and misleading claims thereto, or otherwise.

At page 139, the Report states:

"Requests for advice.—Many requests have been received from radio stations, advertisers, and advertising agencies for advice and information concerning certain advertisers and their products. The Commission cannot give the information requested in many cases either because the matter may be under investigation or it is not fully advised of all the facts and cannot render opinions therein; and, in any case, it is not the Commission policy to pass on the merits of products advertised. It treats as confidential all communications prior to acceptance of a stipulation or issuance of a complaint. After a stipulation has been accepted and approved, or a complaint issued, the facts concerning such proceedings are for the public record and available to anyone who may request them."

If I can be of any further help in the matter, I shall be glad to have you write me.

Very truly yours,

RUSSELL P. PLACE,
Counsel.

January 19, 1940

3971
HEARING ON TELEVISION RULES

The FCC met on Monday, January 15, to consider objections to the rules and regulations for television stations which were tentatively adopted by the Commission on December 21, 1939, and to specify recommendations of its television committee. The first witness called was Edwin H. Armstrong. However, Major Armstrong was confined to his hotel by a bad cold and his testimony was deferred.

The next party to be called was the committee on organization of F. M. broadcasters. Mr. Philip G. Loucks, on their behalf, asked that no action be taken which would affect the issues in the F. M. hearing scheduled for February 28. The next party to present testimony was Allen B. DuMont Laboratories, Inc., of Passaic, New Jersey, represented by Mr. Roberts. Dr. Thomas T. Goldsmith, television engineer for DuMont, gave a short historical sketch of television development. On behalf of DuMont he asked that the FCC should not freeze the standards for television at 441 lines per frame and a frame frequency of 30 per second. He asked that flexibility be provided. Dr. Goldsmith claimed that the number of lines could be increased and the number of frames decreased, and still remain within the present six megacycle channel width and yet give a better picture.

Mr. C. A. Priest, engineer in charge of transmitter engineering of the Schenectady works, appeared for the General Electric Company. Mr. Priest's testimony dealt mainly with the allocation tables as set up by the FCC. Under the FCC allocation plan, Albany and Bridgeport were assigned to channel number 7, using 1 kw. each. It was Mr. Priest's contention that Schenectady should have a 10 kw. assignment and he offered an alternate allocation proposal.

Horace Lohnes, attorney for the Don Lee Network, placed Harry R. Lubcke, director of television for Don Lee, on the witness stand. Mr. Lubcke testified that the R. M. A. standards should not be adhered to too closely, however, that he was generally in favor of them. It was his opinion that powers higher than those proposed by the Commission should be used in order to overcome interferences such as emanated from diathermy machines. Louis Ellen Weiss, vice president, continued the testimony for Don Lee. It was his opinion that the changes allowed under the proposed regulation should be more liberal. Mr. Weiss estimated that there were from four to eight hundred television receivers in their area.

The hearing was resumed on Tuesday, starting with testimony for Philco, represented by Louis Caldwell, W. D. Smith, testifying for Philco, advocated the use of vertically instead of horizontally polarized waves. He stated that they had been experimenting with a set using a loop inside the receiver and he believed that due to the elimination of the expense and installation of a horizontal antenna, that the cost of television receivers could be forty to fifty dollars cheaper, each. Mr. Smith objected to the synchronization standards, stating that the synchronization and sound are not as good as they should be and need improvement. It was his feeling that more power was needed for the sound channel and that the use of a third carrier should be considered for carrying the synchronization impulses. Mr. Smith suggested a delay of a few months in order to bring standards up to date before freezing them.

Mr. John V. L. Hogan, president of Radio Pictures, Inc., New York City, was the next witness heard by the Commission. Mr. Hogan testified that he was working on the development of a synchronizing system which would be better and cheaper. He maintained that both class 1 and 2 stations should be allowed to charge for program production. Mr. Hogan also objected to the stipulation in rule 4.74-D as to the number of stations in large cities. It was his opinion that leeway should be left in the channel assignments so that economics would be a governing factor. He contended that for the present the FCC should not adopt any standards. He also suggested the elimination of the class 1 and 2 categories and allow all stations to experiment with both the technical and program aspects. Mr. Hogan also suggested that if the stations are allowed to charge for programs that they should also be allowed to charge for transmission. It was Mr. Hogan's feeling that the Commission should encourage more stations to experiment. Testimony was again resumed by the DuMont Company, placing R. M. Campbell on the stand. Mr. Campbell described the DuMont flexible line per inch system and claimed that synchronization was more reliable and sure, and that equalizing pulses were unnecessary. It was his contention that the DuMont system was not bothered quite as much by interferences as was a system under the R. M. A. standards; however, he admitted that a third carrier for synchronization was more satisfactory than both. The minimum size acceptable picture for home use was given as 8 x 10, and that the best size would be the same size that we now have on a home movie screen.

The testimony of John Howland for the Zenith brought out an interesting possibility and that was, that Frequency Modulation be used for the sound channel and that the synchronizing impulses be multiplexed on the same channel. Mr. Howland stated that television is not ready for the public and that more experimental work should be encouraged.

Mr. Robert Robins appearing for the Cart-Ray Electronic Laboratories, Inc., New York City, testified that the company was ready to market a radio and television receiver with a seven inch tube in the one hundred dollar...
FREQUENCY MODULATION

Stewart Bailey conducted the demonstration of records, live talent, sound effects and the multiplexing of a radio typewriter. The transmission was made from the Jansky and Bailey experimental F. M. station in Georgetown. The reproduction of the live talent was so lifelike that it evoked spontaneous applause from the audience even though they were only hearing the artists thru a loudspeaker.

C. M. Jansky, Jr., took up a discussion of the F. M. allocation problem and stated that, due to the small ratio needed between the desired and undesired signal, comparatively few channels would be needed to supply a good broadcast system for the United States.

Fred W. Albertson, chairman of the Washington Radio Club presided.

In a talk before the Washington section of the Institute of Radio Engineers, January 8, Paul A. de Mars presented his observations on Frequency Modulation transmission from the Yankee Network experimental station at Paxton.

His observations indicate a coverage of 100 miles radius, interference free and of high fidelity, when the Paxton power is raised from its present power of 2 KW up to 50 KW.

Mr. de Mars showed a map with the coverage of present broadcast stations and the F. M. 50 KW Paxton station. A marked improvement in coverage was indicated.

FCC RECORDING RULES

As a result of numerous inquiries from member stations, the NAB this week obtained informally from the FCC an interpretation of Section 3.93 (e) of the new Record Rules. Use of the words “transcribed” or “recorded” is permissible under the new rule as heretofore.

FCC FINANCIAL REPORT

By this time all stations have undoubtedly received FCC blanks for the annual financial report. In addition stations received a single page on which stations were asked to report as promptly as possible page 11, schedule 8. On line 23 (b) of that sheet the word “from” should be changed to read “for.” This was an error in the form and at the request of the FCC Accounting Department the NAB is calling this to the attention of members.

As stated in last week’s REPORTS, the FCC extended the filing date of the complete financial statement until April 15, but requests that page 11, schedule 8 be returned as promptly as the figures can be assembled.

FCC ANNUAL REPORT

The fifth annual report of the Federal Communications Commission to Congress covering its operation during the
fiscal year, July 1, 1938 through June 30, 1939, was released January 15. The report covers the entire operations of the FCC in the field of radio, telephone and telegraph, set forth under the following chapter headings: Introductory Summary, General, Regulation of Telephone and Telegraph Carriers, Regulation of Broadcast Service, Promotion of Safety of Life and Property, Licensing, Recommendations to Congress and Appendixes.

On the subject of broadcasting, the Commission reports the total number of broadcasting stations in the United States and its possessions. The following table presents this information together with an accounting of the changes during the year.

<table>
<thead>
<tr>
<th>Class of Station</th>
<th>New stations authorized</th>
<th>Total number of stations June 30, 1939</th>
</tr>
</thead>
<tbody>

</tbody>
</table>

Several tables are included in the report which analyze the number of standard broadcast stations by type of channel and hours of operation.

Included is a discussion of the new rules and regulations and standards of good engineering practice issued by the Commission during the year. There are reports, also, under the subjects of television, broadcast services other than standard, international broadcast stations, relay service, facsimile, high-frequency, educational broadcasts, use of broadcast facilities in emergencies, monopoly investigation, field inspections, examinations, investigations and litigation.

The latter part of the report is devoted to appendixes. Appendix F deals with the financial and statistical data on standard broadcasting stations in continental United States. Some financial material, not previously released by the Commission, is presented here. The total investment of the broadcasting industry after depreciation and exclusive of goodwill is reported at $33,826,792 at the end of 1938.

The income of the industry from the sale of station time for the year 1938 is reported at $117,379,459. No comparison is presented in the report with similar figures gathered by the FCC for 1937. It is not possible to present a comparison here because of accounting difference which exists between the two sets of data. The apparent loss of the industry from the figures of $117,908,973 presented in the fourth annual report of the Commission will undoubtedly be changed to show a slight increase for the industry when the 1937 figures are put on a comparable basis with the figures of 1938. There is also some question as to whether the entire income from the sale of station time of regional networks is included in the 1938 figures.

Income and expense figures are presented for network operations, the 23 network managed and operated stations and the 637 other reporting stations. This information is also tabulated for stations operating on the various channels under the various classifications of operating hours and also by geographic districts and states.

A tabulation by state presents population and families as of July 1, 1937; families owning radios as of January 1, 1938, showing the number, the ratio to families, and the percent of total United States; retail sales of retail stores as of 1935 with percent of total U. S.; and broadcast revenue showing the amount, the percent of total U. S. and the average revenue per radio family.

The figure of average revenue per radio family for the United States is reported at $2.97. This figure loses its significance to a great extent when reported by state because of overlapping market areas. As an example, the District of Columbia is listed as having the highest ratio, at $6.48. However, the physical limits of the District of Columbia is used as a criterion of Washington station coverage and does not take into account the large number of radio families in adjacent counties of Maryland and Virginia, which, if included, would materially reduce the ratio.

The Commission reports that during the week beginning December 11, 1938, the broadcasting stations of the country released 67,283 hours of radio programs. Program hour information is broken down by programs originating from national networks, regional networks and from local studios and shown separately for personal and mechanical renditions. Also included is a tabulation of the types of commercial and sustaining programs. For the week reported, 33.86 percent of programs were commercial and 66.14 percent sustaining.

During the week beginning December 11, 1938 stations and networks employed 18,358 persons full-time and 4,377 part-time. For the full year 1938, the industry employed 23,060 persons with a total payroll of $45,663,757. A tabulation is given showing the classifications of employees, their number, total compensation and average weekly compensation.

**State Legislation**

KENcUCKY:

H. 91 (Lyons) COPYRIGHTS—TEXTBOOKS—To require copyrights on textbooks in elementary high school and state supported institutions.
NATION—Prohibits discrimination by employment agencies on account of race, color or religion, violation being sufficient cause for suspension or revocation of license. Referred to General Laws Committee.

A. 226 (Crews) EMPLOYMENT AGENCIES—DISCRIMINATION—Prohibits discrimination by employment agencies on account of race, color or religion, violation being sufficient cause for suspension or revocation of license. Referred to General Service Committee.

A. 399 (Schwartz) EMPLOYMENT AGENCIES—DISCRIMINATION—Regulates private fee-charging employment agencies and appropriates $40,000 to Labor Department. Referred to Ways and Means Committee. S. 198 (Coughlin) DISCRIMINATION—PRESS AND RADIO—Makes it a misdemeanor to invite, advocate or promote hatred, violence or hostility against any person or group by reason of race, color, religion or manner of worship. Referred to Codes Committee.

NEW YORK:

A. 184 (Holley) INSTALLMENT CONTRACTS—SELLERS—Provides for uniform statement of terms in installment contracts for sale of goods and for licensing and regulating installment sellers, no warrant of seizure to be issued in New York City municipal court if defendant tenders all arrearages. Referred to General Laws Committee.

A. 226 (Crews) EMPLOYMENT AGENCIES—DISCRIMINATION—Prohibits discrimination by employment agencies on account of race, color or religion, violation being sufficient cause for suspension or revocation of license. Referred to General Service Committee.

A. 399 (Schwartz) EMPLOYMENT AGENCIES—DISCRIMINATION—Regulates private fee-charging employment agencies and appropriates $40,000 to Labor Department. Referred to Ways and Means Committee. S. 198 (Coughlin) DISCRIMINATION—PRESS AND RADIO—Makes it a misdemeanor to invite, advocate or promote hatred, violence or hostility against any person or group by reason of race, color, religion or manner of worship. Referred to Codes Committee.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No broadcast hearings or oral arguments are scheduled before the Commission during the week of Monday, January 22.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

January 30
WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, 1210 kc., 100 watts, unlimited time.
February 1
Oral Argument Before the Commission
WRTD—Times-Dispatch Radio Corp., Richmond, Va.—C. P., 590 kc., 1 kw night, 1 kw day, unlimited (DA night).
February 7
WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Renewal of license, 1290 kc., 1 kw, daytime.
February 8
Further Hearing

MISCELLANEOUS

KMAC—W. W. McAllister and Howard W. Davis, d/b as The Walmac Co., San Antonio, Texas. Granted motion to accept amendment to application to use directional antenna and specify site. (Application requests change in frequency from 1370 kc., power from 100 watts, 250 watts local sunset, and time from shares KONO, to frequency 930 kc., power 1 kw, unlimited time).

WPIC—Sharon Field Broadcasting Co., Sharon, Pa.—Granted petition to intervene and for consolidation of hearings on applications of Springfield Radio Service, Inc., Springfield, Ohio, for construction permit to operate on 780 kc., 250 watts, daytime, and petitioner’s application for construction permit to install new transmitter and increase power to 1 kw.

Lookout Mountain Co. of Georgia, Lookout Mountain, Ga.—Referred to Commission to hear application to fix hearing date and to consolidate application for construction permit to operate on 1390 kc., 250 watts, unlimited time, with application of Joe W. Engel, Chattanooga, Tenn., for construction permit to operate on 1370 kc., 250 watts, unlimited time.

G. D. Gillett, Washington, D. C.—Granted motion for continuance of hearing fixed for February 7, 1940, in re application of E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, for renewal of license to operate on 1390 kc., 1 kw, daytime, scheduled January 17, 1940.

G. D. Gillett, Washington, D. C.—Granted motion for continuance of hearing fixed on January 16, 1940, to January 30, 1940, in re application of John H. Stenger, Jr., Wilkes-Barre, Pa., for renewal of license to operate on 1210 kc., 100 watts power, unlimited time.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to operate from local sunset at Abilene, Kans. (January 5:30 p.m., CST), to 7:30 p.m., CST, on January 14, 1940, in order to broadcast football game between Green Bay Packers and Professional All Stars only, using 1 kw power.

Joe W. Engel, Chattanooga, Tenn.—Designated P. W. Seward to preside at hearing on application for construction permit for new station to operate on 1370 kc., 250 watts, unlimited time, in lieu of R. H. Hyde.

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Granted license to cover construction permit to use present licensed transmitter as an auxiliary transmitter at new site, increase power to 1 kw for auxiliary; use directional antenna at night. Also granted authority to determine operating power by direct measurement of antenna input.

KABC—Alamo Broadcasting Co., Inc., San Antonio, Texas.—Granted special temporary authority to rebroadcast transmissions between the ground and plane of Army stations at Randolph Field over radio station KABC on Thursdays for a period not to exceed thirty days.

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Granted special temporary authority to operate from 8:00 p.m. to midnight, EST, on January 22, 1940, in order to broadcast March of Dimes program for President’s Birthday Ball.

WHEB—Granite State Broadcasting Corp., Portsmouth, N. H.—Granted special temporary authority to operate from 7:30 p.m. to 8:30 p.m., EST, on January 16, 1940, in order to broadcast public meeting with Governor speaking.

WB NV—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 2:00 p.m. to 3:00 p.m., EST, on January 13, 20, 27, February 3 and 10, 1940, in order to broadcast the following sustaining programs: 2 to 2:10 p.m., Newscast; 2:10 to 2:30 p.m., Matinee Moods; 2:30 to 3 p.m., Suggestion in Symphony; to operate from 2:00 p.m. to 3:00 p.m., EST, on January 14, 21, 28, February 4 and 11, 1940, in order to broadcast the following programs: 2 to 2:15 p.m., Newscast; 2:15 to 2:30 p.m., Tune Travels; 2:30 to 2:45 p.m., Musical Program; and to operate as follows on February 12, 1940: 8:30 to 9 a.m.; Breakfast Club, 9 to 9:30 a.m. Opening of Mail.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted construction permit, subject to approval of transmitter site, authorizing a new broadcast station to operate on 1300 kc., 1 kw, unlimited time, employing directional antenna both day and night.

Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Granted construction permit, subject to approval of transmitter site, authorizing a new broadcast station to operate on 1120 kc., 100 watts (Class IV), unlimited time.

January 19, 1940
WPAD—Paducah Broadcasting Co., Inc., Paducah, Ky.—Granted license to cover construction permit for installation of new transmitter; frequency 1420 kc., power 250 watts, unlimited time.

WKBW—Empire Broadcasting Corp., Buffalo, N. Y.—Granted special temporary authority to rebroadcast sustaining programs to be received from International Broadcast Stations WNBI and WOR over Station WBNL for a period not to exceed 30 days.

WABC—Arthur Meieran, New York City.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WCAM—Broadcast Co., Inc., Honolulu, Hawaii.—Granted license to cover construction permit for new television station; (2) to determine type and character of program service to be rendered; (3) to determine the program schedule for said station; (4) to determine whether the proposed station would render service in accordance with the Commission's Standards of Good Engineering Practice for Class IV stations; (5) to determine whether public interest, convenience and necessity will be served through a grant of the application, or through a grant of the application of Joe W. Engle (B3-P-2483), or through a denial of both applications.

WRAC—Wayne County Advertising Co., Inc., Detroit, Mich.—Granted license to cover construction permit and modification thereof, to make changes in transmitting equipment and increase in power, 1420 kc., 250 watts, unlimited time.

WTER—The Terre Haute Broadcasting Co., Terre Haute, Ind.—Granted special temporary authority to transmit station in accordance with Sections 4.21 and 4.22(c); to determine type and character of program service to be rendered; (3) to determine the program schedule for said station; (4) to determine whether the proposed station would render service in accordance with the Commission's Standards of Good Engineering Practice for Class IV stations; (5) to determine whether public interest, convenience and necessity will be served through a grant of the application, or through a grant of the application of Joe W. Engle (B3-P-2483), or through a denial of both applications.

WYAF—Florida Broadcasting Co., Miami.—Granted license to cover construction permit for installation of new transmitter; frequency 1420 kc., power 250 watts, unlimited time.

WYBC—The Broadcasting Co., Inc., Wilmington, Del.—Granted license to cover construction permit as modified, to make changes in transmitting equipment and increase in power, 1420 kc., 250 watts, unlimited time.

WYDE—Dance of the World, 2 to 2:10 p. m.; Newcast, 2:10 to 2:30 p. m.; Matinee Moods, 2:30 to 3 p. m.; Suggestions in Symphony (provided WSVS remains silent).

WYOB—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Granted license to cover construction permit for changes in equipment, increase in power and change in hours of operation to 1210 kc., 250 watts, unlimited.

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted license to cover construction permit as modified, for new broadcast station, frequency 1420 kc., daytime; unlimited time.

WNEL—Juan Piza, San Juan, P. R.—Granted special temporary authority to operate during above periods (provided KGGF remains silent) in order to broadcast educational programs.

WKGO—KGO Broadcasting Co., Fort Worth, Tex.—Denied petition for rehearing in re application of Red River Valley Broadcasting Corporation (KRRV), Sherman, Tex., for construction permit to move transmitter locally to a new site, install new equipment, including a directional antenna, and change frequency from 1510 kc. to 880 kc., and power output from 250 watts, daytime only, to 1 kW, unlimited time, granted by the Commission on November 8, 1939.

KVIC—Radio Enterprises, Inc., Victoria, Tex.—Granted license to cover construction permit as modified for new broadcast station, frequency 1310 kc., 100 watts night, 250 watts daytime, unlimited time.

KVOS—The Ardmore Publishing Co., Inc., Ardmore, Okla.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

KMER—Mrs. W. J. Virgin, Medford, Ore.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WKED—Rome Broadcasting Corp., Rome, Ga.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WBNF—Romantic Broadcasters, Inc., Rome, Ga.—Granted license to cover construction permit and modification thereof, to make changes in transmitting equipment and increase in power, 1420 kc., 250 watts, unlimited time.

WYBM—United Broadcasting Co., Portable-Mobile (area of Cleveland).—Granted license to cover construction permit for new relay broadcast station to change type number of equipment and increase in power, 1420 kc., power 40 watts, to communicate as a relay broadcast station in accordance with Sections 4.21 and 4.22(c); hours of operation in accordance with Section 4.24; to be used with applicant's standard broadcast station WJHL.

KGGF—Hugh J. Powell, Coffeyville, Kan.—Granted special temporary authority to remain silent from 2:00 p. m. to 3:00 p. m., CST, on February 1, 6, 7, 8, 13, 14, 15, 20, 21, 22, 27, 28, and 29, 1940 and from 3:00 p. m. to 3:30 p. m., CST, on February 5, 12, 19, and 26, 1940, in order to permit WNAD to broadcast special educational programs.

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate during above periods (provided KGGF remains silent) in order to broadcast educational programs.

KGC—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent from 2:00 p. m. to 3:00 p. m., CST, on February 17, 1940, pending the filing of modification of license and completion of arrangements with Station KWLC.

KTRB—Thomas R. McAdoo and William H. Bates, Jr., Madison, Calif.—Granted authority to operate from 9:00 p. m. to midnight, PST, on January 18, 1940, in order to broadcast the meeting of the Central California League of Municipalities and to operate from 9:00 p. m. to midnight, PST, on January 26, 1940, in order to broadcast the California-Nevada Convention of Kiwanis Clubs.

Thumb Broadcasting Co., Brown City, Mich.—Upon consideration of a petition for rehearing filed by Thumb Broadcasting Co., the Commission ordered that its Opinion and Order of November 8, 1939, granting authority for a new station to operate on 880 kc., with 1 kW power, daytime only, be set aside, and the application remanded for further hearing to determine whether the Commission's Standards of Good Engineering Practice would be met by a grant of the application in part so as to permit the use of frequency 880 kc., with 250 watts power.

Lookout Mountain Company of Georgia, Lookout Mountain, Georgia.—Granted petition only in so far as it requests petitioner's application be designated for hearing (to be held February 19, 1940) containing the following issues: (1) to determine the legal, technical, financial and other qualifications of the applicant to construct and operate the proposed broadcast station; (2) to determine type and character of program service to be rendered; (3) to determine the area of population which would be expected to receive interference-free primary service both daytime and nighttime; (4) to determine whether the proposed station would render service in accordance with the Commission's Standards of Good Engineering Practice for Class IV stations; (5) to determine whether public interest, convenience and necessity will be served through a grant of the application, or through a grant of the application of Joe W. Engle (B3-P-2483), or through a denial of both applications.

WYBC—The Broadcasting Co., Inc., Wilmington, Del.—Granted license to cover construction permit as modified, to make changes in transmitting equipment and increase in power, 1420 kc., 250 watts, unlimited time.

WYDD—The Times Dispatch Radio Corp., Richmond, Va.—Scheduled Oral Argument to be held on February 1, 1940, on Report No. B-84.

WFJ—William F. Maag, Jr., Youngstown, Ohio.—Granted license to cover construction permit authorizing changes in equipment and increase in power to 250 watts on 1420 kc., unlimited time.

WAIQ—WAVE, Inc., Portable-Mobile (area of Louisville, Ky.).—Granted license to cover construction permit for new relay broadcast station to be used with applicant's standard broadcast station WAVE; frequency 2790 kc., 1622, 2058, 2150 kc., 50 watts.

WXYB—General Electric Co., New Scotland, N. Y.—Granted license to cover construction for new television station; frequencies 60,000-86,000 kc., visual 10 kw, aural, 3 kw, upon an experimental basis only.

WPRO—General Electric Co., New Scotland, N. Y.—Granted license to cover construction permit and modification thereof, for increase in power, move of transmitter, installation of new equipment, and to make changes in directional antenna. Station operates on 1420 kc., 1 kw night, 5 kw day, unlimited time, directional antenna at night.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Granted license to cover construction permit authorizing changes in transmitting equipment and increase in power, 1420 kc., 250 watts, unlimited time.

KSTP—National Battery Broadcasting Co., St. Paul, Minn.—Granted modification of construction permit as modified, authorizing move of transmitter, installation of new transmitting equipment and directional antenna and increase in power requesting extension of required completion date of construction to March 8, 1940.

KOCY—Plaza Court Broadcasting Co., Oklahoma City, Okla.—Granted authority to determine operating power by direct measurement of antenna input.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted authority to determine operating power by direct measurement of antenna input.

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kan.—Granted authority to determine operating power by direct measurement of antenna input.

KDAL—Red River Broadcasting Co., Inc., Duluth, Minn.—Granted license to cover construction permit authorizing changes in transmitting equipment and increase in power to 250 watts LS, using 100 watts night, on 1500 kc., unlimited time.

WJHL, Inc., Johnson City, Tenn. (area), Portable-Mobile.—Granted construction permit for new low frequency relay broadcast station to operate on frequencies 1025, 2058, 2150, 2790 kc., power 40 watts, to communicate as a relay broadcast station in accordance with Sections 4.21 and 4.22(c); hours of operation in accordance with Section 4.24; to be used with applicant's standard broadcast station WJHL.

KGGF—Hugh J. Powell, Coffeyville, Kan.—Granted special temporary authority to remain silent from 2:00 p. m. to 3:00 p. m., CST, on February 1, 6, 7, 8, 13, 14, 15, 20, 21, 22, 27, 28, and 29, 1940 and from 3:00 p. m. to 3:30 p. m., CST, on February 5, 12, 19, and 26, 1940, in order to permit WNAD to broadcast special educational programs.

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate during above periods (provided KGGF remains silent) in order to broadcast educational programs.
The Commission (by its Administrative Board) on January 17 took the following action:

WDWS—Campaing News-Gazette, Inc., Campagna, Ill.—Granted authority to determine operating power by direct measurement of antenna input.

WKUB—John P. Scripps, Watsonville, Cal.—Granted authority to determine operating power by direct measurement of antenna input.

KHGA—State Broadcasting Corp., Ogden, Utah.—Granted authority to determine operating power by direct measurement of antenna input.

WABC-WBOQ—Columbia Broadcasting System, Inc., New York City.—Granted authority to determine operating power by direct measurement of antenna input.

KUAT—Utah Broadcasting Co., Salt Lake City, Utah.—Granted license to cover construction permit as modified, for changes in transmitting equipment and increase in power to 250 watts.

KVNU—Cache Valley Broadcasting Co., Logan, Utah.—Granted license to cover construction permit as modified, for changes in transmitting equipment and increase in power to 250 watts.

WKNY—Kingston Broadcasting Corp., Kingston, N. Y.—Granted modification of license to change main studio location from 1610 S. Broadway, New York, to Governor Clinton Hotel, Albany Ave., Kingston, N. Y. Also granted authority to determine operating power by direct measurement of antenna input.

WKNY—Kingston Broadcasting Corp., Kingston, N. Y.—Granted license to cover construction permit as modified for new station to operate on 1500 kc., 100 watts, daytime.

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Granted license to cover construction permit as modified for new transmitter and increase in power to 250 watts, on 1500 kc.

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Granted modification of construction permit to increase night power to 5 kW, install directional antenna for night use, and make changes in equipment.

WGNY—Courier Publishing Corp., Newburgh, N. Y.—Granted modification of license to change corporate name of license from Courier Publishing Corp. to WGNY Broadcasting Co., Inc.

WEHG—Columbia Broadcasting System, Inc., Portable-Mobile (area of New York City).—Granted construction permit to increase power in relay broadcast station to 2 watts, and make change in equipment.

WCLA—Larus & Brother Co., Inc., Portable-Mobile (area of Richmond, Va.).—Granted modification of construction permit to change equipment and increase power to 40 watts, in relay broadcast station.

WEMP—Radio Station WSOQ, Inc., Portable-Mobile (area of Charlotte, N. C.).—Granted license to cover construction permit to make changes in equipment of relay broadcast station.

WAGF—John T. Hubbard, Julian C. Smith, and Fred C. Mosey, d/b/a Dothan Broadcasting Co., Dothan, Ala.—Granted special temporary authority to operate from 9:00 p. m. to 10:00 p. m., CST, on January 20, 1940, in order to broadcast a program entitled “A Symphony from the New South”.

W2XWG—National Broadcasting Co., New York.—Granted special temporary authority to operate high frequency (experimental) broadcast station W2XWG to utilize amplitude modulation and frequency modulation on frequency 12600 kc., for a period not to exceed 30 days, in order to accumulate data for direct comparison of the effectiveness of frequency modulation versus amplitude modulation for presentation at the February 28, 1940, hearing.

WSOV—Commodore Broadcasting, Inc., Decatur, Ill.—Granted special temporary authority to operate from 7:30 p. m. to 8:00 p. m., EST, to the conclusion of basketball games described in letter dated January 20, 1940, to January 25, 26, February 2, 3, 5, 6, 10, 12, 13, 16, 17, 19, 23, 24, 1940, in order to broadcast basketball games only, using 250 watts power to operate from local sunset (February 5:30 p. m., CST) to the conclusion of the Macon County Farmers Institute sessions on February 17 and 22, using 250 watts power.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from 7:30 p. m. to 8:00 p. m., EST, or to the conclusion of the annual banquet of the Shenango Valley Junior Chamber of Commerce in order to broadcast the program thereon.

KFRO—Voice of Longview, Longview, Texas.—Granted special temporary authority to operate from 7:00 p. m. to 8:00 p. m., CST, on January 21, 28, and February 4, 1940, in order to broadcast church services.

Applications filed at FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Construction permit to install new transmitter, vertical antenna, increase power from 1 kW to 1 kW and 5 kW day and night, and move to site of main transmitter on James River 12 miles southeast of Richmond.

WSAN—WSAN, Inc., Savannah, Ga.—Granted license to cover construction permit as modified, authorizing new station to operate on 1310 kc., 100 watts, unlimited time. Also granted authority to determine operating power by direct measurement of antenna input.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted license to cover construction permit and modification thereof, for change in frequency to 1200 kc., increase power to 250 watts, move transmitter and make changes in antenna.

Applications filed at FCC

580 Kilocycles

KMJ—McClatchy Broadcasting Company, Fresno, Calif.—Extension of special experimental authority for transmission of facsimile signals, for period 4-1-40 to 4-1-41.

600 Kilocycles

WREC—Hoyt B. Wooten, tr/ as WREC Broadcasting Service, Memphis, Tenn.—License to cover construction permit (B-3-P-2361) for installation of auxiliary transmitter.

620 Kilocycles

WTEL—Poulkrod Radio Engineering Company, Philadelphia, Pa.—Construction permit to make changes in equipment, increase power from 100 to 250 watts. Amended to change frequency from 1310 kc. to 1500 kc., and hours of operation from 5-WHAT to unlimited.

WMBO—WMBO, Inc., Auburn, N. Y.—Authority to determine operating power by direct measurement of antenna power.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—Construction permit for a new station to be operated on 1310 kc., 250 watts power, daytime. Amended to request 1310 kc., 100 watts power, unlimited time.

1320 Kilocycles

KGMB—Hawaiian Broadcasting System, Ltd., Honolulu, Hawaii.—Modification of construction permit (B-P-2220) as modified, for change in frequency, increase in power, new transmitter and antenna, and move of transmitter, requesting extension of completion date from 2-20-40 to 8-20-40.

WSMB—WSMB, Inc., New Orleans, La.—Authority to determine operating power by direct measurement of antenna power.

1330 Kilocycles

WDRC—WDRC, Inc., Hartford, Conn.—Modification of construction permit (B1-P-2223) for installation of directional antenna and increase in power, further requesting changes in directional antenna for use day and night, and extend commencement date 30 days after grant and completion date 150 days thereafter.

1370 Kilocycles

WMAN—Richland, Inc., Mansfield, Ohio.—Modification of license to change hours of operation from daytime to unlimited, using 250 watts power.

NEW—The Hampden-Hampshire Corporation, Holyoke, Mass.—Construction permit for a new station to be operated on 1370 kc., 250 watts power, unlimited time. Amended: equipment changes and specify antenna to be determined.

KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Authority to determine operating power by direct measurement of antenna power.

1380 Kilocycles

WSPB—WSPB, Inc., Sarasota, Fla.—Authority to determine operating power by direct measurement of antenna power.

1400 Kilocycles

KU—KU, Inc., Tuskegee, Ala.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

1420 Kilocycles

WSPB—WSPB, Inc., Sarasota, Fla.—Authority to determine operating power by direct measurement of antenna power.

1450 Kilocycles

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Construction permit to make changes in equipment and make changes in directional antenna (for use day and night); change frequency and power from 1450 kc., 1 KW, 5 KW day, to 730 kc., 10 KW day and night; move transmitter from 1000 Harvard Ave., Cuyahoga Heights, Ohio, to Bassett Road, Dover, Ohio.

1500 Kilocycles

WMEX—The Northern Corporation, Boston, Mass.—Modification of construction permit (B1-P-1167) for change in frequency, increase in power, new transmitter, directional antenna, and move of transmitter, further requesting changes in directional antenna and move of transmitter from Granite Ave., Milton, Mass., to W. Squantum St. and John St., Montclair (Quincy), Mass.; and extend commencement date 30 days and completion date 180 days. Corrected re: sections 11 b and e. and new resolution filed under section 18.

WMJQ—Cordele Dispatch Publishing Co., Inc., Cordele, Ga.—Modification of construction permit (B3-P-2384) for a new station, requesting authority to make changes in equipment, and approval of antenna, and approval of studio and transmitter site at end of 23rd Ave., Cordele, Ga.

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant R. Wrathall, d/b as Utah Broadcasting Company. Grant R. Wrathall, d/b as Utah Broadcasting Company, Salt Lake City, Utah.—License to cover construction permit (B3-P-2513) as modified for changes in equipment and increase in power.

WKEU—Radio Station WKEU, Griffin, Ga.—Construction permit to make changes in antenna and change hours of operation from daytime to unlimited, using 100 watts power.

KNEI—G. L. Burns, Brady, Tex.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

January 19, 1940
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

- Modification of construction permit (B1-PHB-76) to change transmitter site from Hotel Bradford, 275 Tremont St., Boston, Mass., to Newport Road, Hull, Mass., and extend commencement date to 60 days after grant and completion date to 180 days thereafter.

- Modification of license to add the frequencies of 11870 and 17780 kc. to those already authorized (6140, 9570, 15210, 21540), sharing time on all frequencies with WPIT.

WENH—WJR, The Goodwill Station, Portable-Mobile.
- License to cover construction permit (B2-PRY-185) to change frequencies and make changes in equipment.

NEW—William G. H. Finch, New York, N. Y.
- Construction permit for a new high frequency broadcast station to be located at 1819 Broadway, New York, N. Y., to be operated on 117910 kc., 1 kW power, unlimited time, special emission.

W2XWG—National Broadcasting Co., Inc., New York, N. Y.
- License to cover construction permit (B1-PHY-80) for new high frequency broadcast station.

NEW—God's Bible School and College, Cincinnati, Ohio.
- Construction permit for a new international broadcast station to be located at 1810 Young St., Cincinnati, Ohio, on 11710 and 21610 kc., unlimited time on 21610 kc. and sharing time on 11710 kc., 60 kW power, A-3 emission.

- License to cover construction permit (B2-PHY-185) for new high frequency broadcast station.

NEW—Peoria Broadcasting Co., area of Peoria, Ill.
- Construction permit for a new relay broadcast station at 1819 Broadway, New York, N. Y., to be operated on 11710, 33380, 35020, 37620, 39820 kc., 1 watt power, A-3 emission, unlimited time. Portable-Mobile, area of Peoria, Ill.

NEW—Peoria Broadcasting Co., Peoria, Ill.
- License to cover construction permit (B3-PHY-196) for new relay broadcast station.

KBQB—Edwin A. Kraft, area of Juneau, Alaska.
- License to cover construction permit (B5-PHY-196) for new relay broadcast station.

- Construction permit to change frequencies from Group G (33380, 35020, 37620, 39820 kc.) to Group A (1622, 2038, 2150, 2790 kc.) and make changes in equipment and operate with 50 watts power.

NEW—The Crosley Corporation, Cincinnati, Ohio.
- Construction permit for a new high frequency broadcast station to be located at corner Vine and Fifth Streets, Carew Tower, Cincinnati, Ohio, to be operated on 43500 kc., 1 kW power, unlimited time, special emission.

KEIT—Midland Broadcasting Co., Portable-Mobile.
- License to cover construction permit (B4-PRE-325) for changes in equipment.

NEW—Bamberger Broadcasting Service, Inc., New York, N. Y.
- Construction permit for a new television broadcast station to be located at 1450 Broadway, New York, N. Y., on the frequency channel 81000-90000 kc., 1 kW power for both visual and aural, A-3 and A-5 emission. Amended to request Class II television station and change frequency channel to Channel 4 (81000-81400 kc.).

Aurine Company, Inc., Chicago, Ill., in newspaper and periodical advertising, allegedly made representations, directly or by implication, to the effect that its preparation "Aurine" is a cure or remedy for deafness, has therapeutic value in treating it, and is competent and effective in treating ringing and buzzing head noises due to hardened or coagulated wax in the ear. The respondent also allegedly advertised that it refunds the purchase price to dissatisfied customers.

The complaint charges that the respondent's representations are misleading and constitute false advertisements. Deafness, the complaint continues, may be caused by either a central or systemic or local disorder or condition. "Aurine" allegedly is not a cure or remedy or competent or effective treatment for deafness or conditions due to hardened wax in the ear although its use may soften accumulations of wax in the ear. However, the complaint points out, without the use of an instrument to extract wax, the conditions which may result from an accumulation of wax, namely, temporary deafness, ringing or buzzing head noises, will not be materially benefited or relieved. The complaint alleges that the respondent does not uniformly make refunds to purchasers who are not satisfied with the results obtained.

Alleging violation of the Federal Trade Commission Act, the complaints grant each respondent 20 days for filing answers. (3993)

Theodore Radin, Inc., New York, N. Y., distributes "Glycirenan," "Glycirenan-Forte," "Jodirenan," "Inhaledrin-Compositum," and "Aerizon," which it allegedly advertises in newspapers, testimonials and circulars as being cures, remedies or competent treatments for asthma, hay fever, sinus discomfort, bronchial asthma and other bronchial ailments. It is also alleged to represent that its preparations are absolutely harmless no matter how often used, and that their use will prevent attacks of asthma and hay fever or the recurrence of these ailments and will relieve the suffering incident to them.

The complaint charges that the respondent's assertions are exaggerated and misleading, and that its products do not constitute competent and effective treatments in excess of furnishing temporary symptomatic relief from the paroxysms of asthma, attacks of hay fever, bronchial irritations and sinus discomfort. Further, the complaint alleges, the preparations are not absolutely harmless no matter how often used because of the presence of epinephrine and ephedrine and their use over a long period is likely to produce prolonged vasoconstriction such as to cause tissue damage from anoxemia, with secondary inflammatory reactions. (3992)

CEASE AND DESIST ORDERS

No cease and desist orders were entered during the week.

STIPULATIONS

The Commission has entered into the following stipulations:

American Electrical Sales Company, Inc., 65 East 8th St., New York, agrees to desist from advertising or distributing used or reconditioned electrical apparatus or equipment without properly disclosing the fact that it is used or reconditioned, and from implying in its advertising or otherwise that the merchandise is new and unused. The respondent also agrees to desist from misrepresenting prices of equipment. (2644)

Ascot Mills—Ab D. Kasen, trading as Ascot Mills, New York, in the sale of knitted sportswear or other products, agrees to desist from use of the word "Mills" as a part of his trade name or in any manner implying that the respondent knits or manufactures the products sold by him or owns or controls a mill in which such goods are made, when this is not a fact. The stipulation points out that the respondent fills orders with products made by other concerns as to which he has no ownership or control and for which he acts only as selling agent. (2650)

David H. Blanck & Company—David H. Blanck, trading as David H. Blanck & Co., Philadelphia, Pa., in the sale and distribu-
tion of drugs and other merchandise, agrees to cease simulating or imitating the wrappers or containers of a competitive product in any way by design, arrangement, wording or otherwise, with a tendency to confuse purchasers into believing that the product so labeled is that of another concern. The stipulation points out that in the sale of “Femigene”, a douche powder, the respondent used labels on the containers which simulated those of a competitive douche powder. (2647)

Century Hosiery Mills, Inc., Burlington, N. C., distributor of hosiery, agrees to desist from use of the word “Mills”, as part of its corporate or trade name, on stationery or other printed matter, in advertising or in any manner tending to convey the belief to purchasers that all the products offered for sale by it are knitted or manufactured in its own mills, or that it actually owns, operates or directly and absolutely controls the mill or factory wherein the products are manufactured, when such is not the fact. (2641)

Ciba Pharmaceutical Products, Inc., Summit, N. J., agrees to cease representing that “Agomensin ‘Ciba’” has the action in all cases of activating menstruation, stimulating ovarian function, or preventing hyperemia; is indicated as a proper and effective treatment or cure for certain diseases of women, regardless of the cause, and that its hormone content, estrin or progestin, is sufficient to have therapeutic effect, except in cases where relatively low hormone potency is indicated. Further representations to be discontinued are that “Sistomensin ‘Ciba’” is a competent and effective treatment for the control of hemorrhage of puberty and of menopause, in all cases; is indicated for all symptoms of hormone deficiency or for all types of climacteric disturbances, and that the estrin content of “Sistomensin ‘Ciba’” is such that, when given as directed, it will be effective, except in cases where relatively low hormone potency is indicated. (2649)

Clark’s Cancellation Shoes—David R. Schlossman, trading as Clark’s Cancellation Shoes, 525 13th St., N. W., Washington, D. C., engaged in selling women’s shoes at retail, agrees to discontinue use of the word “Cancellation” as part of his trade name and from use of the word or any similar words in his advertising matter which tends to convey the belief to purchasers that the shoes sold by him are of the “cancelled order” class, when such is not the fact. (2642)

G. E. Conkey Company, Cleveland, Ohio, in its supplemental stipulation, agrees to cease advertising, directly or by implication, that either of its products, “Conkey’s Y-O Starting Feed” or “Conkey’s Y-O 32% Supplement”, will prevent leg weakness in poultry when that condition is not due to a deficiency of Vitamin D, and that either product is a competent and effective remedy or cure for an existing leg weakness. The respondent company admitted that its products will be of no benefit in preventing leg weakness in poultry except when that condition is due to a deficiency of Vitamin D and that the preparations are not competent to treat or cure an existing leg weakness. (02269)

Consolidated Theatre Supply Corporation, New York, in the sale of theatre equipment, accessories and supplies, will cease employing the word “Manufacturers” as descriptive of its business or in any way except in referring to products it may actually manufacture; describing its business as that of “Distributors” or in any other manner implying that the respondent, a jobbing concern, is a duly constituted distributing agency for the producers of the goods which it sells; describing its business as that of “Exporters”, unless and until a substantial part of its regular business is actually in the export trade, and representing itself to be the “Theatre Equipment Center of America” or using any assertions conveying the impression that the respondent corporation conducts a large and imposing business, is not discontinued as the advertising or selling of second-hand or rebuilt equipment without disclosure that it is such; placing a fictitious or exaggerated valuation upon certain merchandise; representing that prices quoted in the ordinary course of trade are “Special”, “Introductory” or “Orastic Reductions”, or that prices and quality are guaranteed unless the language is properly qualified, and designating its method of merchandising as a “Triple Thrift Replacement Plan” or otherwise representing that advantageous transactions are offered other than the usual prices and payment terms, when such is not a fact. (2651)

Donnelly Company—A stipulation has been entered into to cease misleading representations in the sale of their preparations from Arthur M. Donnelly and E. R. Evans, trading as Donnelly Company, 5988 Easton Ave., St. Louis, dealers in cosmetics. In the sale of “Roll Away Lotion”, the respondents agree to discontinue advertising, directly or by implication, that their product or any other cosmetic preparation containing substantially the same ingredients or the same properties, whether sold under that or any other name, is the only new and unique skin lotion on the market, the only preparation which rolls off the skin, and the only cleanser which will not dry the skin.

The respondents also agree to cease representing that their product is efficient as a general healing preparation; that it smooths out horby, scratchy or wrinkled skin in every instance, possesses penetrating qualities, is more effective than other lotions in softening and smoothing rough skin surfaces, and whitens the skin or possesses bleaching properties. (02492)

O. Henry Shirt Company—Agreeing to discontinue misleading representations in the sale of men’s shirts, Harry Marks, trading as O. Henry Shirt Co., Greensboro, N. C., has entered into a stipulation.

The respondent agrees to cease advertising that the shirts he sells will not shrink or are otherwise pre-shrunk, when the materials used in their manufacture have not been fully shrunk or pre-shrunk to the extent that no residual shrinkage is left in them, and to discontinue representing that the shirts he sells will not fade or are manufactured from materials the colors of which are fast, unless on the label the color or dye in the materials is a true fast color and will not fade or chalk when subjected to laundering. (02491)

K-C Optical Company—See Specialty Optical Company.

Krege Department Stores, Inc., operating under the trade name of The Palais Royal, 11th & G Sts., N. W., Washington, D. C., has entered into a stipulation to cease making certain misleading representations in the sale of Chinese filet banquet or dinner cloths advertised as “Tuscany Lace”.

The respondent corporation agrees to cease representing, directly or by implication, that any banquet cloths or other articles sold by it are “Tuscany Lace”, unless they are in fact true Tuscany Lace, which is defined in the stipulation as being a hand-made filet lace of grape design produced in the Tuscany district of Italy, from linen thread.

The stipulation points out that the banquet cloths referred to by the respondent corporation as “Hand-Made Tuscany Lace” were in fact filet laces made of cotton thread in China to imitate the true Tuscany lace. (02489)

G. L. Morris Corporation, Cleveland, Ohio, distributor of theatrical equipment, including portable dance floor mats, agrees to desist from representing itself to be a manufacturer when it neither owns, operates nor controls a manufacturing plant and from representing itself to be the “exclusive” manufacturer of portable dance floor mats or any other product when there are similar articles on the market made and sold by others. (2643)

Palais Royal—See Krege Department Stores, Inc.

Patty Publishing Company—William Michael, trading as The Patty Publishing Company, 618 South Western Ave., Los Angeles, engaged in selling a system for making selections in horse races designated “The Flat Wager System”, agrees to discontinue representing that a booklet which he distributes gratuitously for advertising purposes contains instructions and information for making selections in horse races. (02490)

Pritchard and Thompson Advertising Agency, Inc., New Orleans, La., agrees to cease disseminating advertisements which represent, directly or by implication, that “HF” is a remedy and a complete treatment or cure for athlete’s foot; that other preparations are not beneficial in treating this condition or disease and will not reach the parasites causing it, and that the use of “HF”
will keep a person "rid" of this disease or condition and eradicate the germs causing it.

Other representations to be discontinued by the agency are that the use of "HF" will cause the itching accompanying athlete’s foot to stop; that the product is world renowned, and that more money has been spent for advertising it in a given time than for any other athlete’s foot medicine. (02488)

Sears, Roebuck & Company, Chicago, agrees to discontinue representations in advertising matter, by use of the words “Hand-Made” or “Hand-Stitched,” to imply that merchandise is made or stitched by hand, when such is not a fact. The stipulation points out that certain machine-stitched comforters were purportedly so advertised. (2648)

Sulbermann, Kohn & Wallenstein, Inc., New York, N. Y., importer of diamonds and manufacturer of jewelry, agrees to desist from the use in advertisements, or from placing advertisements in the hands of others for their use, in which appear any representation directly asserting or the effect of which tends to convey the impression that an individual, firm or corporation named in the advertisements is the importer of the displayed merchandise, when in fact such person or concern is not the importer. The stipulation points out that in order to stimulate the sale of its diamonds and other jewelry, the respondent adopted a plan of causing various of its customers to receive, purportedly as importers, diamonds from a source of supply in a foreign country for the purpose of having the package containing the diamonds and the shipping documents pertaining thereto photographed and such pictures featured in newspaper or other advertisements of jewelry with diamond settings. The respondent also agrees to cease representing in advertising matter or in any other way that prices charged for designated merchandise have been stripped of the profits of the middleman, broker or importer, when such is not a fact. (2640)

N. G. Slater Corporation, 3-7 West 29th St., New York, agrees to discontinue representations in catalogs or other advertising matter implying that it is the manufacturer of certain products distributed by it, or that the corporation owns or operates the plants in which such merchandise is manufactured, when such is not a fact. (2645)

Southwestern Distilled Products, Inc., West Memphis, Ark., engaged in the rectifying, bottling and sale of distilled spirits, agrees to desist from holding itself out to be, or in any way designating itself as, a distiller, in its advertising matter, trade literature, labels or otherwise, when such is not a fact; or in any manner representing that the liquors sold by it have been distilled in its own plant when it neither owns, operates nor controls the plant in which such distilled spirits are produced. The stipulation points out that the respondent described itself as “Distillers and Rectifiers” when it neither operates nor is licensed or authorized to operate a distillery, although it does conduct a rectifying and bottling plant. (2646)

Specialty Optical Company—John David Brock, trading as Specialty Optical Company, Superior Optical Company, and K-C Wholesale Optical Company, Kansas City, Mo., according to the stipulation, referred in catalogs to certain spectacle frames as being “Neatly Engraved Rhodium Plated—Pink Finish” or “Tan Finish”, when in fact such advertising was misleading in that it tended to convey the impression to purchasers that the pink or tan finish was an inherent quality of the rhodium used in plating such products and, therefore, would not wear away or change its color. The respondent agrees to cease such use of the words “Pink Finish” or “Tan Finish”. The respondent also stipulates that he will desist from using the term “Semi-Precious” as descriptive of products made from so-called “Villadium” which is not composed of the precious metals. (2638)

Superior Optical Company—See Specialty Optical Company.

Ver Halen Publications—Charles J. Ver Halen and Charles J. Ver Halen, Jr., trading as Ver Halen Publications, Los Angeles, Cal., and engaged in the publication of “Photographic Dealer”, a trade paper, agree to cease representing, directly or by implication, that their journal is either the first or the only trade journal in the photographic industry. The respondent co-partners also agree to desist from the claim that their publication is the “Official Buying Guide of the Photographic Industry”, when such is not a fact, and to discontinue any representation concerning the alleged cost of mailing an issue of the publication to subscribers in various zones of the United States which is not in all respects true. (2639)
A Message from Neville Miller

I have just returned to Washington from attending District meetings in New Orleans, Dallas, Los Angeles, San Francisco, Portland, Seattle, Columbus, Georgia, and Orlando, Florida. These meetings, with the Third District recently held in Camden, complete the series of District meetings, and I believe we can feel very encouraged over the enthusiastic support which Broadcast Music received at practically all the meetings.

Now, for a few statistics—416 stations were represented at the meetings, and representatives of 358 stations have either signed or agreed to recommend approval by their directors, or have indicated approval in some manner. In a number of cases, the representative present individually approved of Broadcast Music, but felt he was unauthorized to commit his station in any way without first reporting back to his superiors. 140 stations have sent in their checks, together with signed Stock Subscriptions and License Agreements; additional ones are arriving in every mail. I believe we can now count on the support of at least 90 per cent of those stations which were represented at the meetings. That, to me, indicates a tremendous endorsement. However, there is much work yet to be done.

To those stations who have sent in their checks, Stock Subscriptions and License Agreements, we express our sincere appreciation.

We urge those which have indicated approval, but have yet to send in their checks, Stock Subscriptions and License Agreements, to attend to this at the earliest possible moment. Your immediate attention will be greatly appreciated.

To those stations which have not yet committed themselves, we urge your careful consideration of Broadcast Music now. Any additional information desired, will be furnished upon request. We want your support and cooperation. May we hear from you NOW?

Several months ago, many said the broadcasters would never show a united front, and would not contribute any substantial sum. By your recent actions, you have answered that statement more eloquently than I have done by any number of words.

Let’s finish the job with a bang—may we hear from you NOW?

Sincerely yours,
Labor

A. F. OF M. AUTHORIZES LOCAL CONTRACTS FOR AFFILIATES

Joseph N. Weber, president of the American Federation of Musicians, sent the following letter to all his locals on January 17, from the A. F. of M. executive board meeting in Miami:

“As the national agreement has expired all local unions may use their own judgment in entering into contracts with radio stations in their jurisdiction. These contracts must not contain any stipulations contrary to the laws and rules of the American Federation of Musicians and furthermore should contain the following: nothing herein shall be so construed as to interfere with the prior obligations of the musicians to the American Federation of Musicians as members thereof.

“Decisions and conclusions of the International Executive Board in the radio situation were based upon new developments and facts which in the interest of the Federation the Board conformed to. Copy of local radio contracts must be sent to the President of the American Federation of Musicians.”

There is some doubt as to what the union means by the suggested clause for inclusion in all local agreements. In the opinion of some, it means that the local contracts could be abrogated at any time by the union’s international office.

WAGE AND HOUR LAW

Three broadcasting stations are in trouble with the Wage and Hour Administration. In two cases the trouble followed inspection by federal agents. In the third, the engineering staff made a complaint.

In all three cases, failure to pay time and one-half for overtime beyond 42 hours a week led to the trouble. Inadequate records figured in two of the cases. Calling a chief engineer who took a regular trick at the transmitter an “executive” led to one complaint. Partial payment of employees in “due bills” also was involved in one case.

The NAB Labor Relations Director again urges all station managers who have any doubt about whether they are complying with the law to send in their questions.

Federal District Judge Charles E. Woodward, in Chicago, has ordered the G. and G. Genuine Majestic Refrigerator and Radio Parts Company to reinstate an employee fired, allegedly, because he supplied Wage and Hour inspectors information about law violation by the employer.

NEW ACA CONTRACT

The ACA News reports a new contract between Station WPEN, Philadelphia, and the American Communications Association (C.I.O.) covering announcers, production men, telephone operators, building maintenance employees, commercial department and general office workers. The contract calls for increased wages, a 40-hour week, closed shop, and time and one-half for overtime.

DISTRICT FIVE BROADCASTERS APPROVE BROADCAST MUSIC

District Five broadcasters, at meetings last week in Columbus, Ga., and Orlando, Fla., expressed approval of Broadcast Music, Inc. After hearing Neville Miller explain how the new corporation would operate, representatives of the following stations signed, promised to sign or said they would recommend signing subscriptions:

WAPI, WBCR, WSGN, WCOV, WSFA, WFTL, WFTM, WMBR, WIOD, WQAM, WDBO, WSUN, WSTP, WTAI, WDAE, WFLA, WJNO, WGPC, WAGA, WATL, WSB, WRGBL, WMAZ, WTOC, WPAX, WPRP.

Present at District 5 meeting in Columbus, Ga.:

Thad Holt, WAPI; K. G. Marshall, WBCR; Henry P. Johnson, WSGN; G. W. Covington, Jr., WCOV; Howard E. Pill, WSFA; Stewart Watson, WGPC; Maurice C. Coleman, WATL; Paula Willirit, John Fulton, WGST; Lambdin Kay, WSB-WAGA; William J. Davis, WRDW; James Woodruff, Jr.; Wilton Cobbs, WMAZ; Ben Williams, William O. Knight, WTOC; H. Wimpy, WPAX; Jack Williams, John J. Tobola, WAXX; Walter Tison, WFLA.

Present at District 5 meeting in Orlando, Fla.:

W. Wright Esch, WMJF; James H. Knox, WFTL; W. E. Bonn, Jr., WFTM; Jack Hopkins, WJAX; Frank King, Glenn Marshall, Jr., WMBR; Hal Leysion, WIOD; F. W. Borton, WQAM; H. P. Danforth, WDBO; R. M. Tizard, WFOY; Harold H. Meyer, WSUN; Fred Bugle, WSTP; L. S. Mitchell, WDAE; Walter Tison, WFLA; Reggie Martin, WJNO; Robert Feagin, Mrs. Marjorie B. Willis, WTOC.

FREE OFFERS

Several new and even subtler forms of time-chiseling have been reported to NAB Headquarters by member stations during the past two weeks.
MacFadden Publications offers to let stations and their listeners in on its $100 weekly reward (for apprehension of wanted criminals) if they will broadcast the "True Detective Mysteries" half-hour show, dramatized from True Detective Mysteries Magazine.

American Boy Magazine asks stations to broadcast advance publicity of articles and features appearing in its February issue.

The Bureau of Industrial Service is allowing stations to broadcast "free of charge" a script describing the advantages of new woven glass fabrics for home decoration.

The Spector-Goodman Advertising Agency, Chicago, offers daily transcribed programs on behalf of its client, Winn Publishing Company, (Race-Track Publications). The transcriptions are available, free of charge, (if on a sustaining basis) and "at actual cost of production—only $8.25 per program," if station obtains a sponsor. This offer is made further appealing by the agency's announcement that "inasmuch as Winn Publishing Company is contemplating an advertising campaign in newspapers in your city, this is an opportune time to feature Willie Winn on your station." Thus stations will be allowed to help the time-chiseler sell form charts and tips to listeners who want to play the races, the profits from said sales to be spent in newspapers.

The Institute of American Meat Packers is requesting stations to broadcast recipes recommending pork sausage as an excellent menu item for breakfast on Ground Hog day, or any other day.

As usual, the Bureau of Radio Advertising has advised these concerns that NAB members consider acceptance of their generous offers bad business practice. The companies have been invited to use radio advertising on a regular paid basis.

The National Chemical and Manufacturing Company, Chicago, in reply to a recent letter from the Bureau, has disclaimed any intention of time-chiseling. Their offer on behalf of Luminall was for "sampling purposes" only, they stated. The successful results of this sampling have now made it possible for them to produce a series of transcribed programs, "the time for which will be paid for in full by either our dealers or ourselves."

Cost-Per-Inquiry

The following advertising agencies have recently sought to place cost-per-inquiry accounts on member stations:

Sterling Beeson, Inc., Toledo, Ohio
F. Arthur Caso, Inc., New York City

The Bureau of Radio Advertising has advised them that such propositions are contrary to accepted business practice among NAB member stations. In reply, the Sterling Beeson Company has agreed to withdraw its percentage request as far as NAB members are concerned. The Bureau has again invited the company to consider a regular radio advertising campaign.

NAB ACCOUNTING COMMITTEE

Neville Miller congratulated the NAB Accounting Committee this week for its work with the FCC Accounting Department in obtaining simplification of the annual financial report broadcasters must make to the Commission. The Committee has held seven meetings during the last year. Numerous conferences have been held with William J. Norfleet, chief accountant, and de Quincy Sutton, his assistant, who cooperated in presenting the industry's view to the Commission.

The Committee's object was to have a report form that would give the Commission the information they request and were required to secure under the Radio Act and at the same time in keeping with the manner in which most stations kept their books and records. The Committee also recommended to the FCC Accounting Department that the program portion of the previous reports be eliminated and that a sample week be adopted rather than a detailed week by week report. The amount of details required to be filed by stations doing less than $25,000 per year was kept to a minimum. The date for filing the return also was postponed to allow the use of tax returns in compiling it.

The members of the Accounting Committee during 1938-39 were: Harry C. Wilder, WSYR, Chairman; L. A. Benson, WIL; E. E. Hill, WORC; E. M. Stoer, Hearst Radio, Inc.; Harold Wheelahan, WSMB; Frank White, CBS; Mark Woods, NBC; P. M. Thomas, WJR; and Edwin M. Spence, Secretary to the Committee.

The new Committee, appointed after the July convention consists of C. T. Lucy, WRVA, Chairman; H. W. Batchelder, WFBR; S. R. Dean, CBS; E. J. Gluck, WSO; N. L. Kidd, WSYR; and Harry F. McKeon, NBC.

Members of both committees devoted many hours of time to this work.
LIBEL INSURANCE

The NAB has been informed of the possibility of broadcasters' taking out libel and slander insurance through Employers Reinsurance Corporation, Kansas City, Missouri. So far as the NAB knows this is the only company in the country writing this coverage at present.

Under their policy form, the station usually assumes liability up to $2,500 or $5,000 in respect of each loss, and they cover for the excess. With regard to rates, they state:

"Since each risk is underwritten separately and individually it is most difficult, if not impossible, to advise a blanket rate which would be applicable in all cases but you may keep in mind that the basic rate from which we start is the published advertising charge of each station, that is the charge for one hour after 6:00 p. m., exclusive of talent and other charges. This charge is presumed to reflect the power of the station, time on the air, population reached, and popularity, together with other phases of the situation. This basic charge is then taken into consideration with other factors such as territory served, personnel, etc.

"This basic charge is usually considered applicable to either of two proposals: $50,000 excess of $5,000, or $25,000 excess of $2,500. Should a prospective assured desire higher limits up to $100,000 there is an increased rate applicable in the amount of 15% to 35%.

"Our minimum premium for any radio station is $150.00 and in order to get a fairly accurate idea as to the cost of this insurance you might well take the published advertising charge as above described, for usually such charge is not increased materially, except in some peculiar circumstance such as where the station involved is a key station of a network or there is involved some other extenuating circumstances."

---

ENGINEERING

FREQUENCY MODULATION

NAB Reports for December 29, 1939, told of the scheduled FCC hearing on "High Frequency." This hearing has been called in order that the facts concerning Frequency Modulation, as best we know them today, can be correlated to give an indication as to the ultimate value of Frequency Modulation.

Many claims have been made for F. M. such as "static free reception," great coverage with low power, and high fidelity.

Modulation is the process of controlling the radio signal caused by the sound desired to be transmitted. In the present day amplitude modulation this control produces a change in the amplitude of the transmitter power. In the Frequency Modulation system the amplitude of the transmitter power is maintained constant but the frequency is varied.

When modulating with A. M. the transmitter power is varied from the extremes of zero to four times the carrier power at 100 per cent modulation, while with F. M. this power remains constant for all modulation. F. M. then has an advantage over A. M. so far as transmitter power is concerned, in that only the carrier power used need be provided for, while in the A. M. system provision must be made to handle four times this power.

In A. M. the carrier frequency is maintained constant and in F. M. the carrier frequency may be varied over a desired band. At present F. M. stations are licensed to operate on a band width of 200 kc. A. M. then has an advantage in that 20 of our present A. M. channels could be provided for in the space required for one wide band F. M. channel. It should be pointed out that if we should make an A. M. allocation in the U. H. F. band with channel separations the same as we have in the present broadcast band, namely, 10 kc., we would not be able to extend the band of audio frequencies transmitter such as is proposed by the sponsors of F. M. Another important factor is that it is difficult to build an A. M. U. H. F. receiver with a small enough drift so that the receiver does not detune. On the other hand it takes a comparatively large receiver drift to have appreciable effect on F. M. signals.

It is claimed that the signal from the desired station need be only twice as strong as that from an undesired station operating on the same frequency for good reception with F. M., while A. M. requires that the signal from the desired station be 20 times as strong. This then would allow a smaller spacing between F. M. stations for the same protection from interferences. In connection with the allocation problem it may be possible to place F. M. stations on adjacent channels, although it might be more satisfactory to put them on alternate channels in the same locality.

The F. M. system inherently does not respond as readily to noise and static as does A. M. in the same frequency band and there is claimed an advantage for F. M. of 20 to 1 up to 50 to 1 in signal strength. If these ratios are correct, using the 20 to 1 figure, it will require 400 times the power with A. M. to give as clear a signal as with F. M. on the same frequency and 2500 times using the 50 to 1 value.

The various advantages of F. M. are dependent on the width of the band used. One of the important questions which needs answering is, if we adopt F. M., what band width should be used? The narrower the band the more power is required to give the same results but a narrower band of frequencies is required.

Much experimental work has been done on the Paxton station of the Yankee Network. New England has favor-
able conditions for F. M. in that the conductivity of the land is very low reducing the coverage of standard broadcast band stations, and that there are available high mountains which are suitable for F. M. antennas. The height of the F. M. antenna is important in that the signal from an ultra high frequency station is directly proportional to the height of the antenna. Also the horizon of the antenna is important in the use of U. H. F., that the optical horizon is not so important as it is regardless of power. Major Armstrong and Mr. de Mars report on the “study of the propagation of radio waves” at distances of the order of 2 horizons and greater, these tropospheral waves probably represent the predominant part of the received field at the U. H. F.

The effects of fading on A. M. signals in the U. H. F. are known to a certain extent and cause trouble at some point not very far beyond the horizon. According to Mr. Paul de Mars, technical director of the Yankee Network, fading has little effect on the results when using F. M. According to Mr. de Mars, the Yankee Network F. M. station at Paxton will have a good reliable range of about 100 miles when the power is stepped up to 50 kw. from its present power of 2 kw. If his predictions are borne out then the station will have good coverage to almost two horizons. Going over the horizon from a U. H. F. station there is a gradual increase in the attenuation of the waves. This has two effects, one detrimental, and the other good. The detrimental effect, of course, is a relatively small increase in area covered with a power increase. The good effect is that with the greater attenuation the stations can be placed closer together with a smaller waste area between them. The distance in miles to the horizon from a transmitting antenna over spherical earth equals 1.22 times the square root of the height in feet. If the receiving antenna is elevated, its horizon should be calculated, with the same formula, and this distance added to the transmitting antenna’s horizon.

The Paxton antenna is 1800 feet above sea level. This height gives a sea level horizon of 51.7 miles. Two horizons then would be 103.4 miles. If we take a case in the plains of the middle west the height above surrounding country will be of the order of 600 feet, we have a horizon at 30 miles or 60 miles for two horizons. These figures are given merely for a relative comparison and probably an index to A. M. coverage using the horizon value but not F. M. in as much as we still have not determined at what point beyond the horizon coverage will cease, regardless of power. Major Armstrong and Mr. de Mars claim that due to the slight effect of fading on F. M. signals, that the optical horizon is not so important as it is with A. M., therefore they predict ranges of the order of 100 miles over most conditions of terrain. It also should be pointed out that the height of the receiving antenna has an effect on the effective horizon. Assuming an average height for residential antennas of 30 feet the horizon will be extended 6.7 miles approximately. The height of the receiving antenna has a direct bearing on the signal received. As with the transmitting antenna, the field strength is proportional to the height of the antenna.

No one can tell at present what will be the future of F. M. as far as the broadcasting industry is concerned. Its development involves the general use of special receivers. None of the regular receivers now in use are suitable for receiving F. M. and there are some forty-four million receivers in the United States. On the other hand, there are indications of considerable developments both from the transmitting angle as well as the receiver manufacturing angle. It is not impossible that we may find in the not too distant future that broadcasting has developed into two bands—one the regular broadcast band and the other the F. M. band. No doubt, for some time it will be necessary to have a certain number of stations in the regular broadcast band to provide service to much of the rural and sparsely settled sections of the country, particularly in the plains states. Of course, the use of two bands for receiving broadcasting would increase the cost of receivers. It is not impossible either that F. M. may be generally adopted in years to come, and if such is the economic and technical trend of this new development, there will be required a transition period during which the auxiliary F. M. station gradually changes to the main station and the A. M. station fades into an auxiliary to be ultimately abandoned. However, the information available at this time is insufficient for any reliable prophesies to be made.

Some of the advantages of Frequency Modulation transmission and reception are so marked that it should command the greatest attention from the broadcast industry, in order that the full “system” possibilities might be determined. Many of the questions concerning Frequency Modulation undoubtedly will be answered during the Federal Communication Commissions hearing on “High Frequency” February 28.

**FREQUENCY MODULATION IN NON-BROADCAST SERVICE**

To obtain more factual data about frequency modulation for services other than broadcast, the FCC has announced that it will accept applications for such experimental authorizations on the frequencies allocated to those services above 30,000 kilocycles.

This applies to such services as emergency, aviation, and those miscellaneous radio services not directly involved by the Commission’s informal engineering hearing, scheduled to begin February 28, primarily to consider
TELEVISION HEARING

The last NAB reports carried the testimony in the FCC television hearing up to Wednesday night, January 17. The hearing was then adjourned until Friday.

Chairman James L. Fly resumed the television hearing on Friday, January 19 with the request that a demonstration be arranged for the FCC by the proponents of the various systems. The various respondents invited the Commission to inspect their television.

Dr. Peter Goldmark, in resuming testimony for Columbia, reiterated his statement of Wednesday, that we could improve the present picture quality by 100 per cent adhering to the R. M. A. standards. He said that he thought that if different stations did transmit with a different number of lines that it could be handled in the receiver either with a push button or manual control. Dr. Goldmark remarked that a contrast of 15 to 1 is the best television is doing now and that he expects that we can go to a contrast of 30 to 1 by developments in the technique of transmitting and receiving, even though we adhere to the fixed R. M. A. standards. In respect to the question; if two stations on the same channel could operate without interferences if one used horizontal and the other vertical polarization, he answered that this should be the subject of further tests. It was his opinion that television sets could readily be sold to the people who go to motion picture shows and that ultimately television would replace much of the present theatre going. His set cost him $149.50 completely installed, in contrast to the testimony of Mr. Robert Robins of the Cath-Ray Electronic Laboratories, last week when he said that the receiver was in the $100 price field.

Mr. Frank W. Wozencraft, attorney for the Radio Corporation of America, opened their testimony by stating that television was here and ready for the public. He said that they now had a 4½ x 6 foot television picture in their Camden laboratory and that they hope before the end of the year to have a picture large enough for theatres.

Mr. Alfred H. Morton, vice president of NBC in charge of television, carried on the RCA testimony with the statement that NBC, beginning April 30, 1939, started providing in New York City, ten to twelve hours of television service per week and that this time was augmented by transmission of test patterns, bringing the total weekly time up to approximately 28 hours. The program time was divided into 38 per cent studio, 32 per cent pickup of spot news, and sports, and the remainder of the time using motion picture films.

Mr. Morton estimated that there are 2,000 homes hours were between 7:30 and 9:30 P. M. He testified that it usually takes three men to produce a sound program as against twenty-three for a television program. Mr. Murphy suggested that semi-annually instead of quarterly reports to the Commission be required on television experiments. He also suggested that the proposed rule No. 4.74-D be changed so that at least two competitive signals can be provided in each city.

The hearing was continued with Dr. W. R. G. Baker, Director of Engineering for the Radio Manufacturers Association, giving testimony concerning the methods used in arriving at the RMA Television standards. Dr. Baker said that the RMA Television Committee was appointed two years ago although RMA has been working for four years on television matters. He said that the committee was instructed to entirely neglect patent considerations and that the RMA standards were accepted by the committee, with two dissenting votes on the synchronization standards. It was Dr. Baker's opinion that television would go ahead only if the RMA rules were allowed to go into effect.

John C. Bolte a motion picture theatre owner and operator, of Yonkers, New York, presented additional testimony for the Cath-Ray Electronic Laboratories, concerning the installation of a television receiver in his home. Mr. Bolte said that it took less than three-fourths of an hour to install the television receiver. The receiver used a 7 inch tube and Mr. Bolte testified that 22 people at one time and 18 people at another had viewed television programs at the same time. It was his opinion that television sets could readily be sold to the people who go to motion picture shows and that ultimately television would replace much of the present theatre going. His set cost him $149.50 completely installed, in contrast to the testimony of Mr. Robert Robins of the Cath-Ray Electronic Laboratories, last week when he said that the receiver was in the $100 price field.

Mr. Murphy said that at present the most desirable viewing
equipped with television in the New York area and that on the average 4 to 5 people view each set. Mr. Morton described a survey made which showed that 100 per cent of the set owners looked in 2 hours per week, 87 per cent looked in from 5 to 6 hours per week, 60 per cent looked in from 7 to 8 hours per week, and 21 per cent looked in at the total weekly schedule. Mr. Morton stated that limited commercialization would be very helpful and that it couldn't possibly do any harm. During Mr. Morton's testimony Chairman Fly requested that the various television experimenters present to the FCC figures on expenditure for television development up to date.

Thomas F. Joyce, vice president and member of the Managers Committee of RCA Manufacturing Company, testified that RCA had sold 650 television sets in and around New York and Los Angeles, and that about 100 more were out on loan. Mr. Joyce said that the RCA television dealers were asked what was needed to promote television and their answers fell into five general classifications. Namely, (1) More and better programs were needed. (2) More stations are needed. (3) There should be a substantial lowering of the price of television receivers. (4) Time payments were necessary, and (5) A larger trade discount should be allowed. Mr. Joyce stated that on a basis of a production of 35,000 sets he thought that there could be a substantial reduction in the cost of television receivers, something on the order of 33 per cent. Mr. Joyce thought that the industry could sell in 1940 a minimum of 25,000 television sets if more program services were made available and if limited commercialization were allowed. When asked what the effect would be of adding a second television service in New York City, Mr. Joyce said that he thought that probably 40,000 sets could be sold within a year.

Elmer W. Engstrom presented technical material for RCA. It was his opinion that a field frequency of 48 or better was required for flickerless pictures. It was also his opinion that persistency screens were impractical in eliminating flicker with a lower field frequency. Mr. Engstrom was of the opinion that a driven synchronization impulse was more susceptible to noise than was a loose coupled one. It was his opinion that horizontally polarized waves were slightly better than vertically polarized waves for television. He was of the opinion that the present pictures can be improved at least 100 per cent without going outside of the RMA standards.

At this time Mr. Wozencraft stated that RCA did not ask the FCC to freeze on the RMA standards, but that anyone who could show a good set of standards should be allowed to go ahead with those standards. He said that RCA believes that the RMA standards are the best that can be arrived at at this time and that RCA asks to be allowed to go ahead under those standards. Mr. Engstrom gave his opinion that the additional expense in a receiver in order to receive from two stations using two different synchronizing impulses would be on the order of 10 to 15 dollars on $400.00 receivers and that if a station using a third type of synchronizing impulse was to be accommodated by the receiver it would probably add $10.00 more to the price of the set. Mr. Engstrom did not think that television would ever become a complete substitute for the present sound broadcasting. Mr. Engstrom closed his testimony with a statement that if we were allowed to have limited commercialization and the use of RMA standards that progress would be greatest.

The next witness to be called was Otto Schairer, vice president in charge of patent department of RCA. Mr. Schairer discussed the patent situation and said that probably between 20 and 25 RCA basic patents were needed in order to manufacture a good receiving set for sound broadcasting, and that it would probably be necessary to take out an RCA patent license in order to manufacture receivers under the RMA standards. Mr. Schairer said that the source of RCA’s patents was as follows: (1) Outright purchase of patents from others. (2) Patents developed in their own laboratories. (3) Rights under A. T. and T., G. E., Westinghouse, Hazentine, Farnsworth and foreign companies. Mr. Schairer said that Farnsworth and RCA hold fundamental television patents which are necessary in order to manufacture television equipment under RMA standards.

Mr. Philo T. Farnsworth, vice president in charge of research of Farnsworth Television Company, testified that acceptance of the RMA standards would aid his research. He stated that decreasing the picture rate was undesirable, and believes that retention screens will not help any in eliminating flicker when decreasing the number of picture frames in order to increase the number of lines. Mr. Farnsworth said that television is now ready for the public and he thinks that the RMA standards are the best that can be arrived at at this time.

Major Edwin Armstrong asked that the FCC delay freezing television channels until after the Frequency Modulation hearing on February 28. Major Armstrong suggested that one television channel be taken for Frequency Modulation.

Chairman Fly suggested that a Manufacturers Committee be formed, in order to review the RMA standards. Chairman Fly also indicated that the FCC Commissioners would make an inspection trip about the first part of February to view recent developments in television.

The hearing was concluded on Tuesday, January 23.

Most witnesses saw no threat of television replacing sound broadcasting but rather that it would be an additional service.
Opinions differed widely as to the merits of the RMA standards in spite of the fact that they were presented to the FCC as representing the opinion of the television industry. The differences of opinion mainly concerned the method of synchronizing, the number of lines per frame and the number of frames per second.

There was some divergence of opinion as to whether television had progressed far enough so that a set of engineering standards could be put into effect without hindering television technical development and without running too big a risk that, with partial commercialization and the encouragement of the public to buy sets, a large number of people would have their sets obsoleted over night by a change in standards later.

Practically all the witnesses were in favor of partial commercialization and some were in favor of allowing all television licensees to experiment in program production and charge for it. Some opinion was expressed for permission to charge for more than the program production.

Figures presented indicated that the ultimate television receiver ownership would fall probably around 30 per cent as against approximately 85 per cent family ownership of sound broadcast receivers today and that the average daily hours spent looking-in would be around 2 as against something between 4 and 5 hours of listening at present.

Due to the divergent opinions expressed on certain important factors, Chairman Fly of the FCC asked that arrangements be made for the FCC commissioners to view the work of the various television experimenters and he suggested that a Television Manufacturers Committee be formed by the industry to study the RMA standards. It is probable that there will be some delay before the FCC passes on the proposed television rules.

COLUMBUS ENGINEERING CONFERENCE

The Ohio State Broadcast Engineering Conference was first held in 1938 and was such a success that it has become an annual affair. Professor W. L. Everitt, author of “Communication Engineering”, is a recognized leader in communication engineering education and his splendid efforts along this line were expanded into national importance in 1938 when he sponsored the first Broadcast Engineering Conference.

The conference this year will be held between February 12 and 23 at Ohio State University in Columbus, Ohio. This annual conference gives the broadcast engineers an opportunity to keep up to date under classroom conditions. The past and presently scheduled speakers reads almost like a who’s-who in radio engineering.

The speakers and lecturers of the third annual conference will be:

The conference this year assumes greater importance to NAB because NAB is officially cooperating in the conference. There will be held during the conference, a meeting of the NAB Engineering Committee and a meeting of the NAB Executive Engineering Committee.
The growth of the conference is illustrated by the following figures:

<table>
<thead>
<tr>
<th>Year</th>
<th>Attendance</th>
<th>Number of directors and lecturers</th>
<th>Number of subjects treated</th>
</tr>
</thead>
<tbody>
<tr>
<td>1938</td>
<td>96</td>

<td>146</td>
<td>1939 10</td>
<td>1939 13</td>
</tr>
<tr>
<td>1940</td>
<td></td>
<td>1940 20</td>
<td>1940 18</td>
</tr>
</tbody>
</table>

Probably the subject of widest interest to broadcast engineers at present is Frequency Modulation. There will be four FM conference periods, the first entitled “Frequency Modulation” conducted by E. H. Armstrong, the second “Yankee Network Experience with FM” by Paul de Mars of the Yankee Network, the third “General Electric Experience with FM” by H. P. Thomas and L. R. Weir, and the fourth “FM Receivers” by R. F. Shea of the General Electric Co.

Another highlight of the conference will be a General Discussion and Question Box conducted by Mr. Andrew D. Ring, assistant Chief Engineer of the FCC. Topics of general interest will be discussed, and anyone who wishes to suggest topics is urged to submit them to the Director of the conference, Professor Everitt.

The recreational facilities of the University will be extended to the conference.

Full details on the conference can be secured by writing to Director of the conference, Dr. W. L. Everitt, The Ohio State University, Columbus, Ohio.

MOVIE MANAGERS COMPLAIN ABOUT POT OF GOLD

Cooperative Theatres of Michigan, Inc., Detroit, a group of 100 independent movie theatres, on January 17 complained to Representative Tenerowicz (D-Mich.) that the Pot of Gold program is causing people to stay away from theatres to the extent of $1,000,000 a week. They have filed formal protest with the FCC, pointing out the alleged lack of “public convenience and necessity” in the program, as well as alleged lottery features, and asking that the program be banned. The matter is said to be still pending before the Commission. (Congressional Record, Jan. 23, p. 989.)

CONNERY AND WIGGLESWORTH ATTACK RADIO

Representative Connery (D-Mass.) has charged that there is need for an immediate Congressional investigation of the entire subject of radio. He bases this particularly on “the apparent inability of the members of this Com-

mission (FCC) to protect the public and to eliminate or set aside the present radio monopoly.” (Congressional Record, Jan. 17, p. 661.)

Representative Wigglesworth (R.-Mass.) echoed these sentiments in his remarks on the appropriation for the FCC. Speaking on the question of censorship, he stated:

“We are still confronted by the threat of censorship. A year ago complaint was made against the regulation imposed upon licensees for international broadcasting limiting broadcasts to those ‘reflecting the culture of the country and promoting international good will, understanding, and cooperation.’ That regulation was withdrawn under pressure of public opinion. Today, however, we are confronted by the Code of the National Association of Broadcasters, apparently having the implied blessing of the Commission, as a result of which it is impossible to discuss any controversial issue on the air in time purchased for the purpose. Discussion is possible only on free time and the use of free time is of course in the absolute control and discretion of the broadcasting station. The danger of abuse of this discretion, in the hands of broadcasting stations, is self-evident.” (Congressional Record, Jan. 24, p. 1041)

Both representatives are perennial critics of the industry.

State Legislation

NEW YORK:

A 470 (Goldstein) LOTTERIES—Permits the state to operate and conduct lotteries, net proceeds of which shall be devoted to carrying out long-range health program to safeguard health of people and distribute public medicines. Referred to Judiciary Committee.

A 584 (Recommended by Law Revision Commission) LIBEL—Same as S. 421. Clarifies provisions relating to libel, renumbers sections for more logical arrangement and eliminates overlapping and conflicting provisions. Referred to Judiciary Committee. Joint hearing 1-23-40.

A 612 (Dwyer) DISCRIMINATION—PRESS AND RADIO—Same as S. 198. Makes it a misdemeanor to incite, advocate or promote hatred, violence or hostility against any person or group by reason of race, color, religion or manner of worship by means of book, speech, photograph, radio, flag or emblem. Referred to Judiciary Committee.

A 621 (Ostertag) EMPLOYMENT AGENCIES—Provides for licensing or private fee-charging employment agencies by local authorities. Referred to Judiciary Committee.

A 720 (Hill) RADIO TECHNICIAN—VILLAGES—Permits village trustee to appoint a radio technician to perform duties of radio operator in manner imposed by the trustees. Referred to Villages Committee. Same as S. 551.

S. 421 (Feinberg) LIBEL—Same as A. 584. Clarifies provisions relating to libel, renumbers sections for more logical arrangement, and eliminates overlapping and conflicting provisions. Referred to Judiciary Committee.

S. 445 (Perry) RADIO—RECORDINGS—Prohibits the recording or offering for sale a recording of any radio broadcast without consent of performer or the person broadcasting same, violation being made larceny. Referred to Codes Committee.

S. 551 (Williamson) RADIO TECHNICIAN—VILLAGES—Permits village trustee to appoint a radio technician to perform duties of radio operator in manner imposed by the trustees. Referred to Villages Committee.

KUMA LICENSE REVOCATION MADE FINAL

The FCC made final its order of revocation in the case of radio station KUMA at Yuma, Arizona, after allowing Albert H. Schermann, licensee, to withdraw
application for hearing. The revocation order is effective February 1, 1940.

Revocation proceedings were instituted February 20, 1939. The matter came up for hearing December 1 last at Phoenix, Arizona. The evidence shows that Schermann violated the law in that he failed to operate his station in accordance with the terms of the license, having transferred station control to E. B. Sturdivant. Schermann was shown to have visited Yuma but three times in five years.

KUMA operates on 1420 kilocycles, 100 watts, specified hours.

**FEDERAL COMMUNICATIONS COMMISSION**

**FINAL ORDERS**

The Federal Communications Commission has adopted a final order granting the application of the Union Broadcasting Company to establish a new station at Scranton, Pennsylvania, to operate on 1370 kilocycles, 100 watts night, 250 watts LS, unlimited time.

The application of Clarence H. Frey and Robert O. Greever to establish a new broadcast station at Logan, West Virginia, has been granted by the Commission in a final order. The application was for a frequency of 1290 kilocycles with 100 watts, daytime only, on the express condition that the permittees file an application for modification of the construction permit specifying the exact transmitter location and antenna system.

**PROPOSED FINDING**

The Commission has tentatively adopted a proposed finding of fact proposing to grant the application of the Presque Isle Broadcasting Company for a construction permit to erect a new station at Erie, Pennsylvania, to operate unlimited time on 1500 kilocycles, 100 watts night, 250 watts LS.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

The following hearings and oral arguments are scheduled before the Commission in broadcast cases during the week beginning Monday, January 29. They are subject to change.

**Monday, January 29**

**Tuesday, January 30**

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, 1210 kc., 100 watts, unlimited time.

**Thursday, February 1**

Oral Argument Before the Commission

WRTD—Times-Dispatch Radio Corp., Richmond, Va.—C. P., 500 kc., 1 KW night, 1 KW day, unlimited (DA night).

**FUTURE HEARINGS**

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

**February 19**

NEW—Lookout Mountain Co. of Ga., Lookout Mountain, Ga.—C. P., 1570 kc., 250 watts night, 250 watts LS, unlimited time.

**March 4**

WINS—Hearst Radio, Inc. (Assignor), Metropolitan Broadcasting Corp. (Assignee), New York, N. Y.—Voluntary assignment of license, 1180 kc., 1 KW, limited time (KEX and KOB).

**March 6**

KXL—KXL Broadcasters, Portland, Ore.—C. P., 1120 kc., 250 watts LS, unlimited time, directional antenna.

KTRB—Thomas R. McTammany and William H. Bates, Jr., Modesto, Cali.—C. P., 740 kc., 1 KW night, 1 KW LS, limited to WSB, Atlanta, Ga.

**APPLICATIONS GRANTED**

WHEB—Granite State Broadcasting Corp., Portsmouth, N. H.—Granted construction permit to move studio and transmitter sites from 39 Congress St., Portsmouth, N. H., and Bean’s Hill, Newington, N. H., to U. S. Highway No. 1, Portsmouth, N. H., respectively; install new equipment and vertical radiator, and increase power from 250 watts daytime to 1 KW daytime; frequency 130 kc.

KFVD—Northwest Broadcasting Co., Fort Dodge, Iowa.—Granted modification of construction permit to increase night power from 100 watts to 250 watts (original permit and modification thereof authorized erection of new station in Fort Dodge, Iowa, to operate on 1370 kc., 100 watts night, 250 watts day, specified hours).

KXOX—Sweetwater Radio, Inc., Sweetwater, Tex.—Granted modification of license to change hours of operation from daytime to unlimited, frequency 1210 kc., power 250 watts.

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special experimental authority to transmit facsimile signals experimentally over the regular broadcast transmitter of station WLW between 12 midnight and 6 a.m., EST, for the period February 1, 1940, to February 1, 1941.

WGN—WGN, Inc., Chicago, Ill.—Granted extension of special experimental authority to transmit facsimile signals experimentally over the regular broadcast transmitter of station WGN between the hours of 1 a.m. and 6 a.m., CST, for the period February 1, 1940, to February 1, 1941.

Symons Broadcasting Co., Spokane, Wash.—Granted construction permit for new facsimile broadcast station to operate on 25150 kc., 100 watts, unlimited time.

W1XWP—WDRC, Inc., Meriden, Conn.—Granted modification of license of high frequency broadcast station W1XWP to include permanent authority under its experimental license to rebroadcast high frequency broadcast station W2XMM; 42100 kc., 1000 watts, unlimited time, in accordance with Section 44.
Columbia Broadcasting System, Inc., New York, N. Y.—Granted authority to transmit from Detroit and Dearborn, Mich., through KTSX, San Antonio, Tex., to stations in Mexico, the second Sunday evening Hour Program, for a period of one year beginning January 14, 1940.

KROD—Dorrence D. Roderick, El Paso, Tex.—Granted modification of construction permit to change authorized transmitter site and increase power from 100 watts to 250 watts, install new transmitter, increase authorized antenna height of antenna, and change studio location locally; frequency 1500 kc.

KFBK—Clayton Broadcasting Co., Sacramento, Calif.—Granted extension of special experimental authority to transmit facsimile signals on an experimental basis between the hours 12 midnight and 6 a.m., PST, for the period February 1, 1940, to February 1, 1941.

General Electric Company, New Scotland, N. Y.—Granted construction permit for new television broadcast station to be used as a relay station in conjunction with television broadcast station W2XB; and to operate on 1560000-1620000 kc., 100 watts power, unlimited, in accordance with Section 4.4.

KPLT—A. G. Mayse, Paris, Tex.—Granted authority to transfer control of the North Texas Broadcasting Company, licensee of station KPLT, from A. C. Mayse to Mary Joe Mayse; 1300 kc., 250 watts, unlimited time.

WADC—Allen T. Symmons, Akron, Ohio.—Granted construction permit to install directional antenna for day and night use; increase power from 1 KW night, 5 KW day, to 5 KW unlimited time; frequency 1370 kc., with variable power of 10 to 100 watts, for the period ending December 1, 1940. (Present assignment: 1350 kc., 100 watts night, 250 watts day, unlimited time.)

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Application for modification of license to move studio from New Albany, Ind., to Louisville, Ky. (Present assignment: 1530 kc., 250 watts, unlimited time.)

RENEWAL OF LICENSES

Licenses for the following stations were granted on a temporary basis only, and for the period ending in no event longer than February 1, 1941, said temporary licenses are to contain the following clause: "This license is granted on the express condition that it be on a temporary basis only and subject to the right of the Commission which may be entered after hearing in any proceeding to which the Commission may take upon the licensee's pending application for renewal of license. Nothing contained herein shall be construed as a finding that the operation of this station is or will be in the public interest beyond the express terms hereof."

KIEV, Glendale, Calif.; WJAG, Norfolk, Nebr.

License for the following station was granted on a temporary basis only, and for the period ending in no event longer than February 1, 1941, said temporary license is to contain the following clause: "This license is granted on the express condition that it be on a temporary basis only and subject to the right of the Commission to make effective any changes or modifications hereunder which may be necessary in order to comply with any decision of the Commission which may be entered after hearing in any proceeding of which licensee was duly notified or in which licensee participated. Nothing contained herein shall be construed as a finding that the operation of the station is or will be in the public interest beyond the express terms hereof." 

KWJJ, Portland, Ore.

WSAL—Frank M. Stearns, Salisburv, Md.—Present license extended to not later than October 1, 1940, on a temporary basis only in conformity with and subject to all the terms and conditions of the separate order of revocation entered October 24, 1939, and, further, subject to the final determination of the Commission on said order.

KFAQ—Anchoraze Radio Club, Inc., Anchoraze, Alaska.—Granted renewal of license for the period ending April 1, 1940.

MISCELLANEOUS

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate from 7:15 p.m. PST, to the conclusion of basketball games described in letter dated January 11, 1940, on January 23, February 2, 3, 9, 10, 12, 13, 16, 17, 19, and 20, 1940, in order to broadcast basketball games only.

WEJY—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate relay broadcast station WEJY as a sound channel in conjunction with experimental television station WXAD, for the period beginning January 19, 1940, and ending in no event later than February 17, 1940.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate from 7:15 p.m. PST, to the conclusion of the Montana University v. Washington State College basketball game on January 22, 1940, in order to broadcast basketball games only.

WMPC—The First Methodist Protestant Church of Lapere, Lapere, Mich.—Granted special temporary authority to operate from 9 a.m. to 10 a.m., EST, Monday, Tuesday, Wednesday, Thursday, Friday, and Saturday mornings, for a period not to exceed thirty days or until the Saginaw Broadcasting Company is in a position to use said time in order to broadcast special non-commercial educational programs.

KFB1—The Farmers & Bankers Broadcasting Corp., Wichita, Kan.—Granted extension of special temporary authority to transmit from Wednesday, Thursday, Friday, and Sunday mornings, for a period not to exceed thirty days or until the Saginaw Broadcasting Company is in a position to use said time in order to broadcast special non-commercial educational programs.

WMBQ—Paducah Broadcasting Co., Inc., Hopkinsville, Ky.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

CASA—E. M. Woody, Elk City, Okla.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WHOP—Paducah Broadcasting Co., Inc., Hopkinsville, Ky.—Granted extension of special temporary authority for the period of operations of the station to operate on 1420 kc., 100 watts night, 250 watts day, unlimited time.

Edward J. Doyle, Rochester, N. Y.—Granted motion to accept amendment to application for construction permit for new station to change frequency from 1370 kc. to 1360 kc., power from 500 watts to 1 KW, and time of operation from daytime to unlimited.

KASQ Valley Broadcasting Co., Cleveland, Ohio.—Granted extension of special temporary authority for new station to operate on 1370 kc., 250 watts, unlimited time.

WWRL—Long Island Broadcasting Corp., Woodside, L. I., N. Y.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WWAD—RCA Manufacturing Co., Inc., New York, N. Y.—Granted special temporary authority to operate translator
of television broadcast (experimental) station W3XAD on television bands 18 and 19, frequency 283 and 294 mc, for the period January 19, 1940, to not later than February 17, 1940.

Edwin H. Armstrong, New York, N. Y.—Granted extension of special temporary authority to operate a 1 KW frequency modulated transmitter on 43 mc at the site of the transmitter of station W2XMN, Alpine, N. J., to be operated simultaneously with station W2XMN (40 KW on 428 mc), in order to secure data on adjacent channel operations in preparation for the February 28, 1940, hearing on frequency modulation, for the period January 28, 1940, to not later than February 26, 1940.

Columbia Broadcasting System, Inc., New York, N. Y.—Granted special temporary authority to locate, maintain, and/or use studios or apparatus at Dearborn and Detroit, Mich., owned by or under the control of Columbia Broadcasting System, Inc., and Ford Motor Co., for the purpose of obtaining or producing programs consisting of program of the Ford Sunday Evening Hour, to be transmitted by electrical energy by means of regular CBS network facilities to station KTSX, San Antonio, Tex.; from there to Mexican border by wire (American Telephone and Telegraph Co.); from Mexican border by means of wire line facilities furnished by LaCompania Telefonica y Telegrafica Mexicana, S.A., except to station KEME, Merida, which will rebroadcast the program to stations identified and located in foreign country as follows: To transmit programs to stations XEQ, XEQQ, XET, XETT, XECZ, XES, XED, XEDD, XEU, and XEME (stations in Mexico), on January 21, 1940.

WKST—WKST, Inc., New Castle, Pa.—Granted special temporary authority to operate from 6:30 p.m. to 8 p.m., EST, February 12, 1940, in order to broadcast proceedings of Boy Scout annual dinner, and to operate from 8:30 p.m. to the conclusion of a patriotic pageant of Finnish and Polish music sponsored by the Lawrence County Chapter of the American Red Cross for the purpose of building up a relief fund, on February 12, 1940.

WCLS—WCLS, Joliet, Ill.—Granted special temporary authority to operate from 8:30 p.m. to 10:45 p.m., CST, on January 6 and 13, 1940, in order to broadcast basketball games only.

WBAA—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate from 4 p.m. to 6 p.m., and from 7:45 p.m. to 10 p.m., CST, on January 27, 1940, in order to broadcast the Tippecanoe County Basketball Tournament games only.

Columbia Broadcasting System, Inc., National Broadcasting Co., Inc., Mutual Broadcasting System.—Granted special temporary authority to eliminate the half hour station identification, as required by Rule 3.92, during a Presidential Birthday Infantile Paralysis broadcast from 11 p.m. to 12 midnight, EST, on January 20, 1940.

KIEV—Cannon System, Ltd., Los Angeles, Calif.—Granted extension of time to February 5, 1940, in order to file proposed findings of fact in re application for renewal of license (Docket No. 5766).

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Denied petition to reconsider and grant without hearing the application for renewal of license. Station operates on 1200 kc., 100 watts, unlimited.

KUMA—Albert H. Schermann, Yuma, Ariz.—Granted motion requesting permission to withdraw the written application for reconsideration on the Order of Revocation of station license entered by the Commission on February 20, 1939, effective April 1, 1939, said Order of Revocation being made final, effective February 1, 1940.

APPLICATIONS FILED AT FCC

570 Kilocycles

WSYR—WSYU—Central New York Broadcasting Corporation, Syracuse, N. Y.—Construction permit for new station to be operated on 1370 kc., 1500 watts, unlimited time.

WCEC—WCEC, Chicago, Ill.—Construction permit to install directional antenna for night use; change hours of operation from daytime to 6 p.m., to unlimited time; increase power from 500 watts to 1 KW day and night, and move transmitter from 26 Journal Square, Jersey City, N. J., to Kearney, N. J.

1120 Kilocycles

1200 Kilocycles

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—License to cover C. P. (B3-P-5261) for new equipment and increase in power.

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Authority to determine operating power by direct measurement of antenna power.

KWBD—W. B. Dennis, Plainview, Tex.—Modification of construction permit (B3-P-5238) as modified for new station, requesting new transmitter and frequency monitor, and extend commencement date one day after grant and completion date 60 days thereafter.

1310 Kilocycles

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Authority to determine operating power by direct measurement of antenna power.

KFH—Radio Station KFH Co., Wichita, Kans.—Construction permit to increase power from 1 KW, 5 KW day, to 5 KW day and night; install directional antenna for night use. Amended to make changes in antenna system, and move transmitter 1.6 miles northwest of present site.

NEW—Capital Broadcasting Co., Washington, D. C.—Construction permit for new station to be operated on 1310 kc., 250 watts power, unlimited time. Amended to request frequency of 1310 kc.

KBND—The Bend Bulletin, Bend, Ore.—Authority to determine operating power by direct measurement of antenna power.

1330 Kilocycles

KMO—Carl E. Haymond, Tacoma, Wash.—Construction permit to install new transmitter and increase power from 1 to 5 KW.

1370 Kilocycles

KMAC—W. W. McAllister and Howard W. Davis, d/b a Walmac Co., San Antonio, Tex.—Construction permit to make...
changes in equipment and in antenna system; change frequency from 1370 kc. to 950 kc.; increase in power from 100 watts, 250 watts day, to 1 KW day and night, and hours of operation from shares with KONO to unlimited time. Amended to give transmitter site as 200 Fig St., San Antonio, Tex.; and install directional antenna for day and night use.

KONO—Eugene J. Roth, tr/as Mission Broadcasting Co., San Antonio, Tex.—Authority to determine operating power by direct measurement of antenna power.

1410 Kilocycles

WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—Construction permit to install new transmitter, make changes in antenna, and increase power from 500 watts, 1 KW day, to 1 KW, 5 KW day.

1420 Kilocycles

NEW—Utica Observer-Dispatch, Inc., Utica, N. Y.—Construction permit for a new broadcast station on 1420 kc., 250 watts, unlimited time.

WPAR—Ohio Valley Broadcasting Corporation, Parkersburg, W. Va.—Construction permit to install new transmitter and increase power from 100 to 250 watts.

1430 Kilocycles

KGNF—Great Plains Broadcasting Company (a corporation), North Platte, Nebr.—Construction permit to make changes in equipment.

1450 Kilocycles

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Authority to transfer control of corporation from Norman K. Winston to James M. Cox, Jr., 150 shares common stock and 600 shares preferred stock.

1480 Kilocycles

KOMA—KOMA, Inc., Oklahoma City, Okla.—Construction permit to install new transmitter and directional antenna for night use; increase power from 5 to 50 KW; move transmitter from 71/2 miles northeast of Oklahoma City, Okla., on U. S. Highway No. 66, to Deer Creek Township, Okla.

1490 Kilocycles

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Authority to transfer control of corporation from George L. Hill (75 shares common stock), and from C. D. Seiler (125 shares common stock) to L. B. Wilson.

1500 Kilocycles

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—Authority to determine operating power by direct measurement of antenna power.

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—Construction permit to make changes in equipment and increase power from 100 watts to 250 watts.

WGT.—J. J. White, d/b as Greenville Broadcasting Company, Greenville, N. C.—Modification of construction permit (B3-P-2053) for a new station, requesting change in type of transmitter, approval of antenna and approval of studio site at Falkland Highway, Greenville, N. C., and transmitter site on Falkland Highway, 11/2 miles west of town, near Greenville, N. C.

NEW—MSB Broadcast Co., Omaha, Nebr.—Construction permit to erect a new station on 1500 kc., 250 watts power, unlimited time.

MISCELLANEOUS

W2XWE—WOKO, Inc., Albany, N. Y.—License to cover construction permit (B1-PFB-14) as modified for new facsimile station.

NEW—WJR, The Goodwill Station, Detroit, Mich.—Construction permit for a new high frequency broadcast station to be located at 2nd and West Grand Blvds., Fisher Building, Detroit, Mich., to be operated on 42800 kc., 1 KW power, unlimited time, special emission.

WENN—WPTF Radio Co., area of Raleigh, N. C.—License to cover construction permit (B3-PRE-298) for changes in equipment.

W9XAZ—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Modification of construction permit (B4-PHB-67) as modified, requesting changes in equipment.

KEHR—Donald C. Treloar, Kalispell, Mont.—License to cover construction permit (B5-PRE-235) as modified for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Lake Shore Seed Company—Charging misrepresentation in the sale of vegetable seed, a complaint has been issued against David S. Wright, trading as Lake Shore Seed Company, Dunkirk, N. Y.

Representations allegedly were made in violation of the Federal Trade Commission Act, having a tendency to deceive buyers into the belief that the respondent's seed will germinate in the percentages represented. The respondents' advertising is attached to packages, and that such seed has a higher percentage of germination than its actual germination under recognized tests and within recognized tolerance or allowances.

The complaint points out that in some of the States in which the respondent sells his seed, the law requires that vegetable seed must contain a statement on the package as to the approximate percentage of germination and the month and year of the test on which the percentage is based, unless the germination percentage is equal to or higher than the percentage established for that particular variety of seed by the State authorities.

It is alleged that the respondent caused to be stamped upon or attached to certain packages of seed distributed by him statements which in fact represented that the seed would meet or exceed the published standard percentage of germination permitted by the respective States for a particular year, and it is charged that many packages of the respondent's product so sold did not possess the percentage of germination stated but contained seed of a much lower percentage of germination. (3994)

Zeen Chemical Company—Alleging misleading representations in the sale of "Zeen Dry Cleaner," a complaint has been issued against David H. Goldman, trading as Zeen Chemical Company, 1311 West 11th St., Cleveland.

In advertising matter the respondent allegedly represented that his product "will moth-proof or de-moth woolen materials in upholstery or rugs with one operation." The complaint charges that the product does not, when used as directed, reach deep-seated infestations of moths and will not render fabrics moth-proof, but that, after a short period, due to evaporation, it loses any moth-repellent properties it may have.

The complaint alleges that the respondent also advertised that "Zeen Dry Cleaner" cleans and removes dirt, spots and stains from all fabrics, is non-explosive and "is used exclusively by leading furniture and department stores everywhere." These representations are alleged to have been misleading, in that the product will not remove certain types of spots and stains from fabrics, and that it is made of petroleum distillates which vaporize and mix with the air to form an explosive gas, potentially capable of causing an explosion. The complaint also alleges that the claim of exclusive use of the product by leading furniture and department
stores everywhere is misleading, because the respondent sells his preparation in not more than 5 or 6 States. (3995)

CEASE AND DESIST ORDERS

The following cease and desist orders have been issued during the week:

M. L. Clein & Company—See Mentho-Mulsion, Inc.

Mentho-Mulsion Incorporated, Atlanta, and Max L. and Sadie B. Clein, its president and vice president, respectively, have been ordered to discontinue certain misleading representations in the sale of “Mentho-Mulsion,” advertised as a remedy for coughs, and “Malco Cold Tablets.” The respondent corporation was formerly known as M. L. Clein & Co.

The order directs that the respondents cease disseminating advertisements which represent, directly or through implication, that their product “Mentho-Mulsion” is a cure or remedy for coughs, or that it will stop cough spasms or have any therapeutic value in the treatment of coughs due to physical disorders of a systemic character, or that it has any therapeutic value in the treatment of coughs in excess of providing temporary relief in cases of coughs due to common colds.

In advertising the “Malco Cold Tablets,” the respondents are ordered to cease representing that this preparation will drive common colds out of the system or that it constitutes a cure or remedy for colds or has any therapeutic value in their treatment in excess of providing a palliative relief from some of the symptoms commonly encountered in colds. (3674)

National Pen Company—An order prohibiting misleading representations in the sale of fountain pens, pencils, necklaces and rings or other products, has been issued against Louis G. Meyers, trading as National Pen Company and Phoenix Sales Company, Birmingham, Ala.

Among typical representations found to have been made by the respondent in newspaper and other periodical advertising, were: “** This certificate and $96 entitles the bearer to one of our genuine Indestructible $5.00 Vacuum Filler Sackless Fountain Pens. A lifetime guarantee with each pen. ** “Manufacturer's Introductory Offer. This coupon worth $4.41 toward This Ring Purchase. ** “These facsimile diamonds have practically the same blue-white color, the same perfect cutting, the same dazzling brilliance as genuine diamonds costing 100 times as much. ** are not merely imitations but represent the utmost skill of modern science.”

The order directs that the respondent cease representing as the customary or regular prices or values for any of his products, prices and values fictitious and greatly in excess of the customary prices; that he desist from representing that articles customarily sold through use of purported certificates or coupons have any value in excess of the actual money price required to be paid; that any certificate, coupon or similar device has any monetary value in the purchase of an article regularly sold at a given price with or without the device, and that the respondent is conducting a special or introductory advertising offer or that the price be charged, in addition to the coupon, is only to cover cost of advertising and sales expense.

Other representations to be discontinued are that any of the products sold by the respondent are different from and superior to other similar products of comparable price; that the number of the respondent's articles which may be purchased by any customer is limited or that they may be purchased for a limited time only; that fountain pens he sells will last a lifetime, are unbreakable, will never need repair, or have greater ink capacity than ordinary fountain pens, and that the respondent's rings or necklaces are set with diamonds or facsimile diamonds or possess color or brilliance in any way comparable to diamonds, or that they can be worn a lifetime or any appreciable period of time and remain free from tarnish, loss of brilliancy or loss of stones. (3796)

Phoenix Sales Company—See National Pen Company.

January 26, 1940 3996

STIPULATIONS

During the week the Commission entered into the following stipulations:

California Luggage and Leather Coat Company, Inc., agrees to discontinue employing the words “Genuine Leather” or “Genuine Cowhide” as a mark, stamp, brand or label for products not manufactured from the top or grain cut of the leather; and to desist from use of the word “Leather" or the word “Cowhide", alone or in connection with other words, so as to imply that the products so designated are made from the top or grain cut of the leather, when such is not a fact. The stipulation provides that if the products are composed of leather made from the inner or flesh cut of the hide and either of the words “Leather” or “Cow¬hide” is used as descriptive thereof, such word shall be immediately accompanied by some other word, as “Split", printed in equally conspicuous type so as to indicate clearly that the products are not composed of leather made from the top or grain cut or layer of the cowhide. (2685)

Exchange Publishing Company—J. E. Hershner, trading as Exchange Publishing Company, Kansas City, Mo., in the sale of lists of names, memberships and information in operating a matrimonial agency, will desist from representing, directly or by implication, that his facilities for placing persons in correspondence or bringing about marriages are greater or better than those of any other matrimonial bureau or offer any better chances of success; that any offer is “special” unless it is less in price than the usual or regular price charged, and is limited in time is invalid; his statements relating to the financial or other standing, education, character, occupation or profession of those whose names appear on such lists are other than the mere statements of those persons themselves, in the absence of some reasonable investigation into the truth or falsity of such statements. (02495)

Frostilla Company, Inc., Elmina, N. Y., agrees to desist from representing, directly or by implication, that the ingredients in “Frostilla Fragrant Lotion” are definitely known to be more costly than those employed in competitive lotions generally, when such is not, in fact, definitely known; that competitive lotions in general leave a sticky or gummy residue, and that “Frostilla Fragrant Lotion” or any similar preparation sold under that or any other name, excels other hand lotions in general, prevents the nail cuticle from becoming rough or ragged, is effective for every case of parched skin or reddened hands, tones or stimulates the skin or does more than aid in conditioning it, and that it is “the” perfect hand lotion or is most always preferred where hand lotions are tested side by side. (02494)

Hain Pure Food Company—Harold Hain, trading as Hain Pure Food Company, Los Angeles, Calif., agrees to discontinue representing that “Hain Col-Lax" will do more than relieve constipation; that it will effect a change in intestinal flora, or is efficacious or harmless in all cases of intestinal disorders. He further agrees to cease representing that “Hain Col-Lax” will do more than relieve constipation; that the use of “Hain Colon Food” will completely eliminate putrefaction or clear the blood stream of toxic wastes, and regulate the entire system. He further stipulates that he will cease designating in any way that his lactose dextrin product is a colon food. (02498)

National Apartment House & Hotel Schools—Alvin Lovingood, operating under the names National Apartment House & Hotel Schools or National School of Instruction in Apartment House Management, is president of Los Angeles National Apartment House & Hotel Schools, Inc. The respondents agree to cease employing representations, either in print or oral, the effect of which may tend to convey the impression to students or prospective students that Lovingood or the corporation will undertake to obtain employment for graduates and
that any services rendered by Lovingood or the corporation in obtaining such employment is “free” when in fact an extra charge is required.

The respondents also stipulate that they will cease representing that they conduct an employment bureau, unless such is a fact, or representing any existent reciprocal service with other schools, unless such representation be accompanied by a clear, unequivocal statement indicating the nature of such service, and the cost or price of it, if there is any. The stipulation relates that letterheads of the Los Angeles National Apartment & Hotel School, Inc., bore the names of a dozen American cities and the statement, “Reciprocal privileges at all our schools”, when in fact no such schools, granting reciprocal privileges one to the other, were in operation in a majority of the cities named during substantially the entire period such stationery was in use by the corporation. (2652)

Quality Ink & Manifold Company—Sol Neelman, who formerly conducted business as Quality Ink & Manifold Company, but now trades as Quality Ink & Carbon Company, Chicago, Ill., agrees to cease employing the word “Manufacturers” in advertising matter with the effect or tendency to convey the impression that it manufactures a designated product, when such is not a fact. Neelman, the stipulation points out, did not manufacture the carbon paper he sold, although he circulated printed matter advertising such product and indicating that he was a manufacturer. (2654)

Sampson Medicine Company—A. C. and W. F. Stonestreet, trading as Sampson Medicine Company, Winston-Salem, N. C., agree to cease representing that “Cook’s C. C. C.”, or any medicinal preparation containing substantially the same ingredients, is of therapeutic value in cases of kidney trouble, diarrhea, flux, ague, female weakness, phthisic, or cuts and burns, or in any condition where the skin is lacerated, or is of any therapeutic value for any condition unless expressly limited to temporary symptomatic relief and then only where the symptoms may be relieved by use of a counter-irritant for external conditions or a carminative for internal conditions. (02496)

B. Frank Sensesman, Philadelphia, Pa., agrees to cease representing that a medicinal preparation designated “Dr. Sensesman’s Calf Scours Remedy” and “Dr. Sensesman’s Calf Scour Powder” is an effective treatment or competent remedy for the disease known as white scours, or restores to normal the intestines of calves afflicted with that disease. (02497)

Service Extension Institute—Wilbur O. Boren, sole trader as Service Extension Institute, Linton, Ind., in the sale of home study correspondence courses, agrees to discontinue use of the word “Extension” or the word “Institute”, either together or independently, in the trade name of his business or to describe his school, and to cease representing, directly or by reasonable inference, either in his advertising matter or by statements made by himself or by his salesmen, that either he or his correspondence school has any connection with the United States Civil Service Commission or other Governmental agency, or that he or any of his employees are employed by or represent any Governmental agency or are charged with the responsibility of obtaining or selecting employees for the Government; that his students or graduates will receive preferential treatment in Civil Service examinations or appointments, and that his school has been in existence for a longer period of time than is actually the fact. Other representations to be discontinued are exaggerations of the number of Civil Service employees in the Government; the assertion that educational advantages are not needed by applicants for Civil Service positions and incorrect or misleading statements as to the nature of any Civil Service examination or as to eligibility of an applicant therefor. The respondent also agrees to cease using, directly or indirectly, any so-called “money-back” agreement or similar guarantee with the effect of misleading students or prospective students by reason of concealment of pertinent facts or of other circumstances or conditions of its use. (2655)

Superior Feed Mills—K. Eddie, B. D. Eddie, Bedar Eddie and Pauline Eddie, trading as Superior Feed Mills, Oklahoma City, Okla., stipulate that they will cease representing, directly or by implication, that “Superior Chick-to-Pullet All-in-One Mash” or any other feed preparation containing substantially the same ingredients or the same properties, will guard against all common chick troubles, is the only feed of its type, and will insure profits or the lives of chicks. The respondents also agree to cease advertising that “Superior Egg Mash” will produce more eggs or more eggs cheaply than any other feed; that it can be relied upon to double the egg production of the average flock, and that, through its cod liver oil content or otherwise, it supplies all the benefits of sunshine. The respondents agree to cease advertising that one bag of “Superior Pig and Hog Meal” is equal in feeding value to 12 bushels of corn, or excels every other feed in promoting the growth and development of swine; that Superior feeds give the best and cheapest results and are always the first with new feeds. (02493)

FTC CLOSES CASE

The Federal Trade Commission has ordered its case closed against Charles E. Herchenroeder, trading as Premium Sales Service, Chicago, a dealer in electric dry shavers, who had been charged in a Commission complaint with misleading representation through unauthorized use of a well known trade name.

The respondent had moved from his last known address and could not be located after a thorough inquiry. The Commission closed the case without prejudice to its right to reopen it, should future facts so warrant.
Broadcast Music, Inc., Passes Million Mark

Neville Miller made the following statement Thursday about the progress of Broadcast Music, Inc.:

"The Board of Directors of Broadcast Music met in New York on Tuesday, January 30. The response from the stations had been so encouraging that we decided to make a special effort to secure contracts from the remaining stations and start operation at the earliest possible date. Therefore, the Board will meet again the middle of next week and it is hoped that by then we shall have received sufficient additional checks and contracts to justify immediately declaring Broadcast Music, Inc., a going concern.

"We have passed the million dollar mark and are on our way to the million and a half mark. With the money in sight, it is extremely important that we save all the time possible and get under way at once. It would be a tremendous help if those who have not sent in their checks and contracts would do so now. It would certainly be a grand feeling to lay down a big bunch of contracts and checks before the Board at the meeting next week and to announce in the Bulletin next week that Broadcast Music, Inc., was in operation."

JOHNSON INTRODUCES NEW LIQUOR BILL—WORSE THAN FIRST

Senator Johnson (D-Colo.) on Monday introduced an amendment in the nature of a substitute intended to be proposed to the bill (S. 517) to prohibit the advertising of alcoholic beverages by radio. The proposed bill is much more drastic than the bill reported by the Committee on Interstate Commerce in its effect on broadcasters. Its language in subsections (a) and (b) broadens the prohibition on broadcasters and advertisers of the Committee's bill and further prohibits "any advertisement of, or information concerning, ... any person engaged in the business of manufacturing or selling any alcoholic beverages, if the purpose of such advertisement or information is to induce the purchase or use of any alcoholic beverage." Subsection (d) would make station licenses conditioned upon compliance with the provisions of subsection (a); it provides that if the FCC "finds that any licensee has willfully violated any provision under subsection (a), the Commission shall have the same power to revoke such license as it has to revoke licenses for violation of, or failure to observe any of the restrictions and conditions imposed by the Communications Act of 1934 as amended."

S. 517 is on the Senate calendar and might come up at any time. Doubtless, Senator Johnson will move his proposed amendment when the bill is called up for consideration. We print below S. 517 as reported by the Committee followed by the amendment intended to be proposed:

S. 517

(Report No. 338)

To amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section 316 of the Communications Act of 1934, as amended, is amended to read as follows:

"Sec. 316. (a) No person shall broadcast by means of any radio station for which a license is required by any law of the United States, and no person operating any such station shall knowingly permit the broadcasting of, any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all of such prizes.

"(b) No person shall broadcast or directly or indirectly induce any other person to broadcast by means of any radio station for which a license is required by any law of the United States, and no person operating any such station shall permit the broadcasting of, any advertisement of or information concerning any alcoholic beverage if such advertisement or information is broadcast with the intent of inducing the purchase or use of any alcoholic beverage.

"(c) Any person violating any provision of subsection (a) or subsection (b) of this section shall, upon conviction thereof, be fined not more than $1,000 or imprisoned not more than one year, or both, for each and every day during which such offense occurs.

"(d) All basic permits heretofore or hereafter issued under the provisions of the Federal Alcoholic Administration Act, as amended, shall be deemed to be conditioned upon compliance with the provisions of subsection (b) of this section. If the Administrator of the Federal Alcoholic Administration finds that any person who holds any such basic permit has willfully violated any provision of subsection (b) of this section, the Administrator shall by order, after due notice and opportunity for hearing to such person, revoke such permit or suspend such permit for such period as he may deem appropriate, provided that for a first
JOHNSON INTRODUCES NEW LIQUOR BILL—WORSE THAN FIRST

(Continued from page 3999)

violation of the conditions thereof the permit shall be subject to suspension only. Subsections (i), (h), and (i) of section 4 of such Act, as amended, shall apply to any proceeding under this subsection."

S. 517

AMENDMENT
(in the nature of a substitute)

That (a) no radio station for which a license is required by any law of the United States, and no person managing or operating any such radio station or financially interested therein, shall directly or indirectly charge to or receive from, or attempt to charge to or receive from, any person any money or other valuable consideration in full or part payment for the service of broadcasting by radio any advertisement of, or information concerning, any alcoholic beverage or any person engaged in the business of manufacturing or selling any alcoholic beverage, if the purpose of such advertisement or information is to induce the purchase or use of any alcoholic beverage.

(b) No person shall directly or indirectly contribute or pay to, or offer to contribute or pay to, any person or any radio station for which a license is required by any law of the United States any money or other valuable consideration in full or part payment for the service of broadcasting by radio any advertisement of, or information concerning, any alcoholic beverage or any person engaged in the business of manufacturing or selling any alcoholic beverage, if the purpose of such advertisement or information is to induce the purchase or use of any alcoholic beverage.

(c) Any person violating any provision of subsection (a) or subsection (b) shall, upon conviction thereof, be fined not more than $1,000 or imprisoned not more than one year, or both.

(d) All radio-station licenses hereafter issued or continued in force under the provisions of the Communications Act of 1934, as amended, shall be deemed to be conditioned upon compliance with the provisions of subsection (a) of this section.

if the Federal Communications Commission finds that any holder of any such license has willfully violated any provision of subsection (a) of this section, the Commission shall have the same power to revoke such license as it has to revoke licenses for violation of, or failure to observe, any of the restrictions and conditions imposed by the Communications Act of 1934, as amended.

(e) All basic permits hereafter issued under the provisions of the Federal Alcohol Administration Act, as amended, shall be deemed to be conditioned upon compliance with the provisions of subsection (b) of this section.

If the Administrator of the Federal Alcohol Administration finds that any holder of any such basic permit has willfully violated any provision of subsection (b) of this section, the Administrator shall by order, after due notice and opportunity for hearing to such holder, revoke such permit or suspend such permit for such period as he may deem appropriate: Provided, That for a first violation of the conditions thereof the permit shall be subject to suspension only. Subsections (i), (h), and (i) of section 4 of such Act, as amended, shall apply to any proceeding under this subsection.

(f) As used in this Act, the term "person" includes an individual, partnership, association, joint-stock company, trust, or corporation.
munications Act of 1934 confers upon petitioner a monopoly of the radio-broadcast facilities in the community which it is now serving."

Quoting the brief:

"There is nothing in the nature of the license held by an existing station which confers, expressly or by implication, a right to protection from competition. Such a license is an authorization to operate radio-transmitting equipment and is in no sense a franchise to engage in any type of business. The rights conferred by the license are neither absolute nor exclusive. The maximum term of a standard broadcast license under the Act is three years, but the Commission by regulation has fixed the term at one year. The license confers no property right in the frequency authorized to be used.

"Section 305 (b) (1) expressly provides that a 'station license shall not vest in the licensee any right to operate the station nor any right in the use of the frequencies designated in the license beyond the term thereof nor in any other manner than authorized therein.' Section 301 declares that the purpose of the Act, among other things, is to provide for the use of the channels of interstate and foreign radio transmission, but not the ownership thereof, for limited periods of time under licenses granted by the Commission. The license may not be transferred or assigned without the written consent of the Commission. The license may be modified by the Commission on its own motion if such action will promote the public interest, convenience, and necessity. And applicants for licenses under the Act are required to sign a 'waiver of any claim to the use of any particular frequency or of the ether as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise.'

"It is clear, therefore, that the rights which are granted by the license are restricted solely to the use of the facilities licensed for operation. There is no difference between the rights conferred by a license to operate a radio broadcast station and the rights conferred by a license to operate any other of the 38 or more types of radio stations.

Sanders Brothers contested the right of the Commission to authorize the Dubuque Telegraph Herald to establish a rival radio station. On January 23, 1939, the Court of Appeals reversed and remanded the case to the Commission upon the following grounds: (1) that an "issue of 'economic injury to an existing station through the establishment of an additional station' . . . is sufficient to furnish proper grounds for an appeal"; and (2) that the Commission erred in failing to make findings on the issue.

As to the first consideration, the Commission contends in part:

"As a licensee authorized to use radio transmitting equipment, respondent has the right only to the use of the frequency assigned to it; its license confers on it no franchise to carry on any business which may lose less to be protected from competition in the conduct of its business. Consequently, the mere fact that respondent, in connection with its business, operates radio-transmitting equipment under license from the Commission gives it no legal right or interest which it does not otherwise possess to question the validity of competition by the Telegraph Herald. And clearly, as a person engaged in the advertising business, respondent has no such legal right or interest. No person engaged in furnishing an advertising medium, whether it be the sale of newspaper or periodical space or of radio time, may question a competitor's right to engage in that business. The legality of the permit issued to the Telegraph Herald to operate radio-transmitting equipment may no more be questioned by respondent as a competitor in the advertising business than a power company could question the legality of a loan to competing companies, essential to enable them to engage in the electric power business.

"The fundamental consideration which the court below disregarded is that the status of respondent as a licensee authorized to use radio transmitting facilities is not changed because it is also engaged in the advertising business. In the conduct of its advertising business, it clearly has no right to freedom from competition from anyone else furnishing an advertising medium, whether it be a newspaper, a magazine, or another broadcast station. For example, insofar as this business is concerned, respondent has no more right to be protected from competition by the Telegraph Herald as a radio station that Telegraph Herald, as a newspaper, has a right to be protected from competition by the respondent either as a radio station or if it should propose to enter the newspaper field. As a licensee authorized to use radio transmitting facilities, respondent has a right to protection from undue interference in the operation of its equipment. But the important fact is that the injury with which respondent claims to be threatened here is loss of its advertising revenues and not invasion of its right to use its transmitting facilities. This is injury with which, under the Act, the Commission is not required to concern itself."

In denying the assumption that detailed findings of fact are required, the brief says:

"Neither the Commission nor its predecessor, the Federal Radio Commission, has ever assumed, in acting upon an application for a new license or for the renewal or modification of an existing license that any detailed findings of fact were required. Hundreds of thousands of such applications have been granted without any detailed findings having been made, only an entry on the Commission's minute book evidencing the action taken. If the Commission were obligated to make detailed findings with respect to every application made for a new license or for the renewal or modification of a license, an almost intolerable burden would be placed on it. This practical consideration is doubtless the reason why Congress did not write into the Act any requirement for detailed findings, and was certainly a determining factor in molding the consistent administrative practice."

**MILLER ENDORSES RELIGIOUS TOLERANCE CAMPAIGN**

Declaring that "anti-sectarianism and anti-racial propaganda weakens both religion and the liberties of our country by divisive tactics of propagandists attempting to arouse Americans against themselves," Neville Miller this week pledged the cooperation of the radio industry in a nation-wide campaign with the Federal Council of the Churches of Christ in America, wherein local ministers will use local radio stations "for the purpose of creating
a better understanding between the various races and religious groups.

In a letter sent to all radio stations in the United States, Mr. Miller further declared: "There is no greater public service a station can render than to give its facilities to bring its listeners closer together in the bonds of understanding, based upon truth and fact. This, to me, is one of the root-principles of the American system of broadcasting."

Mr. Miller pointed out that from its knowledge of past history, the Federal Council of Churches, representing some 143,000 individual Protestant congregations in the United States, "knows that the germs of intolerance cannot easily be controlled, once let loose," and that "the time is at hand for a constructive campaign of tolerance and understanding."

In a statement by the Federal Council of Churches, the aims of the campaign were detailed as follows:

"The primary aim of this radio campaign is to lay essential facts before the American public, in order that, through an educated public opinion, we, as a people, may profit from the example of many less fortunate European peoples living in countries where democracy has been destroyed by tactics that included the fomenting of racial and religious hatred and oppression."

"Leading Christian clergymen in hundreds of American cities, over their own local radio stations, are being asked by the Federal Council of Churches, to "lead the way" in this radio campaign in the common interest of all racial and religious groups in America and for due recognition of the contributions of minorities in the life of society as a whole."

"The Christian church is showing a great awareness of the issues presented. It is interested in healing, conciliation, understanding, mutual aid and peace. The clergymen will present information and discuss the contributions which all interested citizens can make to the American democracy."

Mr. Miller’s letter to the broadcasters follows:

"The Federal Council of the Churches of Christ in America is sending one of its local contacts to your station, with the sincere request that facilities be granted to a local minister, for the purpose of creating a better understanding between the various races and religious groups who comprise your listening audience."

"The Federal Council of Churches, representing approximately 143,000 churches in the United States, feels that the time is at hand for a constructive campaign of tolerance and understanding, lest the spread of intolerance by hate-mongers, both at home and abroad, sweep over the country as it has elsewhere."

"From its knowledge of past history, this national church body knows that the germs of intolerance cannot easily be controlled once let loose; that anti-sectarianism and anti-racial propaganda weakens both religion and the liberties of our country by divisive tactics of propagandists attempting to arouse Americans against themselves."

"We have had the opportunity of examining the material upon which the Council's new effort for tolerance will be made. It is factual and impartial. It is informative and it is "good" radio. It is material which men of good will in all faiths will welcome."

"The Federal Council of Churches has again turned to radio, and for due recognition of the contributions of minorities in the life of society as a whole."

"Leading Christian clergymen in hundreds of American cities, over their own local radio stations, are being asked by the Federal Council of Churches, to "lead the way" in this radio campaign in the common interest of all racial and religious groups in America and for due recognition of the contributions of minorities in the life of society as a whole."

"The Christian church is showing a great awareness of the issues presented. It is interested in healing, conciliation, understanding, mutual aid and peace. The clergymen will present information and discuss the contributions which all interested citizens can make to the American democracy."

Mr. Miller’s letter to the broadcasters follows:

"The primary aim of this radio campaign is to lay essential facts before the American public, in order that, through an educated public opinion, we, as a people, may profit from the example of many less fortunate European peoples living in countries where democracy has been destroyed by tactics that included the fomenting of racial and religious hatred and oppression."

"Leading Christian clergymen in hundreds of American cities, over their own local radio stations, are being asked by the Federal Council of Churches, to "lead the way" in this radio campaign in the common interest of all racial and religious groups in America and for due recognition of the contributions of minorities in the life of society as a whole."

"The Christian church is showing a great awareness of the issues presented. It is interested in healing, conciliation, understanding, mutual aid and peace. The clergymen will present information and discuss the contributions which all interested citizens can make to the American democracy."

GROSS REVENUE FOR 1939

The gross time-sale revenue of the industry for 1939 is estimated by Dr. Herman S. Hettinger for Broadcasting Magazine at $171,113,813. This represents an increase of 14 percent over 1938.

Broadcasting increased its lead over national magazine advertising as reported by Publishers’ Information Bureau. Magazines grossed $151,484,530 for the year, an increase of 7.1 percent over 1938.

Newspaper lineage reported by Media Records for the year 1939 is 1.5 percent above the figure for 1938. Applying this increase to their estimated 1938 figure, newspaper gross revenue would be $552,000,000.

National farm paper revenue for 1939 was estimated at $10,085,880, an increase over 1938 of 2.6 percent.

The January 26th issue of Printers Ink carries an article titled “1939 Advertisers” in which is given a comparison of gross revenue of magazines, major network radio and farm papers for those advertisers spending more than $100,000 during 1939 in all three of these media. It should be borne in mind in reviewing this analysis that the advertisers listed are not credited with any national spot advertising they have placed. The comparison is confined to the business carried by the three major networks, Columbia Broadcasting System, Mutual Broadcasting System and National Broadcasting Company.

Gross revenue to stations from national spot business for the 342 advertisers is not available from any source.

The figures are presented here because of the superior gains of radio in the rising advertising market during the year.

Here is how $100,000 Advertisers spent their money:

<table>
<thead>
<tr>
<th>Totals</th>
<th>Magazines</th>
<th>Radio</th>
<th>Farm</th>
</tr>
</thead>
<tbody>
<tr>
<td>$24,297,002</td>
<td>10,841,506</td>
<td>13,056,391</td>
<td>399,105</td>
</tr>
</tbody>
</table>

Radio’s increase of 18.9 percent indicates that it is continuing its progress to close the gap in competition.

Radio has arrived in competition with magazines in the matter of $1,000,000 advertisers in the three media, magazines, radio and farm papers, as is indicated in the following table.

Here is how the $1,000,000 Advertisers spent their money:

<table>
<thead>
<tr>
<th>Totals</th>
<th>Magazines</th>
<th>Radio</th>
<th>Farm</th>
</tr>
</thead>
<tbody>
<tr>
<td>$14,998,119</td>
<td>4,587,180</td>
<td>10,147,710</td>
<td>272,100</td>
</tr>
</tbody>
</table>

It is significant also that of the first 10 in amount spent for advertising in the three media, 8 devoted more to network radio advertising than to other media. In 1938, 6 devoted their major expenditure to radio. Of last year’s list of 10 leaders, one of those, which in 1938 spent most of its appropriation in magazines, in 1939 placed most of its advertising in network radio.

February 2, 1940
WAGE AND HOUR LAW

The NAB has asked the Wage and Hour Administration further to clarify its definition of "executive."

Under the Wage and Hour law, bona fide executives are exempt from the provision limiting the work week to 42 hours unless time and one half is paid for overtime.

When the law went into effect, the Administration defined an executive as an employee who made $30 or more a week; who had the power to hire and fire, or was influential in hiring and firing; who directed the work of others; and who did no substantial amount of work of the same character as that performed by those under him.

What amount of work was a substantial amount of work? Did regularity play any part in the picture?

These are questions that have arisen, especially about chief engineers. In small and medium sized stations, the chief engineer often relieves one of his operators daily during lunch hour, or takes one regular trick each week at the controls or transmitter.

Discussion of this question with Wage and Hour officials has indicated that a chief engineer who regularly does the work of a subordinate is not a "bona fide executive."

However, the Administration's reply to a formal request for an opinion should be enlightening.

A small, midwestern station has agreed with the Wage and Hour Administration to give its employees $384 due for overtime. This amount was distributed among nine employees.

I. B. E. W. STRIKES IN SEATTLE

Four Seattle stations now have contracts with the International Brotherhood of Electrical Workers (A. F. of L.) covering their technicians.

The union called a strike at one of these (KIRO) before the agreement was signed, and a strike was still in progress at a fifth station (KOL) on January 26.

The union moved into Seattle last October. Negotiations were begun with KRSC almost immediately, and a closed shop contract resulted. The closed shop was the principal issue in subsequent negotiations with four other stations. On January 18, the union called a strike at KIRO and KOL. Both stations were off the air less than half an hour. Negotiations with the union were resumed at KIRO and the union technicians went back to work. The strike continued at KOL, although the station went back on the air 20 minutes after the walk-out. Union musicians refused to go through the picket line.

On January 25, KOMO-KJR signed a contract calling for a preferential union shop.

An I. B. E. W. strike at KFSD, San Diego, Calif., was still in progress on January 24. It started last fall. A closed shop was the principal issue. Negotiations are being continued. The station is on the air.

WGXR ELECTION

The Labor Relations Board has certified Local No. 913, Radio Broadcast Technicians & Engineers Union, International Brotherhood of Electrical Workers (A. F. of L.), as the sole collective bargaining agency selected by a majority of the radio broadcasting operators, engineers, and technicians of the Interstate Broadcasting Company, Inc. (WGXR), New York City, upon the basis of a secret ballot election held January 8, 1940, resulting in a count of three votes for Local No. 913; no votes for the American Communications Association (CIO); and two votes in favor of neither organization.

FCC TO WITNESS TELEVISION DEMONSTRATIONS THIS WEEK

Having heard oral argument on the proposed tentative television standards, members of the FCC will spend the period of February 1 to 5 witnessing television demonstrations by various firms interested.

On February 1 the Commissioners will visit Albany and Schenectady, N. Y., to view General Electric Company rebroadcast of television signals originating in New York City. That evening, in the Poughkeepsie-Newburgh area, the Radio Corporation of America will show home reception of a telecast from the Empire State Building.

On February 2 there will be National Broadcasting Company studio and reception television demonstrations in New York City.

On February 3, also in New York, the Commissioners will see operation of Cath-Ray Electronic Laboratories receivers and, that afternoon or evening, witness demonstration of flexible system of transmission by the Allen B. DuMont Laboratories, Passaic, N. J.

On February 5 the Commissioners will visit the RCA plant at Camden, N. J., to witness a new large screen projection and other television developments. That afternoon, in Philadelphia, there will be demonstration by Philco Radio and Television Corporation of polarization mitigation of interference.

Because the Don Lee Broadcasting System is located at Los Angeles, the Commission has designated its local inspector-in-charge to view a demonstration there.
RCA SAYS TELEVISION RADIO RELAY
technically ready

Development of the radio relay method of transmitting television signals between cities has been advanced by RCA Laboratories to the point where it is technically ready for the first step of application in a public service, the Radio Corporation of America announced this week.

"This new development, different from any other system so far devised, makes possible the establishment of inter-city television networks similar in effect to the wire networks of sound broadcasting," said an RCA statement. It is feasible, according to RCA engineers, to set up a radio relay system for television linking New York City, for example, with the nation's capital, Washington, D.C., and with Boston, Mass., and other intermediate cities. Similar radio relay networks could be established in other sections of the country.

"Even such a limited network could make television programs immediately available to approximately 20,000,000 persons, or, roughly, one-sixth of the nation's population. Programs could originate as well as be received at any city which is part of the radio relay system. . . .

"The new RCA television relay system is regarded by engineers as one of the most remarkable advances in the development of radio transmission in many years, because of the success achieved in dealing with frequency channels of extreme width. It differs from other methods of radio relay in that it makes use of specially designed relay stations operating on frequencies many times higher than those used by regular television broadcasting stations. . . ."

"RCA engineers had an experimental radio relay system in test operation for nearly a year between the National Broadcasting Company's Empire State Building transmitter and Riverhead, Long Island. The relay points are located at Hauppauge, 45 miles from the Empire State Building, and at Rocky Point, 15 miles from Hauppauge. The Rocky Point station boosts the signal another 15 miles to Riverhead. . . ."

"Each relay station contains both receiving and transmitting devices, and is mounted on a 100-foot steel tower. The antennas are of the parabolic type necessary for the highly directional, or beam-like, transmission, which the system uses. The power required for operation is 10 watts or less. The distance between each relay point, in practical operation, would vary according to the terrain. The average distance would probably work out at approximately 30 miles.

"The station operates unattended. The receiver is on at all times. When a control signal is transmitted from a terminal point the relay receiver picks it up and delivers it to the companion transmitter. This action is repeated at each relay point until the circuit is in full operation. The frequency used is approximately 500,000 kilocycles. In the case of NBC's Empire State Building transmissions, the frequency used is one of 45,250 kilocycles and is changed to 500,000 k.c. at Hauppauge, the first relay point, remaining at approximately the latter frequency throughout the relay system. When another terminal station receives the signal it is recovered to a lower broadcasting frequency.

"The new system is the product of years of research in the R.C.A. Communications, Inc., division of RCA Laboratories. Work in the 500,000 k.c. section of the radio wave spectrum began more than ten years ago. An experimental television relay system using a much lower frequency, was set up between New York and Camden, N. J., about seven years ago, and pictures of low-definition transmission were successfully transmitted over it. The relay station was located at Mt. Arney, N. J., 64 miles from New York. It boosted the signal another 23 miles to Camden.

"Four years ago, a radio relay for the transmission of telegraph, teletype, and experimental facsimile was installed by the RCA between New York and Philadelphia. Operating on frequencies ranging from 85,000 to 105,000 kilocycles, this system was incapable of carrying high-definition television images; however, much was learned from its operation. It is apparent that if high-definition television were to be relayed, new-type receiving and transmission tubes must be developed. Starting more than three years ago, the work of developing the new tubes progressed rapidly and, by early 1939, it became possible to use them in the building of the experimental New York-Riverhead system. Operation of the system for nearly a year in all sorts of weather and atmospheric conditions has proved its effectiveness."

NEW TOWER LIGHT RULES

The Civil Aeronautics Authority has issued a new bulletin entitled "Aeronautical Lights and Obstruction Marking Manual."

Heretofore the CAA has not specified standards for the type of lighting on towers of over 300 feet. However, the new recommended standards include towers up to 800 feet in height. One of the most interesting recommended standards is that on towers from four to six hundred feet an electric code beacon is specified for the top and the middle of the tower, and for towers of six hundred to eight hundred feet, an electric code beacon is specified at the one third, two thirds levels, and the top of the tower.

The recommendations and specifications set forth in the manual have been prepared as a general guide for the marking and lighting of obstructions to air commerce. Specific recommendations for each particular problem will be given upon request directed to any Regional Office or the Washington Office of the Civil Aeronautics Authority.

The section of the Manual of the most interest to broadcasters reads as follows:

Radio Obstruction Markers

Where a serious hazard to air commerce is presented by a structure located on or near a civil airway, the installation and operation of an effective radio marker of a type approved by the Authority may be necessary for the proper protection of air commerce.

Night Marking (Lighting)

General

The purpose of night marking a structure which presents a hazard to air commerce is to warn airmen during the hours of darkness of the presence of such a structure. To accomplish this objective, it is necessary to provide on such a structure adequate obstruction lighting in a manner to insure visibility of such lighting from aircraft at any angle of approach. No standards for night marking, however, have been given more than general application as a structure of any height which is so located as to present a serious hazard to air commerce may require special or additional marking. (See structures requiring special study on page 17.) On the other hand, such a structure may be removed from the general flow of air traffic to make obstruction lighting unnecessary, or it may be so located in reference to other structures or to the contour of the ground that the hereinafter described standards should be applied to the upper part of the structure only.

Temporary Warning Lights

Where a hazard to air commerce is presented by a structure during its period of construction, red warning lights should be displayed on top of the structure from sunset to sunrise until permanent obstruction lights are installed and in operation.

Operation of Obstruction Lighting

In areas of poor visibility, it is recommended that obstruction lighting be controlled by a light-sensitive control device adjusted so that the lights will be turned on at a north sky light intensity level of 20-foot candles and turned off at a north sky light intensity level of 40-foot candles. Where obstruction lighting is accomplished by lights which are not equipped with spare lamps and automatic lamp changers, and it is extremely difficult to service such lights, consideration should be given to the installation of adequate auxiliary lights and automatic relays for instant switch-over to these auxiliary lights in the event of lamp failure in the main obstruction lighting.

Obstruction Lighting by Lights Not Described

Obstruction lighting installations may be produced by gaseous tubes such as neon tubes or by any method other than the con-
Towers and Poles

Towers and poles which present a hazard to air commerce should be lighted nightly from sunset to sunrise in accordance with the following specifications:

**Specification “A”**. Where the overall height of such structures does not exceed 200 feet, there should be installed at the top of each such structure two 100-watt lamps enclosed in aviation red prismatic obstruction light globes. If only one lamp is operated, the circuit should be equipped with a relay for instant automatic switchover to the other lamp in case of lamp failure. (See typical obstruction light fittings on page 22.)

On levels at approximately two-thirds and one-third of the overall height of such structure, there should be installed two 100-watt lamps enclosed in aviation red prismatic obstruction light globes. Each light should be placed on diagonally, or diametrically, opposite positions of the structure at each level. (See typical arrangement on page 25.)

In the case of a triangular shaped tower, the lights at the two-thirds and one-third levels should be mounted so as to insure visibility of at least one light on each level from aircraft at any angle of approach.

**Specification “B”**. Where the overall height of such structure exceeds 200 feet but does not exceed 400 feet, there should be installed at the top of such structure a 300m/m electric code beacon equipped with two 500-watt lamps (both lamps to burn simultaneously) and aviation red color shades. This type of beacon is shown on page 23.

The 300m/m electric code beacon should be equipped with a flashing mechanism producing not more than 40 flashes per minute with a luminous period of one second and a period of darkness of one-half second, but not less than 20 flashes per minute with a luminous period of two seconds and a period of darkness of one second. In the event the beacon is not readily accessible for periodic inspections of the lamps, a tell-tale light circuit should be installed to indicate failure of either lamp.

On levels at approximately two-thirds and one-third of the overall height of such structure, there should be installed two 100-watt lamps enclosed in aviation red prismatic obstruction light globes. Each light should be placed on diagonally, or diametrically, opposite positions of the structure at each level. (See typical arrangement on page 25.)

In the case of a triangular shaped tower, the lights at the two-thirds and one-third levels should be mounted so as to insure visibility of at least one light on each level from aircraft at any angle of approach. If it is necessary to locate the flashing mechanism, described in the preceding paragraph, in such a manner on the tower as to cause the lights at the three-fourths and one-fourth levels to be affected thereby, such lights may flash.

**Specification “C”**. Where the overall height of such towers exceeds 400 feet but does not exceed 600 feet there should be installed at the top of each such tower a 300m/m electric code beacon equipped with two 500-watt lamps (both lamps to burn simultaneously) and aviation red color shades. This type of beacon is shown on page 23.

On a level at approximately three-fourths of the overall height of such tower, a 100-watt lamp enclosed in an aviation red prismatic obstruction light globe should be installed on each outside corner of the tower at such level. The 300m/m electric code beacon should be equipped with a flashing mechanism producing not more than 40 flashes per minute with a luminous period of one second and a period of darkness of one-half second, but not less than 20 flashes per minute with a luminous period of two seconds and a period of darkness of one second. In the event these beacons are not readily accessible for periodic inspection of the lamps, a tell-tale light circuit should be installed at each beacon to indicate failure of either lamp.

If it is necessary to locate the flashing mechanism, described in the preceding paragraph, in such a manner on the tower as to cause the lights at the three-fourths and one-fourth levels to be affected thereby, such lights may flash.

**Specification “D”**. Where the overall height of such towers exceeds 600 feet but does not exceed 800 feet, there should be installed at the top of each such tower a 300m/m electric code beacon equipped with two 500-watt lamps (both lamps to burn simultaneously) and aviation red color shades. This type of beacon is shown on page 23.

On a level at approximately five-sixths of the overall height of such tower, a 100-watt lamp enclosed in an aviation red prismatic obstruction light globe should be installed on each outside corner of the tower at such level.

At approximately two-thirds of the overall height of such tower, a 300m/m electric code beacon, as previously described, should be installed in such a position within the tower proper that the structural members will not impair visibility of this beacon from aircraft at any angle of approach.

On a level at approximately one-half of the overall height of such tower, a 100-watt lamp enclosed in an aviation red prismatic obstruction globe should be installed on each outside corner of the tower at such level.

At approximately one-third of the overall height of such tower, a 300m/m electric code beacon, as previously described, should be installed in such a position within the tower proper that the structural members will not impair visibility of this beacon from aircraft at any angle of approach.

On a level at approximately one-sixth of the overall height of such tower, a 100-watt lamp enclosed in an aviation red prismatic obstruction globe should be installed on each outside corner of the tower at such level.

The 300m/m electric code beacon should be equipped with a flashing mechanism producing not more than 40 flashes per minute with a luminous period of one second and a period of darkness of one-half second, but not less than 20 flashes per minute with a luminous period of two seconds and a period of darkness of one second. In the event these beacons are not readily accessible for periodic inspection of the lamps, a tell-tale light circuit should be installed at each beacon to indicate failure of either lamp.

If it is necessary to locate the flashing mechanism, described in the preceding paragraph, in such a manner on the tower as to cause the lights at the five-sixths, one half and one-sixth levels to be affected thereby, such lights may flash.

*Note: In lieu of these electric code beacons, 100-watt lamps enclosed in aviation red prismatic obstruction light globes should be installed on each outside corner of the tower on levels at approximately two-thirds and one-third of the overall height of the tower, provided a 24-inch rotating beacon, equipped with an automatic lamp changer and at least a 1000-watt lamp or a 500-watt lamp and an auxiliary reflector, is installed about 50 feet above the ground on a suitable structure and is located within 500 feet of the subject tower. The beam adjustment of this rotating beacon should be approximately 10 degrees above the horizon.*

The manual deals comprehensively with the subject of aeronautical lighting and the recommended standards for lighting other hazards to air commerce have been expanded. Copies of the 26-page manual may be secured by writing to Mr. William J. MacKenzie, Civil Aeronautics Authority, Washington, D. C.

**OHIO UNIVERSITY CONFERENCE**

One of the important subjects of discussion at the Ohio State Broadcast Engineering Conference, to be held between February 12 and 23 at Ohio State University, Columbus, Ohio, will be “General Discussion and Question Box,” conducted by Mr. Andrew D. Ring, Assistant Director.
Chief Engineer of the FCC. Mr. Raymond M. Wilmotte, consulting engineer for NAB, will be chairman of this discussion group. Mr. Wilmotte is compiling a list of questions to be discussed during this meeting and he asks that those who have questions which they would like to have considered, write him at 730 Fifth Avenue, New York City.

**FCC MODIFIES LICENSES FOR HAVANA REALLOCATION**

As a preliminary to reallocating channels assigned to broadcast stations within the standard broadcast band of the United States to conform to the now ratified North American Regional Broadcast Agreement, the Federal Communications Commission has definitely suspended the rule fixing the broadcast license period at one year and providing for a staggered system of license renewing; and has modified all outstanding licenses whose expiration date falls beyond August 1, 1940, by ordering that all such licenses terminate as of that date.

It now appears to the Commission that such reallocation of facilities as may be required to carry out the Agreement can be effectuated by August 1.

In addition, and upon suspension of this rule, the Commission granted the applications for renewal pending before it to expire next August 1, for the following stations:

- KFBK, Abilene, Kans.; KFBD, Sacramento, Cal.; KKEO, St. Joseph, Mo.; KFVC, Los Angeles; KGDM, Stockton, Calif.; KGU, Honolulu; KIRO, Seattle, Wash.; KJBS, San Francisco, Calif.; KMMJ, Grand Island, Neb.; KMPC, Beverly Hills, Calif.; KKNX, Los Angeles; KOAM, Pittsburgh, Kans.; KOB, Albuquerque, N. Mex.; KOMA, Oklahoma City, Okla.; KOWH, Omaha, Neb.; KPO, San Francisco; KRLD, Dallas, Tex.; KSL, Salt Lake City; KSTP and auxiliary, St. Paul, Minn.; KTRB, Modesto, Cal.; KVOO, Tulsa, Okla.; KKWH, Shreveport, La.; KXA, Seattle; KYOS, Merced, Cal.; KMOX, St. Louis, Mo.; WABC-WBQO, New York City; WRAL, Baltimore; WBAP, Fort Worth, Tex.; WBBM, Chicago; WBT, Charlotte, N. C.; WCAL, Northfield, Minn.; WCAU and auxiliary, Philadelphia; WCAZ, Carthage, Ill.; WCBD, Chicago; WCCO, Minneapolis; WCFL, Chicago; WCKY, Cincinnati; WDGY, Minneapolis; WDZ, Tuscola, Ill.; WEAU, Eau Claire, Wis.; WEEU, Reading, Pa.; WEL, St. Louis, Mo.; WFAA, Dallas; WGAN, Portland, Me.; WGN, Chicago; WHAM and auxiliary, Rochester, N. Y.; WHAS, Louisville, Ky.; WHB, Kansas City, Mo.; WHDH and auxiliary, Boston; WHER, Portsmouth, N. H.; WHKC, Columbus, Ohio; WHBC, Indianapolis, Ind.; WIBG, Glenside, Pa.; WINS, New York City; WJJD, Chicago; WJR and auxiliary, Detroit; WJW, Washington, D. C.; WKAR, E. Lansing, Mich.; WLAC, Nashville, Tenn.; WLAB, Lawrence, Mass.; WLS, Chicago; WMXG, Atlanta, Ga.; WMBI, Chicago; WNYC and auxiliary, New York City; WOAI and auxiliary, San Antonio, Tex.; WOJ, Ames, Ia.; WOR and auxiliary, Newark, N. J.; WPIT and auxiliary, Allentown, Pa.; WRUF, Gainesville, Fla.; WRVA, Richmond, Va.; WSAZ, Huntington, W. Va.; WIR and auxiliary, Fort Wayne, Ind.; WJSV, Washington, D. C.; WJZ, New York City; WJZ, New York City; WJZ, New York City; WMTR and auxiliary, Wheeling, W. Va.; WSJ, Cleveland, Ohio; WTBQ, Cumberland, Md.; WTIC, Hartford, Conn.; WWVA and auxiliary, Wheeling, W. Va.; WMAF, High Point, N. C.; WSO, Charlotte, N. C.; WWTQ, Toledo, Ohio; KFOJ, Brownsville, Tex.; KTEJ, Temple, Tex.; WJTF, Jackson, Miss.; WLWH, Lowell, Mass.; WSVS, Buffalo, N. Y.; WIGL, Galesburg, II.; KCRJ, Jerome, Ariz.; KRE, Berkeley, Cal.; WMSD, Muscle Shoals City, Ala.; WPRP, Ponce, P. R.; WTM, Ocala, Fla.; KS0O, Sioux Falls, S. Dak.; WMAQ, Chicago; WENR, Chicago; WEAF, New York City; WJZ, New York City; WLW, Cincinnati; KFAR, Lincoln, Neb.; WOWO, Fort Wayne, Ind.; WHIP, Hammond, Ind.; WKBW, Buffalo, N. Y.; KFI, Los Angeles; KFI, auxiliary; KJR and auxiliary, Seattle; KGA, Spokane, Wash.; KOA, Denver, Colo.; KGO and auxiliary, San Francisco; KEX, Portland, Ore.; WEAF, auxiliary; WJZ, auxiliary.

Licenses for the following stations were extended upon a temporary basis only until March 1, 1940, pending receipt of and determination upon application for renewals:

- WSBN and auxiliary, Atlanta, Ga.; KGKY, Scottsbluff, Neb.

Licenses for the following stations were extended upon a temporary basis for the period ending March 1, 1940, pending determination upon applications for renewal:

- KTHS, Hot Springs National Park, Ark.; WCFL, auxiliary, Chicago; WHO, Des Moines, Ia.; WLB, Minneapolis; WMFJ, Daytona Beach, Fla.; KGBU, Ketchikan, Alaska; WKAT, Miami Beach, Fla.

KSUB—Leland M. Perry, Cedar City, Utah.—Special temporary authorization to Leland M. Perry, surviving partner of Johnson & Perry, a partnership, to operate station KSUB, was extended upon a temporary basis only to March 1, 1940, subject to whatever action may be taken upon formal application for regular authorization that may be submitted with respect to station KSUB.

WSM—National Life & Accident Ins. Co., Nashville, Tenn.—Special temporary experimental authority to operate regular broadcast transmitter for transmission of facsimile signals 12 midnight to 6 a. m., using 50 KW, was extended for a period of 1 month from February 1 to March 1, 1940.

WHO—Central Broadcasting Co., Des Moines, Ia.—Special temporary experimental authority to operate regular broadcast transmitter for transmission of facsimile signals 12 midnight to 6 a. m., using 50 KW, was extended for a period of 1 month from February 1 to March 1, 1940.

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Special temporary experimental authority to operate regular broadcast transmitter for transmission of facsimile signals 12 midnight to 6 a. m., using 50 KW, was extended for a period of 1 month from February 1 to March 1, 1940.

The following applications for renewal of television broadcast station licenses were renewed for the regular period:

- W2XAB, New York City; W2XVT, Passaic, N. J.; W2XH, Schenectady, N. Y.; W6XAO, Los Angeles; W2XBS, New York City; W2XBT, New York City; W2XAE, Philadelphia; W3XP, Philadelphia, and W0XVZ, Chicago.

Licenses for the following television stations were extended upon a temporary basis only, for the period ending March 1, 1940:

- W9XAL, Kansas City, Mo.; W9XG, Boston; W9XG, W. Lafayette, Ind.; W9XDR, Long Island City; W5XAD, Portable (Camden, N. J.); W9XEP, Camden, N. J.; W9XK, Iowa City, Ia.; W9XUI, Iowa City, Ia.

**FM BROADCASTERS ELECT SHEPARD PRESIDENT**

The Board of Directors of FM Broadcasters, Inc., met in New York on Monday, January 29, to perfect the organization of the FM Broadcasters and to make plans for the FM hearing on February 28. At the meeting John Shepard, 3d, Yankee Network, was elected President, John V. L. Hogan, WQXR, Vice President, and Robert Bartley, Yankee Network, Secretary-Treasurer. The Board adopted by-laws, approved for membership applications from about 25 organizations, and instructed Philip G. Loucks, Washington attorney for the group, to
file an appearance for the February 28 High Frequency Hearing before the FCC. Plans for correlating and presenting the available information on FM were discussed. Paul de Mars, engineer for the Yankee Network, was appointed engineering counsel for the group and he has opened headquarters at the Willard Hotel in Washington in order to prepare the engineering testimony.

The Executive Engineering Committee of the FM Broadcasters also met on Monday to perfect plans for the technical presentation. The members of the Executive Engineering Committee are: Paul de Mars, Yankee Network; S. L. Bailey, Jansky & Bailey; Professor Daniel E. Nobel, Connecticut State College; I. R. Weir, General Electric; Jack Poppele, WOR; and John De Witt, WSM.

COMMISSION TO INQUIRE INTO MANAGEMENT CONTRACTS

To determine whether broadcast licensees are themselves discharging the rights, duties, and obligations under their licenses or whether, on the other hand, such rights have been turned over to and are being exercised by outside operating companies under so-called management contracts, the FCC has ordered hearing on certain pending applications for renewal of radio station licenses, and for other and similar renewal applications as they come before it.

Those stations already designated for hearing under this move, at a date to be set later, are Westinghouse Electric & Manufacturing Company, licenses for WBZ and WBZA, both at Boston; KYW, Philadelphia, and KDKA, Pittsburgh; WGY, General Electric Company, Schenectady, N. Y.; WESG, Cornell University, Elmira, N. Y.; WWL, Loyola University, New Orleans; and WAPI, Alabama Polytechnic Institute and University of Alabama, Birmingham, Ala.

FCC SUSTAINED IN TWO COURT CASES

In two decisions handed down Monday—FCC vs. Pottsville Broadcasting Co. and Fly vs. Heitmeyer—the Supreme Court reversed the Court of Appeals for the District of Columbia and sustained the FCC’s contention that under the Communications Act of 1934 as amended, the Commission was vested with power to decide on the merits of competing applications for licenses irrespective of priority of filing and intervening judicial determination of questions of law. In the Heitmeyer case the court further held, according to the principles enunciated in the Pottsville case, that the Commission was empowered to reopen the record and take new evidence on the comparative ability of all the rival applicants to satisfy “public convenience, interest, or necessity” after previous erroneous denial of license to one of them.

The decisions are of far-reaching importance in delineating the proper spheres of activity of administrative commissions and the courts. They emphasize the large measure of administrative discretion vested by Congress in the FCC. To quote from the opinion:

“The present case makes timely the reminder that ‘legislatures are ultimate guardians of the liberties and welfare of the people in quite as great a degree as the courts.’ . . . Congress which creates and sustains these agencies must be trusted to correct whatever defects experience may reveal.”

The opinions of the court follow:

SUPREME COURT OF THE UNITED STATES

OCTOBER TERM, 1939

No. 265

FEDERAL COMMUNICATIONS COMMISSION, Petitioner,

POTTSVILLE TELEPHONE COMPANY, Respondent.

On Writ of Certiorari to the United States Court of Appeals for the District of Columbia

(January 29, 1940)

Mr. Justice Frankfurter delivered the opinion of the Court.

The court below issued a writ of mandamus against the Federal Communications Commission, and, because important issues of administrative law are involved, we brought the case here. 308 U. S. —. We are called upon to ascertain and enforce the spheres of authority which Congress has given to the Commission and the courts, respectively, through its scheme for the regulation of radio communications. Act of 1934, c. 652, 48 Stat. 1064, as amended by the Act of May 20, 1937, c. 229, 50 Stat. 189; 47 U. S. C. Sec. 151.

We are called upon to ascertain and enforce the spheres of authority which Congress has given to the Commission and the courts, respectively, through its scheme for the regulation of radio communications. Act of 1934, c. 652, 48 Stat. 1064, as amended by the Act of May 20, 1937, c. 229, 50 Stat. 189; 47 U. S. C. Sec. 151.

Supreme Court of the United States

The opinions of the court follow:

SYNOPSIS

The issues involved are (1) the broad powers of the Commission to set up management contracts and (2) the power of the courts to intervene in the Commission’s proceedings. The court held that the Commission’s power is broad and that it is a matter of public interest and necessity to determine the proper scope of management contracts.

Ibid. Sec. 301. In granting or withholding permits for the construction of stations, and in granting, denying, modifying or revoking licenses for the operation of stations, “public convenience, interest, or necessity” was the touchstone for the exercise of the Commission’s authority. While this criterion is as concrete as the complicated factors for judgment in such a field of delegated authority permit, it serves as a supple instrument for the exercise of discretion by the expert body which Congress has charged to carry out its legislative policy. Necessarily, therefore, the subordinate questions of procedure in ascertaining the public interest, when the Commission’s licensing authority is invoked—the scope of the inquiry, whether applications should be heard contemporaneously or successively, whether parties should be allowed to intervene in one another’s proceedings, and similar questions—have been turned over to and are being exercised by outside operating companies under so-called management contracts, the FCC has ordered hearing on certain pending applications for renewal of radio station licenses, and for other and similar renewal applications as they come before it.

Those stations already designated for hearing under this move, at a date to be set later, are Westinghouse Electric & Manufacturing Company, licenses for WBZ and WBZA, both at Boston; KYW, Philadelphia, and KDKA, Pittsburgh; WGY, General Electric Company, Schenectady, N. Y.; WESG, Cornell University, Elmira, N. Y.; WWL, Loyola University, New Orleans; and WAPI, Alabama Polytechnic Institute and University of Alabama, Birmingham, Ala.

FCC SUSTAINED IN TWO COURT CASES

In two decisions handed down Monday—FCC vs. Pottsville Broadcasting Co. and Fly vs. Heitmeyer—the Supreme Court reversed the Court of Appeals for the District of Columbia and sustained the FCC’s contention that under the Communications Act of 1934 as amended, the Commission was vested with power to decide on the merits of competing applications for licenses irrespective of priority of filing and intervening judicial determination of questions of law. In the Heitmeyer case the court further held, according to the principles enunciated in the Pottsville case, that the Commission was empowered to reopen the record and take new evidence on the comparative ability of all the rival applicants to satisfy “public convenience, interest, or necessity” after previous erroneous denial of license to one of them.

The decisions are of far-reaching importance in delineating the proper spheres of activity of administrative commissions and the courts. They emphasize the large measure of administrative discretion vested by Congress in the FCC. To quote from the opinion:

“The present case makes timely the reminder that ‘legislatures are ultimate guardians of the liberties and welfare of the people in quite as great a degree as the courts.’ . . . Congress which creates and sustains these agencies must be trusted to correct whatever defects experience may reveal.”

The opinions of the court follow:

To be sure, the laws under which these agencies operate prescribe the fundamentals of fair play. They require that interested parties be afforded an opportunity for hearing and that judgment must express a reasoned conclusion. But to assimilate the relation of these administrative bodies and the courts to the relationship between lower and upper courts, until it was decided that the courts must disregard the traditional scope, and at the same time to disregard the traditional limitations on appellate review, the courts must stray outside their province and read the laws of Congress through the distorting lenses of inapplicable legal doctrine.

Under the Radio Act of 1927 as originally passed, the Court of Appeals was authorized in reviewing action of the Radio Commission to “alter or revise the decision appealed from and enter such decision and at the same time to disregard the traditional scope, and at the same time to disregard the traditional limitations on appellate review, the courts will stray outside their province and read the laws of Congress through the distorting lenses of inapplicable legal doctrine.” The Commission’s responsibility at all times is to measure applications by the standard of “public convenience, interest, or necessity.” The Commission originally found respondent’s application inconsistent with the public interest because of an erroneous view regarding the law of Pennsylvania. The Court of Appeals held that error, and in compelling obedience to its correction, the application was again charged with the duty of judging the application in the light of “public convenience, interest, or necessity.” The fact that in its first disposition the Commission had committed a legal error did not create rights of priority in the respondent, as against the later applicants, which it would not have otherwise possessed. The Commission’s responsibility at all times is to measure applications by the standard of “public convenience, interest, or necessity.” The fact that in its first disposition the Commission had committed a legal error did not create rights of priority in the respondent, as against the later applicants, which it would not have otherwise possessed. The Commission’s responsibility at all times is to measure applications by the standard of “public convenience, interest, or necessity.”

The only relevant difference between the two cases is that here the Commission proposed on remand not only to reconsider respondent’s application to the record originally before it. After Heitmeyer’s appeal two other applications for the same facilities were filed with the Commission. Following intermediate litigation, needless here to recount, the Commission directed that respondent’s case be reopened in conjunction with the pending rival applications. Before this hearing could be had, respondent obtained from the Court of Appeals a writ of mandamus directing the Commission to restrict consideration of his application to the record originally before it. Because important questions of administrative law were involved, we granted certiorari.

This case is controlled by our decision No. 265, Federal Communications Commission v. Pottsville Broadcasting Co., decided this day. The only relevant difference between the two cases is that here the Commission proposed on remand not only to reconsider respondent’s application to the record originally before it. After Heitmeyer’s appeal two other applications for the same facilities were filed with the Commission. Following intermediate litigation, needless here to recount, the Commission directed that respondent’s case be reopened in conjunction with the pending rival applications. Before this hearing could be had, respondent obtained from the Court of Appeals a writ of mandamus directing the Commission to restrict consideration of his application to the record originally before it. Because important questions of administrative law were involved, we granted certiorari.

The judgment is reversed, with directions to dissolve the writ of mandamus and to dismiss respondent’s petition.

Mr. Justice McReynolds concurs in the result.

Mr. Justice Frankfurter delivered the opinion of the Court.

On March 25, 1935, Heitmeyer, respondent here, applied for a permit from the Federal Communications Commission under Sec. 319 of the Communications Act of 1934, c. 652, 48 Stat. 1089, 47 U.S.C. 319, to construct a broadcasting station at Cheyenne, Wyoming. His application and a competing one were heard by an examiner. The Commission, on May 1, 1936, denied respondent’s application on the sole ground that he was financially disqualified. He appealed to the United States Court of Appeals for the District of Columbia and the Commission’s decision was reversed. Heitmeyer v. Federal Communications Commission, 95 F. (2d) 91. To proceed in conformity with this opinion, the case was remanded to the Commission.

After Heitmeyer’s appeal two other applications for the same facilities were filed with the Commission. Following intermediate litigation, needless here to recount, the Commission directed that respondent’s case be reopened in conjunction with the pending rival applications. Before this hearing could be had, respondent obtained from the Court of Appeals a writ of mandamus directing the Commission to restrict consideration of his application to the record originally before it. Because important questions of administrative law were involved, we granted certiorari.

This case is controlled by our decision No. 265, Federal Communications Commission v. Pottsville Broadcasting Co., decided this day.

The only relevant difference between the two cases is that here the Commission proposed on remand not only to reconsider respondent’s application to the record originally before it. After Heitmeyer’s appeal two other applications for the same facilities were filed with the Commission. Following intermediate litigation, needless here to recount, the Commission directed that respondent’s case be reopened in conjunction with the pending rival applications. Before this hearing could be had, respondent obtained from the Court of Appeals a writ of mandamus directing the Commission to restrict consideration of his application to the record originally before it. Because important questions of administrative law were involved, we granted certiorari.

The judgment is reversed, with directions to dissolve the writ of mandamus and to dismiss respondent’s petition.

Mr. Justice McReynolds concurs in the result.

FCC APPROPRIATION CUT

Senate Committee on Appropriations this week cut $40,000 from the Federal Communications Commission appropriation. The $40,000 was for the establishment of a radio monitoring station at Anchorage, Alaska.

The Commission’s total appropriation as it passed the House was for $2,116,340 and as reported by the Senate Committee is $2,076,340.
NAB THANKS STATIONS, SPONSORS, FOR "MARCH OF DIMES" SUPPORT

The NAB through Neville Miller desires to extend its heartfelt thanks to stations, networks, sponsors, and radio artists who so generously gave of their time and talent to move along the March of Dimes, in celebration of the President's birthday, so that the scourge of infantile paralysis may be wiped from the homes of the nation.

Mr. Miller's statement:

"Again, American radio was the backbone of the March of Dimes. Again, American radio gave the March of Dimes tempo, scope, results. Again, American radio reached into the hearts of its millions of listeners for a contribution so that those who dance may help others to walk.

"The results are more than a tribute to radio. They are a tribute to the responsive heart of the American people, who have never yet failed to answer a radio call for neighborly help."

SESAC ADDITION

SESAC has notified its licensees that it has added the catalogue of Leopoldo Orduña, Barcelona, Spain.

CARTER—JACK TAYLOR

The NAB would like to know the whereabouts of Eddie Carter, piano marathon king, who has been broadcasting on the Pacific Coast. Anyone knowing his whereabouts, please advise headquarters.

The whereabouts of Jack Taylor and his Rail Splitters, a hillbilly radio show, is requested. Anyone knowing the location of this troupe should communicate with WJHL, Johnson City, Tennessee, or headquarters office.

FEDERAL LEGISLATION

S. 517 (Sen. Johnson, Colo.) LIQUOR ADVERTISING—Amendment (in the nature of a substitute) to the committee amendment to the bill (S. 517) to amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio. Ordered to lie on the table and to be printed.

STATE LEGISLATION

KENTUCKY:

S. 73 (Keenan) LOTTERY—An act to amend and re-enact section 2573 of the statutes relating to lottery. Referred to Ways and Means Committee.

MISSISSIPPI:

H. 43 (Woodliff) OPTOMETRY—To completely revise Chapter 140 "Optometry" of the Code of 1930 by combining certain pertinent features of the act as it now exists into new sections; by revising old sections to meet present conditions and problems; by eliminating duplicate provisions. Being an act defining optometry; providing for the licensing of persons to practice Optometry and the issuance of branch office licenses. Referred to Public Health and Quarantine Committee.

NEW YORK:

A. 786 (Goldstein) RADIO ADVERTISEMENTS—Makes it a misdemeanor to broadcast over a radio station, untrue and misleading advertisements and requires the advertiser to file with owner or operator of a station, his true name and name under which business is transacted. Referred to Codes Committee.

NEW YORK:

S. 802 (Williamson) POLICE RADIO CARS—Authorizes village trustees to appoint radio technician who shall keep in repair all police radio cars and equipment owned and operated by the village and perform such other duties as may be imposed. Referred to Villages Committee.

FCC ASSIGNMENTS

The FCC announces that the work, business and functions of the Commission for the month of February have been assigned as follows:

Commissioner Case Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Brown Designated to hear and determine, order, certify, report or otherwise act upon; (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.251 to 1.252 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings and oral arguments are scheduled before the Commission in broadcast cases for the week beginning Monday, February 5. They are subject to change.

Monday, February 5

Wednesday, February 7

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Renewal of license, 1390 kc., 1 kW, daytime.

Thursday, February 8

Further Hearing

Thursday, February 8

Oral Argument Before the Commission

WRTD—The Times Dispatch Radio Corp., Richmond, Va.—C. P., 590 kc., 1 kW, unlimited time (DA night). Present assignment: 1500 kc., 100 watts, unlimited time.
FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

March 5
WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Renewal of license, 1500 kc., 100 watts, unlimited time.

March 6
KXL—KXL Broadcasters, Portland, Ore.—C. P., 740 kc., 10 KW, 10 KW LS, limited time (DA day and night). Present assignment: 1420 kc., 250 watts, shares KBPS.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KADA—C. C. Morris, Ada, Okla.—Granted construction permit for changes in equipment and increase in power from 100 to 250 watts on 1200 kc.

DESIGNATED FOR HEARING

Guy S. Cornish (Cincinnati, Ohio), Portable-Mobile.—Application for construction permit for new public address relay station to operate on frequency 310,000 kc.; emission A3, power 1 watt; unlimited time in accordance with Sections 5.18 and 5.13. The proposed station would provide a voice circuit between the announcer and the public address amplifying equipment under conditions where wire facilities are not available or are impractical to install.

Miami Broadcasting Co., Miami, Fla.—Application for construction permit for new broadcast station to operate on 1120 kc., 250 watts, unlimited time. Exact transmitter site and type of antenna to be determined with Commission’s approval.

West Virginia Newspaper Publishing Co., Morgantown, W. Va.—Application for construction permit for new broadcast station to operate on 1200 kc., 250 watts, unlimited time. Exact studio and transmitter site and type of antenna to be determined with Commission’s approval.

MISCELLANEOUS

WEAN-WAAB-WNAC-WICC—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to pick up and rebroadcast programs being broadcast by FM Stations W1XOJ, W1XFW, W2XMN, W2XAG, or High Frequency Broadcast Station W1XER, for a period not to exceed 30 days, in order to secure information for the high frequency hearing on February 28, 1940.

WOSY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted special temporary authority to operate from 7:30 p. m., CST, to the conclusion of basketball games on February 26, and March 2, 1940, and from 7:15 p. m., CST, to the conclusion of a basketball game on March 4, 1940, in order to broadcast basketball games only using 250 watts power.

M. C. Reese, Phoenix, Arizona.—Adopted final order, effective January 26, 1940, granting the application for a new station to operate on 1300 kc., 100 watts night, 250 watts local sunset, subject to approval of transmitter and antenna system. WRTD—The Times Dispatch Radio Corp., Richmond, Va.—Postponed oral argument on application for construction permit to change frequency and install new equipment, now scheduled for February 1, to February 8.

W2XWG—National Broadcasting Co., Inc., New York, N. Y.—Granted license to cover construction permit for new high frequency station; frequency 42000 kc., power 100 watts, granted on experimental basis only, conditionally.

WSIP—WSIP, Inc., Sarasota, Fla.—Granted authority to determine operating power by direct measurement of antenna input.

Lookout Mountain Co. of Georgia. Lookout Mountain, Ga.—Granted motion for order to take depositions in re its application for construction permit for new station to operate on frequency 1370 kc., 250 watts, unlimited time.

KGB—Helen Townsley, Great Bend, Kansas.—Granted license to cover construction permit for changes in transmitting equipment and increase in power to 1370 kc.; power 250 watts, unlimited time.

KVGB—Helen Townsley, Great Bend, Kansas.—Granted authority to determine operating power by direct measurement of antenna input.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with station WGBF, with reduced power of 250 watts, from 7:30 p. m. to 9:00 p. m., CST, on January 24, 1940, in order to permit WGBF to broadcast proceedings at Farmers Business Men Banquet, Vincennes, Indiana.

WGBF—Evansville on the Air, Evansville, Ind.—Granted special temporary authority to operate simultaneously with station KFRU as above in order to broadcast proceedings at Farmers Business Men Banquet, Vincennes, Indiana.

KFAH—A Bruce Fahnstock, Fahnstock South Sea Expedition, Portable mobile, aboard Director II (area of Fahnstock South Sea Expedition).—Granted license to cover construction permit for new special relay broadcast station; frequencies 1275.5, 6125, 9135, 12862.5, 17310 and 27900 kc.; power 1000 watts; granted on an experimental basis only, conditionally.

Anthracite Broadcasting Co., Inc., Scranton, Pa.—Designated hearing for application for construction permit to erect a new station to operate on 1370 kc., 250 watts, unlimited time, exact transmitter site and type of antenna to be determined with Commission’s approval.

WMIP—Northwest Airlines, Inc., Washington, D. C.—Granted special temporary authority to operate aircraft station KHDIW on 2790 kc., January 27, 1940, in order to relay broadcast program material in connection with Winter Carnival of Twin Cities, Minnesota to Radio Station WMIN.

WJNP—Jack R. Butler, Palm Beach, Fla.—Granted special temporary authority to operate the radio transmitter aboard the Motor Yacht Dutchess II, bearing call letters WPYW, as a relay broadcast station utilizing the frequency 2790 kc., from 5:15 p. m. to 5:30 p. m., EST, for the period ending not later than February 4, 1940, in order to relay broadcast the Sailfish Derby programs to radio station WJNO.

Radiomarine Corp. of America.—Granted motions to take depositions in Buffalo, N. Y., February 14; Cleveland, Ohio, February 16; Detroit, Mich., February 17; and New York, N. Y., February 19; in re applications for Radiomarine Corp. of America for construction permit for coastal harbor stations WCY and WBL.

WHBY—WHBY, Inc., Appleton, Wis.—Granted license to cover construction permit as modified for installation of new transmitter and antenna and move of transmitter and studio; 1200 kc., 250 watts, unlimited time.

WMBO—WMBO, Inc., Auburn, N. Y.—Granted authority to determine operating power by direct measurement of antenna input.

WTOL—The Community Broadcasting Co., Toledo, Ohio.—Granted license to cover construction permit for changes in transmitting equipment and increase in power to 250 watts; frequency, 1370 kc., unlimited.

WTOL—The Community Broadcasting Co., Toledo, Ohio.—Granted authority to determine operating power by direct measurement of antenna input.
KPAC—Port Arthur College, Port Arthur, Tex.—Granted license to cover construction permit as modified for installation of new transmitter; move transmitter 500 feet; change frequency; change hours of operation, and install directional antenna for night use; frequency 1320 kc., power 500 watts, unlimited time; also granted authority to determine operating power by direct measurement of antenna input.

KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.—Granted special temporary authority to operate from 7:00 p.m. to 9:00 a.m. EST, on February 19 and 23, 1940, in order to broadcast baseball games only.

KORN—Nebraska Broadcasting Corp., Fremont, Nebr.—Granted license to cover construction permit as modified for new broadcast station, 1570 kc., 100 watts night, 250 watts daytime, unlimited time; also granted authority to determine operating power by direct measurement of antenna input.

KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Granted authority to determine operating power by direct measurement of antenna input.

KORH—Nebraska Broadcasting Corp., Fremont, Nebr.—Granted license to cover construction permit as modified for new relay (low frequency) broadcast station to be used with applicant's standard broadcast station WRQ, Omaha, Nebr.; frequencies 1632, 2058, 2150 and 2790 kc., power 25 watts. Albert S. and Robert Drohlich, d/b/a Drohlich Brothers, Portable-Mobile (area of Sedalia, Mo.).—Granted construction permit for new relay (high frequency) broadcast station to be used with applicant's standard broadcast station KDAY; frequencies 30820, 33740, 35820, 38320 kc., power 25 watts.

National Broadcasting Co., Portable-Mobile (area of Chicago, Ill.).—Granted construction permit for new high frequency relay broadcast station to be used with applicant's standard broadcast stations WENR and WMAQ; frequencies 31220, 35620, 37020 and 39260 kc., power 25 watts.

National Broadcasting Co., Inc., Portable-Mobile (area of Chicago, Ill.).—Granted construction permit for new high frequency relay broadcast station to be used with applicant's standard broadcast stations WENR and WMAQ; frequencies 31220, 35620, 37020, 39260 kc., power 25 watts.

National Broadcasting Co., Inc., Portable-Mobile (area of San Francisco, Cali.).—Granted construction permit for new high frequency relay broadcast station to be used with applicant's standard broadcast station WYCA; frequencies 31220, 35620, 37020, 39260 kc., 0.25 watt.

National Broadcasting Co., Inc., Portable-Mobile (area of Cleveland, Ohio).—Granted construction permit for new high frequency relay broadcast station to be used with applicant's standard broadcast station WTAM; frequencies 31220, 35620, 37020, 39260 kc., power 0.25 watt.

National Broadcasting Co., Inc., Portable-Mobile (area of Denver, Colo.).—Granted construction permit for new high frequency relay broadcast station to be used with applicant's standard broadcast station KOA; frequencies 31220, 35620, 37020, 39260 kc., power 25 watts.

National Broadcasting Co., Inc., Portable-Mobile (area of Cleveland, Ohio).—Granted construction permit for new high frequency relay broadcast station to be used with applicant's standard broadcast station WYCA; frequencies 31220, 35620, 37020, 39260 kc., power 25 watts.

National Broadcasting Co., Inc., Portable-Mobile (area of Cleveland, Ohio).—Granted construction permit for new high frequency relay broadcast station to be used with applicant's standard broadcast station WTAM; frequencies 31220, 35620, 37020, 39260 kc., power 25 watts.

WXY—King-Trendle Broadcasting Corp., Detroit, Mich.—Granted license to use old W.E. 106-B transmitter which is located at 5057 Woodward Ave., Detroit, Mich., as auxiliary transmitter for emergency use only, with power of 1 Kw; 1240 kc.

Springfield Radio Service, Inc., Springfield, Ohio. Continued without date the hearing now scheduled for February 5, 1940, in re application for new broadcast station.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 9:00 a.m. to 11:00 a.m., and from 2:00 p.m. to 6:00 p.m., AST, on February 12, 22 and 25, 1940, in order to broadcast baseball games only; to operate from 12:00 p.m. to 12:00 p.m., AST, on February 22, 1940, in order to broadcast festivities pertaining to Washington's Birthday.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Granted special temporary authority to operate from 7:00 p.m. to 9:00 a.m. EST, January 30, 1940, in order to broadcast program in connection with the "Fight Infantile Paralysis Campaign".

WKQ—Radio Corp. of Puerto Rico, San Juan, Puerto Rico.—Granted extension of special temporary authority to re-broadcast sustaining programs to be received from International broadcast stations WCX and WCMX over WKQ, non-commercial stations, to January 30, 1940, pending consideration and reply to Commission's letter of January 19, 1940, but not beyond February 27, 1940.

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y. (and four other Brooklyn stations).—Extended effective date of construction permit issued December 5, 1938, for a period of 30 days from January 30, 1940, in re applications involving the operating time previously utilized by station WMBQ.

WPR—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Denied petition for reconsideration, reopening of proceeding, and setting for hearing the application of Puerto Rican American Broadcasting Co., Inc., for a new station to operate on 1540 kc., with power of 1 kw, unlimited time, which was granted by the Commission on December 12, 1939.

Samuel M. Emison, Vincennes, Ind.—Denied petition for rehearing in re application of Vincennes Newspapers, Inc., Vincennes, Ind., for a construction permit to erect a new station to operate on frequency 1120 kc., 100 watts, unlimited time, which was granted by the Commission on November 22, 1939.

WNYC—City of New York, Municipal Broadcasting System, New York City.—The application of WNYC requesting authority to increase time of operation from daytime, local sunset at WCCO, Minneapolis, to specified hours (6 a.m. to 11 p.m., EST), on frequency 810 kc., which has been designated for hearing, will be heard on the following issues at a date to be set: (1) To determine whether or not the Commission's rules governing standard broadcast stations, particularly Secs. 3.22 and 3.25 (Part III), properly applied; (2) to determine the nature, extent, and effect of any interference which would result from the application's proposed station operating simultaneously with WCCO and WGY; (3) to determine the nature, extent, and effect of any interference which would result should applicant's proposed station operate simultaneously with WGY, operating as proposed in its pending application, or with WCCO, operating as proposed in its pending application; and (4) to determine whether the DA system will comply in all respects with Sec. 3.45 of Standard Broadcast Rules and requirements of good engineering practice.

Peoria Broadcasting Co., Portable-Mobile (area of Peoria, Ill.).—Granted construction permit for new relay broadcast station to operate on frequencies 33380, 35520, 37620, 39820 kc., power 1 watt.

Peoria Broadcasting Co., Portable-Mobile (area of Peoria, Ill.).—Granted license to cover construction permit for above relay (low frequency) broadcast station, 1370 kc., unlimited time; also granted authority to determine operating power by direct measurement of antenna input.

WSA—Grove City College, Grove City, Pa.—Granted special temporary authority to operate from 8 p.m. to 10:30 p.m.,
APPLICATIONS FILED AT FCC

610 Kilocycles

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Granted special temporary authority to operate from 7:00 p. m. to 8:00 p. m., EST, on February 14 and 15, 1940, in order to broadcast basketball games only.

KUMA—A. H. Schermann, Yuma, Ariz.—Denied authority to continue operation of Station KUMA until the new station which has been authorized to be constructed at Yuma is ready for operation.

W2XVT—Allen B. DuMont Laboratories, Passaic, N. J.—Granted special temporary authority to operate experimental television broadcast station W2XVT from 9:00 a.m. to 7:00 p.m., EST, (provided W2XBS remains silent) for the period beginning January 29, 1940, to not later than February 3, 1940, in order to permit necessary adjustments for demonstration to be given to the Commission.

WILL—University of Illinois, Urbana, Ill.—Granted special temporary authority to operate simultaneously with Stations W1XIT and WCHS, with power of 1,000 watts, from 7:25 p.m. to 9:25 p.m., CST, on February 3, 10, 12, 17, 19, 24, and 26, 1940, in order to broadcast University of Illinois basketball games only.

KWJJ—KWJJ Broadcast Company, Inc., Portland, Ore.—Granted special temporary authority to operate simultaneously with station WPTM and KRLD on 1040 kc., from 7:25 p.m. to 9 p.m., PST, on February 3, 9, 10, 12, 13, 17, 23, 27, and 28, 1940, in order to broadcast basketball games only.

WMO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate from 7:00 p.m. to 10:30 p.m., CST, on February 2, 3, 9, 12, 16, 17, 19, 23, 28, 29, and 30, 1940, in order to broadcast basketball games only.

WCLL—WCLL, Inc., Joliet, Ill.—Granted special temporary authority to operate from 8:30 p.m. to 10:30 p.m., CST, on February 20, 1940, in order to broadcast proceedings of civic dinner sponsored by the Rotary Club of the City of Aurora, using 100 watts only.

WACS—WACS, Inc., Joliet, Ill.—Granted special temporary authority to operate from 8:30 p.m. to 10:30 p.m., CST, on February 20, 1940, in order to broadcast basketball games only.

WAOG—New York State Conservation Dept., Albany, N. Y.—Granted extension of special temporary authority to operate portable radio-forestry-station WRAI on frequencies 31620, 35260, 37340, and 3960 kc., for the period February 5, 1940, to not later than March 5, 1940, as a relay broadcast station to relay programs from the Olympic Bobsled Run to Standard Broadcast Station WNYZ.

WFDJ—The Monocacy Broadcasting Co., Frederick, Md.—Granted special temporary authority to operate from 8:00 p.m. to 9:30 p.m., EST, on February 6, 1940, in order to broadcast a special dinner meeting with U. S. Senator Millard E. Tydings as the principal speaker.

Mutual Broadcasting System, Washington, D. C.—Granted special temporary authority to eliminate station identification as required by Sec. 3.92 of the Rules and Regulations from 11:15 p.m. to 12:15 p.m., EST, on January 30, 1940, during the President's Birthday Ball Program broadcast.

Columbia Broadcasting System, Inc., New York City.—Granted special temporary authority to eliminate station identification as required by Sec. 3.92 of the Rules and Regulations from 11:15 p.m. to 12:15 p.m., EST, on January 30, 1940, during the President's Birthday Ball Program broadcast.

National Broadcasting Co., Inc., New York City.—Granted special temporary authority to eliminate station identification as required by Sec. 3.92 of the Rules and Regulations from 11:15 p.m. to 12:15 p.m., EST, on January 30, 1940, during the President's Birthday Ball Program broadcast.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Authority to transfer control of corporation from Sam H. Mann, McKinney Barton & Dorothy Line, to Nelson P. Pouyner, 50 shares common stock.

1420 Kilocycles

WMBS—Fayette Broadcasting Corp., Uniontown, Pa.—Construction permit to install new transmitter, and directional anten-
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**Best Gardens**—See Middle West Supply Company.

Davidson Enamel Company, Clyde, Ohio, is charged, in a complaint with misrepresentation in the sale and distribution of its products. The respondent manufactures and distributes an interior wall covering described in advertisements in magazines and newspapers as "tile" and "porcelain tile."

**Progressive Medical Company**—Blanche Kaplan, trading as Progressive Medical Company and as Ladies Aid Company, 3944 Pellegrini Ave., Chicago, Ill., engaged in the sale or sale and distribution of medicinal preparations consisting of two formulae known as "Ladies’ Aid No. 2, Ordinary Strength," and "Ladies’ Aid No. 3, Extra Strength." is charged, in a complaint issued, with the dissemination of false advertisements concerning the preparations.

The complaint charges that the respondent represented her medicinal preparations as cures or remedies for delayed menstruation, and as being non-irritating, mild, efficient and specific treatments.

"Sulphate dried, powdered extract black hellebore, ergotin, and oil of "savion, and that the drugs are present in the preparations in quantities sufficient to cause serious and irreversible injury to health if used under the conditions prescribed in the advertisements or under conditions that are customary or usual. In the United States District Court for the Northern District of Illinois, Eastern Division, a restraining order was granted last

February 2, 1940

4014
month on petition of the Federal Trade Commission, restraining Blanche Kaplan and all other persons participating with her having notice, from disseminating any advertisements for the purpose of inducing the purchase of the preparations. The restraining order prohibits further dissemination of such advertising pending the issuance of a complaint by the Federal Trade Commission under its regular procedure, and until such complaint is dismissed, set aside by United States Courts on review, or until the order of the Commission to cease and desist has become final. The Court ruled that the advertisements failed to reveal that the preparations, when taken under conditions prescribed by the advertisements or conditions that are customary and usual, may result in serious or irreparable injury to health. (4002)

Sheffield Silver Company—A complaint has been issued against The Sheffield Silver Company, Jersey City, N. J., charging misrepresentation.

The complaint charges that the respondent, by use of its corporate name “The Sheffield Silver Company” on its letterheads, invoices, labels and other printed matter in the sale of its ware, represents and implies that it is engaged in the sale of silver plated ware manufactured and fabricated in Sheffield, England, and that its product has its origin in that city and is fabricated by skilled artisans located there.

In fact, the complaint continues, all its ware offered for sale is manufactured by the respondent at its place of business in New Jersey.

The name “Sheffield”, the complaint alleges, employed in the designation of silver plated hollow ware, has been used for a long period of time to refer to such ware manufactured in Sheffield, England, where, nearly two hundred years ago, a type of silver plated ware designated “Sheffield” plate was originated. Sheffield, England, has been the seat of manufacture of silver plated ware as well as of cutlery of various kinds. Its artisans in these lines of production have achieved a reputation for skill wherever such ware and cutlery are sold. The name “Sheffield”, when used in connection with such products, immediately suggests the City of Sheffield, England, to a substantial part of the purchasing public and use by the respondent of the word “Sheffield” allegedly has a tendency to mislead and deceive purchasers. (4000)

Thomsen-King & Company, Inc.—A complaint has been issued charging three cosmetic corporations and 44 individuals with violation of the Federal Trade Commission Act in the conduct of a series of prize contests to promote the sale of cosmetics.

The corporate respondents are Thomsen-King & Co., Inc., 710 South Plymouth Court, Chicago, and the Winship Corporation, 112-114 West Eleventh St., Des Moines, both engaged in the sale of cosmetics, and F. W. Fitch Company, 301 Fifteenth St., Des Moines, cosmetics manufacturer.

Preliminary injunctions against Thomsen-King & Co., Inc., and George Thomsen and Merrold Johnson and the Winship Corporation and Don Parmelee were obtained by the Commission January 11 and 19 in United States District Courts of Northern Illinois and Southern Iowa, respectively. Both concerns and the individuals named were restrained from further dissemination of false advertising in connection with prize contests for promoting the sale of cosmetics pending issuance of and final action on a complaint to be issued by the Federal Trade Commission.

In the Commission’s complaint now issued the respondents are charged with (1) entering into unlawful agreements and conspiracies to render inefficient the orders and other processes of the Federal Trade Commission and (2) dissemination of false advertisements with respect to prize contests and the effectiveness of the use of their various cosmetics. (3998)

Tone Company—Michael S. Chiolak, trading as Tone Company, 64 West Randolph St., Chicago, engaged in the sale and distribution of medicinal preparations designated “Silver Label Formula No. 6” and “Gold Label Formula No. 8,” both of which are also known as “Tone Periodic Compound,” is charged, in a complaint with the dissemination of false advertising.

In advertisements in periodicals, circulars and other printed matter, the complaint charges, the respondent represented that the preparations distributed by him are cures or remedies for delayed menstruation, and that the preparations are safe and harmless. Among such advertisements were: “Take one capsule every 4 hours. Continue Persistently until desired results are obtained. The important thing to remember is to keep up the treatment without a break or lapse until desired results are evident. * * * *”

It is alleged in the complaint that the preparations contain ergot, aloes, extract black hellebore, and extract cotton root bark. These drugs are present in the preparations, the complaint charges, in quantities sufficient to cause serious and irreparable injury to health if used under the conditions prescribed in the advertisements or under such conditions as are customary or usual. Gastric intestinal disturbances such as catarrh, nausea and vomiting may result, and their use, when used to interfere with the normal course of pregnancy, may result in uterine infection and in the condition known as septicemia or blood poisoning. (4003)

Winship Corporation—See Thomsen-King & Company, Inc.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders during the past week:

Frye Company—Prohibiting certain misleading representations in the sale of a medicinal preparation designated “Pancreobismuth,” “Pancreo Bismuth,” or “Pancreobismuth and Pepsin,” an order has been issued against the Frye Company, distributor, 36 Pleasant St., Watertown, Mass.

Findings are that in newspaper, periodical and circular advertising matter the respondent company, by using the name it gives to its preparation, tended to mislead prospective purchasers into believing that they would obtain some physiological effect from the presence of pancreatin and pepsin, when in fact these substances are only minor ingredients which are rendered physiologically inert when taken internally in the respondent’s preparation, the active ingredients being bismuth subnitrate, sodium bicarbonate and ginger.

The findings continue that while the respondent’s preparation possesses the therapeutic value of a simule antacid and carminative, which tends temporarily to neutralize excess acid and to relieve the symptoms of distress from gastric hyperacidity, it has no effect on the causative factors of gastric hyperacidity or the systemic causes of excess acid in the system.

In the sale of its preparation, the respondent company is directed to cease and desist from representing that it has therapeutic value in the treatment of upset stomach, or in the relief of indigestion due to acid stomach, or in the neutralization of excess acid and allaying of irritation, and above and above being a simple antacid and carminative tending to give temporary relief from distress caused by such symptoms.

Other representations to be discontinued are that the preparation is beneficial in aiding the digestion of, or in relieving distress caused by, starchy foods, and that it possesses physiological or therapeutic value due to the presence of pancreatin or pepsin when such ingredients are not present in such amounts and such form as to be active ingredients.

The order prohibits use of the trade names “Pancreobismuth,” “Pancreo-Bismuth,” or “Pancreobismuth and Pepsin,” or other trade names containing the words “Pancreatin” or “Pepsin,” or any other adaptation of such words, to describe or refer to the respondent’s present product or any similar preparation which does not possess pancreatin and pepsin in such amounts and in such form as to be active ingredients.

The order also prohibits the dissemination of false advertising which represent, directly or through implication, by use of the trade name “Pancreobismuth” or any other trade name containing the word “Pancreatin,” or any adaptation thereof, that the preparation contains pancreatin as an active ingredient. (3741)

Southern Art Stone Company—Prohibiting certain misleading representations in the sale of imitation marble and granite tombstones and memorials, an order to cease and desist has been issued against Roy D. Burnsed, trading as Southern Art Stone Company, 1927 Piedmont Road, N. E., Atlanta.

In the sale of his products designated “Marbletexture” and “Granitexture,” which were found to have been produced from a
mixture of crushed marble or granite, cement and other ingredients, and known as cast stone, the respondent was directed to cease representing them as being natural marble or granite, as being capable of retaining as high a polish as marble or granite, or as being superior to or lasting longer than natural marble or granite.

The respondent was ordered to desist from the representation that his products will not crack, crumble or disintegrate from natural causes or that they are everlasting. He was also directed to discontinue using the term "free" to refer to merchandise regularly included in a combination offer and to cease representing that his products are from 33 1/3 per cent to 50 per cent or any extent lower in price than similar products of comparable quality and weight sold by competitors, unless the prices are in fact lower to such extent, the quality and weight being considered. (3697)

STIPULATIONS

The following stipulations have been entered into by the Commission:

General Mills, Inc., trading as Sperry Flour Company, Minneapolis, agrees to cease advertising that the amount of wheat germ in a package of "Wheat Hearts" is equivalent to that in any specified quantity of wheat; that the quantity of wheat is greater than that of a package of "Wheat Hearts"; that "Wheat Hearts" has a Vitamin B1 content greater than any other cereal; that its calorie value is directly transmissible into or is an equivalent of bodily energy or vitality, and that any claim of "Wheat Hearts" will supply a quota of Vitamin B1, unless the amount stated is in accord with scientific determinations. (02500)

S. H. Hamm & Son—Misleading representation in the sale of slate used for building purposes will be discontinued under a stipulation entered into by Seba H. and John D. Hamm, trading as S. H. Hamm & Son, Bangor, Pa.

The stipulation relates that in connection with their sale of "Stoddard Albion Certificate Slate," quarried in the Pen Argyl District of Pennsylvania, the respondents disseminated to the trade a circular containing statistics purporting to be the results of tests conducted by independent testing agencies showing the respondents' "Albion slate to be superior to "Genuine Bangor Certificate Slate." A competitive product quarried in the Bangor, Pa., district, both in physical strength and in resistance to moisture absorption. The stipulation continues that in fact no original reports or other data have been furnished showing a wheat germ content of 19 per cent, which are inaccurate and contrary to the weight of scientific evidence, and misleading and deceptive insofar as they indicate superior qualities in Albion slate not actually present. Under their stipulation, the respondents agree to desist from publishing comparative tests purporting to show that slate distributed by them is of higher quality than competitive products when, in fact, the figures given and assertions made are not warranted by the weight of scientific evidence. They also agree to cease representing in any other way that their slate has greater strength, or greater resistance against absorption of moisture, than specified competitive products, when such is not a fact, or that it possesses any other superior quality not actually present. (2656)

H. Korach Company—Herman Korach, trading as H. Korach Company, Chicago, Ill., stipulates that in the sale of women's coats he will cease using the word "Pony" or any other word simulating it in sound or spelling; the words "Lamed" or "Lambed" or words containing the letters "Lam" or simulating the word "Lamb"; the word "Persian" or other words imitating it; the word "Koracal" or any word simulating "Karacul" or "Caracul"; the words "Seal" or "Sealled" or any terms containing the word "Seal" or imitation of it; or the name of any animal, pelt or fur to designate any cloth coat or garment not made of the pelt or fur of the animal designated, unless such terms are immediately preceded by the words "Cloth Imitation of" in conspicuous type. The respondent also agrees to desist from the representation that his sales-persons purchase his coats at a price permitting them to charge a customer an excessive price and at the time have the customer believe that she is obtaining a bargain. The stipulation relates that the respondent advertised; "Even though you were to charge $45.00 for this coat that will only cost you $9.75 at wholesale prices, your customers will swear that they are buying the bargain of their lives." (02502)

Henry D. Mack, New York City, agrees to cease representing that the "Tasco Arithmometer" does the work of higher priced adding machines; that the "Tasco Arithmometer" is as accurate, fast or dependable as more expensive machines used for the same purpose; that the price charged for it or other articles or devices offered for sale is either "low" or "special" so long as the figure quoted is the regular price or more than the regular price for which the devices have been sold or offered for sale by him, or that the advertised offer is special or unusual, so long as no price reduction or other trade concession is made therewith. (2657)

McAlester Fuel Company, McAlester, Okla., agrees to cease representing that "Paranay Motor Oil" possesses qualities never before known in any oil; has the toughest film in olddom and the longest life; prevents the excessive friction and wear in the motor caused by other oils, especially while breaking in the motor, and will keep an automobile, tractor, truck or any other machine running just as smoothly, powerfully or economically the second, third or fourth year as it ran the first year. Other representations which the respondent agrees to discontinue are that the so-called "Miracle Test" is the best test ever devised for determining the lubricating qualities of motor oils; that the strength of the oil film alone on motor bearings determines the quality of lubrication obtained from any oil and the ability of any oil to prevent excessive friction, and that use of the respondent's oil will cause a motor to produce more pep, mileage, horsepower and speed than all other motor oils. (02501)

George A. Morhard Company, Philadelphia, agrees to cease representing that its "Kauri-Congo Varnish" contains a high percentage of Kauri-Congo gum or tung oil, unless such is a fact, or in any other way over-stating or misrepresented the gum or tung oil actually contained in the product. The respondent also agrees to discontinue representing that the product is water-resistant or has a low acid number or that it is non-reactive to zinc oxide, and that the product can be used as an all-purpose spar varnish when such are not the facts. (2658)

Ohio Truss Company, 12 East Ninth St., Cincinnati, agrees to cease labeling or otherwise designating a shoulder brace or similar product offered for sale as "Long-Life Health Brace," or to cease representing in any other way that the user may expect thereby to attain health and other desirable conditions, or that such results are to be obtained through correct breathing or erect posture, in and of themselves. (2661)

Plast-O-Dent Company—J. D. Hagey, trading as Plast-O-Dent Company, Detroit, Mich., agrees to desist from advertising that plates can be refitted by using "Plast-O-Dent"; that this product is healing or kindly to the tissues and will perfect the fit of any dental plates; that the simplicity of its application assures its success; that "Plast-O-Dent" will eliminate in every instance the discomfort and embarrassment due to loose plates, and that it is an amazing, new discovery. (02504)

Imis, Spedien & Co., New York, agrees to cease representing that "Larvacide" is a safer fumigant than other similar products. Unless conspicuous notice is given with every claim for safety that all fumigants are a deadly poison but that "Larvacide", by its capacity to produce tears, warns persons to get away from it. The respondent also agrees to discontinue using the term "free" to refer to merchandise regularly included in a combination offer and to cease representing that its product is water-resistant or has a low acid number or that it is non-reactive to zinc oxide, and that the product can be used as an all-purpose spar varnish when such are not the facts. (02503)

February 2, 1940
Sperry Flour Company—See General Mills, Inc.

E. H. Tate Company, 251 Causeway St., Boston, dealers in merchandise including upholstery nails or tacks, agrees to cease employing the words "Boston, Massachusetts" or the letters "U. S. A." or such words and letters in connection to indicate that the products so marked are of domestic manufacture, when such is not a fact; and to discontinue causing the brands or marks on imported products, which indicate their foreign origin or manufacture, to be omitted, erased or concealed so as to mislead or deceive purchasers with respect to the foreign origin or manufacture of the products. The stipulation relates that the respondent packed certain of its products in cartons on which appeared the wording: "Bull Dog Thumb Tacks—50—E. H. Tate Co., Boston, Mass., U. S. A.,” when in fact such products were not of domestic manufacture but were made in Germany. The original cartons in which the products were imported were marked to indicate the country of origin but this did not appear on the cartons in which the products were ultimately sold to consumers in this country, according to the stipulation. (2660)

Vadisco Sales Corporation, New York, agrees to cease representing that “Quinlax Cold Tablets” are a competent or effective treatment to stimulate circulation or to eliminate acids through the pores, and that the preparation treats seven symptoms or phases of a cold, is a complete treatment or effective remedy for colds, a new preparation, a new method for treating colds or their symptoms, and especially suitable for children. (02499)

Watertown Mattress Company—Leon T. and Lawrence R. Clickner, trading under the firm name of Watertown Mattress Company, 139 Mill St., Watertown, N. Y., agree to cease supplying customers with mattresses for resale, such products being tagged or marked with fictitious or misleading prices which are in excess of the regular, customary prices. (2659)

FTC DISMISSES COMPLAINTS

The Federal Trade Commission has dismissed complaints against 6 of some 14 companies which had been charged with unfair competition through sale of Philippine hardwood as “Philippine Mahogany.” Dismissal was ordered as to proceedings against Sea Sled Corporation, New York; Louis Bossert & Sons, Inc., Brooklyn; Pacific Door & Sash Company, Los Angeles; Chicago Warehouse Lumber Company, Chicago; Dart Boats, Inc., Toledo; and Boyd-Martin Boat Company, Delphi, Ind.

These respondents were found to be no longer in the business of selling Philippine hardwoods under the name “Philippine Mahogany.” The Commission’s dismissal action was taken without prejudice to the reopening of these cases if any or all of the respondent parties should resume the practice charged.

Similar charges against 8 other companies are in process of being tried under an order reopening these cases, before a Commissioner trial examiner.
Broadcast Music, Inc., Now a "Going Concern"  
As Board Declares Plan Operative

Broadcast Music, Inc., was declared a "going concern" by its Board of Directors, meeting yesterday in the company's new offices at 580 Fifth Avenue, New York City.

The total amount of funds actually received or pledged was $1,140,357.50. Members of the Board expressed confidence that as other station commitments are received the figure will exceed the $1,500,000.

Stock certificates and license agreements will be issued in the very near future. It was also announced that the selection of personnel for the staff of BMI will be completed shortly. Meanwhile, Neville Miller will continue to serve as President of the corporation, and Sydney M. Kaye as Vice President and General Counsel.

Members of the Board present at yesterday's meeting were: John Elmer, Edward Klauber, Lenox R. Lohr, Samuel R. Rosenbaum, John Shepard, III, and Neville Miller, President, and Sydney Kaye, Vice President and General Counsel. Also present was Everett E. Revercomb, acting Secretary and Treasurer of the corporation.

---

FTC RULES ON COMMERCIAL COPY

Several members have recently asked NAB for information and guidance in checking advertisers' commercial copy, with particular reference to FTC rules and regulations on food, drugs and cosmetics.

There are several sources for this information, all of which may be helpful. Stations should write the FTC for a copy of their Annual Report for the fiscal year ending June 30, 1939, which was recently released. The subject is further covered in NAB Reports for December 29, 1939 and January 19, 1940. Page 3970 of January 19 issue will be of particular interest.

Each issue of NAB Reports covers current Federal Trade Commission action, including complaints, stipulations, and cease and desist orders. Advertising & Selling (January 1940 issue, p. 25) cites some actual cases where food and drug copy was changed to conform to FTC regulations.

"POT O' GOLD" PROGRAM REFERRED TO JUSTICE DEPT. BY FCC

The Federal Communications Commission has transmitted to the Department of Justice the facts concerning the Tums "Pot o' Gold" program, broadcast over the National Broadcasting Company network, and a program advertising Mead's Bakery, recently broadcast by stations KWFT and KBST at Wichita Falls and Big Springs, Texas, respectively, it was announced yesterday.

The Commission had received complaints that these programs, which involve gifts of money by chance, violate Section 316 of the Communications Act which prohibits the broadcasting of "...any advertisement, or information concerning any lottery, gift enterprise, or similar scheme ..."

In turning these cases over to the Department of Justice for such action as that department deems necessary and warranted, the Commission offered "any cooperative assistance desired."
5 TEXAS LICENSES ORDERED REVOKED; REASON: UNDISCLOSED OWNERSHIP

The Federal Communications Commission issued orders of revocation for licenses of five Texas radio broadcast stations—KSAM, Huntsville; KAND, Corsicana; KRBA, Lufkin; KTBC, Austin; and KNET, Palestine—effective February 24.

The order resulted from investigation instigated January 26th, of undisclosed interests of Dr. James G. Ulmer and Roy G. Terry in the stations mentioned.

In its announcement, released yesterday, the Commission said:

"It is indicated that original construction permits and licenses for these stations were issued by the Commission upon false and fraudulent statements and representations and because of the failure of the applicants to make full disclosure to the Commission concerning the financing of station construction and operation, as well as the ownership, management and control thereof, in violation of the law, and that, had the actual facts in this connection been made known to the Commission it would have been warranted in refusing to license these stations.

"KSAM is licensed by the Sam Houston Broadcasting Association, H. G. Webster, president, and operates on 1500 kilocycles with 250 watts, daytime; KAND is licensed by the Navarro Broadcasting Association, J. C. West, president, and operates on 1310 kilocycles with 100 watts, unlimited time; KRBA is licensed by the Redlands Broadcasting Association, Ben T. Wilson, president, and operates on 1310 kilocycles with 250 watts, daytime; KTBC is licensed by the State Capitol Broadcasting Association, Inc., and operates on 1120 kilocycles with 100 watts, daytime; KAND is licensed by the Navarro Broadcasting Association, Ben T. Wilson, president, and operates on 1120 kilocycles with 100 watts, unlimited time; KTBC is licensed by the State Capitol Broadcasting Association, Inc., and operates on 1120 kilocycles with 100 watts, daytime; KAND is licensed by the Navarro Broadcasting Association, Ben T. Wilson, president, and operates on 1120 kilocycles with 100 watts, daytime.

"The licenses have 15 days in which to ask hearing, in which case the revocation order will be stayed pending the outcome of the hearing."

FEDERAL LEGISLATION

H. R. 8263 (Mr. O'Brien, N. Y.) TO AMEND THE COPYRIGHT ACT—Provides that the damages for infringement of copyright of musical compositions played in hotels or restaurants when no entrance fee is charged, or cover or its equivalent charge made, shall not exceed $10 for each performance, unless greater damages are shown. Referred to the Committee on Patents.

STATE LEGISLATION

CALIFORNIA:
A 71-X (Meehan) LOTTERIES—Creates state managed lotteries.

NEW YORK:
A 1108 (Goldstein) LIBEL AND SLANDER—DEFINITION—Includes in definition of libel, malicious publications which expose persons to hatred, contempt or ridicule by reason of race, color, religion or manner of worship or causes them to be shunned or avoided; and defines as slander any oral announcement effecting or tending to effect same result. Referred to Codes Committee.

February 9, 1940
a local organization, or by Station WHA, a regional station, would be entered in classification 2. The exhibit is open to any organization or individual upon payment of an entry fee of one dollar for each program entered.

CLASSES OF PROGRAMS
In general, programs submitted must be those whose primary purpose is to educate rather than to entertain. Awards will be made for the best of each of eight different program types:

For General Use by Adults:
a. Lecture, talk, speech.
h. Demonstration or participation program.
d. Dialog, round-table conversation, interview, debate, question and answer.
d. All forms of dramatization.

For General Use by Children:
e. Any type of out-of-school children's program.

For Use in School:
f. By primary children (approximately Grades I-III).
g. By elementary children (approximately Grades IV-VI).
h. By junior and/or senior high-school pupils (approximately Grades VII-XII).

Each program entered in the exhibit must be entered under one of these program types, but the jury may, if it sees fit, change the class in which a program is entered.

SINGLE PROGRAM IN A SERIES
Contentants may enter as many series as are desired in the exhibit, but only a single program may be entered from any one series. This restriction has been made necessary by the large number of programs which have been entered in the three previous exhibitions. In order to keep the number of entries within the limitations of the time of the judges, only one program may be entered from any series. Exhibitors, therefore, will need to make their own selection of the program in any series which has greatest merit.

ENTRY BLANKS
The contestants who plan to enter recordings should request additional entry blanks by writing at once to I. Keith Tyler, Ohio State University. The contestants will have until March 15, 1940, for selecting and recording the programs which are to be entered in the exhibition.

EXHIBIT FEE
An exhibit fee of one dollar for each program is charged to cover the costs of the exhibition. A check or money order for the total fee for the programs entered should be sent, with the entry blanks for the programs, to I. Keith Tyler, Ohio State University, Columbus, Ohio, at the time that the recordings are shipped. Make checks payable to I. Keith Tyler, Secretary.

JUDGES' REPORTS
For each program entered, a report of the preliminary judges will be returned. This new feature enables each contestant to benefit from the exhibition by obtaining impartial evaluations of educational content and radio quality. These reports will be sent out at the close of the Institute.

ENTRY CLOSING DATE
All records must be shipped prepaid to the Institute for Education by Radio, Ohio State University, Columbus, Ohio, to arrive on or before March 15, 1940. All programs entered must have been broadcast later than March 15, 1939, and previous to March 15, 1940.

PHYSICAL SPECIFICATIONS FOR RECORDS
All programs must be recorded in entirety for the full time the program is broadcast. The programs need not be recorded directly from the air, however, but may be specially staged for recording purposes. Any type of recording will be acceptable, and the jury will endeavor to consider only the character of the program and not the quality of the recording. Records must be on disks laterally cut at 33 RPM or 78 RPM.

AWARDS AND HONORABLE MENTIONS
The Institute for Education by Radio, upon recommendation from the jury, will make “First Awards” and “Honorable Mentions” on the basis of the eight classes of programs in each of the two major classifications. In general, this provides for sixteen “First Awards” and sixteen “Honorable Mentions.” However, the judges may, at their discretion, withhold awards and honorable mentions in those classes in which no programs appear worthy of this recognition. Similarly they may, in unusual circumstances, give more than one “First Award” or “Honorable Mention” in a single class when the programs entered seem to justify such recognition. Programs and organizations receiving awards or honorable mentions will be given special notice in Education on the Air, the proceedings of the Institute for Education by Radio, which will be published by the Ohio State University. The awards will be announced at the 1940 meeting of the Institute, and the programs given awards will be played in special sessions during the Institute.

JUDGING COMMITTEE
The final jury on awards will consist of prominent persons selected because of their ability to judge program production, educational objectives, and audience interest.

COMMUNICATIONS
Address all communications regarding the Fourth American Exhibition of Recordings of Educational Radio Programs to I. Keith Tyler, Institute for Education by Radio, Ohio State University, Columbus, Ohio.

“EDUCATION ON THE AIR”
The proceedings of the ten previous Institutes for Education by Radio—1935, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, and 1939 may be obtained from the Ohio State University Bookstore at $3 a volume. Special reduced prices are made when yearbooks of more than one year are purchased in sets.

BUREAU'S FOURTH TRADE STUDY COVERS FURNITURE STORES
The NAB Bureau of Radio Advertising has released to all members Vol. 1, No. 4 of "Results from Radio," its series of success stories covering various fields of local advertising.

The new study is on the subject of furniture stores, outlining the case history of Breslaw Brothers, Schenevadty, N. Y., who have used radio for ten years with outstanding success. Mr. Jay Breslaw, president of the New York furniture chain, states, "Yes, radio sold furniture. Above all other factors, it is responsible for our tremendous growth."

Extra copies of the "Results from Radio" folders are available on request to the Bureau of Radio Advertising. Previous releases covered department stores, laundries, and miscellaneous.

Member stations who have not yet ordered their supply of the Bureau studies are urged to do so at once. Order forms for this purpose accompany the sample copy of the No. 4 trade study. NAB is anxious to have all members partake of the benefits of the Bureau's promotion efforts.
COMING CONVENTIONS OF INTEREST TO MEMBER STATIONS

July 7-10. Annual convention, Pacific Coast Advertising Clubs Association, Vancouver, B. C.

Insofar as possible, the Bureau of Radio advertising plans to attend or have representation at the above conventions, and in every case to report to the members any developments affecting the broadcasting industry.

ADVERTISING NOT TO BE SINGLED OUT IN FTC SURVEY

Federal Trade Commission in a pending appropriation bill has been granted $88,000 with which to make a survey of methods and costs of distribution in industry. There appeared to be some misunderstanding in connection with this survey with special emphasis on the amount of money to be expended by the Commission for its survey of the advertising appropriation used by industry in its methods and costs of distribution.

In this connection the Commission has issued the following statement:

"From inquiries to the Commission and articles appearing in certain periodicals, there appears to be misconception concerning the character and scope of the Commission’s proposed inquiry into the "Methods and Costs of Distribution."

"The purpose of the inquiry is to ascertain and assemble pertinent facts concerning the whole subject of distribution in a number of industries. This will involve examining different methods of distribution and, necessarily, the more important items of costs. Some industries will be included in which expenditures for advertising no doubt, will be unsubstantial; in others the advertising costs may be substantial. There is no purpose or intention of singling out advertising any more than any other item of the cost of distribution and more emphasis will be placed on advertising costs in this inquiry than was done in such recent inquiries as Agricultural Income, Farm Implements and Motor Vehicles."

"In the numerous general inquiries conducted by the Commission and in the many thousands of cases in which it has made investigations and taken corrective action the Commission has never made any declaration or taken any position against advertising as such. Furthermore, no such action is contemplated. Its action with respect to this subject has been confined to the elimination of false and misleading advertising under the Federal Trade Commission Act, and of unlawful advertising allowances under the Robinson-Patman Act. Even under the latter act no such action is contemplated."

Applications Granted

Governor E. D. Rivers, Valdosta, Ga.—Granted construction permit to erect a new station to operate on 1420 kc., 100 watts night, 250 watts day, unlimited time. Exact transmitter and studio sites and type of antenna to be determined by Commission's approval.

WMCA—Knickerbocker Broadcasting Co., Inc., New York City.—Granted construction permit to move transmitter site locally 14 miles (from College Point Causeway, Flushing, N. Y., to Belleville Turnpike, Kearney, N. J.), install new equipment, make changes in DA pattern, and increase day power from 1 KW to 5 KW on 570 kc., employing DA day and nighttime.

WKNY—Kingston Broadcasting Corp., Ulster Township, N. Y.—Granted construction permit to make changes in equipment, increase power from 100 to 250 watts, and time of operation from daytime to unlimited, on 1500 kc.

WIXA—General Electric Co., Bridgeport, Conn.—Granted reinstatement of construction permit which expired September 16, 1939, requesting reduction in aural power of television station to 100 watts and in visual power to 175 watts.

Licenses Revoked

KSAM—Sam Houston Broadcasting Assn., Huntsville, Texas; KAND—Navarro Broadcasting Assn., Corsicana, Texas; KRBA—Red Lands Broadcasting Association, Luikin, Texas; KTBC—State Capitol Broadcasting Association, Inc., Austin, Texas; KNET—Palestine Broadcasting Association, Palestine, Texas.—Issued orders for revocation of licenses of five Texas stations, effective February 24, 1940, because of applicants' failure to make full disclosure to the Commission concerning ownership, management, financing and control of stations. Applicants may request hearing within 15 days, in which case revocation orders will be stayed pending outcome of hearing.

Miscellaneous

W2XWF—William C. H. Finch, New York, N. Y.—Granted extension of special temporary authority to change from A3 emission to special emission frequency modulation 75 kc., swing to make comparative tests on amplitude modulation, for the period February 4, 1940, to not later than March 4, 1940, results of test to be presented at high frequency hearing.

WARM—Union Broadcasting Co., Scranton, Pa.—Granted special temporary authority to operate a 100-watt portable transmitter on 1370 kc., during daylight hours in the vicinity of Scranton, Pa., for a period not to exceed 7 days, in order to conduct site survey in connection with construction permit.

FUTURE HEARINGS

During the week the Commission has announced the following tentative date for oral arguments. It is subject to change.

March 7

Oral Argument Before the Commission

Report No. B-75:

NEW—William C. Barnes and Jonas Weiland, tr/ as Martinsville Broadcasting Co., Martinsville, Va.—C. P., 1420 kc., 100 watts, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

The following hearing is scheduled before the Commission in a broadcast case during the week beginning Monday, February 12. It is subject to change.

February 9, 1940

4022
WAIP—The WBAL Broadcasting Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with station KTHS on 1060 kc., from 9 p.m. to 9:30 p.m., EST, on February 19, 1940, in order to broadcast program in connection with celebration of the fiftieth anniversary of the founding of the patent system in the United States.

WMAN—Richland, Inc., Mansfield, Ohio.—Granted special temporary authority to operate with power of 250 watts from 6 p.m. to 9:45 p.m., EST, to midnight on February 6, 1940, in order to broadcast primary election results.

WJMC—Walter H. McGenty, Rice Lake, Wis.—Granted special temporary authority to operate from 7:45 p.m. to 9:45 p.m., CST, on February 9 and 13, 1940, in order to broadcast basketball games only.

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate from 6:45 p.m. to 8:15 p.m., CST, on February 11, 18, 25, and March 3, 1940, in order to broadcast church services.

WXIOJ—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to test the transmitting equipment of station WXIOJ, authorized by modification of construction permit on frequency 43000 kc., with power in the range of 2000 and 50000 watts, for the period February 14, 1940, to not later than March 14, 1940, in order to make adjustments on equipment installed and for tuning and to make adjustments of the antenna elements which are now assumed for erection of a booster.

WAVE—Vee Bee Corp., Portable-Mobile (area of Portsmouth, Ohio).—Granted license to cover construction permit for new relay broadcast station to operate on frequencies 1622, 2058, and 2570 kc., power 25 watts.

KQV—KQV Broadcasting Co., Pittsburgh, Pa.—Granted authority to determine operating power by direct measurement of antenna input.

KBND—The Bend Bulletin, Bend, Ore.—Granted authority to determine operating power by direct measurement of antenna input.

KMPG—KMPG, The Station of the Stars, Inc., Beverly Hills, Calif.—Granted license to cover construction permit as modified for increase in power from 500 watts to 1 KW night, 5 KW LS, and hours of operation from limited to unlimited; install new transmitter and antenna; and move of transmitter (use former transmitter of KECA, also antenna), and move to site formerly licensed to KECA. Also granted authority to determine operating power by direct measurement of antenna input.

KXA—American Radio Tel. Co., Seattle, Wash.—Granted modification of construction permit authorizing increase in power from 30 watts night, 100 watts day and night, move transmitter, make changes in equipment, and extend completion date to May 20, 1940.

WREC—WREC Broadcasting Service, Memphis, Tenn.—Granted license to cover construction permit to install auxiliary transmitter at present location, using 1 KW power, directional antenna day and night, for emergency use only (500 watts). 

WICA—WICA, Inc., Ashtabula, Ohio.—Granted license to cover construction permit as modified for installation of new transmitting equipment and increase in power from 250 watts to 500 watts on 940 kc., daytime only.

KGNF—Great Plains Broadcasting Co., North Platte, Nebr.—Granted construction permit to make changes in equipment.

WEXF—Westexa Broadcasting Co., Portable-Mobile (area of Peoria, Ill.)—Granted construction permit to make changes in equipment in relay broadcast station, change frequencies to 1622, 2058, 2570, and 3790 kc.; 50 watts.

WXIX—Westinghouse Electric & Mfg. Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with high frequency experimental station WXIX on 42100 kc., with special (F-M) emission, from 8 a.m. to 5 p.m., EST, daily for the period February 6, 1940, to not later than February 9, 1940, for the purpose of checking adjacent channel operation.

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Granted authority to determine operating power by direct measurement of antenna input.

WCAO & (Aux.)—Monumental Radio Co., Baltimore, Md.—Granted authority to determine operating power by direct measurement of antenna input.

KONO—Mission Broadcasting Co., San Antonio, Tex.—Granted authority to determine operating power by direct measurement of antenna input.

KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Granted license to cover construction permit authorizing increase in day power from 250 watts to 1 KW, on 100 kc., effective February 9, 1940.

WINS—Heard Radio, Inc., New York, N. Y.— Granted special temporary authority to operate from 7:45 p.m., EST, to midnight on February 3, 1940, in order to broadcast the Melrose Track Meet to be held at Madison Square Garden.

KVR—Vancouver Radio Corp., Vancouver, Wash.—Granted special temporary authority to operate simultaneously with Station KKLX from 7:30 p.m., PST, to the conclusion of basketball games on February 17, 23, March 1, 1940, in order to broadcast basketball games only.

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted extension of special temporary authority to operate from 9:00 a.m. to 10:00 a.m., EST, Monday, Tuesday, Wednesday, Thursday, Friday, and Sunday mornings, for the period beginning February 18, 1940, and ending not later than March 18, 1940, or until the Saginaw Broadcasting Company is in a position to use said time, in order to broadcast special non-commercial educational programs.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Granted order to take depositions in re application for renewal of license scheduled to be heard on March 5, 1940.

WTAW—Agricultural & Mechanical College of Texas, College Station, Tex.—Granted construction permit to install new antenna and move transmitter from E. Z. Bldg., College Station, to College Station, Tex.

W9XAZ—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Granted modification of construction permit as modified to make changes in equipment of high frequency broadcast station.

KNEL—G. L. Burns, Brady, Texas.—Granted authority to determine operating power by direct measurement of antenna input.

WCSC—S. C. Broadcasting Co., Inc., Charleston, S. C.—Granted authority to determine operating power by direct measurement of antenna input.

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fl.—Granted authority to determine operating power by direct measurement of antenna input.

KWEW—W. E. Whitmore, Hobbs, N. Mex.—Granted authority to determine operating power by direct measurement of antenna input.

KVFB—Northwest Broadcasting Co., Ft. Dodge, Iowa.—Granted license to cover construction permit and modifications thereof authorizing a new station to operate on 1370 kc., 100 watts night, 250 watts day, specified hours. Also granted authority to determine operating power by direct measurement of antenna input.

KVC—Golden Empire Broadcasting Co., Redding, Cal.—Granted license to cover construction permit for new equipment, increase in power from 100 to 250 watts, unlimited time, on 1200 kc. Also granted authority to determine operating power by direct measurement of antenna input.

WFNC—Cumberland Broadcasting Co., Fayetteville, N. C.—Granted modification of construction permit covering new station, authorizing extension of completion date to May 20, 1940.

WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Granted modification of construction permit for new broadcast station, for approval of antenna, transmitter and studio sites at 42 S. Market St., Poughkeepsie, and change in type of transmitting equipment.

WMJM—Cordele Dispatch Publishing Co., Inc., Cordele, Ga.—Granted modification of construction permit for new broadcast station, for approval of antenna, changes in equipment, and studio and transmitter sites.

WSUI—State University of Iowa, Iowa City, Iowa.—Retired to the closed files the construction permit authorizing installation of new transmitter and antenna, and move transmitter, granted May 1, 1939, since station was granted increase in power, move of studio and transmitter etc., on November 8, 1939.
operate on 880 kc., with 500 watts, unlimited time, which was denied by the Commission on November 30, 1939.

APPLICATIONS FILED AT FCC

590 Kilocycles

WEEI—Columbia Broadcasting System, Inc., Boston, Mass.—License to cover construction permit (B1-MP-358) for increase in power from 1 KW, 5 KW day and night, and use present daytime directional antenna patterns for day and night.

620 Kilocycles

KUSD—University of South Dakota, Vermillion, S. Dak.—Construction permit to install new transmitter, antenna for night use, increase power from 1 KW, 5 KW day to 5 KW day and night.

650 Kilocycles

WSPA—Virgil V. Evans, tr/ as Voice of South Carolina, Spartanburg, S. C.—Modification of construction permit (B3-P-2171) as modified for a new station; move studio from 1900 Atlantic Ave. to Convention Hall, Georgia Ave. and Boardwalk, Atlantic City, N. J.

WMOB—S. B. Quigley, Mobile, Ala.—Modification of license to cover construction permit (B1-P-1611) as modified for a new station; move studio from 1900 Atlantic Ave. to Convention Hall, Georgia Ave. and Boardwalk, Atlantic City, N. J.

1210 Kilocycles

KDON—Monterey Peninsula Broadcasting Co., Monterey, Calif.—Construction permit to install new transmitter, vertical antenna; increase power from 100 watts to 500 watts, 1 KW day; change frequency from 1210 kc. to 1410 kc.; and move transmitter. Amended to make changes in antenna and give transmitter site as to be determined, near Monterey, Calif.

1230 Kilocycles

KALE—KALE, Inc., Portland, Ore.—Construction permit to install directional antenna for night use, and increase power from 1 KW, 5 KW day to 5 KW day and night.

1310 Kilocycles

WFIG—J. Samuel Brody, Sumter, S. C.—Modification of construction permit (B3-P-2171) as modified for a new station, requesting change in type of transmitting equipment, and extend commencement date 30 days after grant and completion date 90 days thereafter.

1320 Kilocycles

KRTN—Iowa Broadcasting Co., Des Moines, Iowa.—Construction permit to install new transmitter; move transmitter from north of Des Moines, Iowa, to E. 36th and Granger Sts., Des Moines, Iowa; install new directional antenna for night use; and increase power from 1 KW, 5 KW day, to 5 KW day and night.

1340 Kilocycles

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Construction permit to install new transmitter and increase power from 500 watts, 1 KW day, to 5 KW day and night (directional antenna night).

1350 Kilocycles

WAWZ—Pillar of Fire, Zarepath, N. J.—Construction permit to make changes in transmitting equipment.

1370 Kilocycles

WORD—Spartanburg Advertising Co., Spartanburg, S. C.—Modification of construction permit (B1-P-2261) for a new station; requesting change in frequency from 1370 kc. to 1380 kc.; increase in power from 100 watts, 250 watts day, to 1 KW day and night; install new transmitter, and directional antenna for night use; move studio from 178 West Main St., Spartanburg, S. C., to site to be determined, Spartanburg, S. C., and transmitter site from 2½ miles north-northwest of center of Spartanburg, S. C., to U. S. Highway 176, 1.3 miles north of city limits, near Spartanburg, S. C.; extend commencement date 120 days after grant and completion date 180 days thereafter.

February 9, 1940
WHUB—M. L. Medley, Cookeville, Tenn.—Voluntary assignment of construction permit (B3-P-2298) as modified (B3-MP-829) from M. L. Medley to WHUB, Inc.

1380 Kilocycles

WNBC—State Broadcasting Corporation. New Britain, Conn.—Construction permit to make changes in equipment; increase power from 1 KW to 1 KW, 5 KW day, using directional antenna for both day and night.

WKKH—WKBH, Inc., La Crosse, Wis.—Construction permit to move transmitter from R.F.D. No. 1, La Crosse, Wis., to Highway No. 53, Shelby Twp., Wis.; install new transmitter; install directional antenna for night use; and increase power from 1 to 5 KW.

1420 Kilocycles

WMFJ—W. Wright Esch, Daytona Beach, Fla.—License to cover construction permit (B1-PRE-334) to change equipment and increase power to 2 watts.

NEW—The Ohio Broadcasting Co., Canton, Ohio.—Modification of construction permit (B2-PRE-329) as modified (B2-MP-335) for new high frequency broadcast station to be located at 43000 kc., 1 KW power, unlimited time, special emission, to be located in New York, N. Y., exact site to be determined.

NEW—Greater New York Broadcasting Corp., New York, N. Y.—Construction permit for a new high frequency broadcast station to be located at 605 Jefferson Ave., Toledo, Ohio, to be operated in 43000 kc., 250 watts, unlimited time, special emission.

NEW—Jerome Raymond Popkin-Clarkman, Philadelphia, Penna.—Construction permit for a new high frequency broadcast station to be located in Philadelphia, Penna. (exact site to be determined), to be operated on 43000 kc., 1 KW, unlimited time, special emission.

NEW—Isle of Dreams Broadcasting Corp., Miami, Fla.—Construction permit for a new relay broadcasting station to be operated on 1606, 2022, 2102, 2758 kc., 2 watts, A-3 emission, unlimited time, located in area of Miami, Florida.

NEW—Isle of Dreams Broadcasting Corp., Miami, Fla.—License to cover above.

WEHK—Columbia Broadcasting System, Inc., Portable-Mobile.—License to cover construction permit (B1-PRE-334) to change equipment and increase power to 2 watts.

NEW—Marcus Loew Booking Agency, New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1 KW power, unlimited time, special emission, to be located in New York, N. Y., exact site to be determined.

NEW—Tulare-Kings Counties Radio Associates, Chas. A. Whitmore, President, area of Visalia, Calif.—Construction permit for a new high frequency broadcast station on 1622, 2030, 2150 and 2790 kc., 25 watts power, unlimited time, A-3 emission, Portable-Mobile, located in area of Visalia, Calif.

NEW—The Evening News Association, Detroit, Mich.—Construction permit for a new high frequency broadcast station to be located at 645-647 Griswold St., Detroit, Michigan, to be operated on 43000 kc., 1 KW, unlimited time, special emission.

NEW—American Broadcasting Corporation of Kentucky, Lexington, Ky.—Construction permit for a new high frequency broadcast station to be located at Main and Esplanade Sts., Walton Blvd., Lexington, Ky., to be operated on 42900 kc., 1 KW power, unlimited time, special emission.

NEW—WTBJ, Inc., Utica, N. Y.—Construction permit for a new relay broadcast station to be operated on 1622, 2030, 2150 and 2790 kc., 2 watts, A-3 emission, to be located in area of Utica, N. Y., exact site to be determined.

NEW—The Ohio Broadcasting Co., Des Moines, Iowa.—Construction permit to install new transmitter; move transmitter from north of Des Moines, Iowa, to E. 36th St. and Granger St., Des Moines, Iowa; install new directional antenna for night use; and increase power from 1 KW, 5 KW day, to 5 KW day and night.

KROD—Dorrance D. Roderick, El Paso, Tex.—License to install directional antenna for night use; and increase power from 1 KW, 5 KW day, to 5 KW day and night.

1550 Kilocycles

Whadda Products Company, 4618 Euclid Ave., Cleveland, and John W. and Nellie C. Chapman, individually and as officers of the corporation, engaged in the sale and distribution of medicinal preparations including two formulae designated "N.A.R. Tablets" and "Faid," otherwise known as "Daintee," have been advertised in newspapers and periodicals as a remedy for rheumatism, neuritis or arthritis, and does not possess temporary relief.

The complaint charges that "N.A.R. Tablets" is not a cure or remedy for rheumatism, neuritis or arthritis, and "Faid," otherwise known as "Daintee," recommended as a treatment for obesity, have been advertised in newspapers and periodicals as being safe and effective remedies for the ailments designated.

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Chapman Health Products Company, 4618 Euclid Ave., Cleveland, and John W. and Nellie C. Chapman, individually and as officers of the corporation, engaged in the sale and distribution of medicinal preparations including two formulae designated "N.A.R. Tablets" and "Faid," otherwise known as "Daintee," are charged, in a complaint with misrepresentations. The preparation designated "N.A.R. Tablets," recommended as a treatment for rheumatism, neuritis and arthritis, and "Faid," otherwise known as "Daintee," recommended as a treatment for obesity, have been advertised in newspapers and periodicals as being safe and effective remedies for the ailments designated.

The complaint charges that "N.A.R. Tablets" is not a cure or remedy for rheumatism, neuritis or arthritis, and does not possess any therapeutic value in the treatment of these ailments except so far as the analgesic properties of the preparation may afford temporary relief.

"Faid," otherwise known as "Daintee," the complaint continues, is represented as a competent, safe and scientific treatment for
obesity, and that its use will have no ill effect upon the human body.

The United States District Court for the Northern District of Ohio last month enjoined The Chapman Health Products Company, and John W. and Nellie C. Chapman individually and as a corporation, from further dissemination of false advertisements concerning “Faid,” other wise known as “Daintee.” The Commission’s bill of complaint alleged that the preparation is composed of desiccated thyroid, sodium bicarbonate, powdered rhubarb, phytolacca berries, berberine hydrochloride and aconyptol. Use of this preparation, the bill of complaint charged, might result in injury to the heart muscle and other serious and irreparable injury to health. The defendants waived hearing and consented to the decree being entered forthwith. The decree was granted upon the filing of a complaint charging defendants with violation of the Federal Trade Commission Act under the regular procedure of the Federal Trade Commission.

Injunctive action of the Commission was taken under authority of the Federal Trade Commission Act, as amended by the Wheeler- Lea Act, which provides such relief in cases involving an advertised drug which may be injurious to health. (4004)

**Distillers Products Corporation of Kentucky, Inc.**, with its principal office and place of business at Shively, Ky., is charged in a complaint with misrepresentation.

The complaint alleges that by use of the word “Distillers” in its corporate name, which appears on its labels, stationery, invoices and in various other ways, the plaintiff represents to the public that the respondent is a distiller as defined by Section 3247 of the Revised Statutes regulating internal revenue, nor as commonly understood by the public or the liquor industry. The respondent does not own, operate or control a place where alcoholic beverages are manufactured by a process of original and continuous distillation whereby alcohol, purchased but not produced by the respondent, is distilled over juniper berries and other aromatics. Such rectification the complaint continues, does not make or constitute the respondent a distiller as defined by Section 3247 of the revised statutes regulating internal revenue, nor as commonly understood by the public or the liquor industry. The respondent does not own, operate or control a place where alcoholic beverages are manufactured by a process of original and continuous distillation from mash, wort or wash, through continuous closed pipes or vessels until the manufacture is complete.

The complaint charges that the respondent has upon its premises a still which it uses in the production of gin by a process of rectification whereby alcohol, purchased but not produced by the respondent, is distilled over juniper berries and other aromatics. Such rectification the complaint continues, does not make or constitute the respondent a distiller as defined by Section 3247 of the revised statutes regulating internal revenue, nor as commonly understood by the public or the liquor industry. The respondent does not own, operate or control a place where alcoholic beverages are manufactured by a process of original and continuous distillation from mash, wort or wash. (4010)

**Erwin Feather Quilt Company—Herbert S. and Mabel T. Erwin**, individually and trading as Erwin Feather Quilt Company, 1598 East Livingston Ave., Columbus, Ohio, manufacturers and distributors of quilts, comforters, bedspreads and like products, are charged, in a complaint with misrepresentation.

In advertising folders, pamphlets, letters, and other printed matter circulated throughout the United States, the complaint charges, the respondents have solicited orders for their products, representing, among other things: “Learn this card at once for our SPECIAL OFFER FOR THIS WEEK ONLY.” and “Mail this card today for complete information on this outstanding Summer Purchase Plan. One week only is the limit we must place on our special offer * * * *.”

Upon inquiry received from prospective purchasers procured through advertisements, the complaint continues, prices were quoted for the products which were represented to be reduced prices or special prices limited as to time and one-half the usual, customary and regular selling prices.

The complaint charges that these representations are deceptive and misleading, and that the respondents’ products never had a retail sales prices greater than those quoted, and that the prices at which the products are sold are the regular, ordinary and customary sales prices therefor, are not one-half the usual price, and are not reduced or special prices.

Use by the respondents of these false and misleading statements, the complaint alleges, constitute unfair and deceptive acts and practices within the intent and meaning of the Federal Trade Commission Act. (4011)

**Indestro Manufacturing Corporation**—A complaint has been issued charged Indestro Manufacturing Corporation, 2649 North Kildare Ave., Chicago, manufacturers and distributors of automobile tools and wrenches, with misrepresentation.

The complaint alleges that the respondent issues and distributes among prospective purchasers catalogs, price lists and other advertising material. Among products so advertised are certain wrenches which are represented and described as being manufactured from “Forged Alloy Steel,” “Drop Forged Alloy Steel,” “Special Alloy Steel,” and “Carbon Alloy Steel.” The respondent also causes such descriptive terms to be stamped or embossed upon the wrenches.

The term “Alloy Steel,” the complaint continues, is understood by the steel industry, the trade, and the purchasing public as denoting carbon steel to which have been added certain other elements such as nickel, tungsten, molybdenum, vanadium and chromium. Such elements are added to give the finished product certain additional properties and attributes, such as hardness and toughness.

The complaint alleges that none of these elements or similar elements is added to the steel by the respondent, and that products made from such steel cannot properly be represented as having been manufactured from alloy steel. (4006)

**Monite Waterproof Glue Company.** Minneapolis, engaged in the manufacture and distribution of a glue product known as Monite Waterproof Glue, is charged in a complaint with misrepresentation.

In periodicals and trade journals and other advertising material, and on packages and containers in which the product is offered for sale, the respondent represented the product to be a distiller of the products it offers for sale. The word “Distillers,” the complaint continues, when used in connection with the liquor industry and its products, has a definite significance and meaning to the minds of members of the industry and the purchasing public, implying the manufacture of alcoholic beverages by an original and continuous distillation process from mash, wort or wash, through continuous closed pipes or vessels until the manufacture is complete.

The complaint alleges that the respondent has upon its premises a still which it uses in the production of gin by a process of rectification whereby alcohol, purchased but not produced by the respondent, is distilled over juniper berries and other aromatics. Such rectification the complaint continues, does not make or constitute the respondent a distiller as defined by Section 3247 of the revised statutes regulating internal revenue, nor as commonly understood by the public or the liquor industry. The respondent does not own, operate or control a place where alcoholic beverages are manufactured by a process of original and continuous distillation from mash, wort or wash. (4013)

**National Folio Service—George W. Hayling, trading as National Folio Service, 1071 West 30th St., Los Angeles, is charged, in a complaint with misrepresentation in the sale and distribution of books and pamphlets containing so-called treatises purporting to disclose and portray unusual business opportunities.**

In advertisements in newspapers, periodicals and by means of letters and circulars, the respondent has represented, among other things: “Our Treatise No. 2, a workable ‘business plan’ that tells you how the originator earned a remarkable wage ‘every month’ the year round, no slack seasons. And—from a heretofore ‘hidden source’ that will surprise, fascinate and Delight you—there are few business worries—no long waits for money—no long hours of unpleasant working—no similar competition—no office or store overhead—and no equipment needed in such a service of this kind—a service needed badly in this modern age.”

Through these representations and others of similar import, the complaint alleges that the respondent represents that his so-called treatises present business opportunities which possess exceptional merit and which offer prospects of high earnings and profits, with the expenditure of little or no effort; that the operation of such businesses involves no peddling or canvassing; that such plans are original, and in many cases include valuable formulas which have been acquired by the respondent at great expense and which are owned exclusively by the respondent.

The complaint charges that these representations are false and misleading; that many of the plans set forth in the treatises are without substantial merit; that many of them are neither original nor new, nor do they include formulas which have any substantial value. The earnings and profits which the respondent represents may be obtained from operation of the plans are far in excess of any amounts which have been or may be earned through them, while many of them do require peddling and house-to-house canvassing. (4005)

**Northwest Film Ad Service, Inc.**, Portland, Ore., and Frank D. Atkins, an individual, distributors of advertising films and moving picture trailers with unfair methods of competition and unfair and deceptive acts and practices.
Frank D. Atkins is president of the corporation, and formulates and directs its policies.

For the purpose of inducing the purchase of their advertising films and trailers, the complaint charges, the respondents have made false and misleading statements and representations which are that they are producers as well as distributors of advertising films and trailers; that their business is nation-wide in its scope and that they maintain offices in numerous cities throughout the United States; that they have contacted manufacturers or distributors of various products sold by prospectus; that the products have been approved and accepted and are recommended by professional users; that the products possess antiseptic ingredients of a low toxicity, they are not competent or effective antiseptics or germicides; possess substantial therapeutic agents which heal and soothe irritated tissues and membranes, and that the advertising films supplied by them will be of the kind and quality designated by the purchaser.

The respondents are also alleged to have misrepresented that certain of their competitors are out of business.

The complaint charges that the respondents' business is not nation-wide in scope, but is confined largely to Oregon, Washington, and California, that they have no offices other than their office in Portland, Oreg., and that other representations made by them are false and misleading. (4007)

Paramount Institute—D. Victor Wallace, trading as Paramount Institute, 1095 Market St., San Francisco, selling and distributing courses of instruction for civil service examinations, is charged in a complaint with misrepresentation. Advertising folders and pamphlets distributed throughout the country contain the complaint alleges, misleading representations concerning the respondent's course of study and also concerning the Civil Service of the Government of the United States. Among these are assertions that examinations for Civil Service are held at frequent intervals in San Francisco and that the holders are made from amber, non-burning bakelite and other materials suitable for use in cigarette holders, and are of superior quality. In truth, the complaint continues, the holders are composed of material which is unfit by composition to be used in a cigarette holder and which disintegrates readily when exposed to heat, and conveys to smoke coming in contact with it an unpleasant taste or flavor.

The respondent further, the complaint charges, has distributed among purchasers in various states, circulars bearing the phrase: "Pioneer Merchandise Company, Inc., manufacturers and importers," and containing such statements as "When buying from us you buy from the manufacturer." It is alleged that the respondent does not make or manufacture the holders or other products distributed by it. (4012)

Seaboard Paint & Varnish Company—Samuel Swimmer, doing business as Seaboard Paint and Varnish Company, 275 Russell St., Brooklyn, is charged, in a complaint, with misrepresentation.

The complaint alleges that the paint offered for sale and sold by the respondent is commonly known as "spray booth off fall" paint, which is paint that is lost in the painting of various products with spray guns. This paint is reconditioned by the respondent and sold as an outside paint.

In the course of his business the respondent is alleged to have mailed to purchasers located in various States, letters containing such representations as "In a warehouse near you we have 100 one-gallon cans, packed In cartons, of Our Outside White Paint, guaranteed to be clean fresh stock in perfect condition which we will sacrifice for $1.55 per gallon, delivered, freight prepaid; original price was $2.65 per gallon. This material is superior in quality and composition to the most expensive made well known brands of Outside White and is far superior to White Lead as to whiteness and durability." These representations, the complaint continues, are false and misleading, as in truth the usual and customary price of the paint referred to in the letters is not $2.65 per gallon but $1.55, and the respondent does not have 100 gallons of paint or any other quantity at a warehouse in the vicinity of the recipients of the letters, as all his paint is warehoused at his place of business in New York, from which all shipments are made.

The complaint charges that the paint was not manufactured for use on outside or exposed surfaces, but for use in the painting of ice boxes and other articles of merchandise not exposed to the weather.

The respondent's paint is not of clean fresh stock, the complaint continues, but is made from paint lost or wasted in the painting of various products with spray guns, and does not "last practically a life time" or any other such extended period of time. (4014)

STIPULATIONS

During the week the Commission entered into the following stipulations:

Franklin Knitting Mills, Inc., New York, in connection with the distribution of its neckties, agrees to cease and desist from selling or offering for sale any silk or silk product which contains any metallic weighting, without full and nondisclosure of the presence of such metallic weighting, together with the proportion or percentage thereof, made in the labels, tags or brands attached to the merchandise, in all advertising matter, sales promotional descriptions or representations, however disseminated or published. (2662)

Gruen Watch Company, Cincinnati, in connection with the advertisement, sale and distribution of its "Gruen Curves" wrist watches, agrees to cease and desist from use of any statement, or...
pictorial or other representation, the effect of which is to convey
the belief to purchasers that the principle involved in the “Gruen
Curvex” wrist watches is the only way ever found to put a full-
sized movement in curved wrist watches, or that the Gruen method
of construction is the only way to make the movement big enough
to give true pocket-watch accuracy in a wrist watch. (2664)

Lo-Well Company—James R. Kaye, trading as Lo-Well Com-
pany, New York, agrees to discontinue use in advertising matter
of representations that the pen points of his fountain pens are
tipped with iridium; of the phrases “Fine Quality” or “First
Quality” or any other words or phrases descriptive of his pens or
pencils so as to imply that the products are of a quality higher
than is actually the fact, and from pictorial or other representa-
tions of products which do not accurately and definitely depict
the products offered for sale or distributed as premiums, or the
effect of which representations may imply that the products are
of a value greater than represented. (2663)

CEASE AND DESIST ORDERS

The following cease and desist orders have been issued
during the past week:

Charles V. Herron Company—An order has been issued pro-
hibiting an Indiana buyer and two Michigan distributors from
violating the brokerage paragraph of the Robinson-Patman Act
in the interstate sale of beans. The respondents are Charles V.
Herron, trading as Charles V. Herron Company, 101 North Gov-
ernor St., Evansville, Ind., Ryon Grain Company, 428 Mutual
Pearl St., Jackson, Mich.

Commission findings are that the respondent Herron purchased
beans outright and for his own account from the two Michigan
concerns and received from them an allowance on each bag of
beans in lieu of brokerage.

The respondents admitted all the other allegations of the com-
plaint but denied the allegation that no services were rendered
by the respondent Herron to the seller companies in connection
with these transactions. The Commission on the basis of the facts
as found, concluded as a matter of law that no services had been
rendered by Herron to the two respondent companies in connec-
tion with his purchases from them. The Commission concluded
that Herron, by accepting, and the two respondent companies, by
granting, the allowances, had violated the act.

In connection with its conclusions the Commission refers to three
cases in which its orders to cease and desist have been affirmed
by the United States Circuit Courts of Appeals under the broker-
age paragraph of the Robinson-Patman Act. These were the
cases of the Commission against Biddle Purchasing Company,
Oliver Brothers and The Great Atlantic & Pacific Tea Co., all of
New York.

The Commission order directs that Charles V. Herron, trading
as Charles V. Herron Company or under any other name, in
connection with his purchase of beans in interstate commerce,
cease and desist from receiving or accepting from Ryon Grain
Company and McLaughlin, Ward & Co., any commission, broker-
age or other compensation or any allowance or discount in lieu
thereof upon such purchases made by him outright and for his
own account, and that the two respondent companies cease and
desist from making, granting or allowing such payments to the
respondent Herron. (3916)

McLaughlin, Ward & Company—See Charles V. Herron Com-
pany.

Ryon Grain Company—See Charles V. Herron Company.
260 Stations Join Broadcast Music

There has been much activity in Broadcast Music, Inc., during the past week. A total of 260 stations have sent in their checks and signed license agreements totaling $1,159,467.50.

At present there are 115 additional stations which indicated approval of BMI at the District meeting which have yet to forward their checks and signed agreements. In many cases, the delay is due to absence from the office of the chief executive because of illness, vacations or business trips. Our total will be raised to $1,250,000 by the arrival of these checks and license agreements which we expect shortly. The response to date has been industry-wide and we believe it should convince the remaining stations that the success of BMI is definitely assured and we urge all who have not as yet forwarded their checks and license agreements to do so immediately.

A meeting of the NAB Board of Directors will be held Monday and Tuesday, February 19-20, at which time the entire subject will be discussed. We want to include your station as a subscribing station in the report to the Directors so hope you will mail in the papers now if you have not already done so.

The office at 580 Fifth Avenue, New York City, has become a most active place. The staff is being selected. Engraved stock certificates will be mailed shortly to all stations which have sent in their checks. The signed license agreement also will be mailed in the next few days. Complete information concerning the staff, plans and various activities will be carried in an early number of the NAB BULLETIN.

The success of BMI depends to a large extent upon the support it receives from the industry. The 260 stations by subscribing for $1,159,467.50 have more than met our minimum requirements but after examining the list of stations we believe our ultimate goal of 400-odd stations subscribing $1,500,000 is easily within reach if those who have not as yet sent in their checks will do now what we know they plan to do eventually. Here's hoping we hear from those stations this week.

A complete list of stations from which checks and license agreements have been received follows.

DYERS ASSOCIATION OFFERS TRANSCRIPTION FOR LOCAL SPONSORSHIP

The Bureau of Radio Advertising is pleased to announce that the National Association of Dyers and Cleaners has prepared a syndicated radio feature which will be offered to one firm in each city or locality, for broadcast over local stations at regular rates.

The announcement sent out from the Cleaners and Dyers Headquarters stated:

“The National Association of Dyers and Cleaners has approved a series of electrically transcribed, three minute dramatized commercial spots. All you have to do is buy the time on your local radio station and the transcriptions will be mailed direct to that station. These short dramas are high-lighted incidents which could occur in business, home or social life. They move quickly to a dramatic climax in which a reliable dry cleaner’s services are needed, then the local announcer jumps in and finishes the job by driving home a commercial plug. The printed commercial copy for each broadcast (to be read by the local announcer) will be sent to the station with the transcriptions. All you have to do is insert your firm name in the blank spaces left for that purpose.

“The five shows per week and the printed commercial copy are all included in the weekly price of $10.00. This astonishingly low figure is made possible only because of syndication. To repeat: the total expense (exclusive of station time) for five shows per week is $10.00, thirteen weeks for $130.00. Think of it! Of course, you, yourself, contract for the time on your local radio station.

“In order to avoid duplication of the program on the air in any district, it is necessary to limit this privilege to one firm in a town or locality. In case duplicate orders for the program should be received from two members in the same town or locality, the Association shall accept the order which bears the earliest postmark. ACT NOW!”

Ed Kirby addressed the Dyers and Cleaners Association in their annual convention in Baltimore last month.

FREE OFFERS

The problem of “free offers” and “cost-per-inquiry” continued to plague member stations last week, though with somewhat lessened intensity. While the great majority of broadcasters are firm in their opposition to the chiselers, the problem is prolonged and even enlarged by the indifferent and occasionally open-armed attitude of certain stations toward such tactics. As a result, the entire industry suffers for the sins of the few.

Not to fight back against “free offers” and “cost-per-inquiry,” the NAB believes, is simply to encourage more parasites to try their “publicity” or “educational” ideas out on radio. The best and simplest long-run solution, in the opinion of those who have studied the problem carefully, is to take a stand, stick to it, fight for it and let the time-chislers know about it.
To experienced observers, cost-per-inquiry requests simply amount to guaranteed advertising, placing the entire burden of proof on the radio station rather than on the advertiser, his program or his commercial copy. If the station does not produce the required number of orders, even though through no fault of its own, that station is immediately branded as a poor producer by the advertiser, his agency, and who knows how many honest and legitimate prospective sponsors who may happen to hear about it. This is an angle that every broadcaster ought to consider.

What is bad for one station, is all too often bad for all. That is why the Bureau of Radio Advertising has been very definite in its denunciation of the time-chiseler. The Bureau has informed the following firms that their free time requests or percentage advertising propositions are out of order:

FREE OFFERS
Flower Industries Council, New York.
Hammond Instrument Company, Chicago.

COST-PER-INQUIRY
Rushmore Mutual Insurance Company, North Dakota.
Westheimer & Company, St. Louis.

Replying to recent letters from the Bureau of Radio Advertising, the Institute of American Meat Packers state they will soon use radio advertising, pointing out that many of their members already buy time. Spector-Goodman Agency states that "no radio station accepted the proposal to which you object" (on behalf of Winn Publishing Company) "therefore the proposition died its own natural death."

Labor

WAGE AND HOUR ACT

The broadcaster who hands over "talent charges" to his announcers must include these in calculating the announcers' regular rate of pay.

The Wage and Hour Administration gave the NAB this opinion in reply to a question.

Here is a typical case:

A station pays an announcer a salary of $37 for a 42-hour week. During this 42-hour week, this announcer reads a weekly commercial newscast. The station bills the sponsor for the time and also $5 for "talent charge." The station gives this $5 to the announcer.

The Wage and Hour Administration says that the announcer's regular hourly rate is $1 and that overtime must be paid for at the rate of $1.50 per hour.

It appears that, in this situation, the increased hourly rate can be avoided only if the sponsor or his advertising agency hires and pays the announcer directly. This would involve payment of social security taxes by the sponsor or advertising agency.

The exchange of correspondence:

NATIONAL ASSOCIATION OF BROADCASTERS
WASHINGTON, D. C.

Mr. Rufus Poole,
Associate General Counsel,
Wage and Hour Division,
Labor Department,
Washington, D. C.

DEAR MR. POOLE:

A member of our Association presents the following situation:

As is a custom in the broadcasting industry he sells a half hour time to a sponsor (an advertiser), say, a news broadcast. In addition to the charge for the time he charges the sponsor for "talent". He does not retain this "talent charge" but passes it on to the announcer who reads the news reports.

Is this a "production bonus" and thus to be figured in the computation of the regular hourly rate?

To make the picture complete I must add that in many instances the sponsor hires and pays his own talent. In many others, an advertising agency which handles the account hires and pays the talent.

It does not appear to us to be fair to penalize the station on its overtime rate charges because it gets more money for its employees or saves them the deduction which advertising agencies make from their pay when the advertising agencies handle talent.

Very truly yours,

JOSEPH L. MILLER,
Director of Labor Relations.

U. S. DEPARTMENT OF LABOR
Wage and Hour Division
WASHINGTON, D. C.

February 7, 1940.

In reply refer to:

LE:CAA:GMS

Mr. Joseph L. Miller,
Director of Labor Relations,
National Association of Broadcasters,
Normandy Building,
1626 K Street, N. W.,
Washington, D. C.

DEAR MR. MILLER:

This will reply to your letter of February 1, 1940.

The Fair Labor Standards Act, a copy of which is enclosed, requires that every employee subject to its provisions (engaged in interstate commerce or in the production of goods for interstate commerce) receive at least 30 cents an hour and overtime compensation for all hours worked in excess of 42 hours in any workweek, at a rate at least one and one-half times the regular rate of pay at which such employee is employed.

In our opinion, the "talent charge" passed on to the announcer is really part of his regular compensation and must be included in determining his regular rate of pay, on which he must be paid time and a half.

Very truly yours,

For the General Counsel,
Milton C. Denbo,
Chief Opinion Attorney.

KOL STRIKE SETTLED

The technicians strike at Station KOL, Seattle, was settled February 1 when the station signed a contract with the International Brotherhood of Electrical Workers (A. F. of L.). The contract called for a preferential...
union shop and a minimum weekly wage of $42.50 for a 40-hour week.

The union previously had signed with KRSC, KIRO, and KOMO-KJR. There was a short strike at KIRO.

**A. F. OF L. EXECUTIVE COUNCIL VOTES TO FIGHT ARNOLD**

The American Federation of Labor's executive council announced last week that it would fight Thurman Arnold through the Supreme Court—and into Congress if the court fight failed.

“The Executive Council wishes to emphasize that it does not condone nor does it attempt to shield any wrongdoing or illegitimate activity by unions or union officials. On the contrary, we urge the public authorities of the cities, States and nation to prosecute and punish to the full extent of the law any malefactors in labor organizations. There are thousands of laws on the statute books to cover any possible offenses. We ask that the criminal laws properly applicable to each case be applied, but we insist that it is highly improper, through a tortured and distorted construction of the language of the Clayton Act, to use the anti-trust laws as a club over organized labor.

These are the reasons for our position:

1. The Clayton Act forbids the very thing the Department of Justice is now doing.
2. Legitimate as well as illegitimate activities of unions already have been proscribed by the Department of Justice.
3. Application of anti-trust laws to unions inevitably would result in Government dictatorship over unions and kill free, democratic trade-unionism.

Other highlights of the meeting:

The council voted to start this Spring an intensive organization drive in the South and Far West "concentrating on white-collar workers and miscellaneous trades that are largely unorganized." The southern campaign will open with a mass meeting March 2 in Atlanta.

Continuation of the federation’s "non-partisan" political policy was ordered. Members will be urged to support "labor's friends" and oppose "labor's foes" regardless of political party. The federation will not endorse any presidential candidate but will send the "labor record" of each to all locals.

(Two members of the council and a number of other federation leaders signed a statement blasting the New Deal, however, while Dan Tobin (Democrat—truck drivers) and Bill Hutcheson (Republican—carpenters) almost came to blows after Tobin angrily remarked that the council was doing everything within its power to help the Republicans, or words to that effect.)

The council also ordered all central bodies to kick out local typographical unions. The A. F. of L. previously had suspended the I. T. U. for failure to contribute to the fund to fight the C. I. O.

**BROADCASTERS FIGHT PERRY BILL IN NEW YORK**

The New York Senate Committee on Codes will hold a hearing in the State Capitol at Albany, Tuesday, Feb. 20, at 2 p. m., on the Perry Bill (S. 449). Mr. Sydney Kaye will appear to oppose the bill at the instance of the New York State Broadcasters Association. The Perry Bill, printed in full below, would require written consent of all performers to the recording of a broadcast. It is understood that NAPA is back of the bill, and that Local 802 of A. F. of M. in New York City has passed a resolution in support of it.

New York—S. 449

"An act to amend the penal law, in relation to unauthorized recording of radio broadcast."

"Section 1. The penal law is hereby amended by inserting therein a new section, to follow section twelve hundred and ninety, to be section twelve hundred and ninety-a, to read as follows:

"§1290-a. Unauthorized recording of radio broadcast. Any person who, for the purpose of pecuniary gain, shall (a) Record in this state any broadcast emanating from any broadcasting station without the consent in writing of the performer or performers broadcasting the same; or (b) Offer for sale, sell, lease or license any recording of any broadcast obtained and taken without the consent and permission in writing of the said person or persons broadcasting the same; or (c) Have in his possession for the purpose of sale, lease or license any recording of any broadcast obtained and taken without the consent and permission in writing of the said person or persons broadcasting the same;"

"§2. This act shall take effect September first, nineteen hundred and forty."

**STATE LEGISLATION**

**KENTUCKY:**

H. 354 (Stengel) POLICE RADIOS—An act relating to the use of police radios.

**NEW YORK:**

A. 1264 (Canney) COPYRIGHTED MUSICAL ROYALTIES—LICENSES—Provides for licenses to be issued by tax commission for privilege of collecting royalties from copyrighted musical compositions, music books, recorded music for mechanical reproduction, or for radio programs, fixes annual license fee at $1,000 and appropriates $10,000. Referred to Ways and Means Committee.

**VIRGINIA:**

H. 210 (Fitpatrick et al) RADIOS—IN AUTOS—Requires any person, firm, co-partnership, association or corporation selling, transferring or installing radios designed for motor vehicles, capable of receiving signals of frequency assigned for police services, to report same to the Director of the Division of Motor Vehicles and to require the registration of any such radio receiver by the owner of the motor vehicle so equipped. Referred to Roads and Internal Navigation Committee.

**HAVANA FREQUENCY CHANGES**

The FCC issued an order on January 29 setting August 1, 1940, as the date for frequency changes in line with the Havana treaty.
CHARLES COOK CORPORATION

Information pertaining to the Charles Cook Corporation formerly located at 1560 Broadway, New York City, which sold piano lessons by mail over radio stations, is desired. Any information should be sent to WSPD, Toledo, or NAB Headquarters Office in Washington.

WILLARD C. MONROE

Anyone knowing the whereabouts of Willard C. Monroe, formerly connected with WCLS, Joliet, Illinois, is requested to communicate with that station or NAB Headquarters Office in Washington.

“FM” HEARING POSTPONED

At the request of a number of interested parties for more time in which to complete their material, the informal hearing before the Federal Communications Commission in the matter of aural broadcasting on frequencies above 25,000 kilocycles, which was scheduled for February 28, 1940, has been postponed to March 18, 1940.

The final date for the filing of written statements, sketches, drawings, etc., in connection with argument, has been extended to March 11. In order to expedite the proceedings, witnesses will not be permitted to read prepared statements into the record during the hearings.

WSAL LICENSE REVOKED

The FCC has affirmed its order of October 24, 1939, in revoking the license of radio station WSAL, Salisbury, Maryland, held by Frank M. Stearns.

The Commission said in explanation:

“Where, as here, a license is obtained as a direct result of false statements and representations under oath, involving among other things an applicant’s financial responsibility, and made to the Commission in the application itself as well as in the evidence submitted at public hearing in support thereof, the Commission has only one course of action and that is to take final its order of revocation upon that ground alone. The Commission is specifically empowered by Section 312(a) to revoke a license for false statements either in the application or in the statement of fact which may be required by Section 308 hereof or because of conditions revealed by such statements of fact as may be required from time to time which would warrant the Commission in refusing to grant a license on an original application.” If the real facts had been known to the Commission with respect to applicant’s finances the Commission could not have legally authorized the issuance of a license to an applicant who at best had available to him not to exceed $340.00.

Any contention that satisfactory service has been rendered and that the community in question would be without service in the future is not controlling in this case. However important the present service is, the Commission cannot escape the responsibility fixed by statute to ascertain the qualifications of applicants by considering truthful statements and to act accordingly in the granting or refusal of licenses. In requiring that applicants for licenses be found legally, technically, financially and otherwise qualified, Congress recognized that communities will be better served by those who truthfully show themselves to be qualified in all such respects than by persons who are willing to be used as mere figureheads for others who for reasons best known to themselves desire to conceal their interest.

“The applicant for a permit to construct and operate Broadcast Station WSAL made false statements under oath both in the original application and at the hearing thereon. Many of such statements involve matters of fact concerning the applicant’s financial qualifications which, if the truth had been revealed, would have shown applicant not financially qualified and would have compelled the Commission to refuse to grant the license upon the original application.

“The revocation order heretofore entered in this matter on the 24th day of October, 1939, should be affirmed.”

KGKB LICENSE REVOKED

Evidence of hidden management, operation and control of radio station KGKB, Tyler, Texas, caused the FCC on February 13 to order revocation of the license issued to the East Texas State Broadcasting Company to operate same, effective March 1, 1940.

An investigation conducted by the Commission revealed that actual control has been in the hands of James G. Ulmer and that the East Texas Broadcasting Company has never filed with the Commission an application for transfer or assignment of its license, as required by law.

NAVY TIME SIGNALS

The Federal Communications Commission with the approval of the Navy Department will hereafter handle requests to rebroadcast the Naval Observatory time signals without the necessity of licenses applying to the Navy Department.

In this connection the Commission has sent the following notice to all standard broadcast station licensees:

It is the policy of the Navy Department to consent to the rebroadcasting of the Naval Observatory time signals in all cases where satisfactory assurance has been given that the following conditions will be complied with by the broadcast station concerned:

(1) Announcement of the time signal must be made without reference to any commercial activity;
(2) The time signal to be rebroadcast must be obtained by direct reception from a Naval radio transmitter which is broadcasting the time signal;
(3) The Naval Observatory time signals are intended to be sufficiently accurate for astronomical and other scientific purposes. No time may, therefore, be announced as a Naval Observatory time signal if any time lag has been introduced.

In order to avoid hereafter the necessity for each individual licensee to make application to the Navy Department for the consent to rebroadcast the Naval Observatory time signals, requests therefor may be made direct to the Commission under the provisions of Section 3.94 without being submitted to the Navy Department, provided appropriate representation is made with the request that the above conditions will be complied with in full. Representations of compliance with conditions 2 and 3 shall include such diagrams, descriptions and data as necessary to show that no time lag in excess of 0.04 second has been introduced.

In addition to the above conditions, requests for such authorizations must be made for the full license term when accompanying an application for renewal of license or for the balance of the unexpired license period when made after the application for license has been granted.

FCC TO EXPEDITE ROUTINE BROADCAST AUTHORIZATIONS

To facilitate routine broadcast authorizations, the FCC has empowered its Chief Engineer to grant permission for special operation to facilitate other tests to comply with technical orders and has authorized its Administrative Board to pass upon requests for permission to rebroadcast routine programs.

4035

February 16, 1940

4 This includes the time of transmission from the originating station to the point of reception by the rebroadcasting station assuming the speed of transmission to be 186,000 miles per second.
The routine is further simplified to eliminate entering separate orders in cases heard by individual Commissioners. Administrative Order No. 2 as revised is as follows:

Under the authority of the Communications Act of 1934, as amended, it is ordered That Administrative Order No. 2, adopted July 12, 1939, as amended, be and the same is hereby further amended to provide as follows:

It is ordered: That there be and there is hereby assigned and referred to the respective boards and individual Commissioners hereinafter designated, for action thereon, that portion of the work, business or functions of the Federal Communications Commission hereinafter specified:

(1) (A) The Secretary of the Commission is hereby designated to determine, order, certify, report or otherwise act upon:
(a) all applications for operator licenses or renewals thereof; and
(b) all applications for amateur and ship stations or renewals thereof; and
(c) all applications for aircraft station licenses or renewals thereof where the applicant is or has been the holder of a station license within the preceding year;

(B) The Secretary of the Commission is hereby designated to enter the appropriate final order of the Commission in all cases involving applications for radio station authorizations in which proposed findings and conclusions of the Commission have been issued pursuant to the provisions of Section 1.231 of the Commission's Rules of Practice and Procedure and in which no exceptions have been filed within the time prescribed in said section.

(2) The Chief Engineer of the Commission is hereby designated to determine and act upon all applications and requests to make appropriate order in letter form for the signature of the Secretary of the Commission in the following matters:
(a) temporary operation without specified items of equipment, or with temporary, substitute or auxiliary equipment:
(1) operation without an approved frequency monitor;
(2) operation without an approved modulation monitor;
(3) operation without thermometer in automatic temperature control chamber;
(4) operation without antenna ammeter, plate voltmeter or plate ammeter;
(5) operation with substitute ammeter, plate voltmeter or plate ammeter;
(6) operation with temporary antenna system;
(7) operation with auxiliary transmitter as main transmitter;

(b) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application:
(c) where formal application is not required, application for new or modified equipment or antenna system;

(d) change of specifications for painting and lighting antenna towers where formal application is not required;

(e) operation to determine power by direct method during program test period;

(f) relocation of transmitter in same building;

(g) operation with reduced power or time under Sections 3.57 and 3.71;

(h) approval of types of equipment as to compliance with outstanding rules and standards;

(i) all authorizations for equipment and program tests, or extensions thereof, where it appears that compliance has been had with the terms of the construction permit;

(j) denial of requests for equipment and program tests where specifications of construction permit have not been met;

(k) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorizations it appears that the terms of the construction permit have not been met;

(l) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission;

(m) representations of compliance with technical requirements specified in authorizations, orders, rules or releases.

(n) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location;

(o) all authorizations for special operation necessary to facilitate equipment, program and service tests or to comply with technical requirements specified in authorizations, orders, rules or releases.

(3) The Chief Accountant of the Commission is hereby designated to determine, order, certify, report or otherwise act upon:

(a) administration, interpretation and application of regulations promulgated by the Commission pursuant to Section 220 of the Act, relating to accounts, records, and memoranda to be kept by carriers subject to the jurisdiction of the Commission;

(b) applications for extensions of time in which to file annual, monthly, and special reports required by the Commission pursuant to Section 219 of the Act;

(c) administration, interpretation and application of orders or rules of practice and procedure promulgated by the Commission relating to financial and statistical data of standard broadcast stations and broadcast networks or chains, including applications for extensions of time in which to file financial and statistical statements and reports;

(d) all matters arising in connection with the administration of tariff regulations promulgated by the Commission pursuant to Section 203 of the Act, and in connection with the administration of this section in so far as it relates to the Board of Trade, and to authorize experiments thereof, or made pursuant thereto, as authorized in particular instances by subsection (b) thereof, and to the rejection of tariffs as authorized by subsection (d) thereof, and, where appropriate in carrying out the foregoing, to make orders in letter form for the signature of the Secretary of the Commission.

(4) A board, to be called "The Administrative Board," consisting of the General Counsel, Chief Engineer, Chief Accountant, and Secretary of the Commission is hereby designated to determine, order, certify, report or otherwise act upon the following matters: provided, however, that said Board may act in such matters only in accordance with established policies of the Commission; provided further that three members of said Board shall constitute a quorum:

(a) all applications for the Coastal, Marine Relay, Aviation, Emergency, and Miscellaneous services, except those falling under paragraphs (1), (2), and (3) of this Order;

(b) upon all radio matters of every character (except broadcast, and cases falling under paragraphs (1), (2) and (3) of this Order) within the Territory of Alaska;

(c) upon all applications for experimental authorizations except: Construction of experimental station to authorize experiment directed toward the establishment of new services;

(d) upon all broadcast service applications as follows: for licenses following construction which comply with the construction permit; applications for construction permit and modification of construction permit involving only a change in equipment; applications for extensions of time within which to commence and complete construction; applications to install frequency control equipments; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site not involving any substantial change in service area; applications for relay broadcast stations; and requests for authorization to retransmit signals;

(e) upon all applications or requests for special temporary authorization other than those falling under paragraphs (1), (2), (3) or (5) of this Order;

(f) all applications or requests for emergency and renewal exemptions from the provisions of Section 352(b) of the Act;
to this Order, is hereby designated to hear and determine, order, and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act;

(2) applications from existing licensees for instruments of authorization for the Fixed Public or Fixed Public Press radio services, except applications involving (1) new points of communication, (2) changes in transmitter location other than local in character, (3) assignment of additional frequencies, or (4) involving change of policy by the Commission, or the establishment of a new type of service;

(h) upon requests for inspection of records under the provisions of Section 1.5(c) of the Commission's Rules of Practice and Procedure;

Actions taken by the Board shall be reported in writing each week to the Commission at its regular meeting;

(5) All applications or requests for special temporary standard broadcast authorizations shall be referred to the Administrative Board which shall make appropriate recommendation thereon and refer the same to a Commissioner to be named by subsequent supplements to this Order, who is hereby designated to determine, order, report or otherwise act upon all such applications or requests in accordance with established policies of the Commission;

(6) A Commissioner, to be named by subsequent supplements to this Order, is hereby designated to hear and determine, order, certify, report or otherwise act upon;

(a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission, and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 to 1.256, inclusive, of the Commission's Rules of Practice and Procedure; provided further that when one or more members of the Commission have been designated to preside at a hearing such Commissioner or Commissioners shall be authorized and empowered to fix the time and place such hearing shall be held; and such motions, petitions, or matters arising in connection with such hearing shall be handled by the Commissioner or Commissioners designated to preside, subject to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure; provided further that in the absence of the individual Commissioner designated to preside at a hearing, or his inability to act or pass upon such preliminary matters, they shall be referred to the presiding officer of the Motions Docket.

(b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

(7) Any party affected by any order, decision, or report of any individual, board, or individual Commissioner, to whom authority is delegated under the provisions hereof, may file a petition for rehearing, as provided by Section 1.271 of the Commission's Rules of Practice and Procedure, before the Commission, and every such petition shall be passed upon by the Commission.

IT IS FURTHER ORDERED, That this Order shall become effective February 7, 1940.

FCC ANNUAL FINANCIAL REPORT

At the request of the NAB Accounting Committee the FCC extended the time for filing the 1939 financial report until April 15, 1940. However, the FCC Accounting Department desired information contained on Schedule 8, Page 11, of the report as soon as possible. A single sheet was mailed with the request that it be filled in and returned promptly. Approximately 200 stations have failed to comply with the request and it is hoped that NAB members—if any are among this number—will return the information at once, as this cooperation on the part of the membership will assist headquarters in asking to have the April 15 date made permanent by amending the rule which now requires it to be filed March 15.

817 STATIONS

The FCC issued operating licenses to eight stations, granted seven permits for the construction of new stations, and deleted four stations during the month of January, 1940. A comparative table by months follows:

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearing is scheduled before the Commission in a broadcast case for the week beginning Monday, February 19. It is subject to change.

Monday, February 19

NEW—Lookout Mountain Co. of Ga., Lookout Mountain, Ga.—C. P., 1370 kc., 250 watts night, 250 watts LS, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

March 12

WTAL—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Renewal of license, 1310 kc., 100 watts, 250 watts LS, unlimited time.

March 18

Informal Hearing Before the Commission En Banc

In the Matter of Aural Broadcasting on Frequencies Above 25,000 kc. (An inquiry into the possibilities of frequency and amplitude modulation.)

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KTUC—Tucson Motor Service Co., Tucson, Ariz.—Granted voluntary assignment of license from Tucson Motor Service Company to the Tucson Broadcasting Co., Inc.; station operates on 1370 kc., 100 watts night, 250 watts day, unlimited time.

Lawrence J. Heller, Washington, D. C.—Granted construction permit to erect a new station to operate on 1310 kc., 250 watts, unlimited time, employing in addition a 50-watt synchronous

February 16, 1940
amplifier; exact transmitter sites, studio location and type of antennas to be determined with Commission's approval.

C. P. Edwards, Jr., and Howard Long, d/b Kingsport Broadcasting Co., Kingsport, Tenn.—Granted construction permit to erect a new station to operate on 1370 kc., 250 watts, unlimited time, exact transmitter site and type of antenna to be determined subject to approval of the Commission.

WRUL—World Wide Broadcasting Corp., Boston, Mass.—Granted construction permit to make changes in equipment and increase power from 20 KW to 50 KW at international broadcast station WRUL; present assignment 6640, 11730, 11730, 13250, and 21460 kc. (shares 6040 kc. with WDIJ, 11730 and 15130 kc. with WRUU, unlimited time on 11790, 13250, and 21460 kc.).

W2XQR—John V. L. Hogan, Long Island City, N. Y.—Granted modification of license of high frequency broadcast station W2XQR to add A4 (special) emission, upon an experimental basis only, conditionally; present assignment is 43200 kc., 1 KW, special emission for frequency modulation with maximum band width of not in excess of 200 kc., time of operation in accordance with Section 4.4.

KWEW—W. E. Whitmer, Hobbs, N. Mex.—Granted modification of license to increase time of operation from daytime to unlimited, using 100 watts, frequency 1500 kc.

WGES—T. H. Guyon, Chicago, Ill.—Granted transfer of control of corporation by gift of 10 shares common stock from T. H. Guyon to his sister Irene M. Cowen; control to T. H. Guyon, H. J. Guyon, L. E. Moulds, Wm. M. Moss, G. T. Dyer and Irene M. Cowen; station operates on 1380 kc., 300 watts night, 500 watts day, 1 KW day Sundays, only shares time with WSBT.

LICENSE REVOKED

KGKB—East Texas Broadcasting Co., Tyler, Tex.—Issued order for revocation of license of station KGKB, effective March 1, 1940, because actual control of station has been in the hands of James G. Ulmer and the East Texas Broadcasting Company has never filed with the Commission an application for transfer or assignment of its license, as required by law.

MISCELLANEOUS

WRCA-WNB—I National Broadcasting Co., Inc., New York City.—Granted special temporary authority to operate international broadcast stations WNB and WRCA simultaneously on 9670 kc., utilizing the Central American beam on the WNB transmitter and the South American Steerable Beam on the WRCA transmitter, for February 8 and 9, in order to obtain maximum South American coverage for broadcast of Louis-Godoy boxing match to be received from International Broadcast Station W2XQR and WRCA over Station WNB on February 9, 1940.

WIOXR—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to operate transmitter of developmental (experimental) station W1XOJ on frequency 670 kc., A-O emission, 100 watts during daylight hours at District 7, Bethesda, Md., for the period February 14, 1940, to not later than March 14, 1940, in order to make field intensity measurements in connection with construction permit for radio station WMAL.

WOI—Iowa State College of Agricultural & Mechanic Arts, Ames, Iowa.—Granted special temporary authority to operate from 0:00 to 4:00 a.m. CST, on February 16, 1940, in order to broadcast State High School Basketball Tournament games.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to operate from 3:00 p.m. to 4:00 p.m. EST, on February 20 and 27, 1940, in order to broadcast the following sustaining programs; 2 to 2:10, Newscast; 2:10 to 2:30, Matinee Moods; 2:30 to 3:00, Suggestions in Symphony; to operate from 2:00 p.m. to 3:00 p.m. EST, on February 18, 25, March 3, 10, 17, 1940, in order to broadcast the following sustaining programs; 2 to 2:15, Newscast; 2:15 to 2:30, Tune Travels; 2:30 to 2:45, Sabbath Meditations; 2:45 to 3:00, 1/2 hr. in 34 time; to operate as follows on February 22, 1940: 8:30 to 9 a. m., Breakfast Club, 9 to 9:30 a.m., Opening the Mail, 9:30 to 10 a.m., Dances of the World, 2 to 2:10 p.m., Newscast; 2:10 to 2:30, Matinee Moods; 2:30 to 3 p.m., Suggestions in Symphony (provided WSVS remains silent).

WSLB—St. Lawrence Broadcasting Corp., Ogdensburg, N. Y.—Granted modification of construction permit for new station, for changes in equipment, approval of antenna and approval of transmitter and studio site at 2315 Knox St., Ogdensburg, N. Y.; 1370 kc., 250 watts power, unlimited time.

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—Granted construction permit to install new transmitting equipment.

WNEL—Juan Piza, San Juan, Puerto Rico.—Denied as in case of default application for renewal of license operating on 1200 kc., 100 watts, unlimited time, counsel noting exceptions to ruling.

WEJ—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate radio broadcast station WEJ on frequency 1210 kc., unlimited time, subject to approval of the Commission and with experimental television Station W3XAD for the period February 18, 1940, to not later than March 18, 1940.

W3XAD—RCA Manufacturing Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate transmitter of television broadcast (experimental) station W3XAD on television bands 18 and 19, frequency 282 and 291 megacycles, for the period February 18, 1940, to not later than March 18, 1940.

WBAA—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate from 7:15 p.m. to 10:00 p.m. CST, on February 10, 12, 17, 19, 24, 26, 1940; and from 7:00 p.m. to 11:00 p.m. CST, on February 21, 1940; and from 6:45 p.m. to 10:30 p.m. CST, on February 29, 1940, in order to broadcast basketball games and Golden Gloves Tournament only.

WNEL—Juan Piza, San Juan, Puerto Rico.—Granted special temporary authority to rebroadcast the Louis-Godoy boxing match to be received from International Broadcast Station W2XQR and WRCA over Station WNB on February 9, 1940.

WIOXR—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to operate transmitter of developmental (experimental) station W1XOJ on frequency 670 kc., A-O emission, 100 watts during daylight hours at District 7, Bethesda, Md., for the period February 14, 1940, to not later than March 14, 1940, in order to make field intensity measurements in connection with construction permit for radio station WMAL.

KFUO—Evangelical Lutheran Synod of Missouri, Ohio and other States, Clayton, Mo.—Granted special temporary authority to operate from 1:00 a.m. to 3:00 a.m. CST, on March 16, 1940, in order to broadcast a DX program.

WBWY—Roy L. Alberson, Buffalo, N. Y.—Granted special temporary authority to operate from 2:00 p.m. to 3:00 p.m. EST, on February 14, 1940, to not later than March 14, 1940, in order to broadcast the following sustaining programs; 2 to 2:10, Newscast; 2:10 to 2:30, Matinee Moods; 2:30 to 3:00, Suggestions in Symphony; to operate from 2:00 p.m. to 3:00 p.m. EST, on February 18, 25, March 3, 10, 17, 1940, in order to broadcast the following sustaining programs; 2 to 2:15, Newscast; 2:15 to 2:30, Tune Travels; 2:30 to 2:45, Sabbath Meditations; 2:45 to 3:00, 1/2 hr. in 34 time; to operate as follows on February 22, 1940: 8:30 to 9 a.m., Breakfast Club, 9 to 9:30 a.m., Opening the Mail, 9:30 to 10 a.m., Dances of the World, 2 to 2:10 p.m., Newscast; 2:10 to 2:30, Matinee Moods; 2:30 to 3 p.m., Suggestions in Symphony (provided WSVS remains silent).

WSLB—St. Lawrence Broadcasting Corp., Ogdensburg, N. Y.—Granted modification of construction permit for new station, for changes in equipment, approval of antenna and approval of transmitter and studio site at 2315 Knox St., Ogdensburg, N. Y.; 1370 kc., 250 watts power, unlimited time.

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—Granted construction permit to install new transmitting equipment.

WNEL—Juan Piza, San Juan, Puerto Rico.—Denied as in case of default application for renewal of license operating on 1200 kc., 100 watts, unlimited time, counsel noting exceptions to ruling.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Denied motion to set aside order to take depositions in re application for renewal of license operating on 1200 kc., 100 watts, unlimited time, counsel noting exceptions to ruling.

WEJ—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate radio broadcast station WEJ on frequency 1210 kc., unlimited time, subject to approval of the Commission and with experimental television Station W3XAD for the period February 18, 1940, to not later than March 18, 1940.
WDAC—The Monocacy Broadcasting Co., Frederick, Md.—Granted special temporary authority to operate from 8:00 p. m. to 9:30 p. m., EST, on February 22, 1940, in order to broadcast the speech by Congressman Robert Lewis Rodgers at the Republican Club dinner.

W2XWG—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate high frequency (experimental) broadcast station W2XWG to utilize amplitude modulation on frequency 12600 kc., for the period February 16, 1940, to not later than March 16, 1940, in order to accumulate data for direct comparison of the effectiveness of frequency modulation versus amplitude modulation for presentation at the high frequency hearing.

KEIV—Nichols and Warinner, Inc. Portable-Mobile (area of Long Beach, Calif.)—Granted construction permit to make changes in equipment and increase power to 10 watts.

WDAC—University of Wisconsin, Portable-Mobile (area of Madison, Wis.)—Granted modification of license to change name to State of Wisconsin, University of Wisconsin.

WSMB—WSMB, Inc. New Orleans, La.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.34.

KMPG—The Station of the Star, Beverly Hills, Calif.—Same as above (for auxiliary transmitter); also granted license to use old RCA 1001-C transmitter as an auxiliary transmitter, using 1 KW power, emergency use only; 710 kc.

APPLICATIONS FILED AT FCC

550 Kilocycles

KTSA—Sunshine Broadcasting Co., San Antonio, Tex.—Modification of license to increase power from 1 KW, 5 KW day, to 5 KW day and night, and request station classification as III-A.

580 Kilocycles

WDBO—Orlando Broadcasting Company, Inc., Orlando, Fla.—Construction permit to increase power from 1 KW, 5 KW day, to 5 KW day and night, and install directional antenna for night use; make changes in equipment.

590 Kilocycles

WEEI—Columbia Broadcasting System, Inc., Boston, Mass.—Authority to determine operating power by direct measurement of antenna power.

630 Kilocycles

NEW—William H. Amesbury, Minneapolis, Minn.—Construction permit for a new broadcast station to be operated on 630 kc., 500 watts, unlimited time, using directional antenna day and night.

660 Kilocycles

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-P-2339) for move of transmitter, and new antenna, requesting extension of required date of completion from 3-6-40 to 9-6-40.

780 Kilocycles

WTAR—WTAR Radio Corporation, Norfolk, Va.—Construction permit for changes in directional antenna system, and increase power from 1 KW, 5 KW day, to 5 KW day and night.

880 Kilocycles

KVN—Vancouver Radio Corp., Vancouver, Wash.—Transfer of control of corporation from Sheldon F. Sackett to Walter L. Read, 100 shares common stock.

900 Kilocycles

NEW—Don LeRoy, Ketchikan, Alaska.—Construction permit for a new broadcast station to be operated on 900 kc., 1 KW, unlimited time, requests facilities KGBU.

940 Kilocycles

NEW—Carl Sholtz, Fort Pierce, Fla.—Construction permit to erect a new broadcast station to be operated on 940 kc., 250 watts, unlimited time.

970 Kilocycles

WIBC—Seaboard Radio Broadcasting Corporation, Glenside, Pa.—Construction permit to install new transmitter; increase power from 100 watts to 1 KW; change hours of operation from daytime to limited. Amended: antenna to be determined, transmitter site to be determined, Hill Crest, Pa.

1020 Kilocycles

WDZ—WDZ Broadcasting Co., Tuscola, Ill.—Authority to determine operating power by direct measurement of antenna power.

1060 Kilocycles

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Modification of license to change frequency from 1060 kc. to 1040 kc., and hours of operation from share WBAL to unlimited time, using directional antenna night.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Authority to determine operating power by direct measurement of antenna power.

1100 Kilocycles

WDGY—Dr. George W. Young, Minneapolis, Minn.—Construction permit to install directional antenna for night use; increase power from 1 KW, 5 KW day, to 5 KW day and night; change time from limited to unlimited. Amended to request change in frequency from 1180 kc. to 1100 kc., power of 5 KW, 10 KW day; changes in directional antenna, new transmitter, move of transmitter from Wayzata Blvd. and Louisiana Ave., Minneapolis, Minn., to Richfield Twp., Minn.

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Authority to determine operating power by direct measurement of antenna power.

1110 Kilocycles

NEW—Symons Broadcasting Co., Ellensburg, Wash.—Construction permit for a new broadcast station to be operated on 1110 kc., 1 KW, unlimited time.

1200 Kilocycles

WSAM—Saginaw Broadcasting Company, Saginaw, Mich.—Modification of construction permit (B2-P-794) for new station requesting approval of antenna, transmitter and studio sites at Bay and Weiss Sts., Saginaw, Mich., and change type of transmitter.

NEW—Hunt Broadcasting Assn., Paul E. Horton, Pres., Green ville, Tex.—Construction permit for a new broadcast station to be operated on 940 kc., 1 KW, daytime. Amended to change frequency to 1200 kc., power to 100 watts and unlimited time, and change transmitter site and equipment changes.

NEW—Mohawk Radio, Inc., Schenectady, N. Y.—Construction permit for a new broadcast station to be operated on 1300 kc., 250 watts power, unlimited time.

WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Voluntary assignment of license from Hammond-Calumet Broadcasting Corp. to O. E. Richardson and Fred L. Adair.

1210 Kilocycles

KGY—KGY, Inc., Olympia, Wash.—Authority to transfer control of corporation from Louis Wasmier to Tom Olsen, 52½ shares common stock.

1230 Kilocycles

KGBX—Springfield Broadcasting Co., Springfield, Mo.—Construction permit to install new transmitter, increase power from...
500 watts to 5 KW, make changes in directional antenna (night use). Amended re directional antenna.

1240 Kilocycles

KFJZ—Tarrant Broadcasting Company, Fort Worth, Tex.—Construction permit to install new transmitter, increase power from 1 to 5 KW, and install directional antenna for day and night use. Amended re directional antenna.

1260 Kilocycles

KHSI—Golden Empire Broadcasting Co., Chico, Calif.—License to cover construction permit (BS-P-2538) for new equipment and increase in power.

WNBH—Anthony & Sons, Inc., New Bedford, Mass.—Modification of construction permit to install new antenna for day and night use. Increase power from 1 KW; 5 KW-day to 5 KW day and night.

1290 Kilocycles

WJHP—The Metropolis Company, Jacksonville, Fla.—Modification of construction permit (B3-P-917) for a new station, requesting approval of antenna and new transmitter, approval of studio site at 125 West Church St., Jacksonville, Florida, and transmitter site at Jacksonville, Fla.

KDYL—Intermountain Broadcasting Corporation, Salt Lake City, Utah.—Construction permit to install directional antenna for day and night use. Increase power from 1 KW; 5 KW-day to 5 KW day and night.

1310 Kilocycles

WLBC—Donald A. Burton, Muncie, Ind.—Authority to determine operating power by direct measurement of antenna power.

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Authority to determine operating power by direct measurement of antenna power.

WCMF—Ashland Broadcasting Co., Ashland, Ky.—Construction permit to install new antenna and move transmitter from Ashland to Catlettsburg, Ky.

WJPF—Orville W. Lyerla, Herrin, Ill.—Modification of construction permit (B4-P-2097) for a new broadcast station, requesting new transmitter, increase power from 100 watts night, 250 watts day to 250 watts day and night, approval of antenna and approval of studio and transmitter site 2 miles north of Herrin, Ill.

WNBI—E. Anthony & Sons, Inc., New Bedford, Mass.—Modification of construction permit (B1-P-2543) for new equipment, increase in power, vertical antenna and move of transmitter, requesting approval of antenna and transmitter site at Crow Island, Fairhaven, Mass.

KARM—George Harm, Fresno, Calif.—Involuntary assignment of license from George Harm (deceased) to Gilbert H. Jerberg, Executor of Estate of George Harm, Deceased.

1370 Kilocycles

WATW—WJMS, Inc., Ashland, Wis.—Modification of construction permit (B4-P-2160) for a new station, requesting approval of antenna and approval of new transmitting equipment, approval of studio site at 212 Second St., West, Ashland, Wisconsin, and approval of transmitter site at 3 mile south of corner Second Street & Ellis Avenue, (Northland College Campus), Ashland, Wisconsin.

KLUF—The KLUF Broadcasting Co., Inc., Galveston, Tex.—Construction permit to install new transmitting equipment.

KORN—Nebraska Broadcasting Corp., Fremont, Nebr.—Modification of license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Authority to determine operating power by direct measurement of antenna power.

WQAO—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Authority to determine operating power by direct measurement of antenna power.

NEW—Herbert L. Wilson, Middletown, N. Y.—Construction permit for a new station on 1420 kc., 250 watts power, unlimited time. Amended: To request 1370 kc.
WNEQ—National Broadcasting Co., Inc., Portable-Mobile.—
License to cover construction permit (B2-PRE-314) for a new relay broadcast station.

NEW—WPTF Radio Co., near Cary, N. C.—Construction permit for a new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—W²XEN, Inc., Portable-Mobile.—Construction permit for a new high frequency broadcast station to be operated on 1622, 2058, 2150, 2190 kc., 20 watts, A3 emission.

W³XEN—Zenith Radio Corp., Chicago, Ill.—Construction permit to move transmitter from 6001 Dickens Ave, Chicago, to 605 N. Michigan Ave, Chicago, Ill.

NEW—Tri-City Broadcasting Co., Davenport, Iowa.—Construction permit for a new high frequency broadcast station to be operated on 43600 kc., 1000 watts, special emission for frequency modulation.

NEW—Central Broadcasting Co., Mitchellville, Iowa.—Construction permit for a new high frequency broadcast station to be located at 10 South Fifth Street, Amarillo, Tex., 48200 kc., 1 KW power, unlimited time, special emission.

NEW—KGLK, Inc., Portable-Mobile.—Construction permit for a new high frequency broadcast station.

NEW—Radio Service Corporation of Utah, Antelope Island, Utah.—Construction permit for a new high frequency broadcast station to be operated on 43800 kc., 250 watts power, unlimited time, special emission, to be located at 10 South Main St., Salt Lake City, Utah.

NEW—Radio Service Corporation of Utah, Antelope Island, Utah.—Construction permit for a new high frequency broadcast station to be operated on 43900 kc., 1 KW power, unlimited time, special emission, to be located Antelope Island, Utah.

NEW—Doughty & Welch Electric Co., Inc., So. Somerset, Mass.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1 KW, unlimited time, special emission. Exact site to be determined, So. Somerset, Mass.

NEW—W. A. Patterson, Chattanooga, Tenn.—Construction permit for a new high frequency broadcast station to be operated on 43100 kc., 1 KW, unlimited time, special emission. Exact site to be determined, Chattanooga, Tenn.

NEW—National Broadcasting Co., Inc., Portable-Mobile.—License to cover construction permit (B3-PRE-315) for a new relay broadcast station.

NEW—National Broadcasting Co., Inc., Portable-Mobile.—Construction permit for a new high frequency broadcast station to be operated on 43100 kc., 1 KW, unlimited time, special emission.

NEW—National Broadcasting Co., Inc., Portable-Mobile.—License to cover construction permit (B4-PRE-316) for a new relay broadcast station.

NEW—National Broadcasting Co., Inc., Portable-Mobile.—Construction permit for a new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—Amarillo Broadcasting Corporation, Amarillo, Tex.—Construction permit for a new high frequency broadcast station to be located at 10 South Fifth Street, Amarillo, Tex., 43200 kc., 1 KW power, unlimited time, special emission.

KEHI—WDAY, Inc., Fargo, N. Dak.—License to cover construction permit (B4-PRE-329) changing transmitter location from portable-mobile to fixed location.

KEHI—WDAY, Inc., Fargo, N. Dak.—License to cover construction permit (B4-PRE-329) changing transmitter location from portable-mobile to fixed location.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Technical Society—Alleging misleading representations in the sale of the "Automotive Engineering Cyclopedia" and "Diesel Engineering Cyclopedia," a complaint has been issued against R. T. Miller, Jr., trading as American Technical Society, 850 East 38th St., Chicago.

The complaint charges the respondent with advertising that both sets are offered at special prices, when in fact the prices charged are the customary prices; that the American Technical Society is a society, group or assembly of engineers or scientists organized for scientific purposes, and that purchasers of cyclopedias have the privilege of consulting the society free and without cost, when in fact American Technical Society is not a society of engineers or scientists organized for scientific purposes but merely a firm name used by the respondent in conducting his business, and the consultant service is not given free but its cost is included in the price of the books.

Other alleged misrepresentations are that the automotive cyclopedia provides the owner a course of study equal to that provided by a residence school; that the automotive cyclopedias are the most authoritative books on the subject ever published; that by use of the books a person is enabled to do any and every automobile repair job right the first time, and that anyone purchasing the books can learn automotive engineering without study or memorizing. (4019)

Automobile Body Supply Company—See New Method File Grinders, Inc.

Henry Bergman—Alleging the use of unfair and deceptive acts and practices in the interstate sale of instruments intended for locating gold and silver and in the distribution of a booklet a complaint has been issued against Henry Bergman, of 2004 Milton Ave., Springfield, Mo., dealer in such products.

The respondent allegedly inserted in newspapers, circulat and magazines various advertisements. One of them reads as follows: "Wanted—Hear from parties interested gold or silver ore, buried or hidden treasures. Bergman's instrument, $5.00. Particulars free. * * *" (4019)

Through the use of various similar assertions, the respondent is alleged to have represented to purchasers that the instrument offered for sale will enable a person to locate gold, silver and hidden treasures, and that persons giving testimonials published by the respondent have actually located treasure by using the respondent's instrument.

It is also alleged that the respondent represented that his booklet called "Jacob's Rod" imparts information which will enable a person to ascertain his psychic powers, make his own goldometer and locate hidden treasure; that the booklet is rare and that the directions given therein were practiced by Jacob of old and many other ancient patriarchs.

The complaint also alleges misrepresentation in the sale of a so-called "Fortune Telling Crystal Ball," "Universal Good Luck Coins," and lists of names and addresses of concerns selling devices used in searching for treasures or minerals.

The respondent's representations are alleged to be false, misleading and deceptive because the use of his commodities will not enable one to locate treasures or invoke the powers and benefits advertised. (4026)

Carver Sales Company—Alleging violation of the Federal Trade Commission Act in the sale of a preparation advertised as
a treatment for alcoholism and the liquor habit, a complaint has been issued against George C. and Mina D. Huskins and Howard W. Ellison, trading as Carter Sales Company, 208 West Eighth St., Los Angeles.

Thorough newspaper, circular and radio advertisements, the respondents are alleged to have represented their preparation, "Cred-er's Special Formula," as a cure, remedy or competent treatment for alcoholism and the liquor habit. They are also alleged to have advertised that by its use the desire for alcoholic stimulants will be eradicated, and that the preparation is absolutely harmless and contains no harmful drugs.

The complaint alleges that the respondents' representations are exaggerated and misleading; that use of their preparation will not accomplish the results as claimed, and that the product is absolutely harmless because it may, in some cases, cause skin rashes, dermatitis, and injury to the liver and the intestinal mucosa. (4028)

Ralph Corn Underwear, Inc., 36 East 31st St., New York, engaged in the sale and distribution of women's wearing apparel, including slips, gowns and pajamas, is charged, in a complaint with misrepresentation.

The complaint alleges that by means of descriptive circulars, by labels attached to the garments, and by use of letterheads used in correspondence with purchasers and prospective purchasers throughout the States, the respondent has made false representations concerning the character and quality of its products. Typical of false representations alleged to have been made in its circulars are: "Ralph Corn Underwear, Inc., the King of Satins. Satin and Pigment Crepe Slips, Gowns and Man-tailored Pajamas." . . . "Pigment Crepe Heavy Quality Satin Striped Gown."

The respondent is also alleged to have used on its advertising material and letterheads the words "Manufacturers of Silk Undergarments."

Through use of the foregoing representations and others of similar import, the complaint continues, the respondent has represented that its products are made entirely of silk. The complaint charges that none of the garments sold by the respondent is made entirely of silk, but of rayon and other material, or a mixture of rayon and silk.

The respondent, through use of the word "Manufacturers," the complaint alleges, has represented itself as the manufacturer of the garments sold by it, when in fact it does not manufacture them but buys the material on the open market and has the garments manufactured by other parties. (4017)

Excel Merchandise and Novelty Company, Omaha, Nebr., is alleged to have sold to dealers push cards and punch boards so prepared and arranged as to involve games of chance or lottery schemes when used in making sales of merchandise to the consuming public. It is alleged that because of the element of chance inherent in connection with the sale of merchandise by means of these devices, many members of the purchasing public have been induced to deal with retail dealers selling their merchandise by means thereof.

The Omaha respondent, who also deals in merchandise such as saucepans, dripolators, coffee percolators, pillows, smoking stands, electric table lamps and other pieces, is alleged to have supplied his customers with assortments of merchandise together with certain paraphernalia known as "Bingo" sets by means of which merchandise is sold and distributed to the consuming public in a manner involving operation of a lottery scheme. (4029)

Exhibit Sales Company.—Samuel Mickelberg, trading as Exhibit Sales Company, 423 Market St., Philadelphia, is engaged in the sale and distribution of radios and other articles of merchandise. The complaint charges that the respondent sells to wholesale dealers, jobbers and retail dealers, assortments of merchandise so packed and assembled as to involve the use of games of chance, gift enterprise or lottery schemes when the merchandise is sold and distributed to the ultimate consumer. (4024)

Globe Rummage Mart—Charging misrepresentation in the sale and distribution of second-hand clothing and other merchandise, a complaint has been issued against Louis Goldman, trading as Globe Rummage Mart, 3238 South State St., Chicago.

In a catalog listing and describing articles of merchandise sold by him and distributed throughout the States, the complaint charges, the respondent represents that his merchandise is only slightly used; that all articles listed are reclaimed or slightly used and are in good salable condition, and that the articles are reasonable merchandise of the most popular styles and latest creation. It is also represented that merchandise not entirely satisfactory may be returned for replacements.

The complaint charges that these representations are false and misleading; that the respondent buys his stock on the open market from other second-hand dealers and junk dealers and at rummage sales, and that when orders are shipped to customers the packages frequently contain merchandise that is old, out of style, dirty, worn out, unsaleable, and of different size, color, style and condition from that ordered by respondent's customers. The respondent, the complaint continues, does not generally make satisfactory replacements or refunds for merchandise that is not satisfactory, as advertised by him. (4016)

Great Buckeye Candies, Inc.—See M. Linkman & Company.

The respondent is charged with practices having a tendency to create monopoly and unreasonably restrain manufacturers of competitive products in disposing of their merchandise to jobbers and wholesale distributors of automotive parts and equipment, who have acquired or may acquire such products from the manufacturers. (4030)

Howell Company—Misrepresentation of a plain carbon steel tubing product as chromium is alleged in a complaint against The Howell Company, St. Charles, Ill., manufacturer of household and office furniture.

It is alleged that through use of the term "Chromsteel" the respondent corporation represents certain of its furniture as being made of steel alloy containing chromium when in fact it is made of plain carbon steel tubing.

Chromium or chrome steel, the complaint points out, is more expensive than plain carbon steel. It combines intense hardness with a high elastic limit. (4022)

Journal of Living Publishing Corp.—See Purity Products, Inc.

M. Linkman & Company.—Complaints have been issued against M. Linkman & Company, 1150 West Fullerton Ave., Chicago, manufacturer and distributor of smoking pipes, and Great Buckeye Candies, Inc., 567 East South St., Akron, Ohio, manufacturer and distributor of candy, charging them with sale and distribution of merchandise so packed and assembled as to involve use of a game, of chance, gift enterprise or lottery scheme when the merchandise is sold and distributed to the ultimate consumer.

An assortment distributed by M. Linkman & Company consists of a number of "Dr. Grabow" pipes, together with punch boards, by means of which pipes and in some cases cigarettes supplied by the dealer operating the punch board are given as prizes.

Great Buckeye Candies, Inc., distributes assortments of candy commonly known as all day suckers. In some instances, it is alleged, the end of the stick imbedded in the candy contains certain words which are concealed from the purchaser until the candy is consumed. Those receiving sticks with the words thereon are entitled to extra pieces of candy without additional cost.

Use by the respondents of these methods in the sale of their products, the complaints allege, is contrary to public policy and is in violation of criminal laws. (4018-4015)

New Method File Grinders, Inc.—A complaint alleging misrepresentation in the sale of used, reconditioned and resharpened files has been issued against New Method File Grinders, Inc., also trading as Automobile Body Supply Company, 5120 South Halsted St., Chicago.

Used or second-hand files purchased from automobile manufacturers, garages and automobile body repair establishments, allegedly were advertised as being new and unused except for damage by water in a fire or other water damage. Such products, the
complaint alleges, had been used by others and reconditioned by
the respondent corporation. (4020)

**Nussif Candy Company,** 2004 Main St., Wheeling, W. Va., is
engaged in the sale and distribution of candy and confectionery
products to wholesale dealers, jobbers and retailers located in
various States. The merchandise is so packed, the complaint
charges, as to involve games of chance or lottery schemes in its
distribution to ultimate consumers. (4023)

**Novelty Home Furnisher—** Jack Puzes, trading as The Novelty
Home Furnisher, 53 West Jackson Boulevard, Chicago, is en-
gaged in the sale and distribution of clocks, cameras, coffee makers
and other articles of merchandise. The complaint charges that
the respondent has distributed to the purchasing public in several
States literature and instructions together with push cards, order
blanks and illustrations of his plan of selling merchandise and of
alloting it as premiums or prizes, by means of the push cards, to
the purchasing public. (4023)

**Purity Products, Inc.—** Charged with misrepresentation in the
sale of "V-Bev," a medicinal preparation, to purchasers and
is editor of "The Journal of Living," published by
Lindlahr. have been served with a complaint. Lindlahr controls the
advertising practices of Purity Products, Inc., with respect to
"V-Bev," and is editor of "The Journal of Living," published by
the New York corporation and used for advertising the Purity
company's preparation.

Advertisements disseminated by the respondents in newspapers
and periodicals and by radio allegedly represented that "V-Bev"
possesses substantial therapeutic value in treating numerous il-
mens, including loss of sleep, nervousness, poor digestion, tired
feeling, lack of energy and run-down condition and that it supplies
the necessary amounts of vitamins B1 and G to persons deficient
therein.

The complaint alleges that the preparation is without therapeutic
value in the treatment of the ailments listed, and that it is a mix-
ture of ordinary foods and does not supply any vitamin deficiencies.
(4021)

**Robert J. Thompson Company,** Philadelphia, Pa., through its
representatives, is alleged to solicit purchasers of its suits or over-
coats under a so-called "Club" plan which the complaint describes
as follows: The respondent supplies each purchaser participating in
the plan with a contract of purchase providing for the sale of a
suit or overcoat for $40. One dollar is paid when the contract is
delivered and one dollar in advance each week thereafter until the
full amount of the contract has been paid. On the contracts the
weekly payments are recorded and each contract bears a "ledger"
number. Should such number correspond with the last three
numerals included in the total number of shares of stock sold on the
Philadelphia Stock Exchange for the preceding week (provided
all the purchaser's weekly payments have been made up to date),
the purchaser receives a suit or overcoat without additional cost.
At the close of the contract period, should the ledger number have
failed to correspond with the last three numerals in the stock
exchange weekly total at any time during the period, the customer
will have paid $40, the normal retail price of the suit or overcoat.
The complaint alleges that the amount paid by the ultimate
consumer for a suit or overcoat is thus determined wholly by lot
or chance. (4027)

**CEASE AND DESIST ORDERS**

The Commission has issued the following cease and
desist orders during the past week:

**Exclusive Retail Liquor Dealers Assn.—** See Milton S. Kron-
heim & Son, Inc.

**Globe Distributing Company, Inc.—** See Milton S. Kronheim
& Son, Inc.

**International Distributing Corp.—** See Milton S. Kronheim
& Son, Inc.

**Milton S. Kronheim & Son, Inc.—** Resale price maintenance
by agreement and threats of boycott are among practices pro-
hibited in an order to cease and desist issued against six Washin-
gton wholesale liquor dealers, a wholesale and a retail trade asso-
ciation, and the secretary of the latter association.

The respondents are: Milton S. Kronheim & Son, Inc., 3301 K
St., N.W.; Marvin & Sneed Sales Corporation, 219 G St., N.W.;
International Distributing Corporation, 917 E St., N.W.; Wash-
ington Wholesale Liquor Corporation, 1119 Twenty-first St.,
N.W.; Globe Distributing Company, Inc., 2410 Eighth Place,
N.E.; Philip Hurwitz and Leon Samet, trading as Roma Wine
& Liquor Company, 1006 Fifth St., N.W.; Wholesale Liquor
Dealers of Washington, 15 and K Sts., N.W.; D. C. Exclusive
Retail Liquor Dealers Association, 829 Woodward Building, and
Manuel J. Davis, secretary and attorney for the retailers' asso-
ciation.

The D. C. Exclusive Retail Liquor Dealers Association, Wood-
ward Building, is an incorporated trade association of retail
liquor dealers with approximately 175 members, operating licensed
retail liquor stores selling packaged liquors. Wholesale Liquor
Dealers of Washington, Investment Building, is a voluntary mutual
association which had, when the complaint was issued, a member-
ship of 14 wholesale liquor dealers, including the respondent
wholesalers. Each organization is found to have been engaged in
attempting to procure national legislation and other regulations
deemed to be beneficial to its members, and in enforcing observance
by its members and others of price maintenance policies with respect
to the sale of alcoholic beverages.

The Commission finds that to carry out their resale price mainte-
nance policies, the respondent wholesale dealers entered into un-
lawful contracts, agreements and understandings with the retail
dealers, and that, pursuant to such contracts and agreements, for
the purpose of maintaining uniform minimum resale prices of
alcoholic beverages sold by various retail dealers in the District
of Columbia, the respondent wholesalers, their association, the
retailer association and its members, and Manuel J. Davis, have:
Appointed committees and joint committees to confer with the
respondent associations, and by means of unlawful pressure, influ-
ence, coercion, boycotts and threats of boycotts, demanded and
obtained from distiller-sellers and distributors outside the District
of Columbia, and from each other, the adoption and maintenance
of systems or policies of merchandising, fixing standard uniform
minimum resale prices, discounts and "mark-ups" at which
alcoholic beverages were resold by wholesalers and retail dealers
in commerce in the District of Columbia. (3400)

**Marvin & Sneed Sales Corporation—** See Milton S. Kronheim
& Son, Inc.

**Roma Wine & Liquor Co.—** See Milton S. Kronheim & Son, Inc.

**Washington Wholesale Liquor Corp.—** See Milton S. Kron-
heim & Son, Inc.

**Wholesale Liquor Dealers of Washington—** See Milton S.
Kronheim & Son, Inc.

**STIPULATIONS**

The following stipulations have been entered into by the
Commission:

**American Automatic Devices Company,** Harrison, Throop
and Congress Sts., Chicago, in the sale of a so-called fog lamp
for use as an auxiliary driving light for motor driven vehicles
under the trade designation "Hy-Power No. 19" stipulates that it
will discontinue use in advertising matter of representations the
effect of which may tend to convey the impression that the beam
of light produced by the device is such that it will illuminate the
road in a dense fog so as to assure safe driving for 1,100 feet
ahead or that it will penetrate, go under or undermine such fog
or give any substantial visibility in fog or thick mist. (2670)

4043

February 16, 1940
Holland Manufacturing Company—See Waterbury Tack Company.

George J. Kelly, Inc., Lynn, Mass., manufacturer of shoe polish pastes, liquids and dyes, stipulates that it will discontinue representation in advertisements tending to convey the impression that its paste product is composed of Carnauba wax and turpentine, liquids and dyes, stipulates that it will discontinue representing that a self-service package, or container it furnishes dealers descriptive of the wax and turpentine content, shall be accompanied by other words in equally conspicuous type and so clearly that the product contains other ingredients as well as wax and turpentine. The respondent also agrees to cease representing that a self-service package, or container it furnishes dealers who purchase its product, is patented, when such is not a fact. (2666)

Martin Studios—Misleading representations in the interstate sale of photographs are to be discontinued under a stipulation entered into by George Edward Martin, trading as Martin Studios, 6365 Second Boulevard, Detroit, a photographer specializing in children's and babies' pictures. The respondent's pictures were sold through photographers stationed in department stores. The respondent agrees to cease representing that photographs or pictures made by him are of the highest quality and will compare favorably with others done by professional photographers, that the time of taking the order, when such are not the facts. The respondent also stipulates that he will discontinue use of statements or representations the effect of which may tend to convey the belief to purchasers that a finished photograph, portrait or picture of a particular person, subject, thing or object will be given free, that the customer's order will be promptly filled and delivered, or that the customer's money will be refunded or suitable adjustment made in case of dissatisfaction, unless and until such statements or representations are bona fide and the promises made or implied thereby actually are fulfilled. (2668)

Morgan Packing Company—J. S., I. C., and I. H. Morgan, trading as Morgan Packing Company, Austin, Ind., agree to cease representing that their prepared dog and cat food is a "Balanced Ration" or is a balanced food suitable for dogs and cats of every breed and age; that any of the food's ingredients are meat by-products, unless the food consists of meat by-products, properly so-called; that the food contains 50 per cent protein meat and bone scraps or any percentage thereof in excess of the correct amount or ratio; and to discontinue omitting any substantial ingredient such as the water content from the printed formula of the food, or continuing to list therein molasses, tomatoes or other ingredients which are no longer included in such products. (2669)

Nahm Photogravure Company—Horace H. Nahm and Jack S. Heller, trading as Nahm Photogravure Company, New York, designers of letterheads for business stationery, agree to cease representing that their business includes the manufacture of letterheads or other articles so long as they neither own, operate nor control the plant in which such products are made. (2665)

Odo-Ro-No Company, Inc., 191 Hudson St., New York, distributor of a deodorant designated "Odorono", agrees to cease representing in any manner that the results to be obtained from the use of Odorono are unqualified, immediate and absolute, as implied by such words and phrases as "no possibility", "insure", "stop", "instantly" and "always". The Odo-Ro-No Company further agrees not to publish or cause to be published any testimonials containing representations contrary to the foregoing agreement. (02508)

Parker's Tar Soap, Inc., 101 West 31st St., New York, in connection with the sale of a medicinal preparation for the hair designated "Scalp tone", agrees to cease representing that all dandruff is due or usually due to an infection with Pityrosporon ovale or any other organism; that the respondent's product, used either alone or in combination with any other product, will eradicate, prevent, cure, or rid the scalp of dandruff permanently, arrest falling of hair or increase its growth, except when limited to such results as may be achieved by its action in cleansing the scalp and stimulating the circulation of the hair follicles; that "Scalp tone" disinfects the scalp and constitutes a complete scalp treatment; that experts generally are of the opinion that baldness is due to wetting of the hair; that dandruff is generally the cause of baldness, or that any organism is recognized as "the dandruff germ." The respondent further agrees not to publish any testimonials containing representations contrary to the foregoing agreement. (02507)

Paty Company—Joseph Paty, trading as The Paty Company, Cambridge, Mass., in the sale of sewing needles, agrees to desist from selling imported articles not distinctly marked to show the country of origin and to discontinue using on the book or other container, of such products the phrase "Printed in U. S. A.", or the letters "U. S. A.", in connection with other words so as to imply that such articles are of domestic origin, or the effect of which tends to confuse buyers with respect to the identity of the country of origin of the products. (2667)

Printwell Company—See U. S. Name Plate Company.

Roebling Fur Shop—David Borenstein and Samuel Mesear, trading as Roebling Fur Shop, 118 West 27th St., New York, agree to desist from use in advertisements or on labels, tags, brands or otherwise, of any designation of a fur which deceptively conceals the true name or nature of the fur with the tendency or effect of misleading buyers or consumers; from using any trade name such as "Sealine," "Beaverette," "Marmink," "Squirrelette" or "Minkolette" in a manner calculated to mislead purchasers as to the character, name, nature or geographical or zoological origin of any fur or fur product or an article made partly of fur, and from the use, falsely or deceptively, in advertisements, tags, labels or brands of any trade name or coined name such as "Cocoalette" or other words descriptive of a fur as being the fur of an animal which is in fact non-existent. The respondents also stipulate that they will cease the sale, through advertisements or otherwise, of fur-trimmed garments the fur of which is composed of pieces and not of full skins, or of fur garments made in whole or in part of pieces, tails, paws, throats, heads or scars, or of plate or mats composed of pieces and not of full skins, without fully disclosing such fact. (2671)

Scientific Instruments, Inc., 3410 West Sixtieth Place, Chicago, has accepted a stipulation to end misleading representations in the sale of a birth control device designated "The Rule of Life." The respondent's device has been advertised as "a slide rule which calculates accurately the sterile and fertile cycles according to the Ogin-Knaus-Rhythm Theory." However, in its stipulation, the respondent corporation admits that according to the weight of reliable medical opinion at present, no method of calculating such periods can always be relied upon. The respondent agrees to cease representing that the "Rule of Life" or "O-K Calendar," or any other device operating upon the same theory, provides a method of complete, or any definitely stated percentage of birth control. (02506)

Shelton Tack Company—See Waterbury Tack Company.

U. S. Name Plate Company—Maurice Willens, trading as U. S. Name-Plate Company or United States Name-Plate Company, and as The Printwell Company, Shelton, Conn., in the interstate sale of metal "Social Security" plates, agrees to cease representing that agents, dealers or others engaged in the sale or resale of such products make commissions of $10 to $25 every day or 40 per cent profit, and that prospective agents, dealers or others can make profits or earnings within a specified period of time which are stated or descriptive of the average net profits or earnings which have theretofore been consistently made in like periods of time by the respondent's active, full-time agents, dealers or others in the usual course of business. (2672)
Waterbury Tack Company, Inc., Shelton Tack Company, and Holland Manufacturing Company, Baltimore, Md., all owned and officered by Herbert S. and Howard E. Holland, in the interstate sale of thumb tacks, agree to desist from use of the words "Made in U. S. A." as a mark, stamp, brand or label for such articles or to otherwise advertise them in a manner implying that the products are of domestic origin. The stipulation provides that if products of foreign origin or make are treated to improve their appearance or for other purpose in the United States and reference is made to such treatment, then suitable words are to be employed to indicate clearly that the commodities are merely treated or processed in the United States but are not manufactured here.

Wild Drug Company, 405 Ninth St., Huntington, W. Va., has entered into a stipulation to end certain misleading representations in the sale of "Wild's Cold Capsules" and "Wild's Cough Syrup."

The respondents agree to cease advertising that they manufacture either product; that the cold capsules have a tonic effect or have value in building up body resistance; that they will stop colds or prevent their development; that they will provide relief from colds, unless this is expressly limited to relief of certain symptoms, or that all ingredients of the capsules are harmless. Under their stipulation, the respondents agree to cease representing that the cough syrup will prevent the development of colds; that it will relieve bronchial troubles or colds, unless the relief is expressly limited to certain symptoms, and that it will stop any cough or afford relief from a cough regardless of its severity.

FCC DISMISSES COMPLAINT

The Federal Trade Commission has dismissed without prejudice a complaint charging The Sperry Corporation, 30 Rockefeller Plaza, New York, a holding corporation, with violating Section 7 of the Clayton Act by acquiring the capital stock of two competing corporations, the Waterbury Tool Company, Waterbury, Conn., and Vickers, Inc., Detroit. The Sperry Corporation owns several subsidiary companies which manufacture nautical and aviation instruments and mechanisms.
Convention August 4 in San Francisco

The NAB convention is set for August 4-5-6-7 in San Francisco. The hotel will be announced later.

The Board of Directors fixed these dates at its meeting this week after it was determined that the political conventions probably would be out of the way by August 1 at the latest.

Within a few weeks, the NAB will ask all Eastern and Midwestern members whether they would be interested in an all-expense tour from Chicago, that would include a circle trip through the principal scenic areas of the West. If sufficient interest is shown, such a tour will be arranged for members and their families.

Howard Lane, KFBK, Sacramento, District 15 Director, will be in charge of arrangements for activities outside the convention.

The progress of Broadcast Music, Inc., and pending legislation were thoroughly discussed at the Board’s two day meeting. Neville Miller’s report on Broadcast Music, Inc., was enthusiastically received and approved. The Legislative Committee, headed by John A. Kennedy, WCHS, met with the Board to discuss the Johnson (D-Colo.) bill to ban radio advertisement of alcoholic beverages; the new Ditter (R-Penna.) radio bill, copyright, and other legislation.

Among important plans approved by the Board were the following:

1. The development of a unit plan for the measurement of radio advertising and various classifications thereof in local markets. Since the Board abandoned the measurement of radio advertising in terms of dollar volume, the industry has been in need of some uniform measuring method. In the past few months a new unit plan has been under development by the NAB Research Department and the Bureau of Radio Advertising. With the Board’s approval, this will be brought to completion and will be presented to the Board for final consideration at its next meeting.

2. A national survey of children’s programs, jointly sponsored by the NAB and the newly formed Radio Council on Children’s Programs. Representatives of the Council will visit stations, advertisers, program builders and women’s groups in 44 states in the next eight months. Information uncovered will be made available to stations, sponsors and program building agencies.

3. A coordinated industry-wide effort to inform the listening public of improvements to be expected in the switch-over of stations called for in the reallocations to be made this

(Continued on page 4048)
CONVENTION AUGUST 4 IN SAN FRANCISCO
(Continued from page 4047)

year in conformity with the Havana Treaty. As soon as
definite instructions are received from the Commission,
Headquarters will proceed with its plans to assist in an
orderly switch-over which will prevent listener confusion
and loss of audience.

4. The development of a consumer-relations program
in cooperation with representative industries and business
groups.

5. The development of an institutional campaign during
the presidential election year, around the theme
"Listen Before You Vote."

6. A new schedule of dues for associate members was
adopted.

DITTER SEEKS "FREE SPEECH" IN NEW
RADIO BILL

A bill (H. R. 8509) to amend the Communications Act
which was introduced in the House last Friday by Rep-
resentative J. William Ditter (R-Penna) is of great
interest to broadcasters.

In explaining its purposes, Representative Ditter said:

"This bill consists of a series of amendments designed,
so far as possible, to protect broadcasting against any
encroachment on liberty of expression, including freedom
of speech and of the press guaranteed by the First Amend-
ment to our Constitution and freedom from censorship
generally. It is unnecessary that I point out how vitally
important it is that the public be afforded this protection.
Broadcasting rivals the press as an agency of mass-com-
munication. Freedom of expression is the cornerstone
of representative government. Censorship of radio is a
characteristic of autocracy and totalitarianism.

"Contrary to the clearly expressed intent of Congress,
the Federal Communications Commission is claiming the
power to censor radio programs. It appears to have
found a gap in the present law in the phraseology 'public
interest, convenience or necessity', which, together with
the device of short-term licenses and a procedure built on
applications for renewal of license, enables it to force
broadcasters to comply with its own conception of what
programs should or should not be, under threat of having
to go through hearings and with the hazard of losing
their right to continue in business.

"The law also gives altogether too much power to the
President to reach the same result. He may put a station
out of existence or severely cripple it by simply assigning
its frequency to a government station without any state-
ment of reasons or hearing. Also, he may do about any-
thing he chooses with a station, even including taking it
over and letting a government department operate it,
by simply declaring that there exists a 'national emergency
or in order to preserve the neutrality of the United States'.

"In this bill, I am seeking to cure the defects in the
existing law.

"Section 1 inserts a clear statement of the purpose of
Congress to secure liberty of expression for radio so
there may be no doubt in the matter.

"Section 2 places a limitation on the power of the
President to assign a frequency used by a privately-
owned station, to a government station, by requiring that
either an equally desirable frequency be given to the
privately-owned station or that there be a hearing.

"Section 3 prescribes a minimum license period of
three years for broadcasting stations, with a maximum
of five years, and eliminates a clause which might other-
wise be susceptible of an interpretation giving the Com-
mssion power to consider program service on renewal
applications.

"Section 4 removes an ambiguity in the hearing provi-
sions of the Act under which the Commission is now
claiming the power to take action adversely affecting
existing stations without giving their owners any right
to be heard.

"Section 5 eliminates an unduly harsh section of the
provisions governing revocation of license so as to make
it clear that the hearing is to be held before and not
after the order of revocation.

"Section 6 is the most important provision of this bill.
It states in language which I hope is too clear to be mis-
understood that the Commission is not to refuse renewal
applications or take any other action against licensees
on the ground that a station’s programs do not meet the
Commission’s ideas of what constitutes 'public interest,
convenience or necessity'.

"Section 7 limits the power of the President to take
over stations to cases of imperative military need during
actual war or a state of insurrection equivalent to war.

"I need not dwell on how vitally important it is that
freedom of speech be preserved for radio. It is the public
platform of today and should have a protection corre-
sponding to that given to the press. At least, it should
be for Congress to determine, and not for a bureaucratic
board in Washington, whether any types of utterance,
farther than those already specifically forbidden by the
law, should be prohibited."
Broadcasters' attention is directed to Representative Ditter's remarks on the bill printed in the Congressional Record, February 16, 1940, page 2450.

The text of the bill follows:

H. R. 8509

A BILL

To amend the Communications Act of 1934 in order to preserve and protect liberty of expression in radio communication.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 301 of the Communications Act of 1934 is hereby amended by inserting after the words, "It is the purpose of this Act, among other things, to maintain a system of radio communication which shall serve all the channels of interstate and foreign radio transmission;" the words, "to preserve to radio communication, and to persons subject to the provisions of this Act, freedom from governmental abridgment of, or interference with, liberty of expression, including freedom of speech and of the press, and other rights guaranteed under the Constitution of the United States and the amendments thereof;".

SEC. 2. Section 305 (a) of the Communications Act of 1934 is hereby amended by adding thereto the following:

"The President may not, however, either permanently or temporarily assign a frequency to any Government station or class of Government stations if the use of such assignment will make impossible the further operation of, or cause objectionable interference to, any radio station duly licensed or authorized to be constructed by the Commission under this Act unless (a) another frequency assignment of substantially equal or superior desirability is made immediately available for use by such licensed or authorized radio station or (b) the Commission, after notice and hearing pursuant to the procedure prescribed in section 312 (b) of this Act, shall have determined that public interest, convenience, or necessity will be promoted by such assignment and shall have entered an order modifying the permit or license accordingly."

SEC. 3. Section 307 (d) of the Communications Act of 1934 is hereby amended to read as follows:

"No license granted for the operation of any class of station shall be for a longer term than five years, and any license granted may be revoked for cause as hereinafter provided. No license granted for the operation of a station regularly engaged in broadcasting (other than a station of experimental, auxiliary, or temporary character) shall be for a term less than three years. Upon the expiration of any license, upon application therefor, a renewal of such license may be granted from time to time for a term not to exceed five years and, in the case of stations regularly engaged in broadcasting, not less than three years."

SEC. 4. Section 309 (a) of the Communications Act of 1934 is hereby amended to read as follows:

"If upon examination of any application for a construction permit, for a station license, or for the renewal or modification of a construction permit or a station license and the securing of full information with respect thereto, the Commission shall determine that public interest, convenience, or necessity would be served by the granting thereof, it shall authorize the issuance of such construction permit or station license, or of such renewal or modification thereof, in accordance with said finding. In the event the Commission does not reach such a decision with respect thereto, or in the event that the issuance of a construction permit or a station license or of any modification thereof would aggrieve or adversely affect the interests of the holder of any permit or license or any applicant therefor, the Commission shall notify the applicant and other interested parties, shall fix and give notice of time and place for hearing thereon, and shall afford such applicant and other interested parties an opportunity to be heard under such rules and regulations as it may prescribe."

SEC. 5. Section 312 (a) of the Communications Act of 1934 is hereby amended to read as follows:

"Sec. 312. (a) Any station license may be revoked for false statements either in the application or in the statement of fact which may be required by section 308 hereof, or because of condition of such station as revealed by the Commission, and revoked from time to time which would warrant the Commission in refusing to grant a license on an original application, or for failure to operate substantially as set forth in the license, or for violation of or failure to observe any of the restrictions and conditions of this Act or of any regulation of the Commission authorized by this Act or by a treaty ratified by the United States: Provided, however, That no such order of revocation shall be entered unless the Commission shall first have given the licensee written notice stating clearly and definitely the charges against the licensee and fixing a time and place for a hearing thereon, and shall have given the licensee an opportunity for hearing. Such hearing shall be held not less than fifteen days after service of such notice on the licensee, and the Commission shall sustain the burden of proving the truth of the charges."

SEC. 6. Section 326 of the Communications Act of 1934 is hereby amended by adding thereto the following:

"No construction permit or station license shall be revoked, modified, or otherwise adversely affected by any action of the Commission, and no application for construction permit, station license, renewal, or modification of station license, or other instrument of authorization required or authorized by the Act shall be refused in whole or in part, because of the character or contents of any program or other communication transmitted or proposed to be transmitted by a radio station, unless such program or other communication contains matter expressly forbidden by specific provision of this Act or by regulation of the Commission authorized by this Act and then only after the license has been finally adjudged guilty by a Federal court of one or more violations of such provision or provisions and the offense is of so serious or repeated a nature as to show clearly that the licensee or applicant is not qualified in character to operate or to continue to operate a radio station."

SEC. 7. Section 606 (c) of the Communications Act of 1934 is hereby amended by adding thereto the following:

"Nothing in this section, however, shall be construed to modify or affect section 326 of this Act. No station regularly engaged in broadcasting shall be closed, nor shall its apparatus or equipment be removed, nor shall the use or control of any such station or of its apparatus or equipment by any department of the Government be authorized in whole or in part because of the character or contents of any program or other communication transmitted or proposed to be transmitted by such station, or in order to permit the Government or any department or agency thereof to engage in or control broadcasting or otherwise to communicate with the public, or for any cause other than imperative military need for such radio communication facilities on the part of the armed forces of the United States and then only upon proclamation by the President that there actually exists war in which the United States is engaged or a state of insurrection within the United States equivalent to war."

CLARK BLOCKS JOHNSON BILL

CONSIDERATION

Monday afternoon Senator Clark (D-Missouri) blocked consideration of the bill (S. 517) to prohibit radio advertising of alcoholic beverages. Senator Johnson (D-Colo), proponent of the measure, which is strongly opposed by NAB, had intended to move consideration of his bill. In
We object to the way the bill is drawn. It makes compliance a condition of the license and in the event of non-compliance it becomes mandatory on the Commission to revoke the license. Under the Communications Act compliance with the prohibition against proselytizing, indecent and obscene language is not made a condition of the license, nor is compliance with the requirement of equal treatment of political candidates before the microphone. To be sure, in those cases the Commission has authority to revoke the license after notice and hearing, but it is not mandatory. The Commission is vested with discretion, after hearing all the facts and any extenuating circumstances, to act as best serves the public interest. Do we want the seal of Congress upon the proposition that a spot advertisement of beer is more reprehensible and dangerous to public morals than profanity and obscenity? In conclusion, we submit that Congress can safely leave the matter where it has lain for 20 years. We are opposed on principle to legislation of this kind, seeking as it does to regulate program content. We are confident that the American people do not want what may well be the entering wedge of censorship driven into the American system of broadcasting by passage of this bill. We doubt the wisdom of taking the risk of burning the barn in order to get a mouse, or rather to chase that mouse into the other fellow's barn.

Note.—This questionnaire was sent by the National Association of Broadcasters to all commercial stations on March 17, 1939.

The NAB has requested the FCC to give a measure of relief to broadcasters under the new Record Rules. Members will be advised as soon as word is received from the Commission.

The NAB letter:

February 16, 1940.

Mr. T. J. Slowie, Secretary,
Federal Communications Commission,
Washington, D.C.

Dear Mr. Slowie:

Permit me to direct your attention to the amendment of Section 393 (e) of the Standard Broadcast Rules effective January 4, 1940, pertaining to the identifying announcement of mechanical records. A literal construction of the rule would require that thousands of one-minute and five-minute transcriptions now on hand using the word "transcribed" instead of "transcription" would have to be made over with great difficulty, and at considerable expense.
These were manufactured at the expense of advertisers at a time when use of the word “transcribed” was permissible. We believe it harsh and unjust if their use be barred under the new rule. It is believed that by August 1, 1940, those electrical transcriptions not in compliance with the rule will have become obsolete.

Because of the burden involved in this connection, it is respectfully requested that as to such transcriptions the operation of the rule may be suspended until August 1, 1940.

It is further requested that Section 3.93 (e) be amended to include appropriate use of the words “transcribed,” “electrically transcribed” and “recorded.” In support of this request it is submitted (1) that the public has become familiar with their meaning and consequently would not be deceived by their use, and (2) that the interests of the listening public would in reality be served by using such an intelligible variation of the announcement to prevent monotonous repetition.

Respectfully yours,

NATIONAL ASSOCIATION OF BROADCASTERS
RUSSELL P. PLACE, Counsel.

WAGE AND HOUR ACT

Questions and answers about the application of the Wage and Hour Act to broadcasting station employees, gathered from the Act, subsequent rules and regulations, opinions of the enforcement agency, and correspondence with member stations:

Q. What, in brief, does the Act provide?
A. That all employees, except those exempt, shall receive at least 30 cents an hour, and shall be paid time and one-half for overtime above 42 hours a week.

Q. What employees are exempt?
A. Executives, professional workers and outside salesmen.

Q. What is an executive?
A. To be an executive, an employee must (a) receive $30 or more a week, (b) regularly direct the work of others, (c) have authority to hire and fire or be consulted seriously about hiring and firing, (d) do no substantial amount of work of the same nature as that performed by those under him, and (e) regularly make decisions of his own.

Q. What is a professional?
A. The ordinary station has none, except musicians and actors. Professional engineers usually could be called professionals, as long as they confined their work to research and experimenting.

Q. Is a "chief engineer" or "program director" ordinarily exempt?
A. No. The Wage and Hour inspectors demand a station's payroll records at any time.

Q. If an employee works more than eight hours a day, must he be paid overtime?
A. No. The Act places no limit on the number of hours he may work without overtime in a day. It merely limits the work week, without overtime, to 42 hours.

Q. How does the employer compute the number of hours worked by the employee?
A. The employer must compute the number of hours worked by the employee, taking into account all his duties for the week. For instance, the regular rate of the employee who ordinarily works 40 hours for $400 is $1 an hour, and his overtime rate, for hours above 42, is $1.50.

Q. What are the penalties for violation of the Act?
A. Criminal penalties are fines up to $10,000 and jail sentences up to six months for second offenders. Employees may sue for double the amount of unpaid wages due them.

Q. Can Wage and Hour inspectors demand a station's payroll records at any time?
A. Yes.

Q. If an employee works more than eight hours a day, must he be paid overtime?
A. No. The Act places no limit on the number of hours he may work without overtime in a day. It merely limits the work week, without overtime, to 42 hours.

Q. How does the employer compute the number of hours worked by the employee?
A. The ordinary station has none, except musicians and actors. Professional engineers usually could be called professionals, as long as they confined their work to research and experimenting.

Q. Is a "chief engineer" or "program director" ordinarily exempt?
A. No. The Wage and Hour inspectors demand a station's payroll records at any time.

Q. If an employee works more than eight hours a day, must he be paid overtime?
A. No. The Act places no limit on the number of hours he may work without overtime in a day. It merely limits the work week, without overtime, to 42 hours.

Q. How does the employer compute the number of hours worked by the employee?
A. The employer must compute the number of hours worked by the employee, taking into account all his duties for the week. For instance, the regular rate of the employee who ordinarily works 40 hours for $400 is $1 an hour, and his overtime rate, for hours above 42, is $1.50.

The NAB Labor Relations Director would be glad to discuss any of the above questions and answers further with any member. Any other questions would be appreciated.

WAGE AND HOUR EXEMPTION FOR SOME CHIEF ENGINEERS

The Wage and Hour Administration says that an employee, to be a bona fide executive and thus exempt from the overtime provisions of the Act, must do no "substantial" amount of work of the same character as that performed by those under him.

Many "chief engineers" in the broadcasting industry meet all the other requirements for a "bona fide execu-
tive" but do a certain amount of work of the same character as that performed by their subordinates.

The NAB Labor Relations Department asked the Administration to set up guide posts for determining whether "chief engineers" were "executives" within the meaning of the Act.

The following correspondence was exchanged:

NATIONAL ASSOCIATION OF BROADCASTERS
WASHINGTON, D. C.

Mr. Rufus Poole,
Associate General Counsel,
Wage and Hour Division,
Department of Labor,
Washington, D. C.

Dear Mr. Poole:
I have been besieged with requests from the managers of broadcasting stations as to whether their chief engineers, under certain conditions, were bona fide executives and thus exempt from the hours limitations of the Fair Labor Standards Act.

In all instances these chief engineers customarily and regularly direct the work of other employees, have the authority to hire and fire or are highly influential in hiring and firing, customarily and regularly exercise discretionary powers and receive $30 a week or more.

However, there is some question as to whether they do any "substantial amount of work of the same nature as that performed by non-exempt employees of the employer". Below are three typical instances. If we could have your opinion as to whether these would be exempt, it would be extremely helpful to an industry that is endeavoring to comply with the Act in every respect.

Chief Engineer X—relieves a subordinate at the studio controls one hour each day while his subordinate goes to lunch.

Chief Engineer Y—acts in a purely executive capacity four days a week but does the work of a subordinate on the fifth day which is the subordinate's day off.

Chief Engineer Z—does no "regular" work of the same character as that done by a subordinate, but, irregularly relieves subordinates in an emergency, in cases of illness, etc.

Very truly yours,
S/JOSEPH L. MILLER,
Director of Labor Relations.

U. S. DEPARTMENT OF LABOR
Wage and Hour Division
WASHINGTON, D. C.

Mr. Joseph L. Miller,
Director of Labor Relations,
National Association of Broadcasters,
Normandy Building,
1626 K Street, N. W.,
Washington, D. C.

Dear Mr. Miller:
This is in reply to your letter of February 1, 1940 in which you inquire as to whether or not three chief engineers of broadcasting companies are engaged in doing a "substantial amount of work of the same nature as that performed by non-exempt employees of the employer" in the three examples given by you.

You state that Chief Engineer X "relieves a subordinate at the studio controls one hour each day while his subordinate goes to lunch". I am enclosing a copy of the Act, together with the hours limitations of the Fair Labor Standards Act.

In all instances these chief engineers customarily and regularly direct the work of other employees, have the authority to hire and fire or are highly influential in hiring and firing, customarily and regularly exercise discretionary powers and receive $30 a week or more.

However, there is some question as to whether they do any "substantial amount of work of the same nature as that performed by non-exempt employees of the employer". Below are three typical instances. If we could have your opinion as to whether these would be exempt, it would be extremely helpful to an industry that is endeavoring to comply with the Act in every respect.

Chief Engineer X—relieves a subordinate at the studio controls one hour each day while his subordinate goes to lunch.

Chief Engineer Y—acts in a purely executive capacity four days a week but does the work of a subordinate on the fifth day which is the subordinate's day off.

Chief Engineer Z—does no "regular" work of the same character as that done by a subordinate, but, irregularly relieves subordinates in an emergency, in cases of illness, etc.

Very truly yours,
S/JOSEPH L. MILLER,
Director of Labor Relations.

YOU state that Chief Engineer Y spends one day out of five in doing the work of a subordinate. It is our opinion that the courts will probably consider 20 per cent of an employee's work to be a "substantial amount", in which event, Chief Engineer Y would be considered to be performing a substantial amount of work of the same nature as that performed by non-exempt employees of the employer.

You state that Chief Engineer Z "does no 'regular' work of the same character as that done by his subordinate, but, irregularly relieves subordinates in an emergency, in cases of illness, etc." It is a question of fact whether or not the "irregularity" of the substitute work performed by Chief Engineer Z constitutes a substantial amount of nonexempt work, and we are unable to add to what has been said in the preceding two paragraphs.

Very truly yours,
S/RUFUS G. POOLE,
Associate General Counsel.

ARBTRATE AFRA DISPUTE

The dispute between Chicago stations and AFRA as to whether announcers should be given fees for local commercial programs is to be submitted to arbitration. This was the decision of a three-man arbitration board, picked to determine whether the dispute should be arbitrated.

FOUR A'S CONVENTION

The 1940 Convention of the American Association of Advertising Agencies will be held May 16-17 at the Waldorf-Astoria, New York.

Sessions for members only are scheduled for Thursday, May 16. On Friday, May 17, advertiser and media guests will be invited to join the agency men in morning and afternoon meetings, and at dinner in the evening.

FCC NOTIFIES STATIONS TO APPLY FOR LICENSES BY JUNE 1

The FCC sent the following notices to all broadcast licensees on February 21:

The Commission having under consideration the carrying out of the provisions of the North American Regional Broadcasting Agreement, on January 29, 1940, issued an order of modification of all outstanding licenses and instruments of authorization for standard broadcast stations, bearing expiration dates after August 1, 1940, and providing that holders thereof should have until February 15, 1940, to show cause why such licenses and authorizations should not be modified so as to expire at 3 a. m., EST, August 1, 1940. No returns to the order to show cause, requests for hearing or protests of any kind have been received by the Commission. Accordingly, the Commission has entered an order making the order of modification final, effective March 1, 1940.

Under the provisions of Sec. 1.360 of the Rules of Practice and Procedure applications for renewal of licenses are required to be filed with the Commission at least 60 days prior to the expiration date of the license sought to be renewed. Accordingly, to comply with the rule, the holders of all standard broadcast station licenses or authorizations which expire August 1, 1940, including those which are modified by the Commission's order of January 29, 1940, are required to file applications for renewal prior to June 1, 1940.

NO RESERVATIONS TO MEXICAN AGREEMENT

The Department of State has advised the FCC that no reservations have been made by Mexico in approving the North American Regional Broadcasting Agreement as
published in the "Diario Oficial" of February 15. It was expected that Cuba, as the depository government, would be notified February 16.

The North American Regional Broadcasting Agreement was signed at Habana, Cuba, at the conclusion of the First Inter-American Radio Conference on December 13, 1937. It was signed by representatives of Canada, Cuba, the Dominican Republic, Haiti, Mexico, and the United States.

The agreement was not to become effective until ratified by Canada, Cuba, Mexico, and the United States. The ratification by Mexico is the last required to make the agreement valid, and permits starting the necessary engineering measures to carry out its provisions.

As pointed out in the Commission's release of January 22, the assignment of some 730 standard broadcast stations may be affected. However, it is not possible to determine definitely any individual assignments until the entire plan is worked out with respect to stations in all the countries which are parties to the agreement. A shift in any one assignment may affect materially the entire plan. Accordingly, all assignments must be worked out in relation to the entire pattern and can be announced only concurrently. The Commission will give due notice to all licensees when the general plan is determined.

NEW UNIVERSITY OF KENTUCKY STATION LICENSED

Proposal by the University of Kentucky to bring mountain people radio programs of cultural and educational value was speeded by the FCC in granting that university a construction permit for a new non-commercial educational broadcast station to operate from Beattyville, Ky., on 41900 kilocycles, 100 watts power, A-3 emission, unlimited time.

Program service of value to both schools and adults is contemplated by the University of Kentucky. Operation will be two hours daily—from noon to 2 o'clock—Mondays through Fridays, and as emergencies and special events warrant. The period from noon to 1 o'clock will be devoted to adult interests, and the remaining period will be intended for the county schools, but will be patterned to appeal to adults as well. Programs will be of a civic, educational, agricultural, and entertaining nature.

The applicant plans to equip the between 50 and 60 mountain schools in Lee County with receivers. The university will bear the cost of the transmitter and receivers, will retain ownership of the equipment, and will supervise the operation through the Lee County Board of Education. The board, for its part, will pay operating expenses including the salary of a supervisor who will promote the use of the service by communities and schools adjacent to the area.

In 1933 the University of Kentucky established a system of remote listening centers where people could hear educational radio programs of standard broadcast stations. On the basis of results, the university feels that there is need for establishment of a system by which localized education and information, both for school children and adults, should be provided for in each of the mountain communities.

This makes only three institutions which have taken advantage of the 25 amplitude modulated channels (41020 to 41980 kilocycles) set aside for non-commercial educational broadcast purposes. The others availing themselves of these frequencies are WBOE, operated by the Cleveland, Ohio, Board of Education, and WNYE, by the New York City Board of Education.

Legislation

FEDERAL LEGISLATION

H. R. 8509 (Mr. Ditter, R.. Pa.) TO AMEND THE COMMUNICATIONS ACT OF 1934 IN ORDER TO PRESERVE AND PROTECT LIBERTY OF EXPRESSION IN RADIO COMMUNICATION—Prohibits Federal Communications Commission's taking adverse action for alleged program offenses; establishes for broadcast stations minimum license period of 3 years and maximum of 5 years; requires hearing where the Commission's action would adversely affect the interest of any holder of a license or any applicant therefor; requires a hearing prior to any order of revocation of license; limits powers of the President in time of peace and war. Referred to Interstate and Foreign Commerce Committee.

STATE LEGISLATION

KENTUCKY:

H. 359 (Barry) ELECTRICAL ADMINISTRATIVE BOARD—An act to create an electrical administrative board.

VIRGINIA:

H. 333 (Long) LOTTERIES—To amend and re-enact Section 4614 of the Code, relating to forfeiture of money and things of value drawn or received or proposed to be drawn in a lottery, so as to include money and personal property used in connection with the promotion, operation and conduct of a lottery or attempted lottery. Referred to Courts of Justice.

VIRGINIA:

S. 217 (Wright) ELECTRICAL WIRING—To regulate and control the installation and alteration of electrical wiring, fixtures, appliances and equipment, to this end to require certain permits to be obtained, to prescribe the fees therefor and to establish standards for electrical equipment. Referred to Finance Committee.

CONGRESSIONAL COMMITTEES

The following are the members of the principal Congressional Committees dealing with Legislation affecting broadcasters:

Senate Committee on Interstate Commerce
Burton K. Wheeler, of Montana, Dem., Chairman.
Ellison D. Smith, of South Carolina, Dem.
Robert F. Wagner, of New York, Dem.
Alben W. Barkley, of Kentucky, Dem.

CALENDAR OF MARCH EVENTS

The following dates will be of interest to members in connection with plans for special programs, promotions, etc. NAB Reports will publish a similar list each month.

March 3—Alexander Graham Bell, born 1847.
March 12—Girl Scout Anniversary Week.
March 14—Eli Whitney patented cotton gin, 1794; Albert Einstein, born 1879.
March 17—Palm Sunday; St. Patrick's Day.
March 17-23—Wild Life Week.
March 20—Spring begins today.
March 21—Good Friday.
March 24—Easter Sunday.
March 30—April 6—Baseball Week.

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

The following hearing is scheduled before the Commission in a broadcast case during the week beginning Monday, February 26. It is subject to change.

Monday, February 26
NEW—William F. Huffman, Wisconsin Rapids, Wisc.—C. P., 1310 kc., 100 watts, 250 watts LS, unlimited time.

FUTURE HEARINGS
During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

March 11
NEW—Lookout Mountain Company of Georgia, Lookout Mountain, Ga.—C. P., 1370 kc., 250 watts, unlimited time.

March 14
NEW—J. D. Falvey, Ottumwa, Iowa.—C. P., 1210 kc., 100 watts, unlimited time.
NEW—Louis R. Spiwak & Maurice R. Spiwak, d/b as L & M Broadcasting Co., Ottumwa, Iowa.—C. P., 1210 kc., 100 watts, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED
Hazelwood, Inc., Orlando, Fla.—Granted construction permit for new station to operate on 1200 kc., 250 watts, unlimited time, Class IV; exact transmitter site and antenna to be determined subject to Commission's approval.
KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Granted modification of license to change hours of operation from unlimited daytime and specified hours night, to unlimited time; station operates on 1370 kc., 100 watts power.
University of Kentucky, Beattyville, Ky.—Granted construction permit for new non-commercial educational broadcast station to operate on 41900 kc., 100 watts power, A-3 emission, unlimited time.

DESIGNATED FOR HEARING
Grand Rapids Broadcasting Corp., Grand Rapids, Mich.—Application for construction permit for new station to operate on 1200 kc., 250 watts, unlimited time, Class IV station.
Worcester Broadcasting Corp., San Diego, Calif.—Application for construction permit for new station to operate on 1210 kc., 250 watts, unlimited time.

MISCELLANEOUS
W9XEH—Zenith Radio Corp., Chicago, Ill.—Granted license to cover construction permit for new high frequency broadcast
station; frequency 42500 kc., power 1000 watts; granted upon an experimental basis only, conditionally.

W1XKB—Westinghouse Electric & Mfg. Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with high frequency (experimental) station W2XMN, Alpine, N. J. on 12250 kc., for period not to exceed 30 days in order to obtain data for the hearing on aural broadcasting on frequencies above 25 mc.

Louis R. Spiwak & Maurice R. Spiwak, d/b as L & M Broadcasting Co., Ottumwa, Iowa.—Granted petition for construction permit for new station to operate on 1210 kc., 100 watts, unlimited time.

J. D. Falvey, Ottumwa, Iowa.—Granted petition to intervene in re application of Louis R. Spiwak and Maurice R. Spiwak, d/b as L & M Broadcasting Co., Ottumwa, Iowa, for construction permit for new station to operate on 1210 kc., 100 watts, 250 watts LS, unlimited time; also, the Commission, on its own motion, consolidated the L & M Broadcasting Co. case and the Falvey case.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Denied petition to reopen hearings in re applications of Enrique Abarca Sanfeliz, San Juan, P. R., for construction permit for new station to operate on 380 kc., 1 kw, 5 kw LS, unlimited time, and of United Theatres, Inc., San Juan, P. R., for construction permit for new station to operate on 380 kc., 1 kw, unlimited day and night, on February 20, 1940, and Granted extension of commencement date, on its own motion, consolidated the L & M Broadcasting Co., case and the Falvey case.

Lookout Mountain Co. of Georgia, Lookout Mountain, Ga.—Granted petition for continuance of hearing from February 19 to March 11, 1940, in re application for construction permit for new station to operate on 1570 kc., 250 watts, unlimited time.

WGBF—Evansville On the Air, Inc., Evansville, Ind.—Granted motion to accept amendment so as to designate a new site and to slightly modify the proposed directional antenna, in re application for construction permit to change from 650 kc., 500 watts day and night, shares KFRU night, to 1250 kc., 1 kw, 5 kw LS, unlimited time (DA night).

E. E. Kiefer, Metropolitan Broadcasting Corp. (WMBQ), Long Island, N. Y.—Granted petition in re application of Metropolitan Broadcasting Corp. for construction permit for new station to operate on 580 kc., 1 kw, unlimited day and night, frequency 1200 kc., 100 watts night, 250 watts day; frequency 1790 kc., power 150 watts.

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted modification of construction permit and modification thereof for new station, for extension of time of completion from February 27, 1940 to August 27, 1940.

WRC—Sidney Broadcasting Corp., Portable-Mobile (area of Syracuse, N. Y.).—Granted license to cover construction permit and modification thereof for new broadcast station, for move of studio location; frequency 1590 kc., power 100 watts day and night, 250 watts day power, unlimited time; also granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

Norwich Broadcasting Co., Norwich, Conn.—Granted license to cover construction permit for new station, for extension of time of completion from February 27, 1940 to August 27, 1940.

WMFJ—W. Wright Esch, Daytona Beach, Fla.—Granted license to cover construction permit for new equipment and increase in power from 100 watts to 250 watts; frequency 1210 kc., 250 watts, unlimited time; granted conditionally.

CST, to the conclusion of basketball games on February 23, 1940.
Falkland Highway, 1 1/2 miles West of town, near Greenville, N. C.

KEX—The Oregonian Publishing Co., Portland, Ore.—Granted special temporary authority to operate a portable 100 watt transmitter on frequency 1190 kc., in the vicinity of Port¬land, Ore., for a period of not to exceed 30 days, in order to make tests for a suitable transmitter location.

W9XYH—Head of the Lakes Broadcasting Company, Superior, Wis.—Granted modification of construction permit as modified, for new station, to extend date of completion to May 12, 1940.

WEHK—Columbia Broadcasting System, Inc., Portable-Mobile (area of New York, N. Y.).—Granted license to cover construction permit to change equipment and increase power to 2 watts.

WAUW—J. T. Ward, tr. as WLAC Broadcasting Service, Portable-Mobile (area of Nashville, Tenn.).—Granted license to cover construction permit for new relay broadcast station; frequencies 39890, 39970, 39890 kc., power 2 watts.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Denied petition for hearing before a Commissioner in re application for renewal of license; station operates on 1200 kc., 100 watts, unlimited time.

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate from 7:45 p. m. to 9:15 p. m., CST, on March 10, 17, 24, and 31, 1940, in order to broadcast church services only, using 250 watts power.

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted special temporary authority to operate from 1000 p. m. to 9:00 p. m., EST, on February 24, 1940, in order to broadcast an address by the National President of Exchange.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Granted special temporary authority to operate with power of 250 watts from 5:15 p. m. to 5:30 p. m., CST, on February 22, 23, 24, and from 8:00 p. m. to 9:30 p. m., CST, on February 22, 23, 29, March 1 and 2, 1940, in order to broadcast basketball games only to listeners within WLAP's coverage not adequately served by 100 watts power.

WMRO—Martin R. O'Brien, Aurora, III.—Granted special temporary authority to operate with power of 100 watts from 7:00 p. m. to 10:30 p. m., CST, on February 24, 1940, in order to broadcast basketball game only.

W1XKB—Westinghouse Electric & Manufacturing Co., Boston, Mass.—Granted special temporary authority to operate on frequency of 45.4 mc., using both A-3 and special emission, the special emission being frequency modulation, for a period not to exceed 30 days, in order to obtain additional data for the forthcoming hearing on aural broadcasting on frequencies above 25 mc.

KQRS—Mason City Globe-Gazette Co., Portable-Mobile (area of Mason City, Iowa).—Granted license to cover construction permit for a new relay broadcast station, frequencies 1622, 2638, 2150, 2790 kc., power 2 watts.

KEHI—WDAY, Inc., Fargo, N. D.—Granted license to cover construction permit to change location of transmitter from portable-mobile to fixed location.

KGKL, Inc., Portable-Mobile (area of San Angelo, Tex.).—Granted construction permit for new relay broadcast station, frequencies 1622, 2638, 2150, 2790 kc., power 20 watts.

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Granted modification of construction permit for move of transmitter and changes in antenna, for extension of completion date from March 6, 1940 to September 6, 1940.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

KCMA—KCMO Broadcasting Co., Kansas City, Mo.—Granted license to cover construction permit for installation of new transmitting equipment and increase in power from 1 KW to 1 KW night, 5 KW daytime; frequency 1450 kc., unlimited time, directional antenna night.

WLEU—WLEU Broadcasting Corp., Erie, Pa.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Granted authority to determine operating power of main transmitter and of auxiliary transmitter by direct measurement of antenna input in compliance with Section 3.54.

WAWZ—Pillar of Fire, Zarephath, N. J.—Granted construction permit to make changes in transmitting equipment.

WEPA—Edwin H. Armstrong, Portable-Mobile (area of New York, N. Y.).—Granted modification of construction permit for new special relay broadcast station for extension of completion date to October 7, 1940.

APPLICATIONS FILED AT FCC

560 Kilocycles

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—Construction permit to increase power from 1 KW; 5 KW day to 5 KW day and night. Make changes in directional antenna. Amended: changes in antenna system.

570 Kilocycles

WMCA—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—Authority to determine operating power by direct measurement of antenna power.

WSVR-WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Authority to transfer control of corporation from M. S. Wilder to H. C. Wilder, 1500 shares common stock.

580 Kilocycles

KMJ—McClatchy Broadcasting Co., Fresno, Calif.—License to cover construction permit (B5-P-2277) as modified for increase in power, move transmitter and install new transmitter and antenna.

WMJ—McClatchy Broadcasting Co., Fresno, Calif.—Authority to determine operating power by direct measurement of antenna power.

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Construction permit to install directional antenna for night use and increase power from 500 watts night 5 KW day to 5 KW day and night.

820 Kilocycles

WHAS—The Louisville Times Co., Louisville, Ky.—Modification of license to change corporate to Courier-Journal and Louisville Times Company.

860 Kilocycles

WHR—WHR Broadcasting Co., Kansas City, Mo.—Construction permit to install new transmitter, new antenna, increase power from 1 KW to 50 KW and move transmitter from North Kansas City to in or near Kansas City, Mo. Amended re equipment.

890 Kilocycles

WBA—Purdue University, W. Lafayette, Ind.—Construction permit to install new transmitter, make changes in antenna, change hours from specified to unlimited time, increase power from 500 watts night, 1 KW day to 1 KW night, 5 KW day.

KTKC—Tulare-Kings County Radio Associates, Chas. A. Whitmore, Pres., Visalia, Calif.—Construction permit to make changes in equipment. Amended re equipment.

920 Kilocycles

NEW—Jerome Raymond Popkin-Clurman, New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 42000 to 121400 ke, 1000 watts, unlimited time, special emission for frequency modulation. Amended: To request 12400 ke.
NEW—The Fort Industry Co., Toledo, Ohio.—Construction permit for a new high frequency broadcast station to be operated on 42300 ke, 250 watts, unlimited time, special emission for frequency modulation. Amended: To change power to 1000 watts and change type of transmitter.
NEW—The May Department Stores Co., Los Angeles, Calif.—Construction permit for a new television broadcast (experimental) station to be operated on $4000-90000 ke, aural and visual power, 1 KW, emission A-3 and A-5. Amended: To add Model No. of sound transmitter.
NEW—Frequency Broadcasting Corp., Brooklyn, N. Y.—Construction permit for a new high frequency broadcast station on 452900 ke, 50000 watts, unlimited time. Special emission. Location: 1 Hansom Place, Brooklyn, N. Y.
The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Cup and Container Institute, Inc., 420 Lexington Ave., New York, 10 of its officers and directors and 12 corporations controlling more than 60 per cent of the national output and sale of products of the paper drinking cup and paper food container industry, have been served by the Federal Trade Commission with a complaint alleging a combination and conspiracy to restrain trade through the fixing and maintaining of uniform minimum prices. Eleven of the 12 respondent corporations are or have been members of the institute.

Beginning with the formation of the respondent institute in January, 1933, the corporate respondents, through the respondent institute, are alleged to have effectuated agreements and understandings under the supervision of the responding institute, whereby prices and terms of sale were uniform as to comparable products and classification of customers; (2) maintenance of identical price lists on comparable products, and simultaneous changing of prices and terms and conditions of sale, including maximum discounts and classification of customers; (3) adherence to a schedule of minimum prices and uniform discounts, terms and conditions of sale, including maximum discounts and classification of customers; (4) maintenance of identical price lists on comparable products, and simultaneous changing of prices and terms and conditions of sale, including maximum discounts and classification of customers; (5) operation of a procedure for the introduction of new products by any member respondent or other manufacturer cooperating with the institute whereby, among other things, prices and terms of sale were uniform as to comparable products either directly or through their distributor agents to Municipal, State or Federal purchasing departments.

In order to better effectuate their understandings and agreements the corporate respondents and those manufacturers cooperating with the institute are alleged to have divided the products of the industry into 9 different groups and to have classified their respective products falling within each group, and to have filed with the institute, daily, weekly, monthly, or periodic statistics, including, among other things contracts, invoices, and gross or net sales in both dollars and in units for the previous month's operations.

Through its president and executive director, Granville P. Rogers, and its vice president, Dale H. Eckerman, the institute is alleged to have so supervised the activities of the corporate respondents and cooperating manufacturers that adherence to the agreed prices and terms of sale has been obtained. According to the complaint, this was accomplished by collecting from and disseminating among them information as to prices, discounts and conditions of sale and other useful information.

The effect of the respondents' acts and practices is alleged to have been unlawful restriction of trade, artificial enhancement of prices and elimination of competition, with a tendency to create a monopoly in the member respondents and those cooperating with them and the institute. (4056)

Le Flor Company—Leland F. Benham, trading as Le Flor Company, 620 North Orleans St., Chicago, distributor of a medicinal preparation for the treatment of obesity, is charged in a complaint with misrepresentation.

The medicinal preparation is described as “Le Flor Weight Reduction Tablets” and is sold under the name “Le Flor Method”. Prior to August, 1937, the respondent conducted his business under the trade name Dixie Products Company, and subsequent to that time as Le Flor Company.

In advertisements in newspapers and periodicals, the complaint continues, the respondent has represented:

“We do not ask you to believe, we merely ask you to try the Le Flor Method and judge for yourself. You may have become skeptical after trying other highly advertised methods that were not suited to you, but we ask that you do yourself the favor of trying the Le Flor Method with the certain knowledge that if you are not entirely satisfied with the results you obtain, your money will be refunded.”

* * * * *

“The usual price is $2.00 per box. As an introductory feature we are offering the LE FLOR method as a six weeks’ treatment at the price of 6 boxes for $3.00. If you are skeptical, we offer a one week’s supply of 84 tablets (one box) at the astoundingly low price of only $1.00.”

Through these advertisements and other representations, the complaint continues, the respondent represents that the treatment and a so-called “deficient element” diet is a cure or remedy for obesity and a competent and scientific treatment which does not contain any dehydration drugs.

In truth, the complaint continues, the preparation is not a cure or remedy for obesity, and is of no therapeutic value in its treatment. Among other drugs contained in the tablets is phenothalin, a dehydration drug. The only therapeutic value in the tablets, the complaint alleges, is a laxative or cathartic. The price of $1.00 per box or 6 boxes for $5.00, is alleged to be the regular, customary and usual price at which the tablets are offered for sale by the respondent and not a special, reduced or introductory price. (4031)

Oxol Laboratories—A complaint has been issued charging William S. McClymonds, trading as Oxol Laboratories and Western Research Laboratories, 1046 Santa Fe St., Denver, with misrepresentation in the sale of “Quinox Capsules.”

In periodical advertising matter the respondent allegedly represented the preparation as a cure, remedy and competent treatment for delayed menstruation. The complaint alleges that the representation is untrue and that the preparation is without substantial therapeutic value aside from its effect as an ordinary laxative. (4035)

Robinson Clay Products Company—Alleging a combination and conspiracy in restraint of trade to fix and maintain uniform prices for building materials, including vitrified sewer pipe, in the Rochester, N. Y. area, a complaint has been issued against The Robinson Clay Products Company, Akron, Ohio, and its sales subsidiary, The Robinson Clay Product Company of New York, the Universal Severino Corporation, Cleveland, the Rochester Builders Supply Association and its secretary, Edwin C. Kaelber, and 32 builders' supply dealers selling in the Rochester area.
It is alleged that pursuant to their agreement and combination the respondent manufacturers and dealers, in cooperation with each other and their association and its officers, fixed and maintained uniform delivered prices to consumers, including municipalities and other Government agencies and projects; maintained minimum prices at which building materials, including vitrified pipe, were sold by the respondent jobbers, dealers or contractors; induced certain of the respondents to raise the prices quoted by them to the uniform delivered prices as fixed; interfered with or prevented competitors of the respondent dealers from obtaining building supplies from manufacturers located in States other than New York, and established and maintained uniform terms, discounts and conditions of sale.

The complaint also alleges that the respondents held meetings among themselves or with their association, its members and officers, to devise methods of exerting influence, pressure, coercion, or other means to require manufacturers and producers to fix and maintain delivered prices to consumers, including municipalities and other Government agencies or projects, and to establish, publish and adhere to such fixed uniform delivered prices.

The respondents' practices are alleged to have had the effect of monopolizing in the respondents or some of them the business and industry of manufacturing, dealing in and distributing building materials, including vitrified sewer pipe, ultimately consumed in the Rochester vicinity, and of unreasonably eliminating and suppressing competition and depriving purchasers of the advantages in prices, service and other considerations which they would receive under normal competitive conditions, all in violation of the Federal Trade Commission Act.

Rochester Builders Supply Association—See Robinson Clay Products Co.

Sears, Roebuck & Co., Chicago, has been served with a complaint alleging unfair and deceptive acts and practices in the sale of automobile tires and tubes.

The complaint alleges that in conducting nationwide tire sales through its retail stores, the respondent company misrepresented that its tires and tubes were being sold at various purported discounts and savings from the regular and usual prices.

It is alleged that the respondent advertised its "Bridgestone" tires as being sold at a saving or discount of 30 to 35 per cent when in fact such purported savings were exaggerated because not computed on the regular list price in effect at the time of the advertisements. Based upon the regular list price, the advertised sale prices allegedly would have provided for percentage savings ranging from 9.45 per cent to 10.8 per cent rather than the advertised saving of 30 to 35 per cent.

According to the complaint, a 25 per cent trade-in allowance for old tires allegedly was advertised as a 25 per cent discount and as an extra trade-in allowance when in fact a 25 per cent trade-in allowance was always allowed and therefore does not provide a 25 per cent discount or extra trade-in allowance but represents only the regular selling price.

"Allstate" tires are alleged to have been advertised at half-price when in fact it was necessary for the purchaser to buy one tire at the full price in order to get one at half-price and the advertised price, contrary to the advertisement, represented no saving to the purchaser since no allowance was made for old tires. Taking the 6.00 x 16 tire as an example, the complaint alleges that the advertised sale price for two tires was $20.25; that the regular list price for two tires of this size was $27; and that, giving effect to the customary old tire allowance of 25 per cent, the usual selling price was $20.25 for two tires, or exactly the advertised sale price for the two tires.

Again, in advertising its "Allstate Standard Tires," the respondent company is alleged to have represented that the list price designated in its advertisement was the regular list price and the lowest price of all time for such tires; that by paying the designated price, with old tire, the purchaser was paying only 10 cents for a tube. However, the complaint alleges that the designated sales price required the purchaser to pay practically the full price for two tires to receive the advertised saving on two tires. The prices shown in the advertisement were higher than the correct list price in effect at the time of the advertisement and because the purchaser received no credit for his old tires, although he was required to turn them in at the time of sale.

The complaint charges that the customer, instead of paying 10 cents for a tube, would be required to pay amounts ranging from $1.10 to $1.31. (4033)

Universal Sewer Pipe Corporation—See Robinson Clay Products Co.

John A. Wathen Distillery Company—Misrepresentation which involves misuse of the name of one of the oldest distilling families in the country, is charged in a complaint issued against John A. Wathen Distillery Company, 133-135 South Fourth St., Louisville, Ky.

The complaint recites that since the year 1788, five generations of the Wathen family have been engaged in the distillery business, and since about 1875 members of the family have engaged in the distilling business in the State of Kentucky. The name has been publicized through use of advertisements, labels and otherwise, so that a substantial part of the purchasing public has identified it with liquors distilled by or under the direction of some member of the family and by methods of distilling used for more than a century by them.

The John A. Wathen Distillery Company was incorporated in 1933 under the laws of Missouri, and since that time has engaged in distilling liquor in Kentucky. The complaint alleges that the respondent has used the name Wathen in its corporate name, advertised literature, labels and letterheads, and that use of the name has caused confusion in the trade and among the liquor-buying public.

In advertisements in newspapers, magazines and other periodicals, the complaint continues, the company has used representations to be made: "John A. Wathen, Distillers for 148 years... Over a CENTURY of Distilling Experience... JOHN A. WATHEN DISTILLERY CO. Before George Washington was President of the United States a Wathen was making whiskey in Kentucky. Bucked by the proud traditions and EXPERIENCE OF 150 years, it is natural that Wathen produces a bourbon of the highest excellence."

The complaint declares that the respondent's liquor is not distilled by the Wathen family nor under its supervision. John A. Wathen, the complaint continues, from whom the respondent acquired its name, was never a distiller nor engaged in the distilling business with any member of the Wathen family, nor has the respondent anyone connected with it who from actual experience through connection with members of the Wathen family, obtained knowledge of the formula and method used by the Wathen family in distilling liquor.

The acts and practices of the respondent, the complaint alleges, constitute unfair and deceptive acts and practices and unfair methods of competition within the intent and meaning of the Federal Trade Commission Act. (4032)

Western Research Laboratories—See Oxl Laboratories.

CEASE AND DESIST ORDER

The following cease and desist order has been issued during the past week:

Steel Office Furniture Institute, Cleveland, and 12 member companies which manufacture more than 50 per cent of the industry's products, have been served with an order requiring them to cease and desist from agreeing or combining to fix and maintain identical delivered prices, uniform discounts and terms and conditions of sale, and other practices deemed to be in violation of the Federal Trade Commission Act.

During its existence, including the period from about June 15, 1935, to March 9, 1938, the respondent institute, according to find-
ings, collected and compiled statistical information which it made available to its members and the public; collected from its members and other members of the industry the published price lists of their products and distributed them among those of its members who requested this data, and performed other services. During the same period, the findings continue, the respondent manufacturing companies, through and by means of the Institute and by agreement among themselves, fixed and maintained identical delivered prices, uniform discounts and uniform terms and conditions of sale, and, in some instances, induced their dealers and customers purchasing the industry products for resale to maintain resale prices fixed by the manufacturing companies and to join and form local associations of dealers having for an objective the maintenance of such resale prices. During this period, the findings continue, the respondent companies many times in accordance with an agreement among themselves abided by and did not deviate from the identical delivered prices, uniform discounts and terms and conditions of sale filed by them with the respondent institute.

The Commission order directs that the institute, the 12 respondent manufacturing companies and their officers, agents and employees, directly or through any corporate or other device, or through the respondent institute, cease and desist from agreeing, combining or conspiring among themselves to fix and maintain identical delivered prices, uniform discounts and terms and conditions of sale; cease and desist, pursuant to agreement, from inducing their dealers and customers to join or form local associations having for their objective the maintenance of resale prices, from requiring such dealers and customers to maintain resale prices fixed by the respondent manufacturers, and from abiding by and not deviating from prices, discounts and terms of sale filed by the respondent manufacturers with the institute; and cease and desist from filing prices with the institute for the purpose of fixing and maintaining such prices arrived at by agreement among themselves, and from disseminating such prices among the respondents.

The Commission further directs that its proceeding be dismissed as to Columbia Steel Equipment Company, Philadelphia, and Tidewater Office Equipment Dealers' Association, Norfolk, Va., and its former respondent members without prejudice to the Commission's right, should the facts so warrant, to reopen the case and resume prosecution insofar as these respondents are concerned. Under a stipulation of the facts entered into January 15, 1940, the respondent institute and the 12 manufacturing companies stated that they do not contest this proceeding, and that their statement of facts as stipulated might be accepted in lieu of testimony. (3319)

**STIPULATIONS**

During the week the Commission entered into the following stipulations:

**Alto Products Company—See Santo Allioto & Sons.**

**Automatic Sealing Vault Company, 25 Riverside Drive, Peru, Ind., agrees to cease representing that concrete burial vaults manufactured in molds or formed by the respondent and containing materials sold by the respondent will afford or assure enduring or permanent protection to the caskets or bodies enclosed in them, or that the vault will remain waterproof, or that application of the respondent's so-called waterproofing paints or other preparations to the vaults will prevent permanently the intrusion of water. (2678)**

**Bodie-Hoover Petroleum Corporation, Chicago, Ill., agrees to cease representing itself to be a refiner of petroleum or advertising that the products it sells are sealed at the refinery when in fact it neither owns, operates nor controls a plant in which the oil products sold by it are refined. The respondent company also stipulates that it will desist from representing that the oils processed and sealed in its own plant are "Refinery Sealed" or "Sealed at Refinery", when such is not a fact. (2676)**

**Dagmar Plant Industries—Emil Bergman, trading as Dagmar Plant Industries, New York, who formerly operated at 1123 Broadway, New York, agrees to cease representing that his chemical product "Quik-Gro", for soilless plant growing, has been endorsed or approved by the National Resources Committee, Washington, or any other authoritative body, when such is not a fact, or that such body is authority for a claim that potatoes, tomatoes or much of the household food may be produced by use of the respondent's product; that reports from any agency of the Soviet Government indicate successful tests made with "Quik-Gro"; that by the "Quik-Gro" method one can have a beautiful flower or vegetable garden in the basement or other place where sunlight is not available, or that fruits and vegetables grown by such soilless method will be free from insects or insecticides. (2674)**

**Federal Instrument Corporation, 7919 Exchange Ave., Chicago, a dealer in fountain pens, electric shavers and cameras, has entered into a stipulation to discontinue misrepresentations in the sale of its products. The respondent company agrees to cease representing its regular method of sale is a "close-out sale" or offers "reduced close-out prices"; that its customers receive their goods "direct from factory" or that it manufactures the goods it sells, when such are not the facts. It also agrees to desist from price misrepresentations and to discontinue issuance of so-called "cash discount vouchers" so long as the prices charged for articles are the same with or without the alleged coupon, voucher or certificate. Under its stipulation, the respondent also agrees to desist from advertising that an article is given free to the purchaser of another article, when the cost of the alleged gift is included, either in whole or in part, in a deceptive price charged for the article offered for sale; to cease advertising or issuing a "Lifetime Guarantee" for any of its merchandise; to discontinue using the language "Genuine Duotone Durium Point" to convey the impression that its pen points are made of or tipped with any purported substance, when such is not a fact, and to cease representing that a fountain pen which it offers for sale "Writes 3 Months On One Filling" or in any other way exaggerating the actual qualities or capacity. (2681)**

**Iol-Ise Manufacturing Company, Inc., Clifton, N. J., agrees to cease representing that the preparation designated "Ido-Ise" is an "iodine" corn remover or an "iodine" discovery or preparation that the product "ends" or "stops" soreness or pain, will afford permanent relief, or that it will rid one of corns or prevent their return, or that the product heals tissue. The respondent also agrees to cease representing that the actual removal of corns is due in any way to the iodine content of its product. (02510)**

**Mamary Brothers, Inc., 330 Fifth Ave., New York, manufacturer of lingerie and men's and women's handkerchiefs, agrees to desist from representing that it owns or operates a factory in Shanghai or Swatow, China, or that it manufactures goods which it imports from China or owns or controls the plant in which such products are made, when such is not the fact. (2690)**

**Santo Allioto & Sons—Santo, Joseph, Christopher, Frank, John, Samuel and Dominick Allioto, trading as Santo Allioto & Sons and Alto Products Company, 9th and Catherine Sts., Philadelphia, dealers in canned foods, including tuna fish, stipulate that they will cease employing on labels affixed to containers of their products the word "Tonno" in connection with any other Italian word, picture, insignia or otherwise, implying that such products were obtained from the coasts of Italy or were packed in and imported from that country, when such is not a fact. (2679)**

**Scott Paper Company, Chester, Pa., in the sale of "Waldorf Brand" tissue, agrees to desist from representations to the effect that all products, regardless of their quality, which are sold in competition with "Waldorf Brand" contain splinters, rough or thin spots, dirt or other defects, and from use of any representation unfairly disparaging competitive products. (2675)**

**Wonder-Tone Laboratories—M. Maltz, trading as Wonder-Tone Laboratories, Chicago, Ill., agrees to cease representing that...**

February 23, 1940
mechanical devices designated "Wonder-Tone Line Noise Eliminator" and "Wonder-Tone Aerial Eliminator," or any similar devices constructed on similar mechanical principles, will improve radio reception on all kinds of receiving sets; that the noise eliminator will eliminate or have any effect in doing away with audible interference coming in over the antenna or power line, under all conditions, or coming in over the ground system; that either device is a new invention or different from other devices used for the same purposes, or that their use will insure clear tone reception of broadcasts from distant radio stations. The respondent also agrees to discontinue representations that the aerial eliminator is given free, or that any other item of merchandise regularly included in a combination offer is given free, when the price or cost of the item is included in the selling price charged for the combination offer. He also agrees to discontinue use of the word "Laboratories" in his trade name until he owns or operates a laboratory under the supervision of a person or persons competent to conduct scientific research and experiments. (02509)

**FTC CLOSES CASE**

Distillers Products Corporation of Kentucky, Inc., Shively, Ky., having entered into a stipulation as to the facts and an agreement to cease and desist from certain enumerated practices, the Federal Trade Commission has ordered that the case growing out of the complaint issued February 1, 1940, charging misleading use of the word "Distillers," be closed without prejudice to the right of the Commission, should the facts so warrant, to reopen the case and resume prosecution in accordance with its regular procedure.

Under its stipulation, the respondent company agrees to cease using the word "Distillers" as part of or in connection with its corporate or trade name and from using this word or other words of similar meaning on its letter-heads or printed matter or in advertisements in any way to convey the belief to purchasers that the corporation is a distiller or actually owns and operates a distillery or that the products which it sells are distilled by it, when such is not a fact.
FCC Adopts Rules For Television Stations

The present state of flux of television does not warrant confining standards, but development of the industry does merit limited commercial operations in the near future, the FCC holds unanimously on the basis of its recent public hearing and subsequent study of the situation.

Accordingly, the Commission has adopted the rules recommended by its Television Committee, with revisions including provision for limited commercial operations beginning September 1. The Commission declined, pending further study, to take any steps to crystallize the allocation of frequencies to television and other competing services. The channels already assigned to television remain unchanged pending consideration of testimony at the Commission's hearing, scheduled to begin March 18, on aural broadcasting on frequencies above 25,000 kilocycles.

"That research should not halt and that scientific methods should not be frozen in the present state of the art is fairly to be deduced from the engineering testimony of representatives of the companies represented at the hearing," points out the Commission's report, adding:

"Actual demonstrations to members of the Commission indicate the need for further improvement in the technical quality of television. The evidence before the Commission reveals a substantial possibility that the art may be on the threshold of significant advance. Research in fact does and should continue in significant phases of the field."

The Commission asserts that nothing said in the report should "be construed as a lack of confidence in the future of television." It hails television as "a mighty achievement" and credits pioneers in the field with making "great advances." Continues the Commission:

"We feel that potentially television is of tremendous value to the public generally. Even now, there is no reason apparent why those members of the public to whom regular television programs are available, who are conscious of the fluid state of the art, and who are willing to assume the financial risks involved for the obvious benefits of current programs, should not acquire receivers. Nor is it suggested that television broadcasters should be barred from going forward in program production and sponsorship. The progress made by the industry is worthy of recognition, and the present state of the art renders appropriate the further steps permitted by the rules being established."

In general, the rules being issued are based substantially on the rules proposed by the Commission's Television Committee on November 15th last. Two classes of television stations are set up. Class I stations will carry forward technical investigations and may be assigned to more than one channel. Class II stations are designed to experiment in program production and technique and will operate on one channel only. Under proper showing, a license may incorporate provisions for both classes.

Beginning September 1, Class II television stations may begin limited commercial operations under which advertising will be permitted in connection with programs the cost of which is borne by sponsors. The rules stress, however, that emphasis on the commercial aspects of the operation at the expense of program research is to be avoided.

In not attempting to impose standards at this time, the Commission recommends that the industry itself eschew such restrictions. The report explains:

"Enough has been said to indicate the present state of flux of television and the fact that its progress still continues. The issuance or acceptance of transmission standards by the Commission, especially in combination with the more extensive experimental program service which will in all probability develop under these rules, would have a tendency to stimulate activity on the part both of manufacturers and the public in the sale and purchase of receivers for home use. It is inescapable that this commercial activity inspired and then reinforced by the existence of Commission standards would cause an abatement of research. To a greater or less extent the art would tend to be frozen at that point.

"Even more important, nothing should be done which will encourage a large public investment in receivers which, by reason of technical advances when ultimately introduced, may become obsolete in a relatively short time. The Commission has not overlooked the significant sums invested by pioneers in making possible our present knowledge of television, and it is not unsympathetic with their desire to recoup their investment in the process of bringing television's benefits to the public. It will be realized, however, that the loss to the public by premature purchase in a rapidly advancing field might in a relatively short period exceed many times the present total cost of research. Such an economic loss in the long run can rebound only to the harm of the industry. In view of the apparent proximity of improvements and of the resolution of disputed technical questions, these risks should not be taken. The Commission is, therefore, reserving the matter of issuing standards for consideration at some future time."

4063 (Continued on page 4064)
The Commission hopes that the members of the industry "will make every effort to obtain and maintain informal unanimity of opinion among themselves so that their now proven valuable assistance may be available to the Commission in serviceable form" when the time comes to consider standards. In this connection, the Commission suggests attention to marketing of receivers capable, insofar as consistent with reasonable cost, of receiving or of being adjusted to receive any reasonable change in methods of synchronization or changes in number of frames or lines which may be found to be practical and licensed in the future operation of Class II stations. Increased size of receiving set screens, it feels, is essential to widespread public acceptance of television. The Commission is also of the opinion that continued experiments in the staging and studio aspects of television performances are necessary.

The new rules are printed on page 4070 of the REPORTS.

EIGHT MORE STATIONS JOIN BROADCAST MUSIC, INC.

Eight additional stations have subscribed to Broadcast Music, Inc., by sending in stock and license agreements together with their checks in payment of their stock subscriptions. With the addition of these stations, 268 stations have now subscribed and paid for stock in BMI. A list of 260 stations were printed in the NAB Reports (Feb. 16, 1940, p. 4030).

The latest subscribers to BMI are as follows:

District 2
WENV—Elmira, New York
WBRE—Wilkes Barre, Pa.

District 6
WJDX—Jackson, Mississippi

District 12
KSAL—Salina, Kansas
KSFO—San Francisco, Cal.
KTKC—Visalia, California

District 17
KMED—Medford, Ore.
KXW—Seattle, Wash.

The 268 stations which have already paid their stock subscriptions will pay into BMI the sum of approximately $1,173,000 in stock and license fees. In addition, there are another 107 stations that have committed themselves to Broadcast Music.

RESEARCH COMMITTEE APPOINTED

Mr. Miller announced this week the appointment of a Research Committee. Mr. H. K. Carpenter of Radio Stations WHK—WCLE, Cleveland, was asked to serve as Chairman of the committee consisting of H. M. Beville, Jr., Research Manager of the National Broadcasting Company; Scott H. Bowen, President of Radio Station WIBX, Utica, New York; Arthur B. Church, President of Radio Station KMBC, Kansas City, Missouri; James D. Shouse, Vice President of Radio Stations WLW—WSAI, Cincinnati, Ohio; Dr. Frank N. Stanton, Research Director of the Columbia Broadcasting System; and, Theodore C. Streibert, Vice President of Radio Station WOR, Newark, New Jersey.

The first meeting of the newly appointed Research Committee will be called in mid March at a date not yet set.

FCC CONSIDERS NAB REQUEST FOR RECORD RULES CHANGE

Below is the FCC's reply to NAB's request for modification of the Record Rules (NAB REPORTS, Feb. 23, p. 4050):

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.
February 28, 1940

National Association of Broadcasters,
Normandy Building,
1626 K Street, N. W.,
Washington, D. C.

Attention: Mr. Russell P. Place, Counsel.

Gentlemen:

This will acknowledge receipt of your letter of February 16, 1940, with respect to Section 3.93(e) of the Commission's Rules and Regulations, as amended, effective January 6, 1940. As presently worded, the rule is to be interpreted as requiring the precise words which are specified in the rule to be used in making the identifying announcement.

The Commission will give consideration to your request for modification of the requirements of this rule, as well as to the request that as to certain transcriptions the rule be suspended until August 1, 1940, and you will be informed as soon as practicable as to any action taken. In the meantime, of course, stations are required to comply with the provisions of Section 3.93(e), as amended.

Very truly yours,
T. J. Slowic,
Secretary.

JOHNSON LIQUOR AD BILL AGAIN AMENDED

On February 26, Senator Johnson (D-Colo) introduced another amendment in the nature of a substitute amendment.
to his bill (S. 517) to prohibit the advertising of alcoholic beverages by radio. It is identical with the amendment which he introduced January 29 (NAB Reports, Feb. 2, 1940, p. 3999), with the following exceptions. The prohibition is limited to broadcasts of liquor advertising received or receivable by means of radio receiving sets located in any State or political subdivision of a State, in which the purchase or sale of such alcoholic beverage for use as a beverage is not permitted," and to such broadcasts received or receivable by radio receiving sets located in any State, or any political subdivision of a State, or Province is prohibited by the laws or regulations of such State or Province."

In view of the language of the amendment pertaining to political subvisions of a state, for all practical purposes this amendment is about as objectionable as the previous one.

Here is a list of those states which limit the alcoholic content of malt beverages, with the permissible alcoholic content indicated.

Arkansas—No limit, but malt beverages containing less than 5% alcohol by weight and stronger malt beverages are regulated by different laws.

California—Drainage beer—3.2% by weight, bottled beer—4% by weight.

Colorado—3.2% for 3.2% licensees. No limit for beer under Heavy Beer, Wine and Liquor Law.

Florida—No limit but beer is classified as containing more or less than 3.2% by weight.

Georgia—6% alcohol by volume.

Idaho—4% alcohol by weight.

Iowa—4% by weight.

Kansas—3.2% by weight.

Louisiana—No limit, but 6% by volume beverages and stronger regulated by Alcoholic Beverage Law. (Acts 1934, No. 15.)

Maryland—No limit in General Laws, however Alleghany County has a separate license for light beer which is defined as beer not over 5% by volume. Only 3.2% by weight may be sold in Caroline county. 6% beer by volume and wine and other beverages not exceeding 14% only may be sold in Hartford County. (Includes Havre de Grace.)

Massachusetts—12% by weight.

Michigan—16% by volume.

Minnesota—No limit but beer over 3.2% by weight is intoxicating under the law and is subject to different control.

Mississippi—4% by weight.

Missouri—No limit but 3.2% by weight beer and stronger malt beverages controlled by different licensing systems.

Montana—4% by weight.

New Hampshire—6% alcohol by volume.

North Carolina—5% by weight.

North Dakota—No limit but beer over 4% alcohol by weight sold by liquor licensees.

Ohio—7% by weight. 3.2% by weight and stronger beverages controlled differently.

Oklahoma—3.2% by weight.

Oregon—Over 4% and all over 8% by weight sold only through state stores.

South Carolina—5% by weight. Stronger malt beverages subject to heavy tax penalties.

South Dakota—Non intoxicating beer—3.2% by weight. High point beer between 3.2% and 6% by weight.

Tennessee—5% by weight.

Texas—No limit but beer containing not more than 4% alcohol by weight and beer containing over 4% alcohol by weight are sold under different licensing systems and taxed at different rates.

Utah—3.2% by weight. Stronger beverages may theoretically be sold by the Utah Liquor Control Commission.

Vermont—6% by volume at 60 degrees Fahrenheit. Stronger malt beverages sold only through the Liquor Control Board.

Washington—4% by weight. Stronger sold by the State Liquor Control Board.

West Virginia—5% by weight. Stronger sold through state stores only.

Wisconsin—5% by weight. Stronger sold under liquor licenses.

**FEDERAL LEGISLATION**

S. 517 (Johnson, Colo.) LIQUOR ADVERTISING—Amendment (in the nature of a substitute) to the committee amendment to the bill (S. 517) to amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio. Ordered to lie on the table and to be printed.

**STATE LEGISLATION**

Mississippi:

H. 139 (Porter et al.) EGGS—To regulate the sale of eggs; to require registration by dealers; to impose an inspection fee. Referred to Committee on Agriculture.

New York:

A. 1672 (Holley) (Same as S. 1323) CONDITIONAL SALES—PERSONAL PROPERTY—Imposes certain requirements in relation to contracts for conditional sale of personal property for personal use or consumption including furniture, radio, oil burners, etc., obligating buyer to pay $1,000 or less on any time payment plan under which seller retains title or security interest. Referred to Judiciary Committee.

New York:

S. 1323 (Williamson) (Same as A. 1672) CONDITIONAL SALES—PERSONAL PROPERTY—Imposes certain requirement in relation to contracts for conditional sale of personal property for personal use or consumption including furniture, radio, oil burners, etc., obligating buyer to pay $1,000 or less on any time payment plan under which seller retains title or security interest. Referred to Judiciary Committee.

Rhode Island:

S. 139 (Algren) OPTOMETRISTS AND OPTICIANS—LICENSING—In amendment of sections 1, 2, 3, 5, 9, 11, 12 and 13 of chapter 277 of the general laws, entitled "Licensing and regulation of optometrists and opticians," as amended. Referred to Judiciary Committee.

Virginia:

S. 310 (Hillard et al.) FOODS—Provide for the control of the manufacture, sale, advertising of and traffic in certain foods; to define adulterated or misbranded food; and to prohibit the manufacture and sale of and traffic in such food; to confer upon the Commissioner of Agriculture and Immigration and the Board
of Agriculture and Immigration certain powers and duties with respect to certain foods, and to provide penalties for violations of this act. Referred to Committee on Agriculture.

Labor

WAGE AND HOUR ACT

The Wage and Hour Administration’s ruling that “talent charges” must be included in calculating the basic pay of broadcasting station employees is not as far-reaching as it might seem at first glance.

Talent charges need not be included when the broadcasting station is not the employer of the talent.

The Internal Revenue Bureau, in its Social Security tax rulings, has defined when the broadcaster is the employer, and when he is not. An official summary of these rulings was printed in the December 31, 1938, issue of The Billboard. In part, the summary said:

"As a part of the service provided in connection with the purchase of physical facilities (by advertisers or their agents) the broadcasting companies supply announcers, production men, etc., at the discretion of the broadcasting companies from their regular staffs. However, if an advertiser desires to have a particular announcer appear on his program he negotiates a contract with the broadcasting company for the services of the announcer at a specified sum per broadcast. This sum, minus the regular management commission of the broadcasting company’s artists’ service, is paid to the announcer in addition to his regular compensation from the company. Under such an arrangement the broadcasting company retains no control over the manner in or the method by which the announcer performs his services, acting merely as his agent in procuring the engagement, and is therefore not considered to be the employer of the announcer with respect to those services. . . .

"In some cases the broadcasting company agrees with the sponsor to furnish a program of a particular type designed to occupy the time which the sponsor has purchased in order to advertise his products or services. Under this arrangement the broadcasting company agrees to deliver to the sponsor what might be designated as a 'complete package' or a finished product for a pre-determined price. In such cases the sponsor has nothing to do with the selection of the artists, the presentation of the program or the direction and control exercised over the talent appearing therein, these matters being solely within the province of the broadcasting company. Such programs, termed 'studio-built' programs are formulated by the broadcasting company on its own account, produced under its own direction and control, without interference from the sponsor, and furnished to the latter as a complete package for a lump-sum payment. The individuals performing services on such studio-built programs may generally be said to be employees of the broadcasting company."

In other words, if the broadcaster makes a talent charge, passes it on to, say, an announcer, but is not the announcer’s employer in the above sense as far as the particular program goes, then the talent charge need not be included in basic pay.

The NAB Labor Relations Director has notified the Wage and Hour Administration that he has sent out the above opinion.

(Note: The NAB Labor Relations Director was wrongly informed when he said in NAB Reports of February 16 that a sponsor had to pay talent directly to qualify as "the employer.")

March 1, 1940

A federal district judge in North Carolina has ruled that watchmen in industries covered by the Wage and Hour Act were included in the coverage.

"Watchmen are just as much engaged in the production of goods that are going into commerce as the man sawing logs," the judge said. "It would have been cruel of Congress to have legislated otherwise."

The Wage and Hour Administration has amended its regulations regarding the keeping of records. If the complete records are filed in an office away from the place of employment, an abbreviated record showing total hours worked and total wages paid each week must be filed "at the place of employment." A strict interpretation of this would mean that an abbreviated record should be kept for transmitter engineers at the transmitter. However, this seems to be unreasonable, and the NAB Labor Relations Director is asking for an opinion from the Administration. The new regulations also provide that complete records must be kept on file for four years, and abbreviated records, if any, for two years.

The Act requires every employer subject to any provisions of the Act or any order issued under the Act to "make and maintain records" showing the full name of the person employed, home address, date of birth if under 19, hours worked each workday and each workweek; regular rate of pay and basis upon which wages are paid; wages at the regular rate of pay for each workweek excluding extra compensation attributable to the excess of the overtime rate over the regular rate; extra wages for each workweek attributable to the excess of the overtime rate over the regular rate; additions to cash wages at cost, or deductions from stipulated wages in the amount deducted or at the cost of the item for which deduction is made, whichever is less; total wages paid for each workweek, and date of payment.

The success of a group of track workers in suing the Atlantic Coast Line railroad for double the amount illegally withheld from them in wages indicates that employees' suits may be a major factor in the enforcement of the Wage and Hour Act, said Colonel Philip B. Fleming of the Wage and Hour Division, U. S. Department of Labor, shortly after his appointment as Administrator was confirmed by the Senate.

"I am calling attention to this in the hope that the management of establishments covered by the Wage and Hour Law—that is, those engaged in interstate commerce or in the production of goods for interstate commerce—who have not yet put their houses in order under the Act, will do so before situations like this accumulate to serious proportions," he added.
"Any employer who has been violating the law by failing to pay the minimum wage of 30 cents an hour and at least one and one-half times the worker's regular rate for work in excess of 42 hours a week, will find the Wage and Hour Division field personnel in our 30 branch offices ready and willing to cooperate with him in coming into compliance with the Law."

LABOR NOTES

The Federal Circuit Court of Appeals in New York on February 26 held that collective bargaining as required by the Wagner Act entailed the signing of a written agreement if an agreement is reached (NLRB vs. Art Metals Construction Co.).

The Federal Circuit Court of Appeals in Chicago on January 9 held that the Wagner Act did not require any agreement at all and that whether an agreement, if any, should be written was a subject for bargaining (NLRB vs. Inland Steel).

It is generally expected that the New York case will be appealed to the Supreme Court.

The cost of living for wage earners and lower-salaried workers decreased 0.6 per cent during the quarter ended last December 15, the Labor Department reports. Chicago and Milwaukee were the only cities to report slight increases. Further details will be supplied to members upon request.

The Supreme Court of New York, Appellate Division, has upheld the legality of the joint action by the A. F. of M. and the I. A. T. S. E. (stagehands) to try to force Opera on Tour, Inc., to use "live" instead of recorded music for accompaniment.

The court said, in part:

"Summing up the situation presented to us, we find that the defendants (unions), in order to secure what they believed to be their economic betterment, are endeavoring to prevent the use of a mechanical contrivance which is in the nature of a labor saving device. This device is used to reproduce an essential element of the plaintiff's business, viz., music played to accompany plaintiff's operatic performances. The case is not one where the defendants are trying to force plaintiff to use an additional feature in connection with their business, which plaintiff has determined it could do without. Plaintiff wishes to have musical accompaniment for its opera. It says it can get along with mechanical music and save the cost of musicians' salaries. The defendants say that, unless 'live' musicians are hired, they will have less chance for work, and, therefore, are endeavoring, by stopping work, to prevent plaintiff's performances until plaintiff agrees to use a 'live' orchestra.

"It would seem to us that such conduct on defendants' part is justified as a legitimate endeavor of labor, even though it results in some injury to plaintiff."

Presiding Justice Francis Martin and Justice Edward J. Glennon dissented. An appeal is expected.

COLUMBUS CONFERENCE

The third annual Broadcast Engineering Conference which opened February 12 closed at Ohio State University, Friday, February 23, sending the 250 members of the conference back to their stations throughout the country, with a better and more thorough knowledge of the current engineering problems facing the broadcasting industry.

The subject of greatest interest to the industry at present, Frequency Modulation, occupied more time on the conference agenda than did any other subject. The series of Frequency Modulation conference periods was opened with a general discussion of wide band FM by Major Edwin H. Armstrong, of Columbus University, the inventor of wide band FM, in which he reiterated his statements as to the ability of wide band FM to deliver to the listeners a signal of high fidelity, free of interference. Major Armstrong also gave a brief technical explanation of the operation of FM.

Paul deMars, technical director of the Yankee Network, continued the FM discussions with a review of the Yankee Network experiences with FM. The experiences with FM of the General Electric Company were related by H. P. Thomas and I. R. Weir, of the General Electric Company. Of particular interest was their relation of an experiment performed involving Major Armstrong's station at Alpine, New Jersey, operating with 30 KW on 42.8 megacycle and the General Electric station at Albany, New York, 117 miles away operating on the same frequency with a power of 150 watts and both stations transmitting with Frequency Modulation. It was explained that a test car driven from Albany received the Albany transmission clear of all interferences from Alpine out to a distance of about 27 miles and there a distance of 5 miles long was encountered over which sharp transitions were noted. Beyond this transitional area the Alpine transmission was received free and clear of interference from Albany. Mr. Weir pointed out that in narrowing the FM band down in order to conserve space in the frequency spectrum the full conservation possibility cannot be realized because in order to keep the distortion in the receiver low, it is necessary that the band width of the receiver be not reduced in the same proportion. For those who did not attend the conference it is suggested that they write to the General Electric Company, Radio and Television Department, Schenectady, New York, and ask for the pamphlet entitled "And Now Frequency Modulation." Frequency Modulation receivers were discussed by R. F. Shea of the General Electric Company.

The "General Discussion and Question Box" conducted by Mr. Andrew D. Ring, Assistant Chief Engi-
neer of the FCC, with Mr. R. M. Wilmotte as Chairman, was highlighted by Mr. Ring's statement that there might be an increase to 1,000 to 1,200 stations on the present band before saturation and that the country could economically support many more stations than this. Mr. Ring continued that this factor brought out the possibility of using the Ultra High Frequencies. The use of the U.H.F. has taken three turns of mind: 1—Amplitude Modulation, 2—Narrow Band Frequency Modulation, and 3—Wide Band Frequency Modulation. It was Mr. Ring's opinion that for practical purposes there is no difference in quality between AM in the standard band, AM on UHF, and FM on UHF. He pointed out that if we did change over to the FM system that approximately forty million receiving sets would need to be replaced. There are, either operating, or applications in for operation, for between 50 and 60 FM stations, and that no further grants will be made until after the March 18 hearing on the use of UHF. Mr. Ring stated that the quality received now is limited mainly by the microphone and loud speaker. He also pointed out that distortion was the main factor in the majority of listeners turning the tone control down on the receivers and that while the listener would lose high frequencies in doing this, he also lost the more undesirable distortions. Mr. Ring stated that FM transmitters are less expensive and the FM receivers more expensive and that in view of public interest this is not the right trend for the industry to follow. Mr. Ring said that there is some question as to whether television is technically far enough along to be put in regular service and that the FCC is making a detailed study of the situation and would probably have a decision on television within a few weeks. In regard to the Havana Agreement, Mr. Ring said that approximately 730 stations must change their frequencies and that the FCC tentatively expects to make the change on August 1. Two methods of making the change-over have been discussed. One was to do it piecemeal on the theory that it would be easier for manufacturers to supply crystals and the other that the change-overs all be done at the same time. Mr. Ring pointed out that the total time consumed would probably be about the same in both cases and that there more likely would be more confusion by the piecemeal method than by making the change all at once. Mr. Ring said that within a few weeks after the Mexican Government advises the Cuban clearing house that it has ratified the treaty, all licensees will be notified to show cause why they should not be changed to their new frequencies and then the United States Government will file with the Havana clearing house the changes contemplated in the United States and then any inter-country allocation problems will be ironed out in a conference. Further study was being made by the FCC to determine how long it will take to get new crystals, retone transmitters, retune antennas and change directional arrays; and that there will be at least 2 months from the time of notification to the time of change in order to allow the stations to prepare for the switch-over. In connection with the change-over, Mr. Ring stated that the FCC requirement that power be measured directly in the antenna, would be postponed until about 2 months after the change. It was Mr. Ring's belief that it is desirable to reduce detailed regulation of broadcasting stations as soon as the FCC feels that the broadcasters will operate their stations properly without supervision or spasmodic supervision. This is in line with the recent FCC relaxation of its stringent rule concerning the substitution of antenna and plate meters, and is in line with a request made by NAB in the June 6, 1938 hearing on new rules and regulations.

One of the most significant conference periods was that devoted to the study of noise, made by Mr. J. H. DeWitt, Chief Engineer of Radio station WSM, of Nashville, Tennessee. Mr. DeWitt described the extensive research problem carried on under his direction at WSM, in determining the amount of noise background which the average person can be subject to and still consider the service received as being good. He also described the equipment developed for measuring noise and the extensive measurements made in the WSM area. Mr. DeWitt said that there were about 1,800 thunder storms on earth at any given time and he pointed out that thunder storm disturbances were better propagated at night, such as are regular radio signals. Mr. DeWitt pointed out that to get noise measurements comprehensively enough to indicate coverage, that a large amount of work was involved. It is rather strange that throughout the history of broadcasting we have worried a great deal about the strength of interfering signals and the limitations they have placed on coverage and yet we have never developed a real engineering basis for the limits of coverage placed on us by atmospherics and man made interference. It is the opinion of the Director of Engineering that Mr. DeWitt has started a too long delayed phase of our work and that the industry should be encouraged to further the investigation of this phase. The difficulties in carrying out such work as pointed out by Mr. DeWitt are great and undoubtedly have been the deteriorating force, however, Mr. DeWitt has now laid a good foundation on which to continue such studies and it is hoped that in the course of the next few years we might have as complete knowledge on this subject as we now have on the effects of interfering signals. Frequency Modulation development should be accompanied by extensive studies on noise.

As in the first 2 conferences the "Roundtable on Receivers," conducted by D. D. Israel, of the Emerson Radio Company and William F. Cotter of the Stromberg-Carlson Company was of great interest. Mr. R.
M. Wilmotte, Engineering Advisor to NAB, was Chairman of these discussions. The engineers present were pretty well in agreement that our radio system was of quite high quality from the input of the studio amplifier to the output of the radio receiver chassis and that a great deal of our poor quality could be traced to the acoustic systems associated therewith, namely, the studios, their microphones, the loud speakers and the room in which the program was reproduced. It was pointed out that the transformation from acoustic to electric energy in the studio, and the retransformation of the electric energy back into acoustic energy introduced much of the distortion we now experience. It was pointed out that distortions of one kind or another usually accompany the expansion into the high audio frequencies and that these distortions were quite annoying and therefore the average listener finds it more pleasing to do away with the high frequency and the high distortion by turning down the tone control on his receiver. It was also pointed out that for background music it was more pleasing to reduce the high frequencies but that where the program was actually to be listened to the listeners did not differentiate as fully as they should between the use of a primary high fidelity receiver in the living room of the home and the use of small secondary receivers for places other than the living room. It was the opinion of one member of the conference that for one reason or another the public has never really heard high fidelity and therefore has not been able to readily determine whether it likes a wide audio-band or not. It was pointed out in this discussion that even though high quality transmission was available and high quality receivers are available that economically a big per cent of the population could not afford real high grade receivers, and therefore for economic reasons a great many listeners are forced to content themselves with reproduction of a degraded nature.

On Sunday, February 18, the members of the conference were taken by special train, to Louisville in order to inspect WHAS and Mr. Orrin Towner, Chief Engineer of WHAS, was given a vote of thanks at the banquet closing the convention, for the splendid way in which he organized and carried out this inspection trip.

The Ohio State Conference on Broadcast Engineering is a striking example of how a university can coordinate its academic work with industry and the broadcasting industry owes a big vote of thanks to the administration of Ohio State University and to Professor W. L. Everitt, director of the conference, for carrying out this splendid work.

Professor W. L. Everitt's book entitled "Communication Engineering" is now used as a textbook in some 60 odd schools and his selection of subjects for the third annual conference has shown that he is attuned to the present day radio engineering trend.

The third conference was the first one in which NAB officially cooperated. The NAB Engineering Committee held a meeting in conjunction with the conference on Friday afternoon, February 16.

ENGINEERING QUESTIONS

The "General Discussion and Question Box" conducted by Mr. Andrew D. Ring, Assistant Chief Engineer of the FCC, at the Broadcast Engineering Conference at Ohio State University last week, pointed out an apparent need for an engineering question box throughout the year on questions concerning FCC rules and regulations. It was apparent that there are many questions coming up from time to time concerning the interpretation and application of certain FCC rules and regulations. Mr. Ring has kindly offered to cooperate with the Director of Engineering of NAB in conducting an engineering question box and therefore if there are any questions concerning the FCC rules and regulations, it is requested that you send your questions to the Director of Engineering of NAB. The questions will be answered individually except where the question might seem to have a broader interest, in which case an explanation will be given in the NAB Reports.

During the conference many questions were asked concerning the application of certain of the rules on operators' licenses. This will be the subject of an article in the NAB Reports in the immediate future, and the Director of Engineering would like to have those who have questions concerning these rules send them in as soon as possible.

BUREAU OF RADIO ADVERTISING

Owing to a change in plans, the transcript of the radio panel discussion held last month in connection with the National Retail Dry Goods convention will not be available to NAB members until some time in the spring, when the NRDGA plans to publish a complete Radio Manual for Retailers. Alan Wells, manager of the Sales Promotion Division of NRDGA, has resigned effective March 1 to join Kaufman's, Pittsburgh. His successor will be named shortly.

The NAB Research Department is preparing a comprehensive survey to gain up-to-date information on department store use of radio. The cooperation of all stations is earnestly requested in filling out and returning the questionnaire forms, which will be issued soon.

Along with its bulletin of February 28, the Bureau has sent to all members a reprint of an article by Kenneth Taylor, vice president of John Taylor Dry Goods Company, Kansas City, Mo., on the subject of radio for retailers. The article appeared in a recent issue of The
Retail Executive. Extra copies of the reprint are available on request to the Bureau.

**INSURANCE ADVERTISING CONFERENCE**

Representing the Bureau of Radio Advertising at the Insurance Advertising Conference at Hotel Biltmore, New York, February 29 and March 1, are Ed Kirby and William R. Cline, commercial manager, WLS, Chicago, and chairman of the NAB Sales Managers' Committee.

**NO FREE OFFERS**

The Bureau is glad to report that no new free offers were reported by members during the past two weeks. The following, however, sought to place “cost-per-inquiry” business, and have been advised of NAB policy on such proposals:

**ADVERTISING VOLUME**

*Printers' Ink* released in this week's issue an estimate of the total volume of advertising in the United States for the year 1939 at $1,602,000,000. This figure is divided between the various media as follows:

<table>
<thead>
<tr>
<th>Medium</th>
<th>Volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>Newspaper</td>
<td>$852,000,000</td>
</tr>
<tr>
<td>Magazine</td>
<td>$150,000,000</td>

</tbody>
</table>

**VETERAN OPERATORS ASSOCIATION HONORS INDUSTRY**

A handsome bronze plaque inscribed to the American Broadcasting Industry, “Finest In The World,” was received by Neville Miller last week from the Veteran Wireless Operators Association at the association’s fifteenth anniversary dinner in New York. Mr. Miller also was made an honorary member.

**WALKER’S MOTHER DIES**

The broadcasting industry extends its sympathy to FCC Commissioner Paul Walker whose mother died last week.

**PRIVATE RADIO SERVICE DENIED BY FCC**

The FCC is receiving an increasing number of requests for authorizations permitting the use of radio for communications between offices and automobiles. While such service would be a private convenience, it has not been shown to be in the public interest to grant such restricted facilities.

There have been many requests for such service on behalf of business concerns and individuals, but in no case within the continental United States has a station of this class been authorized except for emergency radio communications involving the safety of life and property, in which cases the facilities are required to be available to the general public for emergency communication.

**TEXAS STATION REVOCATION HEARINGS SET BY FCC**

Public hearings have been ordered by the FCC in the cases of six Texas radio stations involved in revocation proceedings. Commissioner George Henry Payne has been designated to sit at the separate hearings which are scheduled as follows: KTBC, State Capitol Broadcasting Association, Inc. (Austin), at Austin, on March 5; KNET, Palestine Broadcasting Association (Palestine), at Dallas, March 7; KRBA, Red Lands Broadcasting Association (Lufkin), at Dallas, March 11; KSAM, Sam Houston Broadcasting Association (Huntsville), at Dallas, March 12; KAND, Navarro Broadcasting Association (Corsicana), at Dallas, March 11; KGKB, East Texas Broadcasting Company (Tyler), at Dallas, March 14.

In ordering these hearings, the Commission denied motion for continuance of hearing filed on February 26 in behalf of stations KTBC, KNET, KRBA, KSAM, and KGKB.

**FEDERAL COMMUNICATIONS COMMISSION RULES AND REGULATIONS**

**Part 4. Visual Broadcast Service**

**Television Broadcast Stations**

Sec. 4.71 Defined. The term “television broadcast station” means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public. The transmission of synchronized sound (aural broadcast) is considered an essential phase of television broadcast and one license will authorize both visual and aural broadcast as herein set forth.

(a) There shall be two types of experimental television stations, namely, “Experimental Research Stations” and “Experimental Program Stations” which shall be known as Class I and Class II stations, respectively.

Sec. 4.72 Licensing requirements, necessary showing

(a) A license for a television Class I station will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of research and experimentation in the technical phases of television broadcasting, which indicates reasonable promise of substantial contribution to the development of the television art.
2. That the transmission of signals by radio is essential to the proposed program of research and experimentation.
3. That the program of research and experimentation will be conducted by qualified personnel.
4. That the applicant is legally, financially, technically, and otherwise qualified to carry forward the program.
5. That public interest, convenience or necessity will be served through the operation of the proposed station.

(b) A license for a Class II station will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a definite plan of experimentation in the television broadcast program service which indicates reasonable promise of substantial contribution to the advancement of television broadcasting as a service to the public.

2. That the program of experimentation will be conducted by qualified personnel.

3. That program material is available and will be utilized by the applicant in rendering broadcast service to the public.

4. That a minimum scheduled program service of ten hours per week will be maintained throughout the license period.

5. That the applicant will install and operate transmitting and studio equipment technically adequate to render a service suitable for reception by the public.

6. That the operation with respect to the suppression of spurious emissions and carrier noise, safety provisions, etc., will be in accordance with good engineering practice.

7. That the applicant's technical facilities will be adequate to serve an area appropriate for the program of experimentation.

8. That a competent engineering study has been made of the nature, extent and effect of interference which may result from the simultaneous operation of the proposed station and other Class II television stations.

9. That the applicant is legally, financially and otherwise qualified to render a satisfactory service to the public.

10. That public interest, convenience or necessity will be served through the operation of the proposed station.

Sec. 4.73 Charges

(a) No charges either direct or indirect shall be made by the licensee of a television station for the production or transmission of either aural or visual programs transmitted by such station, except as provided in subsection (b).

(b) Beginning September 1, 1940, Class II television licensees may make charges against program sponsors to cover the cost of program produced for the respective sponsors; and such sponsored programs, including advertising material, may be transmitted as part of the station's experimental program service but without charge for such transmission.

(c) The limited commercialization permitted under subsection (b) above shall not take precedence over the experimental service, but shall be subordinate to it.

Sec. 4.74 Reports by Class II Stations

Quarterly reports on forms prescribed by the Commission shall be made by Class II television broadcast stations of their charges and costs as well as of other pertinent information which may be of assistance to the Commission in evaluating the economic feasibility of television broadcasting as a regular service to the public on a commercial basis.

Sec. 4.75 Announcements

At the time station identification announcements are made, there shall be added the following:

"This is a special television broadcast made by authority of the Federal Communications Commission for experimental purposes."

Sec. 4.76 Scope of Experimentation, Limitations and Restrictions

(a) Class I stations shall operate to conduct research and experimentation for the development of the television broadcast art in its technical phases but shall not operate to render a regularly scheduled television broadcast service to the public.

(b) No Class I station shall operate when objectionable interference would be caused by such operation to the regularly scheduled broadcast service of a Class II station.

(c) Class II stations shall operate to conduct television broadcast research and experimentation for the development of the art in its program phases and in connection therewith may carry out experiments with respect to power and antenna requirements for a satisfactory service to the public.

(d) Class II stations shall make all equipment changes necessary for rendering such external transmitter performance as the Commission may at any time require.

Sec. 4.77 Frequency assignment

(a) The following groups of channels are allocated for assignment to television broadcast stations licensed experimentally:

<table>
<thead>
<tr>
<th>Group</th>
<th>Channel</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>#1</td>
<td>44,000 - 50,000 kc.</td>

<td></td>
<td>19</td>
<td>288,000 - 294,000</td>
</tr>
</tbody>
</table>

(b) Each Class II television broadcast station will be assigned one channel. Class I television stations may be assigned one or more channels as the program of experimentation requires.

Sec. 4.78 Power

The operating power of a Class I station shall not be in excess of that necessary to carry forward the program of research and in no case in excess of the power specified in its license.

Sec. 4.79 Supplemental report with renewal application

A supplemental report shall be filed with and made a part of each application for renewal of license and shall include comprehensive reports on the following:

(a) For Class I Television Broadcast Stations.

1. Number of hours operated.
2. Full data on research and experimentation conducted, including the power employed.
3. Conclusions, tentative and final.
4. Program for further developments of the television broadcast art.
5. All developments and major changes in equipment.
6. Any other pertinent developments.

(b) For Class II Television Broadcast Stations.

1. Number of hours operated during which programs were transmitted classified as studio performances, special events (with appropriate description), films, etc.

* This provision modifies Section 4.4(d) in so far as that Section applies to Class II television broadcast stations.

1 This provision modifies Section 4.4(a) in so far as it applies to television broadcast stations.
2. Studio equipment used and any developments made during the license period.
3. Progress made in the advancement of television broadcasting as a service to the public.
4. Financial data on cost of operation during the license period.
5. Power employed, field intensity measurements and visual and aural observations to determine the service area of the station.

FCC RULE AMENDMENTS

Following is a list of all amendments to the Rules and Regulations since the printing of the FCC's rules in pamphlet form.

<table>

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases for the week beginning Monday, March 4. They are subject to change.

**Tuesday, March 5**

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Renewal of license, 1200 kc., 100 watts, unlimited time.

**Tuesday, March 5**

Hearing to be held before Commissioner George Henry Payne, at Austin, Texas

KTBC—State Capitol Broadcasting Association, Inc., Austin, Tex. —In re: Revocation of station license of KTBC.

**Wednesday, March 6**

KXL—KXL Broadcasters, Portland, Oregon.—C. P., 740 kc., 10 KW, 10 KW LS, limited time (DA—day and night). Present assignment: 1120 kc., 250 watts, shares with KBPS.

**Thursday, March 7**

Oral Argument before the Commission

Report No. B-75:

NEW—William C. Barnes & Jonas Weiland, tr/ as Martinsville Broadcasting Co., Martinsville, Va.—C. P., 1120 kc., 100 watts, 250 watts LS, unlimited time.

Thursday, March 7

Hearing to be held before Commissioner George Henry Payne, in the County Probate and Commissioners Court Rooms, Dallas, Tex.

KNET—John Calvin Welch, William M. Keller & Bonner Frizzell, d/b/a Palestine Broadcasting Assn., Palestine, Texas.—In re: Revocation of station license of KNET.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

**March 19**

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Modification of license, 810 kc., 1 KW, specified hours (6 a.m. to 11 p.m., EST), (DA—daytime). Present assignment: 810 kc., 1 KW daytime—WCCO, directional antenna.

**March 26**

NEW—William F. Huffman, Wisconsin Rapids, Wisc.—C. P., 1310 kc., 100 watts, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

J. Winfield Crew, Jr., Roanoke Rapids, N. C.—Granted construction permit for new broadcast station to operate on 1200 kc., power 250 watts, unlimited time.

WJBW—Charles C. Carlson, New Orleans, La.—Granted construction permit to make changes in equipment and increase power from 100 watts to 250 watts; frequency 1200 kc., unlimited time.

WSKB—McComb Broadcasting Corp., McComb, Miss.—Granted construction permit to make changes in equipment and increase power from 100 watts to 250 watts; frequency 1200 kc., unlimited time.

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted construction permit to install new transmitter, increase power from 500 watts to 1 KW, move transmitter site from 5 miles south of corporate limits, east of Valley Pike, to a site to be determined, and install vertical radiator; frequency 530 kc.

WOR—Bamberger Broadcasting Service, Inc., Carteret, N. H.—Granted extension of special experimental authority to operate Standard Broadcast Station WOR as a facsimile broadcast station between 1 a.m. to 6 a.m., EST, to August 1, 1940; station operates on 710 kc., 50 kw, unlimited time, using directional antenna.

WGPC—Albany Broadcasting Co., Inc., Albany, Ga.—Granted construction permit to move studio and transmitter site, increase power from 100 watts to 250 watts, and install new transmitter and antenna; station operates with 1420 kc., unlimited time.

DESIGNATED FOR HEARING

KGDM—E. F. Pfeffer, Stockton, Calif.—Application for modification of license to change frequency from 1100 kc. to 1520 kc. and increase time of operation from daytime only to unlimited; station operates with 1 KW power.

RENEWAL OF LICENSES

WTAL—Florida Capitol Broadcasters Inc., Tallahassee, Fla.—Granted renewal of license on temporary basis only until August 1, 1940 pending action on application for renewal of license.

The following stations were granted renewal of licenses for the period ending August 1, 1940:

March 1, 1940
WMAN—Richland, Inc., Mansfield, Ohio.—Granted special renewal of licenses.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special renewal of license.

E. E. Krebsbach, Miles City, Mont.—Denied petition to intervene in re application for construction permit for new station to operate on 1310 kc., 250 watts, unlimited time.

William F. Huffman, Wisconsin Rapids, Wis.—Granted motion for continuation of hearing now scheduled for February 26, 1940, to new date to be fixed by Office of the Secretary, in re application for construction permit for new station to operate on 1210 kc., 100 watts night, 250 watts local sunset, unlimited time.

J. D. Falvey, Ottumwa, Iowa.—Granted supplemental petition for order to take deposits in re application for construction permit for new station to operate on 1210 kc., 100 watts, unlimited time.

WHOH—Matheson Radio Co., Inc., Boston, Mass.—Granted motion for extension of time to file proposed findings due February 25, 1940, to March 15, 1940, in re application for construction permit to change assignment from 1 kW, local sunset, daytime only, to 830 kc., 5 KW, 5 KW local sunset, unlimited time (DA night).

Thumb Broadcasting Co., Brown City, Mich.—Continued for one week opposition to petition of Flint Broadcasting Co. (WFDF) to intervene with proposals of alternate relief in re application of Thumb Broadcasting Co., for construction permit for new station to operate on 880 kc., 250 watts, daytime.

WSPA—Virgil V. Evans, tr/ as the Voice of South Carolina, Spartanburg, S. C.—Granted construction permit to install auxiliary transmitter, using 500 watts power, at Evanston Heights, Spartanburg, S. C.

KHS—Golden Empire Broadcasting Co., Chico, Calif.—Granted license to cover construction permit for new equipment and increase in power from 250 watts to 500 watts night and 1 KW day, frequency 1260 kc., unlimited time; also granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WJBY—Gadsden Broadcasting Co., Inc., Gadsden, Ala.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

KYSM—F. B. Clements & Co., d/b as Southern Minnesota Supply Co., Mankato, Minn.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

W2XUP, New York, N. Y.; W2XGR, Dallas, Tex.; W2XJU, Cincinnati, Ohio; W2XBF, New York, N. Y.; W4XHI, Nashville, Tenn.; W2XYZ, St. Louis, Mo.; W8XUF, Jackson, Mich.; W6XE, Cleveland, Ohio; W8XA, Buffalo, N. Y.; W8XUM, Columbus, Ohio.

W3XAD—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W3XEP—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W2XUP, New York, N. Y.; W2XGR, Dallas, Tex.; W2XJU, Cincinnati, Ohio; W2XBF, New York, N. Y.; W4XHI, Nashville, Tenn.; W2XYZ, St. Louis, Mo.; W8XUF, Jackson, Mich.; W6XE, Cleveland, Ohio; W8XA, Buffalo, N. Y.; W8XUM, Columbus, Ohio.

W3XAD—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W3XEP—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W2XUP, New York, N. Y.; W2XGR, Dallas, Tex.; W2XJU, Cincinnati, Ohio; W2XBF, New York, N. Y.; W4XHI, Nashville, Tenn.; W2XYZ, St. Louis, Mo.; W8XUF, Jackson, Mich.; W6XE, Cleveland, Ohio; W8XA, Buffalo, N. Y.; W8XUM, Columbus, Ohio.

W3XAD—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W3XEP—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W2XUP, New York, N. Y.; W2XGR, Dallas, Tex.; W2XJU, Cincinnati, Ohio; W2XBF, New York, N. Y.; W4XHI, Nashville, Tenn.; W2XYZ, St. Louis, Mo.; W8XUF, Jackson, Mich.; W6XE, Cleveland, Ohio; W8XA, Buffalo, N. Y.; W8XUM, Columbus, Ohio.

W3XAD—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W3XEP—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W2XUP, New York, N. Y.; W2XGR, Dallas, Tex.; W2XJU, Cincinnati, Ohio; W2XBF, New York, N. Y.; W4XHI, Nashville, Tenn.; W2XYZ, St. Louis, Mo.; W8XUF, Jackson, Mich.; W6XE, Cleveland, Ohio; W8XA, Buffalo, N. Y.; W8XUM, Columbus, Ohio.

W3XAD—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W3XEP—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W2XUP, New York, N. Y.; W2XGR, Dallas, Tex.; W2XJU, Cincinnati, Ohio; W2XBF, New York, N. Y.; W4XHI, Nashville, Tenn.; W2XYZ, St. Louis, Mo.; W8XUF, Jackson, Mich.; W6XE, Cleveland, Ohio; W8XA, Buffalo, N. Y.; W8XUM, Columbus, Ohio.

W3XAD—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W3XEP—RCA Manufacturing Co., Inc., Portable (Camden, N. J.).—Granted renewal of television broadcast station license for the period ending February 1, 1941.
1940; from 3:00 to 3:30 p.m. CST, on March 4, 11, 18, and 25, 1940, and from 8:00 to 10:30 p.m. CST, on March 8, 1940 (provided KGGF remains silent) in order to broadcast special educational programs; to remain silent from 7:15 p.m. to 9:15 p.m. CST, on March 21, 1940, in order to observe Easter vacation (provided WNAD remains silent).

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to remain silent during above periods in order to permit WNAD to broadcast special educational programs; to operate from 7:15 p.m. to 9:15 p.m. CST, on March 21, 1940, in order to permit WNAD to remain silent during Easter vacation (provided WNAD remains silent).

WEAN-WABA-WNAC-WICC—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to pick up and rebroadcast programs to be received from international broadcast station W2XMN, for a period not to exceed 30 days.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to remain silent during above periods in order to permit WNAD to broadcast special educational programs; to operate from 7:15 p.m. to 9:15 p.m. CST, on March 21, 1940, in order to permit WNAD to remain silent during Easter vacation (provided WNAD remains silent).

WEAN-WABA-WNAC-WICC—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to pick up and rebroadcast programs to be received from international broadcast station W2XMN, for a period not to exceed 30 days.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate from 2 p.m. to 4 p.m. and from 8 p.m. to 10 p.m., EST, on February 28, 1940, and from 4:00 to 6:00 p.m. and from 7:00 to 9:00 p.m., EST, on April 18, 1940, in order to broadcast basketball games only.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

KTKC—Tulare-Kings Counties Radio Associates, Chas. A. Whittaker, President, Visalia, Calif.—Granted construction permit to make changes in transmitting equipment and increase in power from 300 watts to 1 KW, 5 KW local sunset, for extension of retransmission service to pick up and rebroadcast programs being broadcast by station KFRU as above in order to broadcast basketball games.

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

KJTN—James Broadcasting Co., Inc., Jamestown, N. Y.—Granted special temporary authority to operate by direct measurement of antenna input in compliance with Section 3.54.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Granted special temporary authority to operate from 2 p.m. to 4 p.m. and from 8 p.m. to 10 p.m., EST, on February 28, 1940, and from 4:00 to 6:00 p.m. and from 7:00 to 9:00 p.m., EST, on April 18, 1940, in order to broadcast basketball games only; to operate from 8 p.m. to 9 p.m., EST, on February 26, 1940, in order to broadcast celebration of University of Maine 100th Anniversary.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with station WGBF, with power of 250 watts, from 7:30 p.m. to 9:30 p.m., CST, on February 29, 1940, and from 7:00 p.m. to 8 p.m., CST, on March 1, 1940, in order to permit WGBF to broadcast basketball games.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XBN, for a period not to exceed thirty days.

WSOY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted special temporary authority to operate from 6:30 p.m. to 9:30 p.m., CST, to the conclusion of basketball games on March 1 and 2, 1940, in order to broadcast basketball games only, using a power of 50 watts.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to delay relay through television broadcast station W2XOY the television programs to be received from the NBC, Inc., transmitter located atop the Empire State Building, for a period not to exceed thirty days.

WCLS—WCLS, Inc., Joliet, Ill.—Granted special temporary authority to operate from 8:30 p.m. to 10:45 p.m., CST, on March 6, 7, and 9, 1940, and from 10:30 p.m. to 10:45 p.m., CST, on March 8, 1940, in order to broadcast basketball games only.

WQAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted special temporary authority to operate from 6:30 p.m. to 9:00 p.m., EST, to the conclusion of basketball games on March 1 and 2, 1940, in order to broadcast basketball games only, using a power of 50 watts.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to relay through television broadcast station W2XOY the television programs to be received from the NBC, Inc., transmitter located atop the Empire State Building, for a period not to exceed thirty days.

W6XAO—Don Lee Broadcasting System, Hollywood, Calif.—Modification of construction permit (B5-PVB-38) to move transmitter and specify frequencies 14000-25000 kc. to comply with new rules, requesting extension of commencement date and completion date from 9-30-39 and 3-31-40, to 3-31-40 and 9-30-40, respectively.

NEW—Don Lee Broadcasting System, Los Angeles, Calif.—Construction permit for a new high frequency broadcast station, 42600 kc., 1 kw., special emission. Located on top of Hollywood Hills, Los Angeles, Calif.

NEW—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Construction permit for a new high frequency broadcast station, 43000 kc., 1 kw, power, special emission. Located at Ralphston Road, Indianapolis, Ind.

W2XOV—General Electric Co., Alhany, N. Y.—Construction permit to increase power from 150 watts to 1 kw., move transmitter from Alhany, N. Y., to New Scotland, N. Y., and install new transmitter. Amended to change maximum rated power of transmitter.

W8XAD—WHEC, Inc., Rochester, N. Y.—License to cover construction permit (B1-PHB-81) as modified for new high frequency broadcast station.

NEW—the Metropolis Co., Jacksonville, Fla.—Construction permit for a new high frequency broadcast station, 42500 kc., 1 kw., special emission; located in Jacksonville, Fla., exact site to be determined.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Eileen-Joy Fashions, Inc.—Charging misrepresentation in the sale of women's wearing apparel, a complaint has been issued against two New York corporations, Eileen-Joy Fashions, Inc., 1375 Broadway, and Teen Frocks, Inc., 520 Eighth Ave., and Morris Scharf and Henry Dudkin, individually and as officers of the two corporations, who formerly were co-partners trading as Eileen-Joy Fashions.

It is alleged that the respondents advertised as silk articles composed entirely of rayon by means of terms such as "Taffeta" and "Pure Dye" placed on tags, labels, price lists and in advertising matter; that products composed entirely of rayon were advertised as "Celanese" and "Celanese Clairanel Se" that, and that the product, when used to designate rayon, are not sufficiently well known and understood by the purchasing public to inform them that they are buying rayon or anything other than silk.

It is alleged that the respondents' practice of furnishing misleading labels, tags and other advertising material to jobbers, retailers and other customers for attachment to the respondents' products, and the use of designations which fail to disclose the rayon content of their products, provide unimformed or unscrupulous dealers with a means of misleading buyers into believing they are purchasing silk instead of rayon garments.

Novelty Sales Company—Simon and Morris Aron and Louis Broudo, trading as Novelty Sales Company, 806 Walnut St., Philadelphia, are charged, in a complaint with use of lottery methods in the sale and distribution of merchandise.

The complaint alleges that the respondents, who are engaged in selling and distributing clocks, knives, flashlights and similar merchandise, sell to dealers assortments of their merchandise so packed and assembled as to involve the use of a game of chance, gift enterprise or lottery scheme when the articles are sold to ultimate consumers. Such sales plans or methods, the complaint continues, have a tendency to induce the purchasing public to buy the respondents' merchandise in preference to that of competitors who do not use similar methods, and constitute unfair methods of competition within the meaning of the Federal Trade Commission Act.

Hamilton Ross Factories, Inc., 666 Lake Shore Drive, Chicago, a dealer in chinaware, glassware, plated silverware and cutlery, has been served with a complaint alleging misrepresentation in the sale of its products.

Through the use of advertising mats and color plates supplied to its department store and other retailer customers for insertion in newspaper advertisements, the respondent company is alleged to represent that silverware sold by it is "heavily plated," a term implying to the purchasing public that such silverware is of a quality and grade superior to the lower grades of plated silverware. The complaint alleges that the silverware sold by the respondent is not heavily plated but corresponds approximately to Grade A-1 of household silverware, the lowest grade to which quality marks are regularly applied.

March 1, 1940 4076
The complaint also alleges that through the use of the word “Factories” in its corporate and trade name and in letterheads, invoices and other printed matter, the respondent implies that it owns, controls or operates factories where the products it sells are manufactured, when such is not a fact. (4040)

Teen Frocks, Inc.—See Eileen-Joy Fashions, Inc.

Trippe Manufacturing Company—Misrepresentation in the sale of an electric auxiliary light designed for use on motor vehicles, is alleged in a complaint issued against Trippe Manufacturing Company, 564 West Adams St., and Trippe Sales Company, 600 West Jackson Boulevard, Chicago, both of which have branch offices in Toronto, Canada, and Halifax, England.

The respondents are alleged to represent that the light rays from their “Trippe Safety Light” or “Trippe Speed Light” will penetrate clouded fog regardless of its density; that fog is thin and less dense close to the ground and that the light rays from their light will cut under and stay under the fog blanket to give greater visibility; that the light will provide adequate illumination in fog, rain, mist or snow regardless of density; and to the extent of 1,000 feet ahead. A person using the light will have 1,000 feet distance of visibility between the user and danger and that the respondents’ light has been officially purchased or used by the United States Coast Guard.

The complaint alleges that the respondents’ representations are misleading and in excess of their product’s accomplishments. (4037)

Trippe Sales Company—See Trippe Manufacturing Company.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders during the past week:

Affiliated Products, Inc., 357 Cornelson Ave., Jersey City, N. J., has been ordered to cease and desist from misleading representations in the sale of cosmetics designated “Edna Wallace Hopper’s Special Restorative Cream” and “Edna Wallace Hopper’s White Youth Pack (Clay”).

Findings are that “Edna Wallace Hopper’s Restorative Cream,” through use of various advertisements and of the word “Restorative” in the trade name, was represented as a discovery of a great French scientist or a famous beauty expert and as being capable of rejuvenating the skin, restoring the oils of youth and a youthful appearance to aged skin and preventing and erasing wrinkles. However, the findings continue, the preparation is not a discovery of a great French scientist, but is made from a formula developed by Dr. A. B. Pacini, a cosmetician and graduate chemist, and it will not accomplish the results claimed.

It was found that much of the advertising involved in this proceeding was prepared and placed by the respondent’s predecessor in business.

The respondent is ordered to cease use of advertisements which employ the word “Restorative” in the trade name of the special restorative cream and which represent that this preparation is a restorative cream or the discovery of a great French scientist; that its use will rejuvenate the skin or restore the oils of youth or youthful appearance to aged skin or make one’s face appear 10 or any number of years younger or keep the skin young and prevent or erase wrinkles or age lines.

Under the order, the respondent company is also directed to desist from disseminating advertisements which represent that the white youth pack is of French origin, will nourish or revitalize the skin, remove blackheads or eliminate large pores or have any beneficial effect other than loosening blackheads and thereby aiding in their removal. (3734)

Buford & Owens College, 812 North East Third St., Oklahoma City, Okla., distributor of preparations for the hair and scalp, and three of its officers, have been served with an order to cease and desist from misrepresentations in the sale of their preparations. The respondent officers of the corporation are Guisse and George Buford and Mary Owens Boone Wellingham.

According to the findings, the respondents represented their preparations as constituting cures or remedies for dandruff, falling hair, and scalp diseases and as being capable of promoting the growth of hair, preventing hair loss and were not the facts. It was also found that by use of the word “College” in the corporate name of their organization the respondents represented that they conducted an institution of higher learning, when in fact the respondent corporation is not a college.

The order directs the respondents to cease advertising that “Buford & Owens Hair Oil”, “Buford & Owens Pressing Oil”, “Buford & Owens Special Oil”, and “Buford & Owens Shampoo” are cures or remedies for dandruff, falling hair or scalp diseases, or will promote hair growth or prevent hair from falling out, and to discontinue the use of the word “College” or any part of the corporate name or representing that the respondents conduct an institution of higher learning. (3790)

Curl-O-Wave Company. An order has been issued requiring J. W. Cooper and James J. Cooper trading as Curl-O-Wave Company, 201 North Wells St., Chicago, to cease and desist from certain misrepresentations in the sale of a hair curling preparation.

In their advertising matter the respondents are found to have represented that their preparation, “Curl-O-Wave”, will make the static-free to manufacture finished hats from new felt material, from hat bodies obtained from shop-worn hats that have not previously been worn or used, and from old, previously used hat bodies. By use of the words “Made Over Hat”, and by failure to properly mark its products as having been made from second-hand hat bodies, the respondents fail to disclose that hats sold by them are made from old, worn or previously used hat bodies, as distinguished from hats made from shop-worn hat bodies which had never been worn or used.

The respondents are ordered to cease advertising that their preparations as constituting cures or remedies for dandruff, or other bed coverings.

Economy Men’s Hat Company, Inc., and Rosalind Nissenbaum, Lena Nissenbaum and Nat Gilman, individually and as officers of the corporation, have been ordered to cease and desist from certain misrepresentations in the sale of their products.

The Commission finds that the respondents, with their office and principal place of business located at 5 Elizabeth St., New York, buy old, worn and previously used felt hats, the bodies of which are cleaned, steamed, ironed and shaped by the respondents and sold to retailers. The respondents cause the words “De Luxe Quality” or similar words to be embossed on the sweat bands of the hats, preceded by the words “Made Over Hat”.

Findings are that it is the practice of various manufacturers of hats to manufacture finished hats from old felt material, from hat bodies obtained from shop-worn hats that have not previously been worn or used, and from old, previously used hat bodies. By use of the words “Made Over Hat”, and by failure to properly mark its products as having been made from second-hand hat bodies, the respondents fail to disclose that hats sold by them are made from old, worn or previously used hat bodies, as distinguished from hats made from shop-worn hat bodies which had never been worn or used.

The respondents are ordered to cease advertising that their products were of a value of $37.50 and that $18.75 was an introductory or special price limited as to time and was one-half the usual or customary price, when in fact the respondent did not sell his quilts for $37.50, and $18.75 was not a special or introductory price but the regular and customary price.

The order prohibits the respondent from representing as the customary or regular prices of quilts or other bed coverings prices and values which are in excess of the prices at
which the products are customarily sold and from representing that the prices at which he sells his articles constitute a discount to the purchaser or that such prices are special, reduced or introductory prices or are applicable for a limited time only, when in fact they are the usual and customary prices. (3375)

I. Sekine Company, Inc., of New York and Baltimore, has been ordered to discontinue certain misleading representations in the interstate sale of toothbrushes.

The respondent company is found to have imported handles and bristles for its brushes and, in the process of preparing the commodity for sale, to have bored holes for the bristles in the handles in the precise location of marks denoting Japanese origin of the handles, thus obliterating the words "Japan" or "Made in Japan" when the bristles were inserted. When the commodity was finally assembled, the findings continue, the sentence, "This brush is made in U. S. A.", was stamped in bold gold letters in a conspicuous place elsewhere on the handles of the brushes.

This practice was misleading, the findings continue, as the toothbrushes were not wholly "Made in U. S. A." It is pointed out that a substantial portion of the buying public has indicated a decided preference for American-made products, including toothbrushes.

The Commission order directs the respondents to cease and desist from using the words, "This brush is made in U. S. A.", or words of similar import, on toothbrushes made from imported handles, or on containers in which they are packed, or in any other manner. The order also prohibits the representation, directly or by implication through use of the foregoing phraseology or other words of similar meaning, or by unnecessary obliteration or concealment of the words indicating the foreign origin of the handles in processing the brushes, that toothbrushes made from imported handles are of domestic manufacture. (3624)

W. T. Wagner's Sons Company—Prohibiting use of the word "English" to designate a soda water made in the United States from domestic ingredients. A order to cease and desist has been issued against W. T. Wagner's Sons Company, 1920-26 Race St., Cincinnati, Ohio.

The order also directs that the respondent cease representing that its product, which has been designated "Wagner English Club Soda", is imported from, or made of ingredients imported from, England, or that only soda waters made in England have the properties possessed by the respondent's soda water.

The findings point out that a substantial number of American purchasers have a preference for soda waters made in England over those made in the United States on the grounds that they are as safe or durable as new tires, or will save their owners 50 or nearly 50 per cent of new tire costs, or will give the same trouble-free service as first line new tires. (02513)

Kirkwood Laboratories, Inc., Clifton, N. J., stipulates that it will cease advertising "Har-Ex Capsules" as a competent or effective remedy for hay fever, rose fever or asthma, as a new medicine or method of treatment, as quick to ease suffering or sneezing from hay fever or rose fever or to give relief from trouble due to local irritation. The respondent also agrees to desist from the representation that the misery of rose fever, hay fever or asthma is ended by use of its preparation. (02512)

Likely Luggage Company—Sam Skaller, trading as Likely Luggage Company, Columbus, Ohio, in the sale of luggage, stipulates that he will desist from quoting, in his catalogs, price lists, labels, tags or in any other way, fictitious or misleading figures purporting to be the regular sale or list prices of merchandise, or figures which are in excess of the prices at which such articles are normally sold. The respondent also agrees to discontinue representing in any way in catalogs, trade literature or otherwise, that a discount of 50 per cent or any other fictitious reduction from his customary prices is offered to the purchaser, when such is not a fact. (2683)

Macksoud Importing Company—James S. Macksoud, trading as Macksoud Importing Company, New York, N. Y., agrees to desist from representing himself in any way to be a manufacturer of handkerchiefs or other merchandise, when he neither owns, operates nor directly controls the factory in which the goods he sells are made; from representing that he has manufacturing plants of his own at Swatow, Shanghai or Chefoo, China, or elsewhere, for the production of these or other goods, when such is not a fact, or from representing that he has an office or place of business in Shanghai, Chefoo or other place where he does not maintain such an establishment. (2682)

C. E. Twombly, Medford, Mass., agrees to discontinue representing "Cankerine", a preparation for poultry, as being sure in action, a cure for canker in pigeons or poultry, and as being capable of removing a canker without bleeding or soreness. The respondent also stipulates he will cease advertising that the product is prepared by him, unless and until he actually compounds it.

Apex Tire, Inc., 505 Central Ave., Pawtucket, R. I., has entered into a stipulation to discontinue misleading representations in the sale of rebuilt automobile tires.

In the sale of its "Apex Rebuilt Tires," the respondent corporation agrees to cease advertising that it is the world's largest rebuilder of tires or America's largest quality tire rebuilder, until such are the facts established by competent evidence.

Other representations to be discontinued, under the stipulation, are that Apex Tire, Inc. is the pioneer of the tire reboring industry; that its tires are guaranteed against all road hazards, or are unconditionally guaranteed for six months, and that they are as safe or durable as new tires, or will save their owners 50 or nearly 50 per cent of new tire costs, or will give the same trouble-free service as first line new tires. (02511)

M. Williams—Ada Roehr, trading as M. Williams, Jersey City, N. J., sells a medal designated "Success Emblem", and printed instructions entitled "The Lifetime Guide." The respondent agrees to cease making various representations in the sale of these products, among which are the following: that the alleged psychological teachings embodied in "The Lifetime Guide", if followed, will enable one to attain love, success, prosperity, a new start in life, increased income, the mastery of difficult occupations, an easy living, and power to overcome jealousy, banish sickness, overthrow evil influence, stop others from taking advantage of one's kind disposition and cause undesirous persons to leave, move or go away, or that these teachings do other than offer instructions designed to influence the mental attitude of the student. (2511)

The Federal Trade Commission has closed its case against Ardell Razor Blade Corporation, Newark, N. J., and its selling agent, Fuller Blade Company, Inc., New York, which were charged with unauthorized use of well-known trade names in the sale of razor blades.

The case was closed without prejudice to the Commission's right to reopen it and resume prosecution, should future facts so warrant.
Eight More for BMI

With the addition of eight more subscribers to BMI this week, the total amount now paid for stock subscriptions and pledged on license agreements was swelled to $1,226,225.00. These additions brings to 276 the number of stations that have now subscribed and paid for BMI stock. Another 102 stations have indicated their approval and are expected to subscribe.

The latest subscribers are as follows (previous lists were printed in NAB REPORTS February 16, 1940, p. 4030 and March 1, 1940, p. 4064).

TOMPKINS HEADS BMI

Mr. Tompkins, as head of Associated Music Publishers, has directed the building of a catalog of more than 500,000 musical compositions and has had extensive experience in providing both popular and classical music suitable for radio programs.

Mr. Tompkins said that he had been attracted by the opportunity presented by the new undertaking to create a reservoir of music designed particularly for the radio public, as he had had this thought in mind for many years.

"The present situation in the broadcast industry in respect to the supply of music," he said, "is neither in the interest of the listener or in the interest of the composer. Broadcasters have been drawing their music from an ever-narrowing, instead of widening, circle of composers. This has led to the repetitious performance of a relatively small number of compositions and has failed to encourage creative talent throughout the country. Through Broadcast Music, Inc., the industry has the means of offering to creative artists, on terms profitable to them, an opportunity to use radio to obtain public acceptance of their works.

"The ability to write music with popular appeal is not, in my opinion, limited to those few hundred composers who today have the full benefit of popularization by radio, and who are selected, not on the basis of inherent merit, but because their works have been published by a small group of popular music publishers.

"To diversify our program content and to add interest to radio programs, we intend to draw on classical and standard works, many of which have hitherto been neglected. We feel that the musical taste of the American people is already high, and that public standards are consistently being raised through the medium of radio. In addition to the encouragement of the popular field, we believe that the encouragement of sound standards of musical taste and of writers who gratify such tastes is one of our duties.

"Up to the present time broadcasters have been in the unfortunate position of being compelled to secure one of their most important raw materials, namely, popular music, almost entirely from a single source. The constructive job of Broadcast Music, Inc., lies in uncovering and fostering fresh sources of music which will continue to supply broadcasters, irrespective of whether or not a contract is entered into with the American Society of Composers, Authors and Publishers (ASCAP) at the end of the present year. The agreement of broadcasters to invest more than a million and a quarter dollars in Broadcast Music, Inc., is an assurance of the company's effective and permanent operation."
TOMPKINS HEADS BMI
(Continued from page 4079)

In outlining the plans of the new company, Mr. Tompkins explained that it would deal not only with individual writers, but also with publishing houses, transcription companies, groups and associations here, in Europe and South America, and with everyone who has music available for public performance. Both full and part time employment will be afforded by the company to arrangers and others engaged in the popular music field, and in making its music available in published and in recorded form. Cooperation will be carried on to the fullest extent with all other industries offering music to the public.

"I view my task as a constructive one," Mr. Tompkins said, "which should have the backing not only of the broadcasting industry and of other users of music, but also that of the great body of the American people which is interested in the encouragement of the art of music and the development of creative talent."

BMI LICENSE AMENDMENT

As the plan of Broadcast Music was declared effective on February 7, 1940, and the commencement date on the performing right licenses fixed at April 1, 1940, it is necessary for stations now wishing to subscribe to BMI to amend the license agreement somewhat to reflect these facts.

Paragraphs IV and IX should be changed to read as follows:

IV. The term of this license shall commence on April 1, 1940, and shall continue for such period of time as may be designated in writing by MUSIC, provided, however, that the term of this license shall be for not less than one year from the commencement date thereof. This license shall be non-assignable, except to the person, firm, or corporation legally acquiring the Federal Communications Commission license of the broadcasting station designated in Article I hereof.

IX. This agreement shall become effective as a license agreement upon the execution and delivery of a copy hereof by MUSIC. In consideration of MUSIC using its best efforts to obtain the signature of agreements similar to this by other broadcasters, and in consideration of the signature of agreements similar to this by other broadcasters, BROADCASTER agrees that this instrument shall constitute a continuing offer which cannot be revoked by BROADCASTER for twenty days from the date of the receipt of this agreement by MUSIC.

These changes affect only those stations whose agreements were not accepted before March 2, 1940.

March 8, 1940

FCC AMENDS RECORD RULES

The FCC on February 29, 1940, amended Section 3.93(e) of the Standard Broadcast Rules, effective immediately, to read as follows:

"(e) The identifying announcement shall accurately describe the type of mechanical record used, i.e., where an electrical transcription is used it shall be announced as a 'transcription' or an 'electrical transcription', or as 'transcribed' or 'electrically transcribed', and where a phonograph record is used it shall be announced as a 'record.'"

It will be noted that this amendment modifies the amendment to this rule adopted January 4, 1940, so as to permit the use of the word "transcribed" or "electrically transcribed" in announcing the use of electrical transcriptions. However, no change has been made in the provision with respect to the announcement of phonograph records.

The FCC expects all broadcast station licensees to comply strictly with the requirements set forth above.

CHILDREN'S PROGRAM SURVEY STARTED BY MRS. LEWIS

The national survey on children's programs which was approved by the NAB Board of Directors at its last meeting, gets under way next week. The survey is jointly sponsored by the NAB and the Radio Council on Children's Programs.

Mrs. Edwin C. Lewis, vice-chairman of the Council, and radio chairman of the National Society of New England Women, will be the field representative of the Council. She will visit stations, sponsors, and teacher and women's club groups in forty-four states in the next six months. She was formerly connected with a radio station and was in the advertising agency business before devoting her full time to club work. She is nationally known in several fields and brings a rich background of practical and social knowledge to the problem.

In March and April her itinerary is as follows:

March 12—Chicago
March 13, 14, 15, 16—Michigan
March 17, 18, 19, 20—Chicago area
March 21—Racine, Wisc.
March 22, 23—Milwaukee, Wisc.
March 26—La Crosse
March 27—Rochester, Minn.
March 28—Minneapolis and St. Paul
April 1, 2—Omaha
April 3, 4—Des Moines
April 5—Ames and Cedar Rapids
April 6, 7—Davenport
April 8—Chicago
April 9, 10, 11—Pittsburgh
April 12—Altoona
April 13—Harrisburg
April 14—Lancaster
April 15, 16—Philadelphia

Carrying out the intent of the children's program section of the Code "to establish acceptable and improving standards for children's programs," the Radio Council was voluntarily set up by outstanding women's leaders.
and organizations last fall, to cooperate with the NAB in this important field.

Fully appreciative of the social as well as the economic foundation of the American system of broadcasting, the Council is available for consultation with sponsors, advertising agency people and broadcasters, in the development and preparation of contemplated children's programs, in an advisory capacity.

The Council has no commercial interest whatever; no scripts or programs are for sale. Its address is 45 Rockefeller Plaza, New York City.

In a statement of policy, Mrs. Harold V. Milligan, radio chairman of the General Federation of Women's Clubs, and head of the Council, said:

"While the Council will do all in its power to make the present system of broadcasting effective in America, and deplores any move calculated to destroy it, the Council has determined that children, as future consumers, should develop high standards of buying ethics. "Working in cooperation with the Council, broadcasters, sponsors and advertisers will find that in radio, as in other industries, the principle of adhering to the highest standards of good taste and ethical integrity will make for better business."

"The Council is prepared to undertake practical measures for the attainment of this end, even to encouraging the purchase of products of sponsors providing approved children's programs."

In order to coordinate all efforts for improving children's programs in line with the policy of the NAB Code, the following vice-chairmen serve under Mrs. Milligan as chairman: Mary Gould Davis, American Library Association, public libraries and librarians; Miss Rita Hochheimer, National Education Association, schools; Dr. Alice V. Keliher, Progressive Education Association, teachers' organizations; Mrs. Dorothy Lewis, New England Colony of Women, patriotic women's organizations; Mrs. Dorothy L. MacFadden, founder-director of Junior Programs, Inc., children's program producers; Mrs. Nathaniel Singer, United Parents' Associations, parents' groups.

The Code Committee is happy to report that several agencies and advertisers have already availed themselves of the benefits of this influential consultative service.

EDUCATIONAL RECORD EXHIBIT

The deadline is near for entries in the Fourth American Exhibition of Recordings of Educational Radio Programs. Records must be in the hands of I. Keith Tyler at Ohio State University, Columbus, Ohio, not later than March 15. The exhibition is held at the university in connection with the Eleventh Institute for Education by Radio, scheduled this year for April 29 to May 1.

Two general classes of records may be entered in the exhibition: those intended for adult listening and programs intended for the use of children, either in or out of school.

Adult programs are classified also by type of presentation. Lectures, talks and speeches will be judged together, with demonstration and participation programs in another class. A third division includes dialog, round table conversation, interview, debate and question and answer programs. All forms of dramatization are grouped together in a fourth classification.

School broadcasts are classified as follows: (1) any type of out-of-school program for children of any age; (2) programs intended for use in school, in Grades one to three; (3) In-school programs aimed at Grades four to six, and (4) programs intended for use in junior and senior high schools.

The entry fee is one dollar per program.

FDR PRAISES RADIO

President Roosevelt said this week that radio was making an "ever-increasing contribution . . . to a better understanding of public affairs."

This statement was included in a letter to William S. Paley, CBS president, congratulating Columbia on completion of a new 50,000 watt transmitter for WJSV.

Pepper, Bailey, Introduce New Radio Bills

On Monday, Senator Pepper (D-Fla) introduced a bill (S. 3512) to amend section 309 of the Communications Act by adding a requirement that no station license shall be granted, modified or renewed until after four weeks' notice published by the FCC. A hearing on the application must be held by the Commission if any person so requests, and an opportunity to be heard afforded to "all interested persons."

Senator Bailey (D-NC) on Tuesday introduced a bill (S. 3515) to amend the Communications Act in order to preserve and protect liberty of expression in radio communication. It differs from the bill (H. R. 8509) introduced by Representative Ditter (R-Penna) (NAB Reports, Feb. 23, 1940, p. 4048) only in providing a ten
year maximum term for licenses instead of five—both provide three-year minimums—and in limiting the President's powers to take over broadcast stations to actual war in which the United States is engaged. The Ditter bill would give this power to the President also in event of armed insurrection equivalent to war. Section 4 of this bill and Section 4 of the Ditter bill seek to accomplish the same result as the Pepper bill.

The NAB is carefully studying all this proposed legislation. It is generally understood, however, that no bills of this kind will come to a vote at this session.

Here are the bills:

76th Congress
3d Session
S. 3512

IN THE SENATE OF THE UNITED STATES
March 4, 1940

Mr. PEPPER introduced the following bill; which was read twice and referred to the Committee on Interstate Commerce

A BILL
To provide for public hearings on applications for licenses under the Communications Act of 1934.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 309 of the Communications Act of 1934, as amended, is amended by adding at the end thereof the following new subsection:

"(c) No application for a station license or for the renewal or modification of a station license shall be approved prior to the expiration of four weeks after the first notice of such application is published. The Commission shall cause such notice to be published once a week for four consecutive weeks in a newspaper of general circulation in the town or city in which the station is or is to be located, or if it is not located or is not to be located in a town or city, in a newspaper of general circulation in the county in which it is or is to be located. The expense incident to such publication shall be paid for by the applicant at the time such application is filed. Such notice shall contain a statement that objections in writing to any such application may be filed with the Commission prior to the expiration of the four weeks' publication period and that a public hearing will be held if a request is made therefor prior to the expiration of such period. If any person so requests a hearing on any such application, the Commission shall hold a public hearing in such town, city, or county or in the District of Columbia, as the Commission may determine. Notice of such hearing, including the time and place thereof, shall be given to the applicant and to any such person requesting a hearing, and an opportunity to be heard at such hearing shall be afforded to all interested persons. Such hearing may be held by the Commission, by an individual commissioner, or by any officer or employee of the Commission designated by it for that purpose."

76th Congress
3d Session
S. 3515

IN THE SENATE OF THE UNITED STATES
March 5 (legislative day, March 4), 1940

Mr. BAILEY introduced the following bill; which was read twice and referred to the Committee on Interstate Commerce

A BILL
To amend the Communications Act of 1934 in order to preserve and protect liberty of expression in radio communication.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 301 of the Communications Act of 1934 is hereby amended by inserting after the words "It is the purpose of this Act, among other things, to maintain the control of the United States over all the channels of interstate and foreign radio transmission" the words "To preserve the right to free, and to persons subject to the provisions of this Act, freedom from governmental abridgment of, or interference with, liberty of expression, including freedom of speech and of the press, and other rights guaranteed under the Constitution of the United States and the amendments thereof."

Sec. 2. Section 305 (a) of the Communications Act of 1934 is hereby amended by adding thereto the following:

"The President may not, however either permanently or temporarily assign a frequency to any Government station or class of Government stations if the use of such assignment will make impossible the further operation of, or cause objectionable interference to, any radio station duly licensed or authorized to be constructed by the Commission under this Act unless (a) another frequency assignment of substantially equal or superior desirability is made immediately available for use by such licensed or authorized radio station or (b) the Commission, after notice and hearing pursuant to the procedure prescribed in section 312 (b) of this Act, shall have determined that public interest, convenience, or necessity will be promoted by such assignment and shall have entered an order modifying the permit or license accordingly; Provided, however, That this section shall not be construed to limit the powers conferred on the President by this Act during the continuance of a war in which the United States is engaged."

Sec. 3. Section 307 (d) of the Communications Act of 1934 is hereby amended to read as follows:

"No license granted for the operation of any class of station shall be for a longer term than ten years, and any license granted may be revoked for cause as hereinafter provided. No license granted for the operation of a station regularly engaged in broadcasting (other than a station of experimental, auxiliary, or temporary character) shall be for a term less than three years. Upon the expiration of any license, upon application therefor, a renewal of such license may be granted from time to time for a term not to exceed ten years, and, in the case of stations regularly engaged in broadcasting, not less than three years."

Sec. 4. Section 309 (a) of the Communications Act of 1934 is hereby amended to read as follows:

"If upon examination of any application for a construction permit, for a station license, or for the renewal or modification of a construction permit or a station license and the securing of full information with respect thereto the Commission shall determine that public interest, convenience, or necessity would be served by the granting thereof, it shall authorize the issuance of such construction permit or station license, or of such renewal or modification thereof, in accordance with said finding. In the event that the Commission does not reach such a decision with respect thereto, or in the event that the issuance of a construction permit or a station license or of any modification thereof would aggrieve or adversely affect the interests of the holder of any permit or license or any applicant therefor, the Commission shall notify the applicant and any other interested parties, shall fix and give notice of a time and place for hearing thereon, and shall afford such applicant and other interested parties an opportunity to be heard under such rules and regulations as it may prescribe."

Sec. 5. Section 312 (a) of the Communications Act of 1934 is hereby amended to read as follows:

"Sec. 312. (a) Any station license may be revoked for false statements either in the application or in the statement of fact which may be required by section 308 hereof, or because of conditions revealed by such statements of fact as may be required from time to time which would warrant the Commission to refuse to grant a license on an original application, or for failure to operate substantially as set forth in the license, or for violation of or failure to observe any of the restrictions and conditions of this Act or of any regulation of the Commission authorized by this Act, or by a treaty ratified by the United States: Provided, however, That no such order of revocation shall be entered unless the Commission shall first have given the licensee written notice stating clearly and definitely the charges against the licensee and fixing a time and place for a hearing thereon, and shall have given the licensee an opportunity for hearing. Such hearing shall be held not less than fifteen days after service of such notice on the licensee, and the Commission shall sustain the burden of proving the truth of the charges."

March 8, 1940
Sec. 6. Section 326 of the Communications Act of 1934 is hereby amended by adding thereto the following:

"Nothing in this section, however, shall be construed to modify or affect section 326 of this Act. No station regularly engaged in broadcasting shall be closed, nor shall its apparatus or equipment be removed, nor shall the use or control of any such station or of its apparatus or equipment by any department of the Government be authorized, in whole or in part, because of the character or contents of any program or other communication transmitted or proposed to be transmitted by such station, or in order to permit the Government or any department or agency thereof to engage in or control broadcasting or otherwise to communicate with the public, or for any cause other than imperative military need for such radio-communication facilities on the part of the armed forces of the United States and then only upon proclamation by the President that there actually exists war in which the United States is engaged."

The Bureau of Radio Advertising this week mailed an order blank, and sample copy of the most recent "Results from Radio" study, to all members who have not ordered their supply of these success stories. Releases to date cover department stores, laundries, miscellaneous, and furniture stores. Several new studies are now in production.

Stations are again earnestly requested to send in their orders, so that future printing requirements may be accurately gauged.

NAB CHOOSES SALES MANAGERS' COMMITTEE FOR 1940

Neville Miller has announced the selection of a new Sales Managers' Committee of the NAB for 1940, under the national chairmanship of William R. Cline, Commercial Manager of WLS, Chicago.

The committee consists of seventeen District Chairmen, one for each NAB District, appointed by the NAB Director in that District. Also chosen was a Steering Committee, consisting of both present and retiring National Chairmen, three District Chairmen and one other commercial manager, who will meet occasionally with Samuel J. Henry, Jr., of the Bureau of Radio Advertising and other NAB staff members, to discuss industry sales problems and the work of the recently organized bureau. Mr. Cline is expected to call a meeting, probably in Chicago, within the next few weeks.

The Steering Committee members are:

William R. Cline, WLS, Chicago, Ill., Chairman; Craig Lawrence, KSO, Des Moines, Iowa; Ellis Atteberry, KCKN, Kansas City, Kansas; Charles Caley, WMBD, Peoria, Illinois; Barney Lavin, WDAY, Fargo, North Dakota, and Owen Uridge, WJR, Detroit, Michigan.

The District Chairmen are as follows:

<table>

WAGE AND HOUR AMENDMENTS

Representative Kramer (D-Calif) has introduced a Wage and Hour Act amendment which would remove the restrictions on the working hours of some broadcasting employees. First, it would exempt from the overtime provisions all employees regularly paid $50 or more a week, or $200 or more a month (if paid on a monthly basis). Secondly, it would define "executive" and "professional." The "executive" definition would be about the same as that issued by the Administration, except that the salary qualification would be raised from $30 to $50 a week. It would also exempt assistant executives and administrators if they did no substantial amount of work of the same character as that performed by those under them. The "professional" definition would be slightly liberalized, but not sufficiently to exempt very many broadcasting employees.

Certain types of bonuses, for example, Christmas gifts and bonuses for being on time to work regularly, need not be included in regular wages for the purposes of computing overtime. Bonuses "computed on the basis of measured work," however, must be included.

The A. F. of L.'s campaign to stop Thurman Arnold from prosecuting labor unions under the Sherman Act is in full swing. At a federation mass meeting in Atlanta March 8, 1940
last week, Joseph Padway, chief A. F. of L. counsel, said Arnold was in for “the damnedest fight he ever had.” At a meeting here early this week, building union leaders accused Arnold of having fascist ideas, and urged Congress to trim his sails.

The American Association of Advertising Agencies says that advertising agencies “do not, in the vast majority of cases, deduct from the pay of talent when they handle talent.” The Four-A’s took exception to a statement on page 4033 of NAB Reports.

1 If the employee is hired on any other basis than a straight hourly rate, this column should include a brief explanation of how the “regular rate” is arrived at.

**Legislation**

**FEDERAL LEGISLATION**

S. 3512 (Pepper, D-Fla) COMMUNICATIONS ACT—To provide for public hearings on applications for licenses under the Communications Act of 1934. Referred to Committee on Interstate Commerce.

S. 3515 (Bailey, D-NC) TO AMEND THE COMMUNICATIONS ACT OF 1934 IN ORDER TO PRESERVE AND PROTECT LIBERTY OF EXPRESSION IN RADIO COMMUNICATION—Prohibits Federal Communications Commission’s taking adverse action for alleged program offenses; establishes for broadcast stations minimum license period of 3 years and maximum of 10 years; requires hearing where the Commission’s action would adversely affect the interest of any holder of a license or any applicant therefor; requires a hearing prior to any order of revocation of license or to a change in the license to another person. Referred to Rules Committee.

**STATE LEGISLATION**

**Kentucky:**

H. 289 (Waterfield) LIBEL—An act relating to libel and to actions for libel. Provides that punitive damages may be recovered only when the plaintiff proves malice in fact and that retraction or correction has been requested and refused. Referred to Judiciary Committee.

**Kentucky:**

H. 553 (Ennis) LOTTERIES—An act relating to legalizing lotteries to finance and pay old age pensions and needy blind. Referred to Rules Committee.

**New Jersey:**

A. 254 (Herbert) MUSIC COPYRIGHTS—MONOPOLY LICENSES—To license and regulate pools and monopolies selling rights to use copyrighted musical works. Referred to Corporations Committee.

**New York:**

A. 1821 (Guzino) LEVY AND EXECUTION—EXEMPTIONS—Exempts from levy and execution a wedding ring, engagement ring, man’s watch valued at not more than $35; radio valued at not more than $25; automobile valued at not more than $200 when used for business and motor truck used in connection with the earnings of a livelihood and valued at not more than $200. Referred to Codes Committee.

**New York:**

A. 1878 (Goldstein) LIBEL AND SLANDER—Includes in definition of libel, malicious publications which expose persons to hatred, contempt or ridicule by reason of race, color, religion or manner of worship or causes them to be shunned or avoided; defines slander; double penalty is imposed on a member of National guard, police department, state trooper or person in civil service for such offenses. Referred to Codes Committee.

**New York:**

A 1995 (Goldberg) (Same as S. 445) RADIO RECORDINGS—Prohibits the recording or offering for sale a recording of any radio broadcast without consent of performer or the person broadcasting same, violation being made larceny. Referred to Codes Committee.

**New York:**

S. 1603 (Mahoney) (Same as A. 1821) LEVY AND EXECUTION—EXEMPTIONS—Exempts from levy and execution a wedding ring, engagement ring, watch valued at more than $35, radio valued at not more than $25, automobile valued at not more than $200 when used for business and motor truck used in connection with the earnings of a livelihood and valued at not more than $200. Referred to Codes Committee.

**Rhode Island:**

H. 801 (DiSandro) LOTTERIES—Proposing an amendment to the constitution of the state. Would allow lotteries for relief purposes only. Referred to Committee on Special Legislation.

**E. M. MATHEWS**

An individual, E. M. Mathews, has called at several stations representing himself as an inspector of the Federal Communications Commission Field Division. He has offered to sell supplies and equipment. The FCC Field Division has had numerous complaints concerning the activities of this person, and advises that he is not connected with the FCC.

All members of the Field Division of the FCC can

March 8, 1940

4084
properly identify themselves. They have a certificate showing their name and address, with a photograph attached with the seal of the Secretary of the Commission embossed over the photograph. In addition they have a badge which they are required to wear while on active duty and it is suggested that if the individual claiming to be an inspector of the FCC is not known personally as such to the Station Manager that he require proper identification and be satisfied that the person representing himself is properly authorized before allowing an inspection of his books, records or equipment.

This notice is being placed in the Reports at the request of the Field Supervisor's Office.

**FCC MAILBAG**

The FCC has issued the following release on letters it has received recently:

From Pittsburgh comes a letter asking the Federal Communications Commission to bar all "Confucius Says" jokes from the air. However, the Commission does not have authority under the law to direct radio station licensees to broadcast or to refrain from broadcasting such programs.

A New York man complains that a local station declined to give him time on the air to broadcast a particular speech. Under the Communications Act, broadcast station licensees are not deemed to be common carriers and they may therefore, with the exception of certain broadcasts by legally qualified candidates for public office, refuse to accept material offered.

Another New Yorker inquires whether it will be permissible to broadcast a particular program. The Commission does not have authority to censor programs, and it is not the policy of the Commission to render such advance opinions. It is the duty of each station to determine whether the broadcasting of a certain program will be in the public interest and in accordance with the law.

A Shickshinny, Pa., woman charges that a certain station broadcast two musical compositions similar to those composed by herself. This is a matter of private concern between the woman and the station, and the Commission has no jurisdiction.

Several letters imply that the Commission has "ruled" various persons off the air. The Commission has entered no order denying any individual the right to broadcast, nor would it have authority under its statute to do so.

A McGuffy, Ohio, firm inquires if it can use telegraph facilities in connection with the proposed gift of a carload of onions to the holder of a lucky number. Though the Communications Act prohibits broadcast of "any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance," the Act does not contain a similar prohibition with respect to the use of wire facilities of common carriers engaged in communication service.

A Purdin, Mo., letter inquires as to the cost of construction permit and license for a broadcast station, also for radio operator. The Commission makes no charge for these authorities. Likewise, the Commission advises a London, Ohio, inquirer that no Federal license is required to cover the ownership of radio receivers in the United States.

A Jerome, Ariz., writer asks the Commission to recommend a radio receiver. The Commission does not maintain facilities for the testing of radio receiving equipment and is not in a position to advise with respect to the relative merits of receivers of different manufacture.

Regarding Government station assignments, an inquirer is advised that the Commission merely assigns blocks of frequencies, as well as certain call letters, to the Government departments, and that these facilities are in turn allocated various activities at the discretion of the department having jurisdiction.

A New York corporation is advised that although vessels of Philippine registry fly the United States flag, they are registered in the Philippines, and their radio equipment is licensed by the Philippine authorities. Various sections of the Communications Act exclude the Commission from jurisdiction in those islands.

Bethany College makes application for modified license for amateur station WSFME with a view to making it a memorial to Amos Dolbear in recognition of his radio pioneering and work at that college.

**FCC WORK ASSIGNMENTS**

FCC has announced that the work, business and functions of the Commission for the month of March have been assigned as follows:

- **Commissioner Thompson**: Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.
- **Commissioner Walker**: Designated to hear and determine, order, certify, report or otherwise act upon:
  1. except as otherwise ordered by the Commission, motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.231 and 1.236, inclusive, of the Commission's Rules of Practice and Procedure.
  2. the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

NEW—Caribbean Broadcasting Association, Inc., San Juan, P. R.—Construction permit to erect a new station on 1500 kc., 250 watts, unlimited time.

WKNY—Kingston Broadcasting Corporation, Kingston, N. Y.—License to cover construction permit (B1-P-2651) for equipment changes, increase in power and change in hours of operation.

NEW—George F. Meyer, Medford, Wis.—Construction permit for a new station on 1310 kc., 250 watts, daytime. Amended to...
request 1500 kc., 100 watts, unlimited time, changes in equipment.

MISCELLANEOUS

W2XVP—City of New York, Municipal Broadcasting System, New York, N. Y.—License to cover construction permit (B1-PHB-53) as modified for a new high frequency station.

WPIT—Westinghouse Electric & Manufacturing Co., Saxonburg, Pa.—Construction permit to move transmitter from 1.2 miles south of Saxonburg on Saxonburg-Culmerville Road, Pa., and studio from Grant Building, Pittsburgh, Pa., to Newport Road, Hull, Mass.; increase power from 40000 watts to 50000 watts, and make changes in equipment.

NEW—Boston Edison Company, Boston, Mass.—Construction permit for new Class IIIA television broadcast station, frequencies 72800-81000 kc., power 10 KW, A-3 and A-5 emission, located at 182 Tremont St., Boston, Mass.

NEW—Central States Broadcasting Company, Omaha, Nebr.—Construction permit for a new station on 1420 kc., 250 watts, unlimited time, changes in frequency broadcast station, on 43200 kc., 500 watts, special emission, site to be determined, Kalamazoo, Mich.

NEW—WKZO, Inc., Kalamazoo, Mich.—Construction permit for new high frequency broadcast station on 42600 kc., 1 KW power, special emission. Site to be located at or near Grand Rapids, Mich.

WHMA—Harry M. Ayers, Anniston, Ala.—License to cover construction permit (B3-P-2548) for changes in equipment and increase in power (signature and jurat).

NEW—Robert G. LeTourneau, Toccoa, Ga.—Construction permit for a new high frequency broadcast station to be operated on 43400 kc., 1 KW power, special emission. To be located at 1501 West Avenue, Toccoa, Ga., Portable-Mobile.

NEW—Central States Broadcasting Company, Omaha, Nebr.—Construction permit for a new high frequency broadcast station on 1500 kc., 100 watts, A-3 emission. Located: Omaha, Nebr., area, Portable-Mobile.

NEW—WKZO, Inc., Kalamazoo, Mich.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1 KW power, special emission. Site to be located at 182 Tremont St., Boston, Mass.

NEW—WKZO, Inc., Grand Rapids, Mich.—Construction permit for a new high frequency broadcast station to be operated on 43400 kc., 1 KW power, special emission. To be located at or near Grand Rapids, Mich.

NEW—Harry M. Ayers, Anniston, Ala.—License to cover construction permit (B3-P-2548) for changes in equipment and increase in power (signature and jurat).

NEW—Robert G. LeTourneau, Toccoa, Ga.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1 KW power, special emission. Site to be located at 1501 West Avenue, Toccoa, Ga., Portable-Mobile.

NEW—Central States Broadcasting Company, Omaha, Nebr.—Construction permit for a new station on 1420 kc., 250 watts, unlimited time, to be located at 130 North 7th Street, Newark, N. J., area Omaha, Nebr., Portable-Mobile.

NEW—Harry K. Hiroshima, San Francisco, Calif.—Construction permit for new high frequency broadcast station on 43000 kc., 100 watts, special emission for frequency modulation, to be located at 2500 Pine St., San Francisco, Calif. (Filed on wrong form).

NEW—The National Life and Accident Insurance Co., Inc., Nashville, Tenn.—Construction permit for a new high frequency broadcast station on 42800 kc., 1 KW, special emission, to be located at 179 North 7th Street, Newark, N. J., area Nashville, Tenn.

NEW—Everett L. Dillard, tr/as Commercial Radio Equipment Co., Kansas City, Mo.—Construction permit for new high frequency broadcast station, on 43200 kc., 500 watts, special emission, located at 7134-36 Main St., Kansas City, Missouri.

A1 Viola Products—Engaged in the interstate sale of a preparation for tightening dental plates, Garey Carr, trading as A1 Viola Products, 1225 Keniston Ave., Los Angeles, has been served with a complaint alleging misrepresentation.

In the sale of his "A1 Viola Dental Plate Tightener and Reliner", the respondent is alleged to represent that use of his product constitutes a competent and effective method of tightening dental plates; that its use is certain to result in a perfect fit of such plates; that the product may be applied effectively by any person, and that no expert assistance is required in its use, when such are not the facts. (4045)

Crown Distributing Company—Alleging violation of the Federal Trade Commission Act, in the sale of merchandise by methods involving lottery, a complaint has been issued against Marvin Alan Koolish, trading as Crown Distributing Company and Crown Sales Company, 5742 Holloway Drive, Los Angeles.

Selling radios, cameras, pen and pencil sets and other articles, the respondent is alleged to furnish to operators and the purchasing public various devices and plans of merchandising which involve the operation of games of chance when the merchandise is sold to the ultimate consumer. Among the devices allegedly so distributed are push cards bearing feminine names. The purchaser selecting the name corresponding to that under a master seal allegedly receives, wholly by lot or chance, an article of merchandise as a prize. (4041)

A. & G. Karl Company—Adolph Karl and Gertrude Karl, trading as A. & G. Karl Company, engaged in the manufacture, sale and distribution of a cosmetic preparation intended for application to the nails and designated "Never Break", formerly located at 179 North 7th Street, Newark, N. J., are charged in a complaint with misrepresentation.

In advertising circulars, folders and other printed matter, the complaint alleges, the respondents have represented, among other things, that their product is "The ONLY Nail-Root Food" and that "All Nails Need Calcium. This product is scientifically compounded of the finest oils and chemicals needed to correctly nourish, preserve and strengthen the nails."

Through use of these statements and others, the complaint alleges, the respondents have represented that the product supplies food and nourishment to the nails; that it will preserve and strengthen them, and that it is a tonic for the nails and will promote the health thereof.

The complaint declares that these representations are false and misleading; that the respondents' product is wholly incapable of supplying any food or nourishment to the nails, and that it possesses no therapeutic value and is without any substantial value except as a covering or polish for the nails. (4044)

Conrad Schickerling Research Laboratory—A complaint has been issued against Conrad Schickerling, an individual trading as Conrad Schickerling Research Laboratory, 589 Central Ave., Orange, N. J., alleging misrepresentation in the sale of incandescent lamps.

Among representations allegedly employed in the respondent's advertisements were that his "Mushroom Bulb Photo Flood Lamp", sometimes described as "Schickerling Full Sun Spectrum Photo Flood Krypton Lamp", is 8 amperes and has a lumen output of 38,000 lumens; that, as an exclusive feature not to be found in ordinary lamps, it contains a cooling coil between the wire and filament, and that it contains crypton gas, has a 10-hour peak performance, brings about color balance, and is protected by patent rights owned by the respondent, when such are not the facts. The complaint points out that the respondent's lamp does not contain crypton gas except for the small amount found in argon gas used in incandescent lamps of this kind or type.

The respondent allegedly represented, among other things, that his "Schickerling Photo Enlarging Lamp" contains a cooling coil between the wire and filament, and increases in power (signature and jurat).

The complaint declares that these representations are false and misleading; that the respondents' product is wholly incapable of supplying any food or nourishment to the nails, and that it possesses no therapeutic value and is without any substantial value except as a covering or polish for the nails. (4044)

4090

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

A1 Viola Products—Engaged in the interstate sale of a preparation for tightening dental plates, Garey Carr, trading as A1 Viola Products, 1225 Keniston Ave., Los Angeles, has been served with a complaint alleging misrepresentation. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

March 8, 1940
It is alleged that by use of the name “Conrad Schickerling Research Laboratory”, the respondent represents that it owns, controls and directs a laboratory for research work in connection with the production of his lamps, when such is not a fact. (4042)

CEASE AND DESIST ORDERS

The following cease and desist orders have been issued during the past week:

Rathjen Bros., Inc.—Prohibiting misleading use of the word “distilling” in the sale and distribution of liquor, an order to cease and desist has been issued against Rathjen Bros., Inc., 135 Sutter St., San Francisco. The respondent, a rectifier and wholesaler, sells part of its liquor under the trade name United States Distilling Company.

United States Distilling Company—See Rathjen Bros., Inc.

Universal Studios, Inc.—An order prohibiting the use of misleading sales representations in connection with a mail order photography business, has been issued against Universal Studios, Inc., 187 East Seventh St., St. Paul, and Harry I. and Sander R. Smith, who, since 1938, have conducted the business as a partnership under the name Universal Studios. They maintain studios in Minneapolis and in Flint and Holland, Mich.

Findings are that the respondents, through advance agents or crew managers, distributed coupons free to various local merchants, and that the coupons were redistributed free by the merchants to their own customers, who were granted an opportunity to acquire photographs of themselves represented variously as “portraits in oil colors”, “oil portraits”, “gold tone oil paintings”, and “oil colored portraits”, for only 59 or 69 cents upon presentation of a coupon. Such advertising coupons, the findings continue, were represented as having a $5 value. (3909)

Cambridge Handkerchief Works, Inc.—See Embassy Handkerchief Co., Inc.

Embassy Handkerchief Company, Inc.—Four New York companies engaged in the interstate sale and distribution of handkerchiefs have entered into stipulations to cease misrepresentations in the sale of their products. The respondents are Embassy Handkerchief Company, Inc., 9 East 35th St.; Cambridge Handkerchief Works, Inc., 325 Fifth Ave.; Henry Goldberg and Murray Van Prag, trading as Goldberg & Van Prag, 2 West 37th St., and Samuel Franco, sole trader as S. Franco Company, 19 West 30th St.

March 8, 1940

STIPULATIONS

During the week the Commission entered into the following stipulations:

Anchor Manufacturing Company—Henry and Miller Brons- herd, trading as The Anchor Manufacturing Company, New York, N. Y., manufacture glassware and metal novelties. They agree to desist from branding, or otherwise designating as “Sterling Silver” or “Sterling” any product or the metal content thereof which is not in fact throughout a homogeneous alloy containing not less than 92.5 per cent pure silver. The stipulation recites that the respondents marketed glassware filigreed or decorated with metal branded by them as “Guaranteed Sterling Silver” and “Guaranteed Unattainable Sterling,” when in fact the metal was not of the standard implied by use of the designation “Sterling,” but instead was made up of four separate layers of metals, the silver layer constituting approximately 67 per cent of the whole content. (2689)

Bastian Brothers Company, Rochester, N. Y., agrees to cease and desist from stamping, branding or otherwise designating articles manufactured from any alloy of gold of less than 10 karat fineness as “gold” or, by the use of any other “quality mark,” indicating or purporting to indicate that any such article is gold. The stipulation points out that “Commercial Standard CS67-38 for Marking Articles Made of Karat Gold”, as adopted by representative manufacturers, distributors and users of karat-gold articles, states, among other things, that “‘Gold’ includes any alloy of the element gold of not less than 10 karat fineness”; that “‘karat gold’ means an alloy of the element gold of not less than 10 karat fineness” and that “no gold article of less than 10 karat fineness shall have applied to it any quality mark.” A “quality mark,” it is explained means any mark “indicating or purporting to indicate that any article is composed of gold, or indicating or purporting to indicate the quality, fineness, quantity, weight, or kind of gold in an article”. (2694)

March 8, 1940
Embassy Handkerchief Company, Inc., and Goldberg & Van Praag agree to cease misleading use of the word “Manufacturer” in their trade representations to represent or imply that they manufacture, or own or control factories for the manufacture of, their products, when such are not the facts.

Cambridge Handkerchief Works, Inc., stipulates that it will cease representing that it maintains foreign offices at Shanghai or Swatow, China, or offices and stock rooms in Chicago, or a factory at Passaic, N. J.; Goldberg & Van Praag, that they own or maintain factories at Mayaguez, Puerto Rico, or at Swatow or Chefoo, China, and Samuel Franco, trading as S. Franco Company, that he operates offices or establishments at Swatow or Chefoo, China, when such are not the facts. (2686-2687-2690-2693)

E. O. Eschelby Tobacco Company—James and Isabel S. Eschelby, executors of the estate of Fanny L. Eschelby and as such executors trading under the name E. O. Eschelby Tobacco Company, Covington, Ky., in the sale of their product, “Colombian Smoking Mixture,” agree to cease using on packages or containers either the words “British Office” or the purported address, “2 Wemley Road, Northumberland,” so as to imply that their business has connected with it a British office or one which is located at the address specified, when such is not a fact. (2685)

Farmero Chemicals—C. A. Blair, Jr., trading as Farmero Chemicals, Joplin, Mo., agrees to cease representing that his preparation, “Farmero Poultry Tablets,” is an effective or competent treatment to prevent or fight fowl cholera, diarrhea, flu, coccidiosis, roup, typhoid or blackhead; or to stop poultry losses, build healthy flocks or strengthen growing chicks. The respondent also stipulates that he will cease advertising that the preparation is the very best poultry antiseptic tablet. (02514)

S. Franco Company—See Embassy Handkerchief Co., Inc.

General Electric Company, Schenectady, N. Y., has entered into a stipulation to discontinue certain misrepresentations in the sale of radios.

The stipulation relates that one of the respondent corporation’s dealers, Vim Electric Co., Inc., of Brooklyn, published advertisements of General Electric radios showing that a certain 8-tube set would be sold for $39.95 or at a saving of $30 from what was the regular or “manufacturer’s list” price of $69.95; that certain radios were “made to sell for 50 per cent more”, and that the buyer of a certain set with automatic tuning would save $25 by paying $44.95 when the regular price was $69.95.

In its stipulation, the General Electric Company admits that its practice is to suggest, approve and share the cost of some but not all of the advertising published by its dealers to promote the sale of its radios; that it suggested the list price set out in the Vim Electric Company’s advertisement of a $69.95 radio for $39.95, and that it paid a share of the cost of publication of the other two advertising items, and that the radios referred to as having a list price of $69.95 were never regularly sold for that price, but at the customary retail prices of $39.95 and $44.95 respectively.

The respondent corporation agrees to cease and desist from representing that prices for radios made by or for it and specified in catalogs or advertising literature, are the prices at which such radios were formerly sold, unless such is a fact.

The General Electric Company further agrees that it will not supply to its distributors, wholesalers, retail dealers, or others, any information, data, advertising copy or suggestions, calculated to induce such dealers to incorrectly state the former price or list or regular price of any of the radios sold by it, and that it will not approve or pay any portion of the cost of advertising prepared or published by or for its distributors or dealers, which, to its knowledge, incorrectly states or misrepresents the former, list or regular price of such radios. (02520)

Goldberg & Van Praag—See Embassy Handkerchief Co., Inc.

Jamaica Milling Company—Warren E. Lair, trading as Jamaica Milling Company, and Ralph D. Schultz and Arthur J. Reeder, who formerly were in business under the name of Min-Ro-Lac Sales Company, in the sale of “Min-Ro-Lac,” a prepared yeast culture feed offered as a supplement to grain for the growing and fattening of cattle, hogs, poultry and other domestic animals, agree to desist from the representation that use of this product will reduce or cut feeding costs one-half; is a remedy for infectious diseases of the digestive tract; will remove the blackhead or cholera hazard from turkey raising, and will cause the production of larger eggs or appreciably increase egg production. Other representations which the respondents agree to discontinue are that the addition of one tablespoonful of the product to each grain ration feed for milk cows will result in a marked difference in the milk flow or condition of the cows so fed or that the addition of such quantity of the product to the feed rations of horses or mules will act as a wonderful conditioner or will renew the life and vigor of such livestock; that the respondents’ product is a new discovery; that 96 pounds of properly balanced feed or any other quantity of such feed in excess of 32 1/3 pounds is obtainable from the admixture of water to 1/3 pound of the product and one bushel or 32 pounds of ground oats; that the respondents’ yeast concentrate product will produce a sweet culture instead of an ordinary or usual fermentation of feeds, and that the normal vitamins and mineral content of the average ordinary home grown rations is so supplemented by the addition of the respondents’ product as to assure more rapid daily gains by hogs fed therewith. (2691 and 2692)

Manhattan Soap Company, Inc., 441 Lexington Ave., New York, engaged in selling a soap designated “Sweetheart Toilet Soap,” agree to cease representing that research experts or laboratories have tested, in connection with their quality rating of soaps, all brands of soap; that beauty experts endorse the use of Sweetheart Toilet Soap, or that doctors prescribe its use; that use of the soap will cause the skin to become healthy or keep it healthy, or that its use will cause one to become or stay young; or, by use of such terms as “skin diet” or other similar words or phrases, that Sweetheart Toilet Soap contains anything that will nourish or feed the skin; and that any premium is gold plated, when in fact it is gold electroplated. (02516)

Irving L. Oldman Company, Chicago, Ill., in the sale of corrugated shipping boxes, stipulates that it will cease marking or stamping its products with its corporate or trade name together with the phrase, “Certificate of Box Maker,” or the word “Maker,” or any words of similar meaning so as to imply that it manufactures such containers or owns and operates a factory in which they are made, when such is not a fact. (2688)

Oskamp Woolen Mills Company, Cincinnati, Ohio, stipulates that it will cease representing its business as that of “Wholesale Jewelers” or “its merchandise as Wholesale Jewelry” and will desist from use in advertisements of the words “Wholesale Jeweler” or “Wholesale Jewelry” or other words of similar meaning so as to imply that the merchandise it sells is obtainable by the purchaser at wholesale prices. The respondent company also agrees to desist from representing that the value of whatever is obtained by the idea that merchandise bought from the corporation under an alleged 50 per cent discount is purchasable at the price at which such goods or comparable competitive articles are sold to the jobbing or retail trade in the usual course of business, when such is not a fact. The stipulation recites that the respondent has literally fixed alleged list prices, purportedly allowing a fixed discount of 50 per cent to the purchasing consumer so as to imply that he was able to obtain merchandise at regular wholesale prices, when in fact he paid the customary or even greater than the customary retail price. (2695)

Plymouth Hosiery Company—H. J. Esch, doing business under the trade names of Plymouth Hosiery Company and Plymouth Sales Company, Minneapolis, and engaged in the sale of hosiery, agrees to cease representing that Plymouth hosiery is new, improved hosiery, stronger in the foot, possesses a built-in quality, more stretch, or wears longer than any other hose offered for sale, and
that hosiery all parts of which are not knitted entirely from the thread manufactured from the cocoon of the silkworm, is silk or pure silk; that hosiery knitted on a bar less than 15 inches in size, is outsize of regular hosiery; that certain of the respondent's hosiery, made with a mock seam, has a fashion seam up the back; that Plymouth socks will outwear two pairs of ordinary socks; that no retail store can possibly compete with Plymouth prices, and to desist from misrepresentations concerning the profits or earning capacity of agents, salesmen or dealers.

H. J. Esch further agrees that in computing the period of time during which specified earnings or profits were made by salesmen, he will include all of the time actually used for demonstrations, solicitations and other services performed in connection with the sale, delivery or collection of the purchase price by agents, salesmen, distributors or dealers alleged to have made such earnings or profits. (02517)

Plymouth Sales Company—See Plymouth Hosiery Company.

F. A. Salamy Company, Inc., 330 Fifth Ave., New York, N. Y., agrees, in connection with the sale and distribution of its merchandise, to cease and desist from representing that it is a "manufacturer" of handkerchiefs or other merchandise, or in any other way importing or implying that it owns or controls the plant or factory in which the products sold by it are made, when such is not a fact. (2698)

C. Tischhauser, Inc., 66 Worth St., New York, N. Y., agrees to cease describing or referring to itself as a "manufacturer" of handkerchiefs or other merchandise, when it neither owns nor controls the plant or factory in which the goods sold by it are made, or in any manner representing that it has a manufacturing plant of its own for the production of these or other goods, when such is not a fact. (2697)

John C. Welwood Corporation, New York, N. Y., in the sale of ribbons, agrees to cease using the words "Moire Taffeta," "Satin Taffeta" or any other word connoting silk in a manner implying that the fabrics to which such designations refer are composed of silk, when such is not a fact. The stipulation provides that if any of the words "Moire," "Taffeta," or "Satin" is used properly as descriptive of the construction of a fabric containing fiber other than pure silk, then the word so used shall be accurately and non-deceptively qualified by conspicuous language clearly disclosing the constituent fibers in the order of their predominance by weight, beginning with the largest single constituent. The respondent corporation also stipulates that it will desist from selling products made of rayon without clear disclosure of such rayon content in all published representations, and that it will discontinue advertising, branding or selling any product composed in whole or in part of rayon unless full and non-deceptive disclosure of the fiber and other content is made by clearly naming each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent, and by giving the percentage of any fiber which is present in less than a substantial amount. (2684)
Campaign Use of Radio

Repeated requests for information as to the use of broadcast facilities for discussion of political issues and by candidates for public office prompts the FCC to explain:

Broadcast stations are licensed to serve the "public interest, convenience and necessity." This carries with it obligation on the part of stations to provide opportunity for well-rounded rather than one-sided discussion of public controversial issues and to render a program service in the general public interest. However, there is no requirement, express or implied, that the broadcast facilities must be afforded for the use of any particular individual or organization.

Section 3(h) of the Communications Act of 1934, as amended, expressly provides that a person engaged in radio broadcasting shall not be deemed a common carrier. In this respect broadcasting is unlike telephone, telegraph, or cable service. Accordingly, a broadcast station may refuse the use of its facilities to any particular person or group, even though offer is made to pay for the time.

However, Section 315 of the Act stipulates:

"If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station, and the Commission shall make rules and regulations to carry this provision into effect: Provided, That such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate."

This provision does not apply to persons other than the legally qualified candidates themselves but does require that, if a broadcast station permits the use of its facilities by a candidate, equal opportunities in the use of the station shall be afforded all other legally qualified candidates for the same office.

The Commission's Rules Governing Standard Broadcast Stations more specifically define broadcasts by candidates for public office in the following language:

"Section 3.101 General requirements.—No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates for that office to use such facilities, provided that such licensee shall have no power of censorship over the material broadcast by any such candidate.

"Section 3.102 Definitions.—The following definitions shall apply for the purpose of Section 3.101:

"(a) 'A legally qualified candidate' means any person who has met all the requirements prescribed by local, state, or federal authority, as a candidate for the office which he seeks, whether it be municipal, county, state, or national, to be determined according to the applicable local laws.

"(b) 'Other candidates for that office' means all other legally qualified candidates for the same public office.

"Section 3.103 Rates and practices.—The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means, directly or indirectly; no licensee shall make any discrimination in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to these rules, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

"Section 3.104 Records; inspection.—Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted."

The Commission's Rules and Regulations do not impose any requirements as to the rendering of free service by broadcast stations. This is a matter to be determined by the individual stations themselves.

With respect to program content, Section 326 of the Communications Act provides:

"Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication."

The express prohibitions contained in the Communications Act with respect to program content are: the prohibition against the broadcasting of lottery information contained in Section 316, and the provision of Section 326 that no person "shall utter any obscene, indecent, or profane language" on the air.
Four More Stations Join in BMI

Completed stock and license agreements to Broadcast Music, Inc., were received from four additional stations during the past week. This brings the total number of stations that have subscribed and paid for stock in BMI to 280. Another 99 stations have committed themselves to subscribe.

The latest four stations to subscribe are as follows:

- District 3
  - WIP—Philadelphia, Pennsylvania
- District 5
  - WSFA, Montgomery, Alabama
  - WJHP, Jacksonville, Florida
- District 14
  - KGVO, Missoula, Montana

With the addition of these stations, the total amount which has now been paid for in stock and pledged as license fees is $1,238,620.00.

Code Manual Goes to All Members

The NAB Code Manual, containing Code interpretations and an interchange of program and operating experiences gathered from various stations throughout the country, is being mailed to member stations.

The Code Committee, which has compiled the material, believes it will be a valuable source of useful information for management, the station program director, and the sales department.

The book itself is divided into six sections to correspond with the six sections of the NAB Code. The material is in loose-leaf form and bound in a stiff-back cover. As new information is developed, it will be promptly sent out for insertion in the Manual in the proper section.

In a foreword, Edgar Bill, WMBD, Peoria, Illinois, chairman of the Committee, declares:

"Few businesses are confronted with such a complex intermingling of social, public and economic interest as is the business of broadcasting. Of necessity, then, the NAB Code must be a continuous evolution of interpretation and policy to meet changing conditions of taste and circumstance. Moreover, in an industry which may be revolutionized overnight by new technical discoveries from the laboratory, a social-minded vigilance is needed at all times, and in all directions.

"The development of the broadcasters' Code has won the greatest degree of public confidence the industry has ever enjoyed. The public declarations of those organized groups in many diverse and oft-times competing fields bear witness to this. Here is an industry Code which has won support of both liberal and conservative, press and government, business and consumer, Catholic and Protestant. It is, in effect, an insurance policy for the American system of private and competitive broadcasting. It is an insurance policy whose beneficiary is, as well, the American public itself.

"In this Code Manual, the Committee has collected significant experiences and program policies, gathered from stations in all parts of the country confronted by many problems similar to those confronting each station. It believes that from this interchange of information, a broader concept of "public interest" will continuously emerge.

"The work of the Committee is advisory and interpretative. It has not been—or will it ever be—dictatorial or arbitrary. It has endeavored to be helpful to each station which has asked its advice. It has been mindful of the delicate responsibility entrusted to it by the entire industry. It has not sought to assume responsibility delegated solely to the broadcast licensee. It has sought to place at his disposal information and accepted industry policy as it developed. It has recognized at all times those geographic, economic and operating differences characteristic of American radio. Such authority as it may possess comes only as favorable public opinion is earned in support of industry policy."

The Code Compliance Committee will meet in Washington, April 11, at the call of Chairman Bill. Problems of political broadcasting during the coming election campaign will be among the more important subjects to be discussed.

Labor

ABT CERTIFIED AT WCPO; AFRA ELECTION ORDERED

The National Labor Relations Board today announced certification of Associated Broadcast Technicians Unit of the International Brotherhood of Electrical Workers (A. F. of L.) as the sole collective bargaining agency for the broadcast technicians of Scripps-Howard Radio, Inc., Station WCPO, Cincinnati, upon the basis of documentary evidence submitted by the union, and an admission of the company that its four technicians were members.

At the same time, the Board announced that a secret ballot election would be held within 30 days among all the company's announcers and radio artists, excepting the "hillbillies," to determine whether or not they desire to be represented for collective bargaining purposes by American Federation of Radio Artists (A. F. of L.).

The Board ruled that Andre Carlon, the station's announcer, and Glen A. Davis, chief engineer, should be included in the appropriate units in view of the time each devotes to non-supervisory functions. The Board excluded, however, a group of unpaid
musicians known as "hillbillies" and Albert Stephan, a writer in the program department.

Although the AFRA introduced evidence to show that it represented a substantial number of the company's employees, it nevertheless conceded that an election by secret ballot is necessary to resolve the question concerning representation.

No election was necessary among the technicians in view of the company's admission and the documentary proof presented by the ABTU, the Board said.

**WAGE AND HOUR RECORDS FOR TRANSMITTER ENGINEERS**

Col. Philip B. Fleming, Wage and Hour Administrator, rules that abbreviated wage and hour records for transmitter engineers must be kept at the transmitter when the transmitter is away from the station offices.

These abbreviated records need show only two items: total hours worked and total wages paid each week.

"Since you state no executive or clerical assistance is available at such transmitter station, it is suggested that each employee keep an individual wage and hour book showing the required abbreviated information," Col. Fleming says in his ruling, requested by the NAB Labor Relations Director.

The information required for the complete record of each employee covered by the Act was listed in the NAB Reports, February 23, page 4051.

**COST OF LIVING**

The NAB Labor Relations Director now has available Labor Department statistics showing how the cost of living compares among the 31 largest cities in the country. Such figures sometimes are useful in collective bargaining.

**FREE OFFERS**

Only one "free offer" and one "cost-per-inquiry" proposal were reported to the Bureau of Radio Advertising by member stations during the past week. Driver & Company, advertising agency of Omaha, Nebraska, has asked stations to run free publicity as a "test" on behalf of its client, Miller Cereal Mills. The implication is that if the test is successful, stations may get considerable advertising. National Vocational Institute, New York City, offers to pay stations fifty cents for every one dollar order they produce for the Institute. The Bureau has sent the usual letter to these concerns, implying that if they want real results from radio, they can't do better than buy time at regular rates, as so many thousands of successful advertisers are doing.

**ACCOUNTING COMMITTEE**

The NAB Accounting Committee is meeting in New York on Tuesday, March 19. At this time the final draft of the proposed program log will be submitted to the Committee for adoption. The Committee also will adopt standardized accounting forms, copies of which will be sent to members by April 1.

The proposed new accounting manual will enable station accountants to adjust their accounting system so that the information requested by the FCC Accounting Department in the financial forms 705-6 will readily be available and help in answering the questionnaire.

**FM HEARING**

The High Frequency hearing, originally scheduled for February 28, will open Monday, March 18, before the whole FCC. The notice of hearing was in NAB Reports, December 29 (page 3922).

Lynne C. Smeby, Director of Engineering, will attend the hearing as NAB observer and will report the proceedings in "Reports."

**CENSUS REQUESTS**

The following communication was received by Mr. Neville Miller from Roscoe Wright, Chief of Public Relations, Bureau of the Census, Department of Commerce under date of March 8:

**Dear Mr. Miller:**

I thought you might be interested in the fact that the Bureau of the Census is asking the cooperation of radio stations conducting programs in foreign languages, in relaying information about the 1940 Census to their listeners.

For your information I am enclosing a copy of a letter we have written to the radio stations which conduct foreign language programs.

It is our thought that you might wish to give notice to this in the Bulletin of the National Association of Broadcasters. If you see your way clear to doing so, we will be grateful if you will urge the hearty cooperation of all station managers and foreign language program directors.

Very sincerely yours,

(Signed) Roscoe Wright,
Chief of Public Relations.

March 15, 1940
The Census this year includes a question on radio ownership which will be of great value to the broadcasting industry.

Clifford Taylor

Clifford M. Taylor, commercial manager of station WBEN, Buffalo, N. Y., and a member of the NAB Sales Managers Division, died of a heart attack March 11 in Jacksonville, Fla. Mr. Taylor was on his way home with Edgar Twamley, WBEN manager, from a fishing trip when stricken.

CLUBWOMEN LEAVE COMMITTEE

The NAB has been informed by Mrs. Saidie Orr Dunbar, President of the General Federation of Women's Clubs, that the General Federation and Mrs. Harold V. Milligan, radio chairman of the Federation, have withdrawn from the Women's National Radio Committee.

NEW RECORDER

A new film recorder developed by RCA was demonstrated to the NAB staff last week. The recording is made on “Leader Stock” film, costing 1½ a foot and using 13 feet of film per hour. The machine will record for 24 hours without reloading. The machine demonstrated had a frequency range up to 3,000 cycles and therefore is not suitable for rebroadcast purposes. However, Mr. Payne said that the machine probably would be developed for such purposes later. The machine in its present form was developed for information recording purposes only. The film is fed around a mandrill and the mandrill with the film reels rotate. An engraving then occurs diagonally across the film. The machine features instantaneous play back and has one button for spacing back a short time and two other buttons which will advance or rewind the film at the rate of one hour per 15 seconds. There are numbers on the film so that records can be kept and the film can be wound back to any section desired. Mr. Payne said that the machine will be available in about six months, probably on rental basis of about $50 per month. The fee will include all maintenance and normal replacement but not the cost of the film.

RECORD COMPANIES

The NAB has been asked about the United States Record Corporation, 1780 Broadway, New York City, and the Aurora Record Company, 145 West 45th Street, New York City. Both companies manufacture and release for sale, phonograph records. Anyone interested in receiving further information concerning these two companies may obtain it from headquarters.

FCC APPROVES FM EXPERIMENTS

The Crosley Corporation has been granted a construction permit by the FCC for a new experimental high frequency broadcast station to employ frequency modulation, to be located in Cincinnati. The applicant proposes a broad investigation of the relative merits of frequency modulation and the present standard broadcast system, and of wide and narrow band frequency modulation in transmitting high fidelity programs, with attention to receivers suitable for dual operation.

The station proposes to operate on 43200 kilocycles, 1 kilowatt special emission for FM, unlimited operation. The antenna is planned atop the Carew Tower, Cincinnati. The permit is granted upon an experimental basis only, subject to change or cancellation by the Commission at any time, without notice or hearing, if need for such action arises.

This application was filed by the Crosley Corporation pursuant to announcement by the Commission on December 19, 1939, that, pending outcome of the informal engineering hearing on aural broadcasting to begin March 18, it would grant the following classes of applications:

(a) Applications for permission to carry out programs of fundamental research not authorized in the past and which show satisfactory promise of being able to contribute substantially toward the development of aural broadcasting service, and
(b) Applications filed by existing licensees to experiment with aural broadcasting on frequencies above 25000 kilocycles, provided the request to operate additional stations involved a program of experimentation directly related to the existing station.

At the same time the Crosley application was granted, the Commission authorized Westinghouse Electric & Manufacturing Co. high frequency broadcast station WIXK to move its transmitter from Boston to Hull, Mass., for operating on 42,600 kilocycles, 1,000 watts, special emission for FM, and approved request by General Electric Co. to move the transmitter of its high frequency broadcast station W2XOY from Albany, N. Y., to New Scotland, N. Y., to increase its power from 150 to 1,000 watts and install new equipment for operating on 43,200 kilocycles, special emission for FM.

ANTENNA POWER MEASUREMENT

The FCC has sent the following notice to licensees of all standard broadcast stations:

Under date of January 25, 1940, Mexico ratified the North American Regional Broadcasting Agreement. In order to place the allocation plan set forth in this Agreement in effect, the frequency assignments of a majority of standard broadcast stations must be changed. Resistance measurements made in accordance with the Standards of Good Engineering Practice for the presently assigned frequencies will not be sufficiently accurate for the frequencies assigned under the Agreement.

The time within which existing standard broadcast stations shall have made the necessary measurements and obtained authority to determine the operating power by direct measurement of the antenna power as required by Section 3.51(a) (2) is hereby extended from July 1, 1940, to December 1, 1940.

This in no way affects the requirements as now set forth in Section 3.51 with respect to new standard broadcast stations, nor does it affect the requirements of the Standards of Good Engineering Practice that the power shall be determined by the direct method when making field intensity measurements.

March 15, 1940
KWBD ORDER ISSUED

On the ground that he apparently made false and misleading statements relative to his financial condition, the Federal Communications Commission has ordered W. B. Dennis to show cause on or before March 29, why the construction permit issued to him July 12 last for a radio broadcast station at Plainview, Texas, should not be cancelled.

The call letters KWBD were assigned to the station, which proposed to operate on 1200 kilocycles, 100 watts power, daytime only.

NEW FORM APPROVED

The FCC has approved a revised form of application for admission to practice before it, prescribed pursuant to Section 1.34 of the Rules of Practice and Procedure, which includes a provision for statement by the applicant as to whether or not he has been suspended or disbarred from practice before any governmental agency.

RULES AMENDED

Section 3.51(a) (2) of the Rules Governing Standard Broadcast Stations of FCC was amended extending the time within which existing stations are required to determine the operating power by the direct method, from July 1 to December 1, 1940.

NEW JERSEY COPYRIGHT BILL

A bill introduced in the New Jersey Assembly March 4 (Assembly Bill No. 264), is intended to control licensing of performing rights in copyrighted works when two or more owners of separate copyrights pool their interests for the purpose of fixing prices, collecting fees or issuing blanket licenses. Such pools are prohibited unless their license fees are based on per piece usage and in proportion to the use made of their works. A complete list of their copyrighted works and prices is required to be filed annually with the Secretary of State, with additions or revisions made monthly. A 5 per cent tax on gross receipts from sale of performing rights is imposed.

STATE LEGISLATION

NEW YORK:
A. 2251 (Fite) SMALL LOANS—MISLEADING ADVERTISING—Empowers banking supt. to revoke licenses of any small loan lender, on conviction for violations relating to false, misleading or deceptive advertising, displaying, publishing or broadcasting of statements; no license so revoked may be reinstated or new license issued for three years following revocation. Referred to Rules Committee.

RHODE ISLAND:
H. 862 (Shein) (same as S. 139) OPTOMETRISTS AND OPTICIANS—LICENSING—In amendment of sections 1, 2, 3, 5, 9, 11, 12 and 13 of chapter 277 of the general laws, entitled “Licenseing and regulation of optometrists and opticians,” as amended. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION

DECISIONS

Federal Communications Commission has affirmed a finding of fact authorizing the Salt River Broadcasting Company, licensee of Station KOY, of Phoenix, Ariz., to change that station's frequency from 1390 to 550 kilocycles; the present 1000 watts power to remain. Opposition to the grant was presented to the Commission by KOAC, Corvallis, Oregon, operating with 1000 watts on 550 kilocycles.

Presque Isle Broadcasting Company has been granted a construction permit for a new station at Erie, Penn., to operate unlimited time, 1500 kilocycles, daytime power 250 watts, nighttime 100 watts. Commission granted the permit this week following adoption of its proposed findings of fact.

PROPOSED FINDING

The Commission has tentatively denied the application of C. T. Sherer Company, Inc., for a construction permit to erect a new station at Worcester, Mass., to use 100 watts night, 250 day, unlimited time, on 1200 kilocycles.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings are scheduled before the Commission in broadcast cases during the week beginning Monday, March 18. They are subject to change.

Monday, March 18
Informal Hearing Before the Commission En Banc
In the Matter of Aural Broadcasting on Frequencies Above 25,000 kc. (An inquiry into the possibilities of Frequency and Amplitude Modulation).

4099
March 15, 1940
Tuesday, March 19

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings and oral argument. They are subject to change.

March 28

Oral Argument Before the Commission

WSAL—Frank M. Stearns, Salisbury, Md.—In re: Revocation of Station License of WSAL.

April 1

NEW—E. E. Krebsbach, Miles City, Mont.—C. P., 1310 kc., 100 watts, 250 watts LS, unlimited time.

NEW—Star Printing Co., Miles City, Mont.—C. P., 1310 kc., 250 watts, unlimited time.

NEW—Lookout Mountain Co. of Georgia, Lookout Mountain, Ga.—C. P., 1370 kc., 250 watts, unlimited time.

April 16

NEW—Miami Broadcasting Co., Miami, Fla.—C. P., 1420 kc., 250 watts, unlimited time.

April 19

WGRG—Northside Broadcasting Corp., New Albany, Ind.—Modification of license to move main studio to Louisville, Ky.—1510 kc., 250 watts, unlimited time.

April 22

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

KARK—Arkansas Radio & Equipment Co., Little Rock, Ark.—Granted construction permit to install new equipment, increase power from 1 KW to 5 KW day and night, employing DA at night, on 890 kc.

WRUW—World Wide Broadcasting Corp., Situate (Boston), Mass.—Granted modification of license of international station WRUW to add frequencies 11790 and 13350 kc. to the presently licensed frequencies.

WMOB—S. B. Quigley, Mobile, Ala.—Granted modification of license to add power of 100 watts for nighttime operation, and increase hours from daytime only to unlimited time.

KYCA—Southwest Broadcasting Co., Prescott, Ariz.—Granted modification of construction permit for change in studio and transmitter sites, new equipment and antenna changes, increase in night power from 100 to 250 watts, extending commencement date to 30 days after date and grant and completion date to 180 days thereafter.

W2XD—General Electric Co., Schenectady, N. Y.—Granted construction permit to retransmit television broadcast station W2XD, which expired September 16, 1939, on the assignment 156000-162000 kc., 40 watts, A3 emission, hours of operation in accordance with Sec. 4.4(a).

WEAF—National Broadcasting Co., Inc., New York City.—Granted modification of construction permit to install directional antenna system for day and nighttime operation on 660 kc.

Puerto Rico Advertising Co., Inc., San Juan, P. R.—Granted construction permit for new station to operate on 1500 kc., 250 watts, unlimited time; exact transmitter and studio site and type of antenna to be determined with Commission's approval.

KMA—May Seed & Nursery Co., Shenandoah, Ia.—Granted voluntary assignment of license from May Seed & Nursery Company to May Broadcasting Company.

WHO—Central Broadcasting Co., Des Moines, Ia.—Granted extension of special experimental authority to operate standard broadcast station WHO as a facsimile broadcast station from 12 midnight to 6 a. m., CST, using 50 KW, for the period ending August 1, 1940.

The Crosley Corp., Cincinnati, Ohio.—Granted construction permit for new high frequency broadcast station to operate on 43200 kc., 1 KW, special emission for frequency modulation; hours of operation in accordance with Sec. 4.4 of the Comm. rules.

W2XOY—General Electric Co., New Scotland, N. Y.—Granted construction permit to increase power, and install new equipment for high frequency broadcast station and move station from Albany to New Scotland, N. Y.

DESIGNATED FOR HEARING

Abraham Blinneweg, Jr. (World Peace Foundation), Oakland, Calif.—Application for construction permit for new developmental broadcast station to operate on 1614, 2398, 6425, 7445, 9135, 17310 and 13962.5 kc., 250 watts, unlimited time. Applicant proposes to conduct research on various types of directional antenna systems.

WJHL—WJHL, Inc., Johnson City, Tenn.—Application for construction permit to make changes in equipment; install directional antenna for night use; increase power from 250 watts to 1 KW; change frequency from 1200 kc. to 880 kc.; and move transmitter 500 feet east of present site.

WFDP—Flint Broadcasting Co., Flint, Mich.—Application for construction permit to install new transmitter and directional antenna for night use; increase power from 100 watts to 1 KW; change frequency from 1310 kc. to 880 kc.; and move transmitter locally; application to be heard jointly with that of Thumb Broadcasting Co. for a new station to operate on 880 kc., 1 KW, daytime only, and WJHL listed above, all applying for 880 kc.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the period April 1 to August 1, 1940:

KARK, Little Rock, Ark.; KFKA, Greeley, Colo.; KFDY, Brookings, S. Dak.; KFEL, Denver, KFPY, Spokane, Wash.; KFRC and auxiliary, San Francisco; KFRU, Columbus, Mo.; KFSD, San Diego; KFYR, Bismarck, N. Dak.; KGFX, Pierre, S. Dak.; KGHL, Billings, Mont.; KGKO, Fort Worth, Tex.; KGL, Oakland, Cal.; KILZ, Denver; KJM, Fresno, Cal.; KOAC, Corvallis, Ore.; KQPH, Denver; KPRC, Houston, Tex.; KSD, St. Louis; KSEI, Pocatello, Ida.; KTKC, Visalia, Cal.; KRTA, San Antonio; KVI, Tacoma, Wash.; KWTO, Springfield, Mo.; WAAF, Chicago; WBEN and auxiliary, Buffalo; WCHS, Charleston, W. Va.; WCLE, Cleveland, Ohio; WDFD, Kansas City, Mo.; WDBO and auxiliary, Orlando, Fla.; WDVE, Devore, Va.; WEAN, Providence, R. I.; WEEI, Boston; WFL and auxiliary, Philadelphia; WGBI and auxiliary, Scranton, Pa.; WIBW, Topeka, Kans.; WILL, Urbana, Ill.; WIND, Gary, Ind.; WIP and auxiliary, Philadelphia; WIS, Davenport, S. C.; WKBX, Youngstown, Ohio; WKN, Cincinnati, Ohio; WKY and auxiliary, Oklahoma City; WLBZ, Bangor, Me.; KMTR, Los Angeles; KFAR, Phoenix, Ariz.

Renewal of licenses were also granted for the following high frequency stations:

W2ZD, Dallas, Tex.; WS6DA, Los Angeles; W9XHW, Minneapolis; W9XA, Kansas City, Mo.; W2XWF, New York; W2XQR, Long Island City; W3XO, Georgetown, D. C.; W4XA, Nashville; W9XPD, St. Louis, Mo.; W9XH, South Bend, Ind.; WSXV, Rochester, N. Y.; W1XPW, Meriden, Conn.; W1XQO, Fairhaven, Mass.; W9XJR, Kansas City, Mo.; W8XIR, Philadelphia; W2XR—Radio Pictures Co., Inc., Long Island City, N. Y.—Granted renewal of facsimile broadcast station license for the period ending March 1, 1941.

March 15, 1940
W9XAL—First National Television, Inc., Kansas City, Mo.—Granted renewal of television broadcast station license for the period ending February 1, 1941.

W9XUJ—University of Iowa, Iowa City, Ia.—Granted renewal of television broadcast station license for the period ending February 1, 1941.

MISCELLANEOUS

WIN—Hearst Radio, Inc., New York, N. Y.—Granted special temporary authority to operate from 8:30 p.m. to 1:00 a.m., CST, on March 12, 1940, in order to broadcast a performance of the Metropolitan Opera to be given for the benefit of the New York City Milk Fund.

WSU—State University of Iowa, Iowa City, Ia.—Granted special temporary authority to reduce hours of operation from unlimited time to a minimum of nine hours daily for the period beginning March 21, 1940 and ending not later than March 25, 1940, in order to observe the Easter vacation period at the University.

W2XWF—William G. H. Finch, New York, N. Y.—Granted extension of special temporary authority to change from A-3 emission to special emission frequency modulation 75 kc. swing to make comparative tests on amplitude modulation for the period ending no later than April 3, 1940, in order to complete installation of FM unit.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Granted special temporary authority to operate with power of 250 watts from 8:30 p.m. to 10:00 p.m., CST, on March 7, 1940, from 7:30 p.m. to 10:00 p.m., CST, on March 8, 1940, and from 8:00 p.m. to 10:00 p.m., CST, on March 9, 1940, during broadcast of basketball games only.

WOSY—Commodore Broadcasting Inc., Decatur, Ill.—Granted special temporary authority to operate with power of 250 watts from 7:00 p.m. to 10:00 p.m., CST, to the conclusion of basketball games on March 14, 15, and 16, 1940, in order to broadcast basketball games only.

WBDC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Granted petition to intervene in the hearing on the application of Harold Thomas for a new station in Bridgeport, Conn., to operate on 1420 kc., 250 watts, unlimited time.

WCCO—Columbia Broadcasting System Inc., Minneapolis, Minn.—Granted petition to intervene in the hearing on the application of WNFC for modification of license to change hours of operation from daytime to specified hours (6 a.m. to 11 p.m., EST), on 810 kc.

KFJF—Marshall Electric Co., Marshalltown, Iowa.—Granted petition to intervene in the hearing on the application of J. D. Flavey, for a new station in Ottumwa, Iowa, to operate on 1210 kc., 100 watts, unlimited time.

Lookout Mountain Co. of Ga., Chattanooga, Tenn.—Granted petition for continuance of hearing on application for new station to operate on 1370 kc., 250 watts, unlimited time, from March 11 to April 1.

WDAS—WDAZ Broadcasting Station, Inc., Philadelphia, Pa.—Granted authority to determine operating power of auxiliary transmitter by direct measurement of antenna input in compliance with Section 3.54.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 9:00 a.m. to 11:00 a.m. and from 2:00 p.m. to 6:00 p.m., AST, on March 16, 1940, in order to broadcast athletic meet of the College of Agriculture and Mechanical Arts and the University of Puerto Rico only.

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted special temporary authority to operate from local sunset (March 6:45 p.m., EST) to 10:30 p.m. EST, on March 29, 1940, in order to broadcast an annual concert of the Pontiac High School Band and Orchestra.

WRUW—World Wide Broadcasting Corp., New York, N. Y.—Granted special temporary authority to operate on frequency 11730 kc. for a period not to exceed 10 days, in order to eliminate the interference supposedly caused by change in beat frequency resulting from simultaneous operation of WRUW on 11730 kc. and WRUL on 6040 kc.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to operate from 9:00 p.m. to 9:15 p.m., CST, on March 20, 1940, (provided WNAD remains silent) in order to broadcast a concert from Bethany College, Lindborg, Kans.

WNAR—University of Oklahoma, Norman, Okla.—Granted special temporary authority to remain silent from 9:00 p.m. to 9:15 p.m., CST, on March 20, 1940, in order to permit KGGF to broadcast a concert from Bethany College, Lindborg, Kans.

WLAR—American Broadcasting Corp. of Ky., Lexington, Ky.—Granted special temporary authority to operate with power of 250 watts, from 7:30 p.m. to 10:15 p.m., CST, on March 15, 16, and 17, 1940, during broadcasts of basketball games only.

KFGQ—Boone Biblical College, Boone, Iowa.—Denied special temporary authority to operate from 4:00 p.m. to 5:00 p.m., 6:00 p.m. to 6:30 p.m. and 7:30 p.m. to 8:30 p.m., CST, for the period beginning March 31, 1940, and ending not later than April 7, 1940, in order to broadcast programs in connection with Fiftieth Anniversary (provided KFVQ remains silent).

WLOW—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted modification of construction permit for new station, for approval of transmitter site at Myrtle Ave. and Emerald St., St. Paul, Minn.

KWAT—Midland National Life Insurance Co., Watertown, S. D.—Granted modification of construction permit for new station, for authority to install new transmitting equipment and make changes in antenna.

KWAT—Midland National Life Insurance Co., Watertown, S. D.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

KWAT—Midland National Life Insurance Co., Watertown, S. D.—Granted license to cover construction permit and modification thereof, for new station; frequency 1210 kc., power 250 watts, unlimited time.

WOLF—Civic Broadcasting Corp., Syracuse, N. Y.—Granted modification of construction permit for new broadcast station, for approval of antenna, transmitter site, and change type of transmitter.

WIXOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test high frequency broadcast equipment of Station WIXOJ authorized by modification of construction permit, on 43000 kc., power in the range 2000 watts to 50000 watts, from March 15, 1940, to not later than April 13, 1940, in order to make adjustments on equipment installed and for tuning and adjustments of the antenna elements which are now assembled for erection atop 400 foot mast.

WLLW—Hildreth & Rogers, Lawrence, Mass.—Denied petition for rehearing in re application of WPTF, Raleigh, N. C., for modification of license to operate on 680 kc. with 5 kW power, unlimited time, granted by the Commission January 9, 1940.

KFI—Carl C. Anthony, Los Angeles, Calif.—Denied petition for rehearing in the matter of the applications of McClatchy Broadcasting Co. (KERN), Bakersfield, Calif., and construction permit to install new equipment, change operating assignment from 1370 kc. to 1380 kc., and power from 100 watts to 1 KW, unlimited time, and The Bee, Inc. (KOH), Reno, Nevada, for construction permit to move locally and change operating assignment from 1380 kc. with 500 watts power, unlimited time, to 630 kc., 1 KW, unlimited time, using a directional antenna at night, which applications were granted by the Commission on December 20, 1939.

William Amesbury, Minneapolis, Minn.—Dismissed petition for rehearing, protest and request to vacate the Commission's action of January 17 in granting the application of Independent Merchants Broadcasting Co., Inc., for a new station in Minneapolis, Minn., to operate on 1360 kc., with 1 KW power, unlimited time.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Denied petition insofar as it requests immediate grant of application for construction permit to increase power from 250 watts to 1 KW, on 780 kc., and extended for ten days from date of order, the time for filing proposed findings herein.

KWDB—W. B. Dennis, Plainview, Tex.—Ordered applicant to show cause, by written answer duly verified, filed at the offices of the Commission on or before March 29, 1940, why the order of the Commission of July 12, 1939, granting the application for a new station to operate on 1300 kc.,...
March 15, 1940

100 watts power, daytime only, should not be rescinded and construction permit cancelled, because of alleged misleading statements made by applicant in re his financial status.

WEVD—Memorial Fund, Inc., on Island, N. Y., in WBBR—(the Watchtower Bible & Tract Society, Inc., Brooklyn, N. Y.—Denied petitions for reconsideration and rehearing filed by WEVD and WBBR in re application of Greenville News-Piedmont Co. (WFBC), for construction permit to install new directional antenna for a frequency of 610 kc. and to change frequency from 1100 kc. to 1200 kc., and to change equipment and increase power from 1 kw to 5 kw; and, the Commission, on its own motion modified its order of December 5, 1939, granting the application of WFBC for increase in power, so as to make the grant conditioned upon applicant obtaining from the Commission specific approval of antenna and site thereof before any construction or installation is commenced.

WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Denied petition for rehearing in re application for construction permit to install new transmitter, make changes in antenna system, change transmitter site, and change frequency from 1310 kc. to 1210 kc., power from 100 watts night, 250 watts day, to 1 kw, unlimited, which was denied by the Commission November 9, 1939.

KTAR—KTAR Broadcasting Co., Phoenix, Ariz.; and KOY, Salt River Valley Broadcasting Co., Phoenix, Ariz.—Denied petitions for rehearing filed by KTAR and KOY in the matter of the application of M. C. Reese for a new station in Phoenix, Ariz., to operate on 1300 kc., 100 watts night, 250 watts ls, unlimited time, granted by the Commission January 26, 1940.

WIEJ—Fallstown Broadcast Co., Hagerstown, Md.—Granted license to cover construction permit to make changes in equipment and increase power from 100 watts to 250 watts; frequency 1210 kc., unlimited time.

KGVO—Moosby’s, Inc., Missoula, Mont.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WSYR-WSVU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WMCA—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WNEL—Juan Piza, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast on a sustaining basis the programs to be received from international broadcast stations WMBI and WRCO over station WNEL, for the period beginning March 12, 1940, to not later than April 10, 1940.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to operate from 8:30 p. m. to 10:30 p. m., CST, March 11, 1940, in order to broadcast a special meeting of interest concerning the 100th anniversary of the department to be held, using 1 kw power.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 10 p. m., AST, March 17, 1940, to 1 a. m., AST, March 18, 1940, in order to broadcast a mass meeting.

KLPX—John B. Cooley, Minot, N. Dak.—Granted special temporary authority to operate with power of 1000 watts at night (local sunset March 6:45 p. m., CST) on March 14, 15, and 16, 1940, in order to serve the large area interested in Annual Class B Basketball Tournament to be held in Minot, in order to broadcast basketball games only.

WEHN—The Evening News Ass’n, Detroit, Mich.—Granted special temporary authority to use relay broadcast stations WEHN and WENM for coordination between measuring car and high frequency station W8XWJ for the period March 11, 1940, to not later than March 15, 1940, in connection with additional W8XWJ field work.

W2XWG—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate high frequency experimental broadcast station W2XWG to utilize amplitude modulation on frequency 12500 kc., for the period March 17, 1940, to not later than April 15, 1940, in order to accumulate data for direct comparison of the effectiveness of frequency modulation versus amplitude modulation for presentation at the High Frequency Hearing.

WSAI—Frank M. Stearns, Salisbury, Md.—Granted oral argument on the proposed findings in re revocation of station license, to be held March 28, 1940.

WWRN—Long Island Broadcasting Corp., Woodside, Long Island, N. Y.—Denied special temporary authority to operate with power of 250 watts nighttime for a period not to exceed 30 days.

WQDM—A. J. Regan and F. Arthur Bostwick, d/b as Regan and Bostwick, St. Albans, Vt.—Granted special temporary authority to operate from 7 p. m. to 10 p. m., EST, on March 14, 15, 16, 1940, in order to broadcast New England Basketball Tournament games only.

WCLS—WCLS, Inc., Joliet, Ill.—Granted special temporary authority to operate from 8:30 p. m. to 9:45 p. m., CST, on March 14, 1940, in order to broadcast a speech by Richard Lyons, candidate for Governor of State of Illinois.

APPLICATIONS FILED AT FCC

500 Kilocycles

WFIL—WFIL, Broadcasting Co., Philadelphia, Pa.—Authority to determine operating power by direct measurement of antenna power for auxiliary transmitter.

590 Kilocycles

WKZO—WKZO, Inc., Kalamazoo, Mich.—License to cover construction permit (2-P-B-3134) as modified to change hours of operation, install directional antenna for night use.

610 Kilocycles

780 Kilocycles

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Authority to determine operating power by direct measurement of antenna power.

890 Kilocycles

WGST—Georgia School of Technology, Atlanta, Ga.—Construction permit to increase power from 1 kw night, 5 kw day, to 5 kw day and night, and install directional antenna for night use.

920 Kilocycles

KPRC—Houston Printing Corp., Houston, Tex.—Construction permit to increase power from 1 kw night, 5 kw day, to 5 kw day and night, and install directional antenna for night use.

950 Kilocycles

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Modification of construction permit (B1-P-1332) as modified for a new station, requesting authority to change type of transmitter; extend commencement date to 30 days after grant and completion date 120 days thereafter. Amended re corporate structure.

1010 Kilocycles

WNAD—University of Oklahoma, Norman, Okla.—Authority to determine operating power by direct measurement of antenna power.

1100 Kilocycles

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Construction permit to change hours of operation from daytime to unlimited, using 1 kw power day and night, and install directional antenna for night use.

1180 Kilocycles

WMAZ—Southeastern Broadcasting Company, Inc., Macon, Ga.—Construction permit to change frequency from 1180 kc. to 1250 kc.; change hours of operation from limited to unlimited time; install directional antenna for night use.

NEW—Albuquerque Broadcasting Co., Albuquerque, N. Mex. (KOB)—Construction permit to make changes in equipment and increase power from 10 to 50 kw.

1200 Kilocycles

NEW—The Huntsville Times Co., Inc., Huntsville, Ala.—Construction permit for a new station on 1200 kc., 100 watts, unlimited time, facilities of WBHP.
WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Construction permit for changes in equipment.

1210 Kilocycles

KPFA—The Peoples Forum of the Air, Helena, Mont.—Authority to determine operating power by direct measurement of antenna power.

WFAS—Westchester Broadcasting Corporation, White Plains, N. Y.—Construction permit to install new transmitter and increase power from 100 to 250 watts.

NEW—The Maryland Broadcasting Co., Baltimore, Md.—Construction permit for new broadcast station on 1210 kc., 250 watts, unlimited time. Class IV.

KYUM—Yuma Broadcasting Co., Yuma, Ariz.—Authority to determine operating power by direct measurement of antenna power.

NEW—Stephen R. Rintoul, Stamford, Conn.—Construction permit for new broadcast station on 1210 kc., 1 KW, unlimited time, Class IV.

KWAT—Midland National Life Insurance Company, Watertown, S. Dak.—Authority to determine operating power by direct measurement of antenna power.

1230 Kilocycles

1290 Kilocycles

KTRH—KTRH Broadcasting Co., Houston, Tex.—Construction permit to install directional antenna for night use; increase power from 1 KW, 5 KW day, to 5 KW day and night. Class III-A.

1340 Kilocycles

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—License to cover construction permit (B3-P-2709) for new transmitter.

1370 Kilocycles

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Construction permit to change frequency from 1370 to 1040 kc. (1080 if North American Regional Agreement becomes effective prior to action), increase power from 250 watts to 1 KW, 5 KW day, install new transmitter and antenna, and move studio from Indiana Theatre Bldg., 407 Vincennes St., New Albany, Ind., to 5th and Jefferson Sts., Louisville, Ky., and transmitter from McCullough Pike, near Silver Creek, New Albany, Ind., to site to be determined, New Albany, Ind. (Requests Class II Station).

WARM—Union Broadcasting Co., Scranton, Penna.—Modification of construction permit (B2-P-2366) for a new station requesting changes in antenna, increase in power from 100 watts, 250 watts day to 250 watts day and night. Move transmitter from Washington Ave. and Center St., Scranton, Penna. to 701 North Blakely St., Dunmore, Penna. Extend commencement date 60 days after grant, and completion date 180 days thereafter.

WPLA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Modification of construction permit (B-P-1941) as modified, for change in frequency, increase in power, change in hours of operation, change in type of station, and increase in power, requesting extension of completion date from 3-26-40 to 4-26-40.

NEW—Stephen R. Rintoul, Stamford, Conn.—Construction permit for a new broadcast station to be operated on 1370 kc., 250 watts, unlimited time.

WLLH—Merrimac Broadcasting Co., Inc., Lawrence, Mass.—License to cover special experimental authority B1-SA-192, as extended for a synchronous station.

1410 Kilocycles

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Modification of license to increase power from 500 watts, 1 KW-day to 1 KW day and night.

WROK—Rockford Broadcasters, Inc., Rockford, III.—Modification of license to increase power from 500 watts; 1 KW-day to 1 KW day and night.

WBCM—Bay Broadcasting Co., Inc., Bay City, Mich.—Modification of license to increase power from 500 watts; 1 KW-day to 1 KW day and night.

1420 Kilocycles

WHMA—Harry M. Ayers, Anniston, Ala.—License to cover construction permit (B3-P-2548) for changes in equipment and increase in power.

NEW—Scott Howe Bowen, Rome, N. Y.—Construction permit for new broadcast station on 1150 kc., 250 watts, unlimited time, Class IV.

1460 Kilocycles

KSTP—National Battery Broadcasting Company, St. Paul, Minn.—Modification of construction permit (B4-P-1828) as modified, for move of transmitter, installation of new equipment, directional antenna, and increase in power, requesting extension of completion date from 3-8-40 to 5-8-40.

KSTP—National Battery Broadcasting Company, St. Paul, Minn.—License to cover construction permit (B4-P-2744) for move of auxiliary transmitter, and to use directional antenna as authorized under B4-MP-2759 for auxiliary transmitter.

WJSV—Columbia Broadcasting System, Inc., Washington, D. C.—License to cover construction permit (B1-P-1827) as modified for installation of new transmitter, move transmitter, increase power and install directional antenna.

1490 Kilocycles

NEW—Luther E. Gibson, Vallejo, Cal.—Construction permit for a new station to be operated on 1190 kc., 250 watts unlimited time. Contingent on North American Regional Agreement. Request Class IV station.

1500 Kilocycles

WKAT—A. Frank Katzentine, Miami Beach, Fla.—Construction permit to change frequency from 1500 to 1330 kc. (1360 kc., under North American Regional Agreement), increase power from 250 watts to 1 KW, install new transmitter and antenna, move transmitter from 1759 N. Bay Road, Miami Beach, Fla., to site to be determined, Miami Beach, Florida. (Request III-B Station).

NEW—The Peninsula Broadcasting Co., Salisbury, Md.—Construction permit for new broadcast station on 1200 kc., 250 watts, unlimited time, facilities of WSAL. **COMPLAINTS**

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

March 15, 1940 4104

**FEDERAL TRADE COMMISSION ACTION**

**COMPLAINTS**

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**D. M. Alachuzos Company**—Charging misrepresentation in the sale and distribution of sponge products, a complaint has been issued against D. M. Alachuzos Company, 336 South 4th St., Philadelphia.

It is alleged that the respondent, a dealer in sponge and chamois skin products, represented its business as that of a producer and packer of sponges, maintaining and operating its own packing houses for the processing and packing of its sponge products at Tarpon Springs, Fla., Nassau and Calymnos in the Aegean Sea and represented that it maintained its own force of trained workmen expert in selecting and grading sponges, and that it held membership in "sponge exchange markets."

The complaint charges that the respondent's representations are false and misleading in that it has not maintained the facilities, equipment and membership described.

**M. N. Arnold Shoe Company**—See Stetson Shoe Company, Inc.

**Bray Chemical Company**—A complaint has been issued against Bray Chemical Company, 2010 South Marshall Blvd., Chicago, a packer and distributor of chemical cleansing compounds, alleging misrepresentation in the sale of a lye-product.

The respondent is alleged to have represented that a 6-ounce can of its preparation, or 6 ounces thereof, will make hard soap when mixed with 6 pounds of grease, when such is not a fact.

The respondent's representations are alleged to provide jobbers and retail sellers a means whereby they may mislead retail purchasers. (4052)

**Lenoir Solvent Company**—See Lenoir Woodfinishing Co., Inc.

**Lenoir Woodfinishing Company, Inc., of Lenoir, N. C., and Arthur G. Spencer, its president and sales manager, individually and trading under the name Lenoir Solvent Company, are charged** in a complaint, with unlawful payment of fees to certain officials and employees of their customers so as to induce the purchase by such customers, through such officials or employees, of the respondents' products.

The respondent corporation manufactures paints, varnishes, stains, thinners, sealers and other wood finishing products and sells them to wood finishing concerns and furniture manufacturers.

It is alleged that the respondents have given substantial sums of money and other things of value to certain officials and employees of their customers or prospective customers, without the knowledge or consent of such customers, for the purpose of inducing such officials and employees to purchase the respondents' wood finishing materials for use by their employers or to recommend the purchase of such products by their employers, or as payments to such officials and employees for having induced the purchase or recommended the use of the respondents' products by their employers.

In some instances, it is alleged, the respondents have offered to pay and have paid to finishing room foremen employed by their customers or prospective customers a fixed fee of $5 a drum for every drum of wood finishing materials purchased by their employers from the respondents. In other instances, it is alleged, the respondents have given some employees of the respondents' customers 7 per cent or 10 per cent of the purchase price of all materials bought from the respondents by such customers. All of the payments and offers of payments are alleged to have been made without the knowledge and consent of the respondents' customers whose employees have been so paid.

The complaint alleges that in violation of the Federal Trade Commission Act the respondents' practices have tended to divert trade unfairly to the respondents from competitors who have not indulged in such methods. (4048)

**Hydrosal Company**—Alleging misrepresentation in the sale of medicinal preparations, a complaint has been issued against The Hydrosal Company, 333 East Eighth St., Cincinnati, distributor of "Hydrosal Liquid" and "Hydrosal Ointment."

In newspaper and other periodical advertisements the respondent company is alleged to have represented its preparations as possessing remedial, curative or healing properties with respect to eczema, piles, athlete's foot, poison ivy and disorders associated with pimples, skin rashes, outbreaks and itches which such preparations
M & M Bag and Suit Case Co.—Misrepresentation in the sale of luggage is alleged in a complaint issued against Meyer Brodie and Morris White, trading as M & M Bag and Suit Case Company, 26 Exchange Place, Jersey City, N. J.

Among and typical of misleading representations allegedly made by the respondents in the sale of their products is the statement that "This Article is Made of Genuine Buffalo Walrus Leather." Through use of the foregoing and other representations of similar import the respondents are alleged to represent that certain of their suit cases and traveling bags are made of leather, when in fact they are not made of walrus leather but are made of buffalo leather. (4046)

Perfect Voice Institute—Alleging misrepresentation in the sale of a course in voice culture, a complaint has been filed against Perfect Voice Institute and Eugene Feuchtinger, its president, 64 E. Lake St., Chicago, and Walter A. Jordan, chairman of the board of directors, and Mary E. Murphy, secretary and treasurer, both of 307 N. Michigan Ave., Chicago.

The complaint relates that the respondents sell their course designated "Physical Voice Culture," consisting of thirty lessons contained in fifteen printed volumes entitled "A Manual for the Perfection of the Human Voice," and that as a part of the course they furnish a so-called outfit consisting of mirror, electric torch, tongue depressors, thyethrion tongue support, breath measure and special chromatic pitch pipe.

In advertisements the respondents allegedly offer a "wonderful voice book free," as a means of making contacts with prospective purchasers. In advertising their course of instruction they are alleged to have represented that "We build, strengthen the vocal organs of which certain of its shoes are made.

The complaint grants the respondents 20 days in which to answer the complaint. (4043)

United Art Studio—L. L. Gwin, trading as United Art Studio, Chattanooga, Tenn., and engaged in the business of selling portraits or products of photography, is respondent in a complaint charging misrepresentation.

The complaint charges that for the purpose of inducing the purchase of portraits or photographic products the respondent has supplied coupons to retail merchants in various States for use by them in inducing or encouraging the purchase of their merchandise in accordance with the plan or method formulated by the respondent. The name and address of the merchant appears at the top of the coupon with explanatory matter reading: "This card, when signed by merchant issuing same, entitles holder to one Enlarged Portrait designed, proportioned and colored as requested below * * * and a $3.00 Enlarged Technitone Hand Colored Portrait in Leatherette Frame for only $3.00 in trade and 39c. Reproduced from your favorite photo, kodak or penny picture * * *

Through these statements, the complaint alleges, the respondent has represented that his portraits and photographs are of the value of $3.00; that the coupon is worth 2.61 to the purchaser of a portrait, and that the price of 39c represents a special offer which is available for a limited time only. The complaint alleges that the portraits or photographs in the usual and customary course of business for 39c without any limitation as to time and regardless of whether the prospective purchaser possesses one of the coupons.

These acts and practices, the complaint declares, are to the prejudice and injury of the public and constitute unfair and deceptive acts and practices within the meaning of the Federal Trade Commission Act. (4043)

U. S. Drug & Sales Company—Charging misrepresentation of the properties and therapeutic values of certain medicinal products and failure to reveal that certain preparations offered for sale contain dangerous drugs, a complaint has been issued against Edwin L. Lelsenring, trading as U. S. Drug & Sales Company, and Gordon Lelsenring, both of 1534 Lawrence St., Denver, Colo.

Preparations sold by the respondents are "Man's Pep Tonic", also advertised as "Man's Tonic" and sold as "U. S. Special Tablets", and "Man's Pep Tonic (Double Str. Capsule)", also advertised as "Man's Tonic (Double Str. Capsule)" and sold as "Sextogen Capsules for Men or Women."

Through advertisements in newspapers and by mail, the respondents are alleged to represent that their preparations are safe, competent and reliable tonics; are effective, safe and scientific as aphrodisiacs and as treatments for strengthening and rejuvenating the glands and sexual organs of man or woman, and that the preparations possess therapeutic value in the treatment of debility.

Alleging that the respondents' representations are exaggerated, misleading and untrue, and that the complaint charges that the preparations are practically without value as tonics, because drugs possessing tonic properties are not present sufficiently to give tonic value. These preparations are alleged to possess neither any value for strengthening or rejuvenating the glands or sexual organs nor for curing debility.

The complaint alleges that the respondents' representations constitute false advertisements in that they fail to reveal that "Man's Pep Tonic" contains the dangerous drugs, extract nux vomica and yohimine hydrochloride; that "Man's Pep Tonic (Double Str. Capsule)", sold as "Sextogen Capsules for Men and Women", contains extract nux vomica, yohimine, and extract of thyroid, and in that they do not disclose facts with respect to the consequences which may result from use of such commodities under conditions prescribed in the advertisements or under customary conditions.

By charging violation of the Federal Trade Commission Act, the complaint grants the respondents 20 days in which to answer the allegations.

A preliminary injunction restraining the respondents from the same practices, pending disposition of the Commission's case, was obtained by the Commission February 13, in the United States District Court, Denver. (4655)

Western Auto Supply Company, 2107 Grand Ave., Kansas City, Mo., is charged in a complaint with misrepresentation in the sale of automobile tires and tubes.

In advertisements concerning sales conducted through its retail stores, the respondent corporation is alleged to have misleadingly represented that its tires and tubes were being sold at purported discounts and savings from the regular prices.
It is alleged that the respondent represented that by paying the advertised sales price the customer could obtain a discount or saving of 20 per cent on "Davis DeLuxe Tires", based on the regular sales price, when in fact such discount was exaggerated and untrue because the listed 'regular price' made no allowance for the trade-in value of the purchaser's old tires, and that the terms of the advertisement, required to be turned in at the time of sale. Giving effect to the minimum trade-in allowance of 10 per cent for used tires, the saving or discount was about 11 per cent instead of the 20 per cent as advertised, according to the complaint.

It is also alleged that the respondent represented that in the purchase of a "Davis DeLuxe Tire" during a sale the purchaser would receive a Davis tube free and save the difference between the advertised sales price for tire and tube and the listed price for nationally advertised tire and tube. However, the complaint alleges, such saving was exaggerated and untrue because the advertised price made an allowance of 10 per cent for the purchaser's old tires, while the listed price for nationally advertised tire and tube made no such allowance, although it was customary for dealers selling nationally advertised tires to make an allowance of at least 10 per cent as the trade-in value for old tires. (4054)

Western Novelty Company—A complaint has been issued charging Max Levin, trading as Western Novelty Company, 1729 Lawrence St., Denver, Colo., with selling to dealers assortments of merchandise so packed and assembled as to involve the use of a lottery scheme when sold to ultimate consumers. It is alleged that the respondent also furnished such dealers with punchboard devices for use in selling the merchandise. Among articles sold and distributed by the respondent were knives, cameras, razors, pens, pencils and cigarette lighters. (4055)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders during the past week:

Carlyle Service—See Supreme Manufacturing Company.

Mary T. Goldman Company—See Monroe Chemical Company.

Harmony Centre—Jessie F. Springer, trading under the name of Harmony Centre, 604 West 112th St., New York City, has been ordered to discontinue misrepresentations in connection with the sale and distribution of a book written by one Johanna Brandt entitled "The Grape Cure," and formerly entitled "The Grape sale and distribution of a book written by one Johanna Brandt, a lottery scheme when sold to ultimate consumers. It is alleged that the system or method of treatment narrated in the book will restore one's health.

The Commission finds that these representations are false and misleading; that salts, inorganic drugs and patent medicines do not cause cancer, and that grapes do not dissolve, and are not a solvent of mucus; that salts, inorganic drugs and patent medicines do not cause cancer, and that the system or method of treatment outlined in the book is not a competent treatment or an effective remedy for various ailments.

The respondent is ordered to cease and desist from representing, in connection with the sale and distribution of the book entitled "The Grape Cure," that the system or method of treatment outlined in the book constitutes a cure or remedy for or a competent and effective treatment for constipation, cancer, heart trouble, kidney trouble, bladder trouble, angina pectoris, sinus trouble, goiter, stomach ulcers, rheumatism, asthma, gall stones or tuberculosis, and from representing that grapes dissolve, or are a solvent of mucus. (3953)

W. H. Maze Company—An order has been issued requiring W. H. Maze Company, Peru, Ill., to cease and desist from certain misrepresentations in connection with roofing nails. The order found that, although the respondent company advertised its "Maze Lead Head Anchor Shank Nails" as having twice the holding power under normal conditions of all other nails ordinarily used for roofing, and four times the holding power of certain other roofing nails, such representations were untrue. The respondent company was directed to discontinue these claims and to cease representing that its roofing nails have any designated holding power in excess of that possessed by other roofing nails, when such is not a fact. (3953)

Monroe Chemical Company—An order has been issued against Monroe Chemical Company, Quincy, Ill., and Mary T. Goldman Company, St. Paul, Minn., prohibiting misrepresentation in the sale of a hair preparation.

Through newspaper and other periodical advertising and through use of the word "restorer" in designating the preparation, the respondents are found to have represented that their product is capable of restoring the original or youthful color to gray, streaked, or faded hair, and will remove all trace of gray hair.

Findings are that the preparation does not restore the original color to gray, faded, or streaked hair; that the preparation acts as a dye or stain producing an artificial color; that it will not color or restore color to gray, faded, or streaked hair except in the sense that it may dye the hair, and that all trace of gray, faded, or streaked hair is not removed because repeated applications are required to prevent the new growth of hair from showing gray, faded, or streaked above the scalp line. The Commission also finds that Mary T. Goldman was the originator of the formula for producing the "Mary T. Goldman's Gray Hair Color Restorer" sold by the respondents; was their predecessor in business, and was not living at the time that her name was used in the respondent's advertising.

The order directs the respondents to cease and desist from representing that their preparation is not a dye or that it will cause gray or faded or streaked hair to change color without dyeing the hair; or that it will restore the natural, original or youthful color to gray hair, or remove all trace of gray hair in any other manner than as a dye.

The order also prohibits the respondents from representing that anything less than repeated applications of the respondents' preparation will change the color of the user's hair or cause it to maintain the color imparted by the product, and forbids use of the word "restorer" as part of the brand name for the product.

A finding further that Mary T. Goldman is a living person personally recommending the respondents' preparation, or personally corresponding with the users or prospective users thereof, is also prohibited under the order. (3274)

Morton Salt Company—Cease and desist order issued against Morton Salt Company, 208 West Washington St., Chicago, in October 1939, has been modified.

The respondent was required to cease and desist from using the words "smoked" or "smoke" or any other words signifying smoke or implying use of smoke to describe salt offered for sale, or sold, for curing, preserving, smoking, or flavoring meats, unless the salt so described had been directly subjected to the action and effect of the smoke from burning wood during the course of its combustion sufficiently to acquire from such source alone all of its smoke or smoke effects for use in curing, preserving, smoking or flavoring meats.

The order has now been modified to add the following proviso: "Nothing in this order shall prohibit the respondent from using the terms 'wood smoke' and 'refined condensed smoke' in enumerating or stating the ingredients of such salt when such salt has been directly subjected to the action and effect of the smoke of burning wood during its process of combustion and there has been added thereto a refined concentrate resulting from the destructive distillation of wood, and where the application of each of such products is in sufficient quantity to impart to such salt the flavor of smoke." (2150)

March 15, 1940 4106

M. Seidel & Son—An order has been issued against Maurice Seidel and Charles Seidel, trading as M. Seidel & Son, 243 West 30th St., New York, prohibiting misrepresentations in connection with the use of lottery devices in the sale of furs and fur garments.

The findings are that the respondents sold women's fur garments made from rabbit pelt furs so dressed and dyed as to resemble fur products made from the peltries of seal, beaver, leopard, ermine, mink, squirrel, sable, or karakul sheep; that they failed to disclose the true zoological names of such furs and fur products so sold but instead misrepresented them by means of misleading and deceptive designations such as "Black Seal," "Mendoza Beaver," "Leopardarine," "Erminette," "Ermine Coney," "Squirrelbette," "Dark Sable Coney, "'Broadtail" and other names.

It was also found that the respondents in the sale of their merchandise furnished plans of merchandising which involved operation of games of chance by use of devices such as push cards.

For the purpose of inducing salesmen or representatives to sell their products by means of such push cards, the findings continue, the respondents represented the possible and average earnings of such salesmen as $1,300 a week or more, and that an investment of $12 would bring $1,300.

The order directs the respondents to cease and desist from placing in the hands of others, push or pull cards, punch boards or lottery devices which are to be used or may be used in selling merchandise, and from selling merchandise by use of such devices; representing any specified sum of money as possible earnings or profits of agents for any given period of time which is not a true representation of the average net earnings or profits consistently made by full-time representatives under normal business conditions; representing or specified sum as earnings or profits of a specified salesman which has not in fact been consistently earned net by such salesman; describing fur or fur garments in any other way than by use of the true name of the fur as a last word of the description thereof, and describing fur or fur garments wherein the fur has been dyed or processed to simulate another fur, without using the true name of the fur as a last word of the description immediately preceded by the word "dyed" or "processed," as the case may be, compounded with the name of the simulated fur. (3961)

Standard Containers Mfg. Association, Inc.—An order has been issued against the Standard Container Manufacturers' Association, Inc., Jacksonville, Fla., a trade association, three of its officers and 26 Florida and Georgia manufacturers or distributors of wooden containers for fruits and vegetables, prohibiting the maintenance by combination and agreement of uniform and minimum prices for their products, the curtailment of production, and the intimidation of industry members to induce them to become parties to the agreements.

Association officer respondents are James B, Adkins, Gainesville, Fla., former president; Charles P. Chazal, Ocala, Fla., president; and Russell W. Bennett, Jacksonville, Fla., secretary, treasurer, and general manager. (3289)

Supreme Manufacturing Company—C. C. Johnson, trading as Supreme Manufacturing Company, Carlyle Service, Marvo Manufacturing Company, and Peerless Manufacturing Company, Omaha, Nebr., has been ordered to cease and desist from misrepresentations in connection with the sale and distribution of a product represented as a preservative of silk hosiery and lingerie.

The findings of the Commission are that the respondent has for several years been engaged in the sale and distribution of a product under the trade names "Supreme," "Marvel," "Marvo" and "Peerless." In making representations with respect to his business status and to the quality and effectiveness of his product, by means of sales talks to prospective customers by agents of the respondent, and in other ways, the respondent has claimed that use of the product "Prevents the runs and snags in your silk hosiery and lingerie; will not prevent silk from rotting or fading; will not save approximately 50 per cent of hosiery and lingerie expense; is not permanent, and does not strengthen the heels and toes of silk hosiery, and that the respondent is not the manufacturer of said product.

The respondent is ordered to cease misrepresentations of the efficiency of his product, and to desist from use of the term "manufacturing" or any other term of similar import or meaning as part of any trade or corporate name or representing that he is the manufacturer of said product, unless he actually owns and operates, or absolutely controls, the manufacturing plant wherein said product is actually manufactured by the respondent. (3712)

Wardell Piano Company—Prohibiting certain misrepresentations in the sale of pianos, a cease and desist order has been issued against Clayton L. Wardell, trading as Wardell Piano Company, 909 Pierce St., Sioux City, Iowa.

Through newspaper and other advertisements the respondent is found to have represented that certain of his pianos, having been previously sold on a deferred payment plan, had been repossessed by the respondent from the original purchasers because of their failure to meet the payments due, and were being offered for resale at prices which represented only the unpaid payments due and which were substantially less than the prices at which such pianos ordinarily would be sold.

Commission findings are that many of the pianos sold by the respondent in this manner were not instruments which had previously been sold by the respondent and repossessed from such original purchasers but had been taken from the respondent's regular stock. The prices were not in any sense sacrifice prices, and did not represent any balance due from the original purchaser, when in fact they are the usual prices; from representing as the customary prices or values amounts which are in excess of the regular prices, and from representing that pianos have been repossessed from the purchasers thereof, when such is not a fact. (3967)

STIPULATIONS

The following stipulations have been entered into by the Commission:

Abilene Flour Mills Company, Abilene, Kans., stipulates that it will cease participating in the cost of, or in any way supplying to or placing in the hands of others, premium flour or other merchandise for use in conducting lotteries in the sale and distribution of flour or other products and that it will discontinue participating in the cost of, or in any way placing in the hands of others, prize-drawing cards or other lottery devices to enable such persons to sell merchandise by the use thereof. (2700)

Ace Equipment Company—L. B. Patterson and Jack Wolfe, trading as Ace Equipment Company, Des Moines, Iowa, agree to cease representing that the "Ace Spark Plug Cleaner" will clean one or any number of spark plugs in less time than it actually takes for the average auto mechanic to clean such plugs under usual conditions prevailing in the average small oil and gas station, and including the time required to remove such plugs from the cylinder block of an automobile engine and to replace them after they have been cleaned. Among other representations to be discontinued are that the respondents' cleaner is the finest and quickest ever made and will clean spark plugs as well as the higher priced cleaners will do. The respondents also agree to discontinue misleading representations concerning the earnings to be expected by prospective sales agents. (02519)

Book Match Company—See Chicago Match Company.

4107
March 15, 1940
Chicago Match Company—Fayette H. Lawson and William A. Lawson, trading as Chicago Match Company and as Book Match Company, Chicago, Ill., agree to cease representing that they are "the quality leader" in the book match industry, when such is not a fact; that they sell their book matches at any price other than the price actually charged; that no extra charge is made for "deLuxe designs," "three color covers," or any other styles, such as "union labels" and "special red, white and blue covers," when in fact extra charges are made. The respondents also stipulate that they will cease stating that their catalogs contain "over 865 special book match cuts" or any other number greater than is actually a fact, and that they will cease using in their advertisements the term "three color covers" with the effect of creating the impression that the number of colors printed or otherwise inscribed upon the stock is greater than is actually a fact. The respondents agree to cease representing that any article is given "free" when receipt of such article is contingent upon any consideration, such as payment of money or rendering of services, not clearly disclosed in direct connection with the representation, and to discontinue the use in advertising of the words "bronzing" or "bronze" as descriptive of match book covers so as to imply that such printed products are the result of imparting a gold, silver or other metallic color by means of powders, painting, or chemical process, when such is not a fact. (2701)

Claxton Candy Company, Inc., Atlanta, Ga., agrees to cease selling and distributing to jobbers and wholesale dealers for resale to retail dealers, or to retail dealers directly, candy so packed and assembled that its sale to the public is to be made or may be made by means of a lottery or gift enterprise. The respondent company also agrees to cease placing in the hands of dealers candy assortments which are used or which may be used without alteration to conduct a lottery in sales of such candy to the public, and to discontinue placing in the hands of others, punch boards, push or pull cards or other lottery devices to enable such persons to sell merchandise by the use thereof. (2699)

Dental Research Company—Melvin E. Page, trading as Dental Research Company, Muskegon, Mich., has made a stipulation in which he agrees to discontinue misleading representations in the sale of a kelp preparation advertised as "Ce-Kelp, theGift of Nature to Man" and "A Vegetable Sea Food Rich in Minerals."

Among representations which the respondent agrees to discontinue are that his product is "rich in minerals"; that it prevents or corrects what physicians call the deficiency diseases; and that heart trouble, tuberculosis, anemia, high and low blood pressure, hardening of the arteries, rheumatism, neuritis, arthritis, kidney and bladder trouble, frequent colds, nervousness, constipation, acidosis, pyorrhea, over and underweight, cataract or cancer are recognized or properly classified as being deficiency diseases.

The respondent also stipulated that he will cease representing that the main cause of deficiency diseases is lack of mineral elements in ductless glands, or that his commodity or any other kelp product is "literally packed" with such essential elements.

The respondent stipulates that he will desist from designating himself as "Dr. " or "Doctor" unless it be clearly disclosed that he is a doctor of dentistry and not of medicine.

The stipulation points out that, according to reliable medical authority the respondent's various claims and inferences are contrary to the weight of scientific evidence and are based upon premises that cannot be substantiated. (2704)

Jones Pulmotor Arch Support Company, Kansas City, Mo., stipulates that it will desist from advertising that the "Jones Pulmotor Arch Support" strengthens the feet or the foot muscles, rebuilds the feet, corrects or cures any foot disorder or any condition which causes foot or leg ailments, stimulates circulation of the blood or aids in the elimination of poisons, and increases energy or vitality. The respondent also agrees to cease representing that its arch supports are complete "air cushions" or that they cause any massaging effect or vacuum-suction action which is of therapeutic, remedial or palliative value or effect, or which aids in the elimination of fatigue or is beneficial to any part of the body. (02521)

Kamazin Manufacturing Company—Agreeing to discontinue misrepresentation in the sale of a medicinal preparation, Israel Freed, trading as Kamazin Manufacturing Company, 145 West Kingsbridge Road, New York, has entered into a stipulation. The respondent agrees to cease representing that use of his preparation "Kamazin Powder" affords relief from the condition known as athlete's foot for a long period of time or affords permanent relief, and that doctors prescribe or endorse Kamazin Powder. (02522)

Manfield Handkerchief Company—See M. Zwaifler & Company, Inc.

Verard Company—Stipulation has been accepted from Ruth Cecil Arden trading as The Verard Company, 119 West 227th St., New York, distributor of a medicinal preparation to discontinue certain misleading representations.

In the sale of "Verard Solution," the respondent agrees to cease representing that the preparation is of itself a competent treatment or effective remedy for athlete's foot; that any person using such medication will no longer suffer from red or swollen feet or certain other discomforts; that beneficial results may be expected by the user without regard to the stage of infection, the presence of accompanying factors or the necessary hygienic measures which must attend any type of medication for such conditions. The respondent also agrees to discontinue misleading uses of the word "guaranteed." (2696)

M. Zwaifler & Co., Inc., and M. Joseph Rosen, trading as Manfield Handkerchief Company, New York, N. Y., stipulate that they will desist from referring to their businesses as those of manufacturers of handkerchiefs when neither respondent owns, operates, or controls the plants in which the products sold are made. M. Joseph Rosen also agrees to discontinue representing that he has factories in Passaic, N. J.; Chicago, Minneapolis, Los Angeles, Boston, or elsewhere; or maintains foreign offices in Paris, France; Manchester, England; Swatow, China; Mayaguez, Puerto Rico; Belfast, Ireland, or elsewhere; when such are not the facts, or from representing that he has offices of his own at Passaic, Chicago, Minneapolis, Los Angeles, Boston, or elsewhere, when in fact the offices referred to are those of salesmen and are not financed and controlled by the respondent. (2702 and 2703)
ASCAP Demands 100 Per Cent Increase; Miller Replies

ASCAP on Thursday demanded a 100 per cent increase for a new agreement with the broadcasting industry, and Neville Miller immediately made the following statement:

"The American Society of Composers, Authors and Publishers made public today its demands for a 100 per cent increase in the payments made to it by the broadcasting industry. This increase is demanded by ASCAP despite the fact that the radio broadcasting industry is already making payments to ASCAP at the rate of five million dollars a year. This sum is five times as great as that paid by any other industry. It represents over two-thirds of ASCAP's total revenue and is an increase of 900 per cent over the sums paid by broadcasters in 1931.

"Although most of ASCAP's statement talks about the alleviation of certain abuses which ASCAP itself admits exist in its present licensing system, when the camouflage is stripped away the proposal boils down to a demand that the broadcasting industry should double its payments for the radio performing rights in the compositions controlled by ASCAP's publisher and composer members.

"ASCAP's demand was put forward without previous negotiation with broadcasters and after a refusal to meet with the negotiating committee appointed by the National Association of Broadcasters. Although ASCAP attempts to divide the broadcasting industry by making concessions to certain groups, the total amount of the reductions which it suggests is inconsiderable compared to the total amount involved.

"Moreover, ASCAP's new plan perpetuates the major abuse about which broadcasters have always complained, and requires broadcasters to pay to ASCAP a percentage of all broadcasting revenue even that obtained for programs which do not utilize ASCAP music, such as news broadcasts, sports events and programs of classical music. The broadcasting industry will be unified in resisting demands, the effect of which would be to impose charges wholly destructive of the American system of broadcasting.

"ASCAP is again attempting to take advantage of its monopoly of popular music to impose an unfair method and rate of payment upon broadcasters, but ASCAP has this time overreached itself and has made demands which the broadcasting industry must resist as a matter of life and death.

"These demands will strengthen Broadcast Music, Inc., the organization recently (Continued on page 4110)
ASCAP Demands 100 Per Cent Increase; Miller Replies

(Continued from page 4109)

created by the broadcasting industry to foster new creative talent by increasing the already widespread support of its aims.”

This was ASCAP’s letter to the industry:

March 21, 1940.

Gentlemen:

As you all know, pursuant to the authority given by our Board of Directors, our President appointed a Committee known as a Special Radio Committee to make a careful survey and study of the radio industry and the relationship of our Society thereto, to the end that it recommend the form of license agreement and the terms thereof to become effective with its radio licensees commencing January 1st, 1941.

The Committee has completed its studies and made its report, including its recommendations, to our Board last evening and our Committee has been authorized to submit its recommendations and proposals to the Radio Industry.

The Committee, in collaboration with the executives and the management of the Society, prepared and made an exhaustive study of a great deal of statistical information. As the study progressed it became evident that the present formula under which radio is licensed has developed in some respects an unequal allocation of charges which could not have been foreseen by us at the time the present formula was adopted. Moreover, the recent investigation by the Federal Communications Commission shows that a number of smaller stations have been operating at a disadvantage in comparison with many of the larger stations and with stations affiliated with national networks, and that any formula to be recommended by the Committee must attempt to adjust these inequalities and help alleviate the situation of these small stations.

In addition, numerous abuses and evasions of the provisions of the present contract have been uncovered and the Committee has made provision in the plan for their elimination.

The Committee gave consideration to the “per program” basis, among others, but after an exhaustive analysis thereof found that it was uneconomical and unscientific to adopt the same.

The Committee then carefully studied all the facts relating to the licensing of radio broadcasting stations and the various plans suggested from time to time, and came to the conclusion that the principle of clearance at the source should be recognized in the new formula of licensing.

The Committee then studied the problem of alleviating the hardships suffered by the small stations. In order to eliminate such hardships it decided upon a classification and grouping of stations. This new formula will grant substantial relief in the form of materially reduced sustaining charges and percentage payments to the great many small stations, and some reduction to all stations.

It devoted itself to working out in detail the principle of clearance at the source. Accordingly it has provided for a separate chain broadcast license.

The Committee believes that the present policy of the Society with respect to broadcasting stations operated by municipal, educational, charitable, or religious institutions or organizations should not be changed.

Summarizing all of the foregoing and applying the foregoing principles to the specific conditions, the Committee has recommended and the Board has approved of the following method of licensing and the details relating thereto hereinafter set forth:

Plan

The Society recognizes in its licensing program four distinct and separate groups within the radio broadcasting industry:

1st. The small independent station whose gross annual business is in the neighborhood of $50,000 or less;

2nd. An intermediate group of stations, independent and otherwise, each of which by virtue of location, type of program, service to the community, general radio policy, and amount of business done, is in a different category from the small station;

3rd. The large station, which by affiliation, by prestige, by virtue of location and the territory it serves, has an opportunity to make substantial profits out of its business; and

4th. The chain which does not operate any radio stations as such (it may own stations, it may have a controlling interest in stations) but its primary business is not the operation of a station but the sale of advertising, “time on the air” and supply of programs—commonly known as “Networks.”

The License will contain the following provisions:

1. The License is limited to non-visual broadcasting (television is excluded).

2. Network programs must be cleared at the source.
3. Radio stations are divided into three groups paying license fees of 3%, 4% and 5%, respectively.

4. The percentages paid by licensees are computed upon the gross amount paid by the advertiser for use of the station's broadcasting facilities, with only the following deductions permitted:

(a) 15% advertising agency discount, if actually paid;
(b) Amounts received from political broadcasts; amounts received from religious broadcasts where the amount paid is solely in reimbursement for the cost of lines, wire charges, and other similar charges;
(c) Certain costs of artists especially employed for a particular program and certain costs for news programs, athletic events and similar events, provided that the minimum sum allocated to percentage must not be less than the highest rate charged for a similar period of time over licensee's station;
(d) Amounts received from network for rebroadcasting programs which have been cleared at the source.

5. The sustaining fee of stations in the 3% group is made nominal ($12. per year).

The amounts to be charged as sustaining fees to the stations in the 4% class will be approximately 25% less than presently charged. The sustaining fees to be charged to the 5% stations are to be approximately the same as presently charged.

Stations in the 4% and 5% groups are given an opportunity to recoup the payment of the sustaining fee after the license fee paid reaches a certain amount.

6. There is a separate contract for networks in which the network broadcaster agrees to clear all programs at the source and to pay 71/2% of the amount received by it from advertisers. The license will permit the deductions from the gross which are enjoyed by the individual stations and will contain the protective clauses for the Society that are required by the Society from the individual station. This rate may be reduced to 5% in the case of such network operations as are made necessary because of local conditions.

7. The license to individual stations does not give them the right to rebroadcast programs containing ASCAP compositions which have not been cleared at the source. If such programs are broadcast, however, a sum equal to 10% of the station's highest cord rate for such a program is to be paid to ASCAP in lieu of treating the broadcast as an infringement of copyright.

8. If a licensee having a “single station contract” engages in network broadcasting, such licensee and the Society will agree to enter into the Chain Broadcast License Agreement.

9. The Society has the right to restrict not more than one thousand compositions at any one time. Licensee has the right to cancel if on sixty days’ notice the number of compositions on the restricted list exceeds one thousand and is not reduced to one thousand or less during the sixty-day period.

10. If anti-ASCAP laws are passed in any State, which in the opinion of the Society, impede or prevent the full performance of the license agreement, the Society may terminate the agreement as to the stations in such State.

11. The Society gives the licensee the same indemnity as in previous contracts.

12. The duration of the contract has not yet been fixed. This will depend on the definitive terms of the final agreement and the wishes of the broadcasters in the matter.

In the opinion of the Society, this plan will bring substantially increased benefits to the radio broadcasting stations. As heretofore each station will have available a large and varied reservoir of music assisting it to meet its primary purpose of serving the intimate needs of the locality in which it is situated. At the same time it will help to make the income of the Society from radio more nearly commensurate with the value of the Society's contribution to the radio industry of this country.

**FM Hearing**

**MONDAY**

The FCC hearing on “High Frequency” opened Monday morning, February 28th. Chairman Fly as an introduction outlined briefly the purposes of the hearing and stated that we have not yet reached exhaustion in broadcasting possibilities and that due to the limited facilities available in the present band Frequency Modulation is a matter of great public concern.

Horace Lohnes, attorney, presented Major Edwin H. Armstrong as the first witness. Major Armstrong testified that he started in radio in 1906 as an amateur and that in 1912 he discovered the regenerative circuit and its properties and in 1917 he went over seas as a Captain and worked on technical problems of the Army. While he was over seas he discovered the principle of the superheterodyne. Major Armstrong continued his testimony by stating that in 1920 he discovered the super-regenerative circuit. In 1924 he started working on different
ways of solving the static problem and that in 1933 he applied for patents on a method of eliminating static by means of the F. M. system of transmission. Major Armstrong briefly went into the history of Modulation and outlined the development of Amplitude Modulation and Frequency Modulation up to date. Major Armstrong testified that in 1924 he started a different attack upon the problem of eliminating static. He found that static impulses had more of an Amplitude characteristic and that the static in effect corresponded to Amplitude Modulation. He said that he also discovered that the Frequency Modulation characteristics of static were of a narrow band characteristic and that from these observations he conceived the idea of using a wide band F. M. for overcoming the effects of static.

Major Armstrong went into the history of his attempts to introduce Frequency Modulation and told of the various demonstrations he had presented. A film recording made at Haddonfield, New Jersey, August, 1935 was played. Transmissions by F. M. from a 2 KW transmitter at the Empire State Building, a distance of approximately 85 miles were compared with an A. M. 50 KW on 660 KC, WEAF at Bellmore, Long Island, a distance of about 105 miles. The demonstration showed marked static interferences on the standard band station and very little interference on the F. M. station. Part of the record was of Station WMCA 500 Watts on 570 KC in New York City, a distance of about 85 miles, showing very little signal in comparison to the static. Major Armstrong pointed out that part of the difference in the static level was due to the difference in frequency, (there is a difference in static level of about 35 DB between 660 KC and 40 MC—ed. note). It was Major Armstrong’s opinion that the successful operation of existing F. M. stations adequately answered the question as to whether F. M. was ready for regular broadcast service or not. He stated that the normal good service range of his Alpine station (near New York City) was about 100 miles, and that there is very little secondary coverage on a F. M. station. This was in response to Commissioner Craven’s question as to where Frequency Modulation’s superiority over a 50 KW standard band station ends. Major Armstrong testified that the gain over noise on F. M. varied roughly in voltage as the band width, and that on F. M. a signal to noise ratio of 2 to 1, gives about the same order of service as would be given by a signal to noise ratio of 100 to 1 with A. M.

Commander Craven asked Major Armstrong if, disregarding noise, would an Amplitude Modulation station on the same frequency have the same range as an F. M. station, and the answer was, yes. Major Armstrong stated that the F. M. system lends itself more readily to the handling of “High Fidelity” and a wide Audio-Frequency band. He stated that in F. M. the characteristics of the circuits determine the quality and that in A. M. the main determining factor was the characteristics of the tubes, and that this gave F. M. an advantage in fidelity control over A. M. Major Armstrong stated that in the transmitter the functions of F. M. could be performed with receiving type tubes, and that this energy could then be amplified with ordinary Class C amplifiers to the desired power. In response to Chairman Fly’s query, Major Armstrong responded that he would not undertake to render a secondary service with F. M. and that the system produces a good primary area and the service beyond there is too spasmodic to be of material use as a secondary service. He suggested the use of automatic unattended relays to extend the service area of a station.

Major Armstrong stated that he had tried various F. M. band widths and that in general the wider band used the better, and that the present band of 200 KC has been arrived at as a practical value. He said that if this band were cut in half that the power would need to be raised four times in order to produce the same results. He pointed out that as the band is narrowed, the interference area between stations becomes greater. He also said that multiplexing is difficult with a band narrower than 200 KC. Major Armstrong also said that as the band width is narrowed down the construction of the receiver becomes more difficult in order to keep the distortion low.

Major Armstrong advocated dividing the band from 42 to 44 MC into 10 F. M. channels and he also advocated taking 1 of the 6 MC Television channels and dividing it into 30 F. M. channels to provide a frequency spectrum for F. M.

TUESDAY

Major Armstrong’s testimony was continued on Tuesday morning. He pointed out that there would be a reduction in congestion on the present band as soon as F. M. is authorized. He said that the present band would continue to operate just as the Model T continued to operate until it was worn out and the public found it could get a better automobile. He said that it will take years for the manufacturers to produce the equipment for a complete F. M. replacement. Major Armstrong said that in the end the public will decide the acceptance of F. M. It is Major Armstrong’s opinion that receivers will be worn out long before it will be necessary to change them due to all broadcasting being done by Frequency Modulation. Queried about the cost of transmitters, Major Armstrong stated that they were as cheap or cheaper now than are A. M. transmitters for the present band, and that undoubtedly within a year, the price will be lower. He said that F. M. receivers will cost very little more than do present A. M. receivers, in order to obtain one of the advantages of F. M., namely, noise re-

March 22, 1940 4112
duction, but that in order to take advantage of the better quality, it will be necessary to use a better loud speaker and amplifier than is used now, and therefore, the cost will be more. So far the F. M. receiver manufacturers have put out receivers as good as they possibly could in order to start F. M. off right, and consequently the receivers have cost more.

When asked about license consideration, Major Armstrong said that the General Electric, Western Electric, and Radio Engineering Laboratories were licensed to manufacture transmitters. Commission Attorney Bauer read a list of the Armstrong receiver manufacturers licensed and they were as follows: General Electric, Stromberg Carlson, Zenith, Pilot, Scott, Stewart Warner, R. E. L., National, Hammerlund, and Halicrafter.

Also in connection with patents Major Armstrong said that he had sold the regenerative and the superheterodyne circuits at the same time for approximately $330,000 and that his super regenerative circuit had been sold for $425,000. He stated that he had spent between 700,000 and 800,000 dollars in Frequency Modulation development. It was his opinion that Frequency Modulation could be used to advantage in transmitting television, and that some work had already been done on this. Commander Craven asked what Major Armstrong had done to try to economize frequencies and his answer was, nothing; that he had been concerned with developing a system of “High Fidelity” with low noise. It was Major Armstrong’s opinion that F. M. could be applied effectively to the other services such as, Police, Education and Aviation, however, his opinion was that aviation work might better be done by Amplitude Modulation.

In response to a question by Mr. Jett, Chief Engineer of the FCC, as to Mr. Armstrong’s thought on allocation, he responded by saying that he advocated two types of allocation. One for large stations spaced approximately 300 miles to serve rural areas for a radius of about 100 miles and second, many stations closely spaced on the same channel for local service. In response to Mr. Jett’s question as to why he chose 15,000 cycles for High Fidelity he responded that there isn’t any particular limit and that 15,000 cycles is ordinarily considered to be the upper limits of music and sound effects and that in the F.M. system it is practically as easy to get this band width as it is 10,000. Mr. Armstrong said that he had made no particular tests to determine just how wide the band should be. However, his conception was that this full band width should be allowed for future development. Commander Craven in response to his question concerning the signal to noise aspect at different ratio’s of audio to total swing frequencies, received the answer; the signal to noise aspect varies in power as one-half the total frequency swing divided by the maximum audio-frequency, the whole quantity squared. (Editors Note: In other words, if the maximum modulation swings the carrier over a band of 150 KC and the highest audio-frequency to be passed is 15 KC then the signal to noise ratio in power would be determined by 75 divided by 15 squared, or 25. This would be the same as reducing the total swing to 100 KC and limiting the highest audio-frequency to 10 KC). Mr. Jett asked if through F.M. relays it would be possible to eliminate wire connections and the answer was yes, and that the relay would be carried on on other than the regular stations by a special relay system on frequencies probably about 130 MC and Major Armstrong went on to say that no doubt we would some day come to a F.M. relay system for chain broadcasting rather than wire line hook-ups. He said that in areas of common interest, regular stations could rebroadcast each other.

Horace Lohnes on behalf of Major Armstrong, entered as Exhibit No. 7, 8, and 9, the License Agreements between Major Armstrong and the manufacturers of F.M. receivers, transmitters, and the licensee of F.M. broadcast stations. Exhibit 7 outlined the royalties for broadcast transmitters under Armstrong F.M. patents as follows:

Columbia was the next party to the hearing called.

Mr. Paul Porter counsel for Columbia Broadcasting System made a brief statement that pending field tests, Columbia was reserving its opinion as to the advantages of the 2 systems of broadcasting transmission. Mr. Porter said that in the opinion of Columbia that where there is a similar claim to facilities by a duplication service, such as a proposed F.M. broadcasting allocation and for television, that the preference be given to a new and unduplicating service such as television.

The next party to make an appearance was Mr. Everett L. Dillard, the Commercial Radio Equipment Company of Kansas City, Missouri, licensee of W9XA, Amplitude Modulated on 26 MC. Mr. Dillard outlined noise measurements which had been made in Kansas City in which he arrived at the conclusion that the signal of 35 to 50 mv was needed on A.M. to cover Kansas City and that by far the greatest interference on High Frequency was automobile ignition. He said that diathermy interference had not been experienced on the 26 MC band by him. He said that the development of High Frequency broadcasting has gone as far as possible without the introduction of public interest. He felt that High Frequency broadcasting has a definite place in our scheme of broadcasting and the biggest need is for receivers. He pointed

March 22, 1940
out that there are very few receivers available for this band. He said that the public was not interested, due to curtailed time of operation because of severe experimental requirements by the FCC and the duplication of programs already on the air. He felt that two things were necessary in order to promote interest on the part of the public. One was to place Ultra-High-Frequency broadcasting in the regular category and the other the production of unduplicating programs.

WEDNESDAY

Philip G. Loucks, attorney for the F. M. Broadcasters, Inc., placed John Shepard III on the stand for their first witness. He testified to his long years of experience in radio broadcasting and to his present connections. He said that the total investment of the Yankee Network in F. M. to date was approximately $250,000. He said that of the 89 firms eligible for membership in F. M. Broadcasters, Inc., 55 were members. He continued, that we believe there is no question but that F. M. is capable of rendering a regular broadcast service. We know from the past months of regular operation at Paxton from 8:00 a.m. to midnight every day that F. M. is ready to render a regular broadcast service. In order to develop separate programs for F. M. it is necessary that a station licensee be able to at least look forward to the time when he can make a charge and therefore F. M. should be put on a regular basis at this time. He continued that the F. M. Broadcasters could see no need for extending the present experimental period and that F. M. should be allowed to go ahead on a regular basis. Mr. Shepard said that if F. M. is allowed to go ahead, it can hurt no one with the possible exception of those in the present band and very few of these will be affected because most of the F. M. license holders will be those now holding regular broadcasters licenses. Mr. Shepard asked that the FCC raise the F. M. power limitation from 1 to 50 KW. He advocated that the band from 41 to 44 MC be made an F. M. band and that the present 41 to 42 educational band be retained as such, but that it employ the F. M. principle. Mr. Shepard recommended that the present 26 MC broadcast band be allocated to other services. Mr. Shepard said that 15 channels would not be adequate to take care of F. M. and that the additional channels should be as near as possible to the 41 to 44 MC band. Mr. Shepard also asked that the FCC establish a policy permitting relay stations using the F. M. system, and he pointed out that, except for short lines, the cost of a telephone line to carry the wide audio band, the F. M. broadcasters have in mind would be prohibitive. Mr. Shepard said that he did not think that it would be possible to cover the large flat rural sections of the country with F. M. and that F. M. would have to be supplemented by clear channel stations in the present band. He said that where the rural areas are adjacent to centers of high population, such as New England, that F. M. could then serve the rural areas. He said that the change to Frequency Modulation will not be revolutionary but will be gradual and will take some time. He set as a rough figure, 10 years for the change over. Commander Craven asked if programs would be by and large, the same as on the standard band during the long change over period, and Mr. Shepard said, yes and no; that that will be true in some cases and that in other cases there will be a duplication.

Commissioner Thompson asked what compensation the public would get in buying an F. M. receiver and Mr. Shepard's answer was that he would receive a lower noise level with practically no static and much better quality, and that there was a normal obsolescence of about 10 per cent each year in receivers and that as people replaced their receivers they would replace them with an F. M. receiver.

Mr. Jett asked if cognizance should be taken of the present standard band in giving facilities in the F. M. band and Mr. Shepard answered that F. M. should be allowed to go ahead by itself and that anyone who could show proper qualifications, should be granted an F. M. license.

Dr. Greenleaf Whittier Pickard, consulting engineer to the Yankee network was the next witness for the F. M. Broadcasters. He outlined his observations and measurements on F. M. and A. M. He described his reception experience at his Seabrook, New Hampshire home which is about 67½ miles from Paxton and about 70 miles from Boston. Dr. Pickard explained that he compared the Paxton F. M. 2 KW station with a field of approximately 50 to 60 microvolts with the standard broadcast band stations in Boston having field intensities on the order of 1 millivolt. He said that there is little or no comparison between Paxton and the group of standard broadcast stations at Boston. He said that in the summer static breaks into the standard stations and in the winter he has considerable interference from co-channel stations. He explained that WBZ was spoiled by selective fading. Dr. Pickard said that the Paxton signal faded at times between 25 and 80 microvolts. Dr. Pickard presented Exhibit showing tests which he made on noise within a 100-mile radius of Alpine. Dr. Pickard also presented an exhibit showing measurements he had made comparing a 40 KC band with a 200 KC band. It was his conclusion that there was a voltage ratio of 5 to 1 between the narrow and the wide band for the same advantage over noise, and on this basis it would require 25 times the power with the 40 KC band to give the same advantage over noise as we would have on the 200 KC Band. He
also described an experiment from Alpine in which W2XMN on 42.8 MC was used as an interfering signal and a second 1 KW transmitter on 43 megacycle operating from the same location. The power on the 1 KW transmitter was reduced in successive steps and Dr. Pickard arrived at the conclusion that F. M. stations could operate on adjacent channels with a considerable difference in power, provided the transmitters were at approximately the same location. In response to Commissioner Craven's question as to whether we needed more measurements before we can be safe in placing stations on adjacent channels, Pickard answered that he would want to have more information before being sure that if the stations are not placed near to each other that there wouldn't be interferences, except where the distance between the stations was relatively great.

Commissioner Craven asked what Dr. Pickard considered as a proper ratio between signal and noise for good reception and he answered that he would like to have a difference of not less than 50 to 60 DB, and he continued that for average hearing for average people the idea might be dropped down to around 40 DB.

Dr. Pickard said there is some sky wave transmission at 40 MC, however, that this was not enough to bother an F. M. system but would bother an A. M. system. When asked about the use of the 26 MC band for Ultra-High-Frequency broadcasting he gave the opinion that this band would not be as well suited for broadcasting as would the frequencies in the neighborhood of 40 to 50 MC.

The next witness for F. M. Broadcasters was Mr. I. Martino, chief engineer of WDRC, of Woodbridge, Connecticut. He described measurements and tests he had conducted on W1XPW F. M. station at Meriden, Connecticut. He gave the opinion that signal values down to 7 or 8 microvolts could be used with F. M.

Mr. Daniel Gallerup, chief engineer for WTMJ, Milwaukee, described tests he had made comparing A. M. and F. M. and he said that he found that much better service could be delivered by F. M. than by the standard band.

ACCOUNTING COMMITTEE ADOPTS LOG, ACCOUNTING MANUAL

The NAB Accounting Committee held a meeting in New York, Tuesday, March 19. The entire Committee attended. Those present were C. T. Lucy, Chairman, WRVA, Richmond, Virginia; N. L. Kidd, WSYR, Syracuse, New York; E. J. Gluck, WSOQ, Charlotte, North Carolina; H. W. Batchelder, WFBQ, Baltimore, Maryland; Harry F. McKeon, NBC, New York City; and S. R. Dean, CBS, New York City. Those in attendance from Headquarters were Paul F. Peter and Robert Myers, Research Department, and Edwin M. Spence, Secretary-Treasurer.

The Committee adopted a proposed program log that will meet the requirements of the FCC rules. They also adopted an accounting manual for station bookkeeping that will facilitate securing of the necessary information in completing the FCC annual financial report.

It is hoped both of these reports will be in the mail and in the hands of station managers within the next ten days.

FREE OFFERS

The Bureau of Radio Advertising has learned that Loew's, Incorporated, is planning a new radio service which seeks the cooperation of broadcasters in plugging current MGM picture releases. It's the same old story—offering elaborate programs of Hollywood gossip, condensed versions of the latest movies, and other material "absolutely free of charge". Every program is a direct plug for motion pictures, and the Bureau has written both MGM and their distributing organization, suggesting that they would do better to spend some of that money to buy time at regular rates.

Rose City Nurseries, Springfield, Ohio, has submitted a cost-per-inquiry proposal to a large list of stations, offering to pay 50¢ for every $1.00 order. The Bureau has pointed out to this concern that the value of advertising goes beyond the mere creation of direct mail orders, and, for that reason, it might be wise to buy time at stations' quoted card rates.

Another contingent proposition reported by members is the F. A. Holmes Company, Waterloo, La. (Rat-Ruin), who offer to split 50-50 with cooperating stations on all mail orders produced. They have been advised that NAB members consider such propositions not only unethical but unbusinesslike.

Phone Headquarters!

The NAB suggests that broadcasters, upon arrival in Washington, notify the NAB switchboard of their whereabouts. This would work to their advantage, in that the NAB would know where to relay messages received for them. Also, on numerous occasions, the NAB has tried to reach members by long distance phone, only to be told they were right here in Washington.

The NAB, of course, would give no information to anyone as to the whereabouts of visitors.

The suggestion is advanced for the convenience of members and the headquarters staff. The NAB phone is National 2080.
IRNA MEETING

The IRNA executive committee met in Washington on Tuesday, March 19. Chairman Sam Rosenbaum, WFIL; Walter Damm, WTMJ; John Shepard III, Yankee Network, and Paul Morency, WTIC were present. After the meeting, Mr. Rosenbaum said:

“The situation with regard to musicians and ASCAP was discussed. Particular study was given to the increased tendency of the networks to appropriate the 20 second station breaks between 15 minute programs. This will be the subject of a communication to IRNA members at an early date. In connection with the matter of network commercial announcements, proposals will be submitted to the IRNA board for some revision of the IRNA platform to be recommended to the next convention.”

WAGE AND HOUR ACT

The Wage and Hour Act Committee will meet Monday, March 25, at headquarters to discuss recent opinions by the Wage and Hour Administration regarding “talent charges.” Joseph L. Miller, NAB Labor Relations Director, is acting chairman of the committee. Members are H. W. Batchelder, WFBR; William B. Dolph, WOL; John V. L. Hogan, WQXR, and C. T. Lucy, WRVA.

CHILDREN’S CRUSADE CAMPAIGN

Cooperation of members of the National Association of Broadcasters in the Children’s Crusade for Children will be sought during the next week, according to advice received at headquarters.

The purpose of this campaign is to produce funds, from school children of the nation, for the relief of other children throughout the world who are literally without a country. Through school officials in each community, children will be asked to contribute pennies in an amount which corresponds to their age. All such donations are to be deposited in sealed cans in school rooms so that no child will be embarrassed if he finds it impossible to contribute.

Broadcast stations will not be asked to solicit funds nor to make appeals for funds, only to make known the purposes of the campaign.

To this end, Children’s Crusade for Children has prepared 5-minute recordings featuring such speakers as Dorothy Canfield Fisher, Raymond Gram Swing and Clifton Fadiman and a series of spot announcements.

Broadcast cooperation is sought a week or two in advance of the fund collection set for April 22-30. Others cooperating in the national campaign will be newspapers, magazines and pictures.

All costs of the campaign have been defrayed by individual donors, so that all pennies collected will be made available for relief.

Expenditures will be directed by a committee consisting of Eleanor Roosevelt, Msgr. John A. Ryan, William Allen White, Hon. Irving Lehman, Dorothy Canfield Fisher, Dr. Charles B. Glenn and Caroline S. Woodruff.

NEW YORK SENATE APPROVES PERRY RECORDING BILL

On Tuesday the New York Senate passed the Perry Bill (S. 445, NAB Reports, January 26, 1940, p. 3991) relating to unauthorized recording of Radio Broadcasts. The Senate had previously amended the bill by adding to Section 1 the following subparagraph: “(d) This act is not to apply to any acts of recording for private, personal, civic or political use, or to any recording of any address or talk on subjects of a political, educational, religious or civic nature.”

STATE LEGISLATION

NEW JERSEY:

A. 336 (Artaserse) LOANS—RADIO ADVERTISEMENTS—To empower the Attorney General to investigate practices in connection with the promotion, advertisement, or negotiations by radio of the sale, purchase, or loan of money or credit; appropriates $25,000. Referred to Appropriations Committee.

NEW YORK:

A. 2298 (L. Bennett) EMPLOYMENT AGENCIES—APPLICATIONS—Provides that any waiver of investigation of references by an applicant for help shall be void, failure on part of the employment agency to make such investigation to be deemed a violation of provision requiring the keeping of register. Referred to Rules Committee.

NEW YORK:

A. 2336 (Mailier) LOANS—ADVERTISING OF INTEREST RATES—Prohibits advertising or broadcasting of interest rates on loans by licensed lenders unless rate of charge, interest charge or interest rate is expressed as a rate per centum per annum; such rate must also be expressed in all applications for loans. Referred to Rules Committee.

NEW YORK:

A. 2336 (Mailier) LOANS—ADVERTISING OF INTEREST RATES—Prohibits advertising or broadcasting of interest rates on loans by licensed lenders unless rate of charge, interest charge or interest rate is expressed as a rate per centum per annum; such rate must also be expressed in all applications for loans. Referred to Rules Committee.

NEW YORK:

CCH S 21 (Bewley) APPLE INDUSTRY—ADVERTISING—Relating to a joint legislative committee to make a comprehensive study of the New York state apple industry, with particular regard to the conduct of an intensive advertising campaign by radio and press to stimulate the purchase of New York state apples. Referred to Finance Committee.

RHODE ISLAND:

H. 1014 (Banahan) CRIMINAL LIBEL—Defining criminal libel and providing penalties therefor. Referred to Judiciary Committee.

RHODE ISLAND:

S. 252 (Brady) CRIMINAL LIBEL—Defining criminal libel and providing penalties therefor. Referred to Judiciary Committee.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings and oral arguments are scheduled before the Commission in broadcast cases during the week beginning Monday, March 25. They are subject to change.
Thursday, March 28
Oral Argument Before the Commission

WSAL—Frank M. Stearns, Salisbury, Md.—In re: Revocation of station license of WSAL.

Friday, March 29

FUTURE HEARINGS
During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

April 23
NEW—Guy S. Cornish, Cincinnati, Ohio.—C. P. for public address relay station, 310000 kc., 1 watt night, 1 watt LS, emission A-3, unlimited time.

April 29
NEW—Samuel M. Emison, Vincennes, Ind.—C. P., 1120 kc., 100 watts, unlimited time.

May 1
NEW—E. E. Krebsbach, Miles City, Mont.—C. P., 1310 kc., 100 watts, 250 watts LS, unlimited time.
NEW—Star Printing Co., Miles City, Mont.—C. P., 1310 kc., 250 watts, unlimited time.

May 20
NEW—Worcester Broadcasting Corp., San Diego, Calif.—C. P., 1420 kc., 250 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

MISCELLANEOUS

WKST—WKST, Inc., New Castle, Pa.—Granted special temporary authority to operate from 6:30 to 10 p.m. EST, on March 30, in order to broadcast a program incident to “Pioneer Week.”

WBAA—Purdue University, W. Lafayette, Ind.—Granted special temporary authority to operate from 6 to 7 p.m. CST, on April 3, 4 to 5 p.m. CST, on April 6, and from 5 to 6 p.m. CST, on April 10, 11 and 12, in order to broadcast State A. A. U. boxing finals and Purdue baseball games only.

KTSM—Tri-State Broadcasting Co., Inc., El Paso, Tex.—Granted extension of special temporary authority to operate test transmitter with power not to exceed 100 watts, on 1550 kc., day and night, in order to select transmitter site in accordance with construction permit, for the period March 25 to April 23.

WGN—WGN, Inc., Chicago, Ill.—Granted special temporary authority to broadcast the Chicago Blackhawk's v. Toronto Maple Leafs hockey game being played in Chicago Stadium from 8 p.m. to 11:30 p.m. CST, to conclusion of game on March 21. A. T. & T. lines day and night use, increase power to 50 KW, and move transmitter; frequency 1460 kc., unlimited time.

WYTV—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate with power of 250 watts, from 7:45 to 9:15 p.m. CST, on April 7, 14, 21 and 28, in order to broadcast church services only.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.— Granted construction permit to make changes in equipment.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted authority to determine operating power by direct measurement of antenna input.

WPRF—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.— Granted modification of construction permit which authorized change in frequency from 1370 to 780 kc., increase in power from 100 watts, 250 watts day, to 1 kw. 250 watts day, change hours of operation from specified to unlimited time, move transmitter, changes in equipment, and antenna, for extension of completion date from March 26, 1940, to April 26, 1940.

WJHD—The Metropolis Co., Jacksonville, Fla.—Granted modification of construction permit for new broadcast station, for approval of antenna, new transmitter, and approval of studio site and transmitter site.

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted extension of special temporary authority to make pick for radio station CKCL and feed station license of WSAL.

WHAI—John W. Haigis, Greenfield, Mass.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

WBNO—Roy L. Albertson, Buffalo, N. Y.— Granted special temporary authority to operate from 2:00 p.m. to 3:00 p.m. EST on March 23, 30, April 6, 13, 20, 1940, in order to broadcast the following sustaining programs: 2 to 2:10, Newscast; 2:10 to 2:30, Matine Mood; 2:30 to 3, Suggestions in Symphony; to operate from 2 p.m. to 3 p.m. EST on March 24, 31, April 7, 14, 21, 1940, in order to broadcast the following: 2 to 2:15, Newscast; 2:15 to 2:30, Tune Travels; 2:30 to 2:45, Sabbath Meditation; 2:45 to 3, ½ Hour in 3/4 Time; to operate from 8:30 a.m. to 10 a.m. and from 2 p.m. to 3 p.m. EST on March 20, 21, 22, 25, 26, 27, 28, and 29, 1940, in order to broadcast the following: 8:30 to 9:15 a.m., Breakfast Club; 9 a.m. to 9:30 a.m., Opening the Mail; 9:30 a.m. to 12 noon, Day at the World; 2 p.m. to 2:10 p.m., Newscast; 2:10 p.m. to 2:30 p.m., Matinees Mood; 2:30 to 3 p.m., Suggestions in Symphony (provided WSVS remains silent).

WKEU—Radio Station WKEU, Griffin, Ga.— Granted special temporary authority to operate from 3:45 p.m. to 12:00 midnight EST on March 20, 1940, in order to broadcast election returns.

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted extension of special temporary authority to operate from 6 a.m. to 10:00 a.m. EST Monday, Tuesday, Wednesday, Thursday, Friday, and Sunday mornings, for the period March 19, 1940, to not later than April 17, 1940, or until the Saginaw Broadcasting Company is in a position to use said time, in order to broadcast special non-commercial educational programs.

WSAL—Frank M. Stearns, Salisbury, Md.— Granted special temporary authority to operate from 7 p.m. to 7:30 p.m. EST on March 14, 1940, in order to broadcast speech by Howard Bruce, candidate for U. S. Senator.

WFMD—The Monocacy Broadcasting Co., Frederick, Md.— Granted special temporary authority to operate from 7 p.m. to 7:30 p.m. EST on March 14, 1940, in order to broadcast speech by Howard Bruce, candidate for U. S. Senator.

State of Minnesota—Granted petition to intervene in the hearing on the application of WNYC for modification of license to change hours of operation from daytime-WCCO to specified hours, on 810 kc.

Star Printing Co., Miles City, Mont.—Granted motion for conditional rehearing, in re application of Star Printing Co. for new station to operate on 1310 kc., 250 watts, unlimited time, and E. E. Krebsbach for a new station at Miles City, also requesting frequency of 1310 kc.
NEW—Allegheny-Kiski Broadcasting Co., Inc., New Kensington, Pa.—Construction permit for a new radio broadcast station to be operated on 1120 kc., 100 watts, unlimited time. Amended: Change frequency to 1120 kc., power to 500 watts, hours to daytime. III-B station and amended name by omitting “Inc.”, and changes in equipment.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Authority to determine operating power by direct measurement of antenna power.

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Construction permit to install new transmitter and make changes in type of transmitter.

WCOV—Capital Broadcasting Co., Inc., Montgomery, Ala.—Construction permit to make changes in transmitter and increase power from 100 watts to 250 watts day and night.

WBFB—Rock Island Broadcasting Co., Rock Island, Ill.—Construction permit to install new transmitter and increase power from 1 KW to 5 KW; directional antenna for night day. Amended re changes in equipment.

WKST—WKST, Inc., New Castle, Pa.—Construction permit to install directional antenna for night use, and change hours of operation from daytime to unlimited time, using 1 KW power day and night.

WNBX—Twin State Broadcasting Corporation, Keno, N. H.—Modification of construction permit (B1-P-2413) for changes in directional antenna to be used both day and night; move transmitter and studio; further requesting authority to make changes in directional antenna, install new transmitter, and increase power to 5 KW. Extend commencement date 30 days after grant and completion date 180 days thereafter. Amended: Equipment changes.

NEW—S. M. Meeks, Jr., Kerrville, Tex.—Construction permit for a new radio broadcast station to be operated on 1310 kc., 250 watts, unlimited time.

WFIC—J. Samuel Brody, Sumter, S. C.—License to cover construction permit (B3-P-2171) as modified for a new radio broadcast station.

WVSL—Lake Region Broadcasting Co., Lakeland, Fla.—Transfer of control of corporation from J. F. Marchant, D. J. Carey and Melvin Meyer to Florida West Coast Broadcasting Co., Inc., 98 shares.

KVIC—Radio Enterprises, Inc., Victoria, Tex.—Modification of license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.
KWIF—Curtis P. Ritchie, Pueblo, Colo.—Modification of con-struction permit (BS-P-2450) for move of transmitter, and new antenna. requesting extension of date of completion from 4-14-40 to 6-14-40.

1360 Kilocycles

KCRC—Enid Radiophone Co., Enid, Okla.—Construction permit to move transmitter and studio to a site to be determined. Enid, Okla., make antenna changes, install new transmitter, and increase power from 250 watts to 1 kW.

1370 Kilocycles

WBXY—Roy L. Albertson, Buffalo, N. Y.—Modification of license to change hours from all hours except those assigned WSVS which are 8:30 a.m. to 10 a.m., and 2 p.m. to 3 p.m., to all hours except 9:30 a.m. to 10 a.m. Monday through Friday, during school term when WSVS would operate, also all hours when WSVS is silent for holidays or vacations (facilities WSVS). Amended to request all hours except 8:30 a.m. to 10 a.m. Monday through Friday.

WJOH—Yetta G. Samford, C. S. Sheal* Thos. D. Samford, Jr., & C. S. Sheal, R. D. Samford, Jr., and F. H. Orr, d/b as Opelika-Auburn Broadcasting Co., Opelika, Ala.—Modification of construction permit (B3-P-2373) for a new station, requesting approval of studio and transmitter sites, install new equipment, and approval of antenna. Amended re equipment.

NEW—Ralph L. Lewis, Greensboro, N. C.—Construction permit for a new radio broadcast station to be operated on 1370 kc., 100 watts, unlimited time, Class IV.

1380 Kilocycles

NEW—Central Broadcasting Corp., Sanford, Fla.—Construction permit for a new radio broadcast station to be operated on 1380 kc., 250 watts, unlimited time. Requests Class IV station.

1420 Kilocycles

WGOV—E. D. Rivers, Valdosta, Ga.—Modification of construction permit (B3-P-2586) for new station, requesting approval of studio and transmitter sites at East Park Ave., Valdosta, Ga., and approval of antenna.

WELL—Enquirer-News Co., Battle Creek, Mich.—Construction permit to install new transmitter, make changes in antenna, and increase power from 100 watts to 250 watts. Amended to make changes in equipment and antenna.

WMSD—Muscle Shoals Broadcasting Corporation, Muscle Shoals City, Ala.—License to cover construction permit (B3-P-2511) for changes in equipment and increase power.

NEW—Scott Howe Bowen, Rome, N. Y.—Construction permit for a new radio broadcast station to be operated on 1420 kc., 250 watts, unlimited time, Class IV. Amended to give studio site as in or near Rome, N. Y.

NEW—R. G. LeFournour, Toccoa, Ga.—Construction permit for a new radio broadcast station to be operated on 1420 kc., 250 watts, unlimited time. Amended to give studio location as Louise Hotel, near Toccoa, Ga., and transmitter site to be determined, Toccoa, Ga.

1500 Kilocycles

NEW—Leonard L. Abess, Miami Beach, Fla.—Construction permit for a new station to be operated on 1500 kc., 250 watts, unlimited time. Request facilities of station WKAT. Contingent on WKAT being granted change in frequency.

MISCELLANEOUS

W3XMC—McNary and Chambers, Bethesda, Md.—Modification of construction permit (B1-PHB-80) for a new high frequency broadcast station, requesting move of transmitter from 4713 Hampden Lane, Bethesda, Md., to Pennsylvania Ave. and 18th St., N. W., Washington, D. C.; and extend commencement and completion dates from 12-24-39 and 6-24-40 to 10 days after grant and 30 days thereafter, respectively.

NEW—John Lord Booth, Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 15000 kc., 1000 watts, special emission for frequency modulation.

NEW—The WGAR Broadcasting Co., Cuyahoga Heights, Ohio.—Construction permit for a new high frequency broadcast station to be operated on 15200 kc., 1000 watts, special emission for frequency modulation.

NEW—Matheson Radio Co. Inc., Boston, Mass.—Construction permit for a new high frequency broadcast station to be operated on 15200 kc., 1000 watts, special emission for frequency modulation.

NEW—Lynchburg Broadcasting Corp., Lynchburg, Va.—Construction permit for a new high frequency broadcast station to be operated on 15300 kc., 1000 watts, special emission for frequency modulation.

NEW—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Construction permit for a new high frequency broadcast station to be operated on 16300 kc., 1000 watts, special emission for frequency modulation.

NEW—City Broadcasting Corp., New Haven, Conn.—Construction permit for a new high frequency broadcast station to be operated on 16300 kc., 1000 watts, special emission for frequency modulation.

NEW—E. Anthony & Sons, Inc., New Bedford, Mass.—Construction permit for a new high frequency broadcast station to be operated on 19300 kc., 1000 watts, special emission for frequency modulation.

NEW—Piedmont Publishing Co., Winston-Salem, N. C.—Construction permit for a new high frequency broadcast station to be operated on 25800 kc., 1000 watts, special emission for frequency modulation.

NEW—Southern Minnesota Broadcasting Co., Rochester, Minn.—Construction permit for a new high frequency broadcast station to be operated on 25200 kc., 1000 watts, special emission for frequency modulation.

NEW—The Baltimore Radio Show, Inc., Baltimore, Md.—Construction permit for a new relay broadcast station to be operated on 31620, 35360, 37310, 39620 kc., 100 watts, Emission A-3, Portable-Mobile area Baltimore, Md.

NEW—G. L. Burns, Brady, Texas.—Construction permit for a new relay broadcast station to be operated on 1625, 2038, 2150, 2790 kc., power 40 watts, Emission A-3, Portable-Mobile, area of Brady, Texas.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

B & T Sales Company, Indianapolis, Ind.—Howard L. Breuer and Albert L. Tribbett, trading as B & T Sales Company, Indianapolis, Ind., are alleged to represent that “Menstru-Eze” possesses...
curative and remedial properties which make it beneficial in treating delayed and painful menstruation when in fact it is without therapeutic value in such treatment. (4057)

Continental Petroleum Corporation—A complaint has been issued charging Mid-Continent Petroleum Corporation, Tulsa, Okla., with misrepresentation in the sale of its “D-X” motor fuel. The respondent operates terminals in St. Paul, Chicago, Kansas City, Mo., and Omaha.

It is alleged that the respondent corporation caused dealers in its products to represent that “D-X” motor fuel, because of the presence of an added patent nonvolatile, as compared with gasoline not so treated and as compared with other motor gasoline fuels, is more efficient, effects substantial economy in operation, reduces friction, wear and tear on cylinders and engine parts, makes the motor run smoother, cooler and more quietly, increases power and mileage per gallon of fuel, and reduces the trouble and knocking in the motor. (4065)

Ethel's Candy & Sales Company, Inc., 164 Whitehall St., S. W., Atlanta, Ga., is charged with supplying push cards with bars of candy, the prices of the candy bars being determined wholly by lot or chance. (4056)

General Electric Company, 570 Lexington Ave., New York, is charged in a complaint with misrepresentation in the sale of electric light bulbs.

It is alleged that in newspaper and other periodical advertising the respondent company made the representations implying that all or substantially all competitive products are inferior in quality to the respondent’s “G-E” bulbs; that by purchasing any bulbs other than “G-E” the purchasing public will or is likely to get inferior products the use of which will result in a 30 per cent loss of light and a 30 per cent wastage of the electricity consumed, and that a purchaser is likely to obtain bulbs that will not burn as brightly or as long as the respondent’s “G-E” lamps and cost more to operate.

Among representations allegedly made in the respondent’s advertising were: “Why risk 30% loss of light * * * when G-E bulbs cost so little?” “Thousands of New York factories, offices, stores, homes lose 30% of light. Beware of inferior bulbs! Buy G-E bulbs from your reliable neighborhood store. * * *”

It is alleged that the respondent corporation's representations are misleading and unfairly disparaging of the products of its competitors; that not all or substantially all competitive products are inferior in quality to the respondent’s “G-E” bulbs, and that a person buying bulbs other than “G-E” will not in most instances obtain lamps of lower quality than “G-E” or bulbs that will result in a 30 per cent loss of light or 30 per cent waste of the electricity used. The complaint alleges that many competitive manufacturers sell products equal in quality to the respondent’s “G-E” bulb, and that only a small percentage of the bulbs being sold to the public are of such low quality that their use will result in a 30 per cent loss of light or waste of current.

The complaint points out that approximately 80 per cent of the incandescent electric light bulbs sold in the United States for general lighting service are manufactured by the respondent and its licensees who manufacture bulbs under patents controlled by the respondent, and that of the total amount of general lighting service bulbs sold by the respondents in the United States, 75 per cent are products of the licensees not branded “G-E.” (4059)

Midwest Merchandise Company—C. J. Levin and Edward Johnson, trading as Midwest Merchandise Company, 1006 Broadway, Kansas City, Mo., are charged with selling to dealers assortments of candy and punch boards. Customers who purchased certain specified numbers received as prizes, packages of cigarettes or a replica of “Ferdinand the Bull.” (4058)

The complaint alleges that the respondent represented “Periodic Relief Pills” as a cure, remedy or competent and effective treatment for delayed menstruation, and as being safe and harmless, when in fact it possesses no therapeutic value with respect to this ailment and is not safe and harmless in that it contains extract cotton root bark, extract black hellebore, aloes, oil savin and ergot in quantities sufficient to cause serious injury if taken under prescribed conditions as advertised or under customary conditions.

The complaint also alleges dissemination of false advertisements in the respondent's failure to reveal in its advertisements that use of the preparation under conditions prescribed in the advertisements or under usual conditions may result in serious injury to the user’s health. (4066)

S. M. Laboratories Company, Seattle, Wash., is alleged to have advertised that its preparations “Neofem Capsules,” “Neofem Liquid” and “Cerene” were cures or remedies or competent and effective treatments for painful and delayed menstruation and constituted safe and sane ways of self-medication when such were not the facts. The complaint charges that the drugs ergot, oil of savin and aloin were present in quantities sufficient to cause serious and irremediable injury to health if used under conditions prescribed in the advertisements or under usual conditions. The respondent company is charged with having disseminated false advertisements which failed to reveal the consequences which might result from use of the preparations under the prescribed conditions as advertised or under customary conditions. (4062)

Sekov Corporation—A complaint has been issued against Sekov Corporation, 6404 Hollywood Blvd., Hollywood, Calif., and Edwin H. and Hazel Ruth Vokes, as officers of the corporation and as individuals trading under the name Sekov Reducing Studios. The complaint charges misleading representations concerning “Sekov Reducer,” a preparation sold as an obesity treatment and alleged to contain extract of thyroid, a dangerous drug.

The Commission recently obtained a preliminary injunction in the United States District Court for the Southern District of California restraining these respondents from further dissemination of false advertising of their product pending issuance of a complaint by the Commission and final disposition of its case.

The Commission complaint now alleges that the respondents disseminated advertisements representing that their preparation, “Sekov Reducer” or “Sekov” is a scientific treatment for obesity and that it guards the health of the user, acts entirely on a corrective principle, is made for reaching the glands whose faulty function is the cause of most overweight, and regulates the action of the glands in the body gradually.

Other representations alleged to have been made were that, unlike harsh methods of reducing, the respondents' product does not contain cathartics or dangerous drugs, does not reduce by merely tearing down fatty cells, takes off the fat without weakening the body, is especially prepared to be effective in reducing practically all cases of overweight, and reduces by normalizing the body.

The complaint charges that the respondents’ claims are in excess of actual accomplishments; that their preparation is not a scientific treatment for obesity when administered without a thorough medical examination and without scientific care and observation, and that it constitutes a treatment for obesity only when used by persons suffering from hypothyroidism. The preparation, contrary to the respondents' representations, is alleged to be a harsh or strenuous method of reducing and to contain cathartic and dangerous drugs in that “Capsule No. 1” of the preparation contains rhubarb, cascara sagrada, aloin and bile salts, all cathartics.

It is further alleged that the respondents' failure to reveal the presence of extract of thyroid and the consequences which may result from use of their commodity under the prescribed conditions advertised or under customary conditions, constitutes false advertising. (4061)

Sekov Reducing Studios—See Sekov Corporation.

Stromberg Ignition Company—Henry O. Striker, trading as Stromberg Ignition Company, Detroit, Mich., engaged in the manufacture and sale of an automotive device designated “Stromberg Condenser” and sometimes as “Stromberg” Master Condenser,” is charged in a complaint with misrepresentation.

March 22, 1940 4120
In the course of his business, the complaint charges, the respondent has caused to be inserted in circulars, handbills, on cartons containing his products, and on the product itself, distributed through the various states, printed matter containing representations such as: "Saves Oil—Most car owners things will every 500 miles, because gasoline (unburned) leakage thins the lubricant. The STROMBERG MASTER CONDENSER burns all the gasoline, stops the leakage completely, so that oil can often be used for 2,500 miles or more"; "SPECIAL 30-DAY OFFER, Stromberg Ignition Co., Detroit, Mich. Please mail me one Stromberg Condenser at the special price, $1.50"; "This is a genuine 'Stromberg' product * * * when the name Stromberg is on it, whether it be a radio, carburetor, or this merchandise, you do not have to be afraid to buy it because it is good merchandise," and "The Stromberg condenser is endorsed and approved by the Automotive Engineers Association of America."

The Stromberg Carburetor Company, the complaint continues, beginning in May, 1907, was a corporation doing business under the laws of Illinois, with its factory and principal place of business in Detroit. In April, 1930, the business operated under the name Stromberg Carburetor Company was taken over by the Bendix Stromberg Carburetor Company, which continued the business and the sale of the products under the name "Stromberg." The Bendix Stromberg Carburetor Company is now engaged in the manufacture of carburetors, coils and various other automobile accessories. These companies have built up a valuable good will in the name "Stromberg," as applied to these products.

The respondent, without authority, has caused his products to be marked and branded with the name "Stromberg" and now uses and features the word "Stromberg" as a trade name, according to the complaint.

The statements and representations set forth by him, the complaint continues, are false and misleading, as in fact the automotive devices which the respondent sells will not increase the power of the motor, eliminate spark plug trouble or save either oil or gasoline and the devices have no beneficial effect at all on the operation of a gasoline motor, nor do they improve the ignition system. The price of $1.50 at which the device is offered in a so-called special offer is not in any sense a special price which is good for only 30 days, as in truth the price is in excess of the price at which the device is customarily sold. The respondent's product, the complaint continues, has not been approved or endorsed by a recognized automotive association or a recognized automotive engineering association which has the necessary laboratory equipment for testing automotive devices, and use by the respondent of the word "Stromberg," as a trade name and in advertising has a tendency to confuse, mislead and deceive purchasers into the erroneous belief that the product so designated is the product of the well and favorably known Bendix Stromberg Carburetor Company. (4064)

United Candy Company—E. T. James, Jr., trading as United Candy Company, 1507 West Trade St., Charlotte, N. C., is charged with selling to dealers assortments of candy with push cards, the prices of the candy bars being determined wholly by lot or chance. (4060)

Warner's Renowned Remedies Company, Minneapolis, Minn., in the sale of "Warner's Renowned Prescription No. 6" and "Warner's Renowned Alkaline Douche Tablet," is alleged to represent that its preparations are cures or remedies and competent and effective treatments for functional sterility; that they possess beneficial properties in relation to the functioning of the female reproductive organs, and that they will relieve discomforts associated with the menstrual period. The complaint alleges that the respondent's representations are exaggerated and untrue and that the respondent's preparations have no therapeutic value in treatment of the female organs or in relieving any form of functional sterility. (4063)

CEASE AND DESIST ORDERS

Following cease and desist orders have been issued during the past week:

American Distributors, Inc., and John H. Morgan, trading as Champion Products Company, both of Linton, Ind., and United Advertising Companies, Inc., Chicago, have been ordered to cease and desist from misrepresentation in the sale of "Vita-Perles," a medicine claimed to contain Vitamins A, B-1, D, G, and E.

Findings are that John H. Morgan was in business under the name Champion Products Company, Detroit, Mich., and in August, 1938, when he organized American Distributors, Inc., for the sale of the preparation. United Advertising Companies, Inc., has been the respondents' advertising agent and has participated in the preparation and dissemination of their advertising matter.

In advertisements and other printed matter, the respondents have represented that the preparations are found to have represented directly and by implication, among other things, that one may test Vita-Perles without risking any money; that vitamin deficiency is the cause of backache, headache, loss of appetite, premature old age and other ailments and conditions; that by use of Vita-Perles a thin, pale and sickly person will gain firm and healthy flesh and gain in weight as much as seven pounds in seven days. The Commission finds that the respondents' representations are misleading and exaggerated.

The respondents are ordered to cease and desist from representing that the preparation may be obtained and tested without risking the loss of any money; that backache, headache, leg pains, and various other ailments are caused by a vitamin deficiency or that such conditions will be relieved or corrected by the use of the respondents' preparation; that those who are thin, pale and sickly will by the use of the preparation acquire additional weight, an improved appetite and relief from colds and infections, an improved appetite or become less nervous; that the impairment or premature loss or sexual desire, vigor, or potency in the male, is due to a vitamin deficiency, or will be restored or improved by the use of the preparation, or that its use will increase the general health and energy, and that the preparation will affect women's ability to successfully conceive or bear children except in rare cases involving habitual involuntary abortion where inability to successfully bear children after conception may be due to a deficiency of Vitamin E of a degree susceptible of replacement by the Vitamin E content of the preparation. (3918)

American Veneer Package Association, Inc., Washington, D. C., its officers, and four regional associations of the fruit and vegetable container industry, their officers and members, and a New York business management and engineering group, have been served with an order directing them to cease and desist from a combination or conspiracy for fixing and maintaining uniform prices and discounts and for curtailing production and other practices deemed to be in restraint of competition.

Members of the respondent regional associations are found to manufacture and sell approximately 75 per cent of all the veneer containers used in their territories for packaging fruits and vegetables, with the possible exception of wire-bound and sawed crates. (3556)

Anesthetic Laboratories, Inc., a corporation, formerly Guild Anesthetic Laboratories, 2457-2459 South Michigan Ave., Chicago, engaged in the manufacture, sale and distribution of a medicinal preparation known as "GUILD Procaine Epinephrine Anesthetic," has been ordered to cease and desist from representing that it is a product of a group of persons engaged in kindred pursuits, and other than a commercial business existing or operating for profit.

The respondent corporation was originally incorporated in 1937 under the name of Anesthetic Advancement and Research Guild, Inc., and within the last year changed its name to Guild Anesthetic Laboratories, Inc., and subsequently to Anesthetic Laboratories, Inc.

In advertisements concerning its medicinal preparation, which is used as a local anesthetic by purchasers such as practicing dentists, physicians and dental colleges throughout the States, the Commission finds, the respondent has represented, among other things that "In its serious efforts to help the Dental Profession the GUILD feels that its policy of education and enlightenment should include, wherever an item is not equitably priced, the production in its own fully equipped laboratory of the EQUIVALENT OR BETTER of the item involved that it may thus offer to the dentist at the lowest possible price." In certain of the respondent's printed matter, the Commission finds, the word "gild." when used in the corporate or trade name, was set out in a different type of lettering with the effect of stressing and directing the attention of the reader to the word "gild."

The respondent corporation is ordered to cease and desist from representing in any manner that it is a guild or association of
persons engaged in kindred pursuits for mutual protection, aid and cooperation, or that it is anything other than a commercial business existing or operating for profit; that the respondent is impartially engaged in research for the purpose of advancement of the science of anesthesia, or that the respondent operates for the benefit, education or enlightenment of the medical and dental professions.

The respondent is also directed to cease using the word "guild" or any term of similar import or meaning to describe or in any way refer to its business or products, including use of the word "guild" as part of its trade or corporate name or as part of the brand name of its products. (3816)

Champion Products Company—See American Distributors, Inc.

Jean Ferrell, Inc.—An order has been issued against Jean Ferrell, Inc., 112-114 East Walton St., Chicago, prohibiting mis-representation in the sale of "Concentra," advertised as a concentrated food for treating obesity and as a tonic.

Advertising matter issued by the respondent company referred to its product as being a highly concentrated food, safe for use, and, with the addition of liquids, as constituting a balanced diet capable of replacing the ordinary diet, according to findings. The preparation was also advertised as supplying deficiencies to the body, the findings continue, and as correcting overweight and underweight and eliminating poisons from the body by action of its rhubarb content and poisons from the kidneys because of its gravel root content.

Findings are that the respondent's representations were exaggerated and untrue; that the preparation is not a food, and that, because of its high content of rhubarb, it is a drug and not safe to use. The respondent has also been found to have disseminated false advertisements in that it failed to reveal that use of its product under conditions prescribed in advertisements or under customary conditions may in some cases result in serious injury to health.

The order directs the respondent to cease and desist from disseminating advertisements which represent that "Concentra" is a concentrated food for treating obesity and as a tonic. (3815)

Gould Anesthetic Laboratories—See Anesthetic Laboratories, Inc.

United Advertising Companies—See American Distributors, Inc.

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Biovegin Products, Inc., trading as V. M. Products, Chicago, Ill., in the sale of "Neural-Aid," agrees to cease advertising that the preparation is a nerve food or a competent treatment or effective remedy for nervousness, neuralgia, nerve fatigue, constipation, nervous insomnia, constant worry, muscular aches or pains or disturbances of the nervous system, or for neuritis unless the last named representation is limited to the preparation's aid in the treatment of peripheral neuritis, alcoholic neuritis, neuritis due to anemia, neuritis of pregnancy or neuritis of pellagra. The respondent also agrees to cease using the word "Neural" as part of the trade name of the product. (02526)

Biovegin Products, Inc., in a second stipulation, agrees to desist from representing that its product "Myacin" kills or ends pain or from otherwise implying that it will afford more than temporary relief from pain associated with rheumatism, arthritis, neuritis, sciatica, gout or lumbago; that it contains no harmful or habit forming drugs or affords safe relief, and that its formula originated in Europe or is used by thousands of American doctors and hospitals. The stipulation relates that the respondent's preparation contains an ingredient which has a tendency to be harmful and habit forming. (02528)

Alonzo O. Bliss Medical Company, 1811 Columbia Road, Washington, D. C., engaged in selling a medicinal preparation designated "Bliss Native Herb Tablets," agrees to cease representing by use of the word "quickly", or any other word of similar import, that the said product will give immediate relief for, or, by the use of the words "positive relief" or similar words that the product relieves upset stomach, gas bloating pains, acid risings, lost appetite, sour stomach, and headache, due to constipation or other causes; and that the product will flush the bowels or kidneys, stimulate the liver, cause a faster elimination of kidney waste, or is a treatment for the stomach, unless the last mentioned representation is limited to such influences as it might have as a stomachic. (02525)

Curtis, Owen, Fuller Corporation—See Owen-Fields, Inc.

East Coast Fisheries, Inc.—Stipulation has been accepted from East Coast Fisheries, Inc., 360 West Flagler St., Miami, Fla., to discontinue misleading representations in the sale of certain seafood.

In the sale of its products the respondent agrees to cease using the word "lobster" as descriptive of a species of food fish other than that properly known as "lobster," unless such word is accompanied in equally conspicuous type by appropriate language identifying the species or locality of the product sold.

The stipulation points out that the American lobster, also known as the Northern lobster, is found only along the North American Coast from North Carolina to Labrador; that it is more abundant and attains its greatest size in the northern part of its range in Eastern Maine and the Maritime Provinces, and that this lobster is the only one known as a "lobster". Another food fish found in Southern waters is variously referred to as sea crayfish, spiny lobster, rock lobster, and southern lobster. The term "lobster," however, has long been associated in the minds of the consuming public with the Northern lobster.

The stipulation recites that the respondent company advertised certain seafood as "Fresh Packed Lobster Meat" without proper qualification to describe spiny lobster or sea crayfish or other product not the Northern lobster. (2707)

Gemal Handkerchief Company—Jack M. Gemal, trading as Gemal Handkerchief Company, 389 Fifth Avenue, New York, N. Y., engaged in the sale and distribution of handkerchiefs, has agreed to cease describing or referring to himself as a "manufacturer" of handkerchiefs or other merchandise when he neither owns, operates nor directly and absolutely controls the plant or factory in which the goods sold by him are made. (2705)

General Handkerchief Company, Inc., 389 Fifth Avenue, New York, N. Y., in connection with its sale and distribution of handkerchiefs or other merchandise, agrees to cease and desist from designating, describing or referring to itself as a "manufacturer" of handkerchiefs or other merchandise when it neither owns, operates nor directly and absolutely controls the plant or factory in which the goods sold by it are made, or in any manner representing that it has a manufacturing plant of its own for the production of these or other goods or merchandise when such is not the fact. (2706)

Hudgins Fish Company—Modified stipulation has been accepted from Hudgins Fish Company, 612 North Olive Ave., West Palm Beach, Fla., concerning use of the word "lobster". In July, 1939 the respondent agreed to discontinue representing sea crayfish by means of certain names containing the word "lobster". In its modified stipulation it agrees to discontinue use of the word "Lobster" or the words "Lobster Meat" or "Lob. Meat" as de-

March 22, 1940 4122
London House, Ltd., New York, N. Y., agrees that in the sale of its products it will cease using the words "London House, Ltd.," as and for its corporate and trade name, the address "London" on its trade stationery, the words "London House," in its advertising matter, or picturizations of English characters or scenes, implying that this New York corporation is a London house or company, or manufactures products or conducts business or maintains a branch in London, or that merchandise made in the United States is of English or other foreign origin and imported into the United States, when such are not the facts. (2708)

Maritime Milling Company, Inc., 1009 Chamber of Commerce, Buffalo, N. Y., engaged in selling stock and poultry feeds designated "Bull Brand Dairy Rations" and "Bull Brand Vitamized Complete Starter Ration," has agreed to cease and desist from representing that Bull Brand Dairy Rations alone keeps herds in better physical condition or milk production at consistently higher levels, or is the feed of champions, and that Bull Brand Vitamized Complete Starter Ration alone builds into chicks increased livability, better feathering and pigmentation, or larger or sturdier bodies, or that the use of the complete Bull Brand poultry feeding program assures more eggs, more profit or more money. (02523)

Owen-Fields, Inc.—Misleading representations in the sale of advertising material consisting of cuts, mats and printed matter will be discontinued under a stipulation entered into by Harry J. Baruch and two corporations, Owen-Fields, Inc., and the Curtis, Owen, Fuller Corporation, 916 Walnut St., Kansas City, Mo., engaged in the sale of such material. The respondent Baruch is manager and active directing head of the two corporations.

In promoting sales, the individual and corporate respondents, through their canvassing salesmen, made statements to the effect that the advertising material sold by certain competitors was copied from the respondents' copyrighted features and that the purchasers of such "copied" advertising material would become involved in actions at law by reason of using it, according to the stipulation. As a result of such intimidation, the stipulation relates, many advertisers cancelled or attempted to cancel their existing contracts with such competitors.

In their stipulation, the respondents agree to desist from the representation that the advertising material sold by certain competitors was copied from the respondents' copyrighted features and that the purchasers of such "copied" advertising material would become involved in actions at law by reason of using it, according to the stipulation. As a result of such intimidation, the stipulation relates, many advertisers cancelled or attempted to cancel their existing contracts with such competitors.

In their stipulation, the respondents agree to desist from the representation that the advertising material sold by certain competitors was copied from the respondents' copyrighted features and that the purchasers of such "copied" advertising material would become involved in actions at law by reason of using it, according to the stipulation. As a result of such intimidation, the stipulation relates, many advertisers cancelled or attempted to cancel their existing contracts with such competitors.

Quality Chemical Company—Harold C. Breckenridge, 20030 Russell St., Detroit, Mich., trading as Quality Chemical Company and engaged in selling a furniture polish designated "Scientific," certain cosmetics designated "Delora Alice Skin Lotion," "Delora Alice Fine Perfumes," "Flower of the Orient," and "LaFrance," and food products under the general heading "Magic Concentrates" designated "French Chef Flavors," "French Chef Spices," "French Chef Table Syrups" and "French Chef Food Colors," agrees to cease representing that "Scientific" contains a secret ingredient or that Delora Alice Skin Lotion is healing or that it has a healing action. Harold C. Breckenridge further agrees to cease using the word "French" as descriptive of any of his products neither made in France nor composed chiefly of French ingredients; from using the words "La France" and "Orient" as descriptive of any of his perfumes not made in or not composed chiefly of ingredients from France or the Orient, and to desist from using the words "Pure Ingredients" as descriptive of any product that is synthetically flavored to imitate the real and true flavor. The respondent further agrees to cease using the title "President" or otherwise representing that the business conducted by him as an individual is a corporation or an association. (02524)

Reid Electric Mfg. Co., 543 North Cicero Ave., Chicago, selling "Reid Electric Fencer," an electric controller for use with wire fencing, has entered into a stipulation to cease and desist from misleading representations.

Among representations which the respondent agrees to discontinue are that the use of its device with a single strand of wire, will hold all livestock; that use of the product, in comparison with other types of fencing, will reduce the cost of fencing unless, in this representation, the type of fencing with which comparison is made is clearly indicated, and that the Reid Electric Fencer embodies a new construction principle. (02529)

Schweizer Tee—Robert J. Schwyn, trading as Schweizer Tee, Chicago, Ill., stipulates that he will cease representing that the preparation "Schweizer Tee," is competent or effective for treating diabetes; is prescribed or recommended by doctors; helps the organs to function normally, and effects a reduction of sugar or makes a broader diet possible. (02527)

W. F. Touliason Company, Danbury, Conn., agrees to desist from the representation that its concrete burial vaults are "as enduring as the ages," "as durable as solid granite," or constructed "to last forever"; that either the material used or the type of construction will insure complete protection against moisture, vermin or all other severe underground dangers to which a vault may be exposed, and that an immersion test in water for a limited time, or any similar demonstration is "dramatic proof" or furnishes conclusive evidence that such vaults will permanently remain waterproof or will afford enduring or permanent protection to the caskets or bodies encased therein under the conditions of use. (2709)

FTC CASE CLOSED

The Federal Trade Commission has closed its case against Colonial Enterprise Company, Inc., 10 West 37th St., New York, which has been charged with the use of lottery methods in the sale of its merchandise.

The respondent corporation was dissolved February 14, 1940.

The case was closed without prejudice to the Commission's right to reopen it and resume prosecution, should future facts so warrant.
A Letter to All Broadcasters

In spite of the taunts and sneers of ASCAP, BMI, only recently organized, forced ASCAP's hand and proposals intended to be made public in December 1940, were announced on March 21st. Although, upon first reading, these proposals may appear attractive especially to the small stations, a careful study reveals that it is ASCAP's purpose to divide the industry so as to levy increased tribute. Also, by the continuation of the blanket tax on gross receipts, eliminate the incentive to the development of non-ASCAP music and thereby perpetuate ASCAP's monopoly in the music field.

The proposal, although indefinite in many aspects, is sufficiently definite to outline ASCAP's general views concerning the terms for renewal of licenses, and the proposal, plus ASCAP's actions, clearly indicates that although lip service is given to the idea of negotiation, in effect, ASCAP has summoned its largest customer to another Munich and dictated the terms of surrender.

In studying the proposal, it would be well to keep in mind at least the following facts. Briefly analyzed, ASCAP's proposal demands a payment of approximately $8,500,000 for 1941. This means that, considering the reasonable expected increase in business, over the next ten years broadcasters will pay a total of at least $100,000,000, not for the purchase of ASCAP catalogues, but merely for the use of same. Without consideration of the stations' views, operating problems or other interests, and without consultation with the industry, ASCAP rejects the "per program" basis of payment. We shall continue to pay on news broadcasts, sports events, programs of classical music and other programs containing no ASCAP music. Regardless of the decline in the use of music, we pay the same percentage; regardless of the popularity or merit of ASCAP music or the development of other sources of music, we pay the same percentage of our gross to ASCAP.

ASCAP recognizes the principle of clearance at the source, but without any consultation with the industry as to a feasible or equitable plan, announces a plan designed to divide the industry into warring groups. No one group within the broadcasters' ranks is obligated to fight the battles of any other group, yet we know that the interests of all are related, that an additional burden of $3,500,000 placed upon the industry, regardless of where it first falls, later adjustments will spread the burden over most of the industry. The networks have definitely stated that they cannot accede to the terms and the question immediately arises of the value of an ASCAP license to the affiliates and even to the independents if ASCAP tunes are not played on the networks.

Last July, the broadcasters decided to definitely solve the copyright problem, BMI has been incorporated, 284 stations have pledged $1,253,189.05, a staff has been organized, contacts made within the music field, and we are on our way for once to really construc-
A LETTER TO ALL BROADCASTERS
(Continued from page 4125)

tively solve one of our most troublesome problems. The real danger which threatens the industry today is that the apparent attractive features which are dangled before the industry in the ASCAP proposal may tempt some to accept temporary benefits rather than to continue the fight for a permanent solution.

My advice to each broadcaster is to study the proposal carefully, especially regarding the effect upon affiliates in the absence of any agreement between networks and ASCAP, the effect upon independents in the absence of agreements with networks and affiliates with ASCAP, the effect upon our efforts to ever secure a "per program" basis of payment and the opportunity to develop non-ASCAP music, and the effect upon BMI.

In the future, we shall have other problems to meet on an industry wide basis. BMI has already produced some tangible results. Shall we grab the first benefits and live to regret not ascertaining the full possibilities of industry wide cooperation.

Lastly, may I suggest that you write me your personal views and suggestions, so that we may have the advantage of your judgment as to our future action.

Very truly yours,

Neville Miller, President

ST. FRANCIS HOTEL PICKED FOR NAB CONVENTION

The NAB convention, August 4-7, will be held at the St. Francis Hotel in San Francisco. Arrangements were completed this week.

SUPREME COURT DECIDES ON ECONOMIC INJURY THEORY

The Supreme Court on Monday handed down its decision in the much discussed case of FCC v. Sanders Brothers Radio Station, argued on February 9, 1940. It upholds the principal contention of the FCC, namely, that the Commission is not required to weigh and make findings as to economic injury to an existing station in passing on an application for a broadcast license. The opinion, delivered by Mr. Justice Roberts, stated that if economic loss were a valid reason for refusing a license it would mean that the Commission's function is to grant a monopoly in the broadcasting field, a result which section 311 of the Communications Act expressly negatives, and which Congress would not have contemplated without granting the Commission powers of control over the rates, programs, and other activities of the business of broadcasting.

The Court points out that the question of competition between a proposed station and an existing one is not to be entirely disregarded by the Commission, and makes it clear that under the Communications Act the Commission has no supervisory control of programs, business management or policy of licensees, or any power to regulate rates and charges or suppress wasteful practices due to competition.

The decision overrules the Commission's contention that an existing licensee has no right to appeal from an order of the Commission granting a new license. The court reaches the conclusion that while the economic injury to the existing station would not be the subject of redress, the existing station might be the instrument, upon appeal, of redressing an injury to the public service which would otherwise remain without a remedy.

Some of the language of the opinion is most interesting on the question of the Commission's control over program content. "The Commission is given no supervisory control of the programs, of business management or of policy," and again "Congress intended . . . to permit a licensee who was not interfering electrically with other broadcasters to survive or succumb according to his ability to make his programs attractive to the public." It would seem, therefore, that the Court expressly recognizes that as a corollary to free competition in broadcasting, the stations may put on whatever programs they choose, outside the specific restrictions of the Communications Act itself, in order to compete for listeners and to survive economically.

The facts of the case are set forth in the opinion which is printed below:

SUPREME COURT OF THE UNITED STATES

No. 499—October Term, 1939.

FEDERAL COMMUNICATIONS COMMISSION, Petitioner, vs. SANDERS BROTHERS RADIO STATION.

On Writ of Certiorari to the United States Court of Appeals for the District of Columbia.

March 25, 1940.

Mr. Justice Roberts delivered the opinion of the Court.

We took this case to resolve important issues of substance and procedure arising under the Communications Act of 1934, as amended.1

March 29, 1940

January 20, 1936, the Telegraph Herald, a newspaper published in Dubuque, Iowa, filed with the petitioner an application for a construction permit to erect and operate a broadcasting station in that city. On May 14, 1936, the respondent, who had for some years held a broadcasting license for, and had operated, Station WKBB at East Dubuque, Illinois, directly across the Mississippi River from Dubuque, Iowa, applied for a permit to move its transmitter and studios to the last named city and to install its station there. At August 18, the respondent asked leave to intervene in the Telegraph Herald proceeding, alleging in its petition, inter alia, that there was an insufficiency of advertising revenue to support an additional station in Dubuque and insufficient talent to furnish programs for an additional station; that adequate service was being rendered to the community by Station WKBB and there was no need for any additional radio outlet in Dubuque and that the granting of the Telegraph Herald application would not serve the public interest, convenience and necessity. Intervention was permitted and both applications were set for consolidated hearing. The respondent offered no evidence in support of its respective applications. The respondent’s proof showed that its station had operated at a loss; that the area proposed to be served by the Telegraph Herald was substantially the same as that served by the respondent and that, of the advertisers relied on to support the Telegraph Herald station, more than half had used the respondent’s station for advertising.

An examiner reported that the application of the Telegraph Herald should be denied and that of the respondent granted. On exceptions of the Telegraph Herald, and after oral argument, the broadcasting division of the Commission by order dated September 18, 1936, expressly recited that the division, in granting the application, reciting that “public interest, convenience, and necessity would be served” by such action. The division promulgated a statement of the facts and of the grounds of decision, reciting that both applicants were legally, technically, and financially qualified to operate a broadcasting station in Dubuque, and that there was need in Dubuque and the surrounding territory for the services of both stations, and that no question of electrical interference between the two stations was involved. A rehearing was denied and respondent appealed to the Court of Appeals for the District of Columbia. That court entertained the appeal and held that one of the issues which the Commission should have tried was that of alleged economic injury to the respondent’s station by the establishment of an additional station and that the Commission had erred in failing to make findings on that issue. It decided that, in the absence of such findings, the Commission’s action in granting the Telegraph Herald permit must be set aside as arbitrary and capricious.

The petitioner's contentions are that under the Communications Act economic injury to a competitor is not a ground for refusing a broadcasting license and that, since this is so, the respondent was not a person aggrieved, or whose interests were adversely affected, by the Commission’s action, within the meaning of Section 402(b) of the Act which authorizes appeals from the Commission’s orders.

The respondent asserts that the petitioner in argument below contended itself with the contention that the respondent had failed to produce evidence requiring a finding of probable economic injury to it. It is consequently insisted that the petitioner is not in a position here to defend its failure to make such findings on the ground that it is not required by the Act to consider any such issue. By its petition for rehearing in the court below, the Commission made clear its position as now advanced. The decision of the court below, and the challenge made in petition for rehearing and here by the Commission, raise a fundamental question as to the function and powers of the Commission and we think that, one way or the other, it is open here.

First, we hold that resulting economic injury to a rival station is not in and of itself, and apart from considerations of public convenience, interest, or necessity, an element the petitioner must weigh and as to which it must make findings in passing on an application for a broadcasting license.

§307(a) of the Communications Act directs that “the Commission, if public convenience, interest, or necessity will be served thereby, subject to the limitations of this Act, shall grant to any applicant therefor a station license provided for by this Act.” This mandate is given to the Commission to determine whether the provisions of the statute and the subject matter with which it deals are fulfilled. The Act contains no express command that in passing upon an application the Commission must consider the effect of competition with an existing station. Whether the Commission should consider the

4 Sanders Brothers Radio Station v. Federal Communications Commission, 106 F. (2d) 321.

The policy of the Act is clear that no person is to have anything against competition but to protect the public. Congress intended to leave competition in the business of broadcasting where it found it, to permit a licensee who was not interfering electrically with other broadcasters to survive or succumb according to his ability to make his programs attractive to the public.

This is not to say that competition between a proposed station and one operating under an existing license is to

4 See Title II, §§ 201-221, 47 U. S. C. §§ 201-221.
5 See § 308(b), 47 U. S. C. § 308(b).

4127 March 29, 1940

Due to several indefinite features of the ASCAP proposal it is possible only to estimate what it would mean to the broadcasters in dollars and cents.

The industry paid ASCAP $3,878,752 in 1937, the most recent year for which figures are available. Under the ASCAP proposal, broadcasters would have paid $6,508,036.

Projected to the business reasonably expected to be realized in 1941, it is estimated that the proposal would require payment of $8,500,000 in that year.
be entirely disregarded by the Commission, and, indeed, the Commission's practice shows that it does not disregard that question. It may have a vital and important bearing upon the ability of the applicant adequately to serve his public; it may indicate that both stations—the existing and the proposed—will go under, with the result that a portion of the listening public will be left without adequate service; it may indicate that, by a division of the field, both stations will be compelled to render inadequate service. These matters, however, are distinct from the consideration that, if a license be granted, competition between the licensee and any other existing station may cause economic loss to the latter. If such economic loss were a valid reason for refusing a license this would mean that the Commission's function is to grant a monopoly in the field of broadcasting. If the Act itself expressly provides that Congress would not have contemplated without granting the Commission powers of control over the rates, programs, and other activities of the business of broadcasting.

We conclude that economic injury to an existing station is not a separate and independent element to be taken into consideration by the Commission in determining whether it shall grant or withhold a license.

Second. It does not follow that, because the licensee of a station cannot resist the grant of a license to another, on the ground that the resulting competition may work economic injury to him, he has no standing to appeal from an order of the Commission granting the application.

§402(b) of the Act provides for an appeal to the Court of Appeals of the District of Columbia (by an applicant for a license) or (2) "by any other person aggrieved or whose interests are adversely affected by any decision of the Commission granting or refusing any such application."

The petitionist insists that as economic injury to the respondent was not a proper issue before the Commission it is impossible that §402(b) was intended to give the respondent standing to appeal, since absence of right implies absence of remedy. This view would deprive subsection (2) of any substantial effect.

Congress had some purpose in enacting §402(b) (2). It may have been of opinion that one likely to be injured by the issue of a license would be the only person having a sufficient interest to bring to the attention of the appellate court errors of law in the action of the Commission in granting the license. In this view, while the injury to such person would not be the subject of reedress, that person might be the instrument, upon an appeal, of redressing an injury to the public service which would otherwise remain without remedy. It is within the power of Congress to confer such standing to prosecute an appeal.

We hold, therefore, that the respondent had the requisite standing to appeal and to raise, in the court below, any relevant question of law in respect of the order of the Commission.

Third. Examination of the findings and grounds of decision set forth by the Commission discloses that the findings were sufficient to comply with the requirements of the Act in respect of the public interest, convenience, or necessity involved in the issue of the permit. In any event, the findings not as detailed upon this subject as might be desirable, the attack upon them is not that the public interest is not sufficiently protected but only that the financial interests of the respondent have not been considered. We find no reason for abrogating the Commission's order for lack of adequate findings.

Fourth. The respondent here renews a contention made in the Court of Appeals to the effect that the Commission used as evidence certain data and reports in its files without permitting the respondent, as intervener before the Commission, the opportunity of inspecting the same. The Commission disavows the use of such material as evidence in the cause and the Court of Appeals has found the disavowal veracious and sufficient. We are not disposed to disturb its conclusion.

The judgment of the Court of Appeals is reversed.

Mr. Justice McReynolds took no part in the decision of this case.

EDWIN M. SPENCE RESIGNS AS NAB SECRETARY-TREASURER

Edwin M. Spence, Secretary-Treasurer of the NAB today presented his resignation to the Board of Directors through President Neville Miller. The resignation is to become effective May 1.

C. E. ARNEY, JR., APPOINTED ASSISTANT TO MILLER

Neville Miller today announced the appointment of C. E. Arney, Jr., public relations director of KOMO-KJR, Seattle, as assistant to the president of the NAB, effective April 1.

Mr. Arney will leave for the east next Monday, conferring with members in and near San Francisco, Los Angeles, Salt Lake City, Denver, Kansas City and Chicago en route. He will arrive in Washington about April 15.

Mr. Arney was born January 9, 1891. He received his grade school and high school education in Pocatello and Boise, Idaho, and Washington, D. C. Graduated with an LL.B. degree from the University of Washington in 1915, he spent the next three years in the United States Attorney General's office in Washington.

He then returned to the Northwest where he engaged in association work with various organizations until 1932 when he became editorial commentator and news reporter on Station KOL. Since then he has engaged in various radio activities, including the conducting of radio programs from the state capitol. At present, he is public relations director for KOMO-KJR, Seattle.

Mr. Arney is married and has twin daughters.

FM HEARING

Thursday, March 21

The FCC hearing on "High Frequency" was resumed Thursday when Chairman Fly recalled Dr. Pickard to the stand. Dr. Pickard was questioned about the characteristics of 26 MC and 40 to 50 MC bands. He said that on 26 MC there is a skip distance of approximately 800 miles and that day transmissions on the order of thousands of miles could be expected. He said that as far as ground wave is concerned the two bands are quite similar. Dr. Pickard said that the diffraction effects are not as pronounced in the 26 MC band and therefore a more uniform field is produced. Dr. Pickard said that there was more static at 26 MC than in the 40 to 50 MC band. When Dr. Pickard was on the stand Wednesday he testified that the 40 to 50 MC band would be more suitable for broadcasting than would be the 26 MC band, and he was asked what would be the most feasible use for the 26 MC band, and he suggested that it might be used for special services, such as forestry, police, and possibly aviation. Commissioner Brown wanted to know if it would be extra expense in the
receiver if part of the FM band was around 26 MC and the rest in the 40 to 50 MC region and the answer was yes, and that there also was nothing over 100 MC. Mr. deMars described a number of areas and the Schenectady transmitter had an interference free distance of three miles. He then made the same test with Amplitu
de Modulation and found that the Albany station had a range of about 3.5 miles and the Schenectady transmitter a range of about 6 miles. Mr. deMars described a test which he had made in which the desired to undesired signal ratio was 2 to 1 and that with a 150 KC FM swing the signal to interference ratio out of the receiver was 40 DB. He said that the same input ratio on an AM receiver gave about an 8 DB ratio out of the receiver. Mr. Weir did say that in order to get the same signal to interference ratio for intelligence transmission and that a 50 to 60 DB ratio was needed for high quality. Mr. Weir explained that a 40 DB difference would be satisfactory but that more people would be pleased with a difference of 50 to 60 DB. Mr. Thomas described a similar test which General Electric was the next FM Broadcasters, Inc., witness. Mr. Thomas explained that he had found in a test that if the audio band were limited to 3,000 cycles and the deviation was 5 to 1, that the signal plus noise to noise ratio stayed about the same as for a wider audio band with the same deviation. Mr. Thomas said that he saw possibilities for other services than broadcasting using a narrow audio band, and a correspondingly smaller frequency band. Mr. Thomas described adjacent channel interference experiments in which he had used a 40 KC channel and a 30 KC swing. He found that with adjacent channel operation there was interference, but with an 80 KC separation there was none, and that the adjacent channel interference factor apparently is dependent on width of swing. Mr. Thomas explained calculations which showed that the ratio of band width to frequency swing, in order to keep distortion at the same amount, increased as the deviation ratio was reduced.

The last and concluding witness for FM Broadcasters, Inc., was Paul A. deMars, technical director of the Yankee Network. Mr. deMars explained that he was freed of his duties at the Yankee Network in order to coordinate a preparation of the technical data for the FM Broadcasters. Mr. deMars said that if the band width is reduced from 200 to 40 KC that there must be an increase in power of 25 times and that the stations then would have to be spaced at a greater distance, and cognizance should also be taken of adjacent channel interference. Mr. deMars said that he used a signal to interference ratio of 20 and 40 DB for FM and for all interference problems. He said that the earth's conductivity has little or no effect on frequencies of the order of 45 MC but instead we do have a pronounced effect due to terrain. He said that the signal might depart as much as three times from the average over broken terrain and that the signal might depart as much as ten times in mountainous terrain such as exists in England and the Allegheny Mountains. Mr. deMars continued that at distances of 100 miles or more that there is considerable variation in field strength and these variations are caused principally by variation in dielectric constant of the atmosphere; refractions and reflections from layers of atmosphere with different characteristics. Mr. deMars introduced a factor which he called Radiation Effi
ciency and later this was changed to Radiation Index, abbreviated to R.I. According to Mr. deMars's definition the Radiation Index equals the square root of the power delivered to the antenna times the height of the antenna above the surrounding terrain times a factor for the gain of the antenna. Mr. deMars suggested this factor as a means of taking into account the three items involved in the radiation at Ultra-High-Frequencies. As requested by Chairman Graff in the hearing, all radio organizations, including Exhibits and Mr. deMars entered these, with the suggestion that three classes of stations be provided for. Mr. deMars stated that he believed that a vastly superior service would be rendered to more people of the United States by the use of FM and that for a period of years it is fair to presume that the wide open spaces

Monday

Mr. Weir said that a 150 watt FM transmitter was employed at Albany and a 50 watt FM station at Schenectady. His testimony was continued on Monday, March 25.

March 29, 1940
Tuesday

Tuesday's testimony was resumed with Mr. deMars on the stand. He entered into further details on the allocation maps he had prepared showing that a station could be provided for in every city of 10,000 or more, with a radiation of R.I. equal to 300 which could be obtained with 1 KW and an antenna height of about 200 feet.

He said that complete coverage would be attained to a distance of 15 miles provided that the stations are separated 40 miles or more. Mr. deMars used four channels to accomplish this and said that perhaps one could be used between stations that they could be allocated indiscriminately.

For cities and population areas of 100,000 or more, Mr. deMars assumed an R. I. of about 1500, which could be accomplished with powers on the order of several KW. Under these conditions each station would have a good coverage of 35 miles and the stations would be separated approximately 90 miles. Mr. deMars also entered an Exhibit showing stations with an R. I. of 5,000. In response to Mr. Jett's question about horizontal and vertical polarization, Mr. deMars said that we do not have enough data yet to determine which is best, however, it was his opinion that horizontal polarization gives a higher signal to noise ratio than does vertical, and in response to Commissioner Craven's question he said that he did not think the Commission should specify which polarization should be used at this time. Under cross examination by Mr. Hogan, Mr. deMars talked about the possibilities of development such that it is acceptable for rendering a regular broadcasting service to the public and he based this opinion on his belief that the lower frequencies are not as well suited to television, however, he did not wish to have this opinion construed as meaning that television will not be developed on a useful band for FM. Mr. deMars said that if the 27 MC band was used for FM in addition to the 42 MC band that the cost of receivers would go up and that the complication of two FM bands would be undesirable. In response to a question put to him by Commissioner Attorney Bauer, Mr. deMars expressed the opinion that an experimental period is not necessary and that FM is now ready for regular commercial use.

The next witness was Mr. Stewart L. Bailey, appearing for Jansky & Bailey, Consulting Engineer of Washington. Mr. Bailey said that a 200 KC band is necessary for good reproduction when the signal is at least 1000 and the receiver width is about 200 feet.

He described their high speed news service in which they can transmit 100 words per minute. The multiplexing was done with two tones of 21 KC and a 150 KC swing, and that the extra 50 KC is not exactly a guard band.

Mr. Bailey explained that no filter was needed on the receiver to keep the typewriter impulses out of the program, but that a filter was necessary on the circuit feeding the typewriter in order to filter out the voice and music. Mr. Bailey explained an adjacent channel experiment which he had performed with a 150 KC swing and the extra 50 KC is not exactly a guard band.

Mr. Bailey said that he did not think the Commission should specify which polarization was better. He said that horizontal polarization gives a higher signal to noise ratio than does vertical, and that the speed of typing was 100 words per minute. The multiplexing was done with two tones of 21 KC and 22.8 KC and that a deviation of 10 KC was used on the type-writer circuit being superimposed on the regular transmission. He said that in order to do this the maximum permissible amount of aural transmission was limited to 65 KC instead of 75. Mr. Bailey explained that no filter was needed on the receiver to keep the typewriter impulses out of the program, but that a filter was necessary on the circuit feeding the typewriter in order to filter out the voice and music. Mr. Bailey explained an adjacent channel experiment which he had performed with a 150 KC swing and the extra 50 KC is not exactly a guard band.

He said that the desired to undesired signal ratio was on the order of 1 to 5 up to 1 to 10 in order to give the same freedom from interference as was experienced on the same channel with a desired to undesired ratio of 2 to 1. It was Mr. Bailey's conclusion from this experiment that adjacent channel operation is feasible within the service area of a station. Mr. Bailey then described his experiment with two channel difference and he said that he was not able to get enough interfering signal to properly measure it and his conclusion then was that two channel separation would be OK in all cases.

The next party to the "High Frequency" hearing to appear was Mr. John V. L. Hogan, consulting engineer and inventor of New York City. Mr. Hogan expressed the opinion that aural broadcasting on the frequencies above 25 MC has reached a stage of development such that it is acceptable for rendering a regular broadcast service to the public and he based this opinion on his experience with his own FM station in New York. Mr. Hogan believes that FM can render a superior service out to 100 miles and that the American Telephone and Telegraph Company can make a 100 KW station on AM and that they should be allowed to do so. Commissioner Craven asked if AM had any advantages over FM and he received a negative answer. Mr. Hogan expressed the opinion that educational stations should go to FM and that the educational band should be left out of the allocation but that AM can be used for a combination of the present band and FM in the U.H.F. The standard band could ultimately be made up of channels one by means of AM and the other by means of FM, both transmitting in the Ultra-High Frequency. The FM sample had a lighter, more white background giving visual evidence to the noise suppression ability of FM. In regard to width of band Mr. Hogan recommended that 200 KC bands be used and that if future development shows that a smaller band can be used, then the bands can be narrowed. Mr. Hogan stated that he and the present have found a way to allocate on the same frequencies with little or no waste space between stations and it was his belief that a national system of allocation using FM can be made to include broadcasting, facsimile, educational, etc. In response to a question by Chairman Fly Mr. Hogan said that he thought with the AM and FM on on AM and that they should be allowed to do so. Commissioner Craven asked if AM had any advantages over FM and he received a negative answer. Mr. Hogan expressed the opinion that educational stations should go to FM and that the educational band should be left out of the allocation but that AM can be used for a combination of the present band and FM in the U.H.F. The standard band could ultimately be made up of channels one by means of AM and the other by means of FM, both transmitting in the Ultra-High Frequency. The FM sample had a
Wednesday

Chairman F. Reed Rollo, for station WSM, said that they would not present testimony in view of the fact that it would be a repetition of what had already been covered.

Horace Rohnes of Runyon made a similar statement.

Mr. Wozencraft opened RCA's testimony by saying that they favored FM broadcasting on the Ultra-High-Frequencies with adequate channels to serve the country.

Dr. H. H. Beverage, chief research engineer, was the first RCA witness. He said that at 22 to 27 MC we are approaching the limit of Sky-Wave transmission and that these frequencies are not particularly useful for long distance communication. He said that in the daytime these frequencies have some long distance sky-wave propagation, but at night the transmission is limited to fairly short ground wave signals. He said that RCA had found that measurements on frequencies up to 100 MC corresponds very closely with the theoretical work of Dr. K. A. Norton of the FCC. Dr. Beverage said that beyond the horizontal horizon there was an almost complete lack of service. He said that for good service with FM the signal should be 6 DB or higher above the noise. Mr. Beverage said that the swing determines the gain over noise and that the swing is widened the gain over noise becomes better, however, as the swing becomes larger than the threshold. Within the threshold the wider the band the better signal to noise ratio will be obtained out of the loud-speaker, and that as the band is broadened out the threshold moves closer to the station.

The next RCA witness was Mr. Raymond P. Guy, Radio Facilitation engineer. He said that the ratio of 50:1 which he had used in experiments using AM, 30 KC frequency swing and 150 KC frequency swing with 1 KW and 1000 foot high antenna. His measurements showed that the 150 KC swing was better than from the standard broadcast stations.

Mr. Guy explained that he considered that with a signal to noise ratio of 50:1, the channel should be considered satisfactory. Mr. Guy's curves showed that at 86 miles and that on 30 KC the threshold was at approximately 100 MC. He said that they could provide 25 KB of good broadcasting service. Mr. Guy's experimental work showed that there is about a 16 DB gain over noise in going from Amplitude to FM with a 30 KC swing and that the difference between Amplitude and 150 KC swing is about 30 DB, provided the distance at which the receiving is being done is within threshold distance. Mr. Guy also showed an adjacent channel test that he had made using 200 KC bands and he said that the service was very good and 50 DB or better excellent. Mr. Guy's experimental work showed that there is about a 16 DB gain over noise in going from Amplitude to FM with a 30 KC swing and that the difference between Amplitude and 150 KC swing is about 30 DB.

Mr. Catchings said that the quality on their wired service was very good and 50 DB or better excellent. Mr. Guy's experimental work showed that there is about a 16 DB gain over noise in going from Amplitude to FM with a 30 KC swing and that the difference between Amplitude and 150 KC swing is about 30 DB.

Mr. Catchings said that 150 DB, provided the distance at which the receiving is being done is within threshold distance. Mr. Guy also showed an adjacent channel test that he had made using 200 KC bands and he said that the service was very good and 50 DB or better excellent. Mr. Guy's experimental work showed that there is about a 16 DB gain over noise in going from Amplitude to FM with a 30 KC swing and that the difference between Amplitude and 150 KC swing is about 30 DB.

Mr. Reed Rollo, for station WSM, said that they would not present testimony in view of the fact that it would be a repetition of what had already been covered.

Mr. Wozencraft opened RCA's testimony by saying that they favored FM broadcasting on the Ultra-High-Frequencies with adequate channels to serve the country.

He said that RCA had found that measurements on frequencies up to 100 MC corresponds very closely with the theoretical work of Dr. K. A. Norton of the FCC. Dr. Beverage said that beyond the horizontal horizon there was an almost complete lack of service. He said that for good service with FM the signal should be 6 DB or higher above the noise. Mr. Beverage said that the swing determines the gain over noise and that the swing is widened the gain over noise becomes better, however, as the swing becomes larger than the threshold. Within the threshold the wider the band the better signal to noise ratio will be obtained out of the loud-speaker, and that as the band is broadened out the threshold moves closer to the station.

The next RCA witness was Mr. Raymond P. Guy, Radio Facilitation engineer. He said that the ratio of 50:1 which he had used in experiments using AM, 30 KC frequency swing and 150 KC frequency swing with 1 KW and 1000 foot high antenna. His measurements showed that the 150 KC swing was better than from the standard broadcast stations.

Mr. Guy explained that he considered that with a signal to noise ratio of 50:1, the channel should be considered satisfactory. Mr. Guy's curves showed that at 86 miles and that on 30 KC the threshold was at approximately 100 MC. He said that they could provide 25 KB of good broadcasting service. Mr. Guy's experimental work showed that there is about a 16 DB gain over noise in going from Amplitude to FM with a 30 KC swing and that the difference between Amplitude and 150 KC swing is about 30 DB, provided the distance at which the receiving is being done is within threshold distance. Mr. Guy also showed an adjacent channel test that he had made using 200 KC bands and he said that the service was very good and 50 DB or better excellent. Mr. Guy's experimental work showed that there is about a 16 DB gain over noise in going from Amplitude to FM with a 30 KC swing and that the difference between Amplitude and 150 KC swing is about 30 DB.
This chart also showed that the peak signal to noise ratio decreased as the swing was decreased. Another chart of Mr. Lent's showed that in the 40 to 44 MC band there would be room for 15 channels using a band width of 200 KC, 21 channels using 140 KC band, 37 channels using an 80 KC band and 75 channels using a 40 KC band. This chart also showed the separation distance required with an antenna 1,000 feet high and a power of 1 KW. On the 200 KC band the separation required was 200 miles and for the 40 KC band the separation required was 500 miles. Mr. Lent then presented exhibits showing allocations he had worked out for different band widths. He presented four allocation plans. One each for 40, 80, 140 and 200 KC bands. His allocation plans showed that for the 40 KC band there could be allocated six stations in each city east of the Mississippi and that with the 80 KC bands 64 metropolitan areas could be each given three facilities. His plan for the 140 KC bands showed that 62 metropolitan areas could have two facilities each and his plan for 200 KC bands showed that 60 metropolitan areas could have one facility each. Mr. Lent showed more than two circles for each station. The inner circle corresponded to the service now rendered on the present band with 5 MV for urban service, and the outer circle corresponds with the present 15/4 MV contour for rural service. Chairman Fly excused Mr. Lent from the stand and said that his cross-examination would be left until Thursday.

Mr. Otto S. Schaifer, of the Patent Department of RCA, identified Exhibits giving patent information.

On behalf of Stromberg Carlson Manufacturing Company, Mr. Phil Lauderdale offered a statement in the city requirement for FM receivers so far delivered to the Stromberg Carlson distributors and dealers. This was a total of 1,592 receivers, ranging in price from $59.50 to $935. The sets range all the way from table models up to phonograph combinations. Mr. Louck's statement ended that the Philips sets were superior. Mr. Lent's statement in the opinion of Stromberg Carlson is the best swing to be used and therefore they recommend the allocation of 200 KC bands. Stromberg Carlson recommended against splitting the FM band and also recommended that an FM allocation be made as soon as possible.

Horace Lowes on behalf of station WDRG said that their Chief Engineer had already made an appearance for FM Broadcasters, Inc., and that they had nothing further to add.

On behalf of Westinghouse Electric & Manufacturing Company, Mr. Lowes offered a statement in the city requirement for the Commission, giving measurements and experiments made to determine the characteristics of FM vs. AM in the UHF.

Thursday

The High Frequency hearing was resumed when RCA played a demonstration record with signal to noise ratios of 20, 30, 40, 50, and 60 DB. According to RCA these were rated poor, fair, very good, excellent, and perfect. The demonstration continued the stand for cross examination. He told of calculations he had made which showed that for a 75 KC swing that the guard band need be 10 KC. He said that 10 KC would take care of drift in the receiver and take care of side frequencies and that therefore his answer was that for 40 MC the separation required was 7.5 KC. Mr. Lent said that the Zenith observations indicated that the lowest usable signal on FM was 15 microvolts. He said that for real good service the noise should be 70 DB down from the signal. In response to a question by Mr. Jett he said that the drift problem with FM was less serious than with WCB. On the wide band, however, the receiver drift problem could be taken care of for either case.

Mr. Andrew D. Ring, assistant chief engineer of the FCC, described FCC exhibit number 84, entitled, "Field Intensity Survey of UHF Broadcasting Stations." Due to the anxiety of the Commission to wind up the hearing, Mr. Ring was given very little time to discuss the FCC exhibits. During the survey, measurements were made on the following stations: W2XMN, 42.8 mc, at Alpine, New Jersey; W2XBS, 49.85 mc, and W2XWG, 42.6 mc, both on the Empire State Building, New York City; W1XOJ, 43.2 mc, New York; W1XOJ, 45.0 mc, New York; W1XOJ, 43.2 mc, Washington, D. C. All of the stations except W3XO transmitted horizontally polarized waves. Fading recordings were taken at a fixed point at Barnegat, New Jersey, on W2XMN, Alpine, and these showed a signal intensity variation between 1 and 100, and a signal intensity variation of from 10 to 1. Other drive along recordings were made showing signal intensity variations of better than 10 to 1. The report contained a large number of field intensity radial lines taken on the above mentioned UHF stations. Mr. Ring described drive along recordings on station W1XO taken along the south side of Constitution Avenue between 14th Street and Delaware Avenue in Washington, and these showed signal variations between 60 and 1600 microvolts and between 70 and 160 MV on WMAL, 630 KC and between 19 and 140 MV on WRC, 950 KC. Mr. Ring also described listening tests which he had made and gave him an indication of the receivers with WCB. He gave the opinion that it was 85. It was "Report Prepared By K. A. Norton on the calculation of ground wave field intensity over a infinitely conducting spherical earth." Also FCC exhibit number 86 was entered, entitled "Report prepared by K. A. Norton on a theory of tropospheric wave propagation," and exhibit number 87 entitled "Summary of statement by K. A. Norton on UHF Wave Propagation."

Mr. Frank M. Kennedy on behalf of Don Lee, stated that their experience was that the lower frequencies were better for television. Dr. Studebaker, Bureau of Education, Department of the Interior, asked for peculiarities of FM that were not mentioned rather than to take time at the hearing for it, and this was granted.

Mr. S. Howard Evans of the National Association of Educational Broadcasters said that we have an unsound situation in the present broadcast band, where some have 50,000 watts and others have only 100 watts and that FM in the 14 MHz could offer a possibility for somewhat equalizing this situation.
It was his thought that conditions of competition should be as universal as possible and that in a given area all the facilities should be of about the same power. Mr. Evans said that educators were interested in using facsimile in the schools and therefore they were interested in educational FM bands with the provisions for multiplexing facsimile.

The afternoon session was taken up to a large extent, by discussion concerning a possible location in the frequency spectrum for FM.

There was discussion about taking the number 1 or number 4 television channels for FM and Mr. Fly asked each party to the hearing to set forth their ideas on assignment of band space for FM and give it to the Commission.

This concluded the hearing on "High Frequencies."

**OHIO STATE RADIO INSTITUTE**

**PROGRAM RELEASED**

Educational directors and program managers of member stations are invited to a special meeting to be held by the NAB in connection with the 11th Institute for Education by Radio, to be held at Ohio State University, Columbus, Ohio, April 29 through May 1.

In addition to representatives from Headquarters, Sterling Fisher, educational director of CBS, and Walter Preston, Jr., assistant to the vice president in charge of programs of NBC, will take part in a complete review of the problems of educational and public service broadcasting.

Chairman James L. Fly will address the Institute at the annual dinner meeting, Tuesday, April 30.

Among other features of the three-day meeting will be a panel discussion on the "Handling of Controversial Public Issues". Those invited to take part are George V. Denny, Jr., of NBC's America's Town Meeting of the Air; Lyman Bryson of CBS' "People's Platform"; Edgar Bill, WMBD, Chairman of the NAB Code Compliance Committee; Dr. Leonard Power of the Federal Radio Education Committee, and Joseph L. Miller, NAB Director of Labor Relations; Ed Kirby, of the NAB, will serve as group discussion leader.

The announcement for the awards for the best educational broadcasts will be made on opening day, and an opportunity to hear recordings of the winners will be accorded during the three-day conference. Following is a list of chairmen for the work-study groups.

**Agriculture Broadcasts**—John C. Baker, Radio Extension Specialist, United States Department of Agriculture.

**School Broadcasts**—Harold W. Kent, director of the Radio Council, Chicago Public Schools.

**Research in Educational Broadcasting**—H. M. Beville, Jr., Research Manager, National Broadcasting Company.

**Broadcasts for General Education**—Herschel W. Nisonger, assistant director of the Bureau of Special and Adult Education, Ohio State University.

**Public Service Broadcasting**—Walter G. Preston, Jr., assistant to the vice president in charge of programs, National Broadcasting Company.

**Clinic: Music Appreciation Broadcasts**—Alton O'Steen, research associate, Evaluation of School Broadcasts, Ohio State University.

**Clinic: Science Broadcasts**—Loring Andrews, chairman of the Program Committee, World Wide Broadcasting Foundation, Boston, Massachusetts.

Chairmen of the round-table discussions on Tuesday evening are:

**Handling Controversial Issues**—Ed Kirby, director of public relations, National Association of Broadcasters.

**Radio Workshops**—Thomas D. Rishworth, educational director, Station KSTP, St. Paul, Minnesota.

**Educational Script Exchanges**—Friel Heimlich, Station WOSU, Ohio State University.

**Recordings for School Use**—Emilie Haley, assistant to the director, Association of School Film Libraries.

**News and Special Events**—A. A. Schechter, news editor and director of special events, National Broadcasting Company.

**Radio Production**—John Carlile, in charge of radio activities, University of Alabama.

**Writing for Radio**—Bernard C. Schoenfeld, chief scriptwriter, Radio Section, Department of Interior.

**Engineering Quiz Section**—R. C. Higgy, director Station WOSU, Ohio State University.

**FCC CHAIRMAN TO TALK TO TEXAS WOMEN'S MEETING**

James L. Fly, chairman of the Federal Communications Commission, will be a guest at a luncheon meeting of the Texas Women's Radio Survey Committee to be held in the Baker Hotel, Dallas, Texas, on April 17. Ed Kirby, NAB Director of Public Relations, has been asked to make an address on the American system of broadcasting at the same time.

The Women's Radio Survey Committee is headed by Mrs. Joseph E. Goodbar, for the past two years president of the National Federation of Press Women. Purpose of the luncheon, to be patterned after the luncheon given last November in Washington by the NAB for the heads of national women's organizations, is to bring about a better understanding of radio, especially with reference to children's programs and serials pointed for the women's audience.

A large delegation of Texas broadcasters is expected to be on hand to meet with the women delegates and to meet Mr. Fly.

**FREE OFFERS**

H. W. Kastor & Sons Advertising Company seeks to place radio advertising on a percentage basis, on behalf of Pazo Ointment. The Bureau of Radio Advertising has advised the agency that both the product and their proposal would not be acceptable to member stations under the NAB Code. Kastor had planned to pay stations 30% of total sales in their area, less agency commission, with the method of checking sales to be mutually agreed on. The Bureau has written Kastor strongly...
urging that they revise or withdraw their proposal in the best interests of advertiser, agency and broadcasters.

Another cost-per-inquiry proposition reported this week is The Wormley Company, Aurora, Illinois, on behalf of Stomax-Relief. "The Woman" magazine asks stations to accept free radio scripts based on material in their April issue. The Bureau has sent the usual letter of explanation to these concerns.

Driver & Company, advertising agency of Omaha, Nebraska, explains that their recent letter to stations, listed in NAB Reports, March 15, as a free offer, was merely a request for advice, suggestions and availabilities in connection with a regular campaign for Miller Cereals. The letter made repeated mention of a "deal", and "straight publicising job", which led both the Bureau and at least one member station to misinterpret their intentions. The Bureau is very glad to correct this mistaken impression, and has suggested that Driver & Company revise their request to stations to avoid any future misunderstanding.

**RADIO AND DEPARTMENT STORES**

Joseph E. Hanson, formerly of Lawrence Fertig Advertising Agency, has been appointed manager of the Sales Promotion Division of the National Retail Dry Goods Association. Mr. Hanson is a pioneer in radio broadcasting, having been one of the early organizers of WOR, and also served with Bamberger's Store, Newark.

In discussing the problems of radio for retailers with the Bureau of Radio Advertising in New York this week, Mr. Hanson stated he plans to go ahead without further delay on the transcript of the radio panel discussion held at the NRDGA convention. Plans for a comprehensive radio manual for retail stores, to be produced in cooperation with NAB, were also discussed at length.

**SPECIAL EVENTS**

The following dates will be of interest to members in connection with plans for special programs, promotions, etc. NAB Reports will publish a similar list each month:

- April 6—Army Day.
- April 15-20—National Garden Week.
- April 27-May 4—National Fisherman's Week.
- April 28-May 4—National Better Homes Week.
- April 29-May 4—National Baby Week.
- May 5-12—National Music Week.
- May 12—Mother's Day.
- May 18—International Good Will Day.
- May 19-25—National First Aid Week.

**CONVENTIONS OF INTEREST TO BROADCASTING STATIONS**

- April 29-May 1—Eleventh Institute for Education by Radio, combined with Fourth American Exhibition of Recordings of Educational Radio Programs, Ohio State University, Columbus, Ohio.
- May 23-4—Annual convention, Advertising Affiliation, Hotel Statler, Buffalo, N. Y.

**COURT HOLDS SHERMAN LAW APPLIES TO LABOR UNIONS**

Judge Peyton Gordon of the federal district court for the District of Columbia ruled this week that the Sherman Anti-trust Law applies to labor unions in cases where their objectives are not "legitimate" and where they use unlawful means to attain these objectives.

Judge Gordon's ruling was made in the case of the government against the A. F. of L. truck drivers' union which was charged with a conspiracy to compel three concrete mixing companies to hire members of the truck drivers' union rather than members of the operating engineers' union.

**AFRA Wins Election**

The American Federation of Radio Artists won, 8 to 3, a Labor Board election among the announcers of Station WCPO, Cincinnati. The issue was whether the announcers wanted to be represented by AFRA. There was no other union involved.

**STATE LEGISLATION**

**RHODE ISLAND:**

- H 1020 (Curran) CHIROPODISTs—LICENSING—In amendment of chapter 278 of the general laws of 1938 entitled "Licensing and regulation of chiropodists." Referred to Judiciary Committee.
- H 1033 (Scott) FOOD—DRUGS—ADULTERATION AND FALSE ADVERTISEMENT—To prohibit the adulteration, misbranding, and false advertisement of food, drugs, devices and cosmetics, and for other purposes. Referred to Judiciary Committee.

**Television Hearing Reopened**

Television promotional activities on the part of the Radio Corporation of America has prompted the FCC to order a further hearing, beginning April 8, to determine whether research and experimentation and the achievement of higher standards of television transmission are being unduly retarded by this company, its subsidiaries, or other licensees, and whether the effective date for the beginning of limited commercial operation should be changed from September 1 to some subsequent date. Meanwhile, that section of the new rules permitting re-
restricted commercialization is suspended pending further order. The Commission said:

The current publicity campaign of the Radio Corporation of America is held to be at variance with the intent of the Commission's television report of February 29. Such action is construed as a disregard of the Commission's findings and recommendations for further improvement in the technique and quality of television transmission before sets are widely sold to the public.

The zeal with which the present status of television transmission and the feasibility of its general reception by the public was the subject of the recent extensive hearings before this Commission. Because of the fluid state of the art and the continuance of research and experimentation, the Commission declined for the time being to establish television transmission standards. Authority to issue such standards is of course vested only in the Commission. Recommendations to insure that the standards when issued would be based upon a sufficiently advanced technical state of the art were incorporated in the report of February 29.

"Actual demonstration to members of the Commission," the report pointed out, "indicates the need for further improvement in the technical quality of television." The Commission stressed the need of continued research in various significant phases of the field involving the number of lines and the number of frames per second, the retentive quality of screens, the mechanics of scanning, the problem of various screen sizes with particular reference to larger screens, the problem of polarization and the related question of the type of antennas, and various alternative methods of synchronization. Inherently this research and experimentation has potentialities of great value to the public.

The purpose of the Commission was to give the industry further opportunity to move forward in an orderly manner and upon a sound scientific basis without causing injury to the public and resultant injury to the new industry itself, particularly to other manufacturers cooperating in seeking to bring about video improvements through experimentation rather than crowding the market with present-day receivers which may soon become obsolete. Economic loss to the public, the report warned, would be occasioned by "premature purchase in a rapidly advancing field."

Not all types of television transmission can be received by any receiver. In the present state of the art it is impossible to decide what type of transmitter will be made standard. More research and experimentation will be necessary, and is being conducted, before any such standardization can be achieved. Receiving sets constructed or on the market today may not be capable of receiving television programs from standardized television transmitters when the art has sufficiently advanced to permit such standardization. Public participation in television experimentation at this time is desirable only if the public understands that it is experimenting in reception and not necessarily investing in receiving equipment with a guarantee of its continued usefulness. Television is here to stay, but conceivably present-day receivers may for practical purposes be gone tomorrow.

Promotional activities directed to the sale of receivers not only intensifies the danger of these instruments being left on the hands of the public, but may react in the crystalizing of transmission standards at present levels. Moreover, the possibility of one manufacturer gaining an unfair advantage over competitors may cause them to abandon the further research and experimentation which is in the public interest and may result in crowding them into the market with apparatus at present efficiency levels. Rapid advance is desirable—but television is of great and permanent potential usefulness to the public. These are the goals which the Commission deems the public interest to require.

Following is the statement of David Sarnoff, president of RCA, when informed of the Commission's action:

"I am amazed at the action of the Commission. We have spent nearly ten million dollars in developing television and in trying to create a new art and a new industry. We thought that we were proceeding exactly in accordance with the order on this subject recently adopted by the Commission."

Advertising in the New York newspapers on Wednesday, March 20, is believed to have figured in the Commission's decision.

KGFI LICENSE ORDERED REVOKED

The Federal Communications Commission has ordered revocation of the license of the Eagle Broadcasting Co., Inc., to operate radio station KGFI at Brownsville, Texas, effective April 15. If the company requests hearing within 15 days of formal notification, the order will be held in abeyance pending outcome of the hearing.

Unauthorized transfer of the management, control and operation of the station in violation of Section 310(b) of the Communications Act of 1934 as amended is the basis for the revocation order.

On or about October 7, 1938, the Eagle Broadcasting Co., by and through Ewel E. Wilson and Ernest E. Wilson of Corpus Christi, are alleged to have surrendered possession to James G. Ulner of Tyler, and M. D. Gallagher of Brownsville. The latter are said to have exercised management until about April 22, 1939, when Lawrence D. Yates took contractual control.

FROM THE FCC MAIL BAG

(No. 3 of a Series)

A New Hampshire man wants radio to ban war songs.
A Philadelphia favors putting old jokes under instead of on the ether.
A Pennsylvania individual complains of the use of the terms "Injun" and "Redskin" in one of the Western serials heard over the air.

An Ohio listener objects to the adoption of daylight saving time by broadcast stations.

An Illinois radio fan takes exception to a cooking recipe offer.

An Illinois radio fan takes exception to a toothpaste commercial.

A New Yorker wants a particular religious program barred from the air. Another New Yorker protests the discontinuance of a certain religious program.

A Brooklyn, N. Y., dentist resents airy jibes at his profession.
A Massachusetts woman takes exception to a toothpaste commercial.
A New Jersey letter protests liquor advertising from out his loud-speaker.

An Indiana writer is irked by a broadcast on astrology.
A Californian asks the Federal Communications Commission to approve a handwriting analysis continuity.

In the same mail—letters from a women's club and a missionary society commending certain types of radio programs and condemning others.

* * * * *

In individual replies to these and kindred writers, the Commission has to reiterate that it is without authority to compel a broadcast station to accept or reject a specific program. Since each station is charged with the responsibility of selecting material to be presented in the public interest, any complaint should be addressed direct to the individual station carrying the program alleged to be objectionable. The Commission is prevented by statute from exercising censorship over individual radio programs. Hence, any recourse rests with the broadcasting stations which, after all, are guided largely by their fan mail.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings are scheduled before the Commission in broadcast cases during the week beginning Monday, April 1. They are subject to change.
Monday, April 1

NEW—Lookout Mountain Company of Georgia, Lookout Mountain, Ga.—C. P., 1570 kc., 250 watts, unlimited time.

Wednesday, April 3

NEW—Harold Thomas, Bridgeport, Conn.—C. P., 1210 kc., 250 watts, unlimited time.

Thursday, April 4

NEW—J. D. Falvey, Ottumwa, Iowa.—C. P., 1210 kc., 100 watts, unlimited time.

NEW—Louis R. Spiwak and Maurice R. Spiwak, d/b as L & M Broadcasting Co., Ottumwa, Iowa.—C. P., 1210 kc., 100 watts, 250 watts LS, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative date for broadcast hearings. It is subject to change.

April 17

Hearing to Be Held Before Commissioner Paul A. Walker, Room 229, Post Office and Court House, Los Angeles, California

NEW—Santa Monica Municipal Airport, City of Santa Monica, Santa Monica, Calif.—C. P., 278 kc., 15 watts, Emission A3. Time: 9 a.m. to sunset. Pts. of Comm.: With Aircraft.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the period ending August 1, 1940: KSAC, Manhattan, Kans.; KSFO, San Francisco; KVAN, Vancouver, Wash.; KVOD, Denver, Colo.; KWFT, Wichita Falls, Texas; WBAA, W. Lafayette, Ind.; WGBF, Evansville, Ind.; WHJB, Greensburg, Pa.; WICC, Bridgeport, Conn.; WJAR and auxiliary Richmond, Va.; WJAX, Jacksonville, Fla.; WKZO, Kalamazoo, Mich.; WMAL and auxiliary, Washington, D. C.; WMAM, Marinette, Wisc.; WWMM, Fairmont, W. Va.; WMT, Cedar Rapids, Iowa; WNAX, Yankton, S. Dak.; WORL, Boston; WOSU, Columbus, Ohio; WOW, Omaha, Neb.; WPEN and auxiliary, Philadelphia; WPIC, Sharon, Pa.; WQAM and auxiliary, Miami, Fla.; WQAN and auxiliary, Scranton, Pa.; WREC, Memphis, Tenn.; WRNL and auxiliary, Richmond, Va.; WSPA, Spartanburg, S. C.; WSUN, St. Petersburg, Fla.; WSUI, Iowa City, Iowa; WSVA, Harrisonburg, Va.; WSVY-SYSC, Syracuse, N. Y.; WTAR and auxiliary, Ill.; WNYC and auxiliary, New York City; WPDE and auxiliary, Providence, R. I.; WTAR and auxiliary, Norfolk, Va.; KFNF, Shendoah, Iowa; KFUO, Clayton, Mo.; KFQD, Anchorage, Alaska; KLWL, Longview, Wash.; WWC, Asheville, N. C.; WWJ and auxiliary, Detroit; WFLA, Tampa, Fla.; WGR and auxiliary, Buffalo, N. Y.

KSUB—Leland M. Perry, Cedar City, Utah.—Present license further extended upon a temporary basis for the period ending May 1, 1940, subject to whatever action may be taken upon any formal application that may be submitted relative to station KSUB.

KWJB—Sims Broadcasting Co., Globe, Ariz.—Special temporary authority to Bartley T. Sims to operate station KWJB, was further extended upon a temporary basis to May 1, 1940, subject to whatever action may be taken upon renewal application.

KGBU—Alaska Radio & Service Co., Inc., Ketchikan, Alaska.—Present license further extended upon a temporary basis from April 1 to May 1, pending determination upon application for renewal.

KXO—E. R. Irey, F. M. Bowles, El Centro, Calif.—Present license further extended upon a temporary basis only for the period April 1 to May 1, subject to whatever action may be taken upon pending application for renewal.

WMFJ—W. Wright Esch, Daytona Beach, Fla.—Present license further extended upon a temporary basis from April 1 to May 1, pending determination upon application for renewal.

KTHS—Hot Springs Chamber of Commerce, Hot Springs Nat’l Park, Arkansas.—Present license further extended upon a temporary basis from April 1 to May 1, pending determination upon application for renewal.

WMFD—The Monocacy Broadcasting Co., Frederick, Md.—Present license extended upon a temporary basis for the period April 1 to June 1, pending determination upon application for renewal.

KUSB—University of South Dakota, Vermillion, S. Dak.—Present license extended upon a temporary basis for the period April 1 to June 1, pending determination upon application for renewal.

WREC (Auxiliary)—Hoyt B. Wooten, tr/as WREC Broadcasting Service, Memphis, Tenn.—Present license extended upon a temporary basis for the period April 1 to June 1, pending determination upon application for renewal.

WSM—National Life & Accident Ins. Co., Nashville, Tenn.—Special temporary authority to operate a regular broadcast transmitter for the experimental transmission of facsimile signals, was further extended for a period of one month from April 1 to May 1.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WSUN—St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Granted consent to voluntary assignment of license of station WSUN from St. Petersburg Chamber of Commerce to the City of St. Petersburg, Fla.; station operates on 620 kc., 1 KW night, using directional antenna, 5 KW day, specified hours.

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted consent to voluntary assignment of license of station WTMS from V. W. Scarborough and J. W. Orvin, d/b as Atlantic Coast Broadcasting Co., to Atlantic Coast Broadcasting Co., a corporation; station operates on 1210 kc., 250 watts, unlimited time.

LICENSE REVOKED

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Tex.—Ordered revocation of license for station KGFI, effective April 15, 1940, because of unauthorized transfer of management, control and operation of the station, which operates on frequency 1500 kc., 100 watts, 250 watts LS, unlimited.

RETIRED TO CLOSED FILES

KFNX—KFNF, Inc., Shenandoah, Iowa.—Retired to closed files application for construction permit and modification thereof, requesting authority to install new transmitter; increase power from 500 watts, 1 KW LS, to 1 KW, 5 KW LS; move transmitter and install directional antenna for night use, inasmuch as the required time for completion under the permit has expired.

WESC—Cornell University, Ithaca, N. Y.—Retired to closed files the application for construction permit granted July 3, 1939, authorizing changes in equipment, as licensee has requested cancellation of authority without prejudice to filing another application for the same matter at a later date.

March 29, 1940
Licenses for the following stations were extended upon a temporary basis only, pending determination upon applications for renewal of licenses, for the period April 1 to May 1, 1940:

- W2XSN, W1XBK—Westinghouse E and M Co., E. Springfield, Mass.—Granted renewal of high frequency broadcast licenses for the regular period.
- W6ZKG-W6XRE—Ben S. McGlashan, Los Angeles, Calif.—Pending application for renewal of high frequency broadcast station license.

Licenses for the following television broadcast stations were further extended upon a temporary basis only, pending receipt of and determination upon renewal applications, for the period April 1 to May 1, 1940:

- W1XG, Boston; W9XG, W. Lafayette, Ind.; W9XDR, Long Island City, N. Y.; W9XK, Iowa City, Iowa.

**MISCELLANEOUS**

West Virginia Newspaper Publishing Co., Morgantown, W. Va.—Denied motion to reconsider and grant without hearing the application for a new station to operate on 1200 kc., 250 watts, unlimited time.

- Knoxville Broadcasting Co., Knoxville, Tenn.—Designated for hearing application for new station to operate on 1210 kc., 250 watts, unlimited time.
- WLBZ—Thompson L. Gurnsey, Bangor, Maine.—Dismissed application requesting consent to transfer control of Maine Broadcasting Co., Inc., licensee of WLBZ, from Thompson L. Gurnsey to Congress Square Hotel Co.
- State of Minnesota—Denied motion for continuance to April 3 or 10 of hearing now scheduled for March 29, on application of WNYC for license to change hours of operation from day to nighttime, on 810 kc.
- KDB—Santa Barbara Broadcasters, Ltd., Santa Barbara, Calif.—Denied special temporary authority to use the 10,000 watt transmitter of Station WJSW, for relay broadcasting baseball games only, using 250 watts on 1870 kc.

- W9XEN—Zenith Radio Corp., Chicago, Ill.—Denied motion to cover construction permit to move transmitter locally.
- WSYR-WSVU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted construction permit to install new transmitter.

**KFGO—Voice of Longview, Longview, Tex.—**Granted special temporary authority to operate from 9 p.m. to 1:00 a.m. EST on March 1, 1940, subject to whatever action may be taken by the Commission upon renewal applications.

- WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 9 to 11 p.m., and from 11 p.m. to 12:15 A.M. AST, on March 22, 1940, in order to broadcast religious services.
- WPFA—The Peoples Forum of the Air, Helena, Mont.—Granted authority to determine operating power by direct measurement of antenna input.
- KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted authority to determine operating power by direct measurement of antenna input.
- KJBS—Benson Polytechnic School, Portland, Ore.—Granted authority to determine operating power by direct measurement of antenna input.
- WEOE—The St. Louis University, St. Louis, Mo.—Granted authority to determine operating power by direct measurement of antenna input.
- WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted authority to determine operating power by direct measurement of antenna input.
- WEHN-GENM—The Evening News Assn., Detroit, Mich.—Granted special temporary authority to use relay broadcast stations WEHN and WENM for coordination between the regular frequency WEJX and the high frequency station W6XJW for the period beginning March 25, 1940, to not later than March 31, 1940, in connection with additional W6XJW field work.
- WJAV—Radio Corp. of Porto Rico, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sporting programs to be received from International Broadcast Stations WCBX and WACB over Station WKAO on a non-commercial experimental basis only, to the trend of election returns is determined.
- WJSW—Columbia Broadcasting System, Inc., Washington, D. C.—Granted special temporary authority to use 10,000 watt transmitter of Station WJSW, on the Memorial Highway, near Alexandria, Va., as an auxiliary for a period not to exceed 30 days.
- WJMC—Walter H. McCarty, Rice Lake, Wis.—Denied special temporary authority to operate from 6:45 p. m. to 12 midnight EST on April 2, 1940, in order to broadcast election returns (B4-S-100).
- WEA—Central Broadcasting Co., Eau Claire, Wis.—Denied special temporary authority to operate from 7:00 p. m. to 9:30 p. m. EST on April 1, 1940, in order to broadcast political talks; to operate from 9:30 p. m. to 11:30 p. m. EST April 2, 1940, to 1:00 a. m. EST April 3, 1940, in order to broadcast election returns (T4-S-924).
- WINS—Heard Radio, Inc., New York, N. Y.—Denied special temporary authority to operate from 3:00 p. m. to 12 midnight EST on March 26, 1940, in order to broadcast a performance of the Metropolitan Opera to be given for the benefit of the Italian Welfare League.
- WAIM—Wilton E. Hall, Anderson, S. C.—Granted authority to determine operating power by direct measurement of antenna input for a period not to exceed 30 days.
- WSRS—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate from 8:00 p. m. to 8:30 p. m. EST on March 29, 1940, in order to broadcast an address by Gov. Leverett Saltonstall.
- WAGM—Aroostook Broadcasting Corp., Presque Isle, Me.—Granted special temporary authority to operate from 1 p. m. to 2:30 p. m. EST on March 27, 1940, in order to broadcast speech by Postmaster General Farley (B1-S-801).
- WJAG—The Norfolk Daily News, Norfolk, Nebr.—Granted special temporary authority to operate from 10 p. m. EST on April 9, 1940, to the trend of election returns is determined.
- WINS—Hearst Radio, Inc., New York, N. Y.—Granted special temporary authority to operate from 8:15 p. m. to 12 midnight EST on March 31, 1940, in order to broadcast a track meet at Madison Square Garden for the benefit of the Finnish Relief Fund (B1-S-211).
Applications Filed at FCC

590 Kilocycles

WKZO—WKZO, Inc., Kalamazoo, Mich.—Authority to determine operating power by direct measurement of antenna power.

690 Kilocycles

KOMA—KOMA, Inc., Oklahoma City, Okla.—Construction permit to install new transmitter, directional antenna for night, for increase in power from 5 to 50 KW; move transmitter from 7½ miles northeast of Oklahoma City, Okla., on U. S. Highway No. 66, to Deer Creek Township, Okla. Amended to change frequency from 1480 to 690 kc., move transmitter to Mathewson Twp., Okla., and request Class II station under No. American Regional agreement. Make changes in directional antenna (night).

710 Kilocycles

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Construction permit to increase power from 1 KW, 5 KW day, to 5 KW day and night; move transmitter from 1418 E. 81st St., Los Angeles, Calif., to Branford Ave., Van Nuys, Calif., and install directional antenna for day and night use.

740 Kilocycles

KTRB—Thomas R. McTammany and Wm. H. Bates, Jr., Modesto, Calif.—Voluntary assignment of license from Thomas R. McTammany and William H. Bates, Jr., to KTRB Broadcasting Co., Inc.

860 Kilocycles

50 KW, change frequency from 1370 to 1310 kc.; increase power from 100 watts, 250 watts power, unlimited time. Request Class IV station.

900 Kilocycles

KUSD—University of South Dakota, Vermillion, S. Dak.—Construction permit to install new vertical antenna, change frequency from 890 to 660 kc., hours from share KFNF to daytime (contingent on KOWH being granted unlimited time on 890 kc.). Amended re antenna.

1010 Kilocycles

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Authority to determine operating power by direct measurement of antenna power.

1040 Kilocycles

KTHS—Hot Springs Chamber of Commerce, Hot Springs National Park, Ark.—Construction permit to install new transmitter and directional antenna for night use; change frequency from 1040 to 1060 kc.; increase power from 10 to 50 KW; change time from shares KRLD to unlimited time; move transmitter from Hot Springs National Park, Ark., to Highway 67, Reburn, Ark. Amended: Make changes in directional antenna; give transmitter site as WPA Rd., Plum Bayou, Ark.; 250-watt amplifier; site to be determined, Hot Springs, Ark.

1060 Kilocycles

WJAG—The Norfolk Daily News, Norfolk, Neb.—Construction permit to change frequency from 1060 to 770 kc., time limited to WBAL and WTIC to limited to WBBM, and make changes in antenna system. Request facilities KFAB. Amended to request daytime hours of operation.

1210 Kilocycles

WFTM—Fort Myers Broadcasting Co., Fort Myers, Fla.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Construction permit to install new transmitter and antenna; increase power from 1 to 5 KW; change frequency from 1510 to 620 kc.; move transmitter to site to be determined, San Juan, P. R. Amended: Equipment changes.

1300 Kilocycles

KALE—KALE, Inc., Portland, Ore.—License to cover construction permit (B5-P-2344) as modified for move of transmitter, installation of new transmitter, changes in antenna and increase in daytime power.

1310 Kilocycles

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Construction permit to make changes in equipment, install directional antenna for night use, increase power from 250 watts to 1 KW, change frequency from 1510 to 600 kc. Request Class III B station.

1330 Kilocycles

WMBG—Havens & Martin, Inc., Richmond, Va.—License to cover construction permit (B3-P-2228) for increase in power, change in hours, installation of new transmitter and directional antenna for day and night use, and move of transmitter, requesting, further, authority to install new transmitter and make changes in directional antenna system, extend commencement date to 30 days after grant and completion date to 180 days thereafter.

1350 Kilocycles

WTAQ—WHBY, Inc., Green Bay, Wisc.—Modification of construction permit (B4-P-2232) for increase in nighttime power from 1 to 5 KW, further requesting changes in directional antenna system.

1370 Kilocycles

1420 Kilocycles

WLPM—Suffolk Broadcasting Corporation, Suffolk, Va.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

WMBS—Fayette Broadcasting Corporation, Uniontown, Pa.—Construction permit to install new transmitter and directional antenna for night use, change frequency from 1420 to 590 kc., and increase power from 250 watts to 1 KW. Amended re antenna.

WLPM—Suffolk Broadcasting Corp., Suffolk, Va.—License to cover construction permit (B2-P-2116) as modified for new broadcast station.

March 29, 1940
NEW—National Broadcasting Co., Inc., Chicago, Ill.—Construction permit for a new high frequency broadcast station to be operated on 45000 kc., 1000 watts, special emission for frequency modulation.

NEW—National Broadcasting Co., Inc., Chicago, III.—Construction permit for a new Class II television broadcast station to be operated on 41000-50000 kc., 1000 watts for visual and aural, A3 and A5 Emission.

NEW—National Broadcasting Co., Inc., Mobile.—License to cover construction permit for a new high frequency broadcast station to be operated on 1290 kc., 250 watts, unlimited time. Amended to request frequency change to 1530 kc., increase power requested from 250 watts to 1 KW, change type of transmitter and request Class III station, changes in antenna.

MISCELLANEOUS

NEW—National Broadcasting Co., Inc., Chicago, Ill.—Construction permit for new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—National Broadcasting Co., Inc., Chicago, Ill.—Construction permit for new Class II television broadcast station to be operated on 81000-300000 kc., 1000 watts visual and aural, A3 and A5 Emission.

NEW—New York University, New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 1880 kc., 250 watts, unlimited time. Amended to increase power requested from 250 watts to 1 KW, change type of transmitter and request Class III station, changes in antenna.

NEW—National Broadcasting Co., Inc., Washington, D. C.—Construction permit for a new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—National Broadcasting Co., Inc., Washington, D. C.—Construction permit for a new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—National Broadcasting Co., Inc., Denver, Colo.—Construction permit for new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—National Broadcasting Co., Inc., Stanford, Fla.—Construction permit for a new broadcast station on 1380 kc., 250 watts, unlimited time. Amended to change request in frequency to 1530 kc., increase power requested from 250 watts to 1 KW, change type of transmitter and request Class III station, changes in antenna.

NEW—Central Broadcasting Corp., Sanford, Fla.—Construction permit for a new high frequency broadcast station to be operated on 49000-50000 kc., 1000 watts, special emission for frequency modulation.

NEW—National Broadcasting Co., Inc., Cleveland, Ohio.—Construction permit for a new high frequency broadcast station to be operated on 44000-50000 kc., 1000 watts, special emission for frequency modulation.

NEW—New York University, New York, N. Y.—Construction permit for a new non-commercial educational broadcast station to be operated on 41500 kc., 250 watts, Emission A-3, unlimited time, to be located at 35 West Fourth St., School of Education Bldg., New York, N. Y.

NEW—National Broadcasting Co., Inc., Columbus, Ohio.—License to cover construction permit for a new high frequency broadcast station to be operated on 45000 kc., 1000 watts, special emission for frequency modulation.

NEW—National Broadcasting Co., Inc., Columbus, Ohio.—License to cover construction permit for a new high frequency broadcast station to be operated on 45000 kc., 1000 watts both visual and aural, A3 and A5 Emission.

NEW—National Broadcasting Co., Inc., Cleveland, Ohio.—Construction permit for new high frequency broadcast station to be operated on 43400 kc., 1000 watts, special emission for frequency modulation.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Badger-Broedhead Cheese Company—See National Dairy Products Corp.

Borden Company—See National Dairy Products Corp.

Coal Carburetor Company—Alleging violation in the sale of a device for facilitating combustion of coal and incidental gases in coal-burning furnaces, a complaint has been issued against The Coal Carburetor Company, New Brunswick, N. J., and Thornton W. Price, its president. It is alleged that the respondent corporation represents or implies in its advertising matter that its product, “Coal Carburetor,” will do what no other known device or method, or any combination thereof, can do, and constitutes unfair methods of competition within the meaning of the Federal Trade Commission Act, according to the complaint. (4070)

Ehrhart Conrad Company, Hanover, Pa., is charged, in a complaint, with selling and distributing food products designated “Plee-zing Treasure Chest” device, on which receipts. Various prizes are awarded, according to designations beneath the unbroken seal. The respondent corporation refuses to dealers the awards and prizes distributed by the dealers in accordance with the designations under the seals. The respondent’s preparation “Pow'-O-Lin” allegedly was advertised as possessing beneficial therapeutic properties for curing, remediying or treating constipation and “faulty elimination” and for overcoming symptoms of constipation which were given as biliousness, indigestion, gas pains, headaches, dizziness, pains in the back and chest, stiffness of the joints, swollen feet and ankles, nervousness, insomnia, loss of appetite and lack of energy. It is alleged that the respondent’s representations were misleading in that its preparation possesses no therapeutic properties in excess of those of a cathartic or laxative and that the symptoms set out are not generally typical of any group of disorders and are not necessarily indicative of constipation or faulty elimination. (4067)

Herb Juice-Peel Company, Inc., a Danville, Va., corporation doing business under the trade name of Pow-O-Lin Laboratories, is charged with misrepresentation in the sale of medicine in a complaint. The respondent’s preparation “Pow-O-Lin” allegedly was advertised as possessing beneficial therapeutic properties for curing, remediying or treating constipation and “faulty elimination” and for overcoming symptoms of constipation which were given as biliousness, indigestion, gas pains, headaches, dizziness, pains in the back and chest, stiffness of the joints, swollen feet and ankles, nervousness, insomnia, loss of appetite and lack of energy. It is alleged that the respondent’s representations were misleading in that its preparation possesses no therapeutic properties in excess of those of a cathartic or laxative and that the symptoms set out are not generally typical of any group of disorders and are not necessarily indicative of constipation or faulty elimination. (4067)

March 29, 1940
Kraft-Phenix Cheese Corp.—See National Dairy Products Corp.

National Dairy Products Corporation—Six corporations purchasing for resale approximately 75 per cent of the foreign type cheese produced in Wisconsin are charged in a complaint with combination and conspiracy to control prices and monopolize the supply of these products. Respondents are National Dairy Products Corporation, New York; The Borden Company, New York; Kraft-Phenix Cheese Corporation, Chicago; Badger-Brodhead Cheese Company, Monroe, Wis.; J. S. Hoffman & Co., Chicago, and Triangle Cheese Company, Monroe, Wis.

The complaint also alleges that by means of mergers and purchases, The Borden Company and also the Kraft-Phenix Cheese Corporation acting on behalf of its parent company, National Dairy Products Corporation, have gradually eliminated practically all of the independent cheese dealers once operating in the Monroe, Wis., area where a large percentage of the American-made Swiss supply of these products. Respondents are National Dairy Products Corporation, New York; The Borden Company, New York; Kraft-Phenix Cheese Corporation, Chicago; Badger-Brodhead Cheese Company, Monroe, Wis.; J. S. Hoffman & Co., Chicago, and Triangle Cheese Company, Monroe, Wis.

The complaint also alleges that by means of mergers and purchases, The Borden Company and also the Kraft-Phenix Cheese Corporation acting on behalf of its parent company, National Dairy Products Corporation, have gradually eliminated practically all of the independent cheese dealers once operating in the Monroe, Wis., area where a large percentage of the American-made Swiss supply of these products. Respondents are National Dairy Products Corporation, New York; The Borden Company, New York; Kraft-Phenix Cheese Corporation, Chicago; Badger-Brodhead Cheese Company, Monroe, Wis.; J. S. Hoffman & Co., Chicago, and Triangle Cheese Company, Monroe, Wis.

The complaint points out that National Dairy Products Corporation directs and controls the policies of its wholly owned subsidiary, Kraft-Phenix Cheese Corporation which, in turn, controls the policies and owns all the stock, except certain qualifying shares, of Badger-Brodhead Cheese Company of Monroe, Wis., which buys, sells and distributes foreign type cheese. The Borden Company, according to the complaint, operates at Monroe a division for the buying, selling and distributing of foreign type cheese under the name of Carl Marty & Co., and J. S. Hoffman & Co., Chicago cheese dealer, owns the stock of and controls the policies of Triangle Cheese Company, of Monroe, Wis., which buys foreign type cheese for sale and distribution by the parent corporation.

The complaint points out that National Dairy Products Corporation directs and controls the policies of its wholly owned subsidiary, Kraft-Phenix Cheese Corporation which, in turn, controls the policies and owns all the stock, except certain qualifying shares, of Badger-Brodhead Cheese Company of Monroe, Wis., which buys, sells and distributes foreign type cheese. The Borden Company, according to the complaint, operates at Monroe a division for the buying, selling and distributing of foreign type cheese under the name of Carl Marty & Co., and J. S. Hoffman & Co., Chicago cheese dealer, owns the stock of and controls the policies of Triangle Cheese Company, of Monroe, Wis., which buys foreign type cheese for sale and distribution by the parent corporation.

The respondent corporations purchase the annual foreign type cheese output of approximately 200 of the 250 cheese factories in the Monroe, Wis., area, according to the complaint.

Pursuant to the combination and conspiracy, the respondents allegedly (1) fixed the prices to be paid the Monroe factories for foreign type cheese; (2) held monthly meetings with Monroe cheese factory representatives to fix and establish such prices, and (3) had their representatives hold separate meetings among themselves prior to gathering with the factory representatives, at which separate meetings the respondents' agents set the upper limits as to the prices they would agree to pay the cheese factories.

The combination and the practices performed pursuant to it are alleged to have had a tendency to bring about (1) control of prices at which foreign type cheese is sold in the United States; (2) determination, at least in part, of the prices at which dairy products other than foreign type cheese are sold in commerce; (3) monopolization in the respondents of the entire supply of foreign type cheese; (4) unreasonable suppression of competition in the purchase of foreign type cheese in the Monroe, Wis., area and in its resale, all in violation of the Federal Trade Commission Act.

Until 1921, the complaint recites, many cheese dealers actively competed for the output of the Monroe factories but a gradual centralization of control soon took place so that there is now a centralized control in the sale of the factories' output, brought about as follows:

The first merger of consequence was in 1911, when 7 independent cheese dealers in the Monroe area organized the Badger Cheese Company of which Kraft Cheese Company became the full owner in 1925. Phenix Cheese Company began operations in the Monroe area in 1918; then the Kraft and Phenix interests merged and in 1928 the Kraft-Phenix Cheese Corporation bought the stock and assets of Brodhead Cheese & Cold Storage Co., which they combined with the Badger Cheese Company to form the Badger-Brodhead Cheese Company which is one of the largest, if not the largest, buyer of foreign type cheese in the United States. In 1929 Kraft-Phenix Cheese Corporation obtained the business of Charles Zweifel & Co., Monroe, Wis., then one of the Monroe area's largest dealers.

In 1938, Carl Marty & Co., of Monroe, a large buyer of foreign type cheese, purchased the assets and goodwill of Ackerman & Alplanalp, third largest buyer of foreign type cheese in the area, and on January 1, 1939, The Borden Company entered the Monroe territory by its purchase of the stock and assets of Carl Marty & Co. Pow-O-Loo Laboratories—See Herb Juice-Penol Company, Inc.

March 29, 1940 4140

Triangle Cheese Company—See National Dairy Products Corp.

Arthur Wood & Company—Arthur Wood, trading as Arthur Wood & Co., 219 Market St., St. Louis, is charged in a complaint with the sale and distribution of merchandise involving lottery methods, and the sale and distribution of lottery devices placing in the hands of dealers the means of conducting lotteries, games of chance or gift enterprises in the sale and distribution of their merchandise.

The complaint is divided into two counts, the first of which alleges that the respondent sells to jobbers and dealers assortments of merchandise so packed and assembled as to involve the use of lottery schemes when sold to ultimate purchasers. One of these assortments consists of 12 knives, together with a device commonly called a punch board. The knives are distributed to purchasers of 5-cent punches on the board, the numbers being effectively concealed from purchasers until a punch or selection has been made, and the knives being distributed to purchasers of the winning numbers wholly by lot or chance.

The second count of the complaint alleges that the respondent sells and distributes many kinds of push cards and punch boards involving the same chance or lottery features when used in connection with the sale of merchandise.

The complaint alleges that the sale of merchandise to the purchasing public in the manner alleged encourages gambling and is a practice contrary to public policy and in violation of criminal laws. The sale and distribution of push cards and punch boards, the complaint continues, places in the hands of others the means of conducting lotteries, games of chance or gift enterprises, and the means of engaging in unfair methods of competition and unfair and deceptive acts and practices within the meaning of the Federal Trade Commission Act. (4069)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

American La France & Foamlite Industries, Inc.—See Walter Kidde & Co., Inc.

Commonwealth Publishing Company, Chicago, Ill., according to findings, advertised its "Liberty Income Tax Record" book by representations such as "A Helping Hand from Uncle Sam! Federal and State Tax Laws now command every business to keep tax records. None dares risk heavy fines and penalties." * * *

"The Liberty Tax Record is the only real protection. Officially O.K.'d by tax authorities everywhere. * * *"

Through such assertions as the foregoing the respondent is found to have represented that Federal and State laws require that books of account be kept on the respondent's record books and that its books have been approved by Federal and State officials or taxing authorities, when in fact, although certain State and Federal officials have written that the respondent's book is useful in keeping income tax records, no such official has officially approved the respondent's book or is permitted to approve any tax record book or bookkeeping system.

Under the Commission order, the respondent is directed to cease representing that Federal and State laws require that books of account be kept on the respondent's record books and that its books have been approved by Federal or State officials or taxing authorities. The order also directs the respondent to desist from the representation that it is a printer or binder of record books and bookkeeping systems. (3668)

C-O-Two Fire Equipment Co.—See Walter Kidde & Co., Inc.

Darling & Co., Chicago, has been ordered to discontinue unfair competitive methods in connection with the purchase of raw materials such as processed hides, calf skins, fat, bones and such which it processes and sells as finished products.

Findings are that because of this company's financial strength it is the predominating organization in its business in the territories in which it and its subsidiary corporations operate.
With the intent to injure and eliminate competition in the purchase of its raw materials, the Commission finds, the respondent corporation has: (1) paid in localities in which it meets competition prices higher than justified by trade conditions, and quoted such prices without intending to pay them; (2) enticed, by the payment of higher wages and by other means, drivers covering routes of sources of supply of raw materials of its competitors to leave their employ and enter the respondent's employ for the purpose of obtaining the supply of raw materials previously obtained by such drivers for competitors; (3) held out certain of its subsidiary corporations as being independent of and from the respondent, and (4) solicited the making of loans, and pursuant to such solicitation, made loans to butchers in Detroit, Cleveland and other cities upon the agreement that such butchers sell all of the fats, bones, suet and other offal from their shops exclusively to the respondent company, which was done.

The Commission concluded that the respondent's practices have injured competition in the purchase of raw materials of the class dealt in by the respondent and have tended to create in the respondent corporation in the territories in which it operates a monopoly in the purchase of these materials. (3766)

Fyroot Company, Inc.—See Walter Kidde & Co., Inc.

Walter Kidde & Co., Inc.—Five fire fighting equipment companies have been ordered to cease and desist from price fixing activities in violation of the Federal Trade Commission Act and has directed one of them to discontinue exclusive dealing contracts in violation of the Clayton Act.

The Commission finds that Walter Kidde & Co., Inc., assignee of two patents governing the successful manufacture, assembly and operation of carbon dioxide portable fire extinguishers, has issued license agreements, based on both patents (one of which has expired), to the other respondents, attaching to each agreement a "Schedule of Minimum Prices and Terms" including uniform prices at which the respondents have sold parts, accessories, apparatus and equipment such as hose assemblies, cylinders and carrying straps, in violation of the Federal Trade Commission Act.

All of the respondents, the findings continue, pursuant to the uniform price agreements, manufacture, sell, distribute and deliver parts, accessories, apparatus and equipment, in response to Governmental invitations for competitive bids. The findings show instances in which all the respondent companies responded to an invitation for competitive bidding to supply fire fighting equipment to the United States Navy, each submitting bids that were identical one to another and to figures then appearing in the agreed minimum price schedule.

Findings are that in violation of the Clayton Act, Walter Kidde & Co., Inc. licensed the respondent National Foam System, Inc., not a manufacturer, to make, sell, install and use the inventions set forth in the respondents' agreement; that this license is not a license to manufacture but to assemble the parts, accessories and apparatus purchased from the licensor, and that, under such agreement, National Foam System, Inc., has been required to purchase from Walter Kidde & Co., Inc., all of its requirements of such commodities whether to be used by National Foam System, Inc., in assembling completed units of the carbon dioxide type of apparatus or whether to be resold separately from the completed units and under the agreed uniform price schedules.

The Commission order directs the respondents to cease effectuating combinations or agreements for fixing and maintaining the sale or purchase price for parts, accessories and apparatus for use or in connection with the manufacture or assembly of carbon dioxide fire extinguishing systems and carbon dioxide portable fire extinguishers; from compiling, publishing and distributing any list of prices for such commodities, and from filing bids where competitive bids are called for by Governmental invitations for contracts or purchases by other buyers, in violation of the Federal Trade Commission Act.

Walter Kidde & Co., Inc., is also ordered to desist from making any sale or contract for the sale of these commodities for use or resale, or fixing a price charged therefor on the condition, understanding or agreement that the purchaser shall not or use or deal in the commodities of this respondent's competitors, in violation of the Clayton Act. (3929)

M. Linkman & Company—Orders prohibiting lottery methods in connection with the sale of merchandise to ultimate consumers have been issued against M. Linkman & Co., 1150 West Fullerton Ave., Chicago, smoking pipe manufacturer, and William A. Frew, Paradise, Pa.

The respondent Frew has traded under the names Paradise Products Company, Paradise Seed Company, Paradise Candy Company, Paradise Chocolate Company, Square Deal Company, Lancaster Seed Company, Lancaster Seed Company, Garden Spot Seed Company, Garden Seed Company of America and Good Luck Gardens, and has sold candy, garden seed, watches, blankets, towels, musical instruments, housekeeping sets, flashlights, cameras and other articles.

The Commission orders direct the respondents to cease and desist from (1) selling and distributing merchandise so packed and assembled that sales to the public are to be or may be made by means of a game of chance; (2) supplying to or placing in the hands of others (a) assortments of merchandise together with purchase or pure cards, punch boards or other lottery devices, or (b) such devices either with assortments of merchandise or separately, which devices are to be or may be used in selling such merchandise to the public, and (3) selling or otherwise disposing of any merchandise by means of a gift enterprise or lottery scheme. (4018 and 3603)

National Foam System, Inc.—See Walter Kidde & Co., Inc.

Process Engraving Company—Ann W. Carter, trading as Process Engraving Company, San Francisco, Cal., is found to have advertised the process by which she produces social and business stationery sold by her as being "engraving" and her business as being that of an engraver, when in fact her products were printed by a thermographic process in which a chemical composed mainly of resin was used to produce the raised letter effect instead of by the more expensive engraving process preferred by many buyers.

The Commission order directs the respondent to cease using the words "engraving", "process engraving", or any derivative of the word "engrave", to designate the respondent's stationery products or any of the respondent's processes, to represent that the products by a process consisting essentially in the application of blank stationery to an inked intaglio plate under pressure sufficient to force the surface of the stationery into the letters or designs cut or incised in the plate, so that the ink in the plate adheres to the stationery to form the characters in relief and raised from the plane of the surface. (3637)

STIPULATIONS

Following stipulations have been entered into by the Commission:

Acquin Pharmacal Company, also trading as Acquin Products Company, St. Louis, Mo., agrees to cease making representations which convey the impression that its preparation "Acquin" is competent or effective in treating headaches, simple neuralgia, which convey the impression that its preparation "Acquin" is competent or effective in treating headaches, simple neuralgia, colds, sore throat or other ailments, or is efficacious for any purpose other than as a temporary relief of minor pains or the mild discomforts incident to them. (2711)

Acquin Products Company—See Acquin Pharmacal Company.

Braun Club—William Michael Braun, operating The Braun Club, 353 West 47th St., Chicago, has entered into a stipulation to cease misleading representations in the sale of memberships in a correspondence club and lists of persons seeking correspondents for social and matrimonial purposes.

In his advertising the materant represented, according to the stipulation, that he knows or has good reason to believe
that members of his club are wealthy and have good business or professional positions; that all persons joining the club will receive many interesting letters and photographs; that members who are designated "special" will secure satisfactory results, and that his enterprise is of service generally to one who is lonesome or wants a wife, husband or sweetheart.

The stipulation relates that the respondent neither investigates to ascertain the moral, business, professional, or social standing of those seeking correspondents, husband or sweetheart; that his enterprise is of service generally to one who is lonesome or wants a wife, husband or sweetheart.

The respondent agrees to cease making certain specific representations regarding his service unless they are supported by sufficient investigation as to the actual facts, and to discontinue advertising that parties seeking correspondents are worth any specified amounts, or have any standing other than that disclosed by competent investigation, unless the source of his information is set forth. (02530)

Brigham Oil Burner Company.—A stipulation to discontinue misleading representations in the sale of oil burners used in heating and cooking stoves, has been accepted from James W. Brigham, trading as Brigham Oil Burner Company and as Ace-Heat Oil Burner Div., Metallic Manufacturing Company, 4367 Duncan Ave., St. Louis. Other respondents are Metallic Manufacturing Company and Peter Parr, its vice president, both of St. Louis.

The respondents agree to discontinue the use, or permitting the use, of the words “Ace-Heat Oil Burner Div., Metallic Manufacturing Company” as a trade name for the individual business of James W. Brigham, or in any manner representing that such business is that of the Metallic Manufacturing Company or other corporation, or is a division thereof.

The stipulation recites that by arrangement with Metallic Manufacturing Company and with Peter Parr, the respondent conducted portions of his business as “Ace-Heat Oil Burner Div., Metallic Manufacturing Company”, and as “Ace-Heat Oil Burner Div., Metallic Mfg. Company, Pete Parr, President”, when in fact it was the individual business of Brigham as sole proprietor, and neither the Metallic Manufacturing Company nor Peter Parr had any financial or proprietary interest therein.

According to the stipulation, Metallic Manufacturing Company makes some, but not all, of the parts contained in the assembled burners sold by Brigham, who buys such parts as a customer; the purported “Ace-Heat Oil Burner Division” of the corporation is non-existent, and neither Peter Parr nor any other person is "president" of such fictitious entity, as was advertised.

The respondents also stipulate that, among other representations, they will cease using the word “diver” in a manner conveying the impression that the device sold has influenced the general sale and distribution of oil burners as the “diver” has done in the automobile field, or in any other manner representing that this is a business of great magnitude or national importance. (2714)

Martha Maid Manufacturing Company, Chicago, Ill., in the sale of women’s undergarments, stipulates that it will desist from use of the term “Pure Dye” as applied to any fiber or fabric or part of fabric unless such material so described is exclusively pure silk without any other fiber, weighting, excess finishing or dyeing materials, or loading or adulterating materials. If the term “Pure Dye” is used in a truthful manner as descriptive of the silk content of a mixed fabric, there is to be accurately disclosed in connection with this term the fact that it applies only to the silk content of such mixed fabric, as for example “Rayon and Pure Dye Silk”.

The respondent company also agrees to cease branding or selling any product composed of rayon and other kinds of fiber or substance in such a manner as to mislead or deceive the consumer, and advertising matter, of the rayon and other content of such product, by accurately designating each constituent fiber in the order of predominance by weight, beginning with the largest single constituent, and giving the percentage of any fiber present in less than a substantial proportion. (2712)

Metalllic Manufacturing Company—See Brigham Oil Burner Company.

Premier Laboratories, Inc., Trenton, N. J., agrees to cease using the name "Premier Laboratories, Inc." as and for its corporate trade name, and to discontinue designating itself as "Manufacturing Chemists and Perfumers," when it neither owns and operates nor directly controls the plant in which the goods it sells are made. (2718)

Professional Laboratories, Inc.—Agreeing to discontinue misleading representations in the sale of a medicinal preparation, Professional Laboratories, Inc., Bloomfield, N. J., has entered into a stipulation.

The respondent agrees to cease representing that its product “Tri-Costivin” is not a laxative; that it will normalize or regulate the flow of gastric juice and that, generally and without regard to vitamin deficiencies, this or any like product will invigorate the nervous mechanism or control the stomach or intestinal musculature.

The stipulation recites that, according to reliable medical authority, the respondent’s product contains three ingredients having specific laxative action and is a laxative notwithstanding the respondent’s assertion to the contrary. The product, according to the stipulation, will not normalize gastric juice secretion and, unless in the relatively rare cases of Vitamin B1 and B2 deficiency, will not invigorate the nervous system or control the stomach or intestinal muscular activity.

The respondent also stipulates that it will desist from the representation that by the additional influx of function-energizing hormones, the product will increase the activity of the pancreas or the duodenum, when in fact it is not of such hormonal, and, any use of the word "diver" in a manner conveying the impression that the device sold has influenced the general sale and distribution of oil burners as the “diver” has done in the automobile field, or in any other manner representing that this is a business of great magnitude or national importance. (2713)

Royal Manufacturing Company, Bowling Green, Ohio, agrees to desist from the use in its advertisements of the word “Chrome” as descriptive of the heating elements of its electric poultry brooders, or from the use of this word or any colorable imitation of the word “Chromot” so as to imply that the heating elements are composed of chromium. The stipulation provides that if these elements are composed in substantial part of chromium and in part of other metal, and the word “Chrome” is used to refer to the chromium content, then that word shall be immediately accompanied by other words or phrases in conspicuous type to indicate clearly that the heating elements are not made wholly of chromium but contain in part some metal other than chromium. (2717)

Standard Milling Company—J. Kendell Martin, trading as Standard Milling Company, 46 Fairlie St., Atlanta, has entered into a stipulation to discontinue misleading representations in the sale of poultry, dairy and hog feeds.

Among representations which the respondent agrees to discontinue are that any of his feeds are perfectly balanced or contains every new feeding discovery of value in a poultry or livestock ration; that every ingredient in the respondent’s “Super Quality Starting Mash” is completely assimilated; that this mash is potently fortified with all the known vitamins; that the minerals present in “Super Quality Supplement Mash” are completely water soluble; that “Super Quality Growing Mash” provides the ample amounts every known vitamin; that “Super Quality Pullet Mash” will prevent the possibility of neck moul or premature production, and that “Super Quality Starting Mash” will afford the lowest mortality rate, or that any of the respondent’s hog feeds will afford the highest profit, will grow and develop swine at the lowest feeding cost, will maintain good health and develop swine in the shortest time or with the smallest amount of feed. (02532)

Superior Manufacturing Company—See Superior Sales Company.

Superior Sales Company—Sanford W. Binker, trading as Superior Sales Company and as Superior Manufacturing Company, Los Angeles, that of the respondent’s product designated “Superior,” will prevent or stop running or snaggling, rotting or fading, increase the breaking strength of the heel or toes of such hosiery, make it last 3 or 4 times longer than hosiery not so treated, reduce hosiery or lingerie expense one-half or more, or that use of the product can
be relied upon generally to improve the texture or set the color of silk wearing apparel. The respondent also agrees to cease using fictitious prices and to discontinue misleading uses of the words or phrases “Special Advertising Campaign,” “Free” (relating to merchandise), “Manufacturing” and “Guaranteed.” (2715)

United Publishing Company, 549 West Randolph St., Chicago, also trading as “The Home Friend,” a corporation engaged in the sale and distribution of “The Home Friend Magazine,” has entered into a stipulation in which it agrees to discontinue misleading representations in connection with a series of puzzle contests used in an advertising program to promote the sale of subscriptions to the magazine.

The respondent, according to the stipulation, made misleading representations inferentially or directly conveying to readers of its “contact advertisements” the idea that by submitting correct solutions to the advertised puzzles they could win an automobile or $1,500 when in fact no prize other than a small map of negligible value was awarded for solution of that puzzle.

The stipulation recites that the contact advertisements failed to indicate that a magazine subscription or other requirement was a condition precedent to winning any of the awards or that the sole objective was to build up a mailing list for the follow-up letters and other sales promotion literature.

The respondent stipulates that it will desist from disseminating advertisements tending to convey the impression that money or other things of value will be awarded to persons as a prize, unless all terms and conditions are clearly indicated; from representing, inferentially or otherwise, that the solving of a puzzle contained in a contact advertisement or follow-up literature may result in the winning of an automobile or money prize, when such is not a fact, and from using representations in or pertaining to contact advertisements, follow-up literature or otherwise, which infer that persons answering the advertisements or solving puzzles contained therein will thereby get an opportunity to win an automobile, cash prize or other valuable thing or attain any material benefit other than that which may accrue as a result of entering into a subsequent contest, the outcome of which is to depend on the number of magazine subscriptions or other commodities sold or services rendered by the various contestants.

The respondent also agrees to discontinue using any progressive, integrated or continuous plan to sell magazine subscriptions, commodities or merchandise unless every step or phase of the plan is clearly set forth in the first mailing list to the prospect, before any money or service is accepted, showing without ambiguity exactly what will be expected of the prospect and what compensation or reward will be given for each act or payment required in contending for a prize, award, premium or other advantage or benefit. (2716)

Variety Foods, Inc., Indianapolis, Ind., stipulates that in the sale of “Vigor,” its canned food for dogs, it will desist from use of the term “Meat By-products” as descriptive of an ingredient of which the food is composed, and from use of this term in a manner implying that the food contains an edible part other than meat which has been derived from the carcases of animals, as cattle, swine, sheep or goats, in good health and sufficiently mature at the time of slaughter. (2719)

Zonite Products Corporation, 405 Lexington Ave., New York, has entered into a stipulation to cease misleading representations in the sale of preparations designated “Zonite Ointment,” “Zonite Liquid” and “Vaginal Suppositories (Zonitors)”.

Among representations which the respondent agrees to discontinue are that the cause of menstrual distress is often due to the presence of germs, or that the problem of feminine hygiene is eliminated by the use of the respondent’s products or that they are a competent treatment for leucorrhea.

Other representations which the respondent agrees to discontinue are that “Zonite Liquid” has a smoothing action on the membranes or may always be used without risk, or that it can never injure delicate tissues; that its use assures freedom from grippe, colds, coughs and other diseases of the respiratory system; that it is effective in combating the cause of pyorrhea; will control all dandruff or itchy scalp skin; end dandruff or itchy scalp; kill onion breath permanently, and that the respondent’s products are the only antiseptics which are non-poisonous under similar conditions of use and that “Zonite Liquid” or “Zonite Ointment” are 100 per cent effective in preventing athlete’s foot or will assure the user of immunity therefrom. (02531)

4143

March 29, 1940
Important To All Broadcast Station Executives:

In spite of the taunts and sneers of ASCAP, Broadcast Music, Inc. forced ASCAP'S hand and a proposal which ASCAP did not intend to make public until December 1940 was announced on March 21st. Although, upon first reading, this proposal may appear attractive, especially to the small stations, a careful study clearly reveals that the proposal is drawn for the purpose of dividing the industry so ASCAP may be able to levy increased tribute. Also, it is ASCAP'S plan, by the continuation of the blanket tax on gross receipts, to eliminate the incentive to the development of non-ASCAP music and thereby perpetuate ASCAP'S monopoly in the music field.

The proposal, although indefinite in many aspects, is sufficiently definite to outline ASCAP'S general views concerning the terms for renewal of licenses, and the proposal, plus ASCAP'S actions, clearly indicates that although lip service is given to the idea of negotiation, in effect, ASCAP has summoned its largest customers to another Munich and dictated the terms of surrender.

In studying the proposal, it would be well to keep in mind at least the following facts. Briefly analyzed, ASCAP'S proposal demands a payment of approximately $8,500,000 for 1941. This means that, considering the reasonable expected increase in business, over the next ten years broadcasters will pay a total of at least $100,000,000, not for the purchase of ASCAP catalogues, but merely for the use of same. Without consideration of the stations' views, operating problems or other interests, and without consultation with the industry, ASCAP rejects the "per program" basis of payment. ASCAP demands that broadcasters continue to pay on news broadcasts, sports events, programs of classical music and other programs containing no ASCAP music. Regardless of the possible further decline in the use of music, broadcasters must pay the same fixed percentage of their gross; regardless of the popularity or merit of non-ASCAP music, or the development of other sources of music, broadcasters must pay the same fixed percentage of their gross to ASCAP.

ASCAP, in theory, recognizes the principle of clearance at the source, but without any consultation with the industry as to a feasible or equitable plan, announces a plan designed to divide the industry into warring groups. No one group within the broadcasters' ranks is obligated to fight the battles of any other group, yet we know that the interests of all broadcasters are related, that an additional burden of $3,500,000 placed upon the industry, regardless of where it first falls, will in time be spread over most of the industry. We also realize that radio as an advertising medium competes with other
media, and additional costs may divert advertising to other fields. The networks have definitely stated that they cannot accede to ASCAP’S demands, and the question immediately arises as to the value of an ASCAP license to an affiliate, and even to an independent, if ASCAP tunes are not played on the networks.

Last July, the broadcasters decided to definitely solve the copyright problem. As a result of this decision, BMI has been incorporated, 284 stations have pledged $1,253,189.05, a staff has been organized, contacts made within the music field, and we are on our way for once really and constructively to solve one of our most troublesome problems. The real danger which threatens the industry today is that the apparent attractive features which are dangled before the industry in the ASCAP proposal may tempt some to accept temporary benefits rather than to continue the fight for a permanent solution.

My advice to each broadcaster is to study the proposal carefully, especially regarding the effect upon affiliates in the absence of any agreement between networks and ASCAP; the effect upon independents, in the absence of agreements of networks and affiliates with ASCAP; the effect upon our efforts ever to secure a “per program” basis of payment and the opportunity to develop non-ASCAP music; and the effect upon Broadcast Music, Inc.

In the future, we shall have other problems to meet on an industry wide basis. BMI has already produced some tangible results. Shall we grab the first benefits now, and live to regret that we did not ascertain the full possibilities of industry wide cooperation?

Lastly, may I suggest that you write me your personal views and suggestions, so that we may have the advantage of your judgment as to our future action.

Very truly yours,

[Signature]

President, National Association of Broadcasters.
Six new popular songs soon will be in the hands of all broadcasters holding BMI licenses.

Carefully selected to indicate the quality of material which BMI will supply from the pens of non-ASCAP writers, these songs are:

**HERE IN THE VELVET NIGHT** by Ernest Gold and Dan McCray
**SAGEBRUSH SERENADE** by Milton Cassel and Charlotte Cassel
**WE COULD MAKE BEAUTIFUL MUSIC TOGETHER** by Henry Manners and Robert Sour
**LET'S DRAW STRAWS** by Eugene Conrad and Robert Braine
**IN THE SILENCE OF THE DAWN** by Leon Da Costa and Samuel O. Johnson
**WHAT GOOD'S THE MOON** by Lee Wainer and Robert Sour

In announcing the release of these songs, BMI said that April 1 had been designated as the official date on which the term of licensing commenced, and that the expiration date would be determined in the light of the date on which "a substantial number of works are actually available for performance." This expiration date cannot come before April 1, 1941.

Meantime, the IRNA executive committee, CBS and NBC urged affiliates to consider the ASCAP proposal of March 21 with a view to its long-range effect. Below are the letters:

The IRNA letter:

March 23, 1940.

To All Affiliates:

On Thursday, March 21st, the ASCAP negotiators sent for the Broadcasters and told the Broadcasters the ASCAP terms for peace. This is a procedure which is apparently being uniformly adopted these days by people in a position to get what they want.

Therefore, the sole question for broadcasters now is: are the terms acceptable, and is there no alternative?

At first reading many small broadcasters seem to think they are being given satisfactory concessions and will save money on the new terms. The evident object of ASCAP is now as it was before, to split and separate the industry by offering painted candy to the little fellows. The whole ASCAP proposition is a composition for male chorus to the tune of "Sock the Networks," in the hope everybody will immediately join in with gusto.

Will it work? We affiliates have no intention of pulling chestnuts out of the fire for the networks, but common sense dictates that we are part of the networks and there is a point at which network operation becomes unprofitable. If it is the system of broadcasting, as we know it, will become a thing of the past and we know that if that happens we will all be the losers.

In the present situation what would be the result if all the individual and affiliated stations accepted the ASCAP deal and the networks refused to? You all know the basic reason all affiliates are holding out for "clearance at the source" is that network programs contain all the big popular numbers and many operators feel that they can operate locally without ASCAP music as long as the network continues to feed it. Therefore it is apparent (although not so stated in the ASCAP proposition) that its acceptability to affiliates is entirely contingent upon its acceptance by the networks. As to independent non-affiliated stations, they likewise are in the same position, though for another reason. It is the popular network programs which build up popularity for tunes; the small independents who operate largely with recordings and transcriptions would find ASCAP tunes falling upon deaf ears in their own localities unless the networks were making them familiar and popular.

It is therefore ordinary common sense that anyone who accepts or signs up the ASCAP proposition in its present form without knowing definitely what the networks will do, is buying a pig in a poke.

Suppose the networks were willing to make this ASCAP deal. It must be expected that in such event they would try to find a way to back-charge against the affiliates the extra cost of clearance at the source. If they succeed affiliates will be paying 7½% ASCAP tax on network revenue instead of 5% as at present. To that extent the ASCAP deal would cost you 50% more than it does at present.

In its present form the ASCAP proposition perpetuates a tax on gross receipts of every station and shuts out the possibility of paying only on programs or for music as used. This is contrary to the declaration of principles of IRNA and to that extent also the ASCAP proposition is unacceptable.

There is an alternative.

The industry has started out to provide itself with its own source of supply. Broadcast Music, Inc., is just beginning to function. There can be no doubt that ASCAP published its terms for a new deal in March 1940 instead of December 1940 in order to discourage the growth of BMI. Now, if ever, is the time for the broadcasting industry to stand together and act as a unit.

During the past five years we should have learned a lesson or two from the successes achieved by our employees and by the composers through collective bargaining. They stand together. So should we.

IRNA is not a collective bargaining agency. However, it can give advice. Our advice is: Don’t get up a high blood pressure over the ASCAP proposition. It is to your advantage to stand by BMI if you want to know more about it, call any member of the IRNA Executive Committee. We are at your service.

We do not have exact figures but it is estimated that ASCAP’s revenue from the broadcasting industry in the year 1940 will probably be $5,000,000. Under the new ASCAP proposition, ASCAP’s revenue on the same volume of business would be over $7,500,000. This means $2,500,000 of the industry’s revenue taken
away from somebody. Correspondingly it means that much less available for the employees of the industry, and for their employers, or else increasing costs to advertisers which will drive advertisers into other media.

Probably it is perfectly human for ASCAP to try to add 50% to its take in one year. If it is strong enough to succeed, that will only mean we are weak enough to let it. If we are, it is our own fault and we deserve no sympathy.

This letter is going to all affiliates, whether you are members of IRNA or not. You can easily see how vital it is to maintain and support an organization of affiliates in this situation. If you have not joined IRNA, we advise you to do so.

IRNA Executive Committee.

The Columbia letter:

April 4, 1940.

Dear Mr. ______:  

The American Society of Composers, Authors and Publishers, which already gets a disproportionate share of its revenue from the broadcasters, has now set out to exact an additional tribute of some four or even five million dollars from our industry. The broadcasters, meantime, have laid their own plans to break the grip of this monopoly once and for all. This letter is to advise you that so far as Columbia is concerned, we intend to fight and we believe we will win.

In considering the bait which ASCAP has held out to you in the form of a reduction in your fees, to be offset by astronomical increases from the networks, may I suggest that you bear four things in mind—

First, that the additional millions which ASCAP now seeks to exact have to come out of somebody's pocket and, in the long run, ASCAP would be enriched to that amount and broadcasters as a whole would be impoverished to that degree, regardless of how these additional sums are levied. You know our business and your own well enough to realize that adjustments would be required and that the “saving” proffered to you would, in the long run, prove illusory.

Second, that if ASCAP does succeed in dividing the industry into hostile camps—regardless of who suffers first—we will separately and individually be pushovers for them and, in the end, everybody will pay.

Third, that the brains, the energy and the money of the industry are behind Broadcast Music, Inc., and that, for the first time, we will be able to confront ASCAP with a weapon in our hands instead of meeting them unarmed and helpless, as we have in the past.

Fourth, that unless ASCAP comes to its senses, there is absolutely no present possibility that Columbia will have any ASCAP music on the network after December 31st next, and without this network plugging of ASCAP tunes the value of an ASCAP license to any station will be greatly diminished.

I am sending this letter because I think, as affiliates, you will want to know and are entitled to know of Columbia’s attitude.

Sincerely yours,

Edward Klauber.

The NBC letter:

March 26, 1940.

To the Station Manager:

You have undoubtedly received a copy of ASCAP’s letter No. 3254, dated March 21, 1940, which was mailed to all ASCAP licensees and to which was attached ASCAP’s “plan” for the licensing of broadcasting stations for the period commencing January 1, 1941.

While the plan purports to be ASCAP’s idea of a fair basis of licensing, you will note particularly that in the last paragraph of Mr. Paine’s covering letter, he offers to meet with the broadcasters to negotiate for a contract.

In connection with your study of this plan we should like to suggest a few points for your consideration:

In the first place, the ASCAP plan would result in the broadcasting industry as a whole paying between three and four million dollars more for the use of ASCAP music than it is currently paying, and most, if not all of this increase, would be placed on the networks. This huge increase would have to come out of the pockets of the broadcasters and their advertising clients. Any such increased burden on the broadcasting industry as a whole or the networks would be inordinately excessive.

The National Broadcasting Company is not opposed to the principle of clearance of music at the source providing it can be done on a basis which is legally feasible and economically sound. The plan which has been submitted by ASCAP is so intolerably burdensome upon NBC that it would be impossible for us to accede to their terms. It is obvious that the classification of broadcasting stations proposed by ASCAP outlines definitely the kind of a split which that organization desires to accomplish within the broadcasting industry. The National Broadcasting Company is prepared to assume its proper burden in the payment to copyright proprietors for their music and are willing to join with other elements of the broadcasting industry to negotiate to that end.

As you know, the National Broadcasting Company has joined hands with others in the industry to create Broadcast Music Incorporated, as an independent source of music. We have pledged ourselves to payment of approximately $250,000. A large number of stations have subscribed and paid for stock and committed themselves to pay to BMI license fees for use of its music. Currently BMI is making every possible effort to deliver to its subscribers at an early date a library of music suitable for broadcasting. The effect of the ASCAP plan upon the broadcasters’ investment in BMI is one which will need careful consideration. Certainly BMI is energetically prosecuting its efforts to line up catalogues of music and if it is to succeed it must have the continued support of the industry.

As a final thought may I suggest that you study the ASCAP plan for the effect that it will have upon you as an affiliate in the absence of any agreement between ASCAP and the networks,

Sincerely yours,

William S. Hedges.

BMI on April 3 sent out the first issue of a new publication, “Notes from BMI,” which will keep subscribers informed of developments. Subscribers should be on the lookout for it.

EXECUTIVE COMMITTEE MEETS

The Executive Committee met with Neville Miller at headquarters on Monday, and discussed Broadcast Music, Inc., and a number of other matters. Committee members present were John Elmer, WCBM; Herbert Hollister, KFBI; Paul Morency, WTIC, and Harry Wilder, WSYR.

CODE COMMITTEE TO MEET

The NAB Code Compliance Committee will meet in the Board Room at Headquarters in Washington, next Thursday, April 11. A full attendance is expected.
FLY DEFENDS COMMISSION’S TELEVISION ACTION

James Lawrence Fly, FCC chairman, defended the Commission’s action in revoking its television rules, in a Mutual-NBC Red broadcast this week.

Senator Lundeen (FL-Minn) introduced a resolution asking the Interstate Commerce Committee to investigate the Commission’s action, “to ascertain whether the Commission has exceeded its authority, and whether it has interfered with the freedom of public and private enterprise.”

The text of Mr. Fly’s speech and the statement of Senator Lundeen made when he introduced his resolution:

During the past several weeks much has been said, and even more written, about television. It is altogether appropriate that, as Chairman of the Federal Communications Commission, I should make this report to the radio public on the present status of this great invention.

In view of international conditions, American industry has the opportunity to lead the world in the development of the art of visual broadcast. Where television was advancing with youthful faltering steps in Europe, darkness has descended. Research has been stopped while all energies are devoted to war. Foreign television is paralyzed. It is singularly fortunate that in our own country neither war nor any other ruthless force can make this report to the radio public on the present status of this great invention.

In the present state of radio, broadcasting of sound has progressed to the point where reliable service can be received in nearly every home. Receiving sets are within the means of almost every family. In the meanwhile, television has been gradually approaching the threshold of the American home.

Most of us have witnessed radio grow from its laboratory stages. All of us will have the thrill of seeing television ripen into a reality for everybody to enjoy. While television is still in the experimental stage it is moving out of the laboratory. We know that it is a practical thing, and that it has great potentialities for development into a permanent instrument of entertainment, of information, and of education. Our generation has been entrusted with the responsibility of carrying forward this advance. There may be differences of opinion as to what is best for television, but no one would favor other than its orderly and healthy growth into an instrument of permanent public good.

Why is the Federal Government interested in television? And why am I impelled to make this report to you tonight?

The Federal Communications Commission was created by Congress to regulate among other things the use of radio transmitting equipment. Unless such Federal regulation existed, the public could not use the radio for either sound or vision. For it is a unique characteristic of radio that its indiscriminate use by all makes it impossible for benefits to be derived by anyone.

The only way a few may broadcast effectively is to exclude the many. The responsibility for allocating radio frequencies which shall be used for broadcasting, for the aviation services, for police radio stations, for the preservation of life and property at sea, for television, and for a multitude of other purposes, places a grave responsibility on the Commission.

But to make the point more specifically, what are the other functions of the Federal Communications Commission relating directly to television? Let me quote from the Communications Act:

“The Commission, from time to time as public interest requires, shall

“Study new uses for radio, provide for experimental uses of frequencies, and generally encourage the larger and more effective use of radio in the public interest...”

“Regulate the kind of apparatus to be used with respect to its external effects and the purity and sharpness of the emissions from each station and from the apparatus therein;...”

“Make such regulations not inconsistent with law as it may deem necessary to carry out the provisions of this Act.”

In other words the Congress has placed upon the Commission the duty to issue licenses for experimental operations; the duty to foster research and development, and to encourage the achievement of high standards—once they have been achieved by the industry’s engineers.

It is likewise under a clear mandate to regulate the kind of apparatus to be used in radio broadcasting, including television, and to promulgate appropriate regulations. We should be deliric in our duty to the public if we should disregard this mandate of the Congress, or if we should permit any business interest to render it ineffective.

We should also be avoiding our obligation if, in the regulation of the experimentation, and of the transmitting apparatus, and its methods of operation, we ignored the current state of the science. As most of you know, television has been developing for several years. For more than ten years the Commission has issued licenses to enable the engineers of the industry to carry on experimental operations. Under authority of the Commission, actual television programs have been broadcast for a number of years. Commission members and the staff, during the last two years, have made an extensive study of the engineering developments, potentialities, and problems.

Recently the Commission undertook a study to ascertain the present situation of television as a basis for proposed rules for the licensing and operation of stations. We scheduled hearings in Washington and visited every broadcaster and every manufacturer interested in television to participate.

Scientists were invited to give the Commission their views on the status of the art. Extensive public hearings were held. The Commission made personal inspection trips to obtain first hand information of television in actual operation. The Commission
issued its report on February 29th of this year. It also issued new rules and regulations for this service. I should like to read a significant portion of the Commission’s unanimous television report:

“That research should not halt and that scientific methods should not be frozen in the present state of the art is fairly to be deduced from the engineering testimony of representatives of the companies represented at the hearing. Actual demonstrations to members of the Commission indicate the need for further improvement in the technical quality of television. The evidence before the Commission leaves a substantial possibility that the art may be on the threshold of significant advances. Research in fact does and should continue in significant phases of the field.”

We pointed out that television engineering is in a state of flux and added:

“The issuance or acceptance of transmission standards by the Commission, especially in combination with the more extensive experimental program on the part of manufacturers, would cause an abatement of research. To a greater or less extent the art would tend to be frozen at that point.”

“Even more important,” we warned, “nothing should be done which will encourage a large public investment in reception apparatus which will in all probability develop under these rules, would have a tendency to stimulate activity on the part of manufacturers and the public in the sale and purchase of receivers for home use. It is inescapable that this commercial activity inspired and then received by the existence of Commission standards would condition the market for television apparatus for many years to come.”

We recognized the admitted need for further experimentation and the fact that future discoveries will not demonstrate their inadequacy. In conscience, all must agree that nothing should be done which would shackle the ability of television to move forward. Venture to hope that soon a set of standards will prove itself as meriting adoption. We know there can never be absolute assurance that future discoveries will not demonstrate their inadequacy. I do believe, however, that the American public would deem the Commission unfaithful to its trust if it adopted, or standing by, any single set of standards which, however devised, was unsuitable for television broadcasting, unless and until that point of time was reached when the public ultimately will derive vast benefits. In the meantime the public ultimately will derive vast benefits. In the meantime the Commission must insist upon the best that can be had for the public’s welfare.”

The answer is not readily obvious, but it is fundamental and, I think, thoroughly understandable. The fact is that television is not like ordinary broadcasting, not like the automobile, not like motion pictures.

First let us consider the case of the broadcast of sound alone. Such broadcasting in the United States is roughly twenty years old. It is curious that all the time during this period there has been vast improvement in the technique of radio transmission and reception. There has, however, been no change in the fundamental standards for transmission and reception during that entire period. A receiver built to receive a broadcast station operating in 1920 will receive a broadcast station operating in 1940. A receiver built in 1920 can be received by radios in use today. Better transmitters are being built now than were being built in 1920, and the same is true of receivers, but they all operate on the same principle or more technically, on the same basic standards. Improvements have been gradual. Obsolescence has taken only a normal toll.

The automobile may be similarly characterized. Our streamlined cars of today bear no resemblance either in appearance or performance to the wheezing, coughing, horseless carriage of thirty-five years ago. But that ancient jalopy will still run.

Television is different entirely. It is unique, so.

In the case of television, a receiving set is so synchronized with the transmitter that the two are inseparable in operation. The receiving set is, in effect, the key which unlocks the transmitter in order to receive the broadcast. A substantial change in the lock requires a new key. Such necessity results from a dependence of the television receiver upon the operation of a television transmitter in the vicinity, and, conversely, the dependence of a television transmitter upon the existence of television receivers capable of receiving it, if it is to have any public value, is the vital difference between television receivers and automobiles, for example. It is the Commission’s clear duty to license television transmitters to supply programs for television receivers in the hands of the public. The Commission cannot ignore what the public does with respect to the purchase of television receivers.

Then, too, there are today different methods of transmitting television signals.

A television receiving set capable of receiving the signal of one type of transmitter may not accept the signal of a different type of transmitter in existence today. The receiving set must be constructed to operate on the same principle as the particular transmitter. If the American people should buy television receivers in great numbers as they have bought ordinary radios, and if at a later date transmission standards are adopted which contemplate an alternative or improved transmission system over that on which the particular receivers can operate, we should, in effect, be charging the public with the heavy risk of the cost of improvement and of the resolution of disputed technical questions, these risks should not be taken. The Commission is, therefore, reserving the matter of issuing standards for consideration at some future time.

These words would seem to have made the Commission’s attitude perfectly clear.

However, it might be helpful to explain the term “transmission standards.” As I have already indicated, the Commission is charged with the duty of regulating the kind of transmitting apparatus used with respect to its external effects. Such regulation is done by the issuance of engineering transmission standards. “Transmission standards,” then, are the engineering rules laid down by the Commission to govern the types of radio transmitters and their operation. The problem of formulating such standards in the case of television is fraught with peculiar difficulties during this developmental stage.

Let me explain why this is so. There is at present in the television industry a very wholesome state of competition between rival manufacturers to develop their transmitting apparatus to a point where the quality of reception of their telecast pictures will be superior to those of any other manufacturer. It was the Commission’s testimony that there has been, however, a universal concurrence of the engineering profession, that no one manufacturer of transmitting equipment has yet perfected his apparatus to a point where it should be accepted as the standard for universal application. On the contrary, no voice has dissented with the proposition that further research and experimentation is needed. The recently adopted rules and regulations of the Commission governing television broadcasting recognize this engineering fact. The Commission, therefore, deliberately refused to place its final approval upon any present type of transmitting equipment. It was the Commission’s testimony that the transmission standards, then, are merely a reflection of the engineering opinion in the television industry that there were still too many improvements in sight to warrant standardization at this time. It seems clear that the research should continue, and that order and caution should be the keynote to foster that improvement.

What a great tragedy it would be if today some heedless power, for the sake of an immediate short-sighted interest, should obstruct television’s progress and leave it dwarf-like in the shadow of its own great potentialities. But, you may readily ask, “How can this happen to television? It didn’t happen to motion pictures; it didn’t happen with automobiles; it didn’t happen with the advance of ordinary broadcasting itself.” Why, then, the special solicitude for the future advance of television?

The answer is not readily obvious, but it is fundamental and, I think, thoroughly understandable. The fact is that television is not like ordinary broadcasting, not like the automobile, not like motion pictures.

However, it might be helpful to explain the term “transmission standards.” As I have already indicated, the Commission is charged with the duty of regulating the kind of transmitting apparatus used with respect to its external effects. Such regulation is done by the issuance of engineering transmission standards. “Transmission standards,” then, are the engineering rules laid down by the Commission to govern the types of radio transmitters and their operation. The problem of formulating such standards in the case of television is fraught with peculiar difficulties during this developmental stage.

Let me explain why this is so. There is at present in the television industry a very wholesome state of competition between rival manufacturers to develop their transmitting apparatus to a point where the quality of reception of their telecast pictures will be superior to those of any other manufacturer. It was the Commission’s testimony that there has been, however, a universal concurrence of the engineering profession, that no one manufacturer of transmitting equipment has yet perfected his apparatus to a point where it should be accepted as the standard for universal application. On the contrary, no voice has dissented with the proposition that further research and experimentation is needed. The recently adopted rules and regulations of the Commission governing television broadcasting recognize this engineering fact. The Commission, therefore, deliberately refused to place its final approval upon any present type of transmitting equipment. It was the Commission’s testimony that the transmission standards, then, are merely a reflection of the engineering opinion in the television industry that there were still too many improvements in sight to warrant standardization at this time. It seems clear that the research should continue, and that order and caution should be the keynote to foster that improvement.

What a great tragedy it would be if today some heedless power, for the sake of an immediate short-sighted interest, should obstruct television’s progress and leave it dwarf-like in the shadow of its own great potentialities. But, you may readily ask, “How can
participation in television experimentation in order that the television of the future may be molded to reflect the desires of the public. That knowledge, however, should be publicly known. The American public is in a position to play an important role. The United States Senate has been informed that in connection with television and for that reason I believe the true facts should be reported to you. I firmly believe, with all deference to those who may hold the contrary view, that a full statement of all the facts is the surest way to promote television.

STATEMENT BY MR. LUNDEEN

Mr. President: I have introduced a resolution requiring an investigation by the Interstate Commerce Committee of actions by the Federal Communications Commission in connection with the development of television and asking the committee to inform the Senate if, in connection with the Commission's conclusion of orders on television, the Commission has exceeded its authority and whether it has interfered with the freedom of public and private enterprise. The Commission issued an order some time ago permitting limited television operation on September 1, 1940. Television interests immediately started the manufacture of television sets and launched an advertising and selling campaign. I have read where an official of the Radio Corporation of America of television sets and launched an advertising and selling campaign. I have read where an official of the Radio Corporation of America stated publicly that his company has spent about $75,000,000 in developing television and in trying to create a new art and a new industry. Unquestionably other interests have likewise spent tremendous sums and, for one, do not believe that such development should be arbitrarily retarded by some bureau here in Washington. I am not at all sure that the Federal Communications Commission was ever delegated such authority as it is attempting to exercise in connection with television and for that reason I believe the Senate Interstate Commerce Committee should place the facts before the United States Senate.

FCC ANNOUNCES PROCEDURE FOR TELEVISION HEARING

The FCC by its Order No. 65, on March 23, 1940, reopened the hearing on television (Docket No. 5806) for further testimony to determine (1) whether research and experimentation and the achievement of higher standards for television transmission are being unduly retarded by recent promotional activities, requiring any additions, modifications, revisions, or amendments of the rules adopted February 29, 1940, governing television broadcasting stations, or other action by the Commission; and (2) whether the effective date for the beginning of limited commercial operations set forth in Section 4.73, Subsection (b) of the Commission's Rules and Regulations should be changed from September 1, 1940, to some subsequent date.
The Commission desires to hear all parties who at the January 15 hearing offered testimony that they were carrying on substantial research tending toward improvement in broadcasting of television. The evidence of such parties should, in summary form, state the scope of their present television experimentation in terms of subject matter, staff, and time devoted to the same and should indicate what proportions of such work are directed toward technical ends and toward commercial production. This information should be broken down with respect to the periods prior and subsequent to March 1, 1940. Any changes made or under consideration as a result of sales promotional activities should be stated.

General conclusions should be offered as to the prospects for improving the performance of television broadcasting but descriptions of recent improvements are desired only if they have taken place since the date of the original hearings or are the final results of previous experimentation. Evidence will be received also as to the effect of the above matters on the prospects for higher transmission standards and as to whether there has been any retardation of progress. Parties are also requested to express their views, based upon the facts on the foregoing matters, as to the appropriate date for commencing limited commercialization. No invitation is extended to parties who did not appear at the hearing of January 15, 1940. Limited testimony may, however, be accepted from new parties upon a showing that they are engaged in substantial research and have evidence bearing upon the above matters which includes information not heretofore presented to the Commission and which relates to the present status of the technical phases of the science.

The hearing will begin at 10:00 o'clock A. M. on April 8, 1940, and will be held in Hearing Room A, in the Interstate Commerce Commission Building. At least 18 copies of printed or typewritten material to be submitted should be made available at the hearing.

Appearances should be handed to the Docket Clerk at the hearing prior to its opening.

CONSUMER EDUCATION CONFERENCE

Ed Kirby, Director of Public Relations, represented the NAB at the Second National Conference on Consumer Education which attracted some 700 people to the campus of Stephens College, Columbia, Missouri, this week. Some fifty representatives of agencies, advertisers, magazines and newspapers were present, including John Benson, president of the American Association of Advertising Agencies; W. T. Nardin, Pet Milk Company; A. T. Court, American Automobile Manufacturers Association; Paul Willis, Associated Grocery Manufacturers; Marshall Mott, Association of Better Business Bureaus and Walter Preston, NBC.

Criticism and defense of advertising characterized the three-day session. At the start of the Conference the following statement of policy was issued by Dr. W. W. Charters, Chairman of the Governing Committee:

1. We accept the following definition of consumer education: Consumer education is development in attaining the maximum individual and group satisfaction for time, effort, and money expended.

2. We hold that consumer education, thus defined, will increase the efficiency of the system of free enterprise and will have a beneficial effect on public economic policy.

3. We consider that individual development for the ends in view can take place only through
   (a) A realistic comprehension of one's own personality and position in life.
   (b) An intelligent understanding of the workings of the economic order.
   (c) A consciously trained ability to analyze and appraise accurately the competitive claims for goods and services offered as necessities, comforts, or luxuries of life.

4. The Institute is concerned with the development of consumer education as thus described. Its facilities are for the use of students and educational institutions and organizations. Its publications, although available to the public, are developed primarily as materials for the use of those engaged in consumer education. Likewise, its conferences are open to all who wish to attend, but are organized and conducted in accordance with the particular needs and desires of teachers, economists and others professionally interested in the education of consumers.

A detailed report will be presented to the Board and the Code Compliance Committee.

SPECIAL PROMOTIONAL EVENTS

Following are among some of the announcements received recently of special periods designated in connection with promotional efforts:

- America's Home — April 6-13
- For a Five Day Week — April 15-20
- National Notation Week — April 22-27
- National Hardware Week — April 25-May 4
- National Fishermen's Week (7th annual observance) April 27-May 4
- Better Homes Week — April 28-May 4
- National Golf Week (11th annual observance) May 4-11
- National Restaurant Week — May 6-12
- Bottled Carbonated Beverage Week — May 12-18
- National Cotton Week — May 17-25
- National First Aid Week (19th observance) May 19-25
- National Foreign Trade Week — May 19-25
- National Tennis Week (9th annual observance) May 25-June 1
- National Hotel Week (2nd annual observance) June 2-8
- National Swim-for-Health Week — June 24-29
- Iced Coffee Week — June 24-29
- Ice Cream Week — June 24-July 1

BUREAU OF RADIO ADVERTISING

RELEASES NO. 5 STUDY

The fifth study in its "Results from Radio" series has gone out to all members from the Bureau of Radio Advertising. The newest success story deals with the experience of a small ice cream retailer in Devils Lake, N. D., who used radio advertising exclusively to build the largest sales volume in the entire state.

The sponsor credits a 100 per cent increase in sales directly to his broadcasts of basketball games over KDLR. Says the advertiser, "Radio has brought us more new customers, and kept more old ones coming back, than any other advertising we could buy."
Extra copies of the No. 5 study, as well as previous releases in the "Results from Radio" series, are available to members on request. Stations who have not ordered their supply of these case histories are urged to use the order blank which accompanies the sample copy recently sent them.

LABOR NOTES

Colonel Philip B. Fleming, Wage and Hour administrator, announced this week that his 441 inspectors would proceed with inspections hereafter without waiting for complaints to be filed. Heretofore, have inspected firms only after complaints had been filed by employees or competitors.

The Wage and Hour administration will hold a hearing on April 10 on a petition by the wholesale distributing industry to amend the definitions of "executive" and "professional" as they apply to that industry. This will be the first hearing following the administration's statement that individual industries could petition for amendment of the definitions as they applied to individual industries.

The House lopped $1,080,000 from the Wage and Hour administration's budgeted appropriation for the next fiscal year, and $350,000 from the Labor Relations Board's. Observers say this shows the House is of a mind to amend drastically both the Wage and Hour and Wagner acts.

The House Labor Committee has approved four amendments to the Wagner Act. They would:

- Enlarge the three-man National Labor Relations Board to five members.
- Protect craft unions in collective bargaining elections with industrial unions.
- Permit employers, as well as unions, to ask the board for bargaining elections.
- Require the board to accept for one year, as wholly effective, any exclusive bargaining contract approved between employers and workers.

William Green, A. F. of L. president, has voiced approval. The C. I. O. doesn't like them. Neither does the House group which favors the more stringent "Smith" amendments.

The Labor Board has certified AFRA as the sole collective bargaining agency of employees of Station WCPO, Cincinnati, who appear before the microphone in a professional capacity, but excluding "hillbillies." Board action was based on a collective bargaining election held March 15 resulting in a count of 8 to 3 in favor of the A. F. of L. union.

FIVE RADIO PROGRAMS CITED

Five radio programs deemed to violate that section of the Communications Act prohibiting lottery broadcasts were referred to the Attorney General by the Federal Communications Commission on March 29.

They are "Musico," broadcast by station WGN, Chicago; "Songo," broadcast by station WIP, Philadelphia; "Especially for You," broadcast by station WFIL, Philadelphia; "Sears' Grab Bag," broadcast by station WISE, Asheville, N. C., and "Dixie Treasure Chest," broadcast by station KRLD, Dallas, Texas.

"Musico" is sponsored by the National Tea Company, Chicago. Cards are supplied by National Food Stores and other sources. Each card has five rows of squares and five squares in each row. Names of songs are involved. To win a cash prize in this "game" one must be lucky enough to get a card with the songs listed that are broadcast, must listen to the program broadcast, and must fill out or check the correct names of the songs or musical selections broadcast, and must be the first to telephone the answer to the radio station.

"Songo" has similar characteristics, employing cards furnished by the Nevins Drug Company, Philadelphia.

In "Especially for You," a wheel is spun to determine from Philadelphia and suburban directories the person who is to be given a chance to win a Farnsworth radio. If the party selected has a telephone he is called. If he answers the phone and answers two questions satisfactorily he receives a radio. If he does not respond correctly, he is given two tickets to "Mystery History," a network show.

"Sears' Grab Bag" involves a box of numbered slips of paper placed in front of the Sears' store in Asheville. The advertising manager of the store selects the numbers. If the holders of the numbers are in the broadcast audience they receive prizes. If they are not listening in the nearest numbers get the prizes.

In the "Dixie Treasure Chest" program the announcer selects a number from the Dallas telephone directory. If the party called answers the telephone he or she is asked, "What is the color of the border of the Dixie Margarine package?" If the party answers correctly, a prize of fifty dollars is the stake.

As in the case of Tums "Pot o' Gold" and the Mead's Bakery programs previously referred to the Department of Justice, complaints allege that such gifts by chance, and public announcements of them, violates Section 316 of the Communications Act which bans broadcast of "any advertisement, or information concerning any lottery, gift enterprise, or similar scheme."

IT'S A BOY

At the O. L. (Ted) Taylors in Amarillo, Texas. Born, 12:15 p. m., April 1. Mother and son doing nicely; father, as well as could be expected.

April 5, 1940
NAB Reports for January 26 contained a general discussion on Frequency Modulation. Evidence presented during the FCC "high frequency" hearing during the two weeks beginning March 18 has served to answer many of the questions concerning FM brought out in that article.

The evidence has clearly shown that FM has a decided advantage over AM on the same frequency even when using a so-called narrow band with a deviation of 1 to 1. It was shown that FM using a deviation of 1 to 1 has an advantage of about 16 DB signal to noise ratio and that FM with a deviation ratio of 5 to 1 has an advantage of about 30 DB signal to noise ratio. "Deviation" is the amount the carrier shifts in frequency, on modulation, each side of the carrier frequency and "frequency swing" is the total frequencies over which the carrier swings and this is equal to twice the deviation. Deviation ratio is the ratio between the highest frequency deviation and the highest audio frequency to be transmitted. The deviation ratio of a system is then determined by the maximum frequency deviation divided by the maximum audio frequency to be transmitted. For a frequency modulation channel it is necessary to allow space a little greater than the frequency swing in order to take care of side frequencies, receiver drift and receiver selectivity characteristics. More data is needed on this phase; however the consensus of opinion was that a 200 KC band is needed for a swing of 150 KC. There was ample evidence to indicate that FM stations should not be assigned adjacent channels in the same locality, but that by skipping a channel, FM stations can be allocated without regard to geographical separation.

The consensus of opinion substantiated the claims of Major Armstrong that a swing of 150 KC should be used; however RCA entered testimony on a phase which was not touched on by others. Testimony was entered by NBC showing that with Frequency Modulation there is a threshold beyond which the signal to noise ratio rapidly decreases. Mr. Raymond Guy of NBC entered an exhibit showing measurements taken on W2XWG, New York City, transmitting with Amplitude, a deviation of 15 KC and a deviation of 75 KC modulation and with deviation ratios of 1 to 1 and 5 to 1, respectively. Observations were taken at Bellmore, Long Island, under conditions described as "Tube hiss and miscellaneous quiet neighborhood noise", and the power of the transmitter was varied in order to make observations at the threshold signal intensities. These measurements were then corrected for a constant power of 1 KW. The exhibit showed that at a distance of 88 miles there would be a field intensity of 5.7 microvolts per meter, and that the 15 KC signal would be 38 DB-RMS above the noise and that the FM 75 KC signal would be 52 DB-RMS above the noise at the receiver output. The exhibit showed that at approximately 94 miles the signal to noise ratio out of the two systems would be the same, namely, 35 DB-RMS. Beyond this point the 15 KC signal to noise ratio became increasingly better in comparison with the 75 KC. During the hearing Mr. Lent, of NBC, testified that with a given signal to noise ratio out of the loud speaker there is an optimum deviation. Based on a 40 DB-RMS signal to noise ratio, he said that the optimum deviation is 30 KC or a 60 KC swing.

The consensus of testimony was to the effect that an audio band width of 15,000 cycles should be allowed for. It also was the consensus of testimony that the signal to noise ratio of 40 DB-RMS, which is 100 to 1 in signal, out of the loud speaker was the threshold for good reception and that ratios up to 70 DB were desirable for excellent service.

The hearing added to the information on the variations of field intensity in the UHF due to terrain variations and fading phenomena. Variations as much as 20 DB from the average can be expected due to terrain variations and at a distance of about 80 to 100 miles it can be expected that terrain and fading might produce variations of 1000 to 1 in signal or 60 DB between the minimum and the maximum field. Quite a number of ultra-high frequency field measurements were entered and these checked within reasonable limits with the theoretically derived curves of Mr. K. A. Norton of the FCC. In view of the information presented on noise it is fair to assume, when using an FM swing of 150 KC and a deviation ratio of 5, that 10 microvolts will render rural service, 100 microvolts city residential service and 500 microvolts service to city business sections. These values are subject to variations the same as are the service standards used on the present band and are subject to revision as we accumulate more information on UHF.

There are three factors which enter into the field produced by a UHF station. These three factors are the power input to the antenna, the height of the antenna above the surrounding terrain and the gain of the antenna. Mr. Paul deMars devised a method for taking all three into account and called it the Radiating Index abbreviated to RI. The RI of an antenna equals the square root of P times H times G; where "P" equals power input in kilowatts to the antenna; "H" equals height of antenna above the surrounding terrain in feet; and "G" equals the antenna gain over a half wave dipole in relative field intensity.

The factor "H" is not just the actual height of the antenna but is the height of the antenna above the surrounding terrain. Thus the factor "H" might vary in different directions from the antenna.

The factor "G" probably needs some explaining. This factor is based on the radiation perpendicular to a hori-
Horizontal one half wave dipole. The following values of "G" are based on Dr. G. H. Brown's calculations for the field produced byturnstile antennas. The full theoretical gain of these antennas is not realized, however, for practical purposes the value of "G" can be based on his calculations. Following is a table of "G" for various antennas:

<table>

In considering the field strength from a UHF station it is important that the height of the receiving antenna be taken into consideration inasmuch as the field strength received varies directly as the height of the receiving antennas. It has become standard practice to use a receiving antenna height of 30 feet in considering UHF performance.

The chart entitled "Ground wave field intensity versus distance" was prepared by Mr. Paul A. deAlars using his "RI" device and is reproduced through courtesy of FM Broadcasters, Inc. This chart was one of Mr. deAlars's exhibits presented in the FCC hearing on "High Frequency."

Mr. deAlars used as a basis for this chart the FCC theoretical curves developed by Mr. K. A. Norton. These curves have been substantiated by enough UHF propagation investigators so as to be reliable in using them as an average in determining coverage. Individual cases, of course, will vary from the average just as we have variations in determining coverage in the present band.

Thus a typical calculation problem would be: given a 300-foot antenna above surrounding terrain, a power of 5 KW and a 5 bay turnstile and frequency approximately 45 MC; to determine the rural, suburban and urban radius. RI would equal the square root of 5 times 300 times 1.84 which equals 1230. From the chart 10 microvolts for rural coverage would be at 83 miles, 100 microvolts for suburban at 54 miles and 500 microvolts for urban coverage at 31 miles approximately.

This chart and calculation of coverage does not take into account the fact that there is fading present and that the signal must be above a certain level or it is of no value, therefore, the distances calculated by the use of this chart should be reduced approximately 15%.

This chart can be used to calculate the coverage with any other deviation ratio. The signal input to an FM receiver has a direct ratio to the deviation ratio, for any given signal to noise ratio out of the loud-speaker. Therefore for any given service; the signal intensities must be multiplied by the ratio of the deviation ratios.

ROSENBAUM DEFENDS CHILD PROGRAMS

The charge that most parental objections to children's radio programs are groundless was voiced today by Samuel R. Rosenbaum, president of radio station WFIL, in an address to the Shoemaker School of Elkins Park, Pennsylvania.

Speaking on the subject "What Do Parents Expect of Radio?", Rosenbaum declared: "Many parents are inclined to voice thoughtless criticisms of children's programs on the air. It is difficult for water to rise higher than its own level. Children's programs, like all radio programs, must please the large majority of the audience. Programs that might please cultured mothers in women's clubs will not always please the vast majority of healthy, vigorous children who adore action more than they do delicacy.

"Radio claims it is fulfilling its duty to meet this want and keep the level of its material always slightly in advance of the mere average of public taste. If it gets too far in advance it will be a general without an army."

"It is well known that the most popular features of every newspaper in the country are the comic strips. These are devoured with glee by parents as well as children by the millions. It is inconsistent for parents to expect radio programs to be exclusively high-toned and cultured, unless the same criticism is levelled at the universally circulated comic strips in the daily newspapers. On the average radio programs certainly are superior
to the average entertainment provided in any other medium.

**MEN FROM MARS**

A thorough study of the effect of Orson Welles’ “The War of the Worlds” by Hadley Cantrill has just been published by the Princeton University Press. Entitled “The Invasion from Mars,” it is on sale at most bookstores for $2.50.

**WSAL LICENSE REVOCATION**

The FCC has affirmed its order revoking the license of radio station WSAL, Salisbury, Maryland, effective at 3 a.m., March 31.

In doing so, it adopted its Proposed Findings of Fact and Conclusions of October 24, 1939, with supplement and modification.

**REBROADCASTING OF INTERNATIONAL PROGRAMS PROPOSED**

Recommendation that radio station WNYC, New York City’s municipal and non-commercial broadcast station, be permitted to pick up and rebroadcast international programs of station WRUL, Boston, was made to the FCC today by a special committee comprising Commissioners George Henry Payne, acting chairman in the absence of Norman S. Case, and T. A. M. Craven.

This general recommendation, which climaxcd hearings on the subject, was unanimous. The committee called attention to testimony by Mayor Fiorello H. La Guardia of New York City, and Professors William Y. Elliott and Harry Rowe Mimno of Harvard University. Professor Elliott contended that such a grant would be in the interest of education in general, as it would make available to the public at large the great resources of our universities; that it would enable non-profit radio stations to render better public service; that rebroadcasting without the use of wires is feasible; that there would be no interference with existing communications, and no one’s interest would be injured.

The committee points out that rebroadcasting of international programs is not prohibited by international convention; that no use of an international frequency for primarily domestic purposes is involved; that the use of wires for feeder purposes places a serious expense on non-profit stations; that there are no legal bars to picking up and rebroadcasting such programs, and, further, “if there exist technical obstacles to this form of rebroadcasting, it is important to learn how these obstacles can be removed.”

Accordingly, the committee proposes amending rule 4.10(d) of the Commission to make the authorization possible. There is some difference of opinion as to the exact wording. Commissioner Payne recommends the following change:

“4.10(d) Authority will not be granted to rebroadcast in the United States the programs of an international broadcast station located within the limits of the North American Continent, except upon a satisfactory showing that the rebroadcast programs in question are intended solely for non-profit purposes and are not commercially sponsored.”

Commissioner Craven suggests this rewording of the rule:

“4.10(d) Authority will not be granted to rebroadcast in the United States the program of an international broadcast station located within the continental limits of the United States, except upon a satisfactory showing in the following respects:

1. that such rebroadcasting will not detract from the primary function of an international broadcast station, the programs of which are being rebroadcast; and

2. that the technical quality of the rebroadcasting will be reasonably free from distortion and noise, as well as reasonably free from the effects of fading. The Commission will afford to applicants a reasonable opportunity to secure facts concerning the proposed technical performance.”

**HOUSE COMMITTEE REPORTS MONITOR STATION BILL**

House Committee on Interstate and Foreign Commerce has favorably reported S. 2611 which has already passed the Senate and which provides for the purchase of a site and the erection of a building in Massachusetts for the use of a radio monitoring station.

The bill as it passed the Senate and as it has been favorably reported by the House Committee is as follows:

“That the Federal Communications Commission be, and it is hereby, authorized to purchase for the United States a suitable site in the State of Massachusetts, provided a suitable site now owned by the Government is not available for the purpose, and cause to be erected thereon, according to plans and specifications to be approved by it, a suitable building or buildings, for use as a radio-monitoring station or to modify or reconstruct existing buildings or facilities on such site for such purpose, and to provide the necessary associated antenna systems, roadways, power, water, and sanitary facilities, including the construction and installation of goniometric apparatus and including necessary outfits, apparatus, and equipment at a total cost of said site, buildings, and equipment of not to exceed $30,000.”

In making its favorable report the committee made the following explanation:

The monitoring station of the Federal Communications Commission, now located at Hingham, Mass., which is used for the monitoring of all classes of radio stations, including ships on the Atlantic Ocean, is no longer suitable for efficient operation in the broadcast band and is not adequately equipped to cover the extension of radio communication in the frequency spectrum above 30 megacycles. The station is now located in the naval ammunition depot by arrangement with the Navy Department and restrictions are required to be imposed as to the antenna structures, as well as to the amount of weight that can be placed on the floors of the building. Also, the configuration of the naval reservation precludes the erection of a suitable type of directive antenna for efficiently monitoring the broadcast bands.

Increased cost at the ammunition depot, the lack of adequate space for the accommodation of personnel, as well as the factors mentioned above, make necessary the immediate relocation of this monitoring station in order that the Federal Communications Commission may carry out the responsibilities placed upon it by law. Reference is made to the provisions of sections 4 (f), 501, 503 (e), 316, 317, 321 (b), and 603 (b) of the Communications Act of 1934, as amended.

An investigation has been made and it has been determined that a suitable site can be acquired near Millis, Mass., together with an usable building and other structures, for the sum of $10,000. An additional $5,000 would be required for the removal and reinstalla-

tion of equipment, necessary improvements to existing buildings, and small items of additional equipment.
The growth of the use of the higher frequencies for commercial communications, and the increase in long-range radio interference, have given rise to a need for a long-range method of determining the location of sources of interference of unlicensed or other irregular communications. The Commission, at the present time, has no apparatus suitable for this purpose. In connection with the removal of the monitoring station from Hingham, Mass., to another location, it is desired to install a high-quality goniometer as the first unit of a direction-finding system capable of determining the location of any radio station within the United States. An estimate of $15,000 for the installation of such apparatus is included in the request for appropriations.

Inasmuch as the problem of the Commission in suppressing interference and operation of unlicensed stations closely ties in with the military activities of the Government in time of war in the suppression of clandestine communications, the desirability of establishing, on a peacetime basis, a system of this nature, has the approval of the War Department.

For all the foregoing purposes, a total appropriation of $30,000 is requested, and the Commission urges that this matter be given favorable consideration in the present session of Congress.

NEW YORK BILLS DIE

The New York Legislature adjourned March 30, 1940 without passing any of the bills which broadcasters had opposed. Two bills to which there was opposition and which came close to passage were the Perry bill with respect to the recording of broadcasts and the Ostertag bill which affected Artists Bureaus run by broadcasting companies.

The Perry bill passed the Senate but was never reported out of the Rules Committee of the House.

STATE LEGISLATION

MISSISSIPPI:

H. 807 (Ethridge et al) (Same as S. 359) COPYRIGHT AGENTS—To amend Section 190, Chapter 117, Laws of 1938, so as to provide for a State-wide license. Referred to Ways and Means Committee.

MISSISSIPPI:

S. 359 (Riddell) (Same as H. 807) COPYRIGHT AGENTS—To amend Section 190, Chapter 117, Laws of 1938, so as to provide for a State-wide license. Referred to Committee on Finance.

FCC ASSIGNMENTS

The FCC has announced that the work, business and functions of the Commission for the month of April have been assigned as follows:

Commissioner Brown
Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Payne
Designated to hear and determine, order, certify, report or otherwise act upon; (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure; (c) the designation of the Commission's Rules of Practice and Procedure, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings in broadcast and television cases are scheduled to be heard before the Commission for the week beginning Monday, April 8. They are subject to change.
Monday, April 8
Further Hearing Before the Commission En Banc
(Television)
Pursuant to Order No. 65: To determine whether research and experimentation and the achievement of higher standards for television transmission are being unduly retarded by the action of the Radio Corporation of America or its subsidiaries, or any other licensee, requiring any additions, modifications, revisions, or amendments of the rules adopted February 29, 1940, governing television broadcast stations, or other action by the Commission; and whether the effective date for the beginning of limited commercial operations set forth in Section 4.73 Subsection (b) of the Commission's Rules and Regulations should be changed from September 1, 1940, to some subsequent date.

Wednesday, April 10
Further Hearing
WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Modification of license, 810 kc., 1 KW, specified hours (6 a.m. to 11 p.m., EST), DA daytime. Present assignment: 810 kc., 1 KW, daytime-WCCO, directional antenna.

Friday, April 12
Further Hearing
NEW—Harold Thomas, Bridgeport, Conn.—C. P., 1420 kc., 250 watts, unlimited time.

FUTURE HEARINGS
During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

May 6
Broadcast
WRTD—Times Dispatch Radio Corp., Richmond, Va.—C. P., 500 kc., 1 KW, unlimited time (DA night). Present assignment: 1500 kc., 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WMEX—The Northern Corp., Boston, Mass.—Granted construction permit to change directional antenna and transmitter site and install new transmitter; also extend commencement and completion dates (B1-MP-900).

WSGN—The Birmingham News Co., Birmingham, Ala.—Granted construction permit to increase power from 100 watts night, 250 watts day, to 250 watts night and 250 watts day, and move transmitter and install new antenna; frequency 1310 kc., unlimited time (B3-P-2558).

KMJ—McClatchy Broadcasting Co., Fresno, Calif.— Granted modification of license to increase night power from 1 KW to 5 KW on 580 kc. (B5-ML-909).

KWLK—Twin City Broadcasting Corp., Longview, Wash.—Granted modification of license to change frequency from 750 kc. to 1570 kc. and hours of operation from daytime to unlimited (B5-ML-938).

KARM—Gilbert H. Jertberg, Executor of the Estate of George Harm, Fresno, Calif.—Granted consent for involuntary assignment of license from George Harm, deceased, to Gilbert H. Jertberg, Executor of Estate of George Harm, of station KARM, which operates on 1310 kc., 250 watts, unlimited time (B5-AL-274).

WKEU—Radio Station WKEU, Griffin, Ga.—Granted construction permit to increase time of operation from daytime to unlimited, and make changes in antenna. (B3-P-2693).

DESIGNATED FOR HEARING

The Kaw Valley Broadcasting Co., Inc., Topeka, Kans.—Application for construction permit to erect a new station to operate on 1500 kc., 250 watts, unlimited time. Exact transmitter site and type of antenna to be determined with Commission's approval (B4-P-2643).

MISCELLANEOUS

WCPO—Scripps Howard Radio Inc., Cincinnati, Ohio.—Denied petition for hearing or rehearing in the matter of the application of WCOL to change frequency from 1210 to 1290 kc., and power from 100 watts to 250 watts unlimited time, which was granted without hearing on October 10, 1939.

WWRL—Long Island Broadcasting Corp., Woodmere, N. Y.—Extended effective date of Provision (3) of Commission's Order of December 5, 1938, 30 days from March 30, 1940, in dockets 4029, 4050, 3941, 4302, 4331 and 4622.

WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.— Referred to the Commission en banc the motion to amend notice of hearing by striking certain of the issues specified in re application to move studio and transmitter; station operates on frequency 1220 kc.

WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Granted petition to intervene and motion to enlarge issues in re application of Harold Thomas for a new station in Bridgeport, Conn., to operate on 1120 kc., 250 watts, unlimited time.

West Va. Newspaper Publishing Co., Morgantown, W. Va.— Granted supplemental petition for order to take depositions in re application for new station to operate on 1200 kc., 250 watts, unlimited time.

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Referred to Commission en banc the motion to dismiss “motion to amend notice of hearing by striking certain of the issues specified,” in re application of WREN to move station, etc.

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Referred to Commission en banc the opposition to applicant’s motion to amend issues, in re application of WREN referred to above.

KCKN—KCKN Broadcasting Co., Kansas City, Kans.—Referred to Commission en banc the motion to dismiss "motion to amend notice of hearing by striking certain of the issues specified," in re WREN application.

Lookout Mountain Co. of Ga., Lookout Mountain, Ga.—Granted motion to dismiss without prejudice, the application for a new station to operate on 1370 kc., 250 watts, unlimited time.

WMAM—M. & M. Broadcasting Co., Marinette, Wisc.—Granted special temporary authority to operate from local sunset (April, 6:30 p.m. EST) to 10:00 p.m. EST on April 13 and 20, 1940, in order to broadcast the activities of the annual smelt carnival. (B4-S-1016)

WLPM—Suffolk Broadcasting Corp., Suffolk, Va.—Granted license to cover construction permit as modified for new broadcast station to operate on 1420 kc., 100 watts night, 250 watts day, unlimited time; also granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54 (B2-L-1122 and B2-Z-369).

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.— Granted authority to determine operating power by direct measurement of antenna power in compliance with Section 3.54. (B5-Z-367).

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54, auxiliary transmitter. (B2-Z-363).

WMRO—Martin R. O'Brien, Aurora, Ill.— Granted special temporary authority to operate with power of 100 watts from 6:30 to 10 p.m., CST, on April 1, 1940, in order to broadcast a talk by the State Commander of the American Legion. (P4-S-995).

WEAU—Central Broadcasting Co., Eau Claire, Wis.— Granted special temporary authority to operate from 7:45 p.m. to 11:00 p.m., CST, on April 5, 6, and 7, 1940, in order to broadcast the Annual District Boxing Tournament of the Catholic Youths Organization in Chippewa Falls. (B4-S-924).

WMRO—Martin R. O'Brien, Aurora, Ill.— Granted special temporary authority to operate with power of 100 watts from 6:30 to 9:00 p.m., CST, on April 5, and 8, 1940, in order
APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Construction permit to change hours from specified (3 a.m. to local sunset) to unlimited time, using 1 KW night, and install directional antenna for night use (requests Class III-B station).

570 Kilocycles

WSYR—WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—License to cover construction permit (B1-P-2798) for new transmitter.

580 Kilocycles

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Authority to determine operating power by direct measurement of antenna power.

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—License to cover construction permit (B1-P-2432) to install new transmitter, make change in antenna and increase power.

600 Kilocycles

WMT—Iowa Broadcasting Co., Cedar Rapids, Iowa.—Construction permit to increase power from 1 KW, 5 KW day, to 5 KW day and night, and make changes in directional antenna, night use. Requests III-A station.

740 Kilocycles

WHEB—Granite State Broadcasting Corp., Portsmouth, N. H.—Modification of construction permit (B1-P-2457) for increase in power, new equipment, move of transmitter and studio, requesting authority to change type of transmitter, and make changes in antenna.

850 Kilocycles

WWL—Loyola University, New Orleans, La.—Extension of special experimental authority for unlimited time for the period 5-1-40 to 8-1-40.

890 Kilocycles

KTKC—Tulare-Kings Counties Radio Associates, Chas. A. Whitmore, Pres., Visalia, Calif.—License to cover construction permit (B5-P-2735) for changes in transmitting equipment.

920 Kilocycles

WAAP—Drovers Journal Publishing Co., Chicago, Ill.—Modification of license to change hours of operation from 6 a.m. to 4 p.m., to broadcast Democratic and Republican political meetings and to operate from 6:30 p.m. to 11:00 p.m., CST, on April 9, 1940, in order to broadcast election returns. (B4-S-995).

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period April 1, 1940 to not later than April 26, 1940.

W2XN—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period April 1, 1940 to not later than April 26, 1940.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period April 1, 1940 to not later than April 26, 1940.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period April 1, 1940 to not later than April 26, 1940.

W2XN—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period April 1, 1940 to not later than April 26, 1940.

Federal Trade Commission Action

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Logan-Cache Knitting Mills—Charging misrepresentation through simulation of a competitor's trade names, a complaint has been issued against Logan-Cache Knitting Mills, Logan, Utah, manufacturer and distributor of women's knitted suits, dresses and sweaters and a dealer in other apparel and merchandise.

The complaint alleges that the respondent's trade name, Logan-Cache Knitting Mills, so closely imitates that of its 14-year old competitor, Logan Knitting Mills & Garment Company, also of Logan, Utah, and the latter's trade-mark "Loganknits," as to confuse buyers into believing that by purchasing respondent company's knitted wear they are obtaining the product of Logan Knitting Mills & Garment Company, and that the respondent is the manufacturer of a well known line of knitted wear widely advertised and sold by the Logan Knitting Mills & Garment Company under its established trade-mark "Loganknits."

Further requesting increase in power from 1 KW, 5 KW day, to 5 KW day and night; make changes in directional antenna and extend commencement date to 60 days after grant and completion date 180 days thereafter. Requests Class III-A station.

New-Hunter Printing Corp., Houston, Tex.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1000 watts, special emission for frequency modulation.

NEW—Washington Institute of Technology, Inc., College Park, Md.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1000 watts, special emission for frequency modulation.

NEW—WIBX, Inc., Deerfield, N. Y.—Construction permit for a new high frequency broadcast station.

NEW—Drovers Journal Publishing Co., Chicago, Ill.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1000 watts, special emission for frequency modulation.

NEW—Knickerbocker Broadcasting Co., Inc., Kearny, N. J.—Construction permit for a new high frequency broadcast station on 43200 kc., 1 KW, special emission. To be located at Belleville Turnpike, Kearny, N. J.

Murrine Company, Inc., 660-678 North Wabash Ave., Chicago, is charged in a complaint with misrepresentation in the sale of "Murrine," a drug preparation for treating the eyes.

Through the use of newspaper, periodical, radio and circular advertisements, the respondent is alleged to represent that "Murrine" is a cure, remedy and competent treatment for eye strain caused by excessive use of the eyes, and that the preparation will prevent eye strain due to dust, sun, light glare, driving, movies, reading, sewing, and other excessive uses of the eyes, and quickly relieve and eliminate the irritation and eye strain which they cause.

The complaint alleges that the respondent's preparation is not a cure, remedy or competent treatment for eye strain caused by excessive use of the eyes; that after strain caused by excessive use or incorrect defects in focusing, the instillation of the respondent's preparation into the conjunctival sac of eyes so afflicted will have no effect other than that of affording a temporary sensation of refreshment; that the respondent's preparation will not prevent eye strain due to the several causes mentioned, and will not relieve or eliminate irritations in excess of affording a temporary sensation of refreshment to the eyes. (4076)

Purenex Corporation, Ltd.—A complaint has been issued against Purenex Corporation, Ltd., 1001 East 62d St., Los Angeles, alleging misrepresentation in the sale of "Purenex," a chemical preparation intended for use as a germicide.

The respondent allegedly advertised that imitation stones in the sale of jewelry is alleged in a complaint issued against Popular Publications, Inc., 205 East 42d St., New York.

The respondent alleged that imitation stones contained in its "Lucky Birthstone Rings" were respectively the real stones identified as the birthstones of the different months of the year, such as garnet, amethyst, jasper or bloodstone (aquamarine), diamond or sapphire, emerald, agate, turquoise, carnelian, chrysocolla, beryl, topaz and ruby. (4077)

Sohn Bros.—See Sohn & Company, Inc.

Sohn & Company, Inc.—Two Chicago manufacturers of mattresses and bedding have been charged in complaints with misleading representations in the sale of their products. The respondents are Sohn & Co., Inc., and Benjamin, Morris and Isadore Sohn, officers and directors, trading as Sohn & Co., Inc., 1450 West Roosevelt Road, and Arthur and Carl Sohn, trading as Sohn Bros., 1709 West Roosevelt Road.

The respondents allegedly buy old, second-hand, used and discarded cotton and other used materials which they comb by machinery, rework and use in the manufacture of mattresses and...
CEASE AND DESIST ORDERS

Following cease and desist orders have been issued during the past week:

Consolidated Silver Company of America—William M. Irvine, trading as Consolidated Silver Company of America, 7338 Woodward Ave., Detroit, has been ordered to discontinue misleading representations in the sale to retail merchants in several States of a promotion plan for their use in selling merchandise to the public. The respondent also sells silverware, promotion cards, gift cards, certificates redeemable in silverware, and other materials for use in effecting such plan.

Commission findings are that the respondent’s agents, who sell the plan, are supplied with order blanks, contract forms and other advertising literature which facilitate misrepresentation as to the character of the plan and that the respondent’s representations, among other things, have a tendency to mislead retailers and other buyers believing they are participating in a bona fide sales stimulation plan in connection with the advertising of William A. Rogers silverware, when in fact such purchasers are merely buying such ware from the respondent, who is in no way connected with the manufacturer of William A. Rogers silverware other than as an indirect purchaser therefrom.

The Commission order prohibits the claim that the respondent represents or has any connection with the manufacturer of William A. Rogers silverware, or conducts special or advertising campaigns to introduce merchandise on behalf of the maker of Rogers silverware or any other manufacturer, but contains a proviso that the order shall not be construed as restraining the respondent from dealing in Rogers ware.

Other representations to be discontinued are that sales cards, gift cards, premium certificates, or other similar devices can be redeemed in silverware or other merchandise, unless all terms and conditions are clearly stated without deception; that the respondent will refund any sum to dealers on the redemption of a specified number of cards or certificates, when such refund actually is not made (any conditions in connection with the refund, if any, to be clearly and without deception); that he will give silverware or other merchandise free, when it is not actually so given; will advertise his plan locally for dealers or assist them in putting it into operation, when in fact he neither conducts such advertising nor renders such assistance, and that he will supply dealers with display sets of silverware or other merchandise for use in putting the plan into operation, when such sets are not supplied as represented. (3789)

Patch Premek Corporation—Misrepresentation in the sale of a medicinal preparation is prohibited under an order issued against Patch Premek Corporation, 1716 East Seventh St., Los Angeles, and H. K. Patch, its president, who also trades under the name of H. K. Patch Company, 566 Roosevelt Road, Chicago.

Among claims found to have been made by the respondents in advertising matter were that their preparation known as “Premek 33,” which is also sold to the medical profession as “C. S. 53,” is an amazing new discovery effective for ending all kinds of irritations and capable of curing eczema, athlete’s foot, dandruff, chafing, shingles, ringworm, and various other irritations and conditions.

Commission findings are that the only ingredient in the respondents’ product which is of consequence therapeutically is colloidal or finely divided sulphur, which is neither new nor an amazing discovery, and that the preparation is not a quick or effective treatment for the conditions mentioned, although it may also be used as an accessory treatment for some ailments resulting from superficial causes.

The Commission also finds that the respondents’ false advertisements induce or are likely to induce, directly or indirectly, the purchase of a drug.

The order directs the respondents to cease and desist from disseminating advertisements which represent, directly or through implication, that their preparation is a cure or remedy for such various ailments and conditions, or that it constitutes a competent or effective treatment for any of them other than to serve as an accessory treatment for those which are due to superficial or external causes only.

Other representations ordered discontinued are that the preparation is a bactericide or will prevent reinfection; that its use will stop perspiration or prevent body odors, and that it is a “new” or an “amazing” discovery. (3469)

V. Portnoy & Sons, Inc., trading as Roosevelt Mercantile Company, 566 Roosevelt Road, Chicago, has been ordered to discontinue misrepresentations in the mail order sale of clothing and other merchandise.

Among representations found to have been made in advertising were that the respondent ships the kind of merchandise pictured in its literature; single garments may be obtained in all sizes, colors or styles; its new merchandise is of the latest style; its slightly used merchandise is always cleaned, pressed and repaired by its own expert craftsmen; it guarantees to replace unsatisfactory merchandise; its buying connections throughout the country enable it to purchase quality goods at prices lower than can all of its competitors, and purchasers of its merchandise can make large profits by reselling it.

The Commission finds the respondents’ representations are misleading and untrue, as the pictures in its advertising literature are not representative of its merchandise which is often pictured as being new, clean, stylish and modern when in fact the products shipped in response to mail orders are in most instances used, dirty and in fashionable; articles shipped are usually whatever the respondent had on hand whether in the size, style or color requested or not; unsatisfactory articles returned are replaced with garments equally as unsatisfactory; used merchandise sold is rarely clean, pressed and repaired by the respondent before shipping; the respondent does not employ expert craftsmen, and has no special buying connections but purchases from peddlers, junk dealers and charitable organizations and occasionally buys new goods from wholesalers who come to its door. (3576)

Roosevelt Mercantile Company—See V. Portnoy & Sons, Inc.

Madame Marguerite Turnel, Inc., 256 West 31st St., New York, trading also under the names Madame Marguerite Turnel and Madame Turnel, has been ordered to cease misleading representations in the sale of “Knogray,’” a treatment sold for coloring gray, or dark hair, streaked or faded hair.

The order directs the respondent to cease representing that its preparation will color the roots of the hair or have any effect thereon or on new hair growth, or will restore the natural or original color to the hair, or affect the color of the hair in any way other than as a dye.

The respondent also is ordered to desist from the claim that the preparation is not a dye or is anything other than a dye, and that anything less than repeated applications of the preparation will cause the hair to retain the color imparted to it by the preparation. (3513)

Valligny Products, Inc., 254 West 31st St., New York, have been ordered to discontinue misrepresentation in the sale of “Shampoo-Kolor,” a hair treatment.

Shampoo-Kolor, according to Commission findings, was advertised, directly or by implication, as being capable of coloring the roots of the hair, affecting the color of new growth hair, and eliminating the necessity for repeated applications in order to prevent the new growth from showing gray, streaked or faded above the scalp-line.

Other representations found to have been made were that use of the preparation causes the natural color to be restored to the hair; that the preparation is made in France and is uniquely different or entirely revolutionary in methods or results.

April 5, 1940
The Commission found the respondent's advertisements to be exaggerated and misleading and ordered it to cease and desist from representing (1) that Shampoo-Kolor will color the roots of the hair or have any effect thereon or on new hair growth, or restore the natural or original color to the hair, or affect the color of the hair in any way other than as a dye; (2) that anything less than repeated applications will cause the hair to retain the color imparted by the preparation; (3) that the preparation is compounded or manufactured in France or in any country other than the United States, and (4) that it is "unique" or "revolutionary" in methods or results. (3920)

**Washington Laundry—Joseph T. Gibbons, trading as Washington Laundry, 2627 K St., N. W., Washington, D. C., has been ordered to discontinue certain misleading representations in connection with the interstate activities of his laundry, dry cleaning and dyeing business.**

The respondent is directed to cease representing that wearing apparel and other articles delivered to him for laundering or cleaning will be washed with "Ivory Soap" or any designated cleaning agent, when such wearing apparel and other articles are not washed or cleaned with that soap or a particular cleaning agent designated. (3930)

**STIPULATIONS**

During the past week the Commission has entered into the following stipulations:

**Charles E. Hires Company, Philadelphia, Pa., agrees to cease advertising that its "Hires R-J Root Beer" will preserve the alkaline reserve; has the same alkaline reaction as orange juice and in the same manner aids in maintaining the alkaline balance; is healthful because it is not acid forming, and agrees with foods because it is not acid forming. (02534)**

**MacFadden Book Company, Inc., New York, N. Y., in the sale of a book embracing a system of eye exercises, entitled "Strengthening the Eyes," agrees to cease advertising that its book is based upon new facts or that the advice or exercises are new or revolutionary; that by following the advice and exercises a person with weak or defective vision may quickly train any of the muscles of his eyes so as to correct such defects; that exercise is the only real help in cases of impaired vision; that use of the respondent's method will enable one to obtain perfect eyesight either with or without the use of glasses, and that as a result of the use of this method those who have used glasses to overcome the effect of faulty refraction, far or near sightedness, astigmatism, squint eyes, cross eyes, weak, watering eyes, poor vision, eye headache or strain, can generally remove these defects and be relieved of the necessity for wearing glasses. (02533)**

**Miracle Dry Shaver Corporation, 36 South State St., Chicago, and J. M. Friedman, its president and owner of most of its capital stock, have made a stipulation in which they agreed to discontinue misleading representations in the sale of an electric razor of the dry shaver variety.**

The stipulation points out that the same quality of razor was sold by the respondent for $10 under the trade name "Miracle," and for $15 under the trade name "Shave King."

The respondents agree to cease selling or supplying others with products to which are affixed, or which are referred to by means of, any price purporting to be the retail selling price, when in fact such price is not the regular retail price, or is in excess of the customary retail price. (2722)

**National Academic Cap & Gown Company—Emanuel and Daniel Cohen and Abraham Kadis, trading as National Academic Cap & Gown Co., Philadelphia, Pa., agree to cease employing the word "Silk," either independently or as part of the trade designation "Silk Neu Faille," or in conjunction with any other words in advertisements or otherwise, to designate fabrics not made of silk, and to discontinue selling any product made of rayon without disclosure of the fact that the material of which it is composed is rayon, such disclosure to be made clearly and unequivocally in invoices, advertising matter, sales promotional descriptions, or other designations. (2720)**

**Princeton Knitting Mills—Louis Rubin, sole trader as Princeton Knitting Mills, Philadelphia, Pa., manufacturer and distributor of sweaters and swimming suits, stipulates that he will desist from the use in advertising matter or otherwise of the legend "100% Wool" as descriptive of bathing suits or other garments not composed wholly of wool; or from use of the word "Wool" in any manner implying that the garment referred to is composed entirely of wool when an integral part of it is made of other fibers. The stipulation provides that if the body of the garment is properly represented as "Wool," but the supporter, plaque or reinforcement is of other material, then the word "Wool" shall be immediately accompanied by suitable phraseology, in type equally conspicuous, indicating clearly that such designation does not apply to the supporter, plaque or reinforcement. The respondent also agrees to discontinue branding or selling any product, an integral part of which is composed of rayon and other kinds of fibers or substances, without full and non-deceptive disclosure of the rayon and other content of the product, made by accurately designating each constituent fiber thereof in the order of its predominance by weight, beginning with the largest single constituent, and by giving the percentage of any fiber which is present in a proportion of 5 per cent or less by weight. (2721)**

**Sears, Roebuck & Co., Chicago, has entered into a stipulation in which it agrees to cease misleading representations in the sale of marble and granite monuments.**

The respondent stipulates that it will cease the use in advertising matter of the words "lasts forever" or "eternally beautiful" or other words of similar meaning so as to imply that the monuments or markers to which such words refer will last forever or through long periods of time beyond their provable capacity of endurance. The respondent also agrees to discontinue representing that lettering and ornamentation will show up better on blue vein Vermont marble than on "any other kind", including by inference all other kinds of blue marble, when such is not a fact. The stipulation points out that while the blue vein Vermont marble has an advantage over white marble in the matter of lettering and ornamentation, the same is true of any other blue marble, wherever quarried. (2723)

**FTC DISMISSES COMPLAINT**

The Federal Trade Commission has dismissed a complaint charging Oppenheim, Collins & Co., Inc., 33 West 34th St., New York, with misleading representation of furs and fur garments.

The dismissal order recites that the respondent had discontinued the practices complained of before or about the time such practices became the subject matter of an investigation by the Commission, that there is no reason to believe that the practices will be resumed, and that the advertising matter in question was changed prior to promulgation of, and is in conformity with, the trade practice rules now in effect for the fur industry.
Television

So loud was the protest this week against the FCC’s television policy that both President Roosevelt and Congress concerned themselves with it.

After a talk with the President on Thursday, Chairman Fly was quoted by the newspapers as having said:

“We are hopeful that within a few months we will have television receivers capable of receiving all transmitters. * * *

“As soon as the industry is ready to go ahead, the Commission is, too.”

A few hours later, however, Mr. Fly issued a statement saying that nothing he had said (to the White House newspapermen) should be construed as indicating what action the Commission would take.

“It is hazardous to conjecture now when proper standardization may be achieved and commercial operations undertaken,” he said.

The FCC chairman’s White House visit followed the conclusion of a hearing by the Senate Interstate Commerce Committee on a resolution by Senator Lundeen (FL-Minn) calling for an investigation of the Commission’s television policy.

Mr. Fly and David Sarnoff, RCA president, were the principal witnesses at the hearing, although the committee received a letter from Commissioner T. A. M. Craven, stating that he took issue with two of Mr. Fly’s statements. Counsel for Dumont and Farnsworth interests also testified.

Meantime, the Commission proceeded with its television hearing which started Monday. This hearing was called when the Commission suspended its February 29 order, permitting limited commercialization of television starting next fall.

This order was suspended, it was said, because RCA’s merchandising plans would tend to “freeze” television at its present state of development.

Senator Lundeen’s resolution followed—as did a proposal by Senator Barbour (R-NJ) to amend the Communications Act specifically to forbid the Commission from interfering with “radio experimentation, research, or development, or the manufacture, sale, or use of any apparatus” for radio transmission or reception.

While newspapers throughout the country were berating the Commission editorially, Representative Cox (D-Ga) raised a lone voice in the Commission’s defense and Representative Connery (D-Mass) introduced another resolution calling for an investigation of radio monopoly.

Mr. Sarnoff’s Statement to Senate Interstate Commerce Committee

Inasmuch as hearings are still proceeding on the order issued by the Federal Communications Commission on March 22, 1940, I take it that your Committee is primarily interested in hearing from me an affirmative statement of the position, plans, and policies of the Radio Corporation of America with regard to television.

The solution of this problem insofar as the regulatory function of the Commission is concerned, lies in action, not in words. Our company has never questioned the jurisdiction of the Federal Communications Commission with respect to the powers given it by Congress to license television or other radio transmitters. We have no views to express as to whether any act of the Commission will advance or retard the creation of this great new art, until such action is made clear as the result of the current hearings.

The Board of Directors and the Management of the Radio Corporation of America are of the considered opinion that television offers the opportunity for the creation of a new industry, new employment and new services; that its introduction now is not only timely but important; and that substantial progress in the art can come only after its introduction upon a commercial basis. The four main questions with regard to television, judging from current discussion, are:

1. Should the introduction of television on a commercial basis wait until all the engineers of the entire industry have agreed on technical standards of transmission and reception?
2. Would further research be retarded by the sale and public acceptance of the television receivers now on the market?
3. Will the public suffer from excessive obsolescence due to improvements in the new art?
4. Will competition be helped or hindered through the commercial introduction of television by those in the industry who are now ready, able and willing to go ahead?

I propose to deal with these four questions in order.

I.

The Radio Corporation of America believes that in an art such as television there can be no shorter cut from promise to performance than through the process of laboratory development, field test, and service to the public.

If the industry is left free to determine, through experimentation and test, the competitive advantages of every system, the practical standards prevailing in any given period will represent the best that the art has attained.

The Radio Corporation has never proposed nor urged the freezing of standards. Nor is such action necessary to create the television industry and the new public services that would flow from it.
TELEVISION

(Continued from page 4163)

II

It is a fallacy to assume that the commercial introduction of television, on any standard now conceivable, would affect the continuance of research in this art, or prevent the adoption of higher standards of service and performance.

The triumph of television lies in the fact that science, research and experimentation have made possible the addition of the electrical eye to the electrical ear in radio.

Because it recognized this as a fundamental development, the Radio Corporation of America has invested more than $10,000,000 in research, development, experimentation, patents, field tests, and actual program service. For more than ten years, five major engineering groups of the RCA organization, including its broadcasting and manufacturing, have been engaged in a coordinated attack on the problems of transmission, reception, tube development, radio relaying and programming. Hundreds of engineers have been engaged in developing television, and the current rate of expenditure for this work by the Radio Corporation of America alone is about $2,000,000 annually.

But these expenditures are only a drop in the bucket to what will be required for further research and development in the next twenty years. Almost two decades have elapsed since the introduction of sound broadcasting on a commercial basis, but improvement still continues; and I can safely say there is little we have achieved today that will survive the next ten years.

The television research achievements by the Radio Corporation of America to date have been set forth publicly in 229 papers and reports to scientific societies, 671 additional technical reports, and two major textbooks, a total of approximately 1,000 engineering studies. We believe that, far from retarding the achievement of higher standards of television service, the expenditure for research and development has made possible the addition of the electrical eye to the electrical ear.

And while on the subject of research let me refer to the importance of increasing not merely the size of the television picture, but of the television audience—rather than improvements that would merely add to the size of the television picture, or the definition of the picture. I submit that a greater public interest will be served at this time by research toward the methods which would extend television service to as many homes as possible, rather than in improvements that would merely add to the size of the television picture.

To meet this need the Radio Corporation of America has developed a radio relay system designed to extend the service of television to the public on a nationwide basis.

The Radio Corporation of America is ready, if commercial television is authorized, to ask for a license from the Federal Communications Commission for the construction of such a radio relay system, using higher frequencies than have ever before been utilized. Such facilities could serve broadcasters with programs moving simultaneously in both directions.

Home television receivers giving pictures as large as 18 x 24 inches are now being developed in our laboratories. We shall also soon make available theater television receiving equipment which will project pictures upon full size motion picture screens.

III

In every step it has taken in the development of television, the Radio Corporation of America has kept faith with the public. During the years that it has spent millions in the furtherance of this project, its statements have been so conservative as to its achievements that it has had to meet the false charge of holding back the art for commercial reasons. In the few transmission areas in which television service is available, every school boy knows the limitation of program, broadcasting time, size of picture, and the temporary nature of the television receiver. Such a television receiver is not sold as a sight unseen in a package over the grocery story counter. It is sold after demonstration, and very considerable demonstration, which familiarizes the user exactly with the service he is to receive.

The purchaser of such a set knows exactly what he is paying for. He is paying for the unique privilege of seeing what is important or interesting today in a program of news, information, entertainment, education and sports—events which he cannot witness tomorrow or next year, however great the technical improvements that may or may not be made in the meantime. The miracle of sight transmitted through the air should not be treated on the same basis of obsolescence as a Spring hat or furniture.

Nothing that would make present television equipment of continuing value to the purchaser has been neglected by the Radio Corporation of America. In the first place, the standard set offered to the public at the lower prices made possible by commercial production, includes not only sight reception but the most modern sound receiver the Company has been able to produce. And while higher standards should entail ultimate obsolescence of the television element, the purchaser would still have a first class receiving set with sound reception on three bands—international short wave, standard broadcasting, police and aviation—unaffected by any changes in television transmission.

But sufficient experience has been gained, both with regard to television production and transmission, to enable this Company as well as other manufacturers to make changes economically in equipment that has been sold to keep it up to date. From what we know today, the possible improvements which might affect television receivers would concern: (a) the number of picture lines; (b) the number of pictures per second; and (c) synchronization.

While a radical change in these particulars might make present-day television receivers temporarilY inoperative, we know that they could be modified at moderate cost to adapt them to any new method now on the horizon. The cost to the consumer, if all the changes under discussion were adopted, would be about $40, and it is our conviction that all of these changes will not have sufficient merit to warrant adoption.

Finally, we have, without obligation on our part, refunded to our pioneer purchasers amounts equal to the reduction in price made possible by commercial production. In some cases these refunds amounted to $205 per instrument sold.

IV

The Radio Corporation of America welcomes the keen competition promised in the industry in the development of the television art. The promise of this competition is increased, not lessened, by the present disagreement among a few engineers as to standards of transmission and reception. Both methods by which the highest standards may best be achieved.

The phenomenal growth of radio in our country is due largely to the fact that the industry has had available, through licensing, the many inventions developed by those who spent millions of dollars to bring the art of the laboratory and into commercial use. About 50 manufacturers are licensed by the Radio Corporation under its own patents and also under those of other domestic and foreign companies from which the Radio Corporation has acquired the right to grant such licenses.

The Radio Corporation of America is ready, if commercial television is authorized, to ask for a license from the Federal Communications Commission for the construction of such a radio relay system, using higher frequencies than have ever before been utilized. Such facilities could serve broadcasters with programs moving simultaneously in both directions.

Home television receivers giving pictures as large as 18 x 24 inches are now being developed in our laboratories. We shall also soon make available theater television receiving equipment which will project pictures upon full size motion picture screens.

The phenomenal growth of radio in our country is due largely to the fact that the industry has had available, through licensing, the many inventions developed by those who spent millions of dollars to bring the art of the laboratory and into commercial use. About 50 manufacturers are licensed by the Radio Corporation under its own patents and also under those of other domestic and foreign companies from which the Radio Corporation has acquired the right to grant such licenses.

Finally, we have, without obligation on our part, refunded to our pioneer purchasers amounts equal to the reduction in price made possible by commercial production. In some cases these refunds amounted to $205 per instrument sold.

It is our opinion that this could be done without undue disturbance to the present broadcasting structure. But this achievement is impossible unless we show the courage that has made this country the radio center of the world.

Fly Testifies; Sarnoff Cross-examined

Before Mr. Sarnoff testified, Fly had defended the Commission's recent order reopening the television inquiry on the ground that RCA's commercial promotion of receivers was threatening to
“freeze” development and load the public with sets that may soon become obsolete.

Chairman Burton K. Wheeler sought several times to persuade Sarnoff to agree to alter the design of the RCA television receivers so that they could receive any current system of visual broadcasting. The Senator expressed the opinion that this would remove the cause of the dispute.

**Cities Price Increase**

Sarnoff insisted the additional expense of $20 to $40, which would be represented in an increase in the sales price is not warranted, as competing systems do not have television stations in operation except in a very limited experimental capacity.

Fly retorted that the FCC shortly would grant transmission licenses to sponsors of television transmission different from that used by RCA, Allen B. Du Mont, of Passaic, N. J., chief rival of RCA in the current fight, has an application for a permit to erect a station in New York.

At the conclusion of his testimony, Sarnoff engaged in a sharp exchange with William A. Roberts, attorney for Du Mont, who challenged some of the RCA president’s statements. When Sarnoff retorted that Du Mont was owned by Paramount Pictures, Roberts denied it but admitted the motion picture company has backed Du Mont financially.

Chairman Wheeler and other members raised the question as to why Great Britain had enjoyed television for two years prior to the outbreak of the war.

Sarnoff replied that England’s progress was due to the fact that a government commission investigated all phases of the art and then fixed transmission standards for a specified period.

Sarnoff termed ridiculous the contention of FCC that the sale of a projected 25,000 television sets in the New York area would “freeze” transmission standards and halt further research. He pointed out that experimentation in frequency modulation is going ahead although none of the 40,000,000 standard radio receivers will be able to tune in FM stations.

He hotly denied that RCA was trying to obtain monopoly of the infant industry when Wheeler said such charges were being made against the corporation.

**Craven’s Letter**

April 11, 1940.

Honorable Burton K. Wheeler,
United States Senate,
Washington, D. C.

My dear Senator Wheeler:

Referring to telephone conversation of last night concerning my request for a postponement of the hearing of the Interstate Commerce Committee on the matter of television, I beg to inform you that the disputed television hearings are now in progress before the Commission. Today, which is coincidental with the hearing before the Interstate Commerce Committee, the most important engineering testimony is to be given. I am unable to recess the Commission’s hearing and feel that my duty compels me to be present when the engineering testimony is given.

On the other hand, I feel it my duty to be present at your Committee meeting in response to your request, and also, I have no desire whatsoever to be discourteous to any individual of the Senate.

Since these two duties conflict, I hope that, as per my request of last night, it will be possible to delay the Interstate Commerce Committee meeting until some later date. I am willing to appear and testify any time the Committee may desire.

I have called Senator Lundeen, who I understand was responsible for notifying my presence, and while he appeared to be disappointed, I am certain that he understands the difficult situation caused by these conflicting duties. He suggested that I use my own judgment in the matter.

There are two matters which I understand were advanced in yesterday’s hearings of your Committee, which should be clarified.

The first is that I responded to an official written request from a United States Senator to give my reasons for my dissent in the disputed television order of the Commission. Being in public office and a Commissioner in an independent agency authorized by Congress, I feel that not only courtesy to the legislative body but also duty compels me to reply to requests from Senators on matters such as in the instant case. It should be made clear that I did not voluntarily write to any Senator concerning matters under dispute in the Commission.

The second clarification of the record pertains to the statement of Chairman Fly of this Commission to the effect that I had not filed a dissenting opinion with the Commission in this matter. It is not usual in such matters as this, which is not a judicial proceeding, for members of this Commission to file written dissenting opinions. However, as the enclosed minutes of the Commission will show, I voted “no” when the decision to issue Order No. 65 was reached. Furthermore, I gave my reasons orally to the Commission at that time, and suggested that the Commission postpone action until sufficient time had elapsed for second thoughts. Furthermore, I urged the Chairman personally not to take the action which the majority has taken. I also suggested to the Chairman that if the majority was insistent upon taking some action, it modify the original action taken.

I hope that you will either clarify the record in the foregoing respects, or permit me at some later date to testify under oath with respect to the matter.

Very respectfully yours,

T. A. M. Craven,
Commissioner.

Enclosure.

P.S. I wish to call particular attention to the fact that as late as 10:30 a.m., March 23, the day the order was published, I pleaded with the Chairman of this Commission to either delay or modify the action taken.

**Lundeen’s Radio Speech**

April 6, 1940.

Permit me to thank Mutual Broadcasting Company and the National Broadcasting Company for this opportunity to discuss the current confusion over the development of television. A member of the Interstate Commerce Committee of the United States Senate, to which all radio legislation is referred for detailed study and consideration, must keep abreast of radio developments. The seriousness of the television crisis of the moment is impressed upon me by the current disturbed feeling in advertising circles.

During a session of Congress, we find it physically impossible to engage in much research on economic trends and yet we must be informed. We must work out some satisfactory system to keep reasonably well informed on what the “feel” is in business circles.

Keeping in touch with the advertising world gives a quick and reliable insight into what the future may hold by way of business opportunities. However, as the advertising world is made up of people who advertise, and advertising constitute an excellent barometer of the thinking among men who guide American industry, the men who really determine the size of payrolls. There never was or never can be a substitute for jobs in private industry as the key to national prosperity. The simplest way for me to keep in touch with advertising is to read advertising trade papers.

Here is the heading from the leading story in the last issue of Advertising Age, a national newspaper of advertising:

“FCC’s Drastic Stand on Television Stuns Trade—RCA Cancels Advertising; Dealers Utter Lamentations.”

Listen to the first paragraph of that story:

“Television, the lusty infant that was being groomed to discard its swaddling clothes, this week appeared destined to...
continue in diapers, at least until settlement of the industry row caused by the Federal Communications Commission's order rescinding a previous order that would have permitted limited commercial sponsorship beginning September 1."

On reading that pessimistic report from an advertising paper, I decided it was a duty to look into the situation. Securing copies of orders and press releases on television from the Federal Communications Commission, here is what we found:

After extensive hearings, the Commission on February 29 of this year issued an order permitting limited commercial operation of television after September 1. This was immediately followed by a series of manufacturing operations of companies producing television receiving sets, accompanied by advertising and sales campaigns. Then on March 22, less than a month later and when the manufacturing and sales efforts were really getting underway, the Commission—without a hearing of any sort—suddenly rescinded its order of February 29 and stopped television development in its tracks pending more hearings to begin April 8. According to Broadcasting, national radio magazine, this action jeopardizes the jobs of some 1,000 employees of one company alone, one that has spent $10,000,000 on television. The Commission did not claim that unexpected technical developments justified these new hearings with the attendant delay and confusion. Its only explanation, as given in a press release, was some criticism certain members of the Commission had of the marketing campaign of one of the manufacturers of television sets.

Having had a hand in passing the law under which the Federal Communications Commission operates, I knew of no authority Congress had given the Commission to regulate, control or supervise the marketing of radio or television receiving sets. On the contrary, authority to cope with misleading advertising rests in the Federal Trade Commission. In fact, just a week earlier the Supreme Court of the United States handed down a decision in which the Court stated that the Communications Act does not essay to regulate the business of the licensee.

A new industry is being throttled by a government bureau exercising power never granted by Congress. My feeling in this regard was strengthened when I read an editorial in the Washington Post, a Scripps-Howard newspaper, which observed as follows on this action by the FCC—

"In this, the bureau designed to allocate wave lengths—
an obviously necessary job, since wave lengths are limited—
arrogates to itself the authority to forbid merchandising of receiving sets on the contention that in this new art the sets might too soon become obsolete. Under that sort of government philosophy the automobile, the electric light, aviation and radio would never have got started."

I have offered a resolution in the Senate asking the Interstate Commerce Committee to make an immediate investigation of the Commission's actions on television and ascertain, in particular, whether the Commission had exceeded its authority and whether it has interfered with the freedom of the public and of private enterprise. Senator Burton K. Wheeler, of Montana, is chairman of that committee. Perhaps we may be able to stop this bureaucratic seizure of power there.

Apparently Chairman James Lawrence Fly of the Federal Communications Committee realized that this action of the Commission had created widespread protest for on Tuesday evening of this week, over an NBC and Mutual hook-up, the Chairman discussed television.

He said: "Now let me be perfectly plain in stating the position of the Federal Communications Commission on the question of public participation in the future development of television. Does the Commission wish to discourage members of the public from purchasing television receiving sets today? The answer is emphatically 'No.' As a matter of fact, it is only by having receiving sets in the homes of members of the public that experimentation in program techniques can be successfully carried on. But it is important that the public be aware that when they buy television sets they are partaking in a program of experimentation."

All I can say is that is that if the chairman had issued a statement along similar lines, instead of having the Commission revoke its order of February 29, there would be no such apprehension as now has been created.

I noticed in the press that Commissioner T. A. M. Craven, who is recognized in and out of radio circles as the one technically informed man on the Commission, dissented from the unusual action of the Commission on March 22. Inasmuch as I had heard Chairman Fly's views at length over the radio and I wanted all angles of the story, I wrote to Commissioner Craven asking his reasons for dissenting. He has written me a letter and because of his pre-eminence in radio development, I want to quote from this expert as to whether any situation, which might stop research and freeze technical development of television, existed between the Commission's first action in February and its second order in March.

While explaining that his dissenting vote reflected an honest difference of opinion and insisting that he prefers not to disturb the present friendly relations within the membership of the Commission by engaging in any public controversy over this or any other issue with other commissioners, Mr. Craven writes—

"The majority concludes that recent promotional activities of a television receiver manufacturer will effectively stop research and 'freeze' technical development in television."

"In my opinion, such a contention is absurd on its face, and is not justified by either facts or experience. Nothing can stop scientific research and technical progress in a free democracy if incentive is not discouraged by Government. The Commission itself, by order of suspension, such as in the instant case, can create such confusion as to retard the development of television and discourage the incentive and initiative of private enterprise."

"In my opinion, the technique of television has advanced to the stage where an initial public trial is entirely justified. Such a trial would spur television onward, not only more rapidly, but also more effectively than any other method. I agree with the majority that technical improvements are required in television and I agree that the Commission should not approve standards at this time. However, no one can foretell accurately how these technical improvements will be secured and what public reaction will be. It is already obvious that some of the technical methods suggested by the Commission in its previous report may not be the best. This is not surprising, since the Commission has had no practical experience in technical research for television nor is it equipped to undertake such problems."

"There is no reason, in the present state of development of television for a Commission in Washington to substitute its judgment for that of the public. The public is the wisest judge of scientific achievement and will be most effective in securing the technical improvements it desires."

"In this case the Commission would have been on a more logical ground had it merely made public the facts concerning obsolescence of television receivers, rather than taking action which prevents the public from exercising its own judgment. The Commission will have performed its duty to the public, insofar as obsolence of receivers is concerned, when it has informed the public of the facts."

"The present prices of television receivers automatically restrict its use to those who can afford replacements as technical progress requires. The burden of experiment falls on wealthy people, as it should, to pave the way for ultimate inexpensive television to all."

That concludes Commissioner Craven's observations on this subject of "freezing" television development.

My studied opinion is that the Federal Communications Commission was in error when it rescinded its permission for limited commercial television. Accordingly, I believe the best interest of television development calls for abandoning the new and unnecessary hearings which are scheduled to start on Monday and a return to the status quo of before its unfortunate action of March 22. I believe the FCC should stay within the authority granted it by Congress and defined so recently by the United States Supreme Court. I believe it and every other bureau of government agency should use common sense and encourage, not block, the development of television or any other industrial activity that will put unemployed men and women back on private payrolls and speed up the return of a prosperous United States.

Barbour's Bill

An amendment to the Communications Act of 1934 has been introduced in the Senate by Senator Barbour of New Jersey "to limit the powers of the FCC in certain cases."

The bill was referred to Committee on Interstate Commerce and is as follows:

That the Communications Act of 1934 is hereby amended in the following respects:
By striking out the heading preceding section 326 and inserting in lieu thereof "Limitations; Censorship; Indecent Language".

By inserting after the first sentence of section 326 the following new sentence: "Except as expressly provided in section 301 of this Act, nothing in this Act shall be understood or construed to give the Commission any power to regulate or in any way supervise, control, or interfere with the transmission of energy, communication, or signals by radio, or the business policies of radio broadcasters."

Barbour's Statement

Millions of Americans will be deprived of an early opportunity to get television programs unless Congress "knocks some sense into the Federal Communications Commission," Senator W. Warren Barbour of New Jersey declared today as repercussions from the Commission's recent stop order addressed to the industry continued throughout the capital.

As a Senate committee plunged into the problem and the Commission itself continued its own hearings on the subject, Senator Barbour offered a bill in the Senate designed to unshackle television from what he described as "horse-and-buggy control by a bumbling and brazen bureaucracy."

The measure would explicitly deny to the Commission any power to control or interfere with radio experimentation, research or development, or with the use, manufacture or sale of transmission or reception apparatus, including television sets, or the business policies of broadcasters. Its effect would be to give statutory reinforcement to last week's decision by the Supreme Court that the Commission does not possess these powers now.

"I have prepared and introduced this proposed legislation as a necessary step, in my judgment, to end the present horse-and-buggy control of a rapidly developing new industry by a bumbling and brazen bureaucracy," Senator Barbour said.

Instead of promptly accepting the language and implications of the Supreme Court's decision, the Federal Communications Commission has so far refused to grant the industry the freedom it was granted in 1927 to control or interfere with the transmission or use of radio apparatus for the purpose of the transmission or reception of energy, communications, or signals by radio, or the business policies of radio broadcasters.

Connery's Resolution

Whereas it is hereby authorized and directed to inquire into and investigate the allegations and charges that have been or may be made relative to irregularities in or pertaining to the monopoly which exists in radio and the activities and functions carried on under the Communications Act of 1934 and all matters pertaining to radio and radio broadcasting; it be

Resolved, That a committee of seven Members of the House of Representatives shall be appointed by the Speaker, which committee is hereby authorized and directed to inquire into and investigate the allegations and charges that have been or may be made relative to irregularities in or pertaining to the monopoly which exists in radio and the activities and functions carried on under the Communications Act of 1934 and all matters pertaining to radio and radio broadcasting; be it

Resolved, That the purpose of this resolution the said committee is authorized to hold such hearings, to sit and act during the sessions and the recesses of the present Congress at such times and places, either in the District of Columbia or elsewhere, and to employ such expert, clerical, and stenographic services as may be found necessary and to require by subpoena or otherwise the attendance of witnesses; to administer oaths; to compel the production of books, papers, and documents by Government or private agencies; and to take and record such testimony as the committee may deem advisable or necessary to the proper conduct of the investigation directed by this resolution.
FCC Television Hearing

Monday, April 8, 1940

The Television Hearing was conducted by the entire Commission with the exception of Commissioner Case.

Chairman Fly opened the hearing by reading a prepared statement which read as follows:

"After long study of the problems of television by the Commission's Television Committee, composed of Commissioners Craven, Case and Brown, and by the staff, the full Commission in January of this year held extensive hearings on this subject. On February 29, a report was issued which to a great extent was a reflection of an earlier report of the Committee.

This new report of the full Commission held that in view of the admitted need for improvement and because of the extensive experimental work then under way, research and experimentation should continue unabated, and, therefore, that transmission standards should not be then fixed either by the Commission or by members of the industry. The Commission emphasized that its controlling aim was the achievement of higher standards by research and development and, necessarily, the avoidance of any crystallization of transmission standards at present levels of efficiency.

The engineering evidence had clearly established the lock and key relationship of receiver and transmitter precluding major changes in transmitters because of the great loss which might be caused to the owners of receivers. The Commission warned the industry of the retarding effect upon future research which would be caused by a widespread public investment in television equipment that would lock transmission standards down to the levels of current development.

It further determined that licenses should continue on an experimental basis for the time being, although as a part of the program of experimentation there might be, after September 1, 1940, a limited participation by program sponsors.

Rules concurrently issued for experimental television operations, which were only modifications of those projected by the Television Committee, placed these conclusions into effect.

Thereafter, on March 22, 1940, because of certain intervening events, the Commission issued its second report that:

"...whether research and experimentation and the achievement of higher standards for television transmission are being unduly retarded by the action of the Radio Corporation of America or its subsidiaries, or any other licensee, requiring any additions, modifications, revisions, or amendments of the rules adopted February 29, 1940, governing television broadcast stations, or other action by the Commission; and whether the effective date for the beginning of limited commercial operations set forth in Section 4.73 Subsection (b) of the Commission's Rules and Regulations should be changed from September 1, 1940, to some subsequent date."

It should be made clear that no subject matter is to be considered at this hearing which was not considered and dealt with in the Commission's previous hearings and reports. The present order covers only a part of the same subject matter.

It should be borne in mind that this is not a trial; and no effort will be made here to determine the legal propriety of the promotional activities of the industry. It should also be emphasized that the Commission has no intention of adopting any rules as to the design or as to the marketing of receiving sets.

The subjects to which this inquiry is directed concern the present status of television, its research and development, and the problem of the exercise of the Commission's statutory duty to issue experimental licenses and to fix the standards for television transmission.

Evidence of the foregoing subjects will be received and considered only as and to the extent that it bears upon these duties of the Commission. More specifically, the scope of the problems to be dealt with here is stated in our Public Notice of April 4, 1940, as follows:

"The evidence of ... parties should, in summary form, state the scope of their present television experimentation in terms of subject matter, staff, and time devoted to the same and should indicate what proportion of their total work are directed toward technical ends and toward commercial production. This information should be broken down with respect to the periods prior and subsequent to March 1, 1940. Any changes made or under consideration as a result of sales promotional activities should be stated, composed of this television apparatus to be used by television stations.

"... that the lower the frequency the better."

"Yes", and that the lower the frequency the better.

Mr. Weiss said that a chain of newspapers was interested in installing television apparatus to be used by television stations.

Mr. DuMont reiterated his stand that a fully flexible standard should be adopted. He said that if the 441 line standard is adopted that his company's experiments on a higher definition pictures will cease. Mr. DuMont said that he saw no reason why we couldn't have limited commercialization by September 1, 1940, provided standards are set the same as RMA with the exception that the number of frames, number of synchronization impulses should not be specified, and these should be left flexible.

Mr. Harry R. Lubeke, director of television for Don Lee, was the first witness on Tuesday. He reaffirmed his previous stand that the RMA standards is the best engineering arrangement in a 6 MC channel. Chairman Fly asked if he didn't think that different stations should have comparable facilities, and the answer was, "Yes", and that the lower the frequency the better.

Mr. Lewis Allen Weiss, vice president and general manager of Don Lee, appeared next. He said that television has progressed far enough so that it is ready now for full commercialization and that this is not held up or delayed for the purpose that they represent the thinking of most of the television engineers. Mr. Weiss said that a chain of newspapers was interested in installing television equipment and that if commercialization were allowed Don Lee could expect a revenue of $18,000 to $20,000 per week from this source. He said that after full commercialization there should be about 10,000 television sets in the LA area and that television could be an adult advertising medium.

Next to appear was W. D. Smith on behalf of Philco. He said that their staff of about 40 television research engineers had been cut to about two-thirds since the FCC order of February 29, allowing partial commercialization. Philco figured that research outside the RMA standards was no avail. Mr. Smith said that the only way we could have research outside the RMA standards was "... that the lower the frequency the better."

Mr. Smith said that the only way we could have research outside the RMA standards was that the lower the frequency the better.

Mr. Smith said that the only way we could have research outside the RMA standards was that the lower the frequency the better.

I
Ten More Stations Join Broadcast Music, Inc.

Subscriptions from ten more stations for BMI have been received, bringing the total to 290. Ninety-four more have pledged subscriptions. The total amount now paid and pledged is $1,267,189.05.

The new stations:

WMGA, Moultrie, Ga.  
WDNE, Tampa, Fla.  
WFBC, Indianapolis, Ind.  
WHFC, Cicero, Ill.  
WAAF, Chicago  
KSO, Des Moines, Iowa  
KRNT, Des Moines, Iowa  
WMT, Cedar Rapids, Iowa  
WNAX, Yankton, S. D.  
KRSC, Seattle

CODE COMMITTEE MEETS

Expressing its satisfaction at the progress being made by the NAB Code and the increased public understanding and support which it is receiving, the Code Compliance Committee met Thursday at Headquarters for an all-day conference.

Problems imminent with the approach of the presidential campaign during the summer and fall months were thoroughly analyzed and discussed. The question of enforcement of the Commercial Section of the Code, which becomes fully effective next October 1, was another major topic of discussion. Aspects of labor discussions on the air were presented by Joseph L. Miller, NAB Director of Labor Relations.

Those attending the meeting were: Edgar Bill, WMBD, Chairman; Martin Campbell, WFAA; Earl J. Glade, KSL; Gilson Gray, CBS; Don Searle, KOIL; Calvin J. Smith, KFAC; Theodore Streibert, MBS; Kenneth Berkeley, NBC; William B. Dolph, WOL; Ed Kirby, Secretary of the Committee.

Neville Miller, NAB president, also attended the all-day session.

NEW APPLICATION FORMS

Last week the Federal Communications Commission released a new construction permit application questionnaire—FCC Form No. 301 (Revised March 1940). The title of the new form is “Application for Standard Broadcast Station Construction Permit or Modification Thereof”. The questionnaire, in mimeographed form, occupies 42 pages. It is understood that the form is amplified to facilitate the Commission’s granting construction permits without hearings.

The NAB staff is studying the revised form in the light of the burden it places upon applicants.
BROADCASTERS FREE TO USE COLUMBIA, DECCA RECORDS

Both Columbia and Decca Records have advised broadcasting stations that they would make no claim against the stations, for the time being, for use of their phonograph records.

The following notices were received by stations:

**WESTERN UNION TELEGRAM**

**April 8, 1940.**

Radio Station —

We confirm that our consistent policy remains unchanged of refraining from taking action against broadcasters for performance of our records. We will not bring action or make claim against your station arising use Columbia Brunswick Vocalion records and will give you due notice if circumstances cause us hereafter to alter policy.

COLUMBIA RECORDING CORPORATION, Bridgeport, Conn.

DECCA RECORDS, INC.
50 W. 57th Street, New York City.

**April 5, 1940.**

Radio Station —

**GENTLEMEN:**

Herefore we advised you that the United States District Court for the Southern District of New York rendered a decision holding that record manufacturers have the right to control the use of their phonograph records by broadcasting stations. This decision has been appealed. We are informed that it may take some time before the courts make final disposition of the appeal.

It is the purpose of this letter to advise you that for the time being, and subject to withdrawal upon sixty days’ written notice, we shall make no claim against you because of any reasonable use of our records on your station.

Very truly yours,

DECCA RECORDS, INC.,
by Jack Kapp, President.

**SEND BILLING FORMS TO NAB**

The American Association of Advertising Agencies has expressed the desire to standardize invoice or billing forms. For that reason, member stations are urged to submit copies of their billing forms to the NAB Research Department for its study.

NAB has indicated its desire to cooperate to the 4 A’s in developing recommended invoice or billing forms, the need for affidavits can be completely eliminated.

The following letter from the American Association of Advertising Agencies dated April 3rd and signed by Mr. Richard Turnbull was received by Neville Miller last week.

**DEAR MR. MILLER:**

Our Committee on Fiscal Control feels that it would be very desirable if invoices submitted to agencies by radio stations were standardized as to form.

April 12, 1940

Richard Turnbull/cs
Secretary to Committee on Fiscal Control.

The Committee expects, in the near future, to look over station invoices to see if such a standard form can be devised.

We are sending the attached letter to a list of about 100 radio stations, picked more or less at random, in order to get sample forms to work with.

If anything comes of the Committee’s study of these forms we will get in touch with you.

Yours very truly,

s/Richard Turnbull,
Secretary to Committee on Fiscal Control.

The communication addressed to stations referred to in the above letter is as follows:

**DEAR ———:**

Our Association’s Committee on Fiscal Control is making a study of the invoice forms employed by radio stations in billing advertising agencies for station time.

In connection with this study we are gathering such forms from about 100 radio stations throughout the country.

Would you be willing to cooperate with our Committee by sending us a specimen of the form you use in billing advertising agencies?

Yours very truly,

Secretary to Committee on Fiscal Control.

Richard Turnbull/cs

All member stations are requested to submit their billing forms to the NAB Research Department to facilitate our cooperation with the AAAA on the subject.

**FREE OFFERS**

The following “free offers” have been reported by member stations during the past two weeks:

- American Institute of Baking
- Better Vision Institute, Inc.
- Harcourt, Brace & Company, Inc.
- Marine Studios.

The Bureau of Radio Advertising has written to these concerns, inviting them to pay for time. Though much of the material submitted to stations “free of charge” is undoubtedly interesting, the Bureau and NAB members are of the opinion that it is definitely commercial in nature and purpose, and therefore should be paid for. Broadcasters who accept on any other basis are, in the opinion of the NAB, undermining their own economic position.

The same applies to such percentage propositions as those of Leroy A. Kling, on behalf of Vita-Culture, and Rogers & Smith, on behalf of several clients. These agencies have recently written lengthy letters to a large list of stations, inviting them to accept contingent advertising on a basis of 35 cents for each $1 order stations produce. In both cases, the letter points out the potential profits which will accrue to broadcasters on this basis, but emphasizes the definite risk to advertiser on any other basis of payment. The Bureau has written these concerns, reminding them that agencies and media have a common interest in the proper and healthy growth of radio advertising, which can only be accomplished by maintaining...
radio’s rate structure (as well as the 15 per cent commission), paying for time at card rates. No medium, the Bureau points out, can be expected to guarantee results from advertising or assume the risks of product promotion.

SALES MANAGERS TO MEET

Chairman William R. Cline, WLS, Chicago, has called a meeting of the Steering Committee of the Sales Managers’ Division for Monday, April 15, in Chicago.

Expected to attend the discussion of industry sales and advertising problems are Craig Lawrence, KSO, Des Moines, former Sales Managers’ Chairman; Charles Caley, WMBD, Peoria; Ellis Atteberry, KCKN, Kansas City, Kansas; Barney Lavin, WDAY, Fargo; Owen Uridge, WJR, Detroit; and Sam Henry of the NAB Bureau of Radio Advertising.

N. Y. SANITARY CODE

Neville Miller urged the New York City health department this week to amend a proposed new article of the Sanitary Code which would prohibit “the dissemination of any advertising relative to any drug or device or cosmetic which is false or misleading.” Mr. Miller pointed out that the broadcasting industry already was covered by federal and state legislation on this point and that the section, as written, “will work an unfair hardship” on stations in New York.

FM BRIEFS DUE APRIL 22

The FCC announced Thursday it had extended for one week from April 15 the time for filing briefs in connection with the hearing on Frequency Modulation.

44,000,000 RADIOS

In view of conflicting industry claims, the NAB Research Department reiterates its estimate published in NAB Reports (Vol. 7, No. 52, December 29, 1939) that at January 1st there were 44,000,000 radios in the United States. Further detail of this information is as follows:

<table>
<thead>
<tr>
<th>Type of Set</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Radio Families</td>
<td>28,000,000</td>
</tr>
<tr>
<td>Extra Sets</td>
<td>9,500,000</td>
</tr>
<tr>
<td>Automobile Sets</td>
<td>6,500,000</td>
</tr>
<tr>
<td><strong>Total Sets</strong></td>
<td><strong>44,000,000</strong></td>
</tr>
</tbody>
</table>

By way of explanation, under the heading Extra Sets, are secondary sets in homes, portable radios, radios in places of business, institutions, hotels, etc.

The 1940 Census which is now in the field will develop information on the number of radio families only and throw no light on the extra sets in homes, those in places of business, etc.

FCC ORDER AMENDED

The FCC has adopted an amendment to its order issued March 13 in the matter of the application of the Presque Isle Broadcasting Company, to erect a new station in Erie, Pa., to operate on frequency 1500 kc., with power of 100 watts night, 250 watts local sunset, unlimited time, by adding a paragraph directing that permittee shall within two months after effective date of order file with the Commission an application for modification of construction permit, specifying exact transmitter site and antenna system.

RADIO IN THE COURTROOM

Neville Miller took part in a panel discussion in New York on April 6 on radio and the press in the courtroom. The discussion was held under the auspices of the Regional Conference Section of Bar Association Activities of the American Bar Association. On the panel were William Allen White, Paul Bellamy, Giles Patterson and Mr. Miller. Raymer Maguire, chairman of the Section, presided.

FCC APPEALS KSFO CASE TO SUPREME COURT

The FCC has petitioned the Supreme Court for a writ of certiorari in the KSFO-CBS case to determine whether appeal lies from the Commission’s denial of a request for written consent to the assignment of a radio station license.

Harry Wilder, Jr.

Harry Wilder, Jr., aged 21, son of NAB’s Second District Director, was killed in an automobile accident in Florida last Sunday night. The funeral was held Thursday in Syracuse, N. Y. The entire industry extends its sympathy to Mr. and Mrs. Wilder.

ANNOUNCE NATIONAL RADIO FESTIVAL, INDUSTRY’S SPRING PROMOTION

Plans for National Radio Festival, June 3-8, or “any date you select”, were mailed to member stations Wednesday, April 10.

A follow-up mailing on Thursday contained a demonstration-talk suitable for delivery before business and civic groups, and a reproduction of two tie-in windows.

The talk was provided by Edward A. Allen, president of WLVA, Lynchburg, Va., and the window photographs by Paul J. Miller, production manager of WWVA, Wheeling, W. Va. A variety of activities and specific promotions were suggested in the announcement of the event.

Cooperation of members is urgently required at the outset in the matter of securing a large number of city and state Radio Festival proclamations, suggested copy of which was enclosed in the first mailing.

Station personnel with additional ideas for promotion are urged to send them in at once in order that they may be put to work throughout the industry.

One hundred dollars ($100) in cash has been made available by NAB for the best essay on the “American System of Broadcasting—Why It Is Best for Americans.”
The best essay will be selected from among the prize winners at individual member stations. Allowance will be made for age and grade of contestants.

STATE LEGISLATION

Mississippi:
H. 901 (Osborne) RADIO EQUIPMENT—POLICE—TRACTORS—To authorize the Governing Authority of the City of Greenwood to issue not exceeding $30,000.00 bonds for the purpose of buying garbage trucks, graders, tractors, sprinklers and flushed and other motor vehicles for use in the street department; two-way Radio Broadcasting and Receiving equipment for Police Station and Patrol Cars. Referred to Local and Private Committee.

823 STATIONS

During the month of March, 1940, the Federal Communications Commission issued operating licenses to five stations, and granted two permits for the construction of new stations. One station was deleted. A comparative table by months follows:

FEDERAL COMMUNICATIONS COMMISSION

FINDINGS OF FACT

Federal Communications Commission has tentatively denied the application of the American Broadcasting Corporation of Kentucky, licensee of Station WLAP, Lexington, Kentucky, for a permit to install a new transmitter and a directional antenna for nighttime and to change its frequency from 1420 to 1270 kilocycles, and to operate with 1000 watts, unlimited time, instead of 100 watts, 250 watts LS, unlimited time.

Application of the Neptune Broadcasting Corporation for a new station at Atlantic City, New Jersey, has been tentatively granted to operate on 1420 kilocycles, 100 watts night, 250 watts LS, unlimited time, subject to a selection of an approved transmitter site and antenna system.

Commission has tentatively denied the application of Ben S. McGlashan for renewal of high frequency broadcast station licenses for stations W6XKG operating on frequency 25,950 kilocycles with power of 1000 watts, and station W6XRE operating on 42,300, 116,950, and 350,000 kilocycles with power of 500 watts, both stations licensed on an experimental basis, located in Los Angeles, California.

FEDERAL COMMUNICATIONS COMMISSION ACTION

There was no meeting of the Commission this week.

MISCELLANEOUS

W2XWF—William G. H. Finch, New York, N. Y.—Granted extension of special temporary authority to change from A-3 emission to special emission frequency modulation 75 kc. swing to make comparative tests on amplitude modulation from April 4, 1940, to not later than April 13, 1940, in order to complete installation of FM unit.

KAXZ—United Air Lines Transport Corp., c/o Aeronautical Radio Inc., Washington, D. C.—Granted special temporary authority to operate already licensed aircraft radio transmitter, aboard the plane owned by United Air Lines Transport Corp., call letters KHAZT as a relay broadcast station, on Tuesday, April 15

NEW—Anthracite Broadcasting Co., Inc., Scranton, Pa.—C. P., 1370 kc., 250 watts, unlimited time.

Tuesday, April 16

NEW—Miami Broadcasting Co., Miami, Fla.—C. P., 1420 kc., 250 watts, unlimited time.

Friday, April 19

WGRC—Northside Broadcasting Corp., New Albany, Ind.—Modification of license to move main studio to Louisville, Ky., 1370 kc., 250 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for hearings. They are subject to change.

April 25

Oral Argument Before the Commission

Report No. P-5:

Report No. B-88:

May 27

Further Hearing

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Modification of license, 810 kc., 1 KW, specified hours (6 a. m. to 11 p. m. EST), DA-Daytime. Present assignment: 810 kc., 1 KW, daytime—WCCO, directional antenna.
the frequency 2290 kc, to relay broadcast program in connection with Washington-California Crew Races to be released through Radio Station KOMO to the NBC Red and Blue Networks from 2:00 p. m. to 5:00 p. m. PST on April 20, 1940.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with Station WGBF with power reduced to 250 watts from 7:00 p. m. CST, to make changes in type of transmitting equipment; frequency 980 kc., 250 watts, unlimited time.

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—Granted construction permit to install new transmitting equipment; frequency 1606, 2022, 2102, 2758 kc., power 50 watts (B3-PRY-213).

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—Granted construction permit for new relay broadcast station; frequencies 30820, 33470, 35820, 37980 kc., power 15 watts (B3-PRE-343).

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—Granted construction permit for new relay broadcast station; frequencies 1622, 2058, 2150, 2790 kc., power 40 watts (B3-PRY-212).

WGST—Gallaher Manufacturing Co., Inc., New York, N. Y.—Granted special temporary authority to operate Television Station W3XAD on 288 mc. in lieu of its normal assigned experimental channel 321-327 mc. for the purpose of carrying out preliminary setup tests on April 5, 1940, and to relay that program during the Army Day parade maneuvers as the various contingents pass the reviewing stand at Fifth Ave. and 64th Street, New York City to Television Station W2XBS, on April 6, 1940.

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted special temporary authority to rebroadcast army plane transmissions while flying over Pontiac and Detroit, on April 5 and 6, 1940, in cooperation with Selfridge Field officials for Army Day Celebration (B2-S-1040).

WREB—E. K. Krebsbach, Miles City, Mont.—Granted motion to dismiss without prejudice application for new station to operate on 1510 kc., 100 watts night, 250 watts LS, unlimited time.

Star Printing Co., Miles City, Mont.—Granted motion for indefinite continuance of hearing now scheduled for May 1, on application for new station to operate on 1310 kc., 250 watts, unlimited time.

Springfield Radio Service, Inc., Springfield, Ohio.—Dismissed with prejudice application for new station to operate on 780 kc., 250 watts, daytime only.

The Brockway Company, Watertown, N. Y.—Granted motion to accept amendment to application for construction permit for new station, to delete in its entirety the amendment filed June 14, 1936, and substitute therefor an amendment specifying 500 watts power instead of 250 watts, change in equipment, and deletion of any reference to lessee operation; the frequency requested is 1270 kc., daytime hours.

C. T. Sherer Co., Worcester, Mass.—Scheduled for oral argument the proposed findings in re application for new broadcast station for April 25, 1940 (Docket No. 5474).

WRVA—Larus & Bros. Co., Inc., Richmond, Va.—Granted special temporary authority to rebroadcast program in connection with arrival of Army plane being flown blind from Mitchell Field to Langley Field, using Army short wave equipment and frequency on April 6, 1940 (B3-PRY-246).

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—Granted special temporary authority to discontinue the broadcasting operations until the revocation of license and other matters can be placed before the Commission, but ending not later than August 1, 1940 (B3-S-401).

KTTC—Tulare-Kings Counties Radio Associates, Visalia, Calif.—Granted license to cover construction permit for changes in transmitting equipment; frequency 890 kc., 1 KW, unlimited time, directional antenna at night (B5-L-1125).

WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Granted modification of construction permit for authority to make changes in type of transmitting equipment and extend commencement date 120 days after grant and completion date 180 days thereafter; 1420 kc., 250 watts, unlimited time (B1-MLP-955).

WEKH—Peoria Broadcasting Co. (area of Peoria, Ill.), Portable-Mobile.—Granted license to cover construction permit for new relay broadcast station; frequencies 39820, 35740, 35820, 37980 kc., power 15 watts (B3-PRY-343).

WAPN—The Louisville Times Co., Louisville, Ky.—Granted special temporary authority to operate from 8:45 p. m. to 9:00 p. m. EST on April 15, 1940, in order to broadcast a program in celebration of Universal Notre Dame Night (B4-S-669).

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 10:00
APPLICATIONS FILED AT FCC

560 Kilocycles

NEW—Edward Tom O'Brien, David Shepard, Howard S. Johnson, and John W. Boler, d/b a as Braner-Bemidji Broadcasting Co., Brainerd, Minn.—Construction permit for a new broadcast station to be operated on 560 kc., 500 watts night, 1 KW day, unlimited time. Amended: give transmitter location as site to be determined, Brainerd, Minn. Requests Class III-B station.

610 Kilocycles

WCLE—United Broadcasting Co., Cleveland, Ohio.—Construction permit to install directional antenna for day and night use; install new transmitter; change frequency and power from 610 kc., 500 watts night, 1 KW day, to daytime only to daytime (local sunset, Calif.); move transmitter from Village of Seven Hills to Cleveland, Ohio; requests Class II station and facilities of station WHKC.

640 Kilocycles

WHKC—United Broadcasting Co., Columbus, Ohio.—Construction permit to install directional antenna for day and night use; install new transmitter; change frequency and power from 640 kc., 500 watts day, 1 KW night, to daytime only to daytime (local sunset, Calif.); move transmitter from 1418 E. 81st., Los Angeles, Calif., to Branford Ave., Van Nuys, Calif., and install directional antenna for day and night use. Amended: changes in direction antenna.

710 Kilocycles

KMPC—KMPC. The Station of the Stars, Inc., Beverly Hills, Calif.—Construction permit to increase power from 1 KW: 5 KW day to 5 KW day and night, move transmitter from 610 kc., 640 kc., 1 KW, time from daytime to daytime, (local sunset, Calif.); request Class III-B station; move transmitter and requests facilities of station WCLE.

770 Kilocycles

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Extension of special experimental authority to operate synchronously with KFAB from sunset at Lincoln, Nebr., to 12 midnight, period ending 8-1-40. Amended: changes in direction antenna.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Modification of license to change corporate name of licensee to Memphis Publishing Co.

900 Kilocycles

KJH—Don Lee Broadcasting System, Los Angeles, Calif.—Construction permit to increase power from 1 KW to 5 KW day and night, install directional antenna for day and night use, make equipment changes and move transmitter locally. Requests Class III-A station.
920 Kilocycles
KFEL—Eugene P. O'Fallon, Inc., Denver, Colo.—Construction permit to install new transmitter and increase power from 1 to 5 KW. Amended: to install directional antenna for day and night use. Request Class III-A Station.

970 Kilocycles
WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Construction permit to install a new transmitter.

1010 Kilocycles
WCFL—Chicago Federation of Labor, Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power, for auxiliary transmitter.

1040 Kilocycles
KTHS—Hot Springs Chamber of Commerce, Hot Springs, Ark.—Extension of special experimental authority to operate on 1060 kc., simultaneous with WBAL from 6 a. m. to local sunset, daily, suspend until 8 p.m., and limited time from then until midnight, period 4-1-40 to 5-1-40. Amended: to change requested period to 5-1-40 to 8-1-40.

1060 Kilocycles
WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Extension of special experimental authority to operate simultaneous with KRLD unlimited time on 1010 kc., using directional antenna night, for period 5-1-40 to 8-1-40.

1120 Kilocycles
WDEL—WDEL, Inc., Wilmington, Del.—Construction permit to install directional antenna for night use, increase power from 1 KW night 5 KW day to 5 KW day and night.

1140 Kilocycles
WAPI—Alabama Polytechnic Institute, University of Alabama & Alabama College (Board of Control of Radio Broadcasting Station WAPI), Birmingham, Ala.—Extension of special experimental authority for unlimited time, using directional antenna after sunset at Tulsa, Okla.

1200 Kilocycles
KGDE—Charles L. Jaren, Fergus Falls, Minn.—License to cover construction permit (B4-P-2267) for installation of new transmitter.

1210 Kilocycles
WJBW—Charles C. Carlson, New Orleans, La.—License to cover construction permit (B3-P-2549) to make changes in equipment and increase power.

1220 Kilocycles
WSKB—McComb Broadcasting Corp., McComb, Miss.—License to cover construction permit (B3-P-2676) to make changes in transmitting equipment, and increase power.

1250 Kilocycles
WGDM—Western Radio Corp., The Dalles, Ore.—Construction permit for a new broadcast station to be operated on 1200 kc., 100 watts night, 250 watts day, unlimited time. Requests Class IV station.

1270 Kilocycles
WAGF—John T. Hubbard, Julian C. Smith & Fred C. Moseley, d/b/a as Dothan Broadcasting Co., Dothan, Alabama.—Construction permit to move transmitter from Southeast Alabama Fair Grounds, Dothan, Alabama, and install new antenna.

1310 Kilocycles
KGHF—Curtis P. Ritchie, Pueblo, Colo.—License to cover construction permit (B5-P-2450) as modified for installation of new antenna and move of transmitter.

1320 Kilocycles
KGHF—Curtis P. Ritchie, Pueblo, Colo.—Authority to determine operating power by direct measurement of antenna power.

1370 Kilocycles
WAGF—John T. Hubbard, Julian C. Smith & Fred C. Moseley, d/b/a as Dothan Broadcasting Co., Dothan, Alabama.—Construction permit to move transmitter from Southeast Alabama Fair Grounds, Dothan, Alabama, and install new antenna.

1390 Kilocycles
NEW—The Brockway Co., Watertown, N. Y.—Construction permit for station WCAD to change frequency from 1220 to 1270 kc.; change hours from specified to daytime; install new transmitter and antenna and move transmitter from Canton to Watertown, N. Y., and studio from Canton to Watertown, N. Y. (contingent on granting B1-AL-118). Amended to request construction permit for new station (instead of construction permit for WCAD) to be operated on 1270 kc., 500 watts, daytime, and equipment changes.

1380 Kilocycles
KOH—The Bee, Inc., Reno, Nevada.—Modification of construction permit (B5-P-2279) to install new transmitter. Directional antenna for night use, change frequency from 1380 to 630 kc., power from 500 watts to 1 KW, and move transmitter, further requesting installation of new transmitter.

April 12, 1940
NEW—Atlantic Broadcasting Corp., Miami, Fla.—Construction permit for a new broadcast station to be operated on 1120 kc., 250 watts, unlimited time, requests Class IV Station.

KFIZ—Reporter Printing Co., Fond du Lac, Wis.—Authority to determine operating power by direct measurement of antenna emission.

NEW—Chattanooga Broadcasting Corp., Chattanooga, Tenn.—Construction permit for a new broadcast station to be operated on 1120 kc., 250 watts, unlimited time. (Contingent on B-3-P-1939, facilities of WAPO, when vacated). Amended: To change frequency to 1140 kc.

KAOY—Don Lee Broadcasting System, Los Angeles, Calif.—Modification of construction permit (BS-PRE-289) to install new transmitter and new antenna, change frequency from 1500 to 1540 kc., increase power from 250 watts to 500 watts; 1 KW day, move transmitter from 5th and Broadway, East St. Louis, Ill., to Golden Gardens, near E. St. Louis, Ill. (request Class II station).

KDB—Santa Barbara Broadcasting Ltd., Santa Barbara, Calif.—Modification of license to increase power from 100 watts; 250 day to 250 watts day and night.

MISCELLANEOUS

KEIV—Nichols & Warinner, Inc., Long Beach, Calif.—License to cover construction permit (B3-PRE-337) which authorized increase in power and changes in equipment.

KAQY—Don Lee Broadcasting System, Los Angeles, Calif.—Modification of construction permit (B5-PRE-297) for a new relay broadcast station, requesting extension of commencement and completion dates from 12-10-39 & 6-10-40 to 6-10-40 and 12-10-40, respectively.

KEGN—Don Lee Broadcasting System, San Francisco, Calif.—Modification of construction permit (B5-PRE-289) to install new equipment, requesting extension of commencement and completion dates from 12-27-39 and 5-27-40 to 5-27-40 and 8-27-40, respectively.

NEW—The Farmers and Bankers Broadcasting Corp., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1606, 2022, 2102, 2758 kc., 50 watts, emission A-3, area of Wichita, Kansas.

NEW—WDAY, Inc., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 133930, 131830, 130810, 130030 kc., power 1 watts, special emission for frequency modulation, area of Fargo, North Dakota.

W9XEN—Zenith Radio Corp., Chicago, Ill.—Construction permit to increase power from 1000 to 5000 watts, move transmitter locally and make equipment changes.

NEW—The Yankee Network, Inc., N. of Alpine, N.J.—Construction permit for a new high frequency broadcast station to be operated on 143000 kc., 5000 watts, special emission for frequency modulation. Amended: To request 43300 kc.

W1XTG—Worcester Telegram Publishing Co., Inc., Holden, Mass.—Modification of construction permit (B1-PRE-78) as modified for new high frequency broadcast station, requesting extension of completion date from 5-6-40 to 6-6-40.

NEW—Hildreth & Rogers Co., Anadover, Mass.—Construction permit for a new high frequency broadcast station to be operated on 42800 kc., 1000 watts, special emission for frequency modulation.

NEW—WOKO, Inc., New Scotland, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 134100 kc., 250 watts, unlimited time, special emission for frequency modulation. Amended: To request 1000 watts and make equipment changes.

NEW—Perkins Brothers Co. (The Sioux City Journal), Sioux City, Iowa.—Construction permit for a new high frequency broadcast station to be operated on 134100 kc. (commercial basis), 1000 watts, special emission for frequency modulation.

NEW—World Publishing Co., Omaha, Nebr.—Construction permit for a new developmental broadcast station to be operated on 140000 kc., 1000 watts, special emission for frequency modulation.

NEW—L. B. Wilson, Inc., Crescent Springs, Ky.—Construction permit for a new high frequency broadcast station to be operated on 142000 kc., 1 KW, special emission. Site to be determined, near Crescent Springs, Ky.

W9XIR—WCAU Broadcasting Co., Philadelphia, Pa.—Construction permit to change frequency from 42140 to 43000 kc., emission from A-3 to special for frequency modulation and make changes in equipment.

NEW—William F. Maag, Jr., Youngstown, Ohio.—Construction permit for a new high frequency broadcast station to be operated on 142000 kc., 1000 watts, special emission for frequency modulation.

NEW—Durham Radio Corp., near Durham, N. C.—Construction permit for a new high frequency broadcast station to be operated on 142000 kc., 1000 watts, special emission for frequency modulation.

NEW—The Baltimore Radio Show, Inc., Baltimore, Md.—Construction permit for a new high frequency broadcast station to be operated on 142000 kc., unlimited time, special emission for frequency modulation.

NEW—Champlin Valley Broadcasting Corp., St. Albans, Vt.—License to cover construction permit (B1-P-2837) for a new station.

**FEDERAL TRADE COMMISSION ACTION**

**COMPLAINTS**

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**Cigar Makers’ Federation**—A complaint has been issued charging a group of New York manufacturers and dealers with misrepresentation in the sale of cigars, tobacco products, pipes, razor blades and other merchandise.

Respondents are Edwin Cigar Company, Inc., trading also as Cigar Makers’ Federation, 100 East Sixteenth St.; House of Westminster, Ltd., trading also as Westminster Pipe Company, Westminster Steel Blade Company, and Westminster Steel Company, 191 Fourth Ave.; Max Rosenblum, Mrs. Max Rosenblum, Jules M. Cole, and Leonard R. Edwin, individually and as officers and directors of the two corporate respondents, 34 Union Square; and Fredi Mannara and John Schwab, of New York, Charles Grothe and Ruth Hess, York, Pa., and Park G. Shaw, Dallastown, Pa., employees of the respondents, trading as Cigar Makers’ Federation, 35 R. Irving Place.

Acting in cooperation the corporate and individual respondents are alleged to have sponsored newspaper, magazine and mail order advertising in which they represented, among various other things,
that certain cigars selling for 3 cents each are made of “Genuine Imported Havana Tobacco,” which designation was printed in heavy display type qualified in small illegible type by the phrase: “The finest Conn. shade-grown tobacco blended with;” that cigars offered in a close-out sale for 3 cents each are perfect, hand-made “Lord Edwin Ambassador” cigars which have sold for 35 years at 10 cents each and contain the choicest tobaccos, including Havana, and that cigars priced at 2 cents each are perfect cigars, 5⅛ inches long, and are fine, hand-made blended with Havana and the equal in smoking satisfaction of cigars selling at 10 cents and more.

The complaint alleges, however, that the various cigars sold by the respondent at 3 cents each are all of inferior quality; are not fine, hand-made or blended with Havana; that they neither contain any appreciable amount of Havana tobacco nor in any way conform to recognized standards employed by reputable manufacturers in making Havana blended cigars, and are not of 10 cent quality. It is further alleged that the respondents, among other things, advertised that certain cigars were given “free of charge” when in fact their prices are included in the prices of other merchandise purchased, and that Edwin Cigar Company, Inc., occupies a large building in New York, owns tobacco plantations and warehouses in Havana, Cuba, and warehouses in Hartford and Suffield, Conn., is a tobacco importer and controls the movement of cigar tobacco from the growing stage until sold as cigars to ultimate consumers, when such are not the facts.

Through use of the corporate or trade name of “House of Westminster, Ltd.” and various pictorial representations of characteristic English scenes, institutions and names, the respondents “House of Westminster, Ltd.,” and various pictorial representations of char-acteristic English scenes, institutions and names, the respondents allegedly exploit the idea that they are an English organization dealing exclusively in English pipes and other smoking accessories, when in fact House of Westminster, Ltd., has never been a British company or the agent of one. House of Westminster, Ltd., also is alleged to be advertised as owning and controlling a steel company or plant for making razor blades for direct sale to the public when in fact this respondent does not manufacture the blades it sells but buys them from a New York manufacturer. (4085)

Columbia Pencil Company—Bertram A. Strauss, trading as Columbia Pencil Company, 29 West 17th St., New York, engaged in the sale and distribution of ordinary lead pencils and mechanical or automatic pencils, is charged, in a complaint, with misrepresenta-
tion.

In circulars, letterheads and other advertising material distributed throughout the various States, the complaint charges, the respondent has represented himself as a manufacturer of pencils, through the use of such representations as the following:

“FAMOUS
“COLUMBIA PENCILS
“Direct from the factory at a saving of 33 1/3%.

“Here is our story. We are selling thousands of business concerns throughout the country, and we want you to become one of our customers. It is our notion that a straight line is the shortest, quickest, and most economical route from the factory to the ultimate consumer. Every time a product makes a detour at a distributor, a special factory representa-
tive or dealer, the COST GOES UP—and YOU pay it. Therefore, we have taken the middlemen by the seats of their trousers and tossed them out. We hope you don’t mind!”

“Columbia Pencil Company, Manufacturers of Pencils for All Purposes.”

In truth, the complaint alleges, the respondent does not manufacture any of the pencils sold by him, and, with the exception of his mechanical or automatic pencils, the respondent purchases all of his pencils outright from manufacturers or from wholesalers and jobbers. As to mechanical or automatic pencils, the complaint continues, the respondent purchases the parts from other parties and merely assembles the parts at his place of business. (4083)

House of Crane, 124 South Meridian St., Indianapolis, dis-
tributor of cigars, tobacco products, candy and other merchandise has been charged with selling to dealers certain assortments of its merchandise so packed and assembled as to involve the use of a lottery plan when such articles are sold to ultimate consumers.

The complaint alleges that a typical assortment distributed by the respondent company consisted of a number of pieces of candy and additional articles of merchandise, together with a punch board device, and that by means of the punch board, candy or other merchandise was awarded to certain buyers entirely by lot or chance.

It is alleged that the respondent’s use of lottery plans is a prac-
tice contrary to the established public policy of the Government. (4080)

Lechler Laboratories—A complaint has been issued charging Erwin Lechler, trading as Lechler Laboratories, 560 Broadway, New York, with misrepresentation in the sale of soap and cosmetic products.

The respondent allegedly advertised that his “Curl-A-New” soap contains substances which make straight hair curl, “preserve” natural curls, train the hair to curl and bring out curls or waves which “are asleep in the hair,” when such are not the facts and when the use of the product will not accomplish any of the other things claimed for it other than what might be expected from use of a good quality of ordinary soap. The respondent also is alleged to have advertised that this soap is a new scientific discovery and is enthusiastically recommended by a host of parents’ magazines, when such are not the facts.

The respondent’s preparation “Moorish Snow White Pomade” allegedly was advertised as being made by the inventor of “Moorish Strate-Black,” the famous combination hair dye and straightener; the product “509 Moorish Strate-Black” as serving to make and keep kinky hair straight and as being safe and harmless; and “Moorish Strate-Black” as being capable of instantly eliminating the first white hairs. The complaint alleges that the respondent’s “Snow White Pomade” is not a hair dye and straightener; that “Moorish Strate-Black” will not straighten kinky hair or keep it straight, and is not harmless for use as recommended because it contains pyrogallic acid, a benzine derivative, and a large proportion of copper salts, and that “Moorish Hair Pencil” will not instantly eliminate the first white hairs, and is not a safe and harmless product because it contains metallic salts which have a corrosive effect upon the skin. (4081)

William C. Ohlendorf —Alleging misrepresentation in the sale of a medicinal preparation containing drugs, a complaint has been issued against William Clarence Ohlendorf, trading under the names of W. C. Ohlendorf, Clarence Ohlendorf, C. Ohlendorf and Dr. Ohlendorf, 1924 Blue Island Ave., Chicago.

Advertising “Dr. Ohlendorf’s Tonic” in newspapers and periodicals, the respondent allegedly represented it as a cure or remedy for all ailments caused from a deficiency of iron in the blood. The respondent also is alleged to have represented that use of “Thermalaid” provides harmless product because it contains metallic salts which have a corrosive effect upon the skin. (4081)

“Thermalaid Method, Inc., and its president, Charles H. Mc- Farland, of Steubenville, Ohio, have been served with a complaint alleging misrepresentation in the sale of “Thermalaid,” an electrical device for the treatment of the prostate gland and associated ailments by application of heat in cases of acute or chronic prostatitis in its milder forms. The device has no therapeutic value in treating hypertrophy or atrophy of the prostate gland, according to the complaint. (4079)
A further representation alleged to have been made is that use of "Thermalaid" will prolong vigorous years of life and recuperate vitality and sex virility, when such are not the facts. (4078)

CEASE AND DESIST ORDERS:

The Commission has issued the following cease and desist orders:

Cote Products Company—See Western Refining Company.

Fairbanks Tailoring Company, 2286 Wabansia St., Chicago, has been ordered to discontinue misleading representations in the sale of men's and women's garments.

In the Spring of 1938, use of the terms "All Wool," "All Worsted," and "all wool," when in fact a number of the materials so advertised were not all wool.

Prior to January 11, 1937, the findings continue, the respondent company advertised openings for ambitious men to wear suits and overcoats tailored to measure by the respondent and to act as agents in selling such garments, the respondent representing that inexperienced agents could make up to $10 a day without canvassing, when such was not a fact. A "Free Suit Offer" was also advertised, when in fact such suits were not free but were earned by the agents through their services, according to findings.

The order directs the respondent to cease and desist from using the words "All Wool," "All Worsted," or other words indicating a fabric composed of wool in its entirety, to describe fabrics the fiber content of which is not composed wholly of wool; provided, however, that such words may be used to describe a fabric composed essentially of wool but containing a small percentage of materials for decorative purposes only, such as silk or rayon, when there is used in connection with the words indicating an all wool fabric words of equal conspicuousness such as "rayon decoration" or "rayon stripe," truthfully designating the decorative material used.

The respondent also is prohibited from using the word "free" to describe garments delivered to its agents as compensation for their services and from representing that inexperienced agents can make up to $10 a day without canvassing. (3525)

John F. Jelke Company, Inc., 759 South Washtenaw Ave., Chicago, is prohibited in an order from misrepresentation in the sale of "Good Luck Oleomargarine," which it has sold in all but 8 Western and 2 Middle Western States and 1 Southern State. Through its advertisements, the Commission finds, the respondent company represented its product as being made in or from whole milk, described by the respondent as "fresh pasteurized milk," from which none of the cream or butter-fat content has been removed, when in fact the product is made from skimmed milk.

The findings continue that the respondent's use in advertisements of the words "churn" and "churnery" and its picturization of an old-fashioned dasher butter churn in connection with the words "fresh pasteurized milk" and "milk solids" imply that the respondent's product is made from whole milk and contains butter fat extracted from whole milk or cream by the churning process used in making butter, when such are not the facts.

The respondent's advertisement that "there is 43.8 per cent more milk solids in Good Luck Margarine than in expensive spreads for bread" is found to imply that the product contains an appreciable quantity of solids, including butter fat extracted from whole milk, and that it contains more of such solids and has more food value than butter, when such are not the facts.

The Commission order directs the respondent to cease and desist from (1) use of the words "churn," "churned," "sunlit churnery," or any derivative of the word "churn," or the picture of an old-fashioned dasher churn, or any words or pictures implying that its product has been churned through the process by which butter is made from milk or cream in describing its products or in advertising them; (2) representing that the milk so designated is not whole milk, to refer to milk used by the respondent in manufacturing its product when the milk so used is other than whole milk; (3) using the word "milk" to describe that part of milk remaining after any part of the cream or butter fat has been removed, unless the word "milk" is qualified by words that reveal that the milk referred to is whole milk but "skimmed milk"; and (4) representing that its product contains 43.8 per cent or any other percentage more "milk solids" than butter or than other spreads for bread; that the product contains any appreciable quantity of "milk solids"; that the food value of the product is attributable to the "milk solid" content thereof, or that this content gives it more food value than butter. (3347)

J. W. Marrow Manufacturing Company, 3037 North Clark St., Chicago, manufacturer and distributor of cosmetics, has been ordered to discontinue certain misleading representations made in magazine, radio and circular advertising.

The order directs the respondent corporation to cease and desist from representing (1) that its preparations will nourish the skin or prevent, remove or correct lines or wrinkles; (2) that "Marrow Acne Cream" will correct or remove blemishes, pimples or enlarged pores, or that it has antiseptic properties; (3) that "Mar-O-Oil" will revitalize dead hair or correct the cause of excessive oiliness of the hair, and (4) that "Trimal" contains oil or has any effect upon live cuticle or upon the growth of finger nails.

The respondent's advertisements that "the hair is truly restored to its original consistency and growth" is prohibited under the order.

The order also prohibits use of the unqualified descriptive terms "Satin," "Taffeta," "Crepe de Chine," or "Crepe" or other descriptive terms indicative of silk, to refer to any fabric or product not composed wholly of silk, provided that when such descriptive terms are truthfully used to describe the type of weave, construction or finish, they must be qualified by words of equal conspicuousness accurately naming the fibers or materials from which the products are made.

The order further prohibits use of the term "Silk" or other terms indicative of silk to designate a fabric or product not composed wholly of silk, provided that in the case of a fabric or product composed partly of silk and partly of other materials such terms may be used as descriptive of the silk content when immediately accompanied by language accurately designating such other mate-

April 12, 1940 4178
In connection with the sale and distribution of its products, the corporation agrees to cease and desist from designing its gelatin printing process or any other collotype or planographic form of printing as “Bayne Gravure,” “gravure” or “photogravure,” or in any other way using the word or term “gravure” as descriptive of products which are not in fact made of the gravure (intaglio) process as understood and applied by industry and the trade. (2728)

Joe Bonomo Publications—Joe Bonomo, trading as Joe Bonomo Publications, 229 West 42d St, New York, agrees to cease representing that use of an elastic product sold by him and designated “Companion Exerciser” will cause a return of pep, vitality, energy or better complexion right from the start or in any specified time; that his course designated “Muscle Tension System” will make the user a real man fast or give brawny strength, burly health or a he-man body; that his course designated “Complete Bonomo System” will enable one to excel in any form of sports or make the user a physical wonder, and that the “Beautify Your Figure” course will cause the user to acquire “inviting contours” quickly or in any specified time. (02535)

Everett L. Bowers, Inc., Buffalo, N. Y., an advertising agency, has entered into a stipulation to discontinue misleading representations in disseminating advertisements of products of the Maritime Milling Company, Inc., Buffalo.

The agency agrees that in disseminating advertisements on behalf of Maritime Milling Company, Inc., it will cease representing that “Bull Brand Dairy Rations” alone will keep herds in better physical condition or milk production at consistently higher levels; that that product is the feed of champions; that “Bull Brand Vitamized Complete Starter Ration” alone builds into chicks increased livability, better feathering or pigmentation, or larger or sturdier bodies, and that the use of the complete “Bull Brand” poultry feeding program assures more eggs, more profit or more money. (02539)

Gralett Company—Fred F. Selton and F. G. Krieg, trading as Gralett Company, Minneapolis, Minn., have stipulated to cease and desist from the sale and distribution of lottery devices.

The respondents agree to desist from supplying to or placing in the hands of others, or mailing, shipping or transporting to agents, distributors or members of the public, punch boards, pull cards or other lottery devices so prepared or printed as to enable such persons to sell or distribute any merchandise through use of these devices. They also agree to discontinue selling or otherwise disposing of any merchandise through the use of such lottery devices. (2734)

Hot Drops Company—William Orland, trading as Hot Drops Company, 116 Market St., Philadelphia, stipulates that he will cease advertising that his product “Hot Drops” is a competent remedy or effective treatment for coughs or for sore throat; that the preparation has any therapeutic value in treating such ailments in excess of providing a temporary palliative relief for some of the symptoms commonly encountered in colds, and that the preparation gives lasting relief. (02538)

Melville Shoe Corporation, 555 Fifth Ave., New York, trading as Thom McAn and selling shoes and hosiery designated “Thom McAn Shoe” and “Thom McAn Hosiery,” has entered into a stipulation to cease certain representations in the sale of such products.

The respondent corporation agrees to cease representing that only the top grade of calf skin is used in the manufacture of its shoes, when in fact other grades are used; that its shoes will fit perfectly or afford immediate and instant comfort for everyone without breaking-in, eliminate or correct foot troubles, and prevent foot burning which is not due to ill-fitting shoes. (2724)

Stipulations

Following stipulations have been entered into by the Commission:

Allied Petroleum Corporation, Chicago, Ill., agrees to cease using the word “refineries” as part of the corporate or trade name employed in the advertisement or sale of its commodities and from use of this word in any way tending to convey to purchasers the impression that the corporation engages in business as a refinery or that it owns, operates, or absolutely controls the plant or factory in which are refined the commodities sold by it. The stipulation relates that this corporation was organized in April 1938 as the “Allied Refineries, Inc.”; that it continued to sell its oil commodities under the corporate name containing the word “Refineries” until July 1939, when its corporate name was changed to “Allied Petroleum Corporation,” and that since that date the respondent corporation, though having registered the change in its corporate name with the Illinois State authorities, has continued to use the name “Allied Refineries, Inc.” on letterheads, invoices and in advertising matter and on some of the cans in which its only commodity, gelatin, is packed, when in fact the stipulation is not engaged in the refinery business. (2724)

James Bayne Company, Grand Rapids, Mich., engaged in the manufacture of photographic and printed products, has entered into a stipulation to discontinue certain representations.

Western Refining Company, Inc.—An order prohibiting misrepresentation in the sale of medicinal preparations for use by women has been issued against Western Refining Company, Inc., 16 Robeson St., Lowell, Mass., trading also as The Motex Company and Cote Products Company.

In the sale of preparations known as “Motex,” “Motex Pills” and “Cote Pills,” the respondent corporation is directed to cease and desist from representing that they constitute safe, competent or scientific remedies for delayed menstruation, or have any value in treating this ailment, or that their use will have no ill effects upon the body.

The respondent is also directed to cease representing that its preparations contain no harmful or dangerous drugs or that use of the product will have no ill effects upon the body (this representation being made through failure to reveal that use of its products may result in serious or irreparable injury to health). (3355)

Western Novelty Company—John H. Mulkey, trading as Western Novelty Company, Portland, Ore., is charged in a complaint with misrepresentation in the sale of novelty jewelry.

The complaint alleges that the respondent is in the business of selling novelty jewelry, including finger rings set with hematite, a non-precious crystal, and has many competitors who do not in any manner misrepresent their products or the origin thereof.

In the course of his business, the complaint continues, the respondent distributes circulars to prospective purchasers in various States, advertising his rings with illustrations, upon which appear the following statements: “Alaska Black Diamond”, “Genuine Laska Black Diamond”, and “Sold at all reliable curio and jewelry stores in Alaska. Watch for this label. There are imitations on the market.” On a metal tag customarily attached to the rings appears the statement “Genuine Laska Black Diamonds.”

In truth, the complaint alleges, the sets in rings sold by the respondent contain “genuine” stones or jewels. (4082)

Stipulations

Following stipulations have been entered into by the Commission:

Allied Petroleum Corporation, Chicago, Ill., agrees to cease using the word “refineries” as part of the corporate or trade name employed in the advertisement or sale of its commodities and from use of this word in any way tending to convey to purchasers the impression that the corporation engages in business as a refinery or that it owns, operates, or absolutely controls the plant or factory in which are refined the commodities sold by it. The stipulation relates that this corporation was organized in April 1938 as the “Allied Refineries, Inc.”; that it continued to sell its oil commodities under the corporate name containing the word “Refineries” until July 1939, when its corporate name was changed to “Allied Petroleum Corporation,” and that since that date the respondent corporation, though having registered the change in its corporate name with the Illinois State authorities, has continued to use the name “Allied Refineries, Inc.” on letterheads, invoices and in advertising matter and on some of the cans in which its only commodity, gelatin, is packed, when in fact the stipulation is not engaged in the refinery business. (2724)
aggregate or otherwise sell more hosiery than any single department store, when statistics to verify these representations are not available.

The respondent also agrees to cease advertising that its women’s hose are made from pure thread silk, when they contain any material other than silk, even when such other material is used as reinforcement only, in the foot and the garter top, and is plainly visible. (02540)

Thom McAn—See Melville Shoe Corporation.

Quaker State Oil Refining Corporation, Oil City, Pa., stipulates that it will cease representing that it has definitely ascertained: that most dealers are convinced that “Quaker State Motor Oil” is the purest or safest lubricant available; that this oil gives a definite percentage more of lubrication than all other motor oils, when in fact such definite percentage has not been so ascertained by it; that its product always gives more mileage than any other motor oil, unless it has been so ascertained, and that Quaker State Motor Oil eliminates the hazards of engine carbon. (02537)

Wolverine Products, Inc., Maccabees Building, Detroit, agrees to cease representing that “Digests,” a medicinal product, will overcome or in any way affect halitosis or improve bad breath; will aid, promote or result in improved digestion, and that it is a new product or gives “new relief.” The respondent also stipulates that it will cease designating its preparation as “Digests” or by any other name implying that it is a digestive or has any direct effect on digestion. (02536)

FTC CASE DISMISSED

Upon final hearing, the Federal Trade Commission has dismissed a complaint charging Gordon Baking Company, 2303 Vernor Highway, East, Detroit, with misleading representations concerning “Silver Cup Bread.”
President Roosevelt Wants Television Competition

President Roosevelt gave the broadcasting industry a pat on the back at his April 12 press conference, and made it plain that he thought television should be developed along similar competitive lines.

When asked about his conference the previous day with Chairman Fly of the FCC, Mr. Roosevelt said that television undoubtedly had a great future. Claims that it would result in employment of millions, however, he said, were exaggerated. More important was the question of monopoly control. The FCC wanted to be certain that in this new art there will be the same kind of competition on three angles that the country now had in radio. The President said that the country didn’t want to get into a position where one company could control all sending. Radio had pretty effective competition with national networks, regional and local stations. Any set could pick up any program. The development of television ought to follow the same general lines with the listeners having a choice of stations. Eventually the owner of a television set could even get foreign television programs. All the Commission was doing was working along the line of developing television on a competitive basis with no one organization controlling all the sending and every set in the home being able to pick up any television band. The President predicted all this would be worked out this spring and summer so that sets could be put into production. In response to another question as to how the industry felt, he said that the bulk of the industry wanted television on the same basis as broadcasting.

TELEVISION HEARING

Friday, April 12

Mr. Elmer Engstrom resumed testimony for RCA. When questioned about a combination television receiver designed to receive the RMA and the DuMont signals, he said that if the set were built for 15 frames it would not function as well on 30. Mr. Engstrom discussed the relative merits of the various standards proposed, and he reiterated his opinion that the RMA standards represented the best engineering compromise between the various factors involved. However, in view of the apparent deadlock on standards, he recommended that they be left flexible until field testing could determine which set of standards to accept. Mr. Engstrom went into a discussion about the additional cost required in a television receiver in order that the receiver might accept signals transmitted over various standards. His estimate ran between three and forty dollars, depending on the combination of standards to be met. In response to questions put to him by Commission Attorney Dempsey he said that he felt that if standards are set that television will go ahead more rapidly. However, he feels that in view of the deadlock on standards, that field tests should be made before setting standards; and it was also his feeling that not less than six months are needed for field tests after the different system stations are in operation in order to determine which set of standards should be used. Mr. Engstrom also commented that if all considerations except engineering could be eliminated, then we could have standards set by the engineers in a conference rather than wait for field testing on the practical basis. He said that he had hoped that this could be done so that standards could be set at an earlier date. Mr. Engstrom was questioned further concerning the proposed RCA television relay system. He said that it was their intention to have two channels each way between Washington and New York, and that these channels could be rented by anyone who so desired to transmit television programs over and that any standards desired could be transmitted over this system. The television hearing was concluded Friday.

Manton Davis, RCA Vice President and General Counsel, made the following statement at the hearing:

The engineers of the Radio Corporation of America subscribe to the majority opinion of the engineers of the radio and television industry that the transmission standards formulated by the Radio Manufacturers Association represent the best set of standards with which to start commercial television operation in the United States. The RCA is using these standards because it believes they incorporate the best features that have been developed in the major (Continued on page 4182)
television laboratories of the United States, England, Germany and the rest of the world.

After years of experimentation and practical operation, we believe that television products built under these standards are superior in performance. In our opinion they will give the public a larger measure of satisfaction than if built under any other standards that may be proposed in the present state of the art, within the 6-megacycle channel which the FCC has allocated for television operation.

During the course of the present hearings the suggestion has been made that television receivers be manufactured that would be able to receive from television transmitters operated under other standards as well as under those of the RMA.

The Radio Corporation of America does not believe that the adoption of such a suggestion would prove to be of advantage either from an engineering, economic or public service standpoint. Nevertheless, if the FCC licenses transmitters to broadcast television programs to the public using RMA standards of 441-line, 30-pictures-per-second, we will, if such standards are to be, the Radio Corporation of America prepared now to build television receivers so that they will also receive television programs from such transmitters.

The Radio Corporation of America hopes that this offer will help the Commission to overcome the present deadlock which is retarding the progress of a new and promising industry and thus create employment for idle men and idle money, on a wide, competitive basis.

The DuMont interests issued the following statement:

By providing for flexible reception now and in the future in his television receivers presently coming off the assembly line, Allen B. DuMont, pioneer television manufacturer of Passaic, N. J., believes he has struck the happy compromise between fear of freezing the art on the one hand, and premature obsolescence of receivers on the other, indicated in recent opinions and decisions of the Federal Communications Commission. He states:

"I am the rare exception in upholding the FCC in its television citation of March 13, ordering a leading company to explain its high pressure merchandising of inflexible television receivers. Frankly, I am not in accord with the widespread criticism of the FCC's action by other television interests and by an obviously the case. We originally started with cathode-ray tubes and oscillographs for the industrial market, taking the erstwhile laboratory apparatus and making it generally available as an everyday tool for the factory, serviceman and others. When television reached the electronic stage, we simply revised our cathode-ray oscillograph designs to weave television images in place of usual graphs.

"To us a television receiver is simply a refined oscillograph. And if the latter is so flexible that it can translate the most intricate electrical phenomena into visual terms, surely the television receiver can be made equally flexible in handling a wide assortment of television signals. To fit the television receiver rigidly to a given television standard is, in my opinion, poor business. It is not playing fair with our public nor, for that matter, with the telecaster. Both are being chained together and must lockstep together without hope of freedom and progress.

"Proving our point, the DuMont television receivers now coming off our production line are flexible receivers. By means of several inexpensive refinements, these receivers can handle any television signal of any number of lines from 400 to 900, and any picture rate from 15 to 30, in any combination. The added cost for such flexibility is ridiculously small.

"The new receivers follow the present RMA standard signals yet, by the mere flip of a switch, they will follow other standards as well.

"It is our opinion, based on a long study and use in our own television station of the RMA standards, that there already exist better ways of synchronizing transmitter and receiver. The DuMont video signal, for example, follows the same general plan as the RMA signal except that in the vertical synchronization pulse interval a 500 kc. sine wave is introduced which is capable of controlling the receiver at any rate required and for any number of lines between 400 and 800.

"A further refinement is our so-called 'memory screen' which, by its persistence characteristic, tides over from one picture to the next, thereby fading from one to the other without noticeable flicker, even down to 15 pictures per second. By halving the RMA repetitive rate, we can cut the usual television band width from 6 to 4 megacycles or less. Thus we can provide more television channels, but our own recommendation is to retain the present 6 MC. band width and utilize the gained ether space for a greater number of lines and better pictorial resolution so essential in larger screen images such as obtained with our latest 20-inch tube.

"Again I repeat, the FCC, based on all the facts in the case, is correct in insisting first on a flexible system in a television art left open for further progress."
The selections and the CBS programs on which they are scheduled are:

"Here In the Velvet Night," Tuesday, April 16th, 2:00 p.m. EST—Drifting Melodies.
"We Could Make Beautiful Music," Thursday, April 18th, 4:00 p.m. EST—Ray Bloch.

Merritt E. Tompkins, vice president and general manager of BMI, announced the policy of BMI with respect to the electrical transcription of the compositions of which BMI owns the copyright.

"The copyright law is clear," Mr. Tompkins said. "The maximum fee which can be charged for the right mechanically to reproduce the work is 2 1/2 per composition for each record manufactured, regardless of the form or purpose of the record.

"Music publishers initially succeeded in levying higher rates, which have been imposed upon electrical transcriptions by a threat to restrict the performance of compositions after the time of recordation and before the time of broadcast. The precedent created by these charges has been followed by many persons who have not been aware of its implications.

"BMI is in a position to break away from what I think is an improper precedent. We shall, therefore, charge the statutory fee for the use of our compositions for electrical transcriptions. This will help not only the transcription industry, but also the broadcasters themselves, since transcription costs in the last analysis are paid by the broadcasters.

"In thus aiding the transcription industry," Mr. Tompkins concluded, "we are also aiding BMI authors as the use of BMI compositions will be enormously stimulated by our adherence to the legal charges."

The following additions to the BMI staff were announced this week:

HAVERLIN, CARL—
With KFI-KECA from 1923 to 1938. Started as publicity man, then covered sports and special events. Was made sales manager in 1927, which post he held until 1938. In 1938 he joined Davis & Schweger as station relations director and left to become station relations director at BMI. Mr. Haverlin will be in direct charge of all matters pertaining to station relations and in matters concerning staffs of member stations.

SKINNER, GEORGE DICKSON—
Graduate of Princeton University and Columbia University Law School, has been a lawyer, teacher and writer. He practiced law in New York City. His writing, published under the name Dickson Skinner, includes both fiction and magazine articles. Much of his article work has been in the field of music. Mr. Skinner will be in the public relations department in charge of magazine article writing and publicity.

MERRIMAN, DANA—
Associated with WTIC, Hartford, Conn., as program director from 1924 to 1928, then with the NBC in the program and production department until he went with the World’s Fair in charge of music and music copyright. Mr. Merriman will be office manager for BMI.

RCA GIVES GREEN LIGHT TO VICTOR RECORD USE

RCA on April 12 notified stations that until further notice they are free to use Victor and Bluebird phonograph records for broadcasting purposes. Existing licenses were terminated and license fees refunded. This action was taken on the day appeal briefs were filed in the RCA-Whiteman case and was ascribed to the belief that final determination of the appeals will be delayed longer than RCA had anticipated. Decca and Columbia had previously notified broadcasters they were free to use their records.

NAB has always taken the position that broadcasters are entitled to play phonograph records, and is represented by special counsel in the Whiteman case in support of this view.

SESAC ADDITIONS

SESAC on April 8 announced the addition of the following publishers to their list:

T. S. Denison & Company, Chicago, Illinois
David Gornston, New York, N. Y.
Heinrichshofen’s Verlag, Magdeburg
Frank A. Panella, Pittsburgh, Pa.

INTERNAL REVENUE BUREAU SAYS FCC EXPENSE DEDUCTIBLE

In response to the NAB’s inquiry, the Bureau of Internal Revenue has ruled that expenses incurred by broadcasters in connection with applications to the FCC are deductible expenses for Federal income tax purposes for the year in which paid or accrued.

Here is the correspondence:

March 22, 1940
Bureau of Internal Revenue, Washington, D. C.

DEAR SIRS:

Because of pertinent inquiries received and its general application to the broadcasting industry, permit me to request an opinion on the question of the deductibility of expenses incurred in connection with applications to the Federal Communications Commission.

Such expenses include legal fees, engineering fees, travel and clerical expenses, etc. Such applications may be for a construction permit for a new station, for an increase in operating power of an existing station or for an increase in hours of operation of an

April 19, 1940
existing station—in any case, having to do only with the terms of a license from the Commission looking to broadcasting operations on an assigned frequency for a limited period of time. Licenses are at present issued for one year, but may be issued for a maximum of three years, are revocable for cause, and grant no property rights in the frequency assigned.

Is it your opinion that such expenses are ordinary business expenses which may be deducted from income in the year paid or accrued, depending upon whether the taxpayer's books are kept on a cash or accrual basis?

Your opinion on this question will be greatly appreciated.

Very truly yours,

NATIONAL ASSOCIATION OF BROADCASTERS.

RUSSELL P. PLACE,

Counsel.

TREASURY DEPARTMENT

Washington

Office of

Commissioner of Internal Revenue

April 11, 1940.

The facts, as stated by you, are as follows:

"Such expenses include legal fees, engineering fees, travel and clerical expenses, etc. Such applications may be for a construction permit for a new station, for an increase in operating power of an existing station or for an increase in hours operation of an existing station—in any case, having to do only with the terms of a license from the Commission looking to broadcasting operations on an assigned frequency for a limited period of time. Licenses are at present issued for one year, but may be issued for a maximum of three years, are revocable for cause, and grant no property rights in the frequency assigned."

Section 23(a) of the Internal Revenue Code (53 Stat., Part 1) provides for the deduction from gross income in computing net income for Federal income tax purposes of expenses incurred in connection with applications to the Federal Communications Commission. Expenses which may be deducted from income in the year paid or accrued, depending upon whether the taxpayer's books are kept on a cash or accrual basis.

Further reference is made to your letter of March 22, 1940 requesting an opinion as to the deductibility for Federal income tax purposes of expenses incurred in connection with applications to the Federal Communications Commission.

Respectfully,

(signed) J. Mooney,

Deputy Commissioner.

WAGE AND HOUR ACT

Both Congress and the Wage and Hour Administration are now seriously considering exemption of higher-paid employees from the hours limitations of the Act.

The House is going to take up soon both the Norton (D-NJ) and the Barden (D-NC) amendments. The Norton amendments would exempt employees making more than $200 a month. The Barden amendments would set the figure at $150. In other words, an employee making more than $200 (or $150) a month could work any number of hours without payment of overtime unless a union contract provided otherwise. Both the A. F. of L. and the C.I.O. are against both sets of amendments.

The Wage and Hour Administration has been holding hearings on proposals to redefine "executive" and "administrative" in the administration's regulations. The Act provides for exemption of "executive" and "administrative" employees, but the definitions of these in the regulations were so strict that few employees were exempt under them.

The hearings, to date, have been confined to proposals to change the definitions for the wholesale industry. In brief, these proposals called for elimination of that section of the definitions which said a bona fide executive could do no substantial amount of work of the same character as that performed by those under him; and for a minimum wage of from $25 up. Both the A. F. of L. and the C.I.O. have opposed the redefinitions.

DATA FOR CONVENTION TOURS AVAILABLE AT NAB

Itineraries for Two-Weeks and Three-Weeks All-Expense Tours to the NAB Convention at San Francisco August 4-7 were mailed April 10 to those members responding to the recent questionnaire. Any others may secure this detailed information by writing to the NAB.

"POT O' GOLD" PROGRAM CLEARED BY D. OF J.

The Justice Department last week cleared the "Pot O' Gold" and "Mead's Bakery" programs referred to it by the FCC. Chairman Fly received the following letter from O. John Rogge, Assistant Attorney General:

"Reference is made to our letter of February 21, 1940, acknowledging receipt of yours of February 19, 1940, transmitting for edging receipt of your of February 19, 1940, transmitting for such action as the Department may deem appropriate certain information concerning the broadcasting of the "Pot O' Gold" and "Mead's Bakery" programs, both of which are alleged to be in violation of Section 316 of the Communications Act of 1934."

"After a thorough examination of the material submitted and a careful consideration of the facts presented, the Department has concluded that prosecution action under Section 316 of the Communications Act of 1934 in these two matters should not be instituted."

Mrs. Selma Seitz

Mrs. Selma Seitz, owner of Station WFAS from 1930 to 1939, died April 7 at her home in White Plains, N. Y. Mrs. Seitz, one of the early woman station-owners, always had as her policy a “local station for a local audience” and concentrated, in programming, on events of special interest to her community. She retired last year because of failing health. Her son, Frank A. Seitz, is still managing director of the station.

April 19, 1940
FAR EAST NEWS

The American Council Institute of Pacific Relations, Inc., informs the NAB that it has available for news commentators a great deal of background material "which they could use to explain dispatches from the Far East." The Council says it has furnished material for the "American School of the Air" and other programs. The address is 1795 California Street, San Francisco, or 129 East 52nd Street, New York City.

The NAB does not know whose axe, if any, this outfit has to grind.

PUBLIC LIKES TO LISTEN WHILE IT RIDES

When automobile radios were first introduced city councils solemnly debated for long hours over the question of passing a law against them. But they never did, though escape from restrictive ordinances was achieved, in many cities, by an extremely narrow margin.

The motoring public took to auto radio as a duck takes to water. Today 7,000,000 are on the highways, adding approximately 11,000,000 extra hours of radio set use per day during the heavy motoring months of spring and summer, according to Paul Peter, NAB director of research. Others place the figure at 18,000,000.

Nowadays, objections to automobile radio are relatively few and when they are made it is always possible to show that the attack was entirely unwarranted. When a reader of "The Oregonian," Portland, Ore., "wrote a letter to the paper," the newspaper which operates radio stations KGW and KEX, replied editorially:

"Car Radios a Hazard?"

"A reader contends that automobile radios contribute to traffic accidents, consequently should be banned. A single incident was cited in support of the contention, an "accident" which just missed happening. Such incidents are myriad and inconsequential. "The argument is made that car radios, by distracting the driver's attention, by taking his hand from the steering wheel to dial, by drowning out sirens and other warning sounds, are contributory causes of accidents. But statistics are lacking, and a strong case also can be made that car radios contribute to safety. "Thus it is very difficult for most people to concentrate continuously on driving. The motions used tend to become automatic, like lacing shoes, or any routine a thousand times repeated. Attention wanders. Day-dreaming takes possession of the mind. Under such circumstances the radio may help. It is less dangerous for a motorist to listen to a radio and keep his eyes on the road then to stare vacantly in a day-dream, seeking something of interest in the landscape or to turning his eyes in conversation with a passenger. Some motorists use their radios as an antidote for drowsiness. "Some eastern broadcasters during peak traffic hours carry safety programs, Suggestions to have brakes adjusted, to drive carefully, are most effective when they reach the motorist at the wheel. Car radios make announcements of road hazards suddenly arising more effective. Radio stations everywhere have letters from listeners thanking them for warning of a flood, slide or other unsafe condition on a highway they were about to traverse. Organizations interested in traffic safety testify to the value of the radio in getting warnings to motorists already on the road, and in generally helping their safety campaigns. In Portland not a few motorists have been thankful for warning word coming through the car radio on route to work that ice had formed during the night on some hill or bridge approach."

People like to hear radio programs while they ride. And broadcasters and advertisers are naturally overjoyed that there is such an appreciation of the American program service. Whenever auto radio receives unjust criticism the industry will be served best by a stout defense similar to that taken by "The Oregonian."

TWO IDEAS TO BUILD RADIO AUTO LISTENING

Stations in many sections are busy increasing spring and summer listening through the medium of auto radios. Maximum listening naturally occurs when auto sets are in first class operating condition.

In Cleveland where the local chapter of the Radio Servicemen of America has long been a factor in maintaining all sets at a high degree of efficiency, Carl George, program manager, WGAR, is especially active.

At our request he has made two suggestions for special programs which provide a vehicle for service announcements. Since such programs would be heard by auto set owners and non-owners, alike, they might also recite the advantages of being able to "Listen While You Ride," so as to influence increased ownership. Mr. George's suggestions follow:

Idea No. 1

"Here is one which not only promotes radio listening by car owners, but also encourages safe driving. For example—here in Cleveland—certain police cruisers could be designated to short wave the license number of a car that they have chosen as being driven safely. This information would be passed on to the studio announcer and he could immediately announce that the driver of the car bearing license number 000 has been recognized by the Police Department as being a safe driver under observation. "Because of his safe driving he will receive a complete check up on his auto radio by a RSA member with new parts supplied at cost, providing he telephones his identification into the station within ten minutes after the announcement is made. "While this program is on the air we could also give safe driving hints to all drivers who have car radios tuned into the program."

Idea No. 2

"Conduct a daily quiz program for auto radio listeners and have spotters telephone in the license plate numbers of cars that pass a given point. Then the announcer will say: 'If the driver of the car bearing license number LX-157 can answer this question, he will receive a free auto radio check up by a qualified RSA member. ' "This auto radio listener would be required to phone in the correct answer to the question within ten minutes after it is asked on the air, in order to qualify for the prize. This will encourage all auto radio owners to listen to the program and will give the announcer an opportunity to put in a good plug for set repair and proper tune up. License numbers would be chosen at random just like a participant in a studio quiz bee would be picked."

GREENSBORO'S MAYOR IS FIRST TO PROCLAIM RADIO FESTIVAL

Preparations for Radio Festivals are already underway in many states, according to letters beginning to drift in at headquarters.

April 19, 1940
To His Honor Ralph L. Lewis, mayor of Greensboro, North Carolina, goes the distinction of issuing the first proclamation of the event in any city. Official action was taken on April 15 according to Major Edney Ridge, director of WBIG, Greensboro.

On Saturday, April 20, a Radio Festival news bulletin will be sent to all members.

SALES MANAGERS DISCUSS "MEDIA RECORDS" FOR RADIO

A proposed "Media Records" of radio advertising, and NAB participation in the Convention of the Advertising Federation of America to be held June 23-27 in Chicago, were among the matters discussed by the Steering Committee of the NAB Sales Managers' Division, which met in Chicago, April 15.

The Committee reiterated the need for an accurate yardstick to determine radio advertising activity and trends, especially in the national spot and local fields. The NAB Research Department has had such an index, in the form of a standard unit of measurement, under consideration for several months. The data would be made available to member stations and to interested agencies and advertisers.

Preliminary plans for "Broadcasters' Night" at the forthcoming AFA Convention were discussed and approved by the Committee. Tuesday evening, June 25, will be NAB Night when the broadcasting industry will present a program of broadcasts, specialty acts, music and other entertainment in compliment to the AFA and its members. Chicago stations and networks will form a program committee under William R. Cline, Commercial Manager of WLS and Chairman of the NAB Sales Managers' Division, to line up the necessary talent and work out final details for the evening's entertainment.

For the Convention, the NAB Sales Managers' Division is also planning a panel discussion of industry sales and advertising problems, one session to be open to AFA members.

The activities of the Bureau of Radio Advertising were reviewed by the Committee and the problem of dealer-cooperative advertising discussed at length. Present at the April 15 meeting were the following:

William R. Cline, WLS, Chicago, chairman; Ellis Atteberry, KCKN, Kansas City, Kans.; Craig Lawrence, KSO, Des Moines; Charles Caley, WMBD, Peoria; Barney Lavin, WDAY, Fargo; Samuel J. Henry, Jr., NAB Bureau of Radio Advertising.

Also present were C. E. Arney, Jr., recently appointed assistant to the president of NAB, and Earle Pearson, general manager of the AFA, who was a luncheon guest and who outlined general plans for his Federation's 36th Annual Convention.

FCC TO INVESTIGATE RADIO ADVERTISING FURTHER

The Radio and Periodical Division of the Federal Trade Commission, established in October, 1918, which examines newspapers, magazines, catalogues and almanacs for false and misleading advertising matter, and which also reviews advertising copy broadcast through radio for the same purpose, has released an analysis of advertisements reviewed by it during 1939. The percentages presented relate only to the initiation of inquiry and are not necessarily representative of any final adverse action taken by the Commission.

Of the total number of commercial radio continuities marked as warranting further investigation during the first half of 1939 (later data not available), the following shows the respective sources thereof:

PAYNE RECOMMENDS REVOCATION OF FOUR TEXAS LICENSES

Recommendation that license revocation orders be affirmed in the cases of four Texas radio stations—KTBC, Austin; KNET, Palestine; KRBA, Lufkin, and KGKB, Tyler—is made to the FCC by Commissioner George Henry Payne as a result of hearings which he conducted in that State during March. In his opinion, the charges of hidden ownership made in connection with all four stations "have been fully sustained."

At the same time, Commissioner Payne has signed an order remanding the case of a fifth Texas station, KSAM, at Huntsville, for further hearing.

The March hearings developed that the technique used in securing the licenses of KTBC, KNET, and KRBA and of transferring the rights under them was practically the same. To quote Commissioner Payne's preliminary report:

"First, James G. Ulmer prevailed upon three local men of excellent reputation and financial stability to organize a copartnership for the sole purpose of securing a station license. Next, he directed all the important details . . . and finally had his own lawyer, James H. Hanley, file the papers . . . . Soon after the construction permit had been secured, the partners entered into a contract authorizing Ulmer (or one of his co-workers) to finance, construct and operate the station. Thus, in the early history of the station, did the partners assign their license rights without the knowledge or consent of the Commission.

"The partners made no capital investments and received no income from the station. . . . All, or almost all, of the profits found their way into Ulmer's pockets or the pockets of one of his close associates. The partners had no control of the station's bank accounts, receipts or expenditures. . . . They continued to sign papers because they were the licensees of record in order to deceive the Commission.

"It is clear that the partners were simply puppets manipulated by Ulmer who was the puppeteer. It was Ulmer, or one of his associates, who financed, constructed and operated the station."
It was he who controlled the programs and the station policy. It was he who hired or fired employees and enjoyed the profits. "The partners signed under oath by their application and associated papers that they would finance and control the station. This they never intended to do, thus perpetrating fraud upon the Commission. In several instances the partners submitted sworn statements showing that the partnerships involved possessed substantial assets, whereas, in fact, such partnerships possessed no assets whatever. Station assets belonged to Ulmer or one of his associates."

Ulmer is also identified with Station KGKB but this case, points out Commissioner Payne, involves a corporation and differs somewhat from the partnership cases. According to the report:

"Here Ulmer gained voting control of the East Texas Broadcasting Company by means of stock purchases, without the knowledge or consent of the Commission. . . . Here, too, the license rights were illegally assigned and illegally exercised by the assignee, who again was Ulmer. "Ulmer's conduct is reprehensible in more ways than one. He has induced honest and self-respecting men to violate the law and participate in an intricate scheme of deception. Most of these men made themselves parties to Ulmer's machinations through honorable intentions—a desire to serve their communities. Some of them even tried to break through the net in which Ulmer had caught them. But Ulmer's own conduct was prompted wholly by greed. Ulmer has cast a shadow upon the business of broadcasting."

Orders of revocation were issued by the Commission against Stations KTBC, State Capitol Broadcasting Association, Inc., KNET, Palestine Broadcasting Association, and KRBA, Red Lands Broadcasting Association, on February 7; in the case of KGKB, East Texas Broadcasting Co., on February 13, and that of KSAM, Sam Houston Broadcasting Association, on February 8.

**BROADCAST RULES AMENDED**

FCC has announced that Sections 3.6, 3.8, 3.9, 3.10, 3.23(c), 3.79, and 3.84 of the Standard Broadcast Rules were amended, effective immediately, providing for a change in the beginning of the broadcast day from 6:00 a.m., local standard time, to local sunrise.

**INTERNATIONAL REBROADCASTS**

The FCC has amended its rules and regulations to permit standard and non-commercial educational broadcast stations to pick up and rebroadcast the non-commercial programs of international broadcast stations. It was specified, however, that such rebroadcasting shall be on a non-commercial basis.

Briefly, this means that any broadcast station or a non-commercial educational station in the United States may, upon authority of the station originating the international program, pick up and retransmit the same for the benefit of its listeners. This applies to the program of any international broadcast station, whether it is located within or outside of the United States.

This action was taken on the basis of recommendations by a special committee of the Commission that, where possible, domestic listeners should enjoy the benefits of non-commercial international broadcasts.

**FEDERAL COMMUNICATIONS COMMISSION DECISIONS**

Federal Communications Commission has entered a final order granting the application of the Martinsville Broadcasting Company for the erection of a new station at Martinsville, Va., to operate unlimited time on 1420 kilocycles, 250 watts day and 100 watts night. The application of the Patrick Henry Broadcasting Company for the same facilities was denied.

Chairman Fly and Commissioner Craven dissented.

Application of WLAP, Lexington, Kentucky, for special experimental authority to rebroadcast over its present broadcast assignment with 250 watts, facsimile transmissions originating over Station WLW, Cincinnati, Ohio, has been denied by the Commission.

The Commission found that since the program of research and experimentation proposed by WLAP relate wholly to reception, and applicant has failed to show that the proposed program of research and experimentation has reasonable promise of substantial contribution to the development of facsimile broadcasting service, the granting of the application would not serve public interest.

**PROPOSED FINDING**

Federal Communications Commission has announced a proposed finding of fact denying the application of Publix Bamford Theatres, Inc., of Asheville, N. C., for a construction permit for a new station to operate on 1430 kilocycles, 1000 watts, unlimited time.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following hearings and oral arguments are scheduled to be heard before the Commission for the week beginning Monday, April 22. They are subject to change.

**Monday, April 22**

**Tuesday, April 23**

NEW—Guy S. Cornish, Cincinnati, Ohio.—C. P. for Public Address Relay Station, 310000 kc., 1 watt night, 1 watt LS, Emission A-3, unlimited time.

April 19, 1940
Tuesday, April 23

To Be Held Before Commissioner George Henry Payne, in Judge Ben Fly's Court Room, Hall of Records, Dallas, Texas.

KAND—Navarro Broadcasting Assn. (J. C. West, Pres.), Corsicana, Texas.—In re: Revocation of Station license of KAND.

Wednesday, April 24

Further Hearing

To Be Held Before Commissioner George Henry Payne, in the County Records Building, Dallas, Texas.

KSAM—Sam Houston Broadcasting Assn. (H. G. Webster, Pres.), Huntsville, Texas.—In re: Revocation of Station license of KSAM.

Thursday, April 25

Oral Argument Before the Commission

Report No. P-5:

Report No. B-88:

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

April 29

To Be Held Before Commissioner George Henry Payne, in the Criminal Court Room, County Courts and Jail Building, Houston, Texas.

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—In re: Revocation of Station license of KGFI.

June 3

NEW—Anthracite Broadcasting Co., Inc., Scranton, Pa.—C. P., 1370 kc., 250 watts, unlimited time.

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

WPRP—Julio M. Conesa, Ponce, P. R.—Granted amended construction permit requesting installation of new equipment, new antenna, move of transmitter site and change in frequency from 1420 to 1480 kc., power from 250 watts to 1 KW-5 KW LS, unlimited time.

WFTL—Tom M. Bryan, Fort Lauderdale, Fla.—Granted modification of license to increase night power from 100 to 250 watts, unlimited time.

The Peninsula Broadcasting Co., Salisbury, Md.—Granted construction permit for new station to operate on 1500 kc., 250 watts, unlimited time. Exact site of transmitter and studio to be determined.

The Delmarva Broadcast Co., Salisbury, Md.—Granted construction permit for new station to operate on 1200 kc., 250 watts, unlimited time. Exact transmitter and studio sites and type of antenna to be determined subject to Commission's approval.

Allen B. DuMont Laboratories, Inc., New York City.—Granted construction permit for a new television broadcast station to be located in New York City and operate on an experimental basis on frequencies 60,000 to 86,000 kc., inclusive, with 1 KW power.

WISE—Harold H. Thoms, Asheville, N. C.—Granted consent to assignment of license for station WISE from Harold H. Thoms to radio station WISE, Inc. (1570 kc., 250 watts, unlimited time).

WWRI—Long Island Broadcasting Corp., Woodside, L. I., N. Y.—Granted modification of license to increase night power from 100 to 250 watts.

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Cal.—Granted construction permit to increase night power from 1 to 5 KW, move transmitter and install directional antenna for day and night use as a Class II station. (B5-P-2804).

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—Granted construction permit to increase power from 250 watts, unlimited time to 500 watts night, 1 KW LS; install new transmitter and make changes in antenna. (B1-P-2526).

WBNX—WBNX Broadcasting Co., Inc., New York City.—Granted construction permit authorizing installation of directional antenna and increase in power from 1 KW, 5 KW LS, S-WAWZ on 1550 kc., to 5 KW-N. (B1-P-2238).

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Granted modification of construction permit to make changes in directional antenna system, extend commencement and completion dates, in re application to move transmitter site locally, install new equipment to 5 KW. (B1-MP-938).

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Granted construction permit to make changes in directional antenna (night and day). (B1-P-2319).

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted construction permit to move transmitter site, increase power from 1 KW to 10 KW, and install new transmitter and directional antenna system for day and night use. (B5-P-2437).

APPLICATION DENIED

WPAY—Chester A. Thompson, Portsmouth, Ohio.—Denied consent to the acquisition by Brush-Moore Newspapers, Inc., of control of the VEE BEE Corporation licensee of station WPAY, operating on 1570 kc., 100 watts, unlimited time.

DESIGNATED FOR HEARING

WAGA—Norman K. Winston, Atlanta, Ga.—Application for consent of the Commission to the voluntary transfer of control of the Liberty Broadcasting Corp., licensee of Station WAGA, Atlanta, Ga., from Norman K. Winston to James M. Cox, Jr. (1150 kc., 500 watts night, 1 KW day, unlimited time).

WTCN—Minnesota Broadcasting Corp., Minneapolis, Minn.—Application for construction permit to change transmitter location to Mendota Road, near Delaware Ave. (near) St. Paul; change frequency from 1250 to 710 kc.; increase power from 1 KW, 5 KW LS, to 10 KW; install new transmitter and directional antenna system for night use. (B-4-P-2439).

KS00—Sioux Falls Broadcasting Assn., Inc., Sioux Falls, S. Dak.—Application for construction permit to change frequency from 1110 to 210 kc., hours of operation from limited to unlimited; move transmitter from west of Sioux Falls to 6.5 miles east of Sioux Falls; and install directional antenna for night use. (B4-P-2667).

RENEWAL OF LICENSES

Renewal of licenses for the following high frequency broadcast stations were granted for the period ending April 1, 1941:

W2XMN, near Alpine, N. J.; W2XDV, New York City; W8XNU, Cincinnati, Ohio; W9XLA, Denver; W2XAG, Yonkers, N. Y.; W8XO, near Alpine, N. J.; W2XDV, New York City; W9XYL, Whippany, N. J.; W9XOA, Mitchellville, Ohio; W5XAU, Oklahoma City; and W1XER, Sargent's Purchase, N. H.

The following developmental broadcast stations were granted renewal of licenses for the period May 1, 1940, to May 1, 1941:

W3XDD, Whipsnade, N. J.; W9XC, Mitchellville, Iowa; W8XO, Mason, Ohio; W10XF, Portable-Mobile (area of New York City); W10XR, Portable-Mobile (area of New York City).

W1XG—General Television Corp., Boston, Mass.—Granted renewal of television broadcast station license for the period ending February 1, 1941.

WBOE—Cleveland City Board of Education, Chas. H. Lake, Supt., Cleveland, Ohio.—Granted renewal of non-commercial educational broadcast station license for the period May 1, 1940, to May 1, 1941.
WNYE—Board of Education, City of New York, Brooklyn, N. Y.—Granted renewal of non-commercial educational broadcast station license for the period May 1, 1940, to May 1, 1941.

MISCELLANEOUS

KOII—The Bee, Inc., Reno, Nev.— Granted modification of construction permit which authorized installation of new transmitter, directional antenna for night use, increase in power from 500 watts to 1 KW, and move of transmitter, for authority to install new transmitter; frequency 630 kc., 1 KW, unlimited, directional antenna for night use (BS-MP-960).

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.— Granted license to cover construction permit for installation of new transmitter, changes in antenna, and increase in power, frequency 880 kc., 5 KW L-HB-195, 5 KW L-YR-198, unlimited time, directional antenna day and night (BI-L-1129); also granted authority to determine operating power by direct measurement of antenna power (BI-Z-376).

WSMB—WSMB, Inc., New Orleans, La.— Granted license to cover construction permit for increase in power and changes in antenna; frequency 1320 kc., 5 KW, unlimited time (BI-L-1128); also granted authority to determine operating power by direct measurement of antenna power (BJ-Z-375).

WAIX—WJHL, Inc., Portable-Mobile (area of Johnson City, Tenn.)— Granted license to cover construction permit for new relay broadcast station; frequencies 1622, 2668, 2150, 2790 kc., power 40 watts (BS-LRY-198).

A. Frank Katzenente, Portable-Mobile (area of Miami Beach, Fla.)— Granted construction permit for new relay broadcast station; frequencies 1646, 2090, 2100, 2830 kc., power 50 watts (B3-PRY-207).

Don Lee Broadcasting System, Portable-Mobile (area of Los Angeles, Calif.)— Granted license for new special relay broadcast station to be used in connection with Television Station W6XAO, Los Angeles, Calif., and Television Relay Station W6XDU; frequencies 1646, 2090, 2100, 2830 kc., power 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of Station KAB (BS-LRY-175).

Don Lee Broadcasting System, Portable-Mobile (area of Los Angeles, Calif.)— Granted license for new special relay broadcast station to be used in connection with Television Station W6XAO, Los Angeles, Calif., and Television Relay Station W6XDU; frequencies 1646, 2090, 2100, 2830 kc., power 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of Station KABD (BS-LRY-176).

Don Lee Broadcasting System, Portable-Mobile (area of Los Angeles, Calif.)— Granted license for new special relay broadcast station to be used in connection with Television Station W6XAO, Los Angeles, Calif., and Television Relay Station W6XDU; frequencies 1646, 2090, 2100, 2830 kc., power 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of Station KABB (BS-LRY-177).

Don Lee Broadcasting System, Portable-Mobile (area of Los Angeles, Calif.)— Granted license for new special relay broadcast station to be used in connection with Television Station W6XAO, Los Angeles, Calif., and Television Relay Station W6XDU; frequencies 1646, 2090, 2100, 2830 kc., power 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of Station KABO (BS-LRY-178).

Don Lee Broadcasting System, Portable-Mobile (area of Los Angeles, Calif.)— Granted license for new special relay broadcast station to be used in connection with Television Station W6XAO, Los Angeles, Calif., and Television Relay Station W6XDU; frequencies 1646, 2090, 2100, 2830 kc., power 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of Station KEGO (BS-LRE-277).

Don Lee Broadcasting System, Portable-Mobile (area of Los Angeles, Calif.)— Granted license for new special relay broadcast station to be used in connection with Television Station W6XAO, Los Angeles, Calif., and Television Relay Station W6XDU; frequencies 1646, 2090, 2100, 2830 kc., power 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of Station KEGO (BS-LRE-278).

WQDM—Regan & Rustwick, St. Albans, Vt.; and Champlain Valley Broadcasting Corp., St. Albans, Vt.— Referred to Commission en banc the Motion to Stay Further Proceedings in re application of WQDM for renewal of license to operate on 1390 kc., 1 KW, daytime.

Thumb Broadcasting Co., Brown City, Mich.— Granted motion for leave to amend application for construction permit for new station so as to request frequency 600 kc. instead of 880 kc.

WBAK—John H. Stenger, Jr., Wilkes-Barre, Pa.— Granted petition requesting extension of time until May 8, 1940, within which to file Statement of Facts in re application for renewal of license for WBAX to operate on 1210 kc., 100 watts, unlimited.

WWRL—Long Island Broadcasting Corp., Woodside, L. I., N. Y.— Denied motion for extension of time to file proposed findings of fact and conclusions due April 10, in re applications in Docket’s 3941, 4027, 4029, 4030, 4041, 4047, 4050, 4302, 4314, 4622, etc., and the Commission on its own motion waived default in filing proposed findings.

Miami Broadcasting Co., Miami, Fla.— Denied motion for 30-day continuance of hearing now scheduled for April 16, on application for new station to operate on 1120 kc., 250 watts, unlimited time.

WDFD—Flint Broadcasting Co., Flint, Mich.— Granted petition to accept appearance in re application for construction permit to change frequency from 1310 to 880 kc., and power from 100 watts to 1 KW, unlimited time.

Anthracite Broadcasting Co., Inc., Scranton, Pa.— Granted motion to postpone hearing now scheduled for April 15 on application for construction permit to operate on 1350 kc., 250 watts, unlimited time. Hearing to be held June 3.

WNEL—Juan Piza, San Juan, P. R.— Granted to Station WNEL station so as to request frequency 600 kc. instead of 880 kc.

WKXV—City of New York, Municipal Broadcasting System, New York, N. Y.— Granted license to cover construction permit as modified for new high frequency broadcast station; frequency 26100 kc., power 1000 watts; granted upon experimental basis only, conditionally (B1-LHB-54).

WASQ—The WGAQ Broadcasting Co., Portable-Mobile (area of Minneapolis, Minn.)— Granted license to cover construction permit for new relay broadcast station; frequencies 132260, 134080, 135760 kc., power 100 watts (B2-LRE-307).

WGBK—McComb Broadcasting Corp., McComb, Miss.— Granted license to cover construction permit to make changes in transmitting equipment and increase power to 250 watts; frequency 1200 kc., unlimited time (B3-L-1131).

KGHL—Curtis P. Ritchie, Pueblo, Colo.— Granted authority to determine operating power by direct measurement of antenna power in compliance with Section 3.54 (BS-Z-378).

WCFL—Chicago Federation of Labor, Chicago, Ill.— Granted authority to determine operating power by direct measurement of antenna power in compliance with Section 3.54 (B4-Z-379).

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.— Granted authority to determine operating power by direct measurement of antenna power in compliance with Section 3.54 (B4-Z-329).

WHEB—Granite State Broadcasting Corp., Portsmouth, N. H.— Granted modification of construction permit for increase in power, new equipment, move of transmitter and studio, for until the new type of transmitter and changes in antenna; frequency 1420 kc., 250 watts, unlimited time. Hearing to be held June 3.

WKHH—Columbia Broadcasting System, Inc., Portable-Mobile (area of New York, N. Y.)— Granted modification of construction permit for changes in equipment and reduction of power, to extend completion date from April 30, 1940, to July 30, 1940 (B1-MPRE-40).

KEGN—Don Lee Broadcasting System, Portable-Mobile (area of San Francisco, Calif.)— Granted modification of construction permit for installation of new equipment, to extend commencement date from November 27, 1939, to May 27, 1940, and completing date from May 27, 1940, to August 27, 1940 (B3-MPRE-42).

KGFL—Curtis P. Ritchie, Pueblo, Colo.— Granted license to cover construction permit as modified for installation of new antenna and move of transmitter; frequency 1320 kc., power 500 watts, unlimited (B5-L-1133).

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.— Granted extension of special temporary authority to operate from 9 a.m. to 10 a.m. EST, Monday, Tuesday, Wednesday, Thursday, Friday and Sunday mornings, for the period April 15, 1940, to not later than May 17, 1940, or until the Station's Broadcasting Co. is in a position to waive said time, in order to broadcast special non-commercial educational programs (BS-Z-326).

WBAA—Purdue University, West Lafayette, Ind.— Granted special temporary authority to operate from 1 to 3 a.m. EST, on the morning of April 20, 1940, in order to broadcast part of the Purdue Junior Prom only (B4-S-S01).

KGCA—Charles Walter Greenley, Decorah, Iowa.— Granted extension of special temporary authority to remain silent for
the period April 18, 1940, to not later than May 17, 1940, pending the filing of modification of license and completion of arrangements with Station KWLC. (B4-S-519).

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with WGBF with power of 250 watts from 8:00 p.m. to 9:00 p.m. EST (as to the concession of the amendment April 19, 1940, in order to broadcast an address only to be delivered by Dr. John W. Studelaker, U. S. Commissioner of Education before the faculty of the State Teachers' College, Indiana, Pa. (B2-R-835).

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate simultaneously with KFRU with power of 250 watts to permit KFRU to broadcast special program (B4-S-490).

WJHB—Pittsburgh Radio Supply House, Greensburg, Pa.—Granted special temporary authority to operate from 8:00 p.m. to 9:00 p.m. EST (as to the concession of the amendment April 19, 1940, in order to broadcast an address only to be delivered by Dr. John W. Studelaker, U. S. Commissioner of Education before the faculty of the State Teachers' College, Indiana, Pa. (B2-R-835).

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate from 7:45 p.m. to completion of program of East Texas County Judge Meeting on April 20, 1940, and on April 21, from 6:45 p.m. to start of Church Service and from 7:45 p.m. on April 22 and 23, to completion of program of East Texas Chamber of Commerce Convention; to operate April 27 from 7:30 p.m. to completion of Band and Orchestra Contest, and May 13 and 14, from 7:30 p.m. to completion of program of Longview Friendly Trek. All time above CST. (B3-S-838).

WAAU—Columbia Broadcasting System, Inc., New York, N. Y.—Granted special temporary authority to transmit to standard broadcast station WGAN on April 15, 1940, between 10:00 a.m. and 5:00 p.m. EST, program material in connection with the Ohio State World's Fair Women's Committee program.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted modification of construction permit which authorized antenna changes new equipment, move of transmitter, change in frequency, increase in power and change in hours of operation, for extension of completion date from April 26, 1940, to May 26, 1940; frequency 780 kc., 1 KW, 2 1/2 KW/day, unlimited time. (B-MP-963).

KOAY—Don Lee Broadcasting System (area of Los Angeles, Calif.), Portable-Mobile. Granted modification of construction permit for new relay broadcast station to extend commencement date from December 10, 1939, to June 10, 1940, and of completion date from June 10, 1940, to December 10, 1940. (B5-MP-41).

WKBV—Knox Radio Corp., Richmond, Ind.—Granted special temporary authority to remain silent April 16, 1940, from 10 a.m. to 6 p.m. CST, on account of death of Mrs. Wm. O. Knapp, wife of president of Knox Radio Corp. (B4-S-487).

W2XWV—Allen B. DuMont Laboratories, Inc., New York, N. Y.—Granted special temporary authority to operate a 50-watt television transmitter on frequencies 60000-86000 kc., at 515 Madison Avenue, New York City, for the purpose of conducting field tests for a period not to exceed 30 days.

KFRU—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate with power of 250 watts from 7:45 p.m. CST, to completion of service on May 5, 12, 19, and 26, 1940, in order to broadcast church services only. (B3-S-838).

WGRM—P. K. Ewing, Grenada, Miss.—Granted authority to install automatic frequency control. (B3-F-139).

The Associated Broadcasters, Inc. (area of San Francisco, Calif.), Portable-Mobile. Granted construction permit for new relay broadcast station; frequencies 1623, 2058, 2150, 2790 kc., power 15 watts. (B5-PRY-214).

APPLICATIONS FILED AT FCC

610 Kilocycles

WCLE—United Broadcasting Co., Cleveland, Ohio.—Construction permit to install new transmitter, directional antenna for day and night use, change frequency and power from 610 kc., 500 watts to 610 kc., 1 KW, from daytime to daytime (local sunset California). Move transmitter from Pleasant Valley Rd., Village of Seven Hills, Ohio to Clinton Rd., Cleveland, Ohio. Class II station. Requests facilities.

WHKC. Amended: Request limited time to local sunset California.

630 Kilocycles

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Modification of construction permit (File No. B-1-P-1527) as modified, for changes in antenna, increase power, move transmitter and install new transmitter. (B1-P-1527).

1350 Kilocycles

WBNX—WBNX Broadcasting Co., New York, N. Y.—License to construct permanent station (B1-P-1527) as modified, for changes in antenna, increase power, move transmitter and install new transmitter.

1370 Kilocycles

WPNX—WPNX Broadcasting Co., Mayaguez, P. R.—Modification of construction permit (File No. B-1-P-1941) as modified, for changes in antenna, increase power, move transmitter and install new transmitter.

1420 Kilocycles

KRBM—KRBM Broadcasters, Bozeman, Mont.—Authority to determine operating power by direct measurement of antenna power.

MISCELLANEOUS

NEW—Seaboard Radio Broadcasting Corp., Hillcrest, Pa.—Construction permit for new high frequency broadcast station to be operated on 13800 kc., 1000 watts, special emission for frequency modulation. Location: Cheltenham Twp., Hillcrest, Pa.

NEW—Piedmont Broadcasting Corp., near Salisbury, N. C.—Construction permit for new high frequency broadcast station to be operated on a regular commercial basis, 43400 kc., 1000 watts. Special emission for frequency modulation. Location: Statesville Rd., near Salisbury, N. C.

NEW—Spartanburg Advertising Co., near Spartanburg, S. C.—Construction permit for new high frequency broadcast station to be operated on 43600 kc., 1000 watts. Special emission for frequency modulation. Location: U. S. Highway 176, 1.3 miles north, near Spartanburg, S. C.

NEW—KTRH Broadcasting Co., Houston, Texas.—Construction permit for new high frequency broadcast station to be operated on 35400 kc., 5000 watts. Special emission for frequency modulation. Location: Main and Rusk Sts., Houston, Texas.

W1XCS—Connecticut State College, Storrs, Conn.—Construction permit to change frequencies from 35390, 139960, 300000-400000 kc. to 26390, 139960, 300000-1000000 kc.; increase power from 250 watts to 1000 watts; add multiple emission changes in equipment; and change corporate name to UNIVERSITY OF CONNECTICUT.

NEW—WODAAM Corporation, New York, N. Y.—Construction permit for new high frequency broadcast station to be
operated on 42400 kc., 1000 watts, special emission for frequency modulation. Site to be determined, in or near New York City, N. Y.

NEW—New Jersey Broadcasting Corp., Jersey City, N. J.—Construction permit for new high frequency broadcast station to be operated on 43500 kc., 1000 watts, special emission for frequency modulation. Location: Foot of Washington St., Jersey City, N. J.

WXO—M. Jansky, Jr., and Stuart L. Bailey, d/b as Jansky & Bailey, Georgetown, D. C.—Modification of license to change frequency from 43200 kc. to 43400 kc.

NEW—United Broadcasting Co., Cleveland, Ohio.—Construction permit for new Class II television broadcast station to be operated on 43600 kc., 1000 watts, special emission for frequency modulation.

NEW—KSTP, Inc., St. Paul, Minn.—Construction permit for a new high frequency broadcast station to be operated on 43500 kc., 1000 watts, special emission for frequency modulation.

KAOW—Albert S. and Robert A. Drohlich, d/b as DROHLICH BROTHERS, area of Sedalia, Mo.—Modification of construction permit (B4-PRE-333 for new relay station), redefined for a new high frequency broadcast station.

WEIC—General Electric Co., Portable-Mobile.—Construction permit to increase power from 15 watts to 50 watts and install new transmitter.

WOEG—General Electric Co., Mobile.—Construction permit to install new transmitter.

NEW—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Construction permit for a new high frequency broadcast station to be operated on 43200 kc., 1000 watts, special emission for frequency modulation.

NEW—United Broadcasting Co., Seven Hills Village, Ohio.—Construction permit for a new high frequency broadcast station to be operated on 43400 kc., 1000 watts, special emission for frequency modulation.

NEW—KSTP, Inc., St. Paul, Minn.—Construction permit for a new Class II television broadcast station to be operated on 44000-50000 kc., 1000 watts visual and aural emission A3 and A5.

NEW—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Construction permit for a new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—KSTP, Inc., St. Paul, Minn.—Construction permit for a new Class II television broadcast station to be operated on 44000-50000 kc., 1000 watts visual and aural emission A3 and A5.

NEW—United Broadcasting Co., Columbus, Ohio.—Construction permit for new high frequency broadcast station to be operated on 42800 kc., 1 Kw power, special emission for frequency modulation. Amended; re transmitter site to be determined, in or near Columbus, Ohio.

NEW—United Broadcasting Co., Seven Hills Village, Ohio.—Construction permit for a new high frequency broadcast station to be operated on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—KSTP, Inc., St. Paul, Minn.—Construction permit for a new Class II television broadcast station to be operated on 44000-50000 kc., 1000 watts visual and aural emission A3 and A5.

WXLY—Regularly in operation for more than half a century; that his product is fresh stock, of high quality; that he has been in business in the wholesale or jobber prices with resulting large discounts and savings to the purchaser; that the respondent's rings are set with genuine rubies and sapphires, and that their business has been in operation for more than half a century.

The complaint alleges that in fact the respondents are not wholesalers or jobbers but retailers; that the prices they represent as customary retail prices are in most instances exaggerated; that the prices they charge represent the wholesale or jobber prices with resulting large discounts and savings to the purchaser; that the respondent's rings are set with genuine rubies and sapphires, and that their business has been in operation for more than half a century.

The complaint alleges that in fact the respondents are not wholesalers or jobbers but retailers; that the prices they represent as customary retail prices are in most instances exaggerated; that the prices they charge represent the wholesale or jobber prices with resulting large discounts and savings to the purchaser; that the respondent's rings are set with genuine rubies and sapphires, and that their business has been in operation for more than half a century.

The complaint alleges that in fact the respondents are not wholesalers or jobbers but retailers; that the prices they represent as customary retail prices are in most instances exaggerated; that the prices they charge represent the wholesale or jobber prices with resulting large discounts and savings to the purchaser; that the respondent's rings are set with genuine rubies and sapphires, and that their business has been in operation for more than half a century.
The complaint alleges that the respondent's product is not fresh stock but is made from waste paint which has been lost in the process of applying the original fresh stock on refrigeration boxes and other surfaces, and which has been recovered and sold to the respondent, who reconditions and redissolves it into the product he sells. The respondent's representations are alleged to be misleading in that they fail to disclose that his product is a reconditioned, redissolved paint product. (4084)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Beauvit Mills, Inc.—See Luxuray, Inc.

Brockman & Schloss, Inc., New York, N. Y., agrees to cease representing that it has taken over the handkerchief manufacturing activities of Marshall Field & Co. or of any other organization and to discontinue employing the word “Manufacturing” or similar words in a manner indicating that the respondent manufactures the products it sells or owns and controls the factory in which they are made, when such are not the facts. (2737)

Consolidated Pinnacle Coal Company, Denver, Colo., operating mines in Routt County, Colo., has been prohibited from using the word “Pinnacle” in any corporate or trade name, or at all, when the coal sold has not been mined from the Pinnacle Mine at Pinnacle, Routt County, Colorado. The Commission cease and desist order also forbids description of coal not mined from the Pinnacle Mine as being Pinnacle coal.

The term “Pinnacle,” as applied to coal, the Commission finds, has been used since 1915 by Victor American Fuel Company, a competitor of Consolidated Pinnacle Coal Company and operating a mine at Pinnacle, Routt County, Colorado. Victor American spent more than $300,000 in advertising and has built up good will as a result of the original fresh stock name, and registered a trade-mark containing the word “Pinnacle” in combination with the phrase “mined and shipped only by the Victor American Fuel Company,” the Commission finds.

Use of the word “Pinnacle” by the respondent company tended to confuse purchasers into believing that in buying the respondent’s coal, which was mined at Hayden, Routt County, 42 miles from Pinnacle, they were getting the higher grade Victor American Fuel Company’s “Pinnacle” coal, according to Commission findings. (5234)

Victor Eckardt Manufacturing Company, Inc., 132 Greenpoint Ave., Brooklyn, agrees to cease and desist from use of the word “Manufacturing” as part of its corporate or trade name in connection with the offering for sale, sale, or distribution of its boys’ carpenter sets, and from use of the word “Manufacturing” or the words “Made by”, followed by its corporate or trade name or in any other way, the effect of which tends to convey the belief to purchasers that it makes or manufactures tools of which the carpenter sets are composed, or that it actually owns and operates directly and absolutely controls the plant or factory in which such tools are made or manufactured. The corporation also agrees to cease representing, on containers of its merchandise or in any other way, by use of the words “Made in U. S. A.” or similar words, that an assortment of merchandise to which the words refer is composed wholly of American-made products. If the assortment is composed of items made in the United States and in part of an item or items made elsewhere and the words “U. S. A.” are used properly to designate American-made items, there shall be accompanying words printed in equally conspicuous type which indicate clearly that the assortment is not composed wholly of items made in the United States. (2739)

Hall Hardware Company, Minneapolis, Minn., in the sale of its “Supermix” varnish and paint products, agrees to desist from the use of the name “Supermix” in a manner implying that its products have been recommended or endorsed by the United States Department of the Interior or by any Federal department or agency, when such as not a fact. The respondent stipulates that it will cease using in advertisements the word or trade name “Supermix” in connection with the statement “Facts You Should Know About Painting—Most of These Facts Are Taken from Bulletin No. 193, U. S. Dept. of The Interior”, so as to imply that the products are specifically referred to in that Government bulletin, when such is not a fact. (2736)

Hedaya Importing Company—The copartners trading as Hedaya Importing Company, New York, N. Y., stipulate that they will desist from using the word “Manufacturers” as descriptive of their business and from representing that they have plants at Shanghai, Swatow, Wusih and Wenchow or elsewhere, when in fact they are not manufacturers and do not have factories of their own in the cities named. (2741)

Luxuray, Inc., wholly owned subsidiary of Beauvit Mills, Inc., Fort Plain, N. Y., and Beauvit Mills, Inc., 450 Seventh Ave., New York, each of them engaged in the sale and distribution of women’s undergarments, agree to cease and desist from representing, by means of advertisements matter, labels or otherwise, that their undergarments, of the type commonly known as “Woolies,” or garments made of similar fabrics, are 30 per cent wool and silk, or that they are composed of fibers in any designated proportion other than the correct and accurate ratio thereof. (2749)

Maxine Company—Frederick Hoffman, doing business under the trade name of Maxine Company, Fairfax, Okla., in the sale of “Aviol”, designed for use in the prevention, treatment and cure of rectal diseases, agrees to cease representing that the preparation is a preventive or competent cure for rectal ailments; that it is sold at a price intended to cover only the cost of manufacture and not to include a profit; and is “Guaranteed under the Pure Food and Drug Act”; has been examined or approved by the Federal Government, or that the Federal Government guarantees that it
complies with the law. He also agrees to cease representing that his instructions for enema are free or will enable one to keep the bowels clean and the body healthy. (20541)

Nasal Filter Company, 12 North Third St., Columbus, Ohio, agrees to cease representing that "Dr. Weaver's Nasal Filter" will cure hay fever, relieve asthma or sinus trouble, prevent asthma, hay fever, sinus trouble or antracrosis, or that it will provide a defense against colds or prevent all dust from entering the nostrils. (20543)

Purell and Company, Inc., 11 South Desplaines St., Chicago, distributor of drugs, cosmetics, toilet goods and other beautician supplies, has entered into a stipulation to discontinue certain representations in the sale of its products.

The respondent company agrees to cease furnishing to beauty shop or school operators which it designates as "service members", so-called "membership certificates", representing or implying that the respondent company possesses knowledge enabling it to certify that the "member" or person named in the certificate is informed concerning the chemicals used in the manufacture of beauty preparations, when in fact the respondent corporation is not so informed as to the extent of the knowledge on this subject possessed by such "service members".

Further representations or implications which the respondent corporation agrees to cease making are that it manufactures the products it sells, does chemical research work, maintains a laboratory, employs chemists, or prepares quantitative analyses of preparations submitted to it by its "service members" or others, or that its products have world-wide distribution. (2735)

Puro Company, Inc., 3107 Pine St., St. Louis, has entered into a stipulation in which it agrees to discontinue certain representations in the sale of a moth repellent designated "Puro". The stipulation is supplemental to one accepted by the Commission September 5, 1934, in the sale of a new and an amazing discovery and contains a secret chemical, or in the sale of a moth repellent designated "Puro". The stipulation that its products have world-wide distribution. (2735)

Rittan Knitting Mills, Inc., 11th and Jefferson Sts., Hoboken, N. J., agrees to cease and desist from selling or offering for sale any silk product which contains any metallic weighting, without full and non-deceptive disclosure of the presence of such metallic weighting together with the proportion or percentage thereof, made on the labels, tags or brands attached to the merchandise and in the invoices and all advertising matter, sales promotional descriptions or representations, and also from selling or offering for sale any silk or silk product without disclosure of the fact that such material or product is silk, made clearly and unequivocally in the invoices or labels, tags or brands attached to the merchandise and in whatever advertising, sales promotional descriptions or representations thereof may be used where such non-disclosure has the capacity and tendency or effect of misleading or deceiving the purchasing or consuming public. (2727)

Sutton & Husney—Joseph M. Sutton and Abraham Husney, trading as Sutton & Husney, 244 Fifth Ave., New York, engaged in the importation, sale and distribution of handkerchiefs, linens and laces, agree to cease and desist from representing that they have or are making orders for less than 500 cases in China or in any other locality when such is not a fact, or from representing as their own any office or establishment belonging to an independent agency with which they have no more than a contractual relationship. (2744)

CEASE AND DESIST ORDERS

Following cease and desist orders have been issued during the past week:

Curtice Brothers Company, packer and distributor of fruits, vegetables and vegetable products, which maintains packing plants at Rochester, Bergen, Mount Morris and Wilson, N. Y., with its principal office at 20 Curtice St., Rochester, N. Y., has been ordered to cease and desist from certain price discriminations, in violation of the Robinson-Patman Act, in the sale of its products.

Findings of the Commission are that since June 19, 1936, in the course of its business, the respondent corporation has used three different price lists designated by the letters "R", "A" and "S". The "R" price list is designated for those customers who place orders for 1,000 cases or minimum order for 1,000 cases of the respondent's products for shipment in quantities of not less than 250 cases. The "A" price list is designated for those customers who place a minimum order for 500 cases of the respondent's products for shipment in quantities of not less than 50 cases. The "S" price list was and are sold by use of the "R" price list, and the prices at which the products were sold by use of the "S" price list were and are lower by from 5.1 per cent to 16.6 per cent than the prices at which the products are sold by use of the "R" price list.

Findings further are that the respondent sold its products at prices specified by the "S" price list to some customers who did not take the required minimum number of 1,000 cases of respondent's products. In practice, the findings continue, the respondent has confined its sales made by use of the price lists to "future orders" for goods to be shipped when harvested and packed. The Commission also finds that since June 19, 1936, the respondent has been discriminating between different purchasers of its canned fruits, vegetables and vegetable products by paying, granting and contracting to pay certain sums of money to and for the benefit of some of its customers in consideration for advertising services furnished by such customers in connection with the sale or offering for sale of the respondent's products without making such payments or advertising allowances available on proportionally equal terms to all of its customers competing in the sale and distribution of its products. (3381)

Forson Laboratories, Inc., 335 Fifth Ave., New York, engaged in the sale and distribution of a medicament known as "Nu-Myst" and a vaporizer for its use, has been ordered to cease and desist from misrepresentation of the efficacy of the preparation.

The Commission finds that "Nu-Myst" is a liquid composed of common ingredients prescribed by physicians for relieving "colds" and containing menthol, camphor, thymol, oil of pine eucalyptol, benzyl benzoate and aromatics, with an alcohol base of 87 per cent. Through radio broadcasts over stations of sufficient power to convey programs to various States, and in advertisements in newspapers, periodicals and trade journals, the respondent corporation is found to have represented that the preparation brings speedy relief to sufferers from colds, hay fever, rose fever, asthma and other nasal and bronchial afflications.

Findings are that the representations are misleading and untrue; that the diseases named, except colds, are grouped under the so-called "allergies" the causes of which are manifold, and that since there are so many causes it is impossible for a formula such as "Nu-Myst" to bring relief from any of these conditions. (2740)
The respondent is ordered to cease and desist from representing that the preparation will destroy or prevent the growth of bacteria; that it is a cure or remedy for colds, whooping cough, hay fever, rose fever or asthma, or that it is an effective treatment or relief for these ailments beyond such temporary relief as may be afforded by the temporary allaying of local irritation. (3361)

Michigan Bean Shippers Association, Saginaw, Mich., a trade association, its officers and members, have been ordered to discontinue activities deemed to be in restraint of price competition in the purchasing of beans and barley from Michigan growers and the resale thereof to canning companies, chain store organizations, foreign importers and other buyers.

Mills Sales Company of New York, Inc., 901 Broadway, New York, and five of its officers, have been ordered to discontinue lottery methods in the sale of cosmetics, shaving and dental creams, drug and household sundries and other articles. The respondent officers are David, Evelyn, Joseph and Walter Jacoby, and Estelle J. Kruger.

The Commission order directs the respondents to cease and desist from (1) selling and distributing merchandise so packed and assembled that sales to the public are to be made by means of a game of chance; (2) supplying to or placing in the hands of others (a) merchandise together with push or pull cards, punch boards or other lottery devices, or (b) such devices either with assortments of merchandise or separately, which devices are to be or may be used in selling any merchandise to the public, and (3) selling or otherwise disposing of any merchandise by means of a gift enterprise or lottery scheme. (3910)
ASCAP’s jokes about BMI’s six songs will be heard no longer. BMI this week acquired performing rights for the entire M. M. Cole catalogue, effective January 1, 1941. The Cole catalogue, including between 2500 and 4000 songs, is best known for its hillbilly music, cowboy tunes and folk ballads, although it also includes a number of recent hits. Its acquisition will prove to be especially valuable to the smaller stations.

Meantime BMI has announced the release of seven more popular numbers, including a waltz, a “hot” rhythm tune, foxtrots and ballads. The networks and other stations are continuing to make use of the first six numbers released several weeks ago.

The printing trade unions are trying to drum up support among newspaper and magazine publishers for a united front against radio, but they are apparently making little headway. A program of harassing legislation is being contemplated by the unions.

Again the Supreme Court has sounded a note of warning to those who would set up a Government censorship of the media of free discussion. In its decision declaring unconstitutional an Alabama State anti-picketing law this week, the Court said “it is not the sporadic abuse of power by the censor but the pervasive threat inherent in its very existence that constitutes the danger to freedom of discussion.”

William J. Dempsey and William C. Koplovitz, FCC general counsel and assistant general counsel, have resigned to go into private practice together in Washington. It is expected that they will leave the Commission within a few weeks.

Stations throughout the country are preparing to take part in the National Radio Festival promoted by the NAB.

---

**BMI Buys Cole Catalogue; Seven New Songs Ready**

A long-term contract for the exclusive performing rights to all the music in the catalogue of the M. M. Cole Publishing Company of Chicago and affiliated companies was closed Wednesday by Broadcast Music, Inc. It becomes effective on January 1, 1941.

At present the Cole music is controlled by SESAC and until January 1, 1941, only SESAC licensees may play it. The catalogue includes from 2,500 to 4,000 songs.

The Cole catalogue is perhaps best known for its hillbilly music, cowboy tunes, and folk ballads, although it also includes such recent hits as *Mexicali Rose*, *Strawberry Roan*, and *Silver-Haired Daddy*. Other important and popular songs will fall into this catalogue shortly. It is a catalogue that is extensively performed on broadcasts originated locally as well as on the networks.

Merritt Tompkins, general manager of BMI, expressed satisfaction that this agreement works out to the great benefit of independent stations as well as of all others. In common with the rest of the BMI organization, Mr. Tompkins feels that this event is concrete evidence of the fact that BMI is working for the whole broadcasting industry.

“The acquisition of the Cole catalogue for the BMI licensees is of importance to the broadcasting industry and all other commercial users of music,” said Mr. Tompkins, “to all who love American music, and to the whole musical public. BMI has scored.”

Seven new songs will soon be ready for release to the 290 BMI member stations. In selecting the songs, Mr. Tompkins said, the BMI editorial board endeavored to pick a group appealing to many different tastes and included a waltz, and a “hot” rhythm number, as well as foxtrots and ballads. The additions to the list were:

- “Give Me Music,” waltz, music by Malcolm Reid, lyrics by Robert Sour and Don McCray, arranged by Helmy Kresa.
- “I’ll Be Goin’,” foxtrot, music by Lee Walner and lyrics by Robert Sour, authors of “What Good’s the Moon?”

(Continued on page 4196)
BMI BUYS COLE CATALOGUE; SEVEN NEW SONGS READY

(Continued from page 4195)

"What’s The Matter My Darling?" ballad, words and music by Charlie Beal, swing pianist and a protege of John Hammond, international swing authority. This number has been arranged by Sam Grossman.

"You Mean So Much To Me," music by Edgar "Puddinhead" Battle and lyrics by Ken Byron. "Puddinhead" Battle was formerly featured trumpeter with Willie Bryant’s swing orchestra, and is now actively engaged in arranging and composing for leading orchestras.

"Boogie Woogie To You," rhythm "Jump" number, with music by Ernest Gold and lyrics by Don McCray; authors of "Here In The Velvet Night," is being arranged by Jimmy Mundy, formerly arranger with Bennie Goodman. It is believed to be the first successful effort of a composer schooled in the Viennese tradition to write a "jump" song in the American idiom.

"Please Don’t Tell Her I Told You," music by Irving Wallman and lyrics by Max Wartell.

The BMI Board of Directors will meet at 580 Fifth Avenue at 10:30 a.m. next Tuesday, April 30.

The BMI band wagon can never be overcrowded but it is certainly getting well filled. The boys are climbing aboard even from outside the broadcasting industry.

That, of course, is as it should be. The ASCAP monopoly has its clutching fingers on the throat of every commercial user of music. With BMI acting as a cross between a munition plant and a recruiting station, the broadcasters are leading the fight but other interests are coming in as allies and sending their troops.

Last week in Chicago, the National Council of State Liquor Dealers Associations, meeting in convention, joined the allies. The convention heard speeches from various members who have been making an active fight against ASCAP on behalf of the places of entertainment represented by the member associations. These include hotels, restaurants, night clubs and other places where the tactics of the ASCAP agents and the demands of the organization have often resulted in making it impossible for the proprietor to afford an orchestra for the entertainment of his guests.

To those who attended the convention, it was plain that the members of these groups are really up in arms against ASCAP.

A resolution was presented at the convention giving expression to this attitude. In support of this resolution, John Fetterman, legal adviser to the Buckeye Liquor Dealers Association of Ohio, urged members of the Council to give their full cooperation to BMI.

"The fight has begun and it is to every tavern owner’s interest to back it to the limit," Mr. Fetterman declared. "Our field of activity has suffered great hardships at the hands of ASCAP. Under the strong, sincere leadership of Broadcast Music, Inc., we have affiliated interests on our side who will help us battle this unfair monopoly."

The resolution as finally adopted, read as follows:

Whereas, under the United States copyright laws, the American Society of Composers, Authors and Publishers, commonly called "ASCAP," is permitted to and in fact does levy arbitrary and unreasonable "fees" upon users of copyrighted musical works, proprietors of entertainment places, restaurants, inns, cafes, hotels, theatres, radio stations and other establishments wherein are operated amusements and entertainments involving the use of copyrighted musical works, and

Whereas, there is at present no statutory limit to the "fees" which may be charged by the American Society of Composers, Authors and Publishers for the use of copyrighted musical works, and

Whereas, the affiliated associations of this council are in accord with the premise that the author of a copyrighted musical work should receive proper and adequate compensation, and

Whereas, it is the belief of this Council that the fairest method of insuring such proper and adequate compensation to the author would be the establishment of an equitable system of fees to be paid in compensation for the use of copyrighted musical works, and

Therefore Be It Resolved that the House of Delegates of the National Council of State Liquor Dealers’ Association instruct the Chairman of this Council to appoint a committee of three with instructions to make a complete study of the inequities above mentioned and to formulate plans to remedy such inequities, and

Be It Further Resolved that this Committee be given full authority to act in its own judgment and in its own discretion and full power to become affiliated, in the name of this Council, with any group or organization formed for the purpose of relieving users of copyrighted musical works from the imposition of such arbitrary "fees".

The committee named, included James Donovan of Cleveland, Vice Chairman of the National Council, as Chairman, and Mr. Fetterman as Counsel. Inasmuch as Mr. Fetterman made such a strong speech in behalf of BMI, it is understood that the new committee will lend its full cooperation and support to BMI.

Another large and important group who have declared war on the side of the Allies are the operators of coin operated machines. At the time of the New York convention of the Automatic Phonograph Manufacturers Association, clear evidence was given of their support in the fight against ASCAP. Arrangements between them and BMI are pending and their full cooperation is expected.

The coin operators have been lucky. Because of the wording of the 1909 Copyright Law, they have been the only large group of commercial users of music from whom the ASCAP gang has not been able to exact tribute. Under the proposed revision of the Copyright Law which is now pending in Congress, they will no longer be protected. ASCAP in pushing for the passage of the new act, is motivated in large measure by the desire to hook
the coin operators. It has been stated by an official of ASCAP that ASCAP expects to collect a minimum of $5 a month for each machine. At that rate they expect to take about $12,000,000 per year from the coin machine industry. It is not strange that the operators are ready to join forces with the broadcasters and to give their support to BMI music. This is of great importance to BMI. Next to the radio itself the coin-operated phonograph is probably the best medium for the popularization of music.

Meanwhile the ranks of the broadcasting industry itself grow daily more solid. Merritt Tompkins received the following letter from a small independent station:

"You will undoubtedly be interested to know that as one station to receive ASCAP's "belated blessing" we are totally unimpressed. We are of the opinion that the only plan that will ever be acceptable is a per use basis. Until we can exercise the right of determining the amount of patronage we wish to extend to ASCAP, and pay on the basis of that use of their commodity, we shall steadfastly refuse to sign any agreement or commit ourselves in any manner."

The music publishing industry was thrown into consternation by the announcement that BMI intended to observe the law.

Copyright law provides a fee of two cents for the use of a composition for the making of a transcription. The practice for a number of years has been to collect twenty-five to fifty cents for each commercial broadcast of a transcription. When Mr. Tompkins made the announcement that the policy of BMI would be to adhere to the statutory rate, Variety ran three column head-lines. Mr. Tompkins said:

"This will help not only the transcription industry, but also the broadcasters themselves, since transcription costs in the last analysis are paid by the broadcasters. In thus aiding the transcription industry, we are also aiding BMI authors as the use of BMI compositions will be enormously stimulated by our adherence to the legal charges."

It has come to BMI's attention that ASCAP's Paine, in a moment of unwonted inspiration gave a description of BMI which, except for one detail, is surprisingly accurate considering its source. He described BMI as "a puppet organization that is to be the Moses to lead the broadcasters out of the bondage of Egypt; ASCAP being Egypt." Mr. Paine has apparently not read his Bible for some time. Moses was hardly a puppet; neither, of course, is BMI. Otherwise the description is perfect. We'll take the "Moses" and let the "puppet" go.

The article called "What is ASCAP" written by E. C. Mills, Chairman of the ASCAP Administrative Committee, is printed on the back of sheet music published by ASCAP houses and reprinted at every opportunity. It seems to have become an official platform. The arguments, based on a distortion of facts and aided by cork-screw reasoning are so misleading that they call for a detailed reply. Such a reply has been drafted for the purpose of submission to all trade papers which from time to time print the Mills article.

Because the ASCAP arguments are made to sound so plausible until they are refuted by the facts, we give you here the main portions of the reply to Mr. Mills. If any of the readers encounter people who have been taken in by the ASCAP claims, this detailed rebuttal may be useful.

Mr. Mills says: "at the inception of radio broadcasting, the broadcasters ... maintained that it was quite sufficient compensation to the composers if they were 'honored' and 'glorified' and their songs 'advertised' by being performed on the air. . . . The butcher, the baker, the candlestick maker cannot be paid with honors and glory. They demand money. Composers and authors are human beings ..."

The truth is: It was in 1923 that the radio became a regular income-producing medium for commercial advertising, and since 1923 the broadcasters have paid for the music they used. At present they are paying at the rate of about $5,000,000 a year. Radio fees total approximately two-thirds of ASCAP's total income.

Mr. Mills cannot name a commercial broadcaster in the country who does not wish the composers and authors to receive full and just compensation. The broadcasters are working in a practical way through their new organization, Broadcast Music, Inc., to give a fair chance to the many composers whose way has hitherto been blocked by ASCAP itself.

Mr. Mills says: "With the advent of radio broadcasting ... Composers and authors were almost economically destroyed. Sales of sheet music and of photograph records rapidly declined ... With the drying up of normal sources of revenue it became economically necessary for the Society to increase the rates charged for licenses issued to commercial users of music in public performance for profit."

The truth is: ASCAP's total income for 1923 was less than half a million; for 1939 it was nearly seven million. The increase was steady. Only in one year was its income less than in the preceding year. ASCAP took 2,004,496 in 1931 as against 2,043,791 for 1930. Otherwise, through good times and bad, it has multiplied its income year by year. In 1939 it received from sources other than radio more than six times as much as it received before the advent of radio broadcasting. This, according to Mr. Mills, is economic destruction!

Mr. Mills says: "Our Society seeks the most practical means of making it possible for them (composers and authors) to live comfortably—by protecting them in their lawful rights and collecting for them their infinitesimal portion of the enormous profits made by commercial users of their products in enterprises, which but for the availability of music, could not be successfully operated."

The Truth is: Music makes up less than 22% of the commercial radio time from which the broadcasters receive their income. Ac-
The truth is: In the period from 1921 to 1939 less than one third of ASCAP’s income went to American composers and authors.

After operating expenses and payments to the foreign societies are deducted, the balance is distributed half to the publishers and half to the composers and authors. The distribution of the writers’ share, however, is governed partly by seniority and other matters which have nothing to do with the use made of each man’s work.

When ASCAP payments to its members were published one year, they showed that a writer credited with more than 16,000 performances received $60.00 and one with 45,000 performances received $200.00 while two with 4,778 and 8,644 performances respectively received $7,000.00 each. And a publisher got $80,000.00.

Thus does ASCAP divide its revenue among the composers for whom the great heart of Mr. Mills beats so tenderly. Mr. Mills says: “The membership of the entire group (ASCAP and the foreign societies with which it is affiliated) exceeds forty-five thousand of the men and women who write most of the music which the world enjoys.”

The truth is: On the list of its members published by ASCAP in 1939 there are 1311 names of publishers and 1531 names of composers and authors, including 126 estates of deceased writers and a number of men listed under two or three names. ASCAP represents less than 1385 living American writers and less than one third of these are in any way active. In 1938 only 411 of them published anything; only 228 published as many as three works.

About 10% of ASCAP’s income goes to its foreign affiliates, who presumably make up the rest of Mr. Mills’ “forty-five thousand.”

In spite of Mr. Mills’ effort to boost the count by bringing in all of Europe, it is a very small group who write most of the current popular music which America enjoys and for which ASCAP collects most of its fees—about 45,000 but about 200!

Mr. Mills says: “The Society is the sole hope and refuge of the indigent, aged, or ailing composer and author in our country. ‘It is dedicated to the principle that no man or woman who writes successful works, says Mr. Mills, “of a type such as are performed in establishments licensed by the Society.”

The new writer could get his works into the ASCAP catalogue by having them issued by one of the publisher members of the Society. But these publishers want only “established” writers. That may be sound business so far as the publishers are concerned. But when the ASCAP organization and the most influential publisher-members have created this situation, it is sheer gall for Mr. Mills to imply that ASCAP is concerned with “the most practical way in which to encourage the composition of worthwhile music.”

The implication that ASCAP is the guardian angel of American composers in general is at once the most heartless and the most shameless piece of hypocrisy that has come from a responsible man in American public life in years.

ASCAP TRIAL COMPLETED

Retrial of the ASCAP suit testing the constitutionality of the Florida law has been completed. The court granted 30 days for filing of briefs and the decision is not expected until summer.

The witnesses were:

1. For ASCAP, Mills and Paine

2. The principal witnesses for the State were Walter Tison (WFLA), Spencer Mitchell (WDAE), both of Tampa; Tom Belviso, Director, Music Department, NBC; Jerry Maulsby, Production Manager, CBS; James W. Baldwin, former Managing Director, NAB; William Richardson, Lawyer-Accountant. Six other clerical witnesses on tabulations were used.

After everything was over the Court authorized the introduction into testimony of any testimony taken in connection with the Nebraska suit. Whereupon ASCAP put in the testimony of Gene Buck, Sigmund Spaeth, and a couple of minor witnesses, and we introduced the testimony of John Gillin, Edwin H. Morris and the President of the Nebraska Dance Hall Association.

The attorneys for the State were Thomas J. Ellis, Assistant Attorney General, Lucien H. Boggs and Andrew W. Bennett. The attorneys for ASCAP were Manley Caldwell, Frank Wideman, Louis D. Frohlich and Herman Finkelstein.

“NEW MUSIC IN THE AIR”

“There’s New Music In the Air” was the subject of an address given by Neville Miller, April 22, before the radio forum of the National League of American Pen Women in Washington.

LITTLE SUPPORT APPARENT FOR UNION’S ANTI-RADIO DRIVE

Although the printing trades unions are trying to drum up support among newspaper and magazine publishers for a united front against radio, they are apparently making little headway.

At both the Associated Press and A. N. P. A. meetings in New York this week, there was evidence that a substantial majority of the newspaper publishers wanted to work with rather than against radio.

The A. P. membership meeting voted to broaden the organization’s policy covering the use of its news services for sponsored radio programs. Details were left to the board of directors.
At the A. N. P. A. meeting, the radio committee’s report stated that one-third of all radio stations now were newspaper owned or controlled. The committee’s report, presented by its chairman, J. S. Gray, of The Monroe (Mich.) Evening News, declared that while radio as a medium had become “a powerful commercial entity, an inevitable gravitation associates it increasingly, and in many of its best uses, with newspaper operation.” The moderate cost of the new frequency modulation system, the report added, offered inducement for the establishment of stations in smaller communities.

Paul Bellamy, editor of The Cleveland Plain Dealer, said: “But I am ready to accept them, the gentlemen of the radio, as partners,” when he presented the report of his committee on cooperation of press, bar and radio. He added:

“We can agree on pretty much everything except the use of cameras and microphones in court. It remains to be seen what can be done about that.”

Furthermore, Editor & Publisher said editorially that the printing trades unions were making the wrong approach to the problem. It was up to the newspapers to show that they were the better advertising media, it said, and not to try to cripple radio.

The letter which the printing union sent to the publishers follows:

INTERNATIONAL ALLIED PRINTING TRADES ASSOCIATION WASHINGTON, D. C. Office of the President April 15, 1940.

GENTLEMEN:

The officers and members of the Printing Trades Unions have noted, during the past few years, the ever increasing diversion of Advertising from Magazines and Newspapers to other forms of media.

The Board of Governors, at their last meeting, appointed a committee to investigate this matter and, if possible, to prepare some constructive plan to protect the job opportunities of Printing tradesmen, which means also to protect and to promote the continuance of Magazines, Newspapers and other printed publications dependent upon Advertising.

For the year 1939, the gross sales of Radio Time amounted to $171,113,813, while the gross volume of National Magazine Advertising was $151,484.530. The Radio Advertisers not only paid this sum of $171,113,813 to the Radio Stations but, in addition thereto, they paid many additional millions of dollars for Music, Entertainers, Royalties, etc. While Newspaper Advertising in 1939 increased 1.5% over 1938, Magazine Advertising increased 9.1% over 1938, National Farm publications advertising increased 2.6% over 1938, Radio Station and Radio Chain Advertising increased 15.9% over 1938.

Magazines and Newspaper plants represent large and substantial investments and provide employment for many thousands of organized workers while Radio stations, in most cases, represent but a small investment for physical equipment and provide employment for a relatively small number of persons.

While Radio Broadcast licenses are issued by our Government, without cost to the holders thereof, through the reports of the Federal Communications Commission, we note that the present value of these licenses represent vast amounts of money.

The following citations, only a few of the many available, are illustrative: Station A—the new owners paid $18,262,125 for 70.6% of the stock of a station the replacement cost of the fixed assets of which were $286,507.90. Station B—the new owners paid $300,000 for a station the replacement value of the fixed assets of which were $77,106.38, and Station C—the new owners paid $450,000 for a station the replacement value of the fixed assets of which were $163,327.03. Yet, the Securities and Exchange Commission has recently stated that the value of a Radio Station is dependent on the license issued by the Governmental Agency.

We believe this is a highly important subject to every person sincerely interested in the welfare of the Printing and Publication industry and appreciating your interest in promoting and enlarging the Printed Publication field we would greatly appreciate knowing what plans, if any, have been considered or what plans may be considered to correct this situation which has already proven most harmful to the best interests of printing trades workers and their employers.

Trusting that you will favor us with a prompt response and with such suggestions as you deem advisable.

Very truly yours,

JHB/MH

John B. Haggerty, Chairman, Board of Governors.

It is understood that these unions contemplate support of anti-radio legislation in the future.

The NAB is keeping an eye on developments and will take appropriate action.

Supreme Court Scores Existence of Censorship

The Supreme Court says, "It is not the sporadic abuse of power by the censor but the pervasive threat inherent in its very existence that constitutes the danger to freedom of discussion."

This statement was included in the Court's decision this week, declaring unconstitutional an Alabama state anti-picketing law (Thornhill v. State of Alabama).

The state had contended that Thornhill could not complain of the deprivation of any rights but his own under the anti-picketing law, but Mr. Justice Black, who wrote the opinion, waved that contention aside, and added:

"There is a further reason for testing the section on its face. Proof of an abuse of power in the particular case has never been deemed a requisite for attack on the constitutionality of a statute purporting to license the dissemination of ideas. Schneider v. State, 308 U. S. 147, 162-165 [5 LRR 332]; Hague v. C.I.O., 307 U. S. 496, 516 [4 LRR Man. 451]; Lovell v. Griffin, 303 U. S. 444, 451. The cases when interpreted in the light of their facts indicate that the rule is not based upon any assumption that application for the license would be refused or would result in the imposition of other unlawful regulations (Note No. 10). Rather it derives from an appreciation of the character of the evil inherent in a licensing system. The power of the licensor against which John Milton directed his assault by his "Appeal for the Liberty of Unlicensed Printing" is pernicious not merely by reason of the censure of particular comments but by reason of the threat to censor comments on matters of public concern. It is not the sporadic abuse of power by the censor but the pervasive threat inherent in its very existence that constitutes the danger to freedom of discussion. See Near v. Minnesota, 283 U. S. 697, 713. One who might have had a license merely for the asking may therefore call into question the whole scheme of licensing when he is prosecuted for failure to procure it. Lovell v. Griffin, 303 U. S. 444; Hazue v. C.I.O., 307 U. S. 496 [4 LRR Man. 501] . . . "

April 26, 1940.
NEW YORK LIBEL LAW

On April 17, Governor Lehman of New York approved an amendment (Chapter 561, Laws 1940) of the New York law concerning libel.

Section 1345 of the Penal Law now reads as follows:

"Section 1345. Publishing a true report of public official proceedings. A prosecution for libel can not be maintained against any person, firm or corporation, for the publication of a fair and true report of any judicial, legislative or other public and official proceedings, or for any heading of the report which is a fair and true headnote of the statement published."

Section 337 of the Civil Practice Act now reads as follows:

"Section 337. Privileges in action for libel. A civil action cannot be maintained against any person, firm or corporation, for the publication of a fair and true report of any judicial, legislative or other public and official proceedings, or for any heading of the report which is a fair and true headnote of the statement published."

"This section does not apply to a libel contained in any other matter added by any person concerned in the publication; or in the report of anything said or done at the time and place of the public and official proceedings which was not a part thereof."

GOLDSTEIN BILL (NY) APPROVED

The Goldstein Bill in New York banning untruthful, deceptive or misleading advertisements over radio stations was approved April 21 and takes effect on September 1. The Act (c. 639, Laws of 1940) follows:

"AN ACT to amend the Penal Law, in relation to advertising.

"The People of the State of New York, represented in Senate and Assembly, do enact as follows:

"Section 1. Section four hundred and twenty-one of the penal law, is hereby amended to read as follows:

"Section 421. Untrue and misleading advertisements. Any person, firm, corporation or association, or agent or employee thereof who, with intent to sell or in any wise dispose of merchandise, real estate, securities, service, or anything offered by such person, firm, corporation, or association, or agent or employee thereof, directly or indirectly, to induce the public to purchase, sale, barter, exchange, or with intent to increase the consumption thereof, or to induce the public in any manner to enter into any obligation relating thereto, or to acquire title thereto, or an interest therein, makes, publishes, disseminates, circulates, or places before the public, or causes, directly or indirectly, to be made, published, disseminated, circulated, or placed before the public, in this state, in a newspaper, magazine or other publication, or in the form of a book, notice, circular, pamphlet, letter, handbill, poster, bill, sign, placard, card, label, or tag, or over any radio station or in any other way, an advertisement, announcement or statement of any sort regarding merchandise, securities, service or anything so offered to the public which advertisement contains any assertion, representation or statement of fact which is untrue, deceptive or misleading, shall be guilty of a misdemeanor."

"Section 2. Section four hundred and twenty-one-a of the penal law, is hereby amended to read as follows:

"Section 421-a. Advertisements. Any person, firm, corporation or association, or agent or employee thereof, hereinafter called person, who, being engaged in the business of dealing in any property, makes, publishes, disseminates, circulates or places before the public or causes, directly or indirectly, to be made, published, disseminated, circulated, or placed before the public, in this state, any advertisement respecting any such property, in any newspaper, magazine, or other publication, or over any radio station, unless it is stated in any such advertisement that the advertiser is a dealer in such property or from the context of any such advertisement it plainly appears that such person is a dealer in such property so offered for sale in any such advertisement; or when placing or causing any such advertisement to appear in any newspaper, magazine or other publication or radio station as described in this section, if requested by the publisher of any such newspaper, magazine or other publication or owner or operator of such radio station or any agent or representative thereof to file with such owner or operator, publisher, agent or representative thereof his true name, or where he is transacting business under a name other than the true name pursuant to law, then the name under which such business is transacted, and each business address wherein any business is transacted by him, in the class of property advertised or to be advertised for sale in such advertisement, shall make any false statement in relation to any of such items; or if requested by the publisher of any such newspaper, magazine or other publication or owner or operator of such radio station or any agent or representative thereof to file with such owner, operator, publisher, agent or representative thereof a statement showing whether he is causing such advertisement to appear or is offering to make such sale or disposition or transaction, as herein set forth, as principal or agent, and if as agent, to set forth such information as is specified in this section, in relation to his principal as well as in relation to himself, shall make any false statement in relation to any of such items; is guilty of a misdemeanor."

RADIO "COURTS"

A new statute (Chapter 251, Laws 1940) has been enacted in New York to endeavor to prevent the public being deceived as to the nature of the so-called "radio courts."

In a recent decision (Matter of Blake, New York Law Journal, December 1939) one of the New York Supreme Court judges took occasion to say the following:

"I have listened to a number of such programs on the air, and the ignorance of those in charge of the commonest principles of law was appalling. Atrocious advice has been given to poor, ignorant people which could serve only to multiply the trouble they have brought to these mounte-bank 'courts'. In the beginning a few men learned in the law permitted themselves to be used in connection with this 'swing time justice' until they realized the iniquity of the scheme. Today, no judge or self-respecting lawyer will lend himself to the capitalization of human misery. Outstanding members of the bar, flattered by the temporary prominence given them, and fancying themselves no little in the role of a 'Solomon come to justice', served in capacities for which they have no qualifications or training. Certainly, no good is accomplished for the poor litigants who are beguiled into making their troubles entertainment for the world, and, assuredly, much harm is done. These 'courts' have no ability, no responsibility and no authority and should, as a matter of public interest, be discouraged."

NAB is in receipt of a communication from Mr. Edwin M. Otterbourg, Chairman of the American Bar Association's Standing Committee on Unauthorized Practice of the Law, with reference to this statute, saying in part:

"I think that all of the radio stations, particularly in New York State of course, should be apprised of this law and should take steps to have removed from their programs any broadcasts which either in the letter or in the spirit violate what the Legislature is trying to prevent.

"In view of the very fine effort at cooperation that is being made between radio broadcasters and the bar, it seemed to be far more appropriate to send this to you so that you may take such action thereon as you see fit, rather than for me to communicate directly to the radio stations."

The pertinent provisions of the Act are:

"Section 3. Use of term "court" prohibited. No person, firm, association or corporation shall hereafter use or employ the term "court" as part of or in connection with the name of any body, board, bureau, association, or organization or corporation, or in referring to any body, board, bureau, association, organization or corporation, in such manner as to be calculated reasonably to lead to the belief that the body, board, bureau, association, organization or corporation is vested with judicial power or is a part of the judicial system of the state; the use of such term being expressly limited by this section for reference to a court of record or a court not of record, duly organized and existing under the laws of the state as a part of the judicial system of the state."
To all Station Managers:

Radio Festival is a grass roots promotion. You can take it whole or piece meal, as desired. It is good medicine in any amount. We invite you to write your own ticket, some kind of a ticket, large or small. There is plenty of time to get started.

* * *

Don't overlook the XAB $100 cash award for the best essay on the American System of Broadcasting. The best essay can be in your area.

* * *

I'll be glad to pass on any challenge you gentlemen may care to make other members as to your chances for getting this money away from me. Edney Ridge and Ralph Brunton have come up with pretty good plans, but the money is still in the bank.

Let's give them some real competition!

Sincerely yours,

Arthur Stringer.

MORE STATIONS MAKE PLANS FOR NATIONAL RADIO FESTIVAL

With the addition of KSL, Salt Lake City, and KQW, San Jose, Calif., to the list of stations which have announced their decision to participate in National Radio Festival, all of the country is within the scope of operations.

Three Nebraska stations will also participate. Cliff Johnson, their program director made the announcement by wire: "KOIL (Omaha) KFAB and KFOR (Lincoln) behind you with Radio Festival. Nebraska will know about it."

In Nashville, Tenn., according to information received at headquarters, the stations in "The Athens of the South" are to have a Radio Festival in which all stations will pool their ideas and efforts. This is the same practice which Pittsburgh and Richmond broadcasters have decided best meets their needs. Nashville stations are: WLAC, WSIX and WSM.

In San Jose, Ralph Brunton, president of KQW, has completed arrangements with Superintendent of Schools, Walter Bachrodt by which 10,000 boys and girls will be brought within the radio circle. For five consecutive Saturdays, beginning with May 4, the operation of KQW will be turned over to San Jose students, and the city's entire student body will have their finger in the radio pie in some fashion or other.

After certain preliminaries, students of a different school will take over the station's operation each Saturday. They will handle sustaining and commercial schedules and will produce shows of their own including remotes from the schools featuring student talent.

Up to last Monday, phases of station operation assigned to students included: continuity writing, production, music, transmitter operation and maintenance, sales traffic, sales promotion and publicity, announcing and sound effects. The KQW staff will act in an advisory capacity.

"The entire plan," says Mr. Brunton, "is being coordinated with the National Association of Broadcasters' National Radio Festival in order that the students may be better equipped to enter the essay contest on "The American System of Broadcasting—Why It Is Best for Americans."

Says Earl Glade

In a letter to headquarters, Earl J. Glade, executive vice president of KSL, wrote: "Thank you sincerely for your constructive suggestions regarding the Radio Festival. We shall work right along with you, and are happy to get this fine material."

In Greensboro, N. C., where Major Edney Ridge, manager, WBIG, is running up a record in the number of Mayoralty Radio Festival proclamations, the members of the Senior High School will present "Are you There" on May 3. "High Life," full newspaper size school publication carried a two column picture with complete story. Other plays are to be given at a later date.

In the Radio Festival bulletin, dated April 20, twenty stations and two transcription companies were reported as having made preliminary plans for engaging in the spring-summer industry promotion. Those stations were:

Atlantic City, N. J.—WBAB
Charlottesville, Va. —WCHV
Greensboro, N. C. —WBIG
Kansas City, Mo. —KMBC
New Orleans, La. —WWL
Pittsburgh, Pa. —KDKA, KQV, WWSW
—WJAS, WCAE
Quincy, Ill. —WTAD
Richmond, Va. —WMBG, WRNL, WRTD, WRVA
Roanoke, Va. —WDBJ
Rock Island, Ill. —WHBF
Wheeling, W. Va. —WWVA
Wilmington, Dela. —WILM, WDEL
NBC Transcriptions
World Broadcasting System

"LISTEN WHILE YOU RIDE"

It looks like a big summer for auto radio listening. Active station executives in various parts of the country have already scheduled announcements designed to increase the hours of such listening and/or the number of auto radio installations.

Reports of auto radio promotion have reached head-
quarters from Boston to San Francisco. In the former city John Shepard, III, president of the Yankee Network, is lending aid, and in the latter city, Ralph Brunton, president of KJBS, is actively engaged in making the listeners of northern California auto radio and new set conscious.

Three fifteen minute programs per week over the Brunton stations, KJBS, San Francisco, and KQW, San Jose, also discuss new home sets with ample attention given to console models.

KDKA, Pittsburgh, has scheduled three announcements per week straight through the summer. They have been on for two weeks, according to James R. Luntzel, director of publicity.

The KRGV, Weslaco, Texas, campaign was of the intensive type, covering the period of April 21 through the 27. Station Manager Ken Lowell Sibson preceded it with the following letters to all radio dealers and motor car dealers:

"Dear Mr. —

"LISTEN WHILE YOU RIDE!

" 'Listen While You Ride' will not only increase your spring and summer set sales but, of course, will lift our set population. Estimates have it that there are 11,000,000 hours of auto radio listening now, based on the 7,000,000 sets in use.

"I am attaching a sample of three of the announcements, in order that you might get the gist of them.

"Let's boost the listening habit and set population by tying in with this 'Listen While You Ride' campaign."

And from WZD, Tuscola, Ill., came this note from Program Director Hank Fisher:

"We will run the auto radio announcements that you forwarded to us. Thanks for your cooperation in the past, and please don't fail to call upon us in the future for anything that we can do for you."

W GAR, Cleveland, is running auto radio announcements at regular intervals over several weeks. In addition the station will build special features for broadcast which call attention to the use of auto radios.

In the interest of more and better listening KVI, Tacoma, Washington, scheduled a service meeting in the ballroom of the Olympic Hotel, Seattle, on April 25. It was held in cooperation with Northern Radio Company and the Hygrade Sylvania Corporation, tube manufacturers of Emporium, Pa. Their Engineer, George C. Connor, was guest speaker.

NATIONAL EMPLOYMENT WEEK

The President has signed a proclamation designating the first week in May as "National Employment Week." Full text of the proclamation follows:

Both the State and Federal Governments have been especially concerned with the problems of older workers, many thousands of whom, despite their persistent efforts, still lack a place in industry. Among these are a considerable number of World War Veterans, men who now average 47 years of age, and who, I feel have a particular appeal to our national sense of responsibility.

Our public employment service—a Nation-wide network of 1,600 offices now operated jointly by the State and Federal Gov-ernments—has made special efforts in behalf of workers past 40 years of age, including veterans. We know from the facts gathered by this Agency that men and women in middle life possess abilities and skills which would fit them for employment in nearly every line of work. We know further that these older workers, when given an opportunity, demonstrate a seasoned experience and a mature application to their tasks—which in many callings outweigh the physical advantages of youth.

A year ago with these considerations in mind, I designated a National Employment Week during which I asked that all our citizens give particular and active attention to the problem of older workers who lack employment. During the month in which the special week occurred, over a third of a million jobs—a third more than during the same month of the previous year—were filled through the public employment offices, and a quarter of a million of these placements were in private industry. Moreover, placements proceeded at an accelerated rate in the month following the week set aside. Because of the concerted efforts of government, many public-spirited groups, and particularly of employers throughout the land, thousands of workers past 40, among them veterans, shared beneficially in this fine result.

I am grateful for the wholehearted response to my first appeal; and as President, I desire to encourage a continued Nation-wide interest in this persistent problem.

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, do hereby declare the week beginning May 1, 1940, as National Employment Week, and Sunday, May 5, 1940, as National Employment Sunday. I urge all churches, civic organizations, chambers of commerce, boards of trade, veterans' organizations, industry, labor, public-spirited citizens, radio, and the press throughout the United States to observe that week as National Employment Week, to the end that interest in this persistent problem be maintained.

I am expressing the hope that the week which I have declared as National Employment Week will be the signal for renewed effort to solve the problem of older workers who need employement.

FRANKLIN D. ROOSEVELT

ALL-EXPENSE CONVENTION TRIPS NOW BEING ARRANGED

If you are one of those who expressed interest in the All-Expense Tours to the Convention, we urge you to return to headquarters the form mailed you with the itineraries. Simply indicate the route you prefer so that we can make plans. Please do it NOW! You do not commit yourself, but it is important that we get some idea NOW as to the route you wish to travel. It is probable that enough will choose some one route each way to warrant a special train and personally conducted train on that route, resulting in a saving of several hours time in all probability. Furthermore, if enough want to travel on other routes we can arrange for special cars for personally conducted tours on those routes.

We are endeavoring to please YOU and make your convention trip a memorable one. But you must let us know your wishes. Please do it NOW!

Russell Place, NAB counsel, who is handling arrangements for these trips, received the following letter this week from Harry R. Spence, KXRO, Aberdeen, Washington:

"Congratulations on the splendid way in which you have worked out the proposed all-expense tours to the convention in San Francisco. These tours are very complete and are certainly flexible and they should meet with the approval of everyone. The outline indicates a great deal of thought and work and I feel sure that the plans will prove so attractive that we will have a splendid representation in San Francisco. I hope that a great many of our people will decide on going North from San Francisco as we here in the Pacific Northwest are particularly anxious that our Eastern friends should see what a great country we really
have. Don't let any of them tell you that buffalos roam the streets of Seattle and that Indians are still stopping transcontinental trains."

WILDER THANKS INDUSTRY

Harry C. Wilder, Director of District 2, wishes to thank the entire industry for the expressions of sympathy he and Mrs. Wilder received after the death of his son, Harry, Jr., recently. Mr. Wilder is president of Station WSYR in Syracuse.

DEMPSEY, KOPLOVITZ RESIGN

William J. Dempsey and William C. Koplovitz, FCC General Counsel and Assistant General Counsel, respectively, have submitted their resignations, to engage in private law practice jointly at Washington, D. C. The resignations are effective “at the convenience of the Commission.”

In making public the impending separation, Acting Chairman Thad H. Brown commented:

“It is with genuine regret that the Commission has received the resignations of General Counsel Dempsey and Assistant General Counsel Koplovitz. They are able, industrious, and conscientious young men with an exceptionally high regard for public service. Their going is a distinct loss to the Commission.”

Chairman James Lawrence Fly, who is absent from the city, wired:

“The Commission is sorry to lose such valuable services to private practice.”

He credited Messrs. Dempsey and Koplovitz with expediting and simplifying Commission procedure, and particularly complimented them for their unbroken record of favorable decisions for the Commission in 7 cases before the United States Supreme Court and in 29 cases before the Court of Appeals.

Mr. Dempsey and Mr. Koplovitz have “teamed” in Government service since 1933. Before joining the Federal Communications Commission legal staff, they were counsels to the Federal Power Commission and, before that, the Public Works Administration.

FCC AMENDS RULES

The FCC, upon consideration of the petition filed by Mayor Fiorello H. LaGuardia, New York, New York, requesting amendment of Rules 3.94(a) and 4.10, Docket No. 5450, and as a result of study of the general problems involved and after consideration of the record made during the hearing in this matter, and the report of the Committee of the Commission submitted on April 4, 1940, made the following changes in Parts 3 and 4 of its Rules and Regulations, effective immediately:

Section 3.94(c). The licensee of a standard broadcast station may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of an international broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the license certificates that express authority has been received from the licensee of the station originating the program.

Section 4.10(d) is deleted; Section 4.10(c) is made Section 4.10(d), and the following is inserted as Section 4.10(c):

“Section 4.10(c). The licensee of a noncommercial educational broadcast station may, without further authority of the Commission, rebroadcast the noncommercial programs of a standard broadcast station or an international broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the license certificates that express authority has been received from the licensee of the station originating the program.”

The words “or noncommercial educational” are stricken from Section 4.10(b).

HOW TO GET A LICENSE

The FCC this week issued the following statement on procedure necessary to establish a radio broadcast station:

Because radio frequencies are limited, it is necessary to license broadcast stations to serve the “public interest, convenience, or necessity.” The rules of the Commission do not contemplate licensing any new radio station, the purpose of which is to engage in broadcasting for reception by the general public, to operate with a power of less than 100 watts. This is the minimum power capable of rendering appreciable public service, and it is allowable only on frequencies allocated for local service (1200, 1210, 1310, 1370, 1420 and 1500 kilocycles). Likewise, in the public interest, the Commission has not licensed stations to broadcast recordings only.

The approximate cost of constructing a 100-watt broadcast station is, roughly, between $5,000 and $8,000.

Any person, firm or corporation legally qualified may apply to the Commission for radio broadcast facilities in any locality. Formal application for construction permit is submitted in duplicate direct to the Commission on Form 301 (Application for Standard Broadcast Station Construction Permit or Modification Thereof), which is obtainable on request.

Each construction permit will specify a maximum of 60 days from date of grant thereof as the time within which construction of the station shall begin, and a maximum of six months thereafter as the time within which construction shall be completed and the station ready for operation unless otherwise determined by the Commission upon proper showing in any particular case.

The time required for an application for a new broadcast station to go through the necessary routine varies with individual cases. In the case of a purely local station, where no interference is involved, the time can be as short as four to six weeks, providing that the application is accurately and completely filled out and all the required exhibits are appended. However, where interference and formal objection by other stations enter, a longer time is necessary.

Where the Commission, upon examination of a particular application, is unable to reach determination that a grant will serve the public interest, the case is designated for formal hearing upon specific issue, and all persons having an interest in the matter are given opportunity to be heard. Under present procedure, after a hearing has been held the parties are permitted 20 days in which to file supporting statements. The Commission then issues its “Proposed Findings of Fact and Conclusions,” and the parties are allowed 20 days thereafter to file exceptions and to request oral arguments before final decision is rendered. In the event that no exceptions or requests for oral argument are received, the Commission issues an order adopting and making effective its proposed decision. This is the final determination unless there is court action.

Upon completion of construction of a radio station the permittee is authorized to test the equipment for a period not to exceed 10 days. The Inspector in Charge of the district in which station is located, as well as the Commission, are notified 2 days in advance of the beginning of equipment tests. When construction and equipment tests are completed, and after application for station license has been filed with the Commission on Form 302 (Application for
Regular Broadcast Station License) and Form 306 (Application for Renewal of Regular Broadcast Station License).

The Government exacts no fee or other charge in connection with radio broadcasting.

In order to provide broadcast service to the varying population densities found throughout the United States, it has been found necessary to establish four general classes of broadcast stations:

Class I—which operates on a clear channel, is intended to serve a large center of population besides serving, particularly at night, the remote rural areas.

Class II—which also operates on a clear channel, renders secondary service over a primary service area limited by interference from Class I stations.

Class III—which operates on a regional channel shared by several similar stations, serves a center of population and its adjacent rural area during the daytime, and at night similarly serves the center of population but gives a lesser service to the rural region because of interference from other stations on the same channel.

Class IV—which operates on a local frequency shared by many similar stations elsewhere, serves a small center of population both day and night.

If an applicant for a radio station asks a special call letter assignment, whenever possible the Commission grants this request. Otherwise call letters are selected by the Commission.

Unlike the telephone or telegraph, a radio broadcast station is not deemed a “common carrier” under the Communications Act. No standard tariffs apply. While certain prohibitions are imposed by the Act, the Commission is given no general censorship powers over radio broadcast programs.

FROM THE FCC MAIL BAG

The warden of a State prison wants local radio stations to cooperate in broadcasting emergency information regarding escaping prisoners. The Commission has advised that, though the law prevents standard broadcast stations from being used for routine police work, there is no bar to news flashes containing information about escaping prisoners which may be of interest or concern to the general public.

Amateurs in a certain New Jersey city complain that local authorities charge for the privilege of “ham” operations in that locality. The Commission, which itself exacts no fee for licensing amateurs or other radio operators or stations of any kind, is inquiring as a matter of information but, of course, cannot interfere in such local matters.

The Commission still receives inquiry as to a “license for the operation of radio receivers.” The answer, of course, is that no such federal license is required.

A New Yorker asks about Commission “regulations relative to rates which may be charged by standard broadcast stations for the use of their facilities.” The Communications Act stipulates that stations engaged in program broadcasting are not common carriers. They are not subject to rate regulation as are common carriers such as the telephone and telegraph. Hence, the matter of charges is one resting between the stations and the sponsors.

Frequently the Commission is asked to help locate a radio operator or a radio station employee. The Commission does not require or maintain a complete, continuing record of the whereabouts of each radio operator. It has no jurisdiction over other personnel of the broadcasting industry, and keeps no tabs on individual employees.

A recent letter suggests “the danger from X-rays to which the public will be subjected in the use of television receiving sets.” According to the best available information, the efficiency of X-ray generation at the voltages employed in cathode-ray television systems is extremely low, and any X-rays so produced are of such low penetrating power as to be completely absorbed by the glass walls of the tube. Not only is this true of cathode-ray tubes in television receiving sets, but also of the tubes used in transmitters. In neither case do engineers consider there is any danger from X-radiation.

A CCC camp in Nevada wants to establish point-to-point radio communication between its main camp and a branch camp. The Interdepartment Radio Advisory Committee advises the President with regard to the assignment of frequencies to Government stations and the Federal Communications Commission has no jurisdiction over such assignments. Consequently, if the proposed operation is for Government business with Government equipment and conducted by Government employees, the application is one for the Interdepartment Radio Advisory Committee to handle, but if, on the other hand service is to be privately owned, both station and operator license applications should be made to the Commission.

The Commission makes frequent reply that it is not authorized to assist individual inventors promote their radio inventions, or expedite patents thereon. Nor can it help individuals copyright or market radio programs or musical selections, or obtain positions for radio operators or performers.

By the same token, a recent one which the Commission has often reiterated, it cannot censor individual radio programs, or “rule” individuals either on or off the air. Therefore, it is unable to deal with a Maryland man’s complaint about a program discussing the birth of babies, a magician’s protest about airing the secrets of his profession, a Cleveland man’s resentment at manner in which classical music is rendered by so-called “swing bands,” the desire of a Massachusetts man to put all international broadcasts in Esperanto, or a Philadelphia Parent Teacher Association’s criticism of the character of programs presented for children between 4 and 8 p. m.

Every so often the Commission has to point out that small radio frequency devices used as transmitters to distribute programs within buildings are capable of radiating considerable power and consequently may cause interference to radio communication in the immediate vicinity. The Commission has established regulations which permit the operation, without license, of low-powered radio frequency devices for remote control receivers, for connecting record players with receivers, and for similar applications so long as the field radiated does not exceed a predetermined value and no interference results.

Among aircraft radios recently licensed was that of Borrah Minevitch, of Beverly Hills, California. However, it may be difficult for him to sound his new call signal, KHDQH, on his famous harmonica!

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings are scheduled before the Commission in broadcast cases during the week beginning Monday, April 29. They are subject to change.

Monday, April 29

Monday, April 29
To Be Held Before Commissioner George Henry Payne, in the Criminal Court Room, County Courts and Jail Building, Houston, Texas.

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—In re Revocation of station license of KGFI.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for hearings and oral arguments. They are subject to change.
May 9

Oral Argument Before the Commission

REPORT NO. P-5:

REPORT NO. B-88:

June 3

NEW—Anthractie Broadcasting Co., Inc., Scranton, Pa.—C. P., 1370 kc., 250 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

There was no meeting of the Commission this week.

MISCELLANEOUS

North Side Broadcasting Corp., New Albany, Ind.—Granted motion for leave to amend petitioner’s application for modification of license (Docket No. 5811), so as to request additional authority to move transmitter location from McCullough Pike, near Silver Creek, New Albany, Ind., to a site to be determined, Louisville, Ky.; directed hearing now scheduled for April 19, 1940, on said application be continued without date.

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted construction permit to install new transmitter, frequency 920 kc., 500 watts, daytime (B1-P-2815).

WGRM—P. K. Ewing, Greenwood, Miss.—Granted license to cover construction permit for move of studio and transmitter from Grenada, Miss., to Greenwood, Miss.; 1210 kc., 100 watts, 250 watts LS, unlimited (B3-L-1019).

Central States Broadcasting Co. (area of Omaha, Nebr.), Portable-Mobile.—Granted construction permit for new relay broadcast station, frequencies 1606, 2022, 2102, 2758 kc., power 2 watts (B4-PRY-208).

Central States Broadcasting Co. (area of Omaha, Nebr.), Portable-Mobile.—Granted construction permit for new relay broadcast station, frequencies 1606, 2022, 2102, 2758 kc., power 2 watts (B4-PRY-210).

Central States Broadcasting Co. (area of Omaha, Nebr.), Portable-Mobile.—Granted construction permit for new relay broadcast station, frequencies 1606, 2022, 2102, 2758 kc., power 2 watts (B4-PRY-209).

WKAR—Michigan State College, E. Lansing, Mich.—Denied petition to intervene in the hearing on the application of WDFD, Flint, Mich., to change frequency from 1310 to 880 kc., increase power from 100 watts to 1 KW, and the application of WJHL, Johnson City, Tenn., to change frequency from 1200 kc, to 880 kc., and increase power from 250 watts to 1 KW. (Exception to ruling noted by counsel for petitioner.)

WGBI—Scranton Broadcasters, Inc., Scranton, Pa.—Denied petition to intervene and enlarge issues in re application of WJHL, referred to above. (Exception to ruling noted by counsel for petitioner.)

Miami Broadcasting Co., Miami, Fla.—Dismissed without prejudice the application for a new station to operate on 1120 kc., 250 watts, unlimited time, and hearing canceled.

Black River Valley Broadcasts, Inc., Watertown, N. Y.—Granted petition for leave to amend application for construction permit to request frequency 1210 kc, instead of 1120 kc., night power of 250 watts instead of 100 watts, and make changes in equipment.

KEIV—Nichols & Warinner, Inc. (area of Long Beach, Calif.), Portable-Mobile.—Granted construction permit for changes in equipment of relay broadcast station and increase in power to 10 watts (B5-LRE-308).

KRBM—KRBM Broadcasters, Bozeman, Mont.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-361).

WCNC—Alfred T. Murphy & Trin W. Aydlett, d/b as Albermarle Broadcasting Co., Elizabeth City, N. C.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-381).

KTOK—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-383).

WJWB—Charles C. Carlson, New Orleans, La.—Granted license to cover construction permit for changes in equipment and increase in power to 250 watts; frequency 1200 kc., unlimited (B3-L-1130).

WNBH—E. Anthony & Sons, Inc., New Bedford, Mass.—Granted modification of construction permit for installation of new transmitter, increase in power from 100 watts, 250 watts day, to 250 watts day and night, move of transmitter, site to be determined, install vertical antenna, for approval of antenna and for authority to move transmitter location from McCullough of license (Docket No. 5811), so as to request additional power from 100 watts, 250 watts LS, unlimited (B3-L-1135).

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 2 p. m. to 3 p. m., EST, on April 27, May 4, 11, 18 and 25, 1940, in order to broadcast programs as follows: 2 to 2:30, Newscast; 2:30 to 2:50, Madonna Moobs; 2:50 to 3:30; Suggestions in Symphony; to operate from 2 to 3 p. m., EST, April 28, May 5, 12, 19 and 26 in order to broadcast programs as follows: 2 to 2:15 p. m., Newscast; 2:15 to 2:30 p. m., Tune Travels; 2:30 to 2:45 p. m., Sabbath Meditations; 2:45 to 3 p. m., ¼ Hour in ¼ Time (provided WSVS remains silent) (B1-S-879).

WAKY—Farmers & Bankers Broadcasting Corp., Wichita, Kans.—Granted special temporary authority to use the relay broadcast equipment formerly licensed to the KANS Broadcasting Co., under call letters KDEA, on Sunday, April 21, 1940, between the hours of 1:00 and 5:00 p.m. for the purpose of broadcasting a golf match at the Wichita Country Club.

WTAW—Agricultural and Mechanical College of Texas, College Station, Tex.—Granted special temporary authority to operate simultaneously with Station WJBO from 10:00 p. m. to 11:00 p. m., EST. on April 26, 1940, in order to broadcast Barnyard Frolic of Agricultural Engineering Society (B3-S-394).

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—Granted license to cover construction permit for increase in power from 1 KW to 1 KW, 5 KW day, install new transmitter, and make changes in antenna and move transmitter: 1350 kc., shares with WAWZ (B1-L-1135). Granted authority to determine operating power by direct measurement of antenna input (B1-Z-383).

Everett L. Dillard, A/V., Radio Equipment Co., Kansas City, Mo.—Granted special temporary authority to operate high frequency broadcast station W2XK on a frequency of 26,300 kc., using maximum power of 1000 watts, special emission (frequency modulation) in cooperation with the licensee of high frequency broadcast station W2XJ, for a period not to exceed 30 days, to conduct and determine the extent of mutual sky-wave interference existing between two stations operating with 1 KW on 26,300 kc., employing frequency modulation, and to determine to what field strength contour of the desired station the interfering station would transmit simultaneously with the relay station and to what extent the relay station would interfere with program reception of the desired station in its own coverage area.

Edwin H. Armstronng, New York, N. Y.—Granted special temporary authority to operate frequency modulated transmitter with power of 10000 watts on 45 mc, at the site of the transmitter of Station W2XMN, Alpine, N. J.; to be operated simultaneously with Station W2XMN (40 KW on 42.8 mc.), in order to secure data on adjacent channel operations and to complete certain tests outlined in letter dated March 4, 1940; authority is for period not exceeding 30 days, beginning May 1, 1940, and ending not later than May 30, 1940.

WJHOT—Vetta G. Samford, G. S. Shealy, Thomas D. Samford, Jr., and J. H. Orr, d/b as Opelika-Auburn Broadcasting Co., Opelika, Ala.—Granted modification of construction permit for new broadcast station, for approval of studio and transmitter, installation of new equipment, and approval of antenna (B3-MP-940).

KGDE—Charles L. Jaren, Fergus Falls, Minn.—Granted license to cover construction permit for installation of new transmitter;
April 26, 1940

new frequency 1200 kc., 100 watts, 250 watts LS, unlimited (B4-L-1134).

KFW—Southwestern Hotel Co., Fort Smith, Ark.—Granted license to cover construction permit as modified for change in frequency, increase in power, installation of new transmitter and new antenna, and move of transmitter; frequency 1370 kc., 250 watts, unlimited (B3-L-1137); also granted authority to determine operating power by direct measurement of antenna input (B3-Z-386).

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted license to cover construction permit as modified for erection of new broadcast station; 950 kc., 1 KW, daytime operation (B1-L-1136); also granted authority to determine operating power by direct measurement of antenna input (B1-Z-384).

WSYR-WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted license to cover construction permit as modified for erection of new broadcast station; frequency 1606 kc., 500 watts, unlimited time. Amended: changes in directional antenna for night use. Amended to change name of applicant from St. Petersburg Chamber of Commerce to City of St. Petersburg, Florida.

800 Kilocycles

WBAP—Carter Publications, Inc., Fort Worth, Tex.—Authority to install automatic frequency control.

WFAA—A. H. Belo Corporation, Dallas, Tex.—Authority to install automatic frequency control.

850 Kilocycles

880 Kilocycles

KFCA—The Mid-Western Radio Corp., Greeley, Colo.—Authority to make changes in automatic frequency control.

940 Kilocycles

NEW—Atlantic Broadcasting Corp., Miami, Fla.—Construction permit for new broadcast station on 940 kc., 500 watts night, 1 KW day, unlimited time. Amended: change type of transmitter.

NEW—Atlantic Broadcasting Corp., Miami, Fla.—Construction permit for new broadcast station to be operated on 1120 kc., 250 watts, unlimited time. Amended to change frequency to 930 kc., increase power to 500 watts night, 1 KW day, change antenna and request Class III-B station.

950 Kilocycles

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—License to cover construction permit (B1-P-1332) as modified for a new station.

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Authority to determine operating power by direct measurement of antenna power.

1050 Kilocycles

KFB—The Farmers & Bankers Broadcasting Corp., Wichita, Kans.—License to cover construction permit (B4-P-1865) as modified for new equipment, antenna and move transmitter and studio.

KFB—The Farmers & Bankers Broadcasting Corp., Wichita, Kans.—Authority to determine operating power by direct measurement of antenna power.

1150 Kilocycles

WHAM—Stromberg-Carlson Telephone Manufacturing Co., Rochester, N. Y.—Authority to determine operating power by direct measurement of antenna power.

1200 Kilocycles

WTHT—The Hartford Times, Inc., Hartford, Conn.—Modification of construction permit (B1-P-2240) for increase in power, move of transmitter to site to be determined, Hartford, Conn., install new transmitter, changes in antenna, further requesting approval of antenna change in type of transmitter; frequency 1130 kc., 1 KW, unlimited time (B5-MF-94).

APPLICATIONS FILED AT FCC

550 Kilocycles

WSVA— Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Modification of construction permit (B2-P-2578) for new transmitter, install new antenna, increase power, and move transmitter, further requesting approval of antenna and giving transmitter site as present location, East of Valley Pike, 5 miles south of Harrisonburg, Va.

570 Kilocycles

WNAX— WNAX Broadcasting Co., Yankton, S. D.—Transfer of control of corporation from South Dakota Broadcasting Corporation to Iowa Broadcasting Company, 1500 shares of Class A and 500 shares Class B stock.

WSYR-WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Authority to determine operating power by direct measurement of antenna power.

600 Kilocycles

NEW—Thumb Broadcasting Co., Brown City, Mich.—Construction permit for new broadcast station to be operated on 880 kc., 1 KW, daytime. Amended to change frequency requested to 600 kc., and power to 250 watts.

620 Kilocycles

WSUN—City of St. Petersburg, Florida, St. Petersburg, Fla.—Construction permit to increase power from 1 KW, 5 KW day, to 5 KW day and night; changes in directional antenna for night use. Amended to change name of applicant from St. Petersburg Chamber of Commerce to City of St. Petersburg, Florida.

4206
NEW—Carl Sholtz. Fort Pierce, Fla.—Construction permit for new broadcast station on 1350 kc., 250 watts, unlimited time. Amended to change studio location from Duval St. at Fleming to foot of Duval St., Key West, Fla.

1370 Kilocycles

NEW—Central Broadcasting Corp., Sanford, Fla.—Construction permit for new broadcast station to be operated on 1550 kc., 1 KW. unlimited time, Class III. Amended to change frequency to 1370 kc., and power to 250 watts, changes in antenna and request Class IV station.

WRPT—C. P. Edwards and Howard Long, d/b a Kingsport Broadcasting Company, Kingsport, Tenn.—Modification of construction permit (B3-P-2616) for a new station, requesting approval of antenna and approval of studio site at Commerce St., Kingsport, Tenn., and transmitter site at Kingsport, Tenn.

NEW—Central Broadcasting Corp., Sanford, Fla.—Construction permit for new broadcast station on 1370 kc., 250 watts, unlimited time. Amended to change location of transmitter to Seminole Blvd. at San Juan Ave., Sanford, Fla.; change type of transmitter and antenna changes.

WECA—Evansville on the Air, Inc., Evansville, Ind.—Construction permit for new broadcast station to be operated on 1440 kc., 250 watts, unlimited time. Amended to change frequency to 1420 kc., and changes in antenna.

KATE—Albert Lea Broadcasting Co., Albert Lea, Minn.—Authority to determine operating power by direct measurement of antenna power.

1420 Kilocycles

NEW—Pan-American Broadcasting System, Inc., Hollywood, Fla.—Construction permit for new broadcast station to be operated on 1580 kc., 250 watts, unlimited. Amended to change frequency to 1420 kc., and changes in antenna.

NEW—Carl Sholtz, Fort Pierce, Fla.—Construction permit for new broadcast station to be operated on 1540 kc., 250 watts, unlimited time. Amended to change frequency to 1420 kc., and changes in antenna.

NEW—World Publishing Co., Omaha, Nebraska.—Construction permit for new developmental broadcast station (formerly B2-PFB-15) on 41000 kc., 1000 watts, special emission for frequency modulation. Amended: To change type of station to high frequency broadcast, 42500 kc.

WENS—Radio Station WSOIC, Inc., area Charlotte, N. C.—Construction permit to make changes in equipment.

KEMA—May Seed & Nursery Co., area Shenandoah, Iowa.—Voluntary assignment of license from May Seed and Nursery Co. to May Broadcasting Company.

NEW—WICA, Inc., Ashbula, Ohio.—Construction permit for new high frequency broadcast station on 43300 kc., 1 KW, special emission for frequency modulation.

NEW—The Pulitzer Publishing Co., St. Louis, Mo.—Construction permit for new high frequency broadcast station on 12000 kc., 250 watts, special emission for frequency modulation.

NEW—L. B. Wilson, Inc., Portable-Mobile (area Cincinnati, O.).—Construction permit for new relay broadcast station to be operated on 1646, 2090, 2190, 2830 kc., 25 watts, A-3 emission.

NEW—Southeastern Broadcasting Co., Inc., Macon, Ga.—Construction permit for new high frequency broadcast station to be operated on 13400 kc., 1000 watts power, emission A-3 special. Amended: Emission: Special for frequency modulation.

NEW—L. B. Wilson, Inc., Portable-Mobile (area Cincinnati, O.).—Construction permit for new relay broadcast station to be operated on 1616, 2090, 2190, 2830 kc., 250 watts power, A-3 emission.

W9XAO—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Construction permit for increase in power from 1000 watts to 5000 watts, install new transmitter and operate on a regular commercial basis.

NEW—Evansville On The Air, Inc., Evansville, Ind.—Construction permit for new high frequency broadcast station to be operated on 145000 kc., 250 watts, special emission for frequency modulation.

NEW—General Electric Co., area Schenectady, N. Y.—License for new special relay broadcast station to be used in connection with International Broadcast Stations WGEA and WGEO, when same program is not being broadcast by station WGY. Frequencies: 2090, 2570, 2920, and 3920 kc. Power 2 watts, A-3 emission. Equipment of relay station WEIM.

WGRF—North Side Broadcasting Corp., New Albany, Ind.—Formerly B4-MI-903, modification of license to move main studio from New Albany, Ind., to Louisville, Ky. Amended to change application to construction permit and move of transmitter from New Albany, Ind., to site to be determined, Louisville, Ky., and make changes in antenna.

NEW—Standard Broadcasting Co., Los Angeles, Calif.—Construction permit for new high frequency broadcast station on 15500 kc., 250 watts, A-3 emission. Amended to change frequency to 42250 kc., 250 watts power, and 117190 kc., with 50 watts power. Special emission for frequency modulation.

NEW—General Electric Co., area Schenectady, N. Y.—License for new special relay broadcast station same as B1-LRE-109 above except equipment of relay station WEIB.

NEW—Rensselaer Polytechnic Institute, Troy, N. Y.—Construction permit for new high frequency broadcast station on 24200 kc., 250 watts, special emission for frequency modulation.

NEW—WJIM, Inc., Lansing, Mich.—Construction permit for new high frequency broadcast station on 43200 kc., 1000 watts special emission for frequency modulation.

WSXV—WINS, Inc., Columbus, Ohio.—Construction permit to increase power from 250 watts to 10000 watts; move transmitter locally to 1035 Barnett Road. Columbus, Ohio; new equipment and operate on regular commercial basis.

NEW—William G. H. Finch, New York, N. Y.—Construction permit for a new high frequency broadcast station to be located at 1819 Broadway, New York, New York, to be operated on 117910 kc., 1 KW power, unlimited time. Special emission. Amended: To request 43000 kc.

WSXAD—WHEC, Inc., Rochester, N. Y.—License to cover construction permit (B1-PHR-81) as modified, for new high frequency broadcast station. Amended: Re: tubes in last stage of equipment.

WSXV—The Cincinnati Times-Star Co., Cincinnati, Ohio.—Modification of construction permit (B2-PFB-15) as modified, for new facsimile broadcast station, requesting extension of commencement and completion dates from 5-6-40 and 11-6-40 to 5-6-41 respectively.

NEW—St. Lawrence Broadcasting Corp., Ogdensburg, N. Y.—License to cover construction permit (B1-P-2246) as modified for a new station.

NEW—St. Lawrence Broadcasting Corp., Ogdensburg, N. Y.—Authority to determine operating power by direct measurement of antenna power.

1460 Kilocycles

NEW—Pan-American Broadcasting System, Inc., Hollywood, Fla.—Construction permit for new broadcast station to be operated on 1580 kc., 250 watts, unlimited. Amended to change frequency to 1420 kc., and changes in antenna.

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Modification of construction permit (B5-P-2551) for a new station, requesting approval of antenna and transmitter site at 2 miles southeast of Marysville at intersection of Riverside Ave. and Island Road, Marysville, and change location of studio to same as transmitter.

KLMR—Harold M. Finlay and Mrs. Eloise Finlay, La Grande, Ore.—Voluntary assignment of license and construction permit from Harold M. Finlay and Mrs. Eloise Finlay to Harold M. Finlay.

1500 Kilocycles

NEW—Robert V. Lee, Bradenton, Fla.—Construction permit for new broadcast station on 1120 kc., 250 watts, unlimited time. Class IV. Amended: To change frequency from 1120 to 1500 kc., and changes in antenna.

MISCELLANEOUS

NEW—April 26, 1940
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Candy & Sales Company—See Blue Ribbon Candy Co., Inc.

Blue Ribbon Candy Company, Inc., also trading as American Candy and Sales Company, 124 Tenth St., N. E., Atlanta, is charged with distribution to wholesale dealers, jobbers and retail dealers, assortments of candy so packed and assembled as to involve the use of games of chance or lottery schemes in their sale to ultimate consumers. Certain assortments, the complaint alleges, are composed of bars of candy of uniform size together with a device commonly called a push card. Concealed within disks on the card are numbers ranging from 0 to 3 inclusive, and the purchaser pays 1 to 3 cents, or nothing, according to the disks punched, the price of the candy being determined wholly by lot or chance. 4091

Capital City Candy Company—R. L. Jackson, trading as Capital City Candy Company, 506-508 Decatur St., S. E., Atlanta, is charged with distributing to wholesale dealers, jobbers and retail dealers assortments of candy and also push cards, which, when punched, determine the prices of the bars of candy, wholly by lot or chance. 4092

Chicago Technical College, 118 East 26th St., Chicago, distributor of home-study courses in drafting, air-conditioning, refrigeration and building, is charged, in a complaint with misrepresentation.

In advertisements in newspapers and magazines, and in radio broadcasts, the respondent is alleged to have represented, among other things, that "This course is issued to the student and will be accepted by the Chicago Technical College as payment in full for the course"; that "Inside Facts on Drafting", provided that this certificate is accompanied by his enrollment for the college home study courses in drafting; that employment and consultation services are offered free to students and graduates; that Chicago Technical College is an accredited school and the leading school for builders, and that the home-study training in air-conditioning and refrigeration will qualify one for the top-ranking positions in the air-conditioning and refrigeration field. 4089

Federal Compress & Warehouse Company—Alleging a combination or conspiracy tending to restrain competition and create a monopoly in the compressing and storing of cotton and in the interstate sale of jute or burlap bagging and steel bands used in compressing cotton, a complaint has been issued against Federal Compress & Warehouse Company, Memphis, Tenn., R. L. Taylor, chairman of its board of directors, other of its officers and agents, and four cotton ginning companies which it directly or indirectly owns or controls through the respondent Taylor.

Federal Compress & Warehouse Company, either directly or indirectly through the respondent Taylor, owns and operates 80 compress plants in Arkansas, Louisiana, Tennessee, Mississippi, Missouri and Texas and cotton ginning subsidiaries in Mississippi, Louisiana and Arkansas, according to the complaint.

Through a combination or conspiracy among the respondents, the complaint alleges, Federal Compress & Warehouse Company and R. L. Taylor have erected and operated cotton gins, charging fees for ginning which are higher than the costs of providing the service in the same territory and below actual operation cost, for the purpose and with the effect of driving competitors out of business and of obtaining the cotton so ginned for the respondents' various cotton plants, and to enable Federal Compress & Warehouse Company, at its compress plants, to sell the jute or burlap bagging and steel bands or ties sold and used in connection with the compressing of such cotton.

The complaint alleges that through its officers and agents, the individual respondents Hester, Wade, Cheairs, Brown and Schneider, Federal Compress company attempted to acquire the stock held in competing compress enterprises by cotton growers and independent gin operators through threats that their stock would decline in value and become worthless as a result of the Federal Compress company's competitive ginning activity; that the respondents threatened to erect gins and to gin cotton below cost or free of charge in competition with such independent ginners unless they shipped their ginned cotton to Federal Compress company in preference to competitive compress plants, and that by such threats the respondents caused cotton gin owners to ship the cotton ginned by them to Federal Compress plants in preference to the competitive plants in which they were financially interested. 4090

Wholesale Liquor Distributors' Ass'n of N. C.—A complaint has been issued charging the Wholesale Liquor Distributors' Association of Northern California, Inc. and the Liquor Trades' Stabilization Bureau, Inc., both of San Francisco, their officers, directors and members, and 16 corporations selling liquor at wholesale in northern California and western Nevada, with restraint of trade through maintenance of a price fixing policy and discrimination against certain classes of dealers.

Respondent officers and directors of the Wholesale Liquor Distributors' Association of Northern California, Inc. are: J. M. Tonkin, San Francisco, president; J. F. Ferrari, Bakersfield, Calif., vice president; Max Sobel, San Francisco, secretary-treasurer; Sante Quattrin, San Francisco, executive secretary, and A. M. Berberian, Fresno, Calif., Chas. Bigley, San Jose, Calif., H. L. Hanson, and J. J. Bottaro, both of Sacramento. Thomas Lenehan, R. F. Jose, C. L. Sauer and Sherwood Coffin, all of San Francisco, Floyd Trombetta, Santa Rosa, Calif., Andrew Rosaia, Eureka, Calif., and John Pingree, Oakland, Calif., directors.

The complaint points out that McKesson & Robbins Inc., Haas Brothers, Rathjen Bros., Inc., Tonkin Distributing Company, and Collin-Redington Company are members of the Wholesale Liquor Distributors' Association and representative of its numerous members. The respondent Liquor Trades' Stabilization Bureau, Inc. is composed of distillers, importers, distributors and retailers, among whom are the respondents, who are representative of its membership.

The complaint alleges that the respondents, collectively and through the association and the bureau, conspired to suppress competition in the wholesale liquor trade in the "Northern California Territory" (northern California and western Nevada) by preventing cooperative buying associations, small jobbers, wholesalers and others classified by them as "irregular" distributors, from obtaining alcoholic beverages. This allegedly was accomplished by refusal to sell to such dealers, boycotting and threatening boycott of the respondents' or other defendants' goods, and threatening to disseminate information to the trade concerning the dealers so boycotted or threatened with boycott for selling to "irregulars." 4093
CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

John B. Canepa Company—In the case of John B. Canepa Company, 30 West Grand Ave., Chicago, manufacturer of macaroni and spaghetti products, it has been found that prior to July 12, 1938, it had caused booklets and other advertising matter to be distributed in the various States, containing such advertisements as: “I hate to brag, but only the finest macaroni is made long”; “I hate to brag, but only the finest spaghetti is made long”. Since that time the advertisements have been modified to “I hate to brag, but genuine macaroni is made long”; and “I hate to brag, but genuine spaghetti is made long.”

It was found that such statements and representations are misleading and unfair, and that in fact genuine macaroni and spaghetti products of the finest quality are made in both long and short lengths, and that macaroni and spaghetti of the finest quality are in some instances first made in long lengths and thereafter cut into short lengths, the length being no criterion of the quality of the product.

The respondent corporation is ordered to cease and desist from further representing that the length in which macaroni or spaghetti products are manufactured or sold by the respondent or any of its competitors is in any way indicative of the genuineness or quality of such products. (3744)

Eileen-Joy Fashions, Inc.—See Teen-Frocks, Inc.

General Distilleries Corporation, 77-79 Homestead Ave., Hartford, Conn., has been ordered to cease and desist from misusing the word “distilleries.”

General Distilleries Corporation was organized in 1934, and its officers are Abraham Abrahamson, president, Julian Shoer, treasurer and manager, and David L. Abramson, secretary. While its charter is sufficiently broad to permit it to engage in almost all phases of the liquor business, the Commission finds, until September 26, 1938, it was engaged solely in the blending of whiskies, wines, gins and other spirituous beverages and their sale at wholesale. In September, 1938, it was granted a distiller’s basic permit authorizing it to produce brandy by distillation, since when it has produced, bottled and sold brandy produced in a distillery which it leases in Burlington, Conn.

Of the whiskies purchased by it in bulk from distillers, the findings continue, it bottles some straight without alteration, and other whiskies after blending or rectifying. The gin manufactured by it through the process of redistillation of purchased alcohol over juniper berries and other aromatics, is bottled and sold to the trade and constitutes approximately 15 per cent of the volume of its business. The whiskies, both straight and blended, constitute 50 to 60 per cent of its trade and the brandy which it produces constitutes the balance. The Commission finds that the respondent never has produced or manufactured distilled spirits except the brandy produced since 1938. The rectification of alcoholic spirits by the respondent in the production of gin does not make or constitute it a distiller or a distilling company as defined by Section 2427 of the Revised Statutes of the United States regulating Internal Revenues, according to findings.

The Commission orders that the respondent, General Distilleries Corporation, in connection with the offering for sale, sale and distribution of whiskies, gins or other spirituous beverages (except whiskies actually distilled by it, and except gins produced by it through the process of rectification whereby alcohol purchased but not produced by the respondent is redistilled over juniper berries and other aromatics) forthwith cease and desist from representing, through the use of the word “Distilleries” or any other word of like import, in its corporate name, on its stationery, advertisements, circulars, labels and other documents in which its products are mentioned, shipped, or in any other way (a) that the respondent is a distiller of such whiskies, gins or other spirituous beverages; or (b) that the whiskies, gins or other spirituous beverages were by it manufactured through a process of distillation; or (c) that the respondent is, that the length in which macaroni or spaghetti products are by it manufactured by a process of original and continuous distillation from mash, sort or wash, through continuous closed pipes and vessels until the manufacture thereof is completed, unless and until the respondent shall actually own, operate or controls such a place or places. (2445)

Heifler & Jackson—Rose Heifler and Fred Jackson, doing business as Heifler and Jackson, 740 Bergen St., Brooklyn, engaged in selling and distributing a preparation for treatment of the scalp and hair under the trade name of “Morgan’s Pomade,” have been ordered to discontinue certain representations concerning their product.

In advertising material, circulars and pamphlets, the Commission finds, the respondents represented: “Undoubtedly the finest remedy for gray or faded hair is Morgan's Pomade. This is not a dye, but a special compound which when massaged into the roots of gray, or grayish hair will cause it to turn a natural, or near natural shade of gray.”

The Commission finds that the preparation is a lead and sulphur dye which, when applied to gray hair, dyes the exterior of the hair shaft. Use of the preparation does not supply to the hair shaft the color pigments, a deficiency of which material causes gray hair. The advertisements therefore fail to reveal that the application of “Morgan’s Pomade” to tender, injured or broken skin may result in serious injury to the health of the user. (3893)

Indian River Medicine Company, La Follette, Tenn., engaged in compounding, selling and distributing a medicinal preparation designated “Scall's Indian River Tonic,” has been ordered to cease and desist from representations concerning its product.

In advertisements in newspapers, periodicals, and through broadcast continuities, the Commission finds, the respondent has represented, among other things, that the preparation will prevent and cure colds and build up resistance to other minor ailments; that it is a competent and efficient treatment for rheumatism, asthma, sleeplessness, ailments of the liver, kidneys and stomach, and that it affords positive or certain relief from chronic ailments.

Findings are that the tonic will not perform the things claimed for it and will not afford positive or certain relief for any ailment.

The respondent corporation is ordered to cease and desist from representing that the preparation will prevent or cure colds; build up resistance to other ailments; has any therapeutic value in the treatment of sleeplessness, nervousness, digestion, liver, kidney or stomach disorders, asthma, or aches or pains in the head or joints; is composed of natural vegetable ingredients; will increase weight, restore strength or build up the health of users, or that it affords positive or certain relief for any ailment. (3940)

Ladies Aid Company—See Progressive Medical Company.

Lenoir Solvent Company—See Lenoir Woodfinishing Company, Inc.

Lenoir Woodfinishing Company, Inc.—Lenoir, N. C., and Arthur G. Spencer, individually and trading as Lenoir Solvent Company, have been ordered to cease and desist from unfair business practices in the payment of money and things of value to officials and employees of their customers, without the consent of the customers.

Lenoir Woodfinishing Company, Inc., has, since 1938, been engaged in the manufacture of paints, varnishes, stains and various wood finishing products, and in their sale to business concerns and furniture manufacturers. Prior to the time of incorporation of Lenoir Woodfinishing Company, Inc., Arthur G. Spencer, now its president and sales manager, was engaged in the manufacture and sale of similar wood finishing materials under the partnership name Lenoir Solvent Company.

The Commission finds that in the conduct of their businesses the respondents have given substantial sums of money and other things of value to certain officials and employees of their customers.
or prospective customers, without the knowledge or consent of the customers, for the purpose of inducing the officials or employees to purchase or recommend the purchase of the respondents' products. In some instances, the findings continue, certain employees of customers were given 7 or 10 per cent of the purchase price of garments purchased from the respondents by such customers.

The respondents are ordered, in connection with the sale of their products, to cease and desist from giving sums of money and other things of value to officials and employees of the respondents' customers or prospective customers, without the knowledge or consent of the customers, for the purpose of inducing such purchases. (4038)

Progressive Medical Company—Blanche Kaplan, trading as Progressive Medical Company and as Ladies Aid Company, 3944 Pine Grove Ave., Chicago, distributor of medicinal preparations for delayed menstruation, has been ordered to cease and desist from false and misleading advertisements concerning her products.

In advertisements and by means of booklets, circulars and other printed matter distributed in the various States, the Commission finds, the respondent has represented that her medicinal preparations known and designated as "Ladies' Aid No. 2, Ordinary Strength", and "Ladies' Aid No. 3, Extra Strength", are cures or remedies for delayed menstruation and are non-irritating, mild, efficient and specific treatments therefor.

Last January the Federal Trade Commission was granted a preliminary injunction by the United States District Court for the Northern District of Illinois, Eastern Division, enjoining the respondent from disseminating any advertisement, for the purpose of inducing or procuring which the unqualified term "Satin", "Taffeta", "Crepe de Chine", "Crepe" or any other descriptive terms of similar import indicative of silk, were used in the advertisements, or under conditions that are customary or usual. The preliminary injunction was effective pending issuance by the Commission of a complaint and final determination of the action under its regular procedure.

The respondent is now ordered by the Commission to cease and desist from disseminating any advertisement for the purpose of inducing or which is likely to induce, the purchase of the preparations, which the petition stated might cause serious and irreparable injury to health if used under conditions prescribed in the advertisements, or under conditions that are customary or usual.

The respondent also stipulates that it will desist from using the unqualified term "Silk", or other similar terms indicative of silk, to designate any fabric or product not composed wholly of silk, provided that such terms are truthfully employed to describe the type of weave, construction or finish, they must be qualified by using in letters of equal conspicuousness words accurately describing the fibers or materials from which the products are made.

Further prohibited, under the order, is use of the unqualified term "Silk", or other similar terms indicative of silk, to designate a fabric or product not composed wholly of silk, provided that in case of a fabric or product made partly of silk and partly of other materials, such terms may be used as descriptive of the silk content when immediately accompanied by words of equal conspicuousness accurately describing such other materials in the order of their predominance by weight, beginning with the largest single constituent.

Use of the phrase "Pure Dye" or other words of similar meaning to describe fabrics not composed wholly of unweighted silk, also is forbidden under the order, provided that in case of a fabric or material composed in part of unweighted silk and in part of other materials, the words or similar words are used which describe the silk content if there is included in immediate conjunction there with and in letters of equal size and conspicuousness, words accurately designating each constituent fiber or material thereof in the order of its predominance by weight, beginning with the largest single constituent.

The advertisement and sale of fabrics, garments or other products composed in whole or in part of rayon, without clear disclosure of the rayon content, also is prohibited, and when such fabrics or products are composed in part of rayon and in part of other fibers or materials, such fibers or materials, including the rayon, are to be named in the order of their predominance by weight, beginning with the largest single constituent. (4038)

STIPULATIONS

Following stipulations have been entered into by the Commission:

American Standard Corporation, 122 East 42nd St., New York, engaged in selling incandescent lamps, agrees to cease and desist from the use on its stationery and other printed matter or in any other way of the word "Manufacturers" as descriptive of the business conducted by it, and from use of the word "Manufacturers" or any similar words which tend to convey the belief to purchasers that it actually owns and operates or directly and absolutely controls the plant or factory in which its products are made. (2745)

Atlas Wood Preservative Company, Inc., 332 Madison Ave., Memphis, Tenn., distributor of a chemical preparation intended for protection of wood from termites, decay and fungi, has entered into a stipulation to discontinue certain representations.

The respondent agrees to cease representing that its preparation, "Xter-Mite," when applied as directed to woods, will embalm or adequately preserve and thoroughly penetrate, prevent decay and also attacks by termites or insects, prevent their return, and increase the strength of the wood, and to discontinue use of the coined word "Permanize" or words of similar meaning implying that "Xter-Mite" remains permanently in or on the wood and will not dry out or lose its effectiveness.

Other representations which the respondent agrees to discontinue are that "Xter-Mite" has received the approval of leading architects, engineers, the Federal Housing Administration or others, when such is not a fact; that termites or other wood boring insects cause serious damage in four to six months, will practically ruin a structure before their presence is discovered, and are in all woods; that termites become established throughout the United States in 1936 or any other year, unless there is scientific or other accepted authority for this claim; that there are 44 species of destructive termites in the United States or that one female termite lays 80,000 eggs a day; that termites or the termite "civilization" are superior to the human race, and that many or all States have enacted laws under which termite eradicating operators are licensed, when such is not a fact.

The respondent also stipulates that it will desist from use of the word "guarantee in connection with the advertisement or sale of its products, unless whenever used, clear disclosure be made of exactly what is offered by way of security, as for example, refund of purchase price. (2747)

Felder Brothers, Inc., 583 Broadway, New York, distributor of leather and imitation leather goods and novelties, has entered into a stipulation in which it agrees to cease employing the phrase "Genuine Leather Composition" as descriptive of any article not composed of genuine leather, and from use of the words "Genuine" or "Leather" or words of similar import in a manner tending to deceive purchasers into believing that products containing other materials are actually made of leather.

The stipulation points out that the respondent designated certain billfolds as "Genuine Leather Composition, Barkhyde," when in fact they were composed of a paper material with which leather fibers had been combined, sometimes known to the trade as "Compothet," and that this material was neither genuine leather nor made from the hide of any animal.

The respondent also stipulates that it will desist from using the word "Barkhyde" as a trade name for its products; from use of the expression "Bark" or of any other trade name, coined name or other word descriptive of a product as being the hide of an
animal which is in fact non-existent and from use of the word "Hyde" or any other word implying that a composition fabric is composed wholly of the hide of any animal. (2753)

**H & L Conversions—W. M. Houston and M. Logan, trading as H. & L. Conversions, 2112 Addison St., Berkeley, Calif., have agreed to a stipulation to discontinue certain representations in the sale of a mechanical device permitting the use of either fuel oil or gasoline in the ordinary gasoline engine and designated by various names, including "Dies-L-Gas," "Semi Diesel Fuel Oil Conversion Unit," "Des-A-Gas Unit," and "H. & L. Fuel Oil Conversion Unit."

Among other representations, the respondents agree to cease advertising by use of the words "Semi-Diesel" or otherwise, that the "H. & L. Fuel Oil Conversion Unit," when attached to an ordinary gasoline engine, converts it into an engine functioning in the manner of a "Semi-Diesel" engine, or, by use of the words "Des-A-Gas," "Dies-L-Gas" or otherwise, that the conversion unit converts an ordinary gasoline engine into an engine functioning in the manner of a Diesel engine.

The respondents also agree to cease advertising that reliable evidence at present indicates that "Diesel engines will be in our automobiles within a year"; that by use of the respondents' device an ordinary gasoline engine will be capable of delivering as much power or more power per gallon of fuel oil than it ordinarily could do on gasoline without the use of the device, and that with the use of the respondents' product the performance of a motor on fuel oil or on low grade gasoline will be equal to or superior to that of the same motor on a good grade of gasoline. (02542)

**Hook-Fast Specialties, Inc., Providence, R. L., dealer in buckles, belts, bracelets and other specialties designated "Hook-Fast Products," has entered into a stipulation in which it agrees to discontinue certain representations in the sale of its products.

The respondent agrees to cease advertising that it sets agents up in business for themselves; that the profits, earnings or income will be big or substantial or will come in daily or increase weekly; that prospective agents can make profits or earnings within a specified time which are in excess of the average net profits or earnings therefore consistently made in like periods of time by the respondent's active, full-time agents under normal business conditions.

The respondent also stipulates that it will cease employing the words "free" or "without cost" to describe merchandise offered as compensation for distributing the respondent's products, unless all terms and conditions are clearly stated and there is no deception as to price, quality or other features of the merchandise, or as to services to be performed in connection with obtaining such merchandise. (02545)

**International Dress Company, Inc.—Two New York corporations, one distributing dresses, the other selling silk and rayon dress goods, have entered into stipulations in which they agree to discontinue certain representations in the sale of their products. The respondents are International Dress Company, Inc., and Knickerbocker Textile Corporation, both of 1400 Broadway.

Each respondent corporation agrees to cease selling articles made of rayon without disclosure in advertising matter, forms and literature that the material of which they are composed is rayon. The stipulations provide that if the word "Celanaise" is used to designate a product composed of rayon, it shall be immediately accompanied by the word "Rayon" in equally conspicuous type to clearly indicate that the article is rayon; for example, "Celanese Rayon."

International Dress Company, Inc., also stipulates that it will desist from use of the word "Manufacturers" as descriptive of its business. The stipulation points out that this corporation is not a manufacturer of dresses or other products and neither owns, operates nor controls machinery or equipment for making dresses but purchases materials which it turns over to independent contractors operating such plants, for transformation into dresses at stated prices. (2751-2752)

**Juliette Marglen Products Company, 6638 Sunset Blvd., Hollywood, Calif., engaged in selling a line of toilet preparations for use on the fingernails, known as "Juliette Marglen Seal-O-Wax," "Juliette Marglen Nail-O-Wax," "Juliette Marglen Wax-0-Named," "Juliette Marglen Creme-O-Wax," and "Juliette Marglen Nail-O-Wax Remover," has agreed to cease and desist from use of the word "Wax" as part of the trade name or designation for any of the products, and from use of the word "Wax" in any way to imply or convey the belief to purchasers that the products are composed of wax, or of any statements or representations tending to convey the belief that they contain wax in such amount as to form a continuous wax coating such as would afford protection to the nails to which applied, or of any representations that the products will afford any appreciable aid in keeping the cuticle soft and pliable, or that their use will encourage the growth of stronger or thicker nails, or have a stimulating effect on the nails, or prevent cracking, breaking or splitting of the nails of the user. (2748)

**J. W. Oneal Chemical Company—John W. Oneal, trading as J. W. Oneal Chemical Company, Martins Ferry, Ohio, in connection with the sale and distribution of "To-He-To Ointment," has agreed to cease use in advertising matter or otherwise of representations implying that the product is a competent or effective remedy for colds, headaches, sore throat, chrop, pneumonia, chized hands, itching piles, sore muscles, chilblains, bruises, rheumatism or hay fever, or that it will do more than serve as a palliative in connection with certain of these conditions. The respondent also agrees to discontinue the use of the word "Chemical" as part of his trade name or otherwise to imply that he is a chemist or employs chemists in the compounding or manufacture of the product, when these are not the facts. (2742)

**Emil J. Paidar Company, 1120 North Wells St., Chicago, in connection with the sale of chromium plated steel furniture, agrees to desist from use of the trade designations or brands "Chrome-tube" or "Chromitube" as descriptive of products not composed throughout of chromium metal, and from use of the words "Chrome" or "Chromed" or any similar coined word as descriptive of the metal content of a product not chromium throughout. The stipulation provides that if, in referring to products made of steel which is merely coated or covered with chromium, the words "Chrome" or "Chromed" or words of similar import are used as descriptive of the coating or covering, such words are to be immediately accompanied by another word such as "plated" so as to indicate clearly that the products are not composed throughout of chromium. (2757)

**Presto Company—Maurice A. Goodman, trading as The Presto Company, 1917 Lexington Ave., New York, engaged in the sale of furniture and of a cleaning fluid designated "Presto," has agreed to cease representing or implying by use of the word "makers" or any similar words, that he actually owns, operates or controls the plant in which the product is prepared, and to discontinue employing the statements "Presto Cleans Clean," "Removes all stains quickly and permanently," or any other similar statements, when in fact the use of the product will not return to their original appearance all kinds of fabric materials regardless of the nature of the stain or marking to which the materials have been subjected. The respondent also agrees to cease use of the term "non-inflammable" or any similar words as descriptive of the cleaning fluid. (2743)

**Knickerbocker Textile Corp.—See International Dress Co., Inc., April 26, 1940**
Senpry Joveiiay Company, 650 Turner Ave., N. W., Grand Rapids, Mich., has entered into a stipulation in which it agrees to cease certain representations in the sale of "Sem-Pray Jo-Ve-Nay", a cosmetic preparation.

The respondent agrees to desist from the representation that its product is a complete beauty treatment; that it will smooth away or remove lines from the skin or change the normal texture of the skin to make it seem finer; that the preparation will keep the skin young and that it is a competent treatment for blackheads and will remove all traces of foreign matter from the pores. (02544)

Stafford Publishing Company, 87 Walton St., Atlanta, Ga., engaged in the sale and distribution of books, including two sets of encyclopedias has agreed to discontinue use of the word "Publishing" as part of its corporate or trade name or in any way tending to convey the belief that the business conducted by it is that of a printer or publisher, or that it actually owns, operates or controls the plant in which the publications distributed by it are printed and published. The respondent also agrees to cease use of the trade name "Publishers Credit Syndicate" on its stationery or otherwise for the purpose of making collections of delinquent accounts of customers who have subscribed for the encyclopedias when in fact no such collection agency exists or is employed by the corporation, and to discontinue use of the word "free" or any other term of similar implication as descriptive of products offered by the corporation in connection with the sale of its "deals," when in fact the products are not given free or as a gratuity, but the cost thereof is included, either in whole or in part, in the price of the "deals." (2746)

Wellington Manufacturing, Inc., 28 West 25th St., New York, distributor of men's haberdashery, has entered into a stipulation in which it agrees to cease certain representations in the sale of its products.

The respondent agrees to discontinue using the word "Manufacturing" as part of its corporate or trade name, the word "Manufacturers" as descriptive of its business, and any other words implying that it manufactures the products it sells or owns and operates a factory in which they are made, when such are not the facts.

The respondent also agrees to cease representing by means of tags, advertising matter or oral presentation, that fabrics of domestic manufacture are "Imported Fabrics": to cease employing the words "Pure Silk of Heavy Quality" or "Silk" independently or as part of or in conjunction with other words in trade designations, advertisements or otherwise, to describe fabrics or merchandise not made of silk; to desist from offering for sale any product made of rayon without clear disclosure of such rayon composition; from branding or otherwise designating a product as all wool when its fiber content is not wool throughout; from describing neckties or other products not made or fashioned according to the craft of a tailor as "Hand Tailored"; and from representing that the goods it sells are available to the purchaser at manufacturer's prices or at manufacturer-to-consumer prices, or otherwise implying that its customers save a middleman's profit at the prices quoted. (2755)

Western Mills, Inc., 912 First St., Sioux City, Iowa, has entered into a stipulation to discontinue certain representations in the sale of stock feeds.

The respondent corporation, a manufacturer, agrees to cease using the word "Meat", either alone or in connection with the words "Scraps" or "Meal", in the trade name for a product which is not composed wholly of meat, meat scraps or meat meal, unless, if the product is composed in substantial but less than a predominant part of meat or meat products, and the word "Meat" is used to refer to such meat content, it shall be made to appear clearly that the product does not consist entirely or in predominant part of meat or meat products or meat meal. (2761)

Wigder Manufacturing Company, 26 Wickliffe St., Newark, N. J., agrees to cease advertising that its manicuring instruments are "rust proof", or, by use of the term "rust proof" or any other expression of similar import, that articles which have not been scientifically processed in a manner that will absolutely prevent the rusting thereof, are rust proof. (2756)

FTC CLOSES CASE

The Federal Trade Commission has closed without prejudice its case against Floral Art Card Company, Inc., 110 Wooster St., New York, which had been charged with violation of the Federal Trade Commission Act in the sale of greeting cards.

The closing order recites that the respondent is out of business and the corporation dissolved.

The Commission closed its case without prejudice to its right to reopen it and resume prosecution, should future facts so warrant.
BMI Developments

At ASCAP's annual dinner last week, Gene Buck took down the old blunderbuss and got in a little target-practice. He was, as usual, aiming at the broadcasters and, as usual, no hits were registered.

According to Variety he "defied the broadcasters to produce a single instance where any American industry was able to purchase the raw material, on which it lives, anywhere 'for such a ridiculously low percentage of its gross earnings as that requested from radio by the Society.'"

The broadcasters might in turn ask Mr. Buck to produce any other instance of an American industry which is being forced by a monopoly to buy raw material which it does not need and cannot use.

A recent, widely circulated magazine article showed that 84% of daytime network programs are non-musical. Yet they are all taxed by ASCAP for "raw material" that is not used.

Approximately 22% of commercial time makes use of Mr. Buck's "raw material." On that ground his organization demands an amount estimated by Variety to be approximately 50% of the networks' profits. "Ridiculously low percentage!" wails Mr. Buck.

Mr. Buck is actually a man of unflinching nerve. In his speech that night he charged that the radio receipts, on which the broadcasters had agreed to pay 5%, during 1939 were about $130,000,000 and that the broadcasters had nevertheless paid only about $4,000,000.

The statement took the nerve of a Baron Munchausen. It is phony on its face. If it were true, of course, ASCAP would file suit for its extra $2,500,000 instead of twiddling its thumbs in despair while Gene Buck does his Demosthenes impersonation.

The answer is that every radio station paid its 5% as agreed and Buck is simply grousing because the contracts were not made stiffer than they were.

Carl Haverlin, BMI's station relations director, has made a statistical analysis of the position of BMI and the results are a cause of great enthusiasm. He finds that a large majority of the broadcasting industry is solidly behind the company. Commercial stations, making up 53.2% of the total number and doing more than 80% of the dollar-volume of business are now committed to the enterprise.

This total includes 73.7% of all CBS stations, 68.1% of NBC, 45% of Mutual, 39.4% of the independents.

Arthur H. Gutman has joined the staff of BMI as director of arrangements and publication. He is one of the best known arrangers in the country and an outstanding composer. The list of songs he has arranged reads like a section from a list of the leading hits of the last eighteen years—"What'll I do?"—"Always"—"All Alone"—"Russian Lullaby"—"Underneath the Harlem Moon"—"Yes, Sir, That's My Baby!"—and so on into the hundreds.

He was head arranger for ten years for Irving Berlin, Inc., for four years for Crawford Music Co., and for the past four years with Local 802, the important New York unit of the American Federation of Musicians.

Under a pen-name he himself has written many popular numbers and under his own name he has produced notable symphonic works. His Third Symphony is to be played by the New York Philharmonic under Frieder Weissman at the Lewisohn Stadium in New York this summer; his string suite will be broadcast by an orchestra under Howard Barlow on the Everybody's Music program during the summer; and his Second Symphony will be played by the Pittsburgh Orchestra under Fritz Reiner next November.

Mr. Gutman is a living embodiment of the present trends of progress in American music. The old idea that "popular" music was not "good" or that good music could not be popular is going the way of Prohibition, mah-jong, and jokes about Haile Selassie. America is swinging around to the point where people will question whether music is "good" unless it is also popular. One evidence of that trend is that the same men write and play both for dance-bands and for symphony orchestras. Benny (Continued on page 4214)
Goodman plays Mozart at New York's Town Hall. Arthur Gutman arranges BMI songs for dancing.

BMI steps into the lead in the progress of American music.

CBS issued another memorandum to its affiliated stations on the ASCAP situation last week. Herbert V. Akerberg, vice president in charge of station relations signed the letters.

Mr. Akerberg's letter:

DEAR MR. --;

Since Mr. Klauber's letter of April second, the situation on the music front is proceeding entirely satisfactorily. Broadcast Music, Inc., has secured the Cole catalogs and has closed other deals, and current releases of new popular numbers are now being made available to us. Our own efforts in the past three weeks have resulted in substantial elimination of ASCAP numbers on our network sustaining programs.

You will also be interested to know that, in spite of the fact that no response was requested to Mr. Klauber's letter, a large number of stations have voluntarily written expressing their appreciation and endorsement of Columbia's position. Other stations to whom we talked since this letter was received by them have also taken the same position. No station has indicated any disposition to accept the ASCAP bait.

As many have expressed it to us, this unanimous reaction is conclusive proof of the complete failure of the old ASCAP tactics of “divide and rule.” This first, and perhaps decisive, battle indicates the value the recording artist places on the publicity given their records by radio stations.

E. C. Mills, chairman of the administrative committee of ASCAP, confirmed reports that the society had paid royalties amounting to $5,099,302 to its members during the last year, and $33,187,440 since it first began to realize an actual income in 1921. The figures were given out by Gene Buck, president of the society, at the annual fifteen wired music corporations and closed dinner on April 24.

Mr. Buck's report also showed that during 1939 the society had issued licenses to 14,836 theaters, 678 commercial radio stations, 9,991 restaurants, 1,852 hotels, 2,895 dance halls, 2,257 miscellaneous commercial establishments.

From these licensees the society received a gross income of $6,565,592.18, which, after being reduced by 19 percent for administrative overhead and another 10 percent for the foreign affiliates of the society, was distributed among the members. The first royalties which the society gave out, in 1921, amounted to $81,883, as compared to the present $5,099,302. Of the royalties for 1939, approximately $4,000,000 came from radio, the report stated.

The BMI board met April 30, but made no statement after the meeting.

ORCHIDS TO DORSEY

The correspondence which we print below speaks volumes on the broadcasting of phonograph records. The artists need radio's plugs. That goes for the songwriters, too. Orchids to Tommy Dorsey for being a realist! Here are the letters:

"April Twenty-fourth, 1940.

Mr. Neville Miller
National Association of Broadcasters
Washington, D. C.

DEAR NEVILLE:

I know that all stations are delighted with the trend the phonograph record situation has taken. I have felt all along that if a sufficient number of stations discontinued the playing of records that the manufacturers would soon realize the advantage of this promotion and understand fully that they could not "horsewhaggle" the stations into paying for the privilege of selling their commodity.

For your files, I am enclosing copy of a letter from Mr. Jack Egan, Public Relations Manager for Tommy Dorsey. This clearly indicates the value the recording artist places on the publicity given their records by radio stations.

Sincerely yours,

E. K. CARGILL,
President-Manager,
Radio Station WMAZ.

"DEAR SIR:

. . . It has always been our desire to cooperate with those who help in the promotion of Tommy Dorsey and his band and wish to offer any cooperation I might be able to give in this respect at this time.

Naturally, we'd like to see you use Tommy's records on some of your wax shows and assure you there will be no complaint from this quarter as long as it's okay with the Victor people for the stations to play the recordings of their artists. . . .

Trusting we may find our way to your turntables again in the Victor-Bluebird packages and with many thanks for your kind favors, I remain,

Cordially,

JACK EGAN,
Public Relations for Tommy Dorsey.

"April 29, 1940.

Mr. E. K. Cargill, President
Radio Station WMAZ
Macon, Georgia

DEAR E. K.:

Many thanks for your letter enclosing copy of letter from Jack Egan. I believe that the last few months have proved conclusively what we all knew, i.e., that the playing of records on the radio really is beneficial to the artists and the record companies.

With kindest regards, I am,

Very truly yours,

NEVILLE MILLER."
Radio Festival planning is getting into high gear with more stations reporting activity and progress, east, west, north and south.

From one end of the "Father of Waters" to the other, from the Atlantic to the Pacific and in-between, station executives and their staffs are hard at work to insure a job well done.

Governor Payne Ratner, of Kansas, was the first state chief executive officially to proclaim National Radio Festival. Date for observance of the event in Kansas was announced, on May 1, for the week of May 20-25.

The first Mayor to proclaim a municipal Radio Festival Week, as previously reported, was Mayor Ralph L. Lewis, of Greensboro, N. C. Major Edney Ridge, manager, WBIG, who negotiated this deal, has secured similar proclamations from the Mayors of Burlington, Reidsville, High Point, Gibsonville and Asheboro.

At a joint meeting stations decided to hold National Radio Festival the week of June 3-8.

At the first essay broadcast is scheduled over WTIC, 7:45-8:00 p.m., on May 7, by Dr. Grace. On subsequent days, over the other stations, will be played his recording which is to be made at the time of the WTIC broadcast.

The police department has been tied into Radio Festival through an additional prize of $100, provided by WTIC, will compensate for entries received from the station's service area outside of Connecticut in Western Massachusetts, Vermont and New Hampshire.

When Robert J. Stratton, program director, received news of Radio Festival, he and the staff immediately went to work to produce an outstanding celebration. As a result of their planning the Durham interpretation will greet the public during the week of June 3-8.

The essay contest will be conducted in the city schools. All essays will be received at WDNC by May 27. Adequate prizes are provided.

The police department has been tied into Radio Festival through a two-way police radio demonstration which will be broadcast.

At a joint meeting stations decided to hold National Radio Festival the week of June 3-8.

Dr. Alonzo Grace, state commissioner of education, will carry the torch in the Essay Contest. He will deliver, by radio, the basic information for students who enter the competition.

The first essay broadcast is scheduled over WTIC, 7:45-8:00 p.m., on May 7, by Dr. Grace. On subsequent days, over the other stations, will be played his recording which is to be made at the time of the WTIC broadcast.

Radio sets for all winners from the sixth grade through high school have been provided for award to Connecticut students. Other plans are in the making, with James F. Clancy, WTIC's sales promotion manager, sitting in the slot.

An additional prize of $100, provided by WTIC, will compensate for entries received from the station's service area outside of Connecticut in Western Massachusetts, Vermont and New Hampshire.

When Robert J. Stratton, program director, received news of Radio Festival, he and the staff immediately went to work to produce an outstanding celebration. As a result of their planning the Durham interpretation will greet the public during the week of June 3-8.

The essay contest will be conducted in the city schools. All essays will be received at WDNC by May 27. Adequate prizes are provided.

The police department has been tied into Radio Festival through a two-way police radio demonstration which will be broadcast.

Windows in the business district will carry appropriate displays and in the station's large studio there will be a week's showing of products from local mercantile establishments.

EL PASO . . . KTSM.

Plans are under way in El Paso Manager Karl O. Wyler said: "You can expect some information on our activities within a short time."

FORT WORTH, TEXAS . . . WBAP.

Harold Hough, general manager, is looking after Radio Festival. Pre-Radio Festival promotion should be underway in the immediate future according to word just received.

MIAMI . . . WQAM.

Norman MacKay, advertising director, writes that WQAM's participation is set for the early part of June. "Congratulations on your aggressiveness."

MINNESOTA.

Minneapolis and St. Paul.

WCCO, WDGY, WLB, WTCN, KSTP, WMIN.

All Twin City broadcasters, at an evening meeting, last week, decided to take on what may be billed as an outstanding observance of Radio Festival. Plans are in the making. Without knowing a single detail, it's a safe bet that the whole Northwest
will know about this industry-wide event. Earl H. Gammons, general manager, WCCO, is to report progress.

MISSOULA, MONT... KGVO... May 12-18.

Because of early school closings, Missoula’s Radio Festival is scheduled for May 12-18 with the last three grammar school grades, high schools and Montana State University cooperating.

Two significant programs are the PTA sponsored show which will discuss: “Using the Radio as a Means of Making the Home the Center of Family Culture, Entertainment and Education,” and the University’s special Radio Festival thirty minute broadcast, on which President George Finlay Simmons will detail: “What Radio Has Done and Is Doing for Montana State University.”

The Mayor of Missoula will proclaim the event. Merchants will decorate their windows and there will be special displays of local and nationally advertised products. Some of the city and county schools are even now engaged in the Essay Contest.

Another contest will be conducted in the State “U” by Program Director James Alden Barber. It will concern dramatic scripts with the winner to be produced by and cast with college students; and broadcast by KGVO.

Several special shows, straight across the board, will be broadcast during the week. Grammar school youngsters will appear in “Citizens of Tomorrow,” in which they will be interviewed. Those to appear before the microphone will be selected by their classmates.

Outlying high school students will appear daily on the “Man on the Street” show.

On another quarter hour series persons from various walks of life will give the answers to what radio means to them.

A lengthy five-minute series will be devoted to service talks by the station’s engineer, sales, service men and radio dealers.

The station itself will sponsor a show along the lines of CBS’ “Americans at Work.” The struggle to launch a commercial program through all stages, from the time of its inception, is the theme selected.

One of the city’s newspaper editors has been booked to discuss: “The Freedom of Radio and the Press.”

The university chorus and orchestra will appear on the half hour program with President Simmons. Invitations to visit the station, both written and over the air, will be extended listeners by A. J. Mosby, president, KGVO.

Institutional posters placed in downtown store windows will explain that advertising is the economic base of the American System of Broadcasting; that merchants using time help support the many hours of radio entertainment available every day.

NEW ORLEANS... WDSU, WJBW, WNOE, WSMB, WWL.

Henry Dupre, special events, WWL, writes that a meeting of all New Orleans broadcasters has been called to iron out other plans for National Radio Festival.

The ceremonies centered about the opening of WWL’s new studios or about May 6, will also be tied in the Radio Festival, according to Mr. Dupre. He has been assured that the Governor of Louisiana and the Mayor of New Orleans will proclaim National Radio Festival Week.

PHILADELPHIA... KYW, WCAU, WDAS, WFL, WHAT, WIP, WPEN, WTEL, WIBG.

Says Joseph Connolly, of WCAU: “There is a meeting here Tuesday (April 30) of the representatives of all local stations at which time plans for cooperative promotion will be laid. Each station will also handle individual promotions, too. We hope to match last year’s performance.”

PITTSBURGH... KDKA, KQV, WJAS, WWSW, WCAE.

Pittsburgh broadcasters are almost ready to announce final plans. Tentative plans are most promising. They’re even talking of a “giant radio ball” as a part of Radio Festival, “in which the orchestra from each of the stations would play . . . in addition there would be a floor show made up of talent of radio, stage and screen stars.”

QUINCY, ILL... WTAD... Week of May 27.

Examinations in public schools necessitate setting of WTAD’s National Radio Festival celebration for the week of May 27.

C. Arthur Fifer, general manager, has arranged for the demonstration-talk to be given before six (6) civic organizations. The basic information for the public school essay contestants will be broadcast on May 28, 29 and 30.

Thank you, Mr. Rothschild and Mr. Fifer.

ROSSELW... KGFL.

Manager W. E. Whitmore will bring National Radio Festival to Roswell and Hobbs, N. M. The demonstration-talk, from Edward A. Allen, president, WLVA, Lynchburg, will be given before the civic clubs in both cities. Other events are being planned. Preliminary information indicates that Mr. Whitmore will receive the state Radio Festival proclamation from the Governor.

WASHINGTON.

Seattle... KIRO, KRSC, KXA, KOMA, KJR, Tacoma... KVI.

Representatives of the above six stations had their first joint meeting some ten days ago and decision was made to get behind National Radio Festival. Special station programs are now being planned, according to word from Peter Lyman, director of public relations, KOMO and KJR, and Dorothy Doernbecher, promotion, KVI.

TOPEKA... WIBW... May 20-25.

In accordance with Governor Payne Ratner’s proclamation, naming May 20-25, National Radio Festival week, Ben Ludy, manager, WIBW, is busy with plans for the event. On one of the special programs, the Governor will undoubtedly appear.

Mr. Ludy sparks to the job search idea. On Sunday, May 19, on the “I Want a Job” program, participants will consist entirely of the listeners of Roswell and Hobbs. Those to appear are working on something. I will keep you fully advised as to developments,” he said.

ZANESVILLE... WHIZ... May 13-20.

The Mayor of Zanesville will officially open Radio Festival week in that Ohio city on Monday, May 13, during a full hour broadcast over WHIZ, in accordance with firm arrangements completed by Allen Haid, program director. A choir of 350 voices and other smaller groups will also appear on the opening broadcast.

The city’s twelve public schools have been tied in with the event and at least 750 of the more than 6,000 boys and girls will appear before the microphone. Big blocks of time, a minimum of one hour, will be utilized every day.

Coincident with Radio Festival, the Zanesville Board of Education will hold a series of meetings for teachers and educators of Zanesville and vicinity to discuss the possibilities and eventualities of education by radio.

Radio merchants, servicemen and distributors are participating at station’s invitation. Its management is keenly aware that this group is basically important if a station is to render maximum service.

Following the opening hour show on Monday, Radio Festival observation will be shifted to a full hour in the afternoons, except on Friday when it will be extended an additional thirty minutes. On Friday evening WHIZ will also carry the banquet program arranged by the Institute for educators and townpeople.

Dr. James Roland Angell, former Yale president and NBC’s Educational Counselor, will deliver the main address. The cream of the school talent which will have appeared during the previous days will surround Dr. Angell’s talk with a musical setting.

Sales

ADVERTISING BUREAU RELEASES SIXTH SUCCESS STORY

The NAB Bureau of Radio Advertising has issued the sixth in its series of “Results from Radio” studies. Vol. 1, No. 6 is on the subject of Garden and Field and tells the case history of “The Old Dirt Dobber,” a participating program heard daily for six years over WLAC, Nashville, Tenn.

The four sponsors, all of whom report unusual sales results from the informal, low-cost program of gardening advice and information, are Eason-Morgan (Paint-Glass), H. J. Grimes (Dry Goods), Boyd Nursery (Plants), and Nashville Electric Service (Light & Power).
The Bureau’s series of radio success stories are available to advertisers, agencies and member stations on request.

REAL ESTATE AND BUILDING FIELD SALES MANUAL READY

A 42-page compendium of program ideas, success stories, promotion plans and other aids in selling more real estate and building trades advertising has been released to all members by the NAB Bureau of Radio Advertising.

Entitled “Building Field Sales Manual,” the loose-leaf folder was produced in cooperation with the Federal Housing Administration, who provided detailed facts and figures on the FHA Insured Mortgage Plan for new, low-cost home financing.

Housing experts predict 1940 will see large-scale production of the $2,500 home, which has recently been developed to answer the widespread public demand for a small, but well-built dwelling, to be purchased through a moderate 5% to 10% down payment and monthly installments averaging less than a dollar a day. Here, it is believed, is the mass housing market, and the Bureau of Radio Advertising for some time has felt that radio is the ideal medium to carry this story of the $2,500 home to the entire public on behalf of the builders, contractors, and many other types of business concerns who will benefit thereby.

The Building Sales Manual is an attempt to gather, all under one cover, the successful ideas and experiences of radio stations and other media in developing real estate into an important field of local advertising. Extra copies of the manual are available without charge to NAB member stations.

FREE OFFERS

Bert Nevins Publicity Offices in New York City have a new angle on the old game of “trying to get something for nothing” from radio stations. Representing Fierman & Kolmer, manufacturers of women’s coats, they would like broadcasters to make an air survey to find out just what sort of coats women will buy next fall. They offer listeners merchandise prizes, and in return for the broadcasters’ assistance in donating free time, etc., Nevins “are giving stations an opportunity to entice mail response and test their audience . . .”

The Bureau of Radio Advertising has urged them to withdraw their request rather than endanger the goodwill and reasonable cooperation of the broadcasting industry. The Bureau has also sent the usual letter to the following firms, who have recently sought free time for commercial purposes:

- Fox Feature Syndicate—Transcriptions of “The Blue Beetle” Comic Feature
- Hal Roach Studios—Special Deal on “1 Million B. C.” Movie
- Metro-Goldwyn-Mayer—Weekly Radio Script Service
- Lawrence H. Selz Organization—Scripts on behalf of manufacturers of insulating materials.

COST-PER-INQUIRY

The percentage advertising proposals are almost as numerous, and twice as persistent, as the free offer boys. Although H. W. Kastor Advertising Agency reported to the Bureau that they have withdrawn their recent “30% of sales” proposition on behalf of Pazo, similar offerings have come from three other agencies:

- Barron Advertising Company, Kansas City, Mo. (on behalf of National Protective Insurance Company)
- Burton G. Feldman & Associates, Chicago, Ill. (on behalf of a perfume account)
- C. J. Ollendorf Advertising, Chicago, Ill. (on behalf of M-G Laboratories).

The Bureau of Radio Advertising has written these concerns, stating the industry’s position on such contingency offers, and inviting them and their clients to use radio at card rates for best results. At the same time, the Bureau has pointed out what it believes to be a shortsighted attitude on the part of these agencies in trying to place business on a percentage basis, since such propositions would tend to break down radio’s rate structure, thus eventually eliminating agency commissions. (If all advertising were bought on a per-inquiry basis, there would be little need for agency advice and services, since results would be automatically guaranteed or there would be no cost to the advertiser. NAB and its members, however, would prefer not to see the agency eliminated from the advertising picture, and for that reason, among others, are definitely opposed to cost-per-inquiry.)

ATTENTION: SALES MANAGERS

All sales managers should read that section of this week’s Reports dealing with the Wage and Hour Act and local advertisers on this page. Local advertisers might have been confused by the newspaper editorial mentioned, and should be set straight.

WAGE AND HOUR ACT

Col. Philip B. Fleming, Wage and Hour Administrator, and his legal advisors say that broadcasters are not safe in following Social Security tax procedure in determining whether talent charges should be lumped with staff salary in determining an overtime rate.
The Wage and Hour Administration's Interpretative Bulletin No. 13 (Section 17) says, in part:

"An employee may work 40 hours for Company A and 15 additional hours during the same week on a different job for Company B. In this case it would seem that if A and B are acting independently of each other with respect to the employment of the particular employee, both A and B, in ascertaining their (overtime) obligations under the Act, would be privileged to disregard all work performed by the employee for the other company. If, on the other hand, the employment by A is not completely disassociated from the employment by B, the entire employment of the employee for both A and B should be considered as a whole for the (overtime) purposes of the statute. Whether the employment by A and B are completely disassociated depends, of course, upon the facts in the particular case."

Col. Fleming told Joseph L. Miller, NAB Labor Relations Director, last week that he did not consider the employment of, say, an announcer by an advertiser as "completely disassociated" from employment by the station unless the advertiser hired, paid, and fired the announcer directly.

A long list of arguments against this interpretation failed to move either Col. Fleming or his lawyers.

The NAB has asked the New York Herald-Tribune to correct an editorial statement (April 26) that "if a local business advertises over a radio station heard outside its state it has been construed to be in interstate commerce within the meaning of this grotesque statute."

Local advertisers might take the Herald-Tribune's statement to mean that advertising by radio would automatically bring the advertisers' employees under the Wage and Hour Act. This is not so.

Joseph L. Miller, NAB Labor Relations Director, sent the following radiogram to the newspaper:

The broadcasting industry certainly would appreciate a correction of the statement in your editorial entitled "Wage and Hour Absurdities" this morning that "if a local business advertises over a radio station heard outside its state it has been construed to be in interstate commerce."

In an opinion on this question given us last November 27, Joseph Rauh, Assistant General Counsel of the Wage and Hour Division, U. S. Department of Labor, stated that "The mere fact that the employer uses the facilities of radio broadcasting to advertise his products would not ordinarily make his entire business subject to the coverage of the Act."

The broadcasting industry has had its troubles under the Wage and Hour Act despite the fact that its average weekly wage of $45.20 is one of the highest in the country. However, the prospective radio advertiser whose employees are at present exempt from the Act need not fear that advertising by air will bring those employees under the Act.

Chances for amendment of the Wage and Hour Act at the current session of Congress are slim.
Russell P. Place, Louis G. Caldwell, and Philip M. Loucks. Other members attending were:

American Bar Association:
- Mr. John G. Jackson—Jackson, Fuller, Nash & Brophy, New York City.
- Mr. Alfred A. Cook—Cook, Nathan, Lehman & Greenman, New York City.
- Judge Oscar Hallam—Dean, St. Paul College of Law, St. Paul Minn. (formerly Associate Justice, Minn. State Supreme Court).

American Newspaper Publishers Association:
- Mr. Paul Bellamy—Cleveland Plain Dealer—Chairman.
- Mr. W. F. Wiley—Cincinnati Enquirer.

American Society of Newspaper Editors:
- Mr. Stuart H. Perry—Adrian (Michigan) Telegram—Chairman.

CONTEMPT OF COURT

Recent cases have highlighted the conflict of public interests involved in comment by the press on court cases and judges. They apply with equal force to comment by radio.

In California, the Los Angeles Times was adjudged guilty of contempt of court for editorials held tending to interfere with the administration of justice in two cases which were still pending. In affirming the judgments, the upper court followed the Bridges case holding unconstitutional the California statute providing that comment not made in the presence of the court shall not be deemed contumacious. The United States Supreme Court on April 8 decided to review the Bridges case. Their decision, it is expected, will resolve the conflict between the inherent power of the court to punish for contempt, and freedom of speech, press and radio.

In St. Louis the editor of the Post-Dispatch was recently adjudged in contempt for criticizing a judge after the case was over. Missouri has a statute banning criticism of a judge after a case is closed. Appeal has been taken.

STATE LEGISLATION

Mississippi:
- H. 1137 (Patterson) PRIVILEGE TAX CODE—To revise the privilege code and to repeal Chapter 20, Laws of the Extraordinary Session of 1935, and amendments thereto. Referred to Committee on Ways and Means.

EDUCATIONAL BROADCASTING INSTITUTE HOLDS BANNER MEETING

Featured by the largest attendance of commercial broadcasters in its history, the Eleventh Institute for Education by Radio held a three-day session in Columbus, Ohio, this week.

Among the 500 persons present were representatives of some 60 commercial radio stations.

The affiliates of NBC and CBS held closed meetings. There was also a general meeting of stations, under the auspices of the NAB, to discuss problems of public service broadcasting. Ed Kirby, Director of Public Relations, and Joseph L. Miller, Director of Labor Relations, represented the Association.

William J. Dempsey, retiring General Counsel of the Federal Communications Commission, addressed the dinner session on April 30.

The list of awards for the Fourth American Exhibition of Recordings of Educational Radio Programs was announced as follows:

I. Network, National Organization, or Clear-Channel Station

a. For general use by adults. Lecture, talk, speech.
   - First Award. "What Makes an American." From the series "Meet Mr. Weeks." Planned and produced by the National Broadcasting Company.
   - Honorable Mention. "Frances Scott Key." From the series "Pilgrimage of Poetry." Planned and produced by the National Broadcasting Company.

b. For general use by adults. Demonstration or participation program.

   c. For general use by adults. Dialogue, round-table conversation, interview, debate, question and answer.
   - First Award. "Propaganda." From the series "University of Chicago Round Table." Planned and produced by the National Broadcasting Company and the University of Chicago.
   - Honorable Mention. "What Are the Real Issues in the European War?" From the series "Ameria's Town Meeting of the Air." Planned and produced by the National Broadcasting Company.

   d. For general use by adults. All forms of dramatization.
   - Honorable Mention. "Seems Radio Is Here to Stay." From the series "So This Is Radio." Planned and produced by the Columbia Broadcasting System.
   - Honorable Mention. "Johnny Got His Gun." From the series "Arch Oboler's Plays." Planned and produced by the National Broadcasting Company.

   e. For general use by children. Any type of out-of-school children's program.
   - No First Award.

   f. For use in school by primary children (approximately Grades I-III).
   - First Award. "Mind the Signs!" From the series "Let's Sing." Planned and produced by the Prairie Farmer, Station WLS.
h. For use in school by junior and/or senior high-school pupils (approximately Grades VII-XII).

First Award. "Senator Borah Died Last Friday." From the series "Living History." Planned and produced by Wisconsin State Station WHA.

Special Class. Distinguished productions containing educational values.

II. Local and Regional Station or Organization

For general use by adults: Lecture, talk, speech.

First Award. "Talk by Thomas Mann: 'The Problem of Freedom.'" From the series "University of Minnesota Conversations." Planned and produced by University of Minnesota Radio Station WLB.

For general use by adults: Demonstration or participation program.

First Award. "The School of Modern Miracles." From the series "Know Your Schools." Planned and produced by the Spokane Public Schools.

First Award. "Adventures in Music." A special broadcast. Planned and produced by the Municipal Broadcasting System, Station WNYC.

For general use by adults: Dialog, round-table conversation, interview, debate, question and answer.

For general use by adults: All forms of dramatization.

First Award. "Civil Liberties in Wartime." From the series "Accent on Liberty." Planned and produced by Station WOSU.

Honor Mention. "Guam and the Naval Appropriations Bill." From the series "Following Congress." Planned and produced by Wisconsin State Station WHA.

For general use by children: Any type of out-of-school children's program.

No First Award.

Honor Mention. "World of Music." From the series "World of Choral Music." Planned and produced by the Wayne University Broadcasting Guild.

Honor Mention. "The Three Dwarfs." From the series "Children's Theatre of Junior League of Roanoke." Planned and produced by Station WDBJ.

For use in school by primary children (approximately Grades I-III).

No First Award.

Honor Mention. "Feeling Phrases." From the series "Rhythmic Activities." Planned and produced by the Cleveland Public Schools.

For use in school by elementary children (approximately Grades IV-VI).

No First Award.

Honor Mention. "Upper Lakes Region." From the series "This Land of Ours." Planned and produced by Wisconsin State Station WHA.

For use in school by elementary children (approximately Grades VII-XII).

First Award. "America Calling." A special broadcast. Planned and produced by Station KSTP, Minneapolis.

NAB CITED AS OUTSTANDING TRADE ASSOCIATION

A certificate of merit for the NAB was presented to Neville Miller last week by the American Trade Association Executives.

The NAB was cited "for its achievement in instituting a system of self-regulation designed to make further Government regulation or control unnecessary, and which would deserve and earn public confidence. Its code included industrial regulation requirements as to the broadcasting of controversial public issues, religious and current news broadcasts, and the types of advertising acceptable. The self-imposed restraint caused some loss in revenue, but won wide public approval."

MILLER CONGRATULATES McCARRENS

Neville Miller congratulated John S. McCarrens of the Cleveland Plain Dealer last week upon his reelection as president of the American Newspaper Publishers Association.

In a letter to Mr. McCarrens, Mr. Miller said:

"I think that radio and the newspapers have much in common, especially during times such as these, and I hope that if any matters come up at any time concerning which you believe I could be of help to you, that you will not hesitate to call upon me."

INSTITUTE OF PACIFIC RELATIONS

The Institute of Pacific Relations says that it has no hidden motive in offering broadcasters material about the Far East. The Institute says it is financed for the most part by research foundations, including the Rockefeller. (See NAB REPORTS, p. 4185.)

FRED M. SHELDON

Charles Lee Harris, business manager of WGRC, Louisville, Ky., wants to know the whereabouts of Fred M. Sheldon.

Engineering

CHANGE IN FREQUENCY BROADCASTS

Important changes in the broadcasting of standard frequency signals by the National Bureau of Standards,
Department of Commerce, were announced this week by D. J. H. Dellinger, Chief of the Bureau's Radio Section. The new service differs from that herefore available as follows: (a) the frequency of 20 megacycles per second is replaced by 15 megacycles per second; (b) announcements will be given by voice only, not by telegraphic keying; (c) the announcements during the broadcasting of the standard musical pitch will be given every 5 instead of every 10 minutes; (d) the ionosphere bulletins are to be discontinued.

For some time the Bureau has broadcast standard frequencies and other services from its radio station WWV at Beltsville, Maryland, near Washington, D. C. The services include standard radio frequencies, standard time intervals in the form of pulses accurately spaced one second apart, a standard audio frequency, and a standard of musical pitch. The last named is on a frequency of 440-cycles per second and is broadcast continuously day and night.

This service makes generally available the national standard of frequency which is of value in scientific and other measurements. Any desired frequency may be measured in terms of any of the standard frequencies by aid of harmonics and beats with one or more auxiliary oscillators. Those desiring to utilize this service should write to the National Bureau of Standards, Washington, D. C., for a copy of Letter Circular LC-591 'Standards of Frequency and Musical Pitch Broadcast by National Bureau of Standards.' A copy of this letter will be sent without charge to those having a real need for them.

The FCC MAIL BAG

During the past three months the FCC had to write nearly 600 letters to individuals who complained about particular radio programs. In the vast majority of these cases, the Commission had to explain that it had no jurisdiction in the matter.

These complaints ran the gamut from objection to radio advertising to protesting certain performers or their utterances. Many of these complaints had to do with the dropping of certain radio programs. In the case of one speaker, 129 letters were received in his behalf.

Most of this correspondence seems to be due to a mistaken idea that the Commission has authority to pass judgment on the radio artists and programs. It is expressly prohibited by law from censoring individual radio programs. The Commission has promulgated no code of conduct for broadcasters which the association believes are conducive to the best interests of the industry. The Commission has no say in the code's enforcement. However, adoption of this code or voluntary acceptance of its provisions does not in any way alter the duties and responsibilities of broadcasting stations under the existing law.

Since the Commission has no jurisdiction in the matter of individual programs and artists, complaints and other comment should be sent direct to the station or the network involved. Such "fan" mail wields considerable influence in broadcasting policies.

"PIRATE" RADIO STATION LOCATED

The FCC Inspector in Charge at New York reports tracing and locating, at Passaic, N. J., an unlicensed radio station which had been a nuisance to and interfered with authorized broadcast programs.

The operation of this outlaw station was unique, in that it used frequencies assigned to regularly licensed stations and, in an attempt to make detection more complex, faked the call letters of regular stations using these channels. At one time it operated on 900 kilocycles, the frequency allocated WBEN at Buffalo, and employed those call letters. More recently it usurped the call letters of the Hartford Times radio station—WTHT, 1200 kilocycles, at Hartford, Conn.

In general, this "pirate" station broadcast phonograph recordings. Such unauthorized operation was quickly detected, and there was early complaint, but the task of tracing the culprit took a little time. The usual methods of detection were employed, that is, records were made of the illegal programs and subsequent bearings and measurements of the field strength eventually brought the investigators to an address on Monroe Street, in Passaic.

By this means the Commission feels that it has obtained sufficient evidence to secure indictment for violating Sections 301 and 318 of the Communications Act.

FCC FUNCTIONS

The FCC announces that the work, business and functions of the Commission for the month of May have been assigned as follows:

Commissioner Thompson Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Craven Designated to hear and determine, order, certify or otherwise act upon; (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of the Commission.

FROM THE FCC MAIL BAG

The Commission, May 3, 1940
Following hearings and oral arguments are scheduled to be heard by the Commission for the week beginning Monday, May 6. They are subject to change.

**Monday, May 6**

WRTD—Times Dispatch Radio Corp., Richmond, Va.—C. P., 590 kc., 1 KW, unlimited time (DA night). Present assignment: 1500 kc., 100 watts, unlimited time.

Thursday, May 9

Oral Argument Before the Commission

Report No. P-5:
NEW—Eddie Erlbacher, Cape Girardeau, Mo.—C. P., 2738 kc., 50 watts, Emission A-3, unlimited time; Pts. of Comm.:
With vessels on Mississippi and Ohio Rivers.

Report No. B-88:

**FUTURE HEARINGS**

During the past week the Commission has announced the following tentative date for a broadcast argument. It is subject to change.

May 16

Oral Argument Before the Commission

Report No. B-95:

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

**RENEWAL OF LICENSES**

The following stations were granted renewal of licenses for the period ending August 1, 1940:

WOCO, Meridian, Miss.; WFMD, Frederick, Md.; WLBL, Stevens Point, Wis.; and WMFJ, Daytona Beach, Fla.

License for the following stations were further extended upon a temporary basis only, until June 1, 1940, pending determination upon applications for renewal of licenses:

KFWA—Fairbanks, Alaska; KFDM, Beaumont, Texas; WMC and auxiliary, Memphis, Tenn.; WGST and auxiliary, Atlanta, Ga.

WSM—National Life and Accident Ins. Co., Nashville, Tenn.—Special experimental authorization to operate a regular broadcast transmitter for experimental transmission of facsimile signals, was further extended for a period of one month, ending June 1, 1940.

KSUB—Leland M. Perry, Cedar City, Utah.—Further extended until June 1, the special temporary authorization to Leland M. Perry, surviving partner of Johnson & Perry, to operate station KSUB on a temporary basis only, subject to whatever action may be taken on formal application for regular authorization that may be submitted with respect to station KSUB.

KWJB—Sims Broadcasting Co., Globe, Ariz.—Further extended until June 1, the special temporary authorization to Bartley T. Sims, remaining partner of Sims Broadcasting Co., to operate station KWJB on a temporary basis, subject to whatever action may be taken upon application for renewal.

KGBU—Alaska Radio & Service Co., Ketchikan, Alaska.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending June 1, 1940.

KXO—E. R. Irey, F. M. Bowles, El Centro, Calif.—Present license further extended upon a temporary basis only, until June 1, subject to whatever action may be taken upon pending application for renewal.

KTHS—Hot Springs Chamber of Commerce, Hot Springs Natl. Park, Ark.—Present license further extended upon a temporary basis only, for the period ending June 1, 1940.

W1XCS—Conn. State College, Storrs, Conn.—Granted renewal of experimental broadcast station license for the period ending May 1, 1941.

W9XOK—The Star Times Pub. Co., St. Louis, Mo.—Granted renewal of high frequency broadcast station license for the period ending April 1, 1941.

W1XEH—Travelers Broadcasting Service Corp., Avon, Conn.—Granted renewal of high frequency broadcast station license for the period ending April 1, 1941.

W2XDR—Radio Pictures, Inc., Long Island City, N. Y.—Granted renewal of high frequency broadcast station license for the period ending Feb. 1, 1941.

W9XSP—Star-Times Pub. Co., St. Louis, Mo.—Present license for facsimile broadcast station further extended on a temporary basis only, for the period ending June 1, 1940, pending determination upon application for renewal.

W9XG—Purdue University, W. Lafayette, Ind.—Present television broadcast station license further extended upon a temporary basis only, for the period ending June 1, 1940, pending receipt and/or determination on application for renewal.

W9XK—State University of Iowa, Iowa City, Iowa.—Present television broadcast station license further extended upon a temporary basis only, for the period ending June 1, 1940, pending receipt and/or determination on application for renewal.

W8XWJ—The Evening News Assn., Detroit, Mich.—Present high frequency broadcast station license further extended upon a temporary basis only, for the period ending June 1, 1940, pending receipt and/or determination on application for renewal.

W2XDA—General Electric Co., Schenectady, N. Y.—Present high frequency broadcast station license further extended upon a temporary basis only, for the period ending June 1, 1940, pending receipt and/or determination on application for renewal.

W2XOY—General Electric Co., Albany, N. Y.—Present high frequency broadcast station license further extended upon a temporary basis only, for the period ending June 1, 1940, pending receipt and/or determination on application for renewal.

W2XMO—Knickbocker Broadcasting Co., Inc., Flushing, N. Y.—Present high frequency broadcast station license further extended upon a temporary basis only, for the period ending June 1, 1940, pending receipt and/or determination on application for renewal.

**EXPERIMENTAL AUTHORIZATIONS**

The Commission has announced that it had extended until August 1, the special experimental authorizations of nine radio stations listed below, and at the same time advanced the effective date of Section 3.32(3) (b), which prohibits the broadcasting of
commercial programs on experimental authorizations, to the August date:

WTC—Travelers Broadcasting Service Corp., Hartford, Conn.—
Special experimental authority to operate simultaneously with KRLD, unlimited time, on 1040 kc, DA-N.

KRLD—KRLD Radio Corp., Dallas, Tex.—To operate simultaneously with WTIC, unlimited time, on 1040 kc., 50 KW, DA—Day and night.

KTHS—Hot Springs Chamber of Commerce, Hot Springs, Ark.—To operate on 1060 kc., simultaneously with WBAL from 6 a.m. to local sunset, suspend operation from local sunset until 8 p.m., and operate unlimited time from 8 p.m. to midnight.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—To operate simultaneously with KTHS on 1060 kc., from 6 a.m. to local sunset at Hot Springs, Ark., and operate from local sunset at Hot Springs to 9 p.m., EST, on 1060 kc, and operate synchronously with WJZ on 760 kc, 2½KW, using DA from 9 p.m., EST.

WAPL—Alabama Polytechnic Institute, Birmingham, Ala.—To operate unlimited hours on 1130 kc, simultaneously with KWVO at Tulsa, using DA after sunset at Tulsa.

KWVO—Southwestern Sales Corp., Tulsa, Okla.—To operate unlimited hours on 1140 kc, with 25 KW, using DA at night-time.

WLW—Loyola University, New Orleans, La.—To operate unlimited time on 830 kc, 50 KW, employing DA both day and night.

KFAB—KFAB Broadcasting Co., Lincoln, Neb.—To operate synchronously with WBBM from local sunset at Lincoln, Neb., to midnight, CST.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—To operate synchronously with KFAB from local sunset at Lincoln, Neb., to midnight, CST.

All outstanding broadcast licenses are being made to expire August 1 as a preliminary to reallocation of frequencies under the recently ratified North American Regional Broadcasting Agreement.

MISCELLANEOUS

WGE0—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to conduct 2-way communications with Stations KRTA, KRTC and KTK of the Byrd Antarctic Expedition between 12 midnight and 2 a.m. EST, from April 26, 1940, to not later than 3 a.m. EST, November 1, 1940.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted extension of special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XPM from April 27, 1940, to not later than 3 a.m. EST, June 1, 1940 (provided this authority to terminate immediately upon the withdrawal of consent by either the Columbia Broadcasting System, Inc. or Edwin A. Armstrong).

W2XB—General Electric Co., Schenectady, N. Y.—Granted extension of special temporary authority to relay through television broadcast station W2XB the television programs to be received from the NBC, Inc., transmitter, call letters W2XBS, located atop the Empire State Building, from April 27, 1940, to not later than 3 a.m. EST, February 1, 1941 (provided this authority to terminate immediately upon the withdrawal of consent by the National Broadcasting Co., Inc.).

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 2 to 3 p.m., CST, on May 1, 2, 7, 8, 9, 14, 15, and 16, 1940, in order to broadcast special educational programs (provided KGGF remains silent) from 7:15 p.m. to 9:15 p.m. CST, on May 21, 23, 28, and 30, and from 8:15 p.m. to 9:15 p.m. CST, on May 22 and 29, 1940, in order to permit KGGF to broadcast an address by Governor Phillips (B-3-PRY-216). Midnight Sun Broadcasting Co., Portable-Mobile (area of Fairbanks, Alaska).—Granted construction permit for new relay broadcast station; frequencies 30820, 33740, 33820, 37980 kc., power 2 watts (B-PRE-344).

WEOA—General Electric Co., Portable-Mobile (area of Schenectady, N. Y.).—Granted construction permit to install new transmitter (B1-PRY-216).

WEIC—General Electric Co., Portable-Mobile (area of Schenectady, N. Y.).—Granted construction permit to increase power from 15 watts to 50 watts and install new transmitter (B1-PRE-346).

West Virginia Newspaper Club, Morgantown, W. Va.—Granted motion to dismiss without prejudice the application for new station to operate on 1200 kc., 250 watts, unlimited time.

Riverside Broadcasting Co., Riverside, Calif.—Granted petition to intervene in the hearing on the application of Worcester Broadcasting Corp. for a new station in San Diego, Calif., to operate on 1590 kc., 250 watts, unlimited time.

WWRL—Long Island Broadcasting Corp., Woodside, Long Island, N. Y.—Granted extension of effective date to 30 days from April 29, 1940, of Provision (3) of Commission Order of December 5, 1938, re temporary license to operate on time previously assigned to Station WWRL.

KGGF—Hugh J. Powell Coffeyville, Kans.—Granted special temporary authority to remain silent during above periods in order to permit WNAD to broadcast special educational programs; to operate from 7:15 p.m. to 9:15 p.m., CST, on May 21, 23, 28, and 30 and from 8:15 p.m. to 9:15 p.m., CST, on May 22 and 29, 1940, in order to permit WNAD to broadcast special educational programs (provided WNAD remains silent); to operate from 7:15 p.m. to 9:15 p.m., CST, on May 7, 1940, in order to broadcast an address by Gov. Phillips (provided WNAD remains silent) (B4-S-710).

KAQY—The Farmers & Bankers Broadcasting Corp., Abilene, Kans.—
Granted special temporary authority to operate equipment described in application (File No. B4-PRY-215) from 4 to 5 p.m., EST, on April 29, 1940, at Anthony, Kans., and from 5 to 6 p.m., EST, on May 1, 1940, at McPherson, Kans., on 1900, 2021, 2102, 2578 kc., power 40 watts, in connection with the Good Will Tour of the Wichita Chapter of Commerce (B4-S-507).

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted special temporary authority to operate from 8:00 p.m. to 8:30 p.m., EST, on May 21, 1940, in order to broadcast special Wilmington Day Celebration.

WRCA—National Broadcasting Co., New York, N. Y.—Granted special temporary authority to operate Station WRCA on 9670 kc., with parallel antennas as described in application B1-ML1B-33, for a period not to exceed ten days, in order to attempt to overcome the interference reported in letter dated April 22 and telegram of April 19, and to attempt to retain priority for the United States to this frequency.

KSTP—KSTP, Inc., St. Paul, Minn.—Granted modification of construction permit as modified for move of transmitter, installation of new equipment and directional antenna, and increase in power, for extension of completion date from May 8, 1940, to August 8, 1940; frequency 1460 kc., power 50 KW, unlimited time (B4-MP-968).

L. B. Wilson, Inc., Portable-Mobile (area of Cincinnati, Ohio).—
Granted construction permit to make changes in transmitting equipment, frequencies 1616, 2090, 2190, 2830 kc., power 25 watts (B2-PRY-218).

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—
Granted modification of construction permit for increase in power from 1 KW, 5 KW day, to 5 KW day and night, changes in directional antenna, for further changes in directional antenna and change in type of transmitter (B1-MP-970).

WEOA—Evansville on the Air, Inc., Evansville, Ind.—Granted construction permit to make changes in transmitting equipment, frequency 1370 kc., 250 watts, unlimited time (B4-MP-2851).

WPR—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—
Granted special temporary authority to operate from 10:00 p.m. to 12:00 p.m., AST, on May 4, 11, 18, and 25, 1940, in order to broadcast dance music from the Escambron Beach Club at San Juan; to operate from 9:00 a.m. to 11:00 a.m. and from 2:00 p.m. to 6:00 p.m., AST, on May 5, 12, 19, and 26, 1940, in order to broadcast amateur baseball games from the municipal stadium.

WPPA—A. H. Belo Corp., Dallas, Tex.—Granted authority to install automatic frequency control apparatus (B3-F-140).

WBAP—Carter Publications, Inc., Fort Worth, Tex.—Granted authority to install automatic frequency control apparatus (B3-F-41).

KFFA—The Mid-Western Radio Corp., Greeley, Colo.—Granted authority to make changes in automatic frequency control.
WGN, Inc., Chicago, Ill.—Granted construction permit for new relay broadcast station, frequencies 1616, 2090, 2190, 2830 kc, power 250 watts (B2-PFY-217).

WSPA—Virgil V. Evans, tr/as The Voice of South Carolina, Spartanburg, S. C.—Modification of license to cover construction permit for new transmitter; directional antenna and designation of station as Class I-B and 1090 kc.

WKBV—Spartanburg Advertising Company.—Construction permit for new transmitter; directional antenna and designation of station as Class I-B and 1090 kc.

WSPA—Construction permit for new broadcast station to be operated on 1090 kc., 500 watts night, 1 KW day, unlimited time.

WSPA—Modification of construction permit (B3-P-2394) for new transmitter; directional antenna and designation of station as Class I-B and 1090 kc. under North American Regional Agreement; increase power from 50 to 500 watts day and night; move of transmitter from Spartanburg to Greer, S. C.; change hours from share KRLD to unlimited; move transmitter. Amended; changes in direction antenna.

APPLICATIONS FILED AT FCC

580 Kilocycles

WBKO—Orlando Broadcasting Co., Inc., Orlando, Fla.—License to cover construction permit (B3-P-3650) for changes in auxiliary transmitter.

WSPA—Construction permit for new broadcast station to be operated on 1090 kc., 500 watts night, 1 KW day, unlimited time. Amended to change frequency to 1190 kc., increase power to 500 watts day and night, move of transmitter, further requesting changes in equipment and move of transmitter from E. Brooklawn, N. J., to Creek Road, Bellmawr, N. J. Extend commencement date 10 days after grant and completion 120 days thereafter.

WCLA—Construction permit to cover construction permit for new broadcast station to be operated on 1420 kc., power 50 watts (B4-MP-961).

WIPS—Construction permit for new relay broadcast station, to be used in connection with International Broadcast Stations WGEC and WGEI, when the same program is not being broadcast by Station WGY; frequencies 31220, 35620 and 39260 kc., power 2 watts (B1-LRF-309).

New Listings

WLOF—Hazlewood, Inc., Orlando, Fla.—Modification of construction permit (B3-P-3594) for new station requesting approval of antenna and transmitter site at Texas Ave. & Winter Garden Rd., Orlando, Fla., change Studio to No. 7 N. Orange Ave. and install new transmitter.

WSPA—Construction permit for new transmitter; directional antenna for day and night; change frequency from 1190 kc. to 1090 kc.; change hours from limited to unlimited; move transmitter from Pleasant Heights, W. Va., to near Burlington, Ohio.

WSPA—Modification of construction permit (B3-P-2394) for new station requesting approval of antenna and transmitter site at Texas Ave. & Winter Garden Rd., Orlando, Fla., change Studio to No. 7 N. Orange Ave. and install new transmitter.

WSPA—Construction permit for new broadcast station to be operated on 1090 kc., 100 watts night, 250 watts day, unlimited time. Amended to change frequency to 1210 kc., power to 250 watts day and night, and make equipment changes.
WTAL—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Modification of license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

WAWZ—Pillar of Fire, Zarepath, N. J.—License to cover construction permit (B1-P-2731) for equipment changes.

1330 Kilocycles

KSCJ—Perkins Brothers Co. (The Sioux City Journal), Sioux City, Iowa.—Modification of construction permit (B4-P-2290) to install directional antenna for night use and increase power, requesting changes in directional antenna.

1340 Kilocycles

KGNO—Dodge City Broadcasting Co., Inc., Dodge City, Kan.—Authority to make changes in automatic frequency control equipment.

1350 Kilocycles

KTSM—Tri-State Broadcasting Co., Inc., El Paso, Tex.—Modification of construction permit (B3-P-1871) for change in frequency, increase power, change hours, new transmitter, change antenna and move transmitter, further requesting authority to change type of transmitter, approval of antenna and transmitter site at On First Ave., 0.3 miles South U. S. Highway 80, El Paso, Tex.

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-P-2238) for changes in directional antenna, increase in power, requesting authority to make changes in directional antenna and change type of transmitter.

1370 Kilocycles

NEW—R. B. Terry, D. A. Rawley, C. M. Waynick and H. A. Cecil, d/b as High Point Broadcasting Co., High Point, N. C.—Construction permit for new broadcast station on 1120 kc., 250 watts, unlimited. Amended to change frequency requested to 1570 kc., power 100 watts, change transmitter, give site as corner North Main St. and Sheraton Sts., High Point, N. C.

1420 Kilocycles

NEW—Middle Georgia Broadcasting Co., Macon, Ga.—Construction permit for new broadcast station to be operated on 1290 kc., 250 watts, unlimited time. Transmitter and studio sites to be determined, Macon, Ga. Class IV station.

1430 Kilocycles

KGNF—Great Plains Broadcasting Co., North Platte, Nebr.—Modification of license to charge hours from daytime to unlimited, using 1 KW day and night. Amended to request change in frequency from 1430 kc. to 1380 kc.

MISCELLANEOUS

NEW—Midland Broadcasting Co., Kansas City, Mo.—Construction permit for new television broadcast station on 6000-6499 kc., 1000 watts visual and 500 watts aural and A5 and A3 emission. Amended: Form 318 submitted to request Class I station.

KGEO—General Electric Co., San Francisco, Calif.—Modification of license to add 9670 kc. to present authorized frequencies.

KLS—S. E. & E. N. Warner d/b as Warner Brothers, Oakland, Calif.—Construction permit to increase power from 250 watts to 1 KW, new transmitter and change antenna. Amended; request Class III-B Station.

WIXO—The Yankee Network, Inc., Paxton, Mass.—License to cover construction permit (B1-PHB-39) as modified for new high frequency broadcast station.

W2XVT—Allen B. DuMont Labs., Inc., Passaic, N. J.—Construction permit for changes in equipment; increase power to 5000 watts (aural and visual); frequencies 78000-81000 kc. Amended to request frequencies Channels 1 to 19, delete Special emission. Form 318 submitted to specify Class I station.

NEW—Missouri Broadcasting Corp., St. Louis, Mo.—Construction permit for new high frequency broadcast station on 13400 kc., 1000 watts, special emission for frequency modulation.

NEW—Columbia Broadcasting System, Inc., Chicago, Ill.—Construction permit for new high frequency broadcast station on 34200 kc., 1000 watts, special emission for frequency modulation.

W6XDA—Columbia Broadcasting System, Inc., Los Angeles, Calif.—Construction permit to change frequency from 42300 kc. to 43200 kc.; increase power from 100 watts to 1000 watts; change emission from A3 to Special for frequency modulation and install new equipment.

NEW—Gilbert H. Jertberg, Executor of the Estate of George Harm, deceased, area of Fresno, Calif.—Construction permit for new relay broadcast station on 30820, 55740, 55820, 37280 kc., power 10 watts, Emission A3.

NEW—Gilbert H. Jertberg, Executor of the Estate of George Harm, deceased, area of Fresno, Calif.—Construction permit to move transmitter to 2701 14th St., N.W., Washington, D. C.

NEW—Allen B. DuMont Labs., Inc., Washington, D. C.—Construction permit for new television broadcast station on 41000-50000 kc., aural and visual power 1000 watts, Emission A3 and A5. Amended re equipment and to request Class II (Form 318).

W2XWE—WOKO, Inc., Albany, N. Y.—Construction permit to move transmitter locally to State Office Bldg., Swan St., Albany, N. Y.

WENJ—WJW, Inc., Victoria Akron, Ohio.—Construction permit to install new transmitter.

NEW—Columbia Broadcasting System, Inc., E. of Wheaton, Md.—Construction permit for new high frequency broadcast station on 43200 kc., 1000 watts, special emission for frequency modulation.

WLWO—The Croxley Corp., Mason, Ohio.—License to cover construction permit (B2-P1B-17) as modified which authorized increase in power to 50 KW and new equipment.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Hosiery Mills—See American Mills.

American Mills—Philip Adler, Jr., Indianapolis, Ind., trading as American Mills. American Hosiery Mills, and American Silk Hosiery Mills, is charged, in a complaint issued by the Federal Trade Commission, with misrepresentation.

The complaint alleges that the respondent, in magazines, periodicals and other publications, inserted, among other things, a picture showing two silk hose on a weaver, opposite which is the following wording:

"If you agree to show your friends I’ll send you actual sample snag-proof silk hose FREE! And show you how to earn up to $22.00 in a week. Just show FREE ACTUAL SAMPLE amazing new kind of Snag-Proofed Chiffon Hosiery.

"NO EXPERIENCE—NO MONEY NEEDED. Just show FREE ACTUAL SAMPLE of SNAG-PROOFED HOSE, and make good money—up to $22.00 in a week—even in spare time."

"Through these and other advertisements, the complaint alleges, the respondent has represented that he will give a sample pair of silk hose free to anyone agreeing to demonstrate their quality to friends; that he will pay up to $22 a week for demonstrating silk hosiery; that valuable demonstrating equipment will be sent and..."
given free of cost to persons requesting it; that his chiffon silk hose are “snag-proofed” and will not under any circumstances snag; that he operates a large factory, pictured in an advertisement, which is devoted exclusively to the manufacture of silk hosiery, and that purchasers of the respondent’s hose deal directly with the respondent without intervention of any middleman.

The complaint alleges that these representations are false and misleading. (4109)

American Silk Hosiery Mills—See American Mills.

Louis Baskind & Company, Inc.—Alleging misrepresentation in the sale and distribution of shirts, a complaint has been issued against Louis Baskind and Company, Inc., 1220 Broadway, New York.

Representations attached to the respondent’s products allegedly indicated that they are “fully pre-shrunk”, that the shirts are of superior grade or quality. The complaint alleges that these representations were misleading because the respondent’s shirts will shrink appreciably when subjected to ordinary laundering; the buttons are not genuine ocean water pearl buttons but are fresh water pearl buttons, which are of lower quality, and the shirts are not of superior grade or quality.

The respondent also is alleged to have used the term “Silken-span” to designate its shirts, when in fact they contain no silk but are made entirely of cotton. (4095)

Hiram Carter, Inc., and S. Fred Griffin, president and principal owner of the corporation, 5706 Hoffman Drive, Elmhurst, Long Island, is charged with the sale and distribution of medicinal preparations designated “Old Surgeon’s,” “Old Surgeon’s Remedy” and “Old Surgeon’s Double Duty Remedy,” are charged in a complaint with misrepresentation.

In circulars, pamphlets and other printed and written matter distributed throughout the States, the complaint alleges, the respondents have disseminated, among other things, pictures of a dejected, haggard, worried-looking man, followed by pictures, apparently of the same man, in robust health and in a bright, gay and cheerful mood, with the following statements directly underneath:

“He’s listless and low, sleeps poorly, nerves on edge, bothered with indigestion and sundry aches and pains, but worst of all his strength seems to have ebbed away so he’s only half the man he used to be.

“Back on the job again feeling tip top. Hard work means nothing now—and after a good day’s work he feels like going out evenings for a good time. Life is worth living once more. He tells all his friends about Old Surgeon’s and he’s sending his photograph and test kit oil for the benefit of others who need the same kind of help. His message is ‘Go thou and do likewise.’ ”

Through these and other representations, the complaint charges, the respondents have represented that their preparations are a cure or remedy for impotence or lost energy, indigestion, rheumatism, neuritis and arthritis, and that the price at which the preparations are offered is a special or reduced price much less than that at which they are customarily offered for sale. (4101)

Julian S. Coln, 260 Fourth Ave., New York, engaged in the sale and distribution of handkerchiefs, is charged in a complaint with misrepresentation.

The complaint alleges that the respondent has represented, in the solicitation of orders for his handkerchiefs, that he is a manufacturer of handkerchiefs. Use of the term or of the word “manufacturer,” the complaint charges, is a representation that the respondent owns, operates or controls a factory or mill wherein the product which he offers for sale or sells is made or manufactured. The complaint further alleged that in fact he does not make or manufacture any of his products, but has them made elsewhere under contracts. The complaint points out that there is a common belief among purchasers that they save the middleman’s profit and obtain other advantages by purchasing directly from the manufacturer. (4106)

Chocolate Confections Company—Merrick National Company, Evans Candy House—William C. Evans, trading as Evans Candy House, 309 Marietta St., Atlanta, engaged in the sale and distribution of candy to dealers, is charged with the distribution to dealers of certain assortments of candy so packed and assembled as to involve the use of a game of chance or lottery scheme when the product is sold or distributed to ultimate consumers. One of these assortments, the complaint charges, consists of a number of bars of candy together with a device commonly called a push card. The complaint alleges that the respondent, when selling an assortment of this kind, removes a numbered disc from the push card, paying in cents the amount of the number contained in the disc, and receives a bar of candy. Each bar allegedly has a retail value greater than many of the prices to be paid therefor, and the amounts to be paid for the candy are thus determined wholly by lot or chance. (4102)

Globe-Union, Inc.—Charging price discrimination in violation of the Robinson-Patman Act in the sale of radio volume and tone controls a complaint has been issued against Globe-Union, Inc., 900 East Keele Ave., Milwaukee, manufacturer of storage batteries and radio accessories.

The complaint alleges that the respondent corporation sold its radio tone and volume controls at prices varying from 36 to 72 cents a control, and that it charged radio accessory jobbers for products of like grade and quality prices varying from 36 to 72 cents per control.

The jobbers, it is alleged, then sold the Globe-Union, Inc., tone and volume control dealers (radio repairmen) at prices ranging from 60 cents to $1.20.

It is alleged that Globe and Atlas Radio Corporation and Wells-Gardner & Co., who sell radio sets to Montgomery Ward & Co., Inc., resold the controls they purchased from the respondent to the Chicago mail order house at prices ranging from 12 to 24 cents a control, and that Montgomery Ward & Co., Inc., distributed these products in the same territories and places as, and in competition with, dealers who purchased the respondent’s controls from jobbers.

The effect of the discriminations, according to the complaint, has been and may be to destroy and prevent competition with Montgomery Ward & Co.

The complaint points out that during 1938 the respondent company sold more than 2,600,000 tone and volume controls to radio manufacturers for original equipment, and in excess of 500,000 tone and volume controls for replacement or original equipment. (4103)

Hills Brothers Company—Alleging a combination and conspiracy to restrain trade and create a monopoly in the sale in the United States of dates grown in the Kingdoms of Iraq and Iran a complaint has been issued against several foreign and American importers, distributors and agents.

The complaint points out that during 1938 the respondent shipped to the United States about 200,000 cases of dates, or 1,400,000 pounds, and that many of the prices to be paid therefor, and the amounts to be paid for the dates are thus determined wholly by lot or chance. (4103)

The effect of the discriminations, according to the complaint, has been and may be to destroy and prevent competition with Dromedary.

The complaint points out that during 1938 the respondent company sold more than 2,600,000 tone and volume controls to radio manufacturers for original equipment, and in excess of 500,000 tone and volume controls for replacement or original equipment. (4103)

Hills Brothers Company—Alleging a combination and conspiracy to restrain trade and create a monopoly in the sale in the United States of dates grown in the Kingdoms of Iraq and Iran a complaint has been issued against several foreign and American importers, distributors and agents.

The complaint points out that during 1938 the respondent shipped to the United States about 200,000 cases of dates, or 1,400,000 pounds, and that many of the prices to be paid therefor, and the amounts to be paid for the dates are thus determined wholly by lot or chance. (4103)

The effect of the discriminations, according to the complaint, has been and may be to destroy and prevent competition with Dromedary.

The complaint points out that during 1938 the respondent company sold more than 2,600,000 tone and volume controls to radio manufacturers for original equipment, and in excess of 500,000 tone and volume controls for replacement or original equipment. (4103)

Hills Brothers Company—Alleging a combination and conspiracy to restrain trade and create a monopoly in the sale in the United States of dates grown in the Kingdoms of Iraq and Iran a complaint has been issued against several foreign and American importers, distributors and agents.

The complaint points out that during 1938 the respondent shipped to the United States about 200,000 cases of dates, or 1,400,000 pounds, and that many of the prices to be paid therefor, and the amounts to be paid for the dates are thus determined wholly by lot or chance. (4103)
The complaint alleges that early in 1939 the Kingdom of Iraq entered into a five-year agreement with the respondent Andrew Weir & Co., London, which provided, among other things, that the respondent should have the exclusive right to purchase all dates grown in Iraq for export, and that that firm in turn should buy from the growers in Iraq a specified quantity of dates at specified prices for export.

It is alleged that, pursuant to an understanding, agreement and conspiracy entered into by the respondents in May, 1939, the respondent Andrew Weir & Co., London, sold dates to Iraq with specified prices exclusively to the respondents E. Suren, United Africa Company, Ltd., and Hills Brothers Company for United States importation and distribution, and refrains from selling dates to others to fill United States demands; and that the respondents E. Suren, United Africa Company, Ltd., and Hills Brothers together fix the price at which they will sell Iraq dates in the United States to the wholesale and retail trade and the general public.

It is further alleged that, through mutual agreement, Hills Brothers Company, United Africa Company, Ltd., and E. Suren, since May 15, 1939, have purchased Iraq dates from Andrew Weir & Co. for sale in the United States only upon the condition that the Weir firm sell dates exclusively to them for the United States trade, and that they have agreed with Weir and amongst themselves that they will not import into the United States dates grown in Iran.

The complaint also alleges that the respondents, by their own and their representatives' acts, have brought about within the United States certain results forbidden by United States laws; that there is no longer any competition in the sale of Iraq dates in the United States, and that the prices are fixed at arbitrary levels.

Imperial Knife Company, Inc.—Complaints have been issued against seven cutlery manufacturing corporations alleging that they have sold pocket knives of such design and appearance that, when marked or labeled by use of the word "Scout" or "Boy Scout," or any other marks or insignia characteristic of The Boy Scouts of America, the tendency is to induce buyers to believe that the respondents' products have been endorsed by that organization and are a part of its standard equipment.

The complaints point out that while The Boy Scouts of America supervises and licenses the manufacture of certain equipment which is marked or labeled by use of words such as "Boy Scout," "Scout," or "Scouting," it has not taken such action with respect to the respondents' pocket knives nor has it endorsed or sponsored them.

Robert A. Johnston Company, 4023 West National Ave., Milwaukee, which maintains a branch office at 437 Eleventh Ave., New York, is engaged in the manufacture and sale of candy. The complaint alleges that the respondent sells to dealers assortments of candy so packed and assembled as to involve the use of a game of chance or lottery scheme when sold or distributed to ultimate consumers.

The plan is alleged to be as follows: One of the assortments consists of a number of boxes or packages of candy, with an additional article of merchandise, together with a device commonly called a punch board. The board bears statements or legends informing purchasers and prospective purchasers that the person selecting a certain designated number receives a basket of candy; that persons selecting certain other designated numbers receive boxes of candy of varying sizes, and that the person selecting the last number on the board receives the additional article of merchandise purchased. Purchasers who do not punch the designated numbers receive nothing for their money. The numbers are effectively concealed from purchasers until slips of paper have been punched or removed from the board, and the fact as to whether package or box of candy the purchaser is to receive, if any, is thus determined wholly by lot or chance.

Merrick National Company—Montague L. and Edna H. Merrick, trading as Merrick National Company and Chocolate Confections Company, 617 Washington Ave. North, Minneapolis, engaged in the sale and distribution of candy to dealers, are charged with selling to dealers assortments of candy so packed and assembled as to involve the use of a game of chance, gift enterprise or lottery scheme when the candy is sold to ultimate consumers. One assortment allegedly consists of a number of small pieces of candy of uniform size, a number of bars of candy and a giant loaf of candy. A majority of the smaller pieces of candy have centers of a certain color, a minority having centers of a different color. The colors are alleged to be concealed from purchasers until a purchase is made and the piece of candy broken open. Purchasers of the differently colored pieces receive, without additional charge, the larger bars of candy, and the buyer of the last piece of candy obtains the giant loaf, according to the complaint. The respondents are also charged with distributing assortments of candy together with a push card by means of which prizes are allotted.

Milford Rivet & Machine Company, Milford, Conn., Judson L. Thomson Manufacturing Company, Waltham, Mass., and Tubular Rivet & Stud Company, Boston, have each been served with a complaint alleging violation of the "exclusive dealing" section of the Clayton Act (Section 3).

The complaints point out that these corporations manufacture and lease and license the use of rivet-setting machines, and manufacture tubular and bifurcated rivets. It is alleged that the Thomson company manufactures approximately 40 per cent of the rivet-setting machines and about 50 per cent of the tubular and bifurcated rivets entering interstate commerce; that the Tubular Rivet Company makes approximately 35 per cent of the rivet-setting machines and about 25 per cent of the tubular and bifurcated rivets, and that the Milford company is also an important member of the industry.

It is further alleged that each respondent company leased and licensed its rivet-setting machines and with and with the condition, agreement or understanding that the lessees or licensees thereof would use such respondent's rivet-setting machines only for setting rivets manufactured by that respondent company or sold under its authority, and on the further condition, agreement or understanding that the lessees or licensees allow such respondent or its agent to inspect the machines at all reasonable times.

The effect of the provisions in the license and lease agreements, it is alleged, may be to substantially lessen competition or tend to create a monopoly in each respondent in tubular and bifurcated rivets in interstate commerce.

P. R. Mitchell Company, 2201 Spring Grove Ave., Cincinnati, engaged in manufacturing, selling and distributing pillows, bedding and like products, is charged in a complaint with misrepresentation.

In pamphlets, circulars, advertising folders and other material circulated throughout the United States, the complaint charges, the respondent has made representations such as:

"FINE DOWN PILLOWS
SPECIAL $4.99—size 21" x 27"
Here's the pillow you've always wanted—soft luxurious snow white goose down—did you price you can't afford to pass by."

"GUARANTEE
This Pillow Contains
ALL NEW DOWN"

"With our process the down is so purified and Sterilized it is soft and fluffy and will give maximum comfort."

The complaint charges that the respondent's pillows contain a large percentage of goose feathers and chicken feathers; that the filling is not composed entirely of white goose down, and that the price of $4.99 at which the respondent sells the pillows is not a reduced or special price, but is the usual, regular and customary retail selling price of the pillows at all times.

Oak Lane Candy Company, York, Pa., sellers and distributors of candy and peanuts to dealers, are charged with distributing assortments of candy together with push cards. Persons selecting...
certain designated numbers allegedly received pieces of candy which have retail values in excess of the amounts to be paid for them. (4099)

Rogers Silverware Exchange—See Rogers Silverware Exchange.

Rogers Silverware Exchange—Misleading and deceptive representations in the sale to retail merchants of promotion plans, consisting of gift cards, advertising material and silverware are alleged in a complaint issued against J. L. Ramsay and G. P. Masters, trading as Rogers Silverware Exchange and as Rogers Redemption Bureau, St. Louis.

Use of the trade names “Rogers Silverware Exchange” and “Rogers Redemption Bureau” constituted a deceptive representation that the respondents’ business was connected with Oneida, Ltd., manufacturer of “Wm. A. Rogers Silverware,” when such was not the case, according to the complaint.

The complaint also alleges that the respondents or their agents represented that by means of their sales stimulator plan as sold to retail merchants the respondents were conducting an advertising campaign for the makers of Rogers silverware, when in fact the plan was not sponsored by Oneida, Ltd., but was used solely by the respondents as a means of selling their so-called cards.

Under written contracts obtained by the respondents from retail merchants in connection with the sales stimulating plan, it is alleged, agreements were made that the merchants would purchase gift cards at $4 a thousand for distribution to their own customers buying merchandise; that the respondents would redeem specified numbers of such cards by sending to a merchant’s customer a designated number of Rogers silverware pieces packed in units of six pieces; that when 25 per cent of a merchant’s consignment of gift cards had been forwarded for redemption the respondents would make a cash refund to the merchant at the rate of $4 a thousand cards so forwarded, and that the respondents would supply the merchant without cost a 26-piece silverware set to be used for display purposes and to remain as the merchant’s property.

The complaint charges that the provisions of the written contract with respect to the number of cards required for obtaining silverware were couched in ambiguous and deceptive language which enabled the respondents and their agents to deceive prospective purchasers of gift cards; that in many instances the respondents failed to redeem the gift cards in silverware; that in many instances they did not forward to the holder of such cards a unit of six pieces of silverware but required the forwarding of six times the designated number of cards; that in many instances they failed to supply dealers with silverware sets as promised, and that they did not make to dealers the cash refunds provided for in the contracts. (4094)

Royal Metal Manufacturing Co., 175 North Michigan Ave., Chicago, engaged in the manufacture, sale and distribution of household, office and trade furniture, with a factory located at Michigan Ind., Ind., in a complaint, with misrepresentation concerning its products.

In magazines and other publications, the complaint charges, the respondent, in describing its products, makes use of the following terms, and others of similar nature and import: “Chrome,” “Chromium” and “Chromium Steel.” The terms “Chrome” and “Chromium,” the complaint alleges, are generally understood by the purchasing public to be applicable solely to a steel alloy made by combining carbon steel with chromium. Chromium (or chrome) steel, the complaint points out, is a much more expensive and valuable product than plain carbon steel, and combines intense hardness with a high elastic limit, while possessing unusual wearing qualities. In truth, the complaint charges, the respondent’s furniture is not made of the steel alloy commonly known as chromium steel or chrome steel, but, on the contrary, is made of plain carbon steel with only a plating of chromium. (4107)

C. H. Stallman & Son, Inc., 31 West Philadelphia St., York, Pa., engaged in the sale and distribution of cigars, candy and other merchandise, is charged with selling to dealers assortments of merchandise, together with devices commonly called punch boards and punch cards, one of the objects of which is alleged consists of a number of cigars together with a punch board which bears a legend informing purchasers and prospective purchasers that persons selecting certain designated numbers receive 10 cigars each. Purchasers of other numbers, it is alleged, receive 1, 3 or 5 cigars, but those not successful in selecting one of the designated numbers receive nothing for their money. (4096)

Stiefel Medicinal Soap Company—Misrepresentation is charged in a complaint against Stiefel Medicinal Soap Company and August Stiefel, Preston Hollow, N. Y., sellers and distributors of medicinal soaps.

The complaint alleges that August Stiefel, president of the corporation, was, until 1936, the exclusive sales agent in the United States of J. D. Stiefel, Offenbach-on-the-Main, Germany, manufacturer of medicinal soaps which have been imported into the United States and sold extensively to members of the medical profession and the purchasing public. After the sales agency was withdrawn from the respondent, August Stiefel, in 1936, the complaint continues, the respondent organized the Stiefel Medicinal Soap Company, formerly located at Montclair, N. J., and entered into the sale and distribution of soaps other than those produced by the German concern.

In advertisements in trade journals and other periodicals, and by means of circulars, price lists and other advertising material, the respondent is alleged to have represented, among other things—

“Domestic manufacture, with most modern methods and equipment, coupled with the elimination of import duties and foreign exchange disadvantages, permits us to reduce our prices, effective with this issue of our price list.”

“The traditionally high quality of our products, which the Medical Profession of the United States has relied on for over half a century, has been fully maintained in our domestic products. In order to avoid substitution, please specify STIEFEL’S Medicinal Soaps always when ordering from your wholesaler.”

Through the use of these representations and practices, the complaint charges, the respondents represent that their business is a part of or is connected with the German firm, and that the products distributed by them are the products of the German manufacturer and are identical in character and quality. In truth, the complaint alleges, the respondent corporation is in no way connected with the German concern, and aside from a small quantity of soaps which August Stiefel had on hand when the sales agency was withdrawn from him, the respondents have sold none of the J. D. Stiefel soaps since 1936, but obtain their products from other sources. (4098)

Tubular Rivet & Stud Company—See Rivet & Machine Co.

Wamill Quilt Factories—Walter L. Miller, trading as Wamill Quilt Factories, is charged in a complaint with misrepresentation.

The respondent, with office and place of business at 1026 Seventeenth St., Denver, Colo., is engaged in the business of manufacturing, selling and distributing quilts, comforters, bedding and like products.

Through various advertising mediums, the complaint charges, the respondent has represented, among other things:

“Wamill Feather and Down Quilts—50% finest Goose Down, 50% finest Feather Down (quills out). Regular price $37.50; sale price, 2 for $37.50 * * * $37.50 for 2, $18.95 for one.”

“Research work * * * testing, surveying * * * for years was secretly carried on to find the elements that could possibly combine to form the ideal.”

“This work necessitated developing special manufacturing processes, and machinery, raw materials were tried, changed, discarded for others. Finally all these elements essential to the ideal quilt were developed.”

The complaint points out that “down” means the under coating of water fowl, consisting of the light, fluffy filaments, growing from one quill point, but without any quill shaft. It is alleged that there is no such thing as “feather down”; that the respondent does not maintain a laboratory fully equipped with facilities for...
experimenting with and testing quilts and like products; that the quilts are not filled with 50 per cent goose down and 50 per cent feather down; that they are not extra large in size, light of weight and extra warm, or free from lint, and that the quilts have never had the usual, customary and regular retail sales prices of $37.50, the purported introductory half-price of $18.95 being in fact the usual, regular and customary retail selling price of the respondent's quilts at all times. (4108)

CEASE AND DESIST ORDERS

Following cease and desist orders have been issued during the past week:

Kauffmann Bros. & Bondy, Inc., West New York, N. J., distributor of smoking pipes and other merchandise, has been ordered to discontinue lottery methods in the sale of its products. The Commission order directs the respondent to cease and desist from (1) selling and distributing merchandise so packed and assembled that sales to the public are to be made by means of a game of chance; (2) supplying to or placing in the hands of others (a) merchandise together with push or pull cards or punch boards or other lottery devices, or (b) such devices either with assortments of merchandise or separately, which devices are to be or may be used in selling any merchandise to the public, and (3) selling or otherwise disposing of any merchandise by the use of such lottery devices. (3881)

McKinley-Roosevelt College of Arts and Sciences, Chicago correspondence school, has been ordered to cease and desist from certain unfair competitive methods and deceptive practices in the sale of home study instruction courses in education, writing, psychology, chemistry, business and other subjects.

The order directs the respondent McKinley-Roosevelt College of Arts and Sciences to cease and desist from using the words “College” or “University” in its corporate or trade name, and from representing, through use of such words in its official name or in advertising literature or otherwise, that its business is that of a university, college or institution of higher learning. The respondent also is directed to desist from representing, through use of symbols indicating academic degrees or by any other means, that members of its faculty are educators duly qualified by higher education, when the degrees so indicated are not the result of study pursued in residence at recognized colleges or universities duly authorized to grant the respective degrees indicated, or when the symbols used do not represent degrees actually granted by such institutions to the respondent’s faculty members, or when the persons receiving such degrees are not teachers, educators, or persons of high educational attainment. (3571)

STIPULATIONS

During the week the Commission has entered into the following stipulations:

Absorene Mfg. Co., 1609 North 14th St., St. Louis, stipulates that it will cease representing its product “Abso Crystals” as being capable of whitening clothes perfectly or naturally, as giving longer life to fabrics, as making clothes whiter with less washing or rinsing, as being superior to soap or soap powders, and as being the most powerful water softener ever discovered by chemists and the most effective or economical cleanser or cleaner for all house cleaning, laundry and bath. The respondent also agrees to cease representing that “Absorene” sanitizes the atmosphere for healthful cleaning or that it does not crumble. (02548)

Bowey’s, Inc., 401 West Superior St., Chicago, has entered into a stipulation in which it agrees to cease certain representations in the sale of its “Dari-Rich Syrup.”

The respondent agrees to discontinue advertising that a drink prepared by dairies and others from its “Dari-Rich” chocolate flavored syrup, is made of milk, or otherwise representing that it is made of whole milk. The stipulation does not inhibit Bowey’s, Inc., from representing the finished drink to be milk or made of whole milk in localities where whole milk is used by dairies and others in the preparation of the respondent’s product.

Under its stipulation, the respondent also agrees to cease representing that the drink prepared by dairies and others from its syrup is a chocolate drink or is chocolate milk; that it is an aid to so-called ‘beauty diets’ and that it contains 100 per cent more energy value than other beverages, unless a direct comparison is made with a beverage specifically mentioned, the energy value of which has been determined scientifically.

The stipulation also directs the respondent from advertising that the drink will not lessen mental appetite if consumed between meals, and that it is a health-building drink. (02550)

Brigham Oil Burner Company—See Diagraph-Bradley Stencil Machine Co.

Diagraph-Bradley Stencil Machine Corporation, trading as Brigham Oil Burner Company, 3745 Forest Park Blvd., St. Louis, has entered into a stipulation in which it agrees to cease certain representations in the sale of oil burners of the so-called “blue flame” type for installation in stoves and ranges.

In its advertising matter, the respondent corporation, according to the stipulation, represented its product as a “new invention” which “burns 96 per cent air, 4 per cent of a cheaper variety of oil obtainable everywhere” and provides “cheaper heat without coal,” and “quick, clean, violent heat ** ** times hotter than coal, and cheaper.”

The stipulation points out that the respondent’s device is not new; that the greater proportion of air to oil consumed in the device is not substantial, if any, difference from the proportion of air to oil generally consumed in other oil burners, and that the fuel oil consumed in the device is not cheaper in all sections of the country.

Under its stipulation, the respondent agrees to cease the foregoing representations and to discontinue advertising that there is scientific basis for its claims; that all features of its device, including lighting, are automatic; that exclusive trade territory is reserved to each of the respondent’s agents, and that its agents or salesmen can make profits or earnings within a specified time which are in excess of the average net profits or earnings of the respondent’s full-time agents under normal conditions in a like period of time. (2766)

Eagle Penwir Company, Inc., 703 East 13th St., New York, has entered into a stipulation in which it agrees to cease certain representations in the sale of pens.

The respondent stipulates that it will discontinue use of the descriptive designation “Iridoid” as applied to pen points, and will cease use of this word or any other coined or fictitious expression the effect of which is to imply that the pen points so designated are made of or tipped with any purported substance having special or exceptional qualities.

The stipulation points out that the respondent’s pen points, as being equipped with “Spherical Iridoid Tip,” were in fact made of chromium steel or stainless steel alloy; that there is no substance known to science or industry as “Iridoid,” and that the tips of the pens thus designated did not contain any added valuable ingredient as implied. (2762)

Earnshaw Knitting Company, Newton, Mass., distributor of hosiery and garments, including diapers known by the trade name “Vanta,” stipulates that in the sale of its packaged products, it will cease use on its cartons or in advertising matter of the word “Sterilized” or any other word of similar implication as descriptive of products which are not in a state of sterility at the time of their removal from the package by the purchaser, and from use of such word in any manner tending to convey the idea that the products are free from any virulent bacteria or other micro-organisms at the time of their removal from the package by the purchaser.

The stipulation points out that diapers sold by the respondent had been subjected to sterilization processes at the plant but had not been so packaged and treated as to remain sterile or free from bacteria at or until the time of their removal from the package by the purchaser. (2760)

Falls Rubber Company of Akron, Inc., Findlay, Ohio, manufacturing and distributing automobile tires, has entered into a stipulation with the Commission in which it agrees to cease representing that its tires are free from defects and that they will not crumble when new. The stipulation points out that the respondent had entered into a stipulation in which it agreed to cease certain representations in the sale of its “Absorine Mfg. Co.”

The respondent has entered into a stipulation in which it agrees to cease certain representations in the sale of its “Dari-Rich Syrup.”

The respondent agrees to discontinue advertising that the drink prepared by dairies and others from its syrup is a chocolate drink or is chocolate milk; that it is an aid to so-called ‘beauty diets’ and that it contains 100 per cent more energy value than other beverages, unless a direct comparison is made with a beverage specifically mentioned, the energy value of which has been determined scientifically.

The stipulation also directs the respondent from advertising that the drink will not lessen mental appetite if consumed between meals, and that it is a health-building drink. (02550)
stipulation in which it agrees to desist, in connection with the sale or display of its merchandise (a) from the use, from any tires, or the wrapping thereof, or in connection with the advertisement, sale or distribution of such tires, of any mark, stamp, brand or label which imports or implies that such tires contain more plies in their construction than they actually contain. (2770)

Elam G. Hess, Manheim, Pa., in the sale of “Kano,” a food product previously known as “Pecano,” agrees to cease advertising that a comparison of the number of calories contained in his product with that contained in other foods is a correct basis for comparison of the nutritive values of the food values of “Pecano” or “Kano” is to any extent greater than that of other specified food, when such comparison is not based on measurable units; that the product supplies more nourishing value than does beefsteak, eggs, whole milk or fish; that it costs less than other specified foods, unless such representation is accompanied by a complete statement of the basis for the purported price comparison; that it is the best source of tissue building material, and revitalizes or renews one’s body, and that it is effective in treating malnutrition in all cases or in cases which may be due to cause other than a deficiency of the food elements supplied by this product. (02546)

Hodges Candy Company—See Klotz Confection Company.

Klotz Confection Company—F. C. Klotz, Jr., trading as Klotz Confection Company, 731 Brent St., Louisville, Ky., Mark D. Hodges, trading as Hodges Candy Company, Milledgeville, Ga., and Gorton Cigar and Candy Company, Flora, Ill., a dealer in candy, pipes and cigarettes, have agreed to cease using lottery methods in the sale of their products.

Under their stipulations the respondents agree to cease and desist from (1) selling or distributing their merchandise so packed and assembled that sales to the public are to be or may be made by means of a lottery scheme or gift enterprise; (2) supplying to or placing in the hands of others (a) assortments of their merchandise together with push or pull cards, punch boards or other lottery devices, or (b) such devices either with assortments of merchandise or separately, which devices are to be or may be used in selling such merchandise to the public, and (3) selling or otherwise disposing of any merchandise by means of such lottery devices. (2765-2768-2790)

Lilly Products Company, Inc., Attleboro, Mass., insecticide manufacturer, has entered into a stipulation in which it agrees to cease certain representations in the sale of its arsenical preparation “Ant Cuts,” designed for use as an ant and roach eliminator.

The respondent company agrees to cease selling its insecticides placed in containers simulating the dress or appearance of containers in which similar merchandise is sold by a competitor, with a tendency to deceive purchasers into believing that its merchandise is that of a competitor.

The stipulation recites that Lilly Products Company, Inc., sold its “Ant Cuts” in packages similar in dress and appearance to those containing “Ant Buttons” sold by Harris Products Company, Miamid, Fla., and that the resulting tendency was for purchasers to confuse the two products. The Miami company’s product, in its characteristic container, had become well identified in the public mind and had been on the market for several years prior to the appearance of the Lilly company’s preparation, according to the stipulation. (2764)

Magic Iron Cement Company—Herman J. Reich and A. W. Render, trading as Magic Iron Cement Company, Cleveland, Ohio, in the sale of their “Magic” casein glue, agree to cease employing in advertising matter the word “Waterproof” or any word of similar meaning or implication as descriptive of their glue which is not waterproof, and to cease from the use of such word in any manner conveying the impression that their product is impervious to water or its effects. (2773)

Mystic Laboratories, Inc., 257 Cornelison Ave., Jersey City, N.J., in the sale of their “New Birth of the Dream,” stipulates that it will cease representing that the product is an amazing or scientific development, or that, when rubbed on the hands, it will cause them to be as soft or as white as the hands of a child, or that it will cause any immediate transformation in the condition of the skin. The respondent also agrees to cease from representing that the product has any other than a temporary effect upon the skin unless regularly, or unless such representations are limited to rough, red or chapped hands. (02547)

New York Handkerchief Manufacturing Company, 1015 West Adams St., Chicago, agrees to desist from the use, directly or indirectly, of the terms “Pre-Shrunk” or “Shrink” or representations of like effect as descriptive of its goods when they are not shrink-proof or non-shrinkable, or have not been fully shrunk or properly prepared to the extent that there is a substantial reduction in the reduction of moisture content. The respondents agree to cease certain representations in the sale of their arsenical preparation “Pre-Shrunk” or “Shrink” are used properly to indicate that such goods have undergone a shrinkage process and have been shrunk to a substantial extent but there remains some residual shrinkage, then such term or word shall be accompanied by an explanatory statement of the percentage of residual shrinkage remaining in both the warp and the filling, or in the warp or the filling, whichever has the greater residual shrinkage; for example, “Pre-Shrunk (or shrunk)—will not shrink more than ——%.” The percentage of residual shrinkage so designated is not to be less than the percentage shown under recognized and reliable test methods such as Commercial Standard CS59-39. (2779)

Perry-Pfeil Tire & Rubber Company, 3238 South Michigan Ave., Chicago, and Herman M. and Alfred A. Bilski and Wolf Levy, have entered into a stipulation to discontinue certain representations in the sale of used automobile tires.

The respondents agree to discontinue using the word “reconditioned” or any other word of similar import, without qualification, or the picturization of tires purportedly equipped with treads or simulating those of new tires, or of such picturization in connection with the unqualified word “reconditioned”, the effect of which may convey the belief to purchasers that tires to be furnished them will be equipped with treads like those on new tires, or that the tires of such tires will be of such sound condition as the pictured treads, namely, the treads on new tires. The stipulation points out that the tires of tires sold in numerous instances by the respondents had not been restored to new tire condition or to the condition as portrayed in the advertising.

Other representations to be discontinued are use of any statement of any kind or agreement purporting to assure a continuity of service from tires which is improbable, and use of the phrase “for a limited time only” or words of similar meaning in connection with an alleged gift offer of merchandise, when in fact such gift offer is an ordinary and usual one, made in the normal course of business.

The respondents agree to cease requiring customers who seek to avail themselves of an advertised 12-months service, to ship their tires to the respondents’ Chicago office for inspection and pay the transportation costs, unless the fact that such conditions are imposed and such charges made is clearly set forth in the advertisement. (2765)

Pioneer Publications, Inc., R.K.O. Building, Rockefeller Center, New York, sells books entitled “Eugenics and Sex Harmony” and “New Birth Control Facts.” The stipulation recites that in its advertising this corporation represented that the method of avoiding of and avoiding conception, and that the book contains a table of periods during which conception is impossible. In its
stipulation the respondent admitted that as to a substantial num-
ber of persons the method outlined is not effective, and that for
a substantial number there is at present no way of exactly com-
puting the periods in which conception is impossible. The re-
spondent agrees to cease representing that the method outlined
is dependable in bringing about or avoiding conception, and that
the book contains a table or information, which, if followed, en-
ables all users to compute a safe period. (02549)

Rothenberg and Schloss Cigar Company, Kansas City, Mo.,
in connection with the sale and distribution of its cigars, tobacco
and pipes in commerce, has agreed to cease and desist from supply-
ing to or placing in the hands of others, cigars, tobacco and pipes
or other merchandise, together with punch cards, push or pull
cards or other lottery devices, which devices are to be or may be
used in selling or distributing such merchandise to the general
public; supplying to or placing in the hands of others punch boards,
push or pull cards or other lottery devices either with cigars, to-
acco and pipes or other merchandise, or separately, which lot-
tery devices are to be or may be used in selling or distributing
such merchandise to the general public, and selling or otherwise
disposing of any merchandise by means of a game of chance, gift
enterprise or lottery scheme. (2771)

Sabbagh Brothers, Inc., 230 Fifth Ave., New York, a dis-
tributor of decorative linens and handkerchiefs, agrees to cease
using the word "Manufacturers" as descriptive of its business and
doing so that it has factories in Chefoo, Swatow, or Shanghai, China, or elsewhere, when such is not a fact. (2758)

A. Zaphirio & Company—Peter Zaphirio, trading as A. Zaphirio
& Co., Chicago, Ill., engaged in the sale and distribution of
cigarettes under his private brand of "Zaphirio," agrees to cease
and desist from (a) use of the word "Manufacturers" as descript-
ive of his business, or of the legend "Fac. No. 335, 2nd Dist.
N. Y.", in a manner importing or implying that such factory is
his own, and from use of any other words of similar implication
tending to convey the belief that he makes or manufactures the
products sold by him, or that he actually owns and operates or
directionally or absolutely controls the plant or factory in which
such products are made or manufactured; (b) representing that
the cigarettes sold by him are "blended from our own direct im-
portation of choice Turkish tobacco," or in any other way rep-
resenting that he is an importer of such tobacco or of any other
commodity, and (c) representing that he has branch places of
business in New York or in Cavalla, Macedonia, or elsewhere. (2772)

FTC CASES CLOSED

The Federal Trade Commission has closed without prejudice
its case against Tanen Shirt Company, Inc., 596 Broadway, New
York, charged with misleading representations in the sale of men's
shirts.

The closing order recites that the respondent has discontinued
the unfair practices alleged in the Commission's complaint and has
agreed to accept and abide by the rules of fair trade practice
concerning shrinkage of woven cotton yard goods promulgated
by the Commission June 30, 1938.

Closing of the case was ordered without prejudice to the Com-
misson's right to reopen it and resume prosecution, should future
facts so warrant.

The Commission has also dismissed a complaint charging Paul
S. Hervey, trading as Aldine Dental Stationers, Des Moines, Iowa,
with misleading representations in the sale of stationery.

The Commission also has dismissed a complaint issued against
the late Daniel A. Brennan, who had maintained an office at 10
South LaSalle St., Chicago, and Acco Products, Inc., 39th Ave.
and 24th St., Long Island City, N. Y., paper fastener manufacturer,
who had been charged with a combination and conspiracy tending
to suppress competition and create monopoly in the sale of paper
fasteners.

The Commission has made findings as to the facts in the case,
based on the respondents' acts and practices up to the time of
the death of the respondent Brennan on February 15, 1940, and
has concluded that these acts and practices had a tendency to
prevent competition and restrain interstate trade in paper fasteners.

Commission findings are that the respondent Brennan, who had
been a Chicago patent attorney and also an inventor, had obtained
patents for certain paper fasteners and licensed Acco Products,
Inc., to manufacture and sell paper fasteners under his patents,
and that under an agreement entered into between the respondent
Brennan and Acco Products, Inc., they had cooperated and con-
spired in circulating other paper fastener manufacturers and
retailers, by means of letters in the respondent Brennan's name,
threatening suit for infringement of patents owned by Brennan.

The findings are further that such letters had not been written in
good faith; that the respondent Brennan had never instituted any
such infringement suits, and that the purpose of the letters had
been to enhance the sale of the Acco company's products and
to harass Acco's competitors.
BMI Developments

Don Searle notified Neville Miller this week that Stations KOIL, Omaha, and KFAB and KFOR, Lincoln, were subscribing to BMI. Station WWJ, Detroit, and WPID, Petersburg, Va., are other recent subscribers.

Appointment of George Marlo as professional manager of Broadcast Music, Inc., was announced May 7 by M. E. Tompkins, general manager of BMI. Mr. Marlo is at present manager of the Crawford Music Corporation and was recently elected president of the newly organized Music Publishers Contact Employees Union, an affiliate of the American Federation of Labor. Mr. Marlo will take up his new duties on Monday, May 13th.

In making the announcement Mr. Tompkins said: "This is the appointment the amusement industry has been waiting to hear. Mr. Marlo knows the popular music business as few other men in the country. He is respected by the music industry, composers, and performing artists alike."

Mr. Marlo began his career with De Sylva, Brown & Henderson in 1928. Two years later he organized his own publishing house, Marlo Music. In 1932 he was with the Paramount group for a short time before going to Warner Brothers in charge of the Remick catalogue, where he remained until 1936 when he revived Marlo Music. In 1937 he sold Marlo Music to the Dreyfuss interests and went with them in charge of Chappell Music Co. He has been with these companies ever since in different capacities, most recently as manager of Crawford Music.

In discussing his affiliation with Broadcast Music, Mr. Marlo said: "What I think of BMI is indicated by the fact that I am joining its staff. I know it is going to be a success or I wouldn't wish to be associated with it."

"BMI represents a new idea in the song publishing world," he continued, "— that of giving a break to the unknown or little known composer. Most of the older publishing houses want the work of 'established' writers. They work on the theory that because a man has written a lot of songs and has produced a number of hits, because he has been well known for ten years, he's likely to produce a more successful song. Actually the exact opposite is frequently true. The man who has been writing for years is the more likely to go stale.

"The newcomer has a freshness in his music, a new appeal—if he can get a hearing. Of course there are old-timers who can turn out hits, but the publishing house that gives a chance to the newcomer is seizing a golden opportunity that the older houses have been passing up.

"Only a good song can make a hit. BMI is going to succeed because it is tapping new sources of good songs. Once you have a good song, of course there is no medium that does so much to popularize it as the radio.

"My talks with men in the other publishing houses have convinced me," he said, "that the music publishing industry looks upon BMI as a new house that is offering them fair competition and thus giving a stimulus to business. I am very glad to be a part of it."

Charles E. Lawrence has been appointed Comptroller of BMI and took up the work of that office on Monday, May 6th.

Mr. Lawrence was born in Philadelphia and studied at Temple University. He has been engaged in the work of accounting and auditing for the past twenty years. Since 1932 he has been with the American Home Products Corporation. For two years he was Comptroller of various subsidiaries of that company in Chicago. In 1934 he was transferred to the New York offices and since 1937 has been General Auditor.

Previously he was with Merritt-Chapman & Scott Corporation and with Franklin Baker Company and associated companies.

The Great Atlantic and Pacific Tea Company was one of the most important radio advertisers until June, 1937, when it went off the air entirely. Now it is planning to return to the air with a program which will incidentally feature BMI.

The Musico program, sponsored by National Tea Company from WGN in Chicago, was a sort of musical bingo. The music played was not announced. The listeners
guessed at the titles by marking cards containing twenty-five squares, five to a row, a song title in each. When a listener had filled in a row correctly, he became eligible for a prize.

The program was so successful for National Tea that A & P is now trying it out—but with a variation. The new cards contain in each row of five squares only four titles. The fifth square is blank. In that blank the listener may suggest a title for a new song—one new song to be played on each program. The winner gets $100 plus 50% of any royalties on the new song. All the new songs are to be compositions that have not been published at the time of the broadcast. Immediately after the broadcast each new number is to be submitted to Broadcast Music, Inc.

All proceeds from the sale of the new song written by Frank Luther in memory of Will Rogers will go to the Will Rogers Memorial Fund. This has been agreed by Mr. Luther and the BMI officers.

The song, Our Old Friend Will, has already been performed on the air by the composer himself. It will soon be released by BMI.

In a preface to the song, Mr. Luther says:

Will Rogers was a second father to me. I once made a concert tour with him—one-night stands all over the United States. . . . He was the only man I've ever known who practiced the American principle that all men are created equal. He never looked down on a newsboy, and he never looked up to a king. . . .

I've written this song to try to say in my humble way what I feel about the greatest man I've ever known.

Did you ever see a man step on his own toes—and blame the shoemaker? Look at one of the ASCAP officers.

He is Irving Caesar, ASCAP's Assistant Treasurer who once thought he wanted to debate with BMI's President or General Counsel. Last Tuesday he got his feet so tangled that it was hard to tell which way he was heading. There were moments when he was right in step with BMI. And of course BMI welcomes all recruits—even if they come from the ASCAP camp.

On Tuesday Mr. Caesar, speaking as President of the Songwriters' Protective Association, complained that too few songs are plugged on the air—songs by too few writers. One of the worst aspects of the very situation created by ASCAP itself which BMI, to the great distress of the ASCAP organization, is trying to remedy! If Mr. Caesar would only take his right foot off his left foot, perhaps the bunions wouldn't bother him so much.

The point at issue is an indirect result of the ASCAP policies which have kept all the opportunities for song-success in the grip of ASCAP's cherished few. Mr. Caesar was objecting to the attention given to the weekly "most-played" lists and the tendency to build up huge figures for the first ten or fifteen numbers on those lists with consequent discouragement for other writers. That is really the whole ASCAP situation reflected in miniature.

Is it possible that Mr. Caesar, an ASCAP officer and director, is beginning to understand how the difficulty of getting a song before the public can discourage a writer? Has he really caught the picture of what happens when the music that gets a chance for popularity comes from an ever-narrowing circle of writers rather than from a widening one?

Those questions are still matters of some doubt, but at least Mr. Caesar has discovered one thing that all people except the High Priests of ASCAP have known for years—namely, the plugging power of radio and the fact that the writers need radio more than radio needs any particular group of writers. As reported in Variety, he said, "It's got so that people remark, 'That tune must be a hit because I hear it so much.'"

The item might be included in a biography called "The Education of Irving Caesar."

Variety adds:

"Another twist to the discouraging element mentioned by Caesar is reflected in the report that the SPA, whose members are virtually 100% ASCAP-affiliated, fears that if many of the older writers don't start getting breaks on the air they may be inclined to place some of their manuscripts with Broadcast Music, Inc."

Such gems of argument suggest that a debate with Mr. Caesar at one end of the platform might afford a rather amusing evening.

Or perhaps there won't be any need for debate. On the particular point he raised, Mr. Caesar was making the same plea that BMI is making and the effect of his speech was to support the aim and effort of BMI.

---

Television and FM

FLY DISCUSSES TELEVISION, FM

Within the next week or two, the FCC expects to clear up the television situation in "satisfactory shape", James Lawrence Fly, Chairman, told a press conference the latter part of last week.
Chairman Fly told the newsmen that there must be healthy competition in the industry, but whether or not standards should be set up at this time is one of the questions to be decided by the Commission, he said. The Chairman stated that as he recalled it the engineers appearing before the Commission were practically unanimous in the opinion that standards should not be fixed at the present time but he did not indicate the possible action of the Commission.

Chairman Fly was not very clear in discussing limited commercialization of television, but there was an intimation in his statement that when the Commission acts it is possible that there might be full commercialization rather than limited.

The Chairman stated that when the Commission considers television it will necessarily have to consider frequency modulation at the same time, but he was very clear in his statement that the Commission will announce its television policy before it announces its policy on FM and he stated that any announcement on frequency modulation would probably come along about a week after its decision on television. In connection with the television situation Mr. Fly told the correspondents that after all is said and done “the engineers are going to write the ticket.”

Chairman Fly stated that he expects the monopoly report to be in the hands of the Committee within the next few days, but he made no mention about when the Committee would be able to report to the Commission proper.

**LUNDEEN PROTESTS DELAY**

On May 6, Senator Lundeen (FL-Minn) made a lengthy speech in the Senate, protesting “against the delay in the matter of the FCC decision on television.” (Congressional Record, May 6, p. 8573).

**RCA AND DUMONT BRIEFS**

RCA and Allen B. DuMont Laboratories, Inc., debated today in briefs filed with the FCC the question of engineering standards for television broadcasting.

DuMont accused RCA of seeking to “freeze” standards. It argued for flexibility.

RCA asserted that “the motion picture interests, which are financing DuMont laboratories, have a much greater financial stake in the ‘movie’ industry than they have in television.”

“Their recent interest in television is primarily for the purpose of ‘protecting’ their larger interest in the ‘movie’ and theater industry and not to develop the new art of television,” the RCA brief added. “Therefore, they desire the adoption of systems and methods which would make television inferior rather than superior to motion pictures.”

RCA favors the transmission standards formulated by the Radio Manufacturers Association, but has said it was prepared to build television receivers so that they would also receive programs from other transmitters.

DuMont said that the commission “has had adequate opportunity to learn that standards must be set by governmental authority and not by commercial agreement.”

“It is suggested that it is now clear that the key to the situation is the compulsory requirement of the high-frequency DuMont type pulse which can be installed in a few hours for minimum expense by any transmitting station,” DuMont said.

It added that the “record shows that the cost to somebody of the reconstruction of fixed type small-sized non-retentive screen receivers so as to adopt them to the progress possible in the immediate future with flexible standards would be between $30 and $70, including change of screen.”

**SARNOFF’S VIEWS**

At the annual RCA stockholders meeting in New York Tuesday, David Sarnoff, RCA president, said:

If I were asked to name the most significant factor in the progress of RCA during the past decade, I would unhesitatingly say research and technical development. Ten years ago we were largely dependent on the electrical companies then associated with us. Today RCA itself has over 600 technical specialists in its laboratories and engineering departments engaged in this important work.

Research has directly contributed to our income and earnings; it has enabled us to expand the scope and variety of our products and services; and today promises even greater expansion in new fields.

As the result of RCA research, three new services now beckon those who seek to expand radio’s usefulness. They are: Facsimile, Frequency Modulation, and Television.

*Radio Facsimile* is the transmission of pictures and printed matter through the air. It is now bringing photographs from many parts of the world for prompt use in daily newspapers. Its development will include services for the home, as well as for the press. The latest type of RCA Facsimile Receiver is on exhibition in this room today and we cordially invite your inspection.

*Frequency Modulation (F.M.)* holds much promise for the future. The growth of Frequency Modulation in broadcasting...
services will probably be gradual. Only time can determine the extent of its full development.

RCA's research engineers have done pioneering work in this field and in the development of uses for the ultra high frequency spectrum, where F.M. has its most advantageous applications. Our laboratory tests and field experiments have been extensive. Many fundamental inventions have been made by our engineers during the course of this work. RCA has valuable patent rights in these developments and has granted licenses under them to practically the entire radio industry.

F.M. represents an important forward step in the broadcasting of sound. The Federal Communications Commission now has under consideration the subject of authorizing frequency-modulation on a commercial basis.

Television, on the other hand, adds sight to sound, and stands today on the threshold of public service. In time, television is bound to revolutionize the broadcasting industry just as the addition of sound to sight revolutionized the motion picture industry.

RCA's laboratory achievements, its field tests and its experimental program service have been fully reported at every stage of development.

The position of the Corporation with respect to placing television on a commercial basis has been stated fully during recent hearings before the Federal Communications Commission and the Interstate Commerce Committee of the United States Senate.

The Federal Communications Commission is now considering the testimony presented by RCA as well as by others in the industry.

While television will provide a new service for the home, it will be useful also in theaters and other public places. Developments in large screen television, which we will demonstrate to you today, will enable you to form your own judgment as to its future possibilities. No one can foresee all the future uses to which television may ultimately be put. But this much is clear: the addition of sight to sound in radio will be of vital importance to industry, education and entertainment.

RCA is proceeding on three fronts in television. Our research laboratories are continuing to develop new processes and new equipment; our manufacturing and sales people are exploring new markets; and our broadcasting company is proceeding with its development of television programs.

Television offers new opportunities for the employment of men and money, for the expansion of entertainment and other services, and for the creation of a new medium of advertising for American industry and business.

The Corporation's policy in respect to its inventions and patent rights, including its developments in television, is well known. RCA has licensed the radio industry under its patents. While this Corporation has pioneered in television, we are not alone in this field. There is no monopoly in radio, nor is one possible in this highly competitive industry.

REPUBLICANS WELCOME TELEVISION

Television will take its place in the front row at a national political convention for the first time in history next June.

John Hamilton, chairman of the Republican National Committee, announced this week that two National Broadcasting Company television units, and that of the Philco Radio and Television Corporation, will televize the proceedings of the 1940 Republican National Convention at Philadelphia beginning next June 24.

Hamilton said he took "a peculiar pleasure" in making the announcement.

"The Republican Party," he said, "is the party of private enterprise and welcomes this chance to provide an opportunity for a new industry to stride forward in honest American fashion."

"It was but a few days ago that the New Deal, through its dominated Federal Communications Commission, struck viciously at this very industry by bluntly commanding it to cease its efforts at merchandising.

"We of the Republican Party sincerely hope that the public interest in coming to television by reason of its use at the 1940 Republican convention will more than offset the setback given this new industry by the New Deal."

May 10, 1940

Radio Festival

TO ALL STATION MANAGERS:

WANTED

FOR HANGING

RADIO FESTIVAL PHOTOS

We have the space. All that's needed to complete a section of NAB's picture gallery are good black and white gloss prints of Radio Festival events.

Most Radio Festival participants will make at least a partial pictorial record of Radio Festival for their own use. One good print, action shot preferred, will get a permanent hanging if it's sent.

Please autograph the photo in india ink.

Sincerely yours,

Arthur Stringer.

Radio Festival is going over big!

It works—with intense satisfaction to participants. That, after all, is the acid test.

There is something that every station can do to impress listeners with the importance of radio, with the contributions which radio makes to the pleasure and betterment of everyday living. What you do helps keep radio out in front!

Reports from several cities follow:

BELLINGHAM ... KVOS.

Though the first of the month found KVOS engaged in a civic promotion enterprise, President Roger Jones wrote that the folks of Bellingham and vicinity are going to have their Radio Festival. While plans are not yet complete, he has booked advance speaking dates for the demonstration-talk, born at WLVA, Lynchburg, Va., and distributed by NAB through the courtesy of Edward A. Allen, the station's president.

Mr. Jones is taking in "civic and service clubs, church groups, grange groups, Chambers of Commerce, veteran organizations, etc." And in conclusion, he wrote: "You are doing a splendid work, and I trust you will keep it up."

CHARLOTTE, N. C. ... WBT and WSOC.

Charlotte's two stations, WBT and WSOC, are busily engaged in planning their Radio Festival festivities. Paul W. Norris, sales promotion manager of the latter station, and Program Director Charles Crutchfield, WBT, have direction of plans for their respective stations. Date is June 3-8.

RALEIGH ... WPTF

Richard H. Mason, manager, WPTF, has likewise selected the June 3-8 period to bring Radio Festival to Raleigh and surrounding territory.

OTHER NORTH CAROLINA CITIES

"Dick" Mason is also president of the North Carolina Association of Broadcasters and he reports enthusiastic support for the spring promotion by the industry. An exchange of correspondence between state broadcasters and President Mason indicates that most of the stations will observe the early June date.

Other plans of Manager Robert J. Straton, WDNC, Durham, were reported in the weekly bulletin of May 3. With a large number of other state stations staging Radio Festivals, it is apparent that North Carolina's broadcasting industry will surpass previous records.

WRIG, Greensboro, completed its Radio Festival celebration Saturday. Thousands of visitor were entertained at studios and transmitter. Greensboro public schools presented twelve separate
programs during the week. There were programs from schools in eight counties, besides programs from the University of North Carolina; Woman's College of the University of North Carolina; Greensboro College: A. and T. College; Lutheran Emanuel College; Bennett College and Guilford College.

DANVILLE, ILL., . . . WDAN

"Duke" Richardson, manager, WDAN, "The Community Station," has Radio Festival celebration under way. We don't know what he is planning this year, but it's a reasonable assumption that an open house will play a part. Last spring WDAN had over 7,000 visitors in three nights, between seven and ten. Two thousand five hundred roses were given to as many women guests before the supply ran out.

He staged audience participations, interviews and quiz programs with dollar bill give-aways. Radio stores, all over town, erected displays in their windows for the entire week, and five of the station's sponsors featured radio week windows. A local men's wear shop used figures and microphones to represent their broadcast over the station.

JAMESTOWN, N. Y., . . . WJTN

Program Director Marshall B. Shantz, Jr., wrote on May 6 that "This station is planning on entering wholeheartedly into National Radio Festival, June 3 to 8."

This event has a double significance for a small station such as WJTN. Not only will it be of great assistance to us in that ever present question of promotion, but we hope publicity will encourage that the greater cooperation in this city between the public and radio—which should result from this Radio Festival—will be of great help in absorbing the many 'growing pains' attendant upon our ever present expansion."

(Related statement by President Alfred J. McCosker of WOR which also discusses this same subject of industry solidarity.)

Mr. Shantz has worked out plans for an outstanding celebration with everybody entered in the Essay Contest. He believes that Jamestown youngsters are smart enough to collect the NAB $100 grand award. Luck to you, Mr. Shantz.

W. E. Whitmore, head man of KWEW and KGFL, prevailed upon the Governor to bring New Mexico officially within the nation-wide industry celebration. Mayors of both Roswell and Hobbs have both issued city proclamations. During the week there will be broadcasts by prominent citizens, including the Superintendent of Schools and faculty members of the New Mexico Military Institute. Copies of "Radio's Riches" will be distributed. Youngsters in the public schools will compete in the observance of the event by listening to the special programs and visiting the studies."

Governor John E. Miles in official proclamation has proclaimed "the week of May 12 as Radio Festival Week throughout the State of New Mexico, and I urge our citizens everywhere to participate in the observance of the event by listening to the special programs and visiting the studies."}

W. E. Whitmore, head man of KWEW and KGFL, prevailed upon the Governor to bring New Mexico officially within the nation-wide industry celebration. Mayors of both Roswell and Hobbs have both issued city proclamations. During the week there will be broadcasts by prominent citizens, including the Superintendent of Schools and faculty members of the New Mexico Military Institute. Copies of "Radio's Riches" will be distributed. Youngsters in the public schools will compete in the Essay Contest.

NEW YORK CITY . . . . WOR

Alfred J. McCooser, president, WOR, lost no time in getting into the subject of his station's participation when he announced initial plans in a letter last Monday.

"I should like to assure you," he wrote, "of WOR's participation in the National Association of Broadcasters' National Radio Festival. We have set aside the week of July 4, but hopefully we have already been drawn up for promotion, publicity and programming."

Mr. McCooser's next paragraph is also quoted because it expresses so clearly the advantages which accrue to the broadcasting industry when individual units deliberately and publicly join hands. He said:

"It is a pleasure to be able to cooperate with the work you are doing, as I feel that the more radio makes the public conscious of its efforts as a solidified industry, the more we, within the industry, will be able to do in mutually evaluating our problems and our subsequent gains.

Some of the ideas which WOR contemplates are:

1. "Transmitter Open House"—This would be open to children accompanied by parents who would write in for visiting tickets. At the time the tickets were sent, a mimeographed instruction sheet would also be sent. A different host would be on hand on different days, viz. Bob Emery, Irving Caesar, Bill Slater and Uncle Don.

We are also considering an occasional day-time interview from the transmitter with our host talking to one or two of the visiting children.

2. "AN ESSAY CONTEST"—The probable subject would be: "What WOR Means to Me." The best letter each day for a week would be read over the air during our five minute program preview period, and a daily prize of $10.00 offered.

3. "I REMEMBER"—Spotting of WOR's ten-year veterans for interviews on various programs during the week; pointing up the tradition and continuity of radio. Personalities would be Uncle Don, John Gambling, Roger Bower, Jack Poppele and others.

4. "SHUT-INS"—An all-request program dedicated to shut-ins. We are evaluating an idea in this respect by asking superintendents of hospitals to write in for radio sets if their hospital has none. We believe we can get a reasonable number of reconditioned sets from the Radio Servicemen of America.

5. "BLOW-UP TELEGRAMS"—Signed by various WOR personalities to be displayed in telegraph offices, calling attention to the week and the festival.

6. "Presentation of WOR's Credo of policy which has recently been written. It is a brief but eloquent statement of all we are doing and trying to do in serving the public. This would be released to trade papers, and we are considering offering it to Gabriel Heater for discussion on one of his programs.

7. "A radio serviceman will be spotted as a guest on a variety program for an interview.

8. "We will ask Miss Peggen Fitzgerald, our very clever fashion designer and commentator, to design a festival "radio hat". This would be tied in with a special department store window with equipment as a background showing its historical improvement."

QUINCY, ILL., . . . WTAD.

C. Arthur Filer, general manager, has augmented his original plans. We've shipped him the last thousand copies of the first printing of "Radio's Riches" which he plans to distribute during Radio Festival.

WILKES-BARRE, PA., . . . WBAX.

J. A. Seville, general manager, WBAX, is the first to announce an Amateur Photographic Contest as a part of National Radio Festival. Wilkes-Barre department stores and those in other cities within the station's service area have agreed to display the entries along with appropriate captions and posters.

The Mayor of Wilkes-Barre, Chamber of Commerce officials and the Wyoming Valley High School Conference of some twenty schools are all tied in with the week's program. Special programs of the activities will fill the airlanes for the entire week.

THE YANKEE NETWORK

R. L. Harlow, vice president, Boston, among other things said: . . . You have already received notifications of cooperation in the Radio Festival.

"We are definitely planning to do something along similar lines in Providence with Station WEAN . . . ."

FAIR'S RADIO DAY JULY 4

The NAB has accepted the invitation of the New York World's Fair to develop a suitable celebration of a day set aside in honor of the broadcasting industry. Following consultation with NAB, the day designated was July 4.

The President will be invited to participate in the exercises, along with Neville Miller, president of the NAB, and a committee representative of all elements in the broadcasting industry, including the heads of the major networks. Distinguished men and women from all walks of life will be invited to witness and bear testimony to the importance of the event. The central section of the ceremonies is tentatively scheduled to be broadcast, while re-broadcasting privileges are being requested for non-network stations. Arrangements are to be worked out by Ed Kirby, NAB Director of Public Relations, in collaboration with industry people and representatives of the New York World's Fair.
On this occasion the NAB plans to dramatize the expression and the ideal “freedom of radio” which has long since taken its place alongside the concepts of the terms “freedom of the press” and “freedom of religion.”

DENTISTS PROTEST ADS

Headquarters has received the following resolution from the Radio Broadcasting Committee of the American Dental Association:

“To the Board of Trustees of the American Dental Association:

“At a special meeting of the Board of Trustees of the Pennsylvania State Dental Society, held March 31, 1940, it was unanimously voted that the American Dental Association, through proper channels, contact the Federal Radio Communications Board in regard to control and limitation of radio programs of advertising dentists and other commercial dental programs on the air.”

CONSUMER STUDY

Continuing the NAB inquiry into the effect of the consumer movement might have on radio advertising, Neville Miller met Wednesday with the committee of Consumer Relations in Advertising in New York. Kenneth Dameron, the director, made a complete report on the activities of the committee’s staff and the meetings he had attended. He also outlined plans for the future. The following members of the committee were present:

John Benson, A.A.A.A., Chairman of the Committee (representing advertising);
Julius Adler, New York Times (representing newspapers);
William Raydel, Newell Emmett, member of the A.A.A.A. (representing advertising);
Fred Healy, Curtis Publishing Company (representing magazines);
Chester LaRoches, Young & Rubicam (representing advertising);
Neville Miller, NAB (representing radio).

PACIFIC ADVERTISING CLUBS

The Pacific Advertising Clubs convention is slated for July 7-10, in Vancouver, B. C. It has been suggested that some members might like to attend the convention, then take a three weeks’ vacation in the West before the NAB convention in San Francisco, August 4.

TEACHING BY RADIO

Radio has a more than two-to-one edge over textbooks as a method of learning school lessons, as far as some junior high school students are concerned.

In a questionnaire answered by seventh and eighth grade pupils of Bronxville, New York, 45 per cent said they found it easier to learn by radio than from books. Thirty-five per cent decided it made no difference and only 20 per cent voted for books as the easier medium.

The study was made by the Evaluation of School Broadcasts at Ohio State University, Columbus, Ohio.

The pupils who found it easier to learn by radio said the broadcasts gave better explanations and held their interest better. They declared that the radio programs left out the dull, boring parts—in short, that the radio method was more amusing and “more fun.”

Pupils who said it was harder to learn by radio felt that not enough facts were given on the broadcasts. They preferred books because they could go back and re-read their lessons several times, while on the radio information was given only once. And some said they found it hard to understand the radio speakers and actors, because they didn’t speak distinctly.

WINDOWS ARE OPEN

Spring is here; summer is just around the corner; and people are beginning to keep their windows open day and night.

All of which means that this is the season of the year in which the NAB receives all sorts of letters and resolutions from people who somehow believe that the broadcaster is responsible for the volume of sound emanating from neighbors’ loudspeakers, one letter suggesting that the stations ought to “reduce the power after ten o’clock at night.”

In each case, the NAB points out that the broadcaster cannot be responsible for the failure of a person to consider the comfort of his neighbor. However, it does believe that an occasional friendly reminder on the air might build goodwill all the way around, placing the station in the position of being concerned with those who wish to exercise their right to listen late at night, and also with those who wish to quit listening at an earlier hour.

LEGISLATIVE COMMITTEE

The NAB Legislative Committee met yesterday at headquarters. The Logan-Walter Bill to improve administrative procedure and judicial review of administrative proceedings was considered by the Committee, but no action was taken. Those present were John A. Kennedy, Chairman, Harry Butcher, John Elmer, Frank M. Russell, Theodore C. Streibert and Neville Miller.

FEDERAL LEGISLATION

H. R. 9665 (Clason, R., Mass.) COPYRIGHT—To reduce the amount of damages for infringement of copyright of musical compositions in certain hotels and other places. Referred to the Committee on Patents.

H. R. 9703 (McGranery, D., Penna.) COPYRIGHT—To amend the Copyright Act of 1909, and for other purposes. Referred to the Committee on Patents.

CONVENTION RESERVATIONS POUR IN FROM WHOLE COUNTRY

With requests for NAB convention room-reservations pouring in from all parts of the country, Howard
Land, KFBK, has appointed Lincoln Dellar, KSFO, chairman of the convention housing committee. The number of requests for reservations indicates that broadcasters from the east, south, and midwest will attend the convention in full force. Many are taking their families with them and are combining the convention with a West Coast vacation trip.

Ralph Brunton, KJBS, is chairman of the Treasure Island entertainment committee and is making extensive plans for entertaining the delegates at the Fair.

Ward Ingrim, KFRC, is chairman of the golf committee which is making arrangements for the annual NAB Tournament for the Broadcasting trophy, to be played Sunday, August 4.

Again the NAB urges those broadcasters interested in an all-expense trip to communicate with Russell Place, NAB counsel. Raymond Whitcomb, Inc., has been engaged to act as agent for the NAB in arranging the details of these all-expense trips.

**FCC APPROVES NAB LOG**

The NAB is sending to member stations, this week, a “Program Log Recommendation” designed to aid members comply with Rule 3.90A of the FCC Rules and Regulations Governing Broadcast Stations, and approved by the FCC. The report was prepared by the NAB Research Department for the Accounting Committee and submitted to the FCC for its review, March 30, 1940. The following letter was addressed to the Commission:

March 30, 1940.

Mr. T. J. Slowie, Secretary,
Federal Communications Commission,
Washington, D. C.

Dear Mr. Slowie:

There is attached a copy of a Program Log Recommendation prepared by the Accounting Committee of the National Association of Broadcasters. The recommendation is designed to aid stations to comply with Rule 3.90A of the revised Rules and Regulations Governing Broadcast Stations, issued by the Federal Communications Commission last August. Many stations appealed to the NAB for assistance in preparing a suitable form for the keeping of a Program Log and in interpreting the detail of information to be recorded on the form.

In the work of preparing the Program Log Recommendation for the NAB Accounting Committee, the Secretary-Treasurer and the Research Director of the Association consulted with a sub-committee of the Commission’s Rules Committee. NAB is grateful for the splendid cooperation of Mr. Porter of the Law Department, Mr. Sutton and Mr. Utter of the Accounting Department, Mr. Massing of the License Bureau and Mr. Ring of the Engineering Department, Chairman, who comprised the sub-committee. Their aid was invaluable in preparing the recommendation.

We ask you to submit the Program Log Recommendation to the Commission to ascertain whether it complies with the requirements of Section 3.90A of the Rules. Paragraph three of the first page of the recommendation points out that minimum requirements to comply with the Rule are set forth in the recommendation. We do not seek to establish a standard form since the Program Log can serve station management beyond Commission requirements by the inclusion of additional data. As an example, the form can be used, with some revision, as a ‘proof of performance’ record for commercial programs and employed as a Journal for billing.

In mailing this recommendation to stations we would like to be able to say that the Commission is in accord, that it fulfills the requirements of the Program Log Rule and thus render the recommendation of maximum value to the Commission and the industry. We trust that this can be accomplished without the necessity of formal Commission action.

Should there be any questions concerning the recommendation, we will be glad to answer them.

Very sincerely yours,

s/Edwin M. Spence,
Secretary-Treasurer.

The reply to the NAB letter was as follows:

May 8, 1940.

National Association of Broadcasters,
1626 K Street, N. W.,
Washington, D. C.

Gentlemen:

This will reply to your letter of March 30, 1940, submitting for review a proposed “Program Log Recommendation” dated March 22, 1940, with attached log form and “Instructions—Program Log.”

The Commission has determined that the log form submitted by you makes provision for the keeping of log entries as required by the Rules now in effect applicable to standard broadcast stations, and that the instructions submitted by you for keeping the log are appropriate under the Rules.

Very truly yours,

s/T. J. Slowie,
Secretary.

The FCC’s official report No. 928 (B)—“Decisions of the Commission,” dated May 8, 1940, which reports the action of the Commission en banc on May 7, includes the following note on the NAB Program Log Recommendation:

**NAB PROGRAM LOG FORM**

The Program Log Form submitted by the National Association of Broadcasters, was held to be in keeping with program log requirements under Sec. 3.90(a) of the Commission’s rules and regulations.

**APPEALS FROM FCC**

In *Evans*, doing business as the Voice of South Carolina, v. *Federal Communications Commission*, decided April 29, the Court of Appeals for the District of Columbia by extension of the reasoning of the Pottsville case (*— U. S. —, decided January 29, 1940), held that it was without power to interfere with the functioning of the FCC with respect to an application for modification of a contested construction permit, which application had been filed by one of the parties to the appeal during pendency of the appeal. In denying appellant’s (the existing station’s) motion for a stay order against Spartanburg Advertising Agency, holder of the contested C. P., the court said: “The limited function which this court plays in its appellate review, therefore, is crystallized by it in no ‘vested right’ as against the power of the Commission to consider other applications, whether for the same or competing facilities and the rights of others to have their applications considered. The court’s decision has in it, of course, an element of finality; but within the principle of the Pottsville decision, it has no finality as against the power of the Commission to make a proper allocation of facilities as required by ‘public interest, con-
venience and necessity,' whether upon applications involved in the appeal or others, so long as its doing so does not involve disregarding the court's decision upon the questions of law determined in the appeal. This is clearly so as to applications of third persons not involved in the appeal. The Principle is equally applicable to new applications filed by one of the parties to the appeal, but not involved in it."

Having concluded that if the appeal had been determined, the Commission would have jurisdiction to consider the application for modification within the rule laid down by the Pottsville decision, the court took another step and decided the Commission had jurisdiction while the appeal was pending. "To hold otherwise," the opinion states, "would be in direct contradiction of the administrative purposes and procedure created by the statute with a view, among other things, to prompt and efficient disposition of the Commission's business and the conflicting claims presented to it."

In respect of appellant's contention that failure to secure the stay would render the appeal moot, the court stated: "If the Commission's action renders the appeal moot, we will be powerless to prevent it; insofar as it does not do so, the appeal retains full vitality; insofar as it may raise new appealable issues, they must be presented upon another appeal and another record in any event. These alternative possibilities may not involve the technical finality characteristic ordinarily of the judgments and decrees of courts. But they will bring more quickly and as fairly to a conclusion the entire controversy among the parties, a result more obviously in accord with the purposes of administrative action than the observance of merely technical conceptions evolved in and characteristic of another process."

TOBEY ASSAILS FCC

Senator Tobey (R-NH) assailed the FCC this week for failure to make its "monopoly" report. The Senator sent the following letter to the Commissioners:

May 3, 1940.

Dear Mr. :--;

In November 1938, Chairman McNinch stated to the House Appropriations Committee that the Radio Monopoly Report of the Commission would be submitted to the Congress within sixty days.

In June 1939, as Chairman of the Federal Communications Commission, you appeared for the Commission, before the same Congressional Committee, and said that the report would be ready for Congress within sixty days.

In November 1939, Commissioner Fly of the Federal Communications Commission appeared and stated before the Congressional Committee that the Commission would make its report and recommendations within sixty days.

It is now eighteen months since Congress was officially told by the Commission that its Radio Monopoly Report and recommendations would be "ready in about sixty days."

"I submit to you that, in the light of these facts, these assurances would seem to be nothing but a mockery. As a member of the Senate, interested in this matter, I ask you now as to the reasons for this delay and what you, as a member of the Commission, can do to have the report submitted to the Congress at once. An early reply will be appreciated."

Sincerely yours,

/s/ Charles W. Tobey.

TELFORD TAYLOR APPOINTED GENERAL COUNSEL OF FCC

The FCC has appointed Telford Taylor as general counsel, to succeed William J. Dempsey upon the latter's entering private practice. Mr. Taylor, who is a special assistant to the Attorney General, will join the Commission's legal staff immediately as special counsel. Mr. Dempsey will remain with the Commission for several weeks.

Born at Schenectady, N.Y., on February 24, 1908, Mr. Taylor attended local schools and was graduated from Williams College in 1928 with an A.B. degree. He taught history and political science at Williams for two years, receiving his M.A. degree in 1932. In that year he was graduated from Harvard Law School with the degree of LL.B. cum laude, having served on the editorial board of the Harvard Law Review. He was appointed law secretary to Judge Augustus N. Hand of the Circuit Court of Appeals, New York, from 1932 to 1933, when he became assistant solicitor of the Department of the Interior.

From 1934 to 1935 he was senior attorney of the Agricultural Adjustment Administration and handled much of its legislative work. For four years he served as associate counsel of the sub-committee of the Senate Committee on Interstate Commerce, investigating railroads and railroad finances. Since October, 1939, Mr. Taylor has been head of the Court of Claims section of the claims division of the Department of Justice.

Mr. Taylor has appeared in cases in the District of Columbia Court of Appeals and also in the United States Supreme Court. He is married.

Joseph L. Rauh, Jr., was appointed general counsel, to succeed William C. Koplovitz. Mr. Rauh has resigned as assistant general counsel of the Wage and Hour Division of the Department of Labor to assist Telford Taylor who, on May 6, was announced to become general counsel of the Commission, vice William J. Dempsey, who will enter private practice with Mr. Koplovitz.

Mr. Rauh was born at Cincinnati, Ohio, on January 3, 1911. Entering Harvard College in 1928, he was graduated therefrom magna cum laude in 1932. He enrolled at Harvard Law School, from which he was graduated at the head of the class of 1935. He was on the Harvard Law Review.

From 1935 to 1936, Mr. Rauh was a member of the legal staff of the Securities and Exchange Commission, participating in litigation involving the constitutionality of the Public Utilities Holding Company Act. In 1936 he
became law secretary to Associate Justice Benjamin N. Cardozo of the United States Supreme Court, serving in that capacity until the death of the Justice in 1938.

Joining the legal staff of the National Power Policy Committee, Mr. Rauh was thus engaged from July, 1938, to January, 1939, when he became law secretary to Associate Supreme Court Justice Felix Frankfurter. In March, 1939, Mr. Rauh became associated with the Wage and Hour Division of the Labor Department. As that division's assistant general counsel, he had charge of all interpretive work and the drafting of all findings in wage order cases and from time to time represented the Administrator in the courts. Mr. Rauh is married.

ST. LOUIS CHANGES

Serious and long standing problems involving radio stations in the St. Louis area are near solution as a result of a series of orders issued today by the Federal Communications Commission.

The stations concerned are KSD, KFUO, KXOK, WGBF, KFRU and KWK. The Commission took the following action:

1. Granted application of KSD, St. Louis, to operate unlimited hours on 550 kilocycles, with power of 5 kilowatts day, 1 kilowatt night, effective not later than July 1, 1940, KSD's application for 630 kilocycles was dismissed.

2. Granted application of KFUO, St. Louis, to change from 550 kilocycles to 830 kilocycles, 1 kilowatt day and night, local sunrise to sunset at Denver, Colo., effective not later than July 1, 1940.

3. Granted application of KXOK, St. Louis, for construction permit to change from 1250 kilocycles to 630 kilocycles, 5 kilowatts, unlimited hours, with directional antenna.

4. Granted application of WGBF, Evansville, Ind., for construction permit to change from part time on 630 kilocycles to 1250 kilocycles, unlimited hours, 5 kilowatts day, 1 kilowatt night, with directional antenna.

5. Granted application of KFRU, Columbia, Mo., for construction permit to change from 630 kilocycles part time to 1370 kilocycles unlimited hours, 250 watts.

6. Granted petition of KWK, St. Louis, to reinstate application for permission to operate unlimited hours with 5 kilowatts on present frequency, 1350 kilocycles, and granted construction permit to cover directional antenna system subject to approval by the Commission. KWK's application for change to 630 kilocycles has been designated for hearing.

The action was taken as a result of negotiations by the Commission with interested parties, in order to bring to a close long and continued administrative proceedings and court litigation.

RAILROAD YARD EXPERIMENT

Experiment in radiotelephone communication between the central control tower of a railroad freight yard and locomotives therein is proposed by the Central Railway Signal Company, of Proviso, Ill., which today received authorization from the Federal Communications Commission for that purpose. The company was issued construction permits for two Class II experimental stations at Proviso, each to operate with 15 watts power, A3 transmission. One will use 300,000 to 400,000 kilocycles, and the other 35,460, 37,140, 39,140 and 39,540 kilocycles.

BYRD PICTURES BY RADIO

Pioneer use of radiophotograph transmission from the Antarctic, to relay pictures from Little America to the United States, is involved in the special temporary authorization granted Press Wireless, Inc., to communicate with the Byrd Antarctic expedition. A1 (continuous wave telegraphy) and A2 (modulated continuous wave telegraphy) type emission will be used to control the pictures by air from the expedition base radio station, KTRK, to the Press Wireless point-to-point station at Hicksville, N. Y. The experiment is authorized for one month.

INTERNATIONAL BROADCAST STATIONS

FCC this week approved a notice to be sent all licensees of international broadcast stations relative to the power and antenna requirements of such stations.

FTC INDEX

Because of lack of interest on the part of most members, the annual index of Federal Trade Commission orders will not be published this year. An index is on file at the NAB, however, and inquiries about particular cases will receive prompt attention.

LABOR NOTES

Field forces of the Wage and Hour Division, U. S. Department of Labor, were instructed today by Colonel Philip B. Fleming, Administrator, to take immediate action against employers who have failed to keep true and adequate records as required by law.

"Incomplete wage and hour records are the most serious hurdle confronting our inspectors," Colonel Fleming declared.

"This is true in all of the 15 regions into which the country has been divided for enforcement purposes. I have directed that employers violating the law in this respect be prosecuted. The law has been in effect 18 months and no one can plead ignorance of the record-keeping regulations. Any employer, therefore, who does not keep these records is properly suspect."
Regulations issued under the Act merely require listing of the name of each employee, home address, hours worked each work day and each work week, hourly rates of pay, total wages paid and date of payment. In some instances violators have falsified or destroyed records.

Thurman Arnold has lost his second case under the anti-trust laws against labor unions, and the A. F. of L. is jubilant.

Indictments against labor unions and labor leaders for "illegal" union activity have been thrown out in St. Louis and Washington, D. C.

In commenting on the Washington decision, A. F. of L. counsel emphasized that "the broad question of whether labor unions are exempted from prosecution under the Sherman Act by the Clayton Act was not involved in this case and was not passed upon by the Court."

826 STATIONS

The FCC issued operating licenses to four stations and granted three permits for the construction of new stations during the month of April, 1940. A comparative table by months follows:

<table>

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following oral argument is scheduled before the Commission in a broadcast case during the week beginning Monday, May 13. It is subject to change.

Thursday, May 16

Oral Argument Before the Commission

Report No. B-95:

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for hearings and oral arguments in broadcast cases. They are subject to change.

May 23

Oral Argument Before the Commission

Report No. B-96:

W6XKG—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license; 13950 kc., 1000 watts, emission A-3, unlimited time, according to Rule 983 (a).

W6XRE—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license; 88000, 120000, 210000 and 560000 kc., 500 watts, emission A-3, unlimited time according to Rule 983 (a).

May 28

WRTD—Times Dispatch Radio Corp., Richmond, Va.—C. P., 500 kc., 1 kw, unlimited time (DA-night). Present assignment: 1500 kc., 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—Granted construction permit to install new equipment and directional antenna system for day and nighttime operation; increase power from 1 kw to 5 kw; and move transmitter site locally; frequency 610 kc. (B3-P-2476).

KTAR—KTAR Broadcasting Co., Phoenix, Ariz.—Granted construction permit to install new transmitter, directional antenna for day and night use; increase power from 1 kw to 5 kw, unlimited time; frequency 620 kc. (B5-P-2632).

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted construction permit to make changes in equipment and increase power from 10 kw, unlimited time, to 50 kw, unlimited time; frequency 1180 kc. (B5-P-2783).

WTAG—WTBY, Inc., Green Bay, Wis.—Granted modification of construction permit to make changes in directional antenna system (B4-MP-952).

Lakeland Broadcasting Co., Willmar, Minn.—Application for construction permit to erect a new station, already in hearing docket, amended so as to request 1310 kc., 100 watts, unlimited time. Exact transmitter site to be determined (B4-P-2370).

WBAB—Press-Union Publishing Co., Atlantic City, N. J.—Granted modification of license to increase night power from 100 watts to 250 watts, operating on frequency 1300 kc. (B1-ML-968).

WFBl—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted construction permit to increase night power from 1 kw to 5 kw, install directional antenna for nighttime, operating on frequency 1360 kc. (B1-P-2654).

WMAN—Richland, Inc., Mansfield, Ohio.—Granted modification of license to change hours of operation from daytime to unlimited, using 250 watts power on 1370 kc. (B2-ML-947).

KBBK—Louis P. Thornton, Baker, Ore.—Granted modification of license to increase night power from 100 watts to 250 watts, frequency 1500 kc., 250 watts day, unlimited (B5-ML-951).

KEEN—KVL, Inc., Seattle, Wash.—Granted consent to the assignment of license from KVL, Inc., to Evergreen Broadcasting Corp.; frequency 1570 kc., 100 watts, shares time with KKKO (N3-AL-271).

WPIT—Westinghouse Electric & Mfg. Co., Saxenburg, Pa.—Granted construction permit to move International Broadcast Station WPIT to Hull, Mass.; increase power from 40 kw to 50 kw and make changes in equipment; station operates on frequencies: 6110, 13210, 21540 kc., unlimited time, shares time with WBOS on 9570 kc., shares time with WLOL on 11370 kc., and shares time with WNDB on 17780 kc. (B1-PIB-23).

WRCA—National Broadcasting Co., Inc., Bound Brook, N. J.—Granted special experimental authority for International Broadcast Station WRCA to operate an additional 35 kw power amplifier in parallel with the regular 35 kw power amplifier, the additional amplifier to feed a separate directive antenna, making an effective operating power of 70 kw; station operates on 9670 kc. and 21630 kc., unlimited time (B1-MLIB-33).

WENL—Station WIS, Inc., Portable-Mobile (area of Columbia, S. C.)—Granted consent to assignment of license of portable relay broadcast station WENL from Station WIS, Inc., to The Liberty Life Insurance Co.; frequencies 30820, 33740, 35820, 37790 kc., power 2 watts (B3-ALRE-23).

KDAC—Gilbert H. Jertberg, Executor of the Estate of George Harm, Portable-Mobile (area of Fresno, Calif.)—Granted
consent to involuntary assignment of license of relay broadcast station KDAC from George Harm, deceased, to Gilbert H. Jertberg, Executor of the Estate of George Harm; frequencies 1622, 2635, 2150 and 2790 kc., power 25 watts (B3-ALRY-10).

The following stations were granted renewal of licenses for the period June 1 to August 1, 1940:

WNYA—Roy L. Albertson, Buffalo, N. Y.—Granted modification of license to increase power from 100 watts nighttime; 250 watts day, to 250 watts day and night; frequency 1370 kc., unlimited time. (B4-ML-960)

WRNY—Elmer S. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Granted modification of license to increase hours of operation from all hours except 8:30 a. m. to 10 a. m. and 2 p. m. to 3 p. m. EST, daily, to all hours except 8:30 a. m. to 10 a. m. Mondays through Fridays, contingent on granting of modification of license for WSNY-AM, Buffalo. (B3-P-2829)

WSNS—Elmer S. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Granted extension of commencement date to 30 days after granting of construction permit and extension of construction permit to 180 days thereafter; frequency 1500 kc., 250 watts day, unlimited time (B-MP-917).”

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the period June 1 to August 1, 1940:

KDYL and auxiliary, Salt Lake City; KFLF, Spokane; KGGF, Coffeyville, Kansas; KLS, Oakland, California; KOL, Seattle, Washington; KPAC, Fort Worth, Texas; KRGV, Weslaco, Texas; KTFL, Twin Falls, Idaho; KXMS, Santa Barbara, California; KUOA, Silicon Sprigs, Arkansas; KWSC, Pullman, Washington; KVA and auxiliary, San Francisco; KXOK, St. Louis, Missouri; KATR, Waterbury, Connecticut; WAVE, Louisville, Kentucky; WCRC, Birmingham, Alabama; WBBM, Chicago, Illinois; KFBB, Great Falls, Montana; KFOX, Long Beach, California; KGXS, Springfield, Massachusetts; KOIL, Omaha, Nebraska; KIT, Yakima, Washington; KOIN, Portland, Oregon; KRC, Seattle; KVOA, Tucson, Arizona; WCAD, Canton, New York.

DESIGNATED FOR HEARING

Arlington Broadcast Corp., Arlington, Virginia.—Application for construction permit for a new station to operate on 1120 kc., 250 watts, unlimited time. Exact transmitter site and type of antenna to be determined with Commission’s approval (B2-P-2466).

WHIP—Hammond-Calumet Broadcasting Corp., Hammond, Indiana.—Application for construction permit to make changes in directional antenna system and increase time of operation from specified hours, employing directional antenna, using 5 kw on 1180 kc., to unlimited time, employing directional antenna system for both day and nighttime operation (B4-P-2399).

KGGF—Hugh J. Powell, Coffeyville, Kansas.—Granted special temporary authority to remain silent from 2 to 3 p.m. EST on May 21 and 22, 1940, in order to permit WNAD to broadcast special educational programs; to remain silent from 7:15 to 9:15 p.m. EST, May 21, as licensed. (B3-P-2499)

WNAD—University of Oklahoma, Norman, Oklahoma.—Granted temporary authority to operate period from 2 to 3 p.m. (provided KGGF remains silent) in order to broadcast educational programs; to operate as licensed from 7:15 to 9:15 p.m., May 21.

KGNF—Great Plains Broadcasting Co., North Platte, Nebraska.—Granted special temporary authority to operate from 8 p.m. to 11 p.m. EST, May 13, 1940, in order to broadcast a parade and festivities in connection with the celebration “Days of ’69,” sponsored by the North Platte Community and Union Pacific Railroad Co., the highlight of this program to be the arrival of the radio comedy team “Burns and Allen.” (B1-ML-1140).

WKNX—Columbia Broadcasting System, Inc., Los Angeles, California.—Granted special temporary authority to rebroadcast over station KNX, a program picked up from short wave transmitter WNJC, licensed to the National Park Service on Government assigned frequency 2096 kc., from 11 p.m. EST, May 17, 1940, in order to broadcast a program from a small boat on the Colorado River, near Phantom Ranch, Grand Canyon; the rebroadcast to be a part of Robert Ripley’s “Believe It or Not” program carried by the Columbia Network.

WANZ—Pillar of Fire, Zarephath, New Jersey.—Granted license to cover construction permit for changes in equipment; frequency 1350 kc., 1 kw power; shares time with WBNX, directional antenna day and night (B1-L-1140).

W2XWE—WOKO, Inc., Albany, New York.—Granted construction permit to move transmitter from east side Central Avenue, opposite Tremont Street, to the National Park Service, Albany, N. Y., to State Office Bldg., Swan Street, Albany, New York.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Kentucky.—Granted special temporary authority to operate with power of 250 watts from 8:30 p.m. to 9 p.m. EST, May 11, 1940, in order to broadcast the University of Kentucky State Musical Festival.

WSU1—State University of Iowa, Iowa City, Iowa.—Granted special temporary authority to reduce hours of operation from unlimited time to a minimum of eight and one-half hours daily, for the period beginning May 20, 1940, and ending not later than June 8, 1940, in order to observe the examination and vacation period between regular University sessions.

WTAW—Agricultural and Mechanical College of Texas, College Station, Texas.—Granted special temporary authority to operate simultaneously with Station WJBO from 11 p.m. to 12 p. m. EST, May 10, 1940, in order to broadcast the Senior Ring Dance.

WKST—WKST, Inc., New Castle, Pennsylvania.—Granted special temporary authority to operate from sunset (May 7:30 p.m., EST) to 11 p.m. EST, May 9, 1940, in order to broadcast a baseball game of the American Legion Posts in the 26th district of Pennsylvania only.

W2XWG—National Broadcasting Co., Inc., New York, New York.—Granted special temporary authority to operate with A-4 emission on 1250 kc. on May 6 and 7, 1940, in order to make a test of performance capabilities of a new pre-production model facsimile receiver manufactured by the R. C. A. Manufacturing Co., containing in one chassis the recorder, standard broadcast band receiver and facsimile receiver covering the bands 25-27 and 42-74 mc.

WAFG—John T. Hubbard, Julian C. Smith, & Fred C. Hoosey, d/b/a Dothan Broadcasting Co., Dothan, Alabama.—Granted construction permit to move transmitter and install new antenna; frequency 570 kc., power 250 watts, daytime (B3-P-2829).

WBBM—Columbia Broadcasting System, Inc., Chicago, Illinois.—Granted license to cover construction permit for installation of new equipment; frequency 770 kc.; power 80 watts; simultaneous day, shares with KFAE night (B4-L-1145).

Gilbert O. Sieber, Mayor of George, Nebraska (deceased), Portable-Mobile (area of Fresno, California).—Granted construction permit for new relay broadcast station; frequencies 30820, 33740, 35820, 37980 kc.; power 10 watts (B3-LRE-350). Also granted license to cover construction permit (B3-LRE-311).

WRTY—Times-Dispatch Radio Corp., Richmond, Virginia.—Granted motion for continuance of hearing now scheduled for May 6 to a date to be fixed by Secretary’s Office, in re application for construction permit to change frequency from 1500 kc. to 590 kc., and increase power from 100 watts to 1 kw; unlimited time, DA night.
WSPA—Virgil V. Evans, tr/as The Voice of South Carolina, WDAY, Inc., Portable-Mobile (area of Fargo, N. D.).—Granted license for new relay broadcast station, frequency 1350 kc, power 5000 watts, unlimited time, and move of studio from the city of Fargo, N. D., to a site 3 miles east of town, with 5000 watts power for auxiliary purposes only (B3-1141).

W6XKX—Ben S. McGlashan, Los Angeles, Calif.—Granted license to cover construction permit as modified which authorized increase in power for auxiliary purposes only from 3000 to 5000 watts, and installation of new antenna; granted upon an experimental basis only, conditionally (B3-LHB-58).

W6XRE—Ben S. McGlashan, Los Angeles, Calif.—Granted construction permit to install new transmitter in relay broadcast station (B2-PRE-351).

W7ADY, Inc., Portable-Mobile (area of Fargo, N. D.).—Granted license to cover construction permit for new high frequency broadcast (experimental) station; frequency 13500 kc, power 2 watts, directional antenna system.

WEHJ—WJW, Inc., Portable Mobile (Area of South Schenectady, N. Y.).—Granted license for new high frequency broadcast station, frequency 13500 kc, power 2500 watts, unlimited time, and move of transmitter, for changes in type of transmitter and to install a directional antenna system; granted upon an experimental basis only, conditionally (B4-LHB-39).

W8XPG—Virgil V. Evans, tr/as The Voice of South Carolina, Spartanburg, S. C.—Granted special temporary authorization to operate from sunset (May 7:30 p. m., June 7:45 p. m.), EST, to conclusion of baseball games on the following days: May 7, 8, 9, 13, 14, 17, 18, 22, 23, 25, 29, 30, 31; June 5 and 6, 1940, in order to broadcast the home games of the Sally Lenox Baseball Team only.

WAND—Times Co., Inc., for a new station in Huntsville, Ala. — Granted petition for rehearing in the matter of Marysville-Yuba City Broadcasters, Inc., for the same facilities.

WANT—Wilton Harvey Pollard, Huntsville, Ala.—Denied petition to set aside the order of the Commission on the application for renewal of the construction permit for new high frequency broadcast station; frequency 35620, 37020, and 39260 kc, power 2 watts, A3 emission; granted upon an experimental basis only, conditionally (B3-LHB-58).

WAPN—Gazette Printing Co., Janesville, Wis.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54 (B1-L-382).

WBAP—William F. Huffman, Wisconsin Rapids, Wis.—Denied petition for rehearing in the matter of the application of KHSL, Chico, Cal., for a construction permit to install new equipment, increase power from 250 watts, unlimited time to 500 watts night, 1 KW day, on the frequency 1250 kc.

WBATO—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Denied petition requesting reconsideration by Commission of its order of November 12, 1940, granting the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, to operate on 1500 kc., with 250 watts, unlimited time, reconsider said application and designate the same for consolidated hearings with the application of Caribbean Broadcasting Association, Inc., for the same facilities.

WHAM—Stromberg-Carlson Telephone Manufacturing Co., Rochester, N. Y.—Denied authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54 (B1-L-382).

WGOOD—Wayne Good, Nashville, Tenn.—Denied petition to set aside the order of the Commission of March 12, 1940, granting the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, to operate on 1500 kc., with 250 watts, unlimited time, reconsider said application and designate the same for consolidated hearings with the application of Caribbean Broadcasting Association, Inc., for the same facilities.

WGN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Denied petition to set aside the order of the Commission of March 12, 1940, granting the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, to operate on 1500 kc., with 250 watts, unlimited time, reconsider said application and designate the same for consolidated hearings with the application of Caribbean Broadcasting Association, Inc., for the same facilities.

WJW, Inc., Portable Mobile (Area of South Schenectady, N. Y.).—Granted special temporary authorization to operate from sunset (May 7:30 p. m., June 7:45 p. m.), EST, to conclusion of baseball games on the following days: May 7, 8, 9, 13, 14, 17, 18, 22, 23, 25, 29, 30, 31; June 5 and 6, 1940, in order to broadcast the home games of the Sally Lenox Baseball Team only.

WJXK—Wilton Harvey Pollard, Huntsville, Ala.—Denied petition for rehearing in the matter of the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, to operate on 1500 kc., with 250 watts, unlimited time, reconsider said application and designate the same for consolidated hearings with the application of Caribbean Broadcasting Association, Inc., for the same facilities.

WKB—The Farmers & Bankers Broadcasting Corp., Wichita, Kans.—Denied petition to set aside the order of the Commission of March 12, 1940, granting the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, to operate on 1500 kc., with 250 watts, unlimited time, reconsider said application and designate the same for consolidated hearings with the application of Caribbean Broadcasting Association, Inc., for the same facilities.

WKBG—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kans.—Denied modification of construction permit which authorized increase in power for auxiliary purposes only from 3000 to 5000 watts, and installation of new antenna; granted upon an experimental basis only, conditionally (B3-LHB-58).

WKCX—The Crossley Corp., Mason, Ohio.—Denied petition to cover construction permit as modified which authorized increase in power to 300 watts, and installation of new antenna; granted upon an experimental basis only, conditionally (B4-LHB-39).

WKRE—KDREX, Inc., abdominal, Conn.—Denied petition to set aside the order of the Commission of March 12, 1940, granting the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, to operate on 1500 kc., with 250 watts, unlimited time, reconsider said application and designate the same for consolidated hearings with the application of Caribbean Broadcasting Association, Inc., for the same facilities.

WKN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Denied petition for rehearing in the matter of the application of Marysville-Yuba City Broadcasters, Inc., to erect a new station at Marysville, Cal. to use frequency 1250 kc., with 100 watts power, unlimited time, which was granted by the Commission without a hearing on January 17, 1940.

WOL—American Broadcasting Co., Washington, D. C.—Denied petition for rehearing in the matter of the application of Lawrence E. G. H. Sullivan, for a construction permit to erect a new station at 1310 kc., power 100 watts, without the Commission without a hearing on February 7, 1940.

WOLF—Civic Broadcasting Corp., Syracuse, N. Y.—Granted modification of construction permit as modified which authorized construction of a new broadcast station to make changes in equipment of new station, frequency 1420 kc, power 1000 watts, unlimited time (B1-MP-975). Granted license to cover construction permit (B1-L-1143). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-391).

WOLW—Civic Broadcasting Corp., Syracuse, N. Y.—Denied petition for rehearing in the matter of the application of Lawrence E. G. H. Sullivan, for a construction permit to erect a new station at 1310 kc., power 100 watts, without the Commission without a hearing on February 7, 1940.

WW2X—The Yankee Network, Inc., Paxton, Mass.—Denied petition to cover construction permit as modified which authorized increase in power from 1 to 5 KW, installation of new transmitter and directional antenna for nighttime use, to change frequency to 1270 kc., and to operate with power of 1 KW, unlimited time.

WWCL—Civic Broadcasting Corp., Syracuse, N. Y.—Denied petition for rehearing in the matter of the application of Lawrence E. G. H. Sullivan, for a construction permit to erect a new station at 1310 kc., power 100 watts, without the Commission without a hearing on February 7, 1940.

WWNL—Golden Gate Broadcasting Corp., San Francisco, Calif.—Denied petition to set aside the order of the Commission of March 12, 1940, granting the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, to operate on 1500 kc., with 250 watts, unlimited time, reconsider said application and designate the same for consolidated hearings with the application of Caribbean Broadcasting Association, Inc., for the same facilities.

WWOB—Orlando Broadcasting Co., Inc., Orlando, Fla.—Denied petition to cover construction permit as modified which authorized increase in power for auxiliary purposes only from 3000 to 5000 watts, and installation of new antenna; granted upon an experimental basis only, conditionally (B3-LHB-58).

WWEG—William F. Huffman, Wisconsin Rapids, Wis.—Denied petition for rehearing in the matter of the application of Lawrence E. G. H. Sullivan, for a construction permit to erect a new station at 1310 kc., power 100 watts, without the Commission without a hearing on February 7, 1940.

WWKS—Golden Gate Broadcasting Corp., San Francisco, Calif.—Denied petition to cover construction permit as modified which authorized increase in power for auxiliary purposes only from 3000 to 5000 watts, and installation of new antenna; granted upon an experimental basis only, conditionally (B3-LHB-58).

WWOL—American Broadcasting Co., Washington, D. C.—Denied petition for rehearing in the matter of the application of Lawrence E. G. H. Sullivan, for a construction permit to erect a new station at 1310 kc., power 100 watts, without the Commission without a hearing on February 7, 1940.
authorized increase in power, changes in equipment and antenna system, and move of transmitter, for extension of completion date from June 17, 1940 to August 20, 1940; frequency 1420 kc., 250 watts, unlimited time (B4-MP-977).

KANM—Radiomarine Corp. of America, New York, N. Y.—Granted extension of special temporary authority to operate ship radiotelephone station KWBL with special emission on frequencies 4422.5, 8830, 8840, 13290, 13290, 17610 and 17680 kc., and as a special relay broadcast station on frequencies 6145, 9135, 13862.5, 17310 kc. for the period May 15, 1940, to not later than June 13, 1940, to transmit programs to the National Broadcasting Co. in connection with series of educational programs on sociological conditions in the Pacific South Sea Islands.

WBAA—Purdue University, W. Lafayette, Ind.—Granted special temporary authority to operate from 5 p.m. to 6 p.m. CST, May 10, 14 and 24, 1940, and from 4 p.m. to 5 p.m. CST, May 11 and 15, 1940, in order to broadcast the Purdue Beach Ball Games.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Granted special temporary authority to operate on Daylight Saving Time from May 9, 1940, to not later than August 1, 1940.

KTSM—Tri-State Broadcasting Co., Inc., El Paso, Tex.—Granted modification of construction permit for approval of antenna system, approval of transmitter site, change in type of transmitter; frequency 1530 kc., 500 watts (B3-MP-972).

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Tex.—Reopened for further hearing, to be held in Washington, D. C., on May 22, 1940, the order of revocation of license of Eagle Broadcasting Co., Inc. (KGFI).

APPLICATIONS FILED AT FCC

550 Kilocycles

KFOU—Evangelical Lutheran Synod of Missouri, Ohio and other States, Clayton, Mo.—Modification of license to change frequency from 530 to 830 kc., increase power from 500 watts night, 1 KW day to 1 KW day and night, change hours from share with KSD to from local sunrise to sunset at Denver, Colorado.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Modification of license to change hours from share with KFUO to unlimited time. Requests facilities of KFUO.

NEW—Pensacola Broadcasting Co., Pensacola, Fla.—Construction permit for new high frequency broadcast station on 43000 kc., 1000 watts, special emission for frequency modulation.

W9XH—South Bend Tribune, South Bend, Ind.—Modification of license to change frequency from 38650 to 42380 kc.

Federal Trade Commission Action

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Cord & Webbing Company—Max Krauss, trading as American Cord & Webbing Company, 394 Broadway, New York, engaged in the sale and distribution of cloth tape or web used in connection with Venetian blinds, upholstery and other articles, is charged in a complaint with misrepresentation.

The complaint alleges that in advertisements in trade journals, and other advertising material, the respondent represents, among other things, that “Vat Dyes are the Fastest dyes known to science—made to resist the color destroying action of sunlight, washing, dry cleaning, etc.”

Through use of the foregoing representation and others of similar import, the complaint continues, the respondent represents that all colors in his products are produced by means of vat dyes.

The complaint alleges that in truth two of the colors portrayed in the respondent’s advertising material are not “vat dye” colors, one of them being produced by a process known as the naphthol process, and the other by the sulphur process.

As illustrative of the purported fastness and durability of the dyes used to color his products, the complaint alleges, the respondent has caused to be inserted in certain of his advertising material charts or tables showing purported “Tests made on colors most likely affected by sunlight”, through use of a “Comparative Fade-Ometer.”

Through the use of such charts and tables the respondent is alleged to represent that the colors of his products are superior in fastness and durability to other colors used for similar purposes, when such is not a fact in all cases, and that his products have been subjected over designated periods of tests which demonstrate that the colors will not fade or change, when in fact the colors of his products fade appreciably when subjected to authentic tests for periods much shorter than those designated by the respondent.

A further practice of the respondent, the complaint continues, is in the use of the trade names “Safety Bell” and “Sillex” to designate certain of his products. Through use of these words, it is charged, the respondent alleges that his products are composed of linen or silk, when such are not the facts. (4112)

Cheshill Manufacturing Company—Edward Shill and Sanford C. Chesick, trading as The Cheshill Manufacturing Company, 501 Seventh Ave., New York, engaged in the sale and distribution of chain door locks equipped with so-called safety bells, which are sold under the name “Safety Bell Chain Locks,” are charged with misrepresentation in a complaint.

In advertising matter printed on letterheads, billheads and on cartons containing their products, and by other means, the complaint alleges, the respondents falsely represented that they are the manufacturers of the Safety Bell Chain Locks and other patented and protective devices, and have not applied for nor do they have pending a patent for their Safety Bell Chain Locks or any of their parts. The complaint also charges that the respondents do not own, operate or control any factory, and that they are in no sense the manufacturers of the locks sold by them. (4123)

Food Display Machine Corporation, and M. J. Kulikowski, Mrs. M. J. Kulikowski and George H. Hardt, 620 North Michigan Ave., Chicago, are charged in a complaint with misrepresentation.

The respondents M. J. Kulikowski, Mrs. M. J. Kulikowski and George H. Hardt are the officers and principal stockholders of the corporation, which is engaged in the sale and distribution of machines designed for cooking potato chips, corn chips and doughnut machines.

The complaint alleges, among other things, “that the respondents misrepresented their connection with their potato chip machines, “King Korn Company” and “King K Company” with respect to the corn chip machines, and “Brown Bobby Company” in connection with the doughnut machines.

In their advertisements in magazines and periodicals, and other material, the respondents allegedly have represented, among other things, that “Only $2.50 investment in raw materials brings back $10 in cash at wholesale”; “Your machine is capable of turning out 10 lbs. of chips every hour—80 lbs. in an 8 hour day. If sold in 50 size bags . . . that should give you a total profit of $21.60 on your 80 lbs. of chips”; “Sensational New Business That May Sweep You to Riches,” and “Experts estimate and tests show that the first year’s requirements should be about 12,000,000 lbs. You make 32¢ net profit on every pound that passes through your hands.”

These and other statements, the complaint alleges, represent that tremendous incomes and profits may reasonably be expected by purchasers and users of the respondents’ machines; that with little effort and small investment or expense one can start a business that will rapidly accumulate riches for himself, and that the respondents’ machines present in themselves the most amazing money-making opportunity offered by any business in America.

In truth, the complaint alleges, the respondents’ claims as to the actual or potential markets available are grossly exaggerated, misleading and deceptive, and the actual market is supplied by strong, well-financed, experienced operators from whom an inexperienced operator with one or more of the respondents’ machines would have little or no chance to compete, or to accumulate substantial trade and customer confidence.

To accumulate the profits or earnings at the rate and in the amounts represented by the respondents, the complaint alleges, would require the steady operation of such machines at full capacity. (4122)
Junior League Lingerie, Inc., 152 Madison Ave., New York, is charged in a complaint with misrepresentation.

The respondent corporation is engaged in the sale and distribution of women's apparel, including slips and other lingerie. In the course of its business, the complaint charges, the respondent has falsely represented that its products are sponsored or approved by the Junior League, such representation being made by means of tags and labels attached to its products, and by letters, circulars and other advertising material distributed among prospective purchasers.

The name "Junior League," the complaint continues, has long been associated in the minds of a substantial portion of the purchasing public with the organization, to such an extent that the use of it to describe articles of merchandise, particularly women's apparel, causes the public to believe that the articles so designated are sponsored or approved by the Junior League.

In truth and in fact, the complaint alleges, none of the respondent corporation's products is sponsored or approved by the Junior League, and the respondent is not connected in any way with the organization and has no authority from the organization to use its name to designate its products. Use by the respondent of the words "Junior League," the complaint charges, as a part of its corporate name, constitutes within itself a false and misleading representation that the respondent is connected with the Junior League and that the respondent's products are sponsored or approved by it. The respondent has also, the complaint alleges, placed directly in the hands of uninformed or unscrupulous dealers a means and instrumentality whereby such dealers have been and are enabled to mislead and deceive members of the purchasing public.

Liberty Candy Company—See McAfee Candy Company.

McAfee Candy Company—Joe B. Hill and C. O. McAfee, trading as McAfee Candy Company and Liberty Candy Company, 651 Poplar St., Macon, Ga., manufacturers of candy distributed to jobbers and wholesale and retail dealers, are charged, in a complaint with use of lottery methods in the distribution of their products.

Certain of the assortments distributed by the respondents, the complaint alleges, are so packed and assembled as to involve use of games of chance or lottery schemes when sold to ultimate consumers. The respondents also are alleged to furnish various push cards for use in the sale and distribution of their products by means of a gift enterprise or lottery scheme. Through use of these plans, the respondents allegedly supply to and place in the hands of others the means of conducting lotteries in the sale of their products.

STIPULATIONS

Following stipulations have been entered by the Commission:

American Royal Products Company—Edna Foster, trading as American Royal Products Company, 931 Ashland Ave., St. Paul, in connection with the sale and distribution of "Riteway" Corn and Callous Remover, agrees to cease representing that the product is amazing, new, marvelous, sensational, or different; is superior to other products; that it is "$1,000 Guaranteed"; that agents or vendors may make $2 to $3 an hour, or earn profits in excess of the average net profits consistently made by full time salesmen; that a charge of 10 cents or other amount is intended merely "for mailing and handling" of a sample package, when in fact such sum covers the full price for which the commodity is regularly sold and delivered, and that E. L. Fox is the president of American Royal Products Company, or otherwise representing that her business is incorporated or extensive in size and operation.

Cassell Products, Inc., 131 West 33d St., New York, in the sale of a toilet vinegar, agrees to desist from use on its wrappers, tags, or other advertising matter of the words "British," alone or in connection with any other words or pictorial or other representations, the effect of which may convey the impression that the product is of English origin or that it is made in the British Isles. According to the stipulation, the respondent's products are of domestic manufacture.

Colonial Lumber Specialties, Inc., 30 Church St., New York, engaged in the sale and distribution of red cedar shingles, agrees:

To cease representing that the "Early American Brand" of hand split red cedar shingle is "Guaranteed 20 years against fire," or designating or referring to a limited vendor's warranty as "an unconditional guarantee," and from use of the word "Guarantee" or the word "Guaranteed" or words of similar meaning in connection with the advertising, offering for sale, sale or distribution of its products, unless whenever used, clear and unequivocal disclosure be made in direct connection therewith, of exactly what is what is made of security, and also any qualifying restrictions, limitations or provisos.

(b) To discontinue representing, by use of expressions such as "This guarantee does away with all uneasiness in reference to the fire hazard," or in any other way, that there is no danger from fire where the hand split red cedar shingles sold by it are used, or that they will not ignite, and to cease representations of any kind tending to convey the belief that untreated wooden shingles have been rendered fireproof.

(c) To desist from use on its trade stationery of the words "Mills in British Columbia, West Virginia" or other designated locality, or from words of similar implication tending to convey the belief that it makes or manufactures the products sold by it, or that it actually owns, operates or directly and absolutely controls a plant or mill in which such products are made or manufactured.

Dated Cream Company—Theresa H. Boyer and Ann Bray, trading as Dated Cream Company, Evansville, Ind., agree to cease representing that their preparation "Dated Cream" has healing properties or penetrates the skin; that it will go down deep into the pores and cleanse them of all foreign matter or will stimulate the pores to normal action, or that the preparation activates the sebaceous glands or does more than to cleanse the surface. The respondent co-partners also stipulate that they will cease representing that their preparation "Dated Cream" has healing properties or penetrates the skin; that it is "$1,000 Guaranteed"; that it is amazing, new, marvelous, sensational, or different; is superior to other products; that it is recognized as a standard preparation for the eyes, and that the preparation is a remedy or is capable of curing or healing.

Dickey Eye Water Company—James J. Durr, doing business as Dickey Eye Water Company, Montgomery, Ala., engaged in selling a medicinal preparation designated "Dr. J. A. Dickey's Eye Water," agrees to cease representing that the preparation is superior in beneficial qualities to any other preparation used for the same purposes; that it is recognized as a standard preparation for the eyes, and that the preparation is a remedy or is capable of curing or healing.

Ulric C. Jones Advertising Agency—Ulric C. Jones, trading as Ulric C. Jones Advertising Agency, Hurt Building, Atlanta, has entered into a stipulation in which he agrees to desist from certain representations in the dissemination of advertisements with respect to 15 poultry, dairy and hog feeds sold by J. Kendley Martin, trading as Standard Milling Company, Atlanta. Among the feeds so advertised were "Super Quality" pullet, starting, layering, breeding and supplement mashes, "Standard 18% Hog Feeds" and others.

In the stipulation, Ulric C. Jones agrees to discontinue disseminating or causing to be disseminated, any advertisements which represent directly or by implication that any of the feeding plans or feeds of J. Kendley Martin, or any ingredients in such feed, will "insure" or "assure" for the user any result which may not be expected to follow under every condition of use or which
is not entirely dependent on such feeding plan, feed, or ingredients in the feed, for its accomplishment.

Among other representations which the respondent agrees to discontinue are that any of the Martin feeds are perfectly balanced or incorporate every new feeding discovery or in value in a proprietary or livestock ration; that "Super Quality Coccidiosis Control Mixture," when used in connection with proper sanitary measures, will prevent coccidiosis in baby chicks or do more than aid in its prevention; that this preparation is completely medicated or will contain coccidiosis, unless, where it does so only because of its nutritive qualities, such reason is clearly indicated; that any of the hog feeds sold by Martin will aid the highest profit or grow and develop swine at the lowest feeding cost, or that the various feeds distributed by J. Kendley Martin are sold entirely direct to the purchasing public. (02552)

Kaiser Baking Company, trading also as Frantz Home Bakers, East Liverpool, Ohio, agrees to cease selling or otherwise disposing of bread or other products by means of a game of chance, gift enterprise or lottery scheme. The stipulation recites that the respondent company conducted a lottery and advertised "20 Free Trips to the New York World’s Fair" through weekly drawings in which the winners were determined wholly by lot or chance. (2784)

Van de Mark Advertising, Inc., Cincinnati, and Claude Elnor, vice president, engaged in the sale and distribution of advertising material consisting of cuts, mats, and material for promoting the sale by others of goods and commodities, have agreed to discontinue representations concerning "Riteway" Corn and Callous Remover similar to a number of those stipulated to be discontinued by Edna Foster, trading as American Royal Products Company. (2776)

Standard Refining Company, Inc., 500 Palisade Ave., Jersey City, N. J., and Eleanor G. Rudiger and Joseph H. Rudiger, president and vice president of the corporation, distribute molasses, syrups and honey. In their stipulation the respondents agree to cease using the phrase "Extra Fancy Barbados Molasses" as a mark, stamp or brand for a product not composed wholly of molasses originating in the Islands of Barbados. They also agree to cease employing the word "Barbados," alone or in connection with other words or in any way as descriptive of molasses other than Barbados molasses. The stipulation provides that if the product is composed of a blend having Barbados molasses in substantial quantity as an ingredient and also having ingredients other than Barbados molasses, and the word Barbados is used to refer to such Barbados molasses, the word Barbados shall be accompanied by other words in equally conspicuous type to indicate clearly that the product is not composed wholly of Barbados molasses but is a blended product in which Barbados molasses is but one of two or more ingredients. (2788)

United Factories, Inc., 1302 McGee St., Kansas City, Mo., engaged in the sale and distribution of oil burners for installation in stoves and furnaces, agrees to cease representing:

(a) That the device sold by it is a new, cheap type oil burner or that it burns cheap oil in a new way, or, by the use of similar terms or phrases, representing that the heating process employed in its open pool or pot type oil burners is an innovation or involves any new principles, or, inferentially or otherwise, that such burners operate satisfactorily with grades of oil inferior to or cheaper than the grades which should be used therein.

(b) That the oil burners it sells furnish twice the heat rendered by coal or wood, either at half the cost or at smaller cost, or at all, or representing without due regard to circumstances and environment that the heat from such burners is greater or cheaper than that from coal or wood.

(c) That any article is given "free" or as a gratuity, when the receipt of such article is contingent upon any consideration, terms or condition, as payment of money or rendering of services.

(d) Representing, by statement or inference, that exclusive trade territory is or may be given, allotted or reserved either "free" or for a consideration or otherwise, to any person, or that agents or salespersons are designated for any territory or district with exclusive agency or selling rights therein. (2774)

C. E. Woodling Chemical Works—C. E. Woodling, trading as C. E. Woodling Chemical Works, 1327 South 12th St., Allentown, Pa., engaged in selling a chemical designated "Odorene," to be sprayed in rooms for deodorizing them, agrees to cease representing that the product is instant in action and will banish, end or kill odors, or implying that it is permanent in effect; that there is no competition in selling the product; that the product is new in any sense, unless there have been no previous sales in the locality referred to; that the financial opportunities afforded in selling the product are unparalleled, and that the product is effective for all odors. (02553)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Chapman Health Products Company, 4618 Euclid Ave., Cleveland, and John W. and Nellie C. Chapman, individually and as officers of the corporation, have been ordered to cease and desist from further dissemination of advertisements for the purpose of inducing the purchase of medicinal preparations sold and distributed by them under the designations "N.A.R. Tablets", and "Foot (otherwise known as "Daintee")"

Upon application of the Federal Trade Commission, the United States District Court for the Northern District of Ohio last December issued an order restraining The Chapman Health Products Company from further dissemination of false advertisements concerning the preparation designated "Foot" (otherwise known as "Daintee") noting the issuance of a complaint under its regular procedure by the Commission.

Findings of the Commission are that the respondents represented "N.A.R. Tablets" as a cure or remedy for rheumatism, neuritis and arthritis, only in fact the preparation possesses no therapeutic value in the treatment of those ailments except so far as the analgesic properties might afford temporary relief.

The preparation designated "Foot" (otherwise known as "Daintee") was represented as a cure or remedy for obesity and as being a competent, safe and scientific treatment, its use having no ill effect upon the human body. In truth, the Commission finds, the preparation contains powdered extract phytolacca berries, sodium biborate, berberine hydrochloride, apomyc and desicated thymo- rhyd. These drugs, according to findings, are present in quantities sufficient to cause serious and irreparable injury to health if used under conditions prescribed in the respondents' advertisements or under such conditions as are customary and usual.

The respondents are ordered to cease and desist from the dissemination of any advertisements for the purpose of inducing the purchase of the preparations or any medicinal preparations composed of substantially similar ingredients, whether sold under the same name or any other name, and which advertisements, when referring to the product "Foot", fail to reveal that its use may result in serious or irreparable injury to health, or which advertise the preparation designated "N.A.R. Tablets" as a cure or remedy for rheumatism, neuritis or arthritis, or that the preparation "Foot" (otherwise known as "Daintee") is a cure or a competent, safe or scientific treatment for obesity. (4004)

Ehrhart Conrad Company, 106 Carlisle St., Hanover, Pa., engaged in the sale and distribution of food products to retail dealers, is found by the Commission to have sold and distributed to dealers a so-called "Plee-zing Treasure Chest" device for use in the sale of the products to the consuming public, in a manner involving the operation of a game of chance. The "Plee-zing Treasure Chest" consists of a card with a seal, and 100 small trade "receipts", with spaces provided on the card on which the receipts are to be pasted. After the blank spaces on the card are filled, the prizes designated under the seal become available to the holder of the card. The food products or cash awards so designated under the seals vary in value in accordance with each card, the prizes or awards thus being distributed to the purchasing public wholly by lot or chance, according to findings. (4068)
Erwin Feather Quilt Company—Herbert S. and Mabel T. Erwin, trading as Erwin Feather Quilt Company, 1598 East Livingston Ave., Columbus, Ohio, have been ordered to cease and desist from representing as a fact that their preparation is a cure, remedy or effective treatment for obesity; that the preparation contains no dehydration drugs, and that the price at which the respondent offers for sale and sells his preparation constitutes a special, reduced or introductory price or is applicable for a limited time only, when in fact it is the usual and customary price at which the respondent sells his preparation in the normal and usual course of business. (4031)

Oxol Laboratories—William S. McClymonds, trading as Oxol Laboratories and Western Research Laboratories, 1046 Santa Fe Drive, Denver, Colo., engaged in compounding, selling and distributing a medicinal preparation, has been ordered to cease and desist from representing as a fact that the preparation he distributes is a cure, remedy or effective treatment for obesity, has been ordered to cease and desist from misrepresentations concerning his product.

Findings of the Commission are that the product, designated “Quinox Capsules,” is intended for use by women suffering from delayed menstruation. In newspapers and periodicals and other printed and written matter, the Commission finds, the respondent has represented that the preparation possesses any substantial therapeutic value aside from its effect as an ordinary laxative. The respondent is ordered to cease and desist from representing that the preparation is a cure or remedy or a competent or effective treatment for delayed menstruation, or will relieve or have any beneficial effect thereon, or that the preparation possesses any substantial therapeutic value aside from its effect as an ordinary laxative. (4033)

Prudential Sales Corporation, 230 East Ohio St., Chicago, distributor of dry shavers, wrist watches and other merchandise, has been ordered to cease and desist from the use of lottery methods and misrepresentation in the sale of its merchandise.

Findings of the Commission are that, besides furnishing to dealers devices such as push cards which involve games of chance in the sale of its products to ultimate consumers, the respondent represented certain electric dry shavers to have a value of $15, when in truth they were of a lower quality and had a retail value of substantially less than $15. The respondent is further ordered to desist from supplying to or placing in the hands of others, merchandise or other devices such as push cards which involve games of chance and misrepresentation in the sale of its merchandise.

The respondent is further found to have advertised blankets by use of the unqualified word “Wool” in bold type and so set out as to attract attention of purchasers, while the statement “Guardsman wool over 80% wool content guaranteed” was in small inconspicuous type, and is found to have used the word “Elkskein” to designate sports jackets, such word serving as a representation that the jackets were actually made from elkskin, when they were not made from elkskin and did not possess its desirable qualities.

The Commission further finds the respondent to cease and desist from supplying to or placing in the hands of others, merchandise together with lottery devices, or such devices together with merchandise or separately, for use in selling or distributing merchandise to the public; from representing fictitious and excessive prices as the prices at which it offers for sale and sells its merchandise; from using the trade name “Packard” or other trade name in connection with the picture of an electric shaver, or separately, so as to indicate that the respondent is offering an electric shaver bearing such trade name, when in fact the respondent uses such name to refer to an article other than an electric shaver; from using the word “Wool” or any other word or term descriptive of wool to designate any fabric or product which is not wholly composed of wool, provided, however, that in the case of fabrics or products composed in part of wool and in part of other fabrics, such words may be used as descriptive of the wool content if there is used in immediate connection therewith in letters of at least equal size and conspicuousness words truthfully describing and designating each constituent fiber or material thereof in the order of its predominance by weight, beginning with the largest single constituent; from using the word “Elkskein” or any other simulation of the word “Elkskein” to describe sports jackets made from the skin of an elk, tanned by the chrome process, and from using the word “free” or any other term of similar meaning to describe or refer to articles regularly included in a combination offer with preparation and diet constitute a cure, remedy or effective treatment for obesity; that the preparation contains no dehydration drugs, and that the price at which the respondent offers for sale and sells his preparation constitutes a special, reduced or introductory price or is applicable for a limited time only, when in fact it is the usual and customary price at which the respondent sells his preparation in the normal and usual course of business. (4031)
Roxanna Canning Company, manufacturer and distributor of dog foods, with its office in Lebanon, Ohio, and manufacturing plant in Dodds, Ohio, has been ordered to cease and desist from misrepresentations concerning its products.

Findings of the Commission are that the respondent, in the course of its business, has made statements that are deceptive and misleading concerning the ingredients of the various brands of dog foods it manufactures and sells. Typical of these, according to findings, is a representation that "Blackspot," one of its products, is a scientifically balanced ration containing beef by-products, cereal composed of wheat, corn, oats and soy bean products, ground beef bone, beef, carrots, salt, and cod liver oil prepared in broth, and that it is guaranteed to contain not less than 8 per cent protein, 2 per cent fat, and not over 2 per cent fiber. The ingredients of "Harty," another product, are represented as being virtually the same.

The Commission finds that these representations are false and misleading, and that the foods do not contain beef by-products, ground beef bone or beef, and are not scientifically balanced rations or scientifically balanced beef rations.

The respondent is ordered to cease and desist from using the terms "beef by-products," "ground beef bone," or "beef" or any other term of similar import or meaning, to designate or describe any ingredients of such products which ingredients are not in fact, respectively, beef by-products, ground beef bone, or beef, and from representing that such products are scientifically balanced beef rations. (3904)

Conrad Schickerling Research Laboratory—Conrad Schickerling, trading as Conrad Schickerling Research Laboratory, 589 Central Avenue, Orange, N. J., seller and distributor of various types of incandescent lamps for use in connection with photography, has been ordered to discontinue certain representations concerning his products.

The respondent has sold and distributed various types of incandescent lamps, known as "Schickerling Mushroom Bulb Photo Flood Lamps," sometimes known as "Schickerling Full Sun Spectrum Photo Flood Krypton Lamps," "Schickerling Photo Enlarging Lamps," "Schickerling 1000 Flash Photo-Flood Lamps," and "Schickerling '200 Flash' Photo Lamps."

The Commission finds that the respondent has conducted his business under the name of the Conrad Schickerling Research Laboratory and has caused these words to be used in advertisements, although in fact he does not own, control or direct a laboratory where such research work is conducted, and has not at any time been engaged in the direction, control or conduct of such research work.

The respondent is directed to cease using the words "research laboratory" or the word "laboratory" or any other similar word, words or phrases in his trade name or in connection with his business, when the respondent does not own and operate or directly and absolutely control an appropriately equipped laboratory where research work in connection with his business is conducted by trained technicians. (4042)

Standard Brands, Inc.—Part of cease and desist order and findings issued in June, 1939, against Standard Brands, Incorporated, New York, and its subsidiary, Standard Brands of California, San Francisco, has been modified.

The original order prohibited price discriminations in violation of the Robinson-Patman Act in the sale of bakers' yeast of like grade and quality but dismissed the Commission's complaint in so far as it applied to the sale and distribution of foil yeast, the kind sold in small cakes for individual use.

The modified order does not alter the provisions prohibiting discrimination in the sale of bakers' yeast but vacates the dismissal of the allegations concerning foil yeast, restates the findings in regard thereto and specifically forbids certain discriminations in the sale of foil yeast.

The modified findings are that the respondents sold in commerce immediately prior to April 1, 1940, foil yeast according to the following price scale: 300 pieces and up per month, 27 cents a dozen; under 300 pieces per month, 30 cents a dozen. The respondents are found to have sold foil yeast to units of corporate, voluntary and cooperative groups at 27 cents a dozen regardless of the quantity delivered during any one month to any one unit, and to independent retailers taking more than 300 pieces per month. Members of the groups are found to have been competitively engaged with the independent retailers who did not receive the lower prices but who purchased comparable quantities.

Findings are that the differentials in price did not make only due allowance for differences in cost of sale and delivery resulting from the differing quantities in which the foil yeast was sold, as required by the Robinson-Patman Act, and that the differential amounted to substantial sums annually so that some preferred purchasers obtained substantial savings annually over other purchasers not receiving the benefit of the differential.

Subsequent to March 31, 1940, the findings continue, the respondents have sold foil yeast to the afore-mentioned groups and to those competing independent retailers taking more than 300 pieces a month, at 28¼ cents a dozen, and to competing retailers taking less than 300 pieces per month, at 30 cents a dozen. Such differential in price now makes only due allowance for the differences in cost of sale and delivery resulting from the differing quantities sold and delivered, as provided in the act.

The Commission order directs that the respondents, in the sale of foil yeast, cease discriminating in price between different purchasers of this product of like grade and quality, either directly or indirectly, by selling it at different prices such as the following: 300 pieces per month and up, 27 cents a dozen; under 300 pieces a month, 30 cents a dozen. (2986)

Western Novelty Company—Max Levin, trading as Western Novelty Company, 1729 Lawrence St., Denver, Colo., engaged in the sale and distribution of knives, cameras, razors and other merchandise, was found to have sold and distributed certain assortments of merchandise so packed and assembled as to involve use of a game of chance when sold to ultimate consumers. One of the assortments, findings are, consisted of a punch board with a number of articles of merchandise attached. The punch board contained a number of small sealed tubes containing slips of paper and numbers. Holders of certain specified numbers were entitled to receive amounts up to $2.50 in cash on a 5-cent sale, and holders of certain other numbers were to receive the articles of merchandise attached to the board, according to findings. (4035)

Western Research Laboratories—See Oxol Laboratories.
ASCAP Again Tries to Split
Broadcasters United Front

Neville Miller today made the following reply to ASCAP’s latest effort to “divide and conquer”:

“I disagree emphatically with the statements contained in John Paine’s May 13 letter to broadcasters. The letter is but another attempt on the part of ASCAP to drive a wedge into the industry for the benefit of ASCAP at the expense of broadcasters.

“The enthusiastic support BMI is at present receiving is the best possible answer to Mr. Paine’s statement that stations are anxious to sign the new contracts. Today, 292 stations, representing 70% of the revenue ASCAP derives from radio, are members of BMI, with additional stations joining each week. All indications are that the broadcasters are united and are determined once and for all to end ASCAP monopolistic control of music.

“All who have followed this controversy know that any contract requiring broadcasters to pay ASCAP on news broadcasts, sports broadcasts, and other programs which either contain non-ASCAP music or no music at all will be objectionable to broadcasters.

“The broadcasters for years have demanded a per-use character, and I am sure have not changed their minds over night, nor will they voluntarily accept ASCAP proposal which curtly dismisses this demand as ‘uneconomical and unscientific’.

“All broadcasters are aware that the proposed ASCAP contract perpetuates ASCAP’s monopoly and are fully aware of the result of such a monopoly, which was accurately described by Justice Black when he said ASCAP was “a price fixing combination that actually wields the power of life and death over every business . . . dependent upon copyrighted musical compositions for existence. Such a monopolistic combination’s power to fix prices is the power to destroy”.

“Recent events in Europe have made us accustomed to fifth column activities, and the landing of parachute troops behind the lines. Therefore, I am sure that broadcasters will not be misled by the kind and benevolent interest in their behalf expressed by Mr. Paine, but in their minds will stand out the cold facts that without consultation with the industry, ASCAP has seen fit to demand an increase of approximately 100% in payments, that radio today is contributing two thirds of ASCAP’s entire revenue, and that any continuation of the present form of contract will only end in strengthening ASCAP’s monopoly.

“Broadcasters would naturally welcome an ‘end of difficulties between broadcasters and the authors and composers,’ but that end can only be reached by the establishment of free competition in the music field and not by a surrender to ASCAP.”

JUSTICE DEPARTMENT SUBPOENAS
ASCAP RECORDS; HEARING SET

The anti-trust division of the Department of Justice is investigating ASCAP to determine whether it exercises an illegal monopoly or restraint in the field of popular music.

Proceeding quietly, the Department of Justice has served a grand jury subpoena upon the society requiring it to produce its records for Federal scrutiny. The society, through Gene Buck, its president, responded by moving to quash the subpoena. Argument on this motion will be held May 22, before Judge Henry W. Goddard in United States District Court in New York.

The anti-trust division is proceeding along criminal lines. Victor Waters, Special Assistant Attorney General in charge of the inquiry, told newspapermen in Washington that a grand jury investigation of ASCAP was under way. He refused to comment.

Herman Pinkelstein of the law firm of Schwartz & Frohlich, 1450 Broadway, which represents ASCAP likewise refused comment to newspapermen. He indicated, however, that it was the society’s view that the government might be trying to get new evidence with which to revive a civil action which it brought against the society and disputed allied associations in August, 1934. That action, in which the government sought an injunction to restrain the defendants from alleged monopolistic practices, was tried in 1935 only partly and never finally decided.

BMI DEVELOPMENTS

Louis Katzman has joined the BMI staff in charge of public-domain and tax-free music of the standard, salon, and classical type. He will be associated with Milton Rettenberg, BMI’s Music Editor, in presenting copyrighted music of the standard and ballad type.

Mr. Katzman will make it his particular task to explore the needs of each member station, individually, in accordance with the station’s report to him as to its musical facilities. He will then be in a position to recommend tax-free theme songs, tax-free music to be used as background or incidental material for dramatic sketches and similar purposes. He will also be charged with getting such music out in suitable form for station use.

For music for small string ensembles, simfoniettas, and so forth, he will hold the position that Mr. Marlo holds in the field of popular music.

Mr. Katzman’s experience equips him for this work in a remarkable way. Born just fifty years ago in Russia, he has devoted his whole life to music in various capacities. He has been performer, arranger, conductor, composer, associated with the recording and radio industries.
BMI DEVELOPMENTS
(Continued from page 4251)

from their early years. He was first trumpet at the Edison Recording Company in 1919, later was under contract for three years with the Witmark Company as staff arranger, and for two years was chief recording director for the Brunswick Company. For the past five years he has been chief musical director for Hearst Radio, Inc., and he will continue in that capacity in addition to carrying on his work for BMI.

He was conductor as well as arranger and director of the Whittall Anglo-Persians, the second large commercial show on the air in the days of radio's infancy. He conducted his Anglo-Persians in the stage show for two weeks at the opening of the Roxy Theatre in New York. He was the first to introduce "symphono-jazz" and trademarked the name. He was music director of the first Fred Allen show and served in the same capacity for George Gershwin's air show.

He is credited with discovering and developing more young artists and composers than any other music director in the business.

This long and unusual experience enables Mr. Katzman to put himself in the position of the staff of a radio station and to understand their problems and identify himself with them whether the station works on 100 watts or 50,000.

George Marlo, BMI's professional manager, has picked three songs for special promotion. The work of a contact man requires him to exercise a neat judgment as to the tunes which are most likely to have strong popular appeal. The music in which he has the greatest confidence is the music he can most successfully promote. It is the confidence which singers, band leaders, and other performers have in his judgment that persuades them to take an interest in the music that he puts before them. Out of the songs already in the BMI catalogue, Mr. Marlo has chosen *Here in the Velvet Night*, *In the Silence of the Down*, and *Practice Makes Perfect*. (The last is in the shop but not yet released.)

BMI is making serious efforts to open the doors for the trained and competent composer who has not previously been able to get a hearing. M. E. Tompkins, General Manager, has written to music schools, conservatories, the music departments of universities, and also to the locals of the American Federation of Musicians, which number in their ranks many professionals of experience who have been blocked in their efforts as composers no less than the most ignorant amateur.

In writing to the officer of one of the locals, Mr. Tompkins said in part:

As a publisher of music BMI is unique because it is able to assure its writers that their work will have a wide public hearing. The stockholders of the company are exclusively the owners and operators of radio stations which are licensed to play BMI music—nearly 300 of them at present, including most of the major network stations. They will give that music a nationwide audition through the most effective medium in existence, the radio.

In your group there must be men who have music in them that the world would learn to love, granted a hearing of it. Perhaps some of them would already have won wider recognition if they had been given the chance to put their music before the public favorably. BMI can give them that chance.

Of course the needs of the dance bands create the greatest demand for a steady stream of new numbers. We are interested in all music, however, whether or not it is suitable for dancing. The most popular writers are being drawn increasingly from the ranks of trained and competent musicians. It is in groups such as yours that the composers will be found who will write America's outstanding musical works of the future—symphonic works and also the song-and-dance hits. BMI, as the instrument of the broadcasting industry, is grateful for the part it will play in the molding of those careers.

We ask that your members send to use the pick of their manuscripts. The professional musician is well aware of the type of music that appeals to the mass radio audience. That is our immediate need.

The response has shown that, in this respect as well as in so many others, BMI is meeting a great and widespread need.

"Man-Bites-Dog" is the old newspaper formula for news. This week *Variety* shows what it considers the unusual and the striking. HIT IS MADE WITHOUT BIG AIR BUILD-UP, it announces in headlines. The tune in question has been played on the air. All that stirred *Variety's* interest was the fact that it "got there with a minimum of radio plugging. . . . For the past several weeks it has averaged but eight network plugs a week."

That says as plainly as any editorial could say, "It is radio which makes a song into a hit. When a hit is made without being plugged on the air—boy, that's news!"

BMI tunes start off with a better chance to become hits than any other songs. Every BMI baby is born with a silver spoon in its mouth.

The following letter appeared in *The Beverage Times* for May 6, 1940:

To the Editor:

Would you be kind enough to tell me what to do? For the last four years I paid to the ASCAP $30 a year, for two nights'
music, three pieces, a week. Now this year they ask $60 a year for one night a week, three pieces playing. Do you think this is fair? I think this new rate will put many musicians out of work. What is your opinion? I think it is going to be a racket and should be stopped. I wish your paper would publish this fact.

Harry C. Seiffert,
Brightwaters, L. I.

(We suggest that you get in touch with Franklin Nichols, president of the Suffolk Restaurant Liquor Dealers' Association, Nichols Hotel, Patchogue, L. I. Association heads are currently working on a plan to escape payment of heavy fees to ASCAP.—Ed.)

This little personal note is a strong demonstration of the circumstances which are sweeping all commercial users of music into eager cooperation with BMI.

Fly Compliments Broadcasters On War Coverage

"Broadcasters of the United States are doing a whale of a job on reporting war news," FCC Chairman James Lawrence Fly said at a press conference early this week.

The Chairman told newsmen that he has listened to a great number of broadcasts, both from commentators in America and foreign broadcasts, and is of the impression that the broadcast industry is doing an excellent job and "keeping us well informed." Chairman Fly said that the news broadcasts are preserving a balanced perspective and are using discretion in giving their news sources.

"Broadcasters," he said, "are doing an intelligent job and are evaluating their reports." Mr. Fly said that he is favorably impressed with the war news broadcasts and with the methods that are being used and broadcasters are doing "a real public service."

The Chairman called attention to the fact that some time ago there was a serious question regarding the sanctioning of war news but the broadcasters and Commission reached an agreement and the broadcasters are "consistently following the rule laid down." In his remarks Mr. Fly said that of course he was not making any reflection on the excellent work of the regular news service.

Chairman Fly told the newspapermen that he hopes that the Commission will be able to make public its television policy over the next weekend.

DISTRICT MEETINGS

In line with the NAB bylaws, members in eight of the seventeen districts will hold meetings within the next few weeks. The principal business to be transacted at these meetings is the election of directors for a two year term. A staff representative from NAB will attend all the meetings except the one at Los Angeles. Distance and the fact that Sixteenth District members will have the opportunity to meet the staff at the August convention led to this decision.

Carl Haverlin, recently appointed stations relations director of Broadcast Music, Inc., will attend all of the meetings including the one at Los Angeles. The following dates have been definitely set:

June 1-2—District 4—Greensboro, North Carolina.
June 8—District 10—St. Louis, Missouri.
June 10—District 12—Wichita, Kansas.
June 12—District 14—Salt Lake City, Utah.

The dates for the Second, Sixth, Eighth, and Sixteenth Districts have not as yet been agreed upon and will be announced later.

JUSTICE DEPARTMENT CLEARS FIVE PROGRAMS REFERRED BY FCC

The Justice Department has cleared five more programs referred to it by the FCC.

Previously the Justice Department had cleared the "Pot o' Gold" and "Mead's Bakery" programs.

McGRANERY COPYRIGHT BILL BAD FOR BROADCASTING

Preliminary analysis of the McGranery Copyright Bill (H. R. 9703) shows it to be a compromise between many interests including the performing artists and labor, particularly the A. F. of M. It does not make any concessions to radio and is very definitely directed at the recording interests. Among the outstanding changes the Act would create, are the following:

1. It abolishes the compulsory license clause for recordings.
2. It makes it a violation of law to broadcast a copyrighted rendition or performance without the consent of the owner of the rendition or performance.
3. It prevents the use of the sound track of a picture apart from the visual part of the film.
4. It makes a recorded rendition of a work susceptible of copyright.
5. It extends copyright to the authors of all countries parties to the International Copyright Convention, subject to certain protections of the work prejudicial to his honor or reputation.
6. It preserves the manufacturing clause and provides that all phonograph records must be recorded and manufactured in the United States.
7. It provides for a fifty-six year term of copyright with no valid assignment of rights or grant of interest to be operative longer than the first twenty-eight years.
8. It introduces the right of the author to object to modifications of the work prejudicial to his honor or reputation.
9. It requires any licenses or grants of any right in a copyright to be in writing.
10. It provides that any performer of a rendition which has been recorded shall be deemed to be the author of the rendition, and that in cases of joint renditions, a conductor or leader shall be deemed to be an author.
11. It authorizes the President to take all steps necessary to make the United States a member of the International Copyright Convention.

It is obvious that this bill would be disastrously disadvantageous to all broadcasters. On the face of it, it would appear to be introduced at the request of NAPA. Representative Kramer (D-Calif.), Chairman of the House Patents Committee, has advised the NAB that it is not contemplated at this time to have the Committee on Patents give consideration to this measure.

Promotion

RADIO FESTIVAL

Here are some additional broadcasters who are taking part in National Radio Festival. Observe that they are cutting the coat to fit their particular needs. There’s some productive plan for everybody.

We hope to hear from other members as soon as their plans are perfected.

IOWA

Out where the tall corn grows listeners of KRNT and KSO, Des Moines, are to have at least a month-long Radio Festival including a KSO-KRNT Radio Festival Picnic; tentatively scheduled for Saturday, June 8.

Radio Festival is tied-in with the Radio Gift Man. He will give away one radio set every day to some listener who is tuned to either of the two stations when he calls.

“We’re tying him up with the Radio Festival for at least a month, and possibly more, beginning May 13,” said Craig Lawrence, commercial manager of KSO-KRNT.

“The Radio Gift Man will call in different section of Des Moines, the various towns around Des Moines and in the rural areas at a different time each day—it may be early in the morning, mid-morning, noon time, late afternoon but whatever time he calls, it will be completely unannounced. He will carry his gift radio right with him and tell the person upon whom he calls about the Radio Festival and present them with the radio. Naturally, we will have publicity on this tied up with the Radio Festival in the radio columns of the Des Moines Register and the Des Moines Tribune.

To climax the Radio Festival, both stations will give a big picnic at Riverview Park in Des Moines. This is the amusement park here and it is quite large for a town of this size and very well operated. We will have a lot of free rides, free shows, fireworks, a baseball game and lots of special attractions for the people who come out. It will be entirely free to them and we will feature it as a KSO-KRNT Radio Festival Picnic. Naturally, this will also get strong promotion on the stations and in the newspapers. We have this currently scheduled for Saturday, June eighth.

All in all, it’s going to be a big month for turning the spotlight on radio here in Iowa and the listening public will know plenty about it.”

UTAH

“KOVO will cooperate in every way in the promotion of National Radio Festival . . . we have studied your plan and intend to follow it very closely, with variations necessitated by local conditions . . . Congratulations on your fine work,” he wrote.

WEST VIRGINIA

From Clarksburg, W. Va., G. C. Blackwell, director, WBLK, writes that “WBLK will join the other stations of the West Virginia Network to observe National Radio Festival, the week of June 10-15, inclusive.” Other West Virginia Network stations are WCHS, Charleston; WSZ, Huntington; and WPAR, Parkersburg.

West Virginia stations previously reporting on Radio Festival were WJLS, Beckley and WWVA, Wheeling.

“Tentatively,” Mr. Blackwell said, “it is planned to engage the facilities of our local auditorium for the broadcast of several of our local programs in an ‘open house’ manner.

“It may be that local radio and allied product dealers will cooperate in the showing and demonstration of radio receivers, etc.

“Cop Manager Late B. Davison will proclaim observance of the week in Clarksburg. It is understood that the Governor of West Virginia will issue a state Radio Festival proclamation.”

CALIFORNIA

Harry W. Witt, president of the Southern California Broadcasters Association, and sales manager of KNX, Los Angeles, has plenty of ideas on the fire leading to a great sectional observance of Radio Festival.

SMOKE IN LOUISIANA

Where there’s smoke, there’s fire. And final Radio Festival plans in Louisiana, still in the smoke stage, are about to burst into flame. It looks as though the state will do “a Connecticut,” “a North Carolina” or “a West Virginia” where practically all of the stations went Radio Festival. The will to cooperate is there.

CONNECTICUT

The “nutmeg” boys are doing an outstanding job of industry promotion in connection with Radio Festival. For one thing they are distributing hundreds of copies of “ABC of Radio” to students who are hearing various broadcasts and who wish to enter the essay contest.

So far books have been expressed to WDRB, Hartford; WELI, New Haven; WICC, Bridgeport; WNBC, New Britain; WNLC, New London; and WTIC, Hartford.

WTIC ran a full page ad in Hartford Newsdaily on Radio Festival May 13. During the remainder of the week a force of men called on the elementary and high schools with copies and posted them on the school bulletin boards.

Even while pre-Radio Festival promotion was under way Connecticut stations carried on a more circulation campaign via auto radio as reported in another column.

NEW YORK

WIEC, Rochester, is head over heels in plans for an outstanding Radio Festival celebration. The staff is at work under direction of Manager Gunnar Wieg, and the advance schedule of broadcasts sent by Charlotte Edwards, continuity director, indicates the wide scope of activities contemplated.

They have brought into the picture the youngsters, associations, men and women. On some days there are as many as five Radio Festival broadcasts scattered throughout the afternoon and evening build up.

One series of programs will be conducted with the cooperation of the Parent-Teachers Association. The subject for discussion will be “Using the Radio as A Means of Making the Home the Center of Family Culture, Entertainment and Education.”

A job hunt for several deserving high school seniors will be conducted in cooperation with the Rochester Chamber of Commerce. There will also be a situation selection of one of their number to appear on the big civic opening of the Festival as the representative of all the girls and boys in the city.

May 17, 1940 4254
A newspaper editor will discuss "The Freedom of Radio and the Press."

Outstanding department stores will display products and photographs of radio of interest to the public.

A transcription will be made of one of the weekly assemblies in a large high school and then played back when the students can hear it.

Short biographical sketches of men who have helped to make radio will be incorporated into various programs.

Saluting radio as a contributor to safety via automobiles will feature the station's own safety programs.

The man on the street programs, with theater tickets as giveaways, will be based on propounding questions concerning radio celebrities, programs and sponsors.

The Mayor of Rochester will proclaim Radio Festival Week. Additional plans will be completed on May 20.

**AUTO RADIO**

Millions of hours of added daily listening are assured this year due to the efforts of individual stations to popularize auto radio and to induce present auto set owners to keep their receivers in good repair.

Several suggested announcements will be mailed stations within the next few days. Below are listed some of the stations which began the increased listening campaign early:

**"LISTEN WHILE YOU RIDE" ON WLOK**

"Listen While You Ride" announcements started on WLOK, Lima, Ohio, on April 1 and have been continued since that time. So reported Howard Donahoe, program director, on May 11. There are two announcements per day by new auto radio sets.

**WSPD COOPERATES WITH RSA**

Russell Gohring, program director, WSPD, Toledo, reports highly satisfactory experience with the Toledo Chapter, Radio Servicemen of America. The station is the medium through which the public and the servicemen are brought together. He says:

"We sincerely feel that WSPD and RSA in Toledo and vicinity can mutually profit by cooperation, and we are very happy to render every assistance. Joe Marty (RSA secretary) has been most cooperative and we feel very kindly toward this organization."

**AND IN CONNECTICUT**

The month of April found Connecticut broadcasters engaged in suggesting to auto-set owners that their sets be put in thorough repair so that they would bask in their share of the nation's 11 million to 18 million extra hours of radio listening per day.

To James F. Clarke, promotions manager, WTIC, we're indebted for the following summary of happenings throughout the state in connection with the campaign:

WBRY, Waterbury, gave fine cooperation, and, in a letter received a few days ago, they state that the announcements will be continued until May 15.

WNLC, New London, and WELI, New Haven, both booked the campaign for the entire month of April. There were several pluses every day.

WICC, Bridgeport, cooperate on a long range basis with their local service men's group to the radio station's advantage. Several announcements were handled. The station is very aggressive.

WNBC, New Britain, used the auto-radio service announcements several times daily all through the month of April.

WDRC, Hartford, as always, did a good job, while we at WTIC used the announcements throughout the day and evening whenever the opportunity afforded.

**WNEW, NEW YORK CITY**

This station began a serious effort to improve servicing throughout a metropolitan New York on Saturday, May 11. WNEW's Promotion Manager, Halsey Barrett, is cooperating with the eight metropolitan chapters, Radio Servicemen of America, in the area. They have a central telephone number and calls are dispatched to the nearest member.

**SALES ACTIVITIES**

Plans have been completed by the NAB Sales Managers' Division to take part in the Conventions next month of the Advertising Federation of America and of the National Retail Dry Goods Association. The AFA meeting will be held at the Sherman House, Chicago, June 23-27, while the NRDGA will meet at the Palmer House, June 17-20.

Transcripts of the NRDGA meeting in January, devoted to the use of radio by department stores, are now available at $1.50 per copy from Joseph Hanson, Sales Promotion Manager, National Retail Dry Goods Association, 101 West 31st Street, New York City.

Ed Kirby, NAB Public Relations Director, and Samuel J. Henry, Jr., of the NAB Bureau of Radio Advertising, attended this week's Convention of the American Association of Advertising Agencies in New York.

**TOBEY ASSAILS FCC, RADIO**

Senator Tobey (R-NH) made the following speech in the Senate on May 15:

In June 1938, the House of Representatives voted on a resolution which provided for a committee of the House to inquire into and investigate allegations and charges that a monopoly or monopolies existed in radio broadcasting; the resolution further provided that the committee should make a thorough investigation of these charges and the effect which such monopoly or monopolies may have on the character of radio programs, the rates charged advertisers and the general effect which such monopoly has on the public.

Up to a period shortly preceding the day of this vote, it was the general belief, on the part of the members of the House, that the resolution would go through without material opposition. Then the pressure was applied on members of the House to vote against the resolution. Chairman O'Connor of the Rules Committee spoke of this monopoly situation, as follows:

"I have never in my life seen such lobbying against the resolution, from high places and from low places, from part of the leadership of the House and from the page boys of the House and even the colored boys in the other places. I have been here so long that I can smell what is going to happen in this House. You can walk out in that lobby tonight and you will find difficulty in getting through the lobby because of the crowd of radio lobbyists from New York and all over the country and from every department of the government.

This is the situation we face. The Committee on Rules instructed me, after holding hearings for two years, to bring in this resolution to investigate the radio monopoly. I know all the pressure that has been put on my friends; I know all the pressure that has been put on the members of this House."

The resolution calling for this investigation by the House was defeated and one of the main arguments presented by the opponents of the resolution was that the Federal Communications Commission itself was investigating alleged monopolistic conditions in the radio industry and, therefore, there was no need for the Congress to take duplicate action.

Bearing on this situation, I wrote a letter, under date of May 3, 1940, to each of the seven members of the Federal Communications Commission, which reads as follows:

"In November 1938, Chairman McNinch stated to the House Appropriations Committee that the Radio Monopoly Report of the Commission would be submitted to the Congress within sixty days. "In June 1939, Commissioner Brown of the Federal Communications Commission appeared for the Commission, before the same Congressional Committee and said that the report would be ready for Congress within sixty days. "In November 1939, Commissioner Fly of the Federal Communications Commission appeared and stated before the Congressional Committee that the Commission would make its report and recommendations within sixty days.

May 17, 1940
"It is now eighteen months since Congress was officially told by the Commission that its Radio Monopoly Report and recommendations would be 'ready in about sixty days.'

"I submit to you that, in the light of these facts, these assurances would seem to be nothing but a mockery. As a member of the Senate, interested in this matter, I ask you now as to the reasons for this delay and what you, as a member of the Commission, can do to have the report submitted to the Congress at once. An early reply will be appreciated."

This letter was simple, direct, and to the point. I fully expected to get prompt and adequate responses from the members of the Commission. Three replies have been received and they read as follows:

(Date) May 7, 1940.

"My dear Senator Tobey:

"Your letter of May 3 has been received. I am not familiar with the progress of the 'Radio Monopoly Report' of the Commission. Under Chairman McNinch's regime a committee consisting of Commissioners Sykes, Brown and Walker with McNinch as Chairman was appointed by the Commission to investigate network chains, etc. They have held extensive hearings. Commissioner Sykes has resigned and Commissioner Thompson took his place on the Committee. Chairman McNinch has resigned and no one has taken his place on the Committee.

"Meantime, I have been Chairman of the Committee on Superpower and the WLW matter in that connection, which reported long ago to the Commission. I was also a member of the Committee on Television which reported on that matter last fall to the Commission. As I am not a member of the so-called Monopoly Committee I do not know how far they have progressed toward their report.

"Further, may I say that I have been ill since the 20th of February confined to my bed with pneumonia, pleurisy and phlebitis. The first two are well over; the last still keeps me on the bedroom floor of my house. Therefore, I am not as familiar as I otherwise would be with what has been done at the Commission.

"With warm personal regards,

"Sincerely yours,

(Signed) Norman S. Case,
Commissioner"

Under date of May 7, 1940, I received the following letter:

"Dear Senator Tobey:

"Receipt is acknowledged of your letter of May 3, 1940, relative to the so-called 'Monopoly Report' of the Commission.

"As you know, the hearing, as well as the report on the evidence, wasentrusted to a committee of the Commission. This Committee is now composed of Commissioner Thad Brown, Chairman, Commissioner F. I. Thompson, and Commissioner Paul A. Walker. Although the hearing to ascertain the facts has been completed for some time, the Committee has not yet submitted its report to the Commission. Recently, upon inquiry of the other Commissioners who were not members of the Committee, the report was promised in a short time.

"In view of your letter, at the next regular meeting of the Commission I shall press for the report and recommendations of the Committee. Any action taken thereon by the Commission with appropriate recommendations will be forwarded to Congress if the same are found to be necessary.

"Very truly yours,

(Signed) T. A. M. Craven,
Commissioner"

A letter dated May 5, reads as follows:

"My dear Senator Tobey:

"Only yesterday, I returned from several weeks of revocation hearings that I was holding in Texas, so I had no time to look into the monopoly report as to its standing as of today.

"Over a month ago, I brought the matter up at meeting of the full Commission. I stated that, while I was not a member of the subcommittee on the Radio Monopoly Hearing, I felt that the report had been so long delayed that all the members of the Commission would very properly be charged with neglect if the subcommittee were to continue to withhold the report. Two of the members of that subcommittee, Commissioners Thompson and Walker, assured me that they had been trying to have the report forwarded to the full Commission. The third member of the subcommittee is Commissioner Brown, who is also chairman of the subcommittee.

"Personally, I am glad that you have taken the action that you have, and at the next meeting of the Commission I shall formally move that the report be submitted to the Commission and submitted to Congress as you request.

"Very sincerely yours,

(Signed) George Henry Payne"

Men who have closely followed the activities of the Federal Communications Commission have advised that orders have been given against public releasing of the report and that this is in marked contrast to the way other similar matters have been treated. The subcommittee which conducted the superpower and television studies were permitted to make known their findings at the time they were turned in to the full membership.

It has been said that the President of the United States has given assurance that he will not allow the report to be made public without his approval. It is pointed out that much of the data compiled in the report will be out of date by the time it is released.

I am advised by several sources that it is the intention of the subcommittee to render its report without any recommendations whatever.

Here we have a situation where the Congress, two years ago, was urged not to conduct an investigation on the ground it would be a duplication of the activities of the Federal Communications Commission. Eighteen months ago, and twice since that time, members of the Commission have assured Congress that the report would be ready within sixty days. The whole thing has been a mockery. A simple and reasonable question was put to each member of the Commission two weeks ago as to what each member would do to get the report presented to the Congress at once. A majority of the members of the Commission did not choose to answer or acknowledge this letter. This unusual delay, in light of the assurances of the Commissioners, indicates very strongly that the report is being deliberately held up.

I have presented the facts of this situation in order that the record may be clear and the Congress may know to what extent the members of the Commission are proving themselves free from influence in dealing with this vital matter of importance to the people.

Mr. President, I ask to have printed in the Record, at this point, an article appearing in the May 8 issue of "Variety" with regard to this matter.

UNLICENSED OPERATOR CONVICTED

Following an investigation by inspectors of the FCC of the operation of unlicensed radio stations on Long Island, N. Y., Edward Mathes was indicted for violation of Sections 301 and 318 of the Communications Act of 1934, as amended.

The defendant was arraigned in the United States Court for the Eastern District of New York on May 6, and pleaded guilty to charges of operating an unlicensed radio station and operating a radio station without an operator license. The court suspended sentence and placed the defendant on six months' probation.

ASKS MORE MONEY FOR FCC

President Roosevelt this week asked Congress for $142,000 more for telephone work of the FCC.

He sent to Congress the request for this amount of money and in explanation the following letter from Harold D. Smith, Director of the Budget in connection with the additional request:

I have the honor to submit herewith for your consideration a supplemental estimate of appropriation for the Federal Com-
The Communications Act of June 19, 1934. In order to carry out adequate regulation of the telephone industry in accordance with the 1941 Budget and its approval is recommended.

The $142,000 submitted herewith will enable the Commission to initiate the proposed program. The foregoing supplemental estimate of appropriation is required to meet a contingency which has arisen since the transmission of the 1941 Budget and its approval is recommended.

INTERNATIONAL BROADCASTING

The Commission has completed and transmitted to Congress its final report on the telephone investigation. Based upon facts developed during the investigation, the Commission has determined the procedure to be followed in order to provide adequate regulation of the telephone industry in accordance with the Communications Act of June 19, 1934. In order to carry out the international broadcasting missions, the Commission has determined the procedure to be followed in order to provide adequate regulation of the telephone industry in accordance with the Communications Act of June 19, 1934.

In order to carry out the mission of the 1941 Budget and its approval is recommended. The $142,000 submitted herewith will enable the Commission to initiate the proposed program. The foregoing supplemental estimate of appropriation is required to meet a contingency which has arisen since the transmission of the 1941 Budget and its approval is recommended.

FOR INTERNATIONAL BROADCASTING

FCC has sent following announcement to all licensees of international broadcast stations:

The attention of all licensees of international broadcast stations is called to the provisions of Section 4.45 which provides that no international broadcast station will be licensed for operation with a power less than 50 kilowatts after July 1, 1940. Any station not having a power of 50 kilowatts should immediately file the necessary application to install a 50 kilowatt transmitter.

Your attention is likewise called to Section 4.43(c) which provides that the antenna shall be so designed and operated that the signal (field intensity) toward the specific foreign country or territory in which the station is located shall be at least 3.16 times the average effective signal from the station (power gain of 10). The Commission will soon require the filing of proof of performance showing compliance with this section.

NEW FCC RULE

The FCC has adopted the following rule to become Section 4.12 of the Rules Governing Broadcast Services other than Standard Broadcast:

"Section 4.12(a) The station license and any other instrument of authorization or individual order concerning the construction of the equipment or manner of operation of the station shall be posted so that all terms thereof are visible in a conspicuous place in the room in which the transmitter is located, provided:

1. If the transmitter operator is located at a distance from the transmitter pursuant to Section 4.9, the station license shall be posted in the above-described manner at the operating position, provided:
   1. If the station is licensed for portable-mobile operation, the station license or a photo copy thereof shall be affixed to the equipment or kept in the possession of the operator on duty at the transmitter. If a photo copy is used the original license shall be available for inspection by an authorized government representative.

(b) The license of each station operator(s) shall be conspicuously posted at the operating position, provided:

1. If the station at which the operator is on duty is licensed for portable-mobile operation, the operator's license may be kept in his personal possession.

FROM THE FCC MAIL BAG

The Commission has received several letters objecting to war news over the radio, or criticizing it as "biased." An Indiana man writes to the "Government Watch Dog" in Washington, D. C., to give daily war news broadcasts. A New Jersey man offers his services to the Commission as "a commentator on European news events." A New Yorker would "like to get in touch with the Commission's television casting director." A Cincinnati man requests forms for approval of broadcast programs. Obviously the Commission has to reply that it has no jurisdiction in such matters.

"RADIO BROADCASTING EXPLAINED" (By the FCC)

At some time or other you have observed, from a distance, a man chopping wood. You noticed that the sound of his axe reached your ears AFTER your eyes had witnessed the actual impact. By the same token, a person at a radio receiving set thousands of miles away can hear a broadcast sound before a person seated far back of the microphone yet within earshot of the actual proceedings.

This is because radio emissions travel with the speed of light—186,000 miles a second. (A sound wave travels only about 1,120 feet a second.) In the studio these vibrations are converted into electrical current having the same "frequency" and "intensity" characteristics as the sound delivered into the microphone. After being checked and double checked at several points, these electric impulses are then sent over leased telephone wires to the individual radio receiving station (usually some miles distant), or to other radio stations carrying the same broadcast. This is the method used in so-called "network" broadcasting.

These electrical vibrations which represent the voice or music in the studio are sometimes called the "audio wave." They are greatly amplified in intensity—sometimes 10,000,000,000 times—before they are imposed upon the "carrier wave" at the transmitter. The carrier wave is the one assigned to the radio station by the Federal Communications Commission—and to which the dials on the radio receiver must be tuned in order to hear the station.

The intensity and the frequency of this wave are constant, and all by itself it cannot transmit any music or speech. In order to do this it must be varied in some way in accordance with the fluctuations of the audio wave. This is called "modulation." In the standard broadcast band the audio waves are impressed on the carrier wave in such a way as to cause its frequency to remain constant and its "amplitude" (or power) to vary in accord with the audio waves. This is called "amplitude modulation."

These modulated radio waves are then put on the air by the transmitting antenna. They radiate from the antenna tower like waves moving with the speed of light. They emerge in the same fashion that ripples do in a calm body of water disturbed by a thrown stone. However, these ripples move out in ALL directions and become smaller as they spread. In the case of radio waves, the "ripples" are called "ground waves." Other "ripples" are called "skywaves." The former are used for local reception; the latter for distant reception.

Radio waves pass through buildings and other objects subject, of course, to absorption and interference. As in the case of artificial ripples on water, radio vibrations weaken with distance. Seasonal disturbances and sunspot periods can also disrupt the signal from their effects.

Standard broadcast stations in this country transmit 550,000 to 1,600,000 waves a second. They are known as "long wave" stations because the waves they transmit are actually long. At 550,000 waves a second, the distance between the crests is 1,800 feet or more. This is known as "wave length." A station transmitting 550,000 waves a second is said to have a frequency of 550 "cycles." This corresponds to 550 "kilocycles" (one kilocycle...
vision bids to make the ultra-high frequencies (above 30,000 if the stations are adequately separated to prevent interfering with wide. A broadcast channel can be used by a number of stations broadcast band there are 106 such channels, each 10 kilocycles wave it is the amplitude or power which remains constant instead of the frequency as in the standard AM (amplitude modulation) service are limited, so there is international agreement as to their use. This is necessary to prevent broadcasts in one country from "colliding" with broadcasts in another country. Thus, though "collisions" are responsible for the squeaks or rumbles often heard when you attempt to listen to distant stations.

A "regional channel" is one in which several radio stations can operate with individual station power not in excess of 5 kilowatts. A "local channel" is one in which several stations may operate with individual power not in excess of 250 watts.

Federal Communications Commission licenses broadcast stations to operate with 100 watts to 50,000 watts of power. These are the minimum and maximum standards held by the Commission to be in the public service. "Watt" typifies radio power just as "horsepower" represents power in mechanics. The two hardly permit comparison but, roughly 476 watts are equivalent to one horsepower.

In order to provide broadcast facilities to varying population densities, the Commission licenses four general classes of broadcast stations. A Class I station, which occupies on a clear channel, uses 10,000, 25,000, or 50,000 watts power to serve remote rural areas as well as a large center of population. A Class II station, which also occupies on a clear channel, uses 250, 500, 1000, 5000, 10,000, 25,000, or 50,000 watts, renders secondary service over a primary service area. A Class III station, which shares a regional channel with several similar stations, uses 500, 1000 or 5000 watts, and serves a center of population and adjacent rural area consistent with interference from other stations on the same channel. A Class IV station operates on a local frequency (shared by similar stations elsewhere) and uses 100 to 250 watts for such local service.

"Primary service" area means the area in which the ground wave is not subject to objectionable interference and fading. "Secondary service" area means an area served by the skywave without objectionable interference but subject to intermittent variations in intensity. "Intermittent service" area means the area receiving service from the ground wave beyond the primary service area and subject to some interference and fading.

**FEDERAL COMMUNICATIONS COMMISSION**

**DECISIONS**

The FCC has adopted as the final findings of the Commission the Proposed Findings of Fact and Conclusions dated March 13, 1940, and entered a final order DENYING without prejudice the application of C. T. Sherer Co., Inc., Worcester, Mass., for a new station to operate unlimited time, using the frequency 1200 kilocycles, with daytime power of 250 watts, nighttime power of 100 watts.

The FCC has announced adoption of an order GRANTING the application of L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Eifie H. Allen, and Aubrey Gay, doing business as Valley Broadcasting Co., West Point, Ga., for construction permit for new radio-broadcast station to operate on 1310 kilocycles with power of 250 watts, un-
limited time, upon the condition that permittee shall file an application for modification of construction permit specifying the exact transmitter location and the antenna to be employed within two months after the effective date of this Order.

**FINDINGS OF FACT**

The FCC announced its Proposed Findings of Fact and Conclusions, proposing to GRANT the application of the Radio Voice of Springfield, Inc., for a construction permit to erect a new broadcast station in Springfield, Ohio, to operate on the frequency 1310 kilocycles, with power of 100 watts, unlimited time.

In its conclusions the Commission finds:

1. Station WLBC and the one proposed herein are classified, under the Commission's rules and standards, as Class IV stations and, as such, normally may be expected to render interference-free service during the daytime to the 0.5 millivolt per meter contour. It is plain that in the instant case it would not be in the public interest to deny the application for the proposed station in order that the relatively few people now receiving service from Station WLBC who would be affected thereby could continue to receive service from that station, since to do so would mean that the City of Springfield would be deprived of a local radio service, and the relatively large number of people who would be served by the proposed station would not receive the benefit of such service. Particularly is this true where as here those who would no longer receive service from station WLBC already receive service from several other stations.

2. Upon consideration of all the facts of record, the Commission concludes that the granting of the instant application will serve public interest, convenience and necessity.

In a proposed finding of fact and conclusions FCC announced, concludes that the "public interest, convenience and necessity" will be best served by renewing the license of radio station KVOS, Bellingham, Wash., and denying the application of the Bellingham Broadcasting Company for a new station seeking the facilities of KVOS in the same place.

The Commission holds the Bellingham Broadcasting Company "not financially qualified" to operate its proposed station. It adds:

"Very little information is furnished as to the type and character of program service to be furnished. It is essential in a proceeding such as this that the Commission not only be informed of the service which the applicant corporation would furnish the Bellingham community but also advised in such a manner that a comparison may be made between such service and that which the applicant seeks to supplant."

KVOS, which is the only station offering primary service to the Bellingham area, is declared to now be "legally, technically, and financially qualified to continue." The Commission points out that prior to July, 1937, the licensee "conducted its station in such manner generally as to encourage strife and discord in the community" and, subsequently "instances were presented . . . of the continuance to some degree of doubtful practices, particularly with respect to the treatment of candidates for public office." The Commission explains:

"The evidence suggests, but is not conclusive, that 'equal opportunity' was not afforded . . . and that censorship of candidates' speeches may have been imposed. However, determination of the question of censorship involves consideration of whether the material was libelous as a matter of law (a subject not within the jurisdiction of this Commission) and whether, if libelous, a licensee possesses the legal right to expunge from a proposed broadcast a libelous statement. In any event, in the light of this record, we do not feel called upon to pass upon these questions."

The Commission concludes:

"The licensee has promulgated regulations since the cessation of the 'Newspaper of the Air' program designed to prevent a recurrence of that type of broadcasting. It has afforded use of its facilities for religious, civic and educational purposes. Its program service as a whole indicates that for the past year and more a wide variety of acceptable programs have been furnished. Recent instances indicate the maintenance of an unbiased attitude on the part of the station's management. Former questionable practices have now been discontinued."

Station KVOS operates on 1200 kilocycles, with 250 watts, unlimited time.

All parties will have 20 days within which to file exceptions and request oral argument on the proposed report and exceptions.

The FCC has announced its Proposed Findings of Fact and Conclusions, proposing to DENY the application of C. L. Weathersbee, W. H. Nichols, C. L. Pickler and E. M. Thompson, d/b as Albemarle Broadcasting Station, for a new station in Albemarle, North Carolina, to operate on the frequency of 1370 kilocycles with power of 100 watts, daytime only.

In its conclusions the Commission finds:

1. The applicants have failed to sustain the burden of showing that they are financially and otherwise qualified to construct and operate the proposed station, and that a grant of the application would serve public interest, convenience and necessity.

   The evidence in the record relating to the financial qualifications of the individual applicants, and of the partnership, fails to show that they are presently possessed of sufficient means to pay the cost of construction and the expense of initial station operation, or resources from which necessary funds may be secured and made available. They have no definite or certain plan or arrangement for securing necessary additional finances. The record fails to show definitely that there is sufficient commercial support available to defray the estimated operating expense of the proposed stations. None of the applicants has had experience in the operation of a regular radiobroadcast station, and no definite arrangement has been made by them for the employment of sufficiently qualified personnel to insure efficient operation of the proposed station, nor have they any well defined plan for rendering broadcast service to the listeners in the area proposed to be served.

2. The granting of this application would not serve public interest, convenience and necessity.

All parties will have 20 days within which to file exceptions and request oral argument on the proposed report and exceptions.

The FCC has announced its Proposed Findings of Fact and Conclusions proposing to AFFIRM the recommendations of Commissioner Payne to revoke the licenses of three Texas radio broadcast stations—KTBC, State Capital Broadcasting Assn., Austin, KNET, Palestine Broadcasting Assn., Palestine, and KRBA, Red Lands Broadcasting Assn., Lufkin.

Upon consideration of all the facts of record, the Commission concludes in its Proposed Findings, that original
construction permits and licenses for these stations were issued by the Commission upon misleading representations on the part of the respondents. Applicants failed to make full disclosures to the Commission concerning the financing of station construction and operation, as well as the ownership, management and control thereof, in violation of the Communications Act, and that had the actual facts in this connection been made known to the Commission it would have been warranted in refusing to license these stations.

All parties will have 20 days within which to file exceptions and request oral argument on the proposed report and exceptions.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following hearings and oral arguments are scheduled before the Commission for the week beginning Monday, May 20. They are subject to change.

**Monday, May 20**

NEW—Worcester Broadcasting Corp., San Diego, Calif.—C. P., 1120 kc., 250 watts, unlimited time.

**Wednesday, May 22**

Further Hearing Before Commissioner George Henry Payne

KFJ—Eagle Broadcasting Co., Inc., Brownsville, Tex.—In re: Revocation of Station License of KFJ.

**Thursday, May 23**

Oral Argument Before the Commission

Report No. B-96:

W6XKG—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license, 259.50 kc., 1000 watts, emission A-3, unlimited time. Rule 983 (a).

W6XRE—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license, 88000, 120000, 210000 and 500000 kc., 500 watts, emission A-3, unlimited time. Rule 983 (a).

**FUTURE HEARINGS**

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

**June 11**

NEW—The Kaw Valley Broadcasting Co., Inc., Topeka, Kans.—C. P., 1300 kc., 250 watts, unlimited time.

**APPLICATIONS GRANTED**

WSM—The National Life and Accident Ins. Co., Nashville, Tenn.—Granted extension of special experimental authority to transmit facsimile signals over standard broadcast station WSM (650 kc., 50 kW, unlimited time), between the hours of 12 and 6 a.m., for the period ending August 1, 1940.

KFSI—Airfan Radio Corp., Ltd., San Diego, Calif.—Granted construction permit to move transmitter site locally, install new equipment and vertical radiator, and increase power from 1 kW to 5 KW, unlimited time, on 600 kc.

KVI—Puget Sound Broadcasting Co., Inc., Tacoma, Wash.—Granted modification of license to increase night power from 1 KW to 5 KW, unlimited time, on 750 kc.

WELL—Enquirer News Co., Battle Creek, Mich.—Granted construction permit to install new transmitter, change antenna, and increase power from 100 watts to 250 watts, unlimited time, on 1420 kc. Also granted consent to voluntary assignment of license of station from the Enquirer-News Company to Federated Publications, Inc., the new licensee, hereetofore held all the stock of the Enquirer News Co., the old licensee. The grant of the application for construction permit at the same time as the Commission gave its consent to the assignment of license in this case is not to be considered a precedent for the grant of additional facilities to an assignor of a broadcast station license in any case where the new licensee was not previously the sole stockholder of the licensee corporation.

KSUB—Harold Johnson and Leland M. Perry, d/b/a Johnson and Perry, Cedar City, Utah.—Granted voluntary assignment of license for station KSUB from Johnson and Perry to Southern Utah Broadcasting Co.

KSUB—Leland M. Perry, Cedar City, Utah.—Granted renewal of license for station KSUB to operate on 1310 kc., 100 watts, unlimited time, for the period ending August 1, 1940.

W3XO—Janks & Bailey, Georgetown, D. C.—Granted modification of high frequency broadcast (FM) license to change frequency, from 45200 to 1300 kc.

WGTC—Greenville Broadcasting Co., Greenville, N. C.—Granted modification of construction permit (B3-P-2053), as modified, to increase hours of operation from daytime to unlimited on 1300 kc., using 250 watts.

KOTN—Universal Broadcasting Corp., Pine Bluff, Ark.—Granted construction permit to change transmitting equipment and increase power from 100 to 250 watts, unlimited time, on 1500 kc. (B3-P-2675).

KJAL—Red River Broadcasting Co., Inc., Duluth, Minn.—Granted modification of license to increase power from 100 watts night to 250 watts day, to 250 watts unlimited, time, on 1500 kc. (B4-ML-940).

KEUB—Eastern Utah Broadcasting Co., Price, Utah.—Granted construction permit to make changes in equipment and increase power from 100 to 250 watts, unlimited time, on 1120 kc. (B5-P-2682).

WHDL—WHDL, Inc., Olea, N. Y.—Granted modification of license to change frequency from 1400 kc. to 1420 kc. and time of operation from daytime to unlimited, using 250 watts power (B1-ML-929).

WSAL—The Crosley Corp., Cincinnati, Ohio.—Granted modification of construction permit to make changes in directional antenna system; station operates on 1330 kc., 5 KW DA, unlimited time (B2-MP-953).

WSAV—WSAV, Inc., Savannah, Ga.—Granted modification of license to increase power from 100 to 250 watts, unlimited time, on 1310 kc. (B3-ML-983).

WSEO—Commodore Broadcasting, Inc., Decatur, Ill.—Granted modification of license to increase night power from 100 to 250 watts, unlimited time, on 1310 kc., using 250 watts day (B4-ML-738).

WJPP—Orelle W. Lyerla, Herrin, Ill.—Granted modification of construction permit for new transmitter, approval of antenna, studio and transmitter site, and change power to 250 watts day and night on 1310 kc. (B4-MP-926).

WRAW—Reading Broadcasting Co., Reading, Pa.—Granted construction permit authorizing new transmitter and increase in power from 100 to 250 watts, unlimited time, on 1310 kc. (B2-P-2153).

McDowell Service Company, Welch, W. Va.—Granted construction permit for new Class IV station to operate on 1310 kc., with 250 watts, unlimited time. Exact transmitter and studio sites to be determined with Commission's approval; also antenna system (B2-P-2816).

KFXM—Lee Brothers Broadcasting Co., San Bernardino, Calif.—Granted construction permit to install new transmitter, new antenna, move transmitter, and increase power from 100 to 250 watts, on 1310 kc. (B5-P-2682).

Tri-County Broadcasting Co., DuBois, Pa.—Granted construction permit to erect a new station to operate on 1300 kc., 250 watts, unlimited time. Exact antenna system and trans-
mitter and studio locations to be determined with Commis-
sion's approval (B2-P-2665).

**DETECTED FOR HEARING**

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.—Applicant for construction permit to install directional antenna for night use; station operates on 1080 kc., with 50 KW, unlimited time.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Applicant for construction permit to install new transmitter and directional antenna for night use; change frequency from 770 kc. to 1080 kc.; increase power from 10 KW to 50 KW; and move transmitter to 18 miles east of Lincoln, Nebr.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Application for modification of license to change hours of operation from simultaneous day, share KFAB night, to unlimited time, on 770 kc. (contingent on KFAB changing frequency to 1080 kc.).

WJAG—The Norfolk Daily News, Norfolk, Nebr.—Application for construction permit to install vertical radiator, change frequency from 1060 kc. to 770 kc., and time of operation from limited to WBAL and WTIC, to daytime (applicant requests frequency of KFAB).

WMBI—The Moody Bible Institute, Chicago, Ill.—Application for modification of license amended to request change in hours of operation from limited, S-WRT, to limited WRT and KFAB, contingent on the granting of WCBD's application to change to 830 kc. and KFAB's application to change to 1080 kc. (WMBI now operates on 1080 kc., with 5 KW, day and night—limited S-WCBD.)

WCBD—WCBD, Inc., Chicago, Ill.—Application for modification of license to change frequency from 1080 kc. to 830 kc. and hours of operation of limited time, sharing with WMBI, to daytime.

**RENEWAL OF LICENSES**

The following stations were granted renewal of licenses for the period ending August 1, 1940:

**MISCELLANEOUS**

KFRU—KFRU, Inc., Columbia, Mo.—Denied special temporary authority to operate simultaneously with Station WGBF with power of 250 watts from local sunset, for the period ending not later than May 16, 1940, in order to broadcast special war bulletins.

WGBF—Evansville on the Air, Inc., Evansville, Ind.—Denied special temporary authority to operate simultaneously with Station KFRU as above or in order to broadcast special war bulletins.

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Granted special temporary authority to rebroadcast impromptu interview between members of U. S. Army traveling flying cadet examining board and station announcer from U. S. Army plane Type B-18 cruising over San Jose, using Army transmitter on Army frequency 3435 kc., from 3:30 p. m. to 4 p. m., PST, on May 11, 1940, or 2:30 p. m. to 3 p. m., PST, on May 13, 1940.

WIN—Hearst Radio, Inc., New York, N. Y.—Denied special temporary authority to operate from local sunset at Albu-
quere, N. Mex., to 2 a. m., EDT, for the period May 11, 1940, to not later than May 21, 1940, in order to broadcast news bulletins concerning the current European war crisis.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Denied special temporary authority to operate on 1060 kc., simul-
taneously with Station KTHS from 9 p. m. to 6 a. m. daily, EST, for a period of ten days, in order to broadcast regular new bulletins, and to broadcast other sustaining programs during such periods as news bulletins are not being broadcast.

Publix Bamford Theatres, Inc., Asheville, N. C.—Adopted final order (B-93) denying the application for construction permit for new broadcast station, to install a directional antenna for nighttime use, and to operate on frequency 1430 kc., power 1 KW, unlimited time.

Knoxxville Broadcasting Co., Knoxville, Tenn.—Granted petition to dismiss without prejudice the application for construction permit for new station to operate on 1210 kc., 250 watts, unlimited time.

WMFD—Richard Austin Dunles, Wmington, N. C.—Granted special temporary authority to operate from 10 p. m. to 11 p. m., EST, May 24, 1940, in order to furnish facilities for a State Wide Political Network to be used by the W. P. Horton Campaign Headquarters of the W. P. Horton for Governor Campaign.

WCAU—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to operate from 9:00 a. m. to 12:30 p. m. EST, on May 18, 1940, in order to broadcast Mov-ving-up Day Exercises of St. Lawrence University.

Columbia Broadcasting System, New York, N. Y.—Granted special temporary authority to rebroadcast the various parts of a scheduled program originating at amateur stations taking part in the simulated emergency broadcast from 8:00 to 8:30 a. m., EST May 12, 1940, for release on the Columbia Broadcasting System: the amateur stations taking part in this program are: WSCN-A, W8AD, KFAB, W8PUS, W8EJU, W8EA, W8TS, W8QP, W8DEC, W8YI, W8CHR, W8KBT, W3W, W3GKM, W3UD, W3ZD, and W3QV.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts from 7:00 p. m. to 9:00 p. m. CST, Sunday, May 12, 1940, for the purpose of broadcasting the program of the Civic Music Festival at Naperville, III.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts from 7:00 p. m. to 9:00 p. m. CST, on May 20, 1940, for the purpose of broadcasting an educational and Patriotic Program from Geneva, Ill.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts from 7:00 p. m. to 9:00 p. m. CST on May 26, 1940, for the purpose of broadcasting the Annual Music Festival of the two local high schools at Aurora, III.

WGOY—E. D. Rivers, Valdosta, Ga.—Granted modification of construction permit for new broadcast station for approval of transmitter and studio sites at E. Park Avenue, Valdosta, Ga., and approval of vertical antenna; station operates on 1120 kc., 100 watts, 250 watts LS, unlimited time. (B-1-MP-946).

KTRB—Thomas R. McMannon & Wm. H. Bates, Jr., Modesto, Calif.—Granted special temporary authority to operate from 1060 kc. in limited time, S-WRT, on May 16, 1940, to completion of opening soft ball game at Modesto; program to also include a band concert by local Stanislaus Co. Boys' Band and appearance of prominent local citizens; to operate from 9 p. m. PST, June 1, 1940, to completion of junior college track meet at Modesto; to operate from 7:30 p. m. PST (Sunset June, 7:30 p. m.), June 13, 1940, to conclusion of the Commencement address at the exercises of the Modesto Junior College.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with Station KTHS from 9 a.m. to 6 a.m. daily, EST, for a period of ten days starting May 10, 1940, in order to broadcast complete news service direct from International News, United Press and the networks, only.

KFBJ—The Farmers & Bankers Broadcasting Corp., Wichita, Kans.—Granted special temporary authority to operate on 1120 kc., unlimited time, Class III-B. Transmitter and studio to be determined, Houston, Texas.

**APPLICATIONS FILED AT FCC**

610 Kilocycles

NEW—West Publishers, Inc., Houston, Texas.—Construction permit for new station to operate on 610 kc., 250 watts night, 1 KW day, unlimited time, Class III-B. Transmitter and studio to be determined, Houston, Texas.
May 17, 1940

**770 Kilocycles**

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Modification of license to use old licensed transmitter as auxiliary transmitter.

**780 Kilocycles**

WTRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—License to cover construction permit (B-P-1270) for increase in power and install new transmitter.

**890 Kilocycles**

KARK—Arkansas Radio and Equipment Co., Little Rock, Ark.—License to cover construction permit (B3-P-2270) for increase in power and install new transmitter.

**920 Kilocycles**

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Construction permit to install directional antenna for night use increase power from 1 KW night, 5 KW day to 5 KW day and night, change frequency from 920 to 950 kc., contingent on No. American Regional Agreement. Amended: To omit request for change in frequency.

**950 Kilocycles**

WHAL—Harold F. Gross & Edmund C. Shields, Saginaw, Mich.—Modification of construction permit (B2-P-936) for new station, for approval of antenna and studio and transmitter site at 211 N. Washington Ave., Saginaw, Mich., and install new transmitter.

**1040 Kilocycles**

KTHS—Hot Springs Chamber of Commerce, Hot Springs Natl. Park, Ark.—Construction permit to change frequency from 1040 to 1060 kc., increase power from 10 to 50 KW and hours from shares KRLD to unlimited, move transmitter to Plum Bayou, Ark., install 250 watt amplifier. Amended: To decrease power of signal amplifier from 250 watts to 100 watts night, 250 watts day.

**1070 Kilocycles**

KJBS—Julius Brunton & Sons Co., San Francisco, Calif.—Construction permit to change frequency from 1070 to 860 kc., increase power from 500 watts to 1 KW, change hours from limited to unlimited, new equipment. Contingent on No. American Agreement becoming effective. Requests Class II station.

**1130 Kilocycles**

WJJD—WJJD, Inc., Chicago, Ill.—Construction permit to change frequency from 1130 to 1040 kc., change power and hours from 20 KW, limited time to 10 KW night, 20 KW day, unlimited time, and install directional antenna for night use. Amended: To omit request for change in frequency and power, make changes in directional antenna to be used from sunset at Salt Lake City, Utah to sign-off.

**1200 Kilocycles**

KPHO—M. C. Reese, Phoenix, Ariz.—Modification of construction permit (B5-P-2182) for new station, for approval of transmitter and studio at 24th Ave. and Buckeye Rd., Phoenix, Ariz., approval of antenna, and increase power to 250 watts day and night.

**1250 Kilocycles**

WNEW—WODAM Corporation, New York, N. Y.—Construction permit to install auxiliary transmitter, using 1 KW power, for emergency use only. Amended re equipment.

**1260 Kilocycles**

WBX—Twin State Broadcasting Corp., Keene, N. H.—Modification of construction permit (B1-P-2415) for changes in directional antenna for day and night use, move transmitter and studio, further requesting changes in directional antenna; install new transmitter; increase power to 5 KW; extend commencement and completion dates. Amended to request 1 KW night, 5 KW day, using directional antenna day and night, and to request Class III-B station.

**1280 Kilocycles**

WTNJ—WOAX, Inc., Trenton, N. J.—Modification of license to increase power from 500 watts to 1 KW day, 500 watts night; change hours from share with WCAM and WCAP to unlimited. Requests facilities of WCAM and WCAP. Amended to request 500 watts day and night.

**1310 Kilocycles**

WLBJ—The Bowling Green Broadcasting Co., near Bowling Green, Ky.—Modification of construction permit (B2-P-2194) as modified for new station, requesting extension of commencement and completion dates from 12-31-39 and 7-1-40 to 2-29-40 and 9-1-40 respectively.

**1360 Kilocycles**

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Construction permit for new transmitter and antenna; increase power from 500 watts to 500 watts night, 1 KW day; change hours from share WSBT to unlimited; move transmitter. Contingent on WSBT going to 330 kc. Amended to increase power requested to 1 KW day and night and request Class III-A station.

**1370 Kilocycles**

WATW—WJMS, Inc., Ashland, Wis.—License to cover construction permit (B4-P-2160) as modified for a new station.

**1420 Kilocycles**

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Modification of license to change hours from specified (daily 11 a. m. to 1 p. m. and 4 p. m. to 7 p. m.) to unlimited.

**1440 Kilocycles**

**1490 Kilocycles**

KDFN—Donald Lewis Hathaway, Casper, Wyo.—Construction permit to increase power from 500 watts to 1 KW; make changes in equipment. Requests Class III-A station.

**1470 Kilocycles**

KGA—Louis Wasmer, Spokane, Wash.—Construction permit for new transmitter; change in antenna; increase power from 5 to 10 KW; move studio and transmitter locally. Amended to install directional antenna for night use.

**1500 Kilocycles**

NEW—Delta Broadcasting Co., Escanaba, Mich.—Construction permit for new broadcast station on 1500 kc. (1390 kc. when North American Regional Agreement is effective), 100 watts, unlimited time. Class IV.
NEW—The Marion Broadcasting Co., Marion, Ohio.—Construction permit for new high frequency broadcast station on 13000 kc., 250 watts, unlimited. Transmitter and studio to be determined at or near Marion, Ohio.

1550 Kilocycles

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-PSB-13) for new equipment, increase in power, and move of transmitter, requesting approval of antenna and transmitter site at 56th Rd. and 49th St., Long Island City, N. Y. Amended: give transmitter location as South of Grand St., between 49th and 51st St., Long Island City, N. Y.

MISCELLANEOUS

NEW—WTAR Radio Corp., Norfolk, Va.—Construction permit for new high frequency broadcast station on 13100 kc., 1000 watts, unlimited. Special emission for frequency modulation.

NEW—Times-Dispatch Radio Corp., Richmond, Va.—Construction permit for new high frequency broadcast station on 13200 kc., 1000 watts, special emission for frequency modulation.

NEW—Ashbaker Radio Corp., Muskegon, Mich.—Construction permit for new high frequency broadcast station to be operated on regular commercial basis on 13300 kc., 1000 watts, special emission for frequency modulation.

NEW—The Metropolis Co., Tallahassee, Fla.—Construction permit for new high frequency broadcast station on 13300 kc., 1000 watts, special emission for frequency modulation.

NEW—Gazette Printing Co., Janesville, Wis.—Construction permit for new high frequency broadcast station on 13400 kc., 1000 watts, special emission for frequency modulation.

NEW—Banks of Wabash, Inc., Terre Haute, Ind.—Construction permit for new high frequency broadcast station on 13400 kc., 1000 watts, emission special for frequency modulation.

W1XG—General Television Corp., Boston, Mass.—Construction permit to install audio transmitter to use with video transmitter, 550 watts, A3 emission.

NEW—The Metropolis Co., Tampa, Fla.—Construction permit for new high frequency broadcast station on 13500 kc., 1000 watts, special emission for frequency modulation.

NEW—The Metropolis Co., Orlando, Fla.—Construction permit for new high frequency broadcast station on 13500 kc., 1000 watts, special emission for frequency modulation, location to be determined, Orlando, Fla.

NEW—The Metropolis Co., West Palm Beach, Fla.—Construction permit for new high frequency broadcast station on 13500 kc., 1000 watts, special emission for frequency modulation, location to be determined, West Palm Beach, Fla.

NEW—The Metropolis Co., Miami, Fla.—Construction permit for new high frequency broadcast station on 13500 kc., 1000 watts, special emission for frequency modulation.

NEW—Metropolitan Television, Inc., New York, N. Y.—Construction permit for new high frequency broadcast station on 117670 kc., 1000 watts, special emission for frequency modulation. Amended: Exact site to be determined, New York, N. Y.

NEW—District Broadcasting Co., Washington, D. C.—Construction permit for new high frequency broadcast station to be operated on regular commercial basis on 43100 kc., 1000 watts, emission special for frequency modulation, site to be determined, Washington, D. C.

WMC-WEX-WABG—Memphis Commercial Appeal Co., Memphis, Tenn.—Authority to transfer control of corporation from Memphis Press-Scimitar Co. to The E. W. Scripps Co., 5000 shares common stock and 3000 shares Class A Common Stock.

WEIX—Memphis Commercial Appeal Co., area Memphis, Tenn.—Modification of license to change corporate name from Memphis Commercial Appeal Co. to Memphis Publishing Co.

WABC—Memphis Commercial Appeal Co., area Memphis, Tenn.—Modification of license to change corporate name from Memphis Commercial Appeal Co. to Memphis Publishing Co.

WENS—Radio Station WSOIC, Inc., area Charlotte, N. C.—License to cover construction permit (B3-PRE-348) for changes in equipment.

NEW—Badger Broadcasting Co., Madison, Wis.—Construction permit for new high frequency broadcast station on 43000 kc., 1000 watts, special emission for frequency modulation.

NEW—World Peace Foundation, Abraham Binneweg, Jr., Portable, Oakland, Calif.—Construction permit for new developmental broadcast station on 1614, 2398, 6125, 8655, 9135, 17310, 12800 kc., 250 watts, A1, A2, A3 emission. Amended: change power requested to 10 watts and change from fixed location to portable.

NEW—Royal Oak Broadcasting Co., Royal Oak, Mich.—Construction permit for new high frequency broadcast station to be operated on regular commercial basis on 43200 kc., 1000 watts, special emission for frequency modulation.

—federal trade commission action—

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Drucquer & Sons—John Drucquer, trading as Drucquer and Sons, 2201 Shattuck Ave., Berkeley, Calif., engaged in manufacturing cigarettes made of blended tobacco, and in advertising, selling and distributing the products, is charged in the complaint with packaging his products in cartons, wrappers and containers upon which are placed various pictorial representations, scrolls, words and phrases descriptive of their alleged origin and quality. One representation is a picture of a lion rampant, holding a cross of St. George in its right forepaw, accompanied by a scroll upon which is printed "Per Ardua." The statement "Manufactured by Drucquer and Sons of London, England," is in large type, according to the complaint, and in small type, hardly discernible, is printed "Late of The Strand and Regent Street, London."

The complaint charges that the respondent's business is not located in London, and that his products are manufactured, blended and processed at his place of business in Berkeley, Calif. (4125)

London Tobacco Company—Jacob Moss, trading as London Tobacco Company, 132 Hanover St., Boston, manufacturer and distributor of cigarettes, is charged, in a complaint, with packing and selling his products in cardboard boxes, on the top of each box appearing:

"LONDON Special
(Crest, simulating the British Royal Coat of Arms.)"

CIGARETTES

London Tobacco Company”

Circulars used by the respondent to advertise his cigarette feature a pictorial representation which simulates the British Royal Coat of Arms, and carry the following price representations:

"FORMERLY 25¢ pkg.
REDUCED TO 15¢ pkg."

Through use of the word “London” as part of his trade name, and the word “English” in his advertising matter, the complaint charges, the respondent represents that his is an English concern;
that his "London Special Cigarettes" are manufactured or blended in England or of British tobacco, and that they have recently been reduced in price from 25 cents a package to 15 cents a package. The complaint alleges that these representations are untrue and misleading as to the price or other characteristics of the cigarette, and that the Olney Company is not a British concern; that the respondent's cigarettes are manufactured in this country and that their price has not recently been reduced as advertised. (4126)

Manchester Silver Company—Alleging violation of the Federal Trade Commission Act in the pricing of silver flatware sold to wholesalers, jobbers, retailers, department stores and the public, a complaint has been issued against Manchester Silver Company, 49 Pavillion Ave., Providence, R. I., and Frank S. Trumbull, Franz S. Tiderman and Edward B. Palmer, officers of the corporation.

For many years, the complaint alleges, the respondents have circulated among retailers, wholesalers and jobbers a price list known as a "Pink List," purporting to show the usual and regular retail prices or values of the respondents' silver flatware. Many retailers, particularly large department stores, the complaint continues, in conducting special sales of the respondents' products, used the Pink List to show the so-called regular prices of those products as compared with the special sales prices. The "Sales Prices," in some instances, were as much as 33 per cent off the Pink List prices, according to the complaint.

About January 1, 1939, the complaint continues, the respondents devised a plan for use by retailers to promote the sale of the respondents' products at special sales, pursuant to which they issued a "Blue List" which had the words "Wholesale List" printed thereon. The prices shown in the Blue List for identical articles were substantially higher than the "Pink List" prices long in use and were wholly fictitious, according to the complaint.

The respondents allegedly represented that retailers, in their special sales advertisements, quote the Blue List in connection with the so-called half-price and other special sales prices and represent the Blue List prices as being the regular and customary prices. The complaint alleges that the fictitious Blue List prices enabled dealers to represent that purchasers at retail could obtain as much as 50 per cent off the regular list price of the respondents' flatware, whereas when the "Pink List" was used retailers were unable to represent that purchasers could obtain discounts off the list price in excess of 33 per cent.

It is alleged that the respondents granted to certain large retail dealers special discounts to induce them to participate in the respondents' Blue List plan. (4133)

By means of circulars and other printed matter distributed in various States, the complaint alleges, the respondent represented, among other things, that "Petalskin Face Cream" is "Rich in Vitamin F," and that "this emulsified, deep pore cleanser and tissue cream has unusual penetrating as well as nourishing qualities."

Through these and other representations, the complaint declares, the respondent also represents that its face cream contains Vitamin F; that the face tonic will close and refine the pores; that "Petalskin Cream Pastelle" works its way into the pores of the skin and refines it, and that the hand cream counteracts aging and will penetrate the skin.

The complaint alleges that the respondent has represented that a "London Special Cigarettes" is manufactured or blended in England or of British tobacco, and that they have recently been reduced in price from 25 cents a package to 15 cents a package. The complaint alleges that these representations are untrue and misleading as to the price or other characteristics of the cigarette, and that the Olney Company is not a British concern; that the respondent's cigarettes are manufactured in this country and that their price has not recently been reduced as advertised. (4126)

The respondent further represented, the complaint continues, that formation of keratinized epidermal wastes obstructs the hair follicle and restricts growth of hair; that other causes of loss of hair and hair troubles are insufficiency of pituitary secretion at the hair roots, and that their preparations have therapeutic value in correcting such conditions.

The complaint alleges that these representations are misleading; that these products have no effect in the process of keratinization, and that there is no scientific basis for the assumption that pituitary or other substances applied to the scalp will penetrate to the hair roots and stimulate hair growth.

Through use of the word "Institute" in their trade or corporate names, the complaint alleges, the respondents represent that they are a scientific organization formed for the purpose of promoting research and learning. It is further alleged that they have represented, among other things, "The ethics of the Institute preclude exaggerated claims," and "By a costly process, Post Institute isolates from whole gland pituitary body a special extract." As an additional means of furthering such representations, the complaint declares, the respondents place on their various advertising a replica of a seal, by means of which they represent that their products have been certified, tested or approved by some scientific organization or some State, city, or federal board of health. In truth, the complaint alleges, Post Institute is not a scientific organization formed for the purpose of promoting learning and research, and its products have not been certified, tested or approved by any scientific organizations, boards of health, or any department of the federal government. (4129)

J. R. Pharmacoal Company—J. R. Olney, Sr., and J. R. Olney, Jr., trading as J. R. Pharmacoal Company, 2011 Edgmont Ave., Chesterbrook, Pa., are charged in a complaint with misrepresentation in connection with the sale and distribution of a medicinal preparation designated "J. R."

In advertisements in newspapers and periodicals the respondents have represented, the complaint charges, that their preparation assures a cure for all cases of athlete's foot; that it gives immediate relief from athlete's foot, itching toes, ringworm, and raw, inflamed feet, and that it is endorsed by leading health institutions.

The complaint alleges that these representations are misleading and untrue, except that the product may be of value in alleviating symptomatic itching associated with such conditions. (4127)

Post Institute, Inc., a corporation, 105 East 16th St.; Post Institute, a corporation, 9 East 40th St., both of New York; Louis J. Stern, individually trading as Post Institute and as officer of Post Institute, Inc., and Post Institute, corporations, and Helmut M. Kiesewetter, individually and as officer of Post Institute, corporation, are charged in a complaint with misrepresentation in the sale and distribution of preparations for hair and scalp treatment.

The complaint alleges that in advertisements in newspapers and periodicals, by radio continuities and by circulars, pamphlets and other advertising devices, the respondents, who are engaged in the sale and distribution of preparations known as "Ultraso Hair Bath," "Ultraso Pititary Fluid," and "Ultraso 33," recommended for use in combination as "Ultraso Scalp Treatment," have represented that the preparations, used either singly or in combination, will revive the growth of hair and are cures for baldness; will stop abnormal loss of hair; cause fuzz to develop into mature hair; cause dull, faded hair to become brilliant; check premature graying, and restore the natural color to the hair, and that they are effective in removing and curing dandruff.

The complaints, the complaint alleges, are exaggerated, misleading and untrue.

The respondents have further represented, the complaint continues, that formation of keratinized epidermal wastes obstructs the hair follicle and restricts growth of hair; that other causes of loss of hair and hair troubles are insufficiency of pituitary secretion at the hair roots, and that their preparations have therapeutic value in correcting such conditions.

The complaint alleges that these representations are misleading; that these products have no effect in the process of keratinization, and that there is no scientific basis for the assumption that pituitary or other substances applied to the scalp will penetrate to the hair roots and stimulate hair growth.

Through use of the word "Institute" in their trade or corporate names, the complaint alleges, the respondents represent that they are a scientific organization formed for the purpose of promoting research and learning. It is further alleged that they have represented, among other things, "The ethics of the Institute preclude exaggerated claims," and "By a costly process, Post Institute isolates from whole gland pituitary body a special extract." As an additional means of furthering such representations, the complaint declares, the respondents place on their various advertising a replica of a seal, by means of which they represent that their products have been certified, tested or approved by some scientific organization or some State, city, or federal board of health. In truth, the complaint alleges, Post Institute is not a scientific organization formed for the purpose of promoting learning and research, and its products have not been certified, tested or approved by any scientific organizations, boards of health, or any department of the federal government. (4129)

Stailey Laboratories, Inc., Portland, Ore., and Edward A. Bachman, trading as Stillman Products Company and as Stanley Laboratories, who is also president of the corporation Stanley Laboratories, Inc., are charged, in a complaint with misrepresentation in the sale and distribution of drug products for feminine hygiene.

The respondents designate their products as "M.D. Medicated Douche Powder," "Contra-Jel," "Femeze," and "M.D. Supercones." In advertisements in newspapers and other printed matter, the complaint alleges, the respondents have represented, among other things, "M.D. Medicated Douche Powder" is a recent development of scientific research, endorsed by leading physicians and surgeons, and is a competent and effective contraceptive; that it is an antiseptic and germicide which will combat any form of bacteria, and that the preparation contains competent remedial qualities for use on cuts, burns and sores; that "Contra-Jel" gives immunity from the pregnancy protection from venereal diseases, and has germicidal and antiseptic properties; that "M.D. Supercones" constitute an effective contraceptive which has powerful antiseptic properties, and that "Femeze" is an effective treatment for functional pains and cramps accompanying menstruation.

In truth, the complaint alleges, none of the products distributed by the respondents constitute competent or effective contraceptives; that the respondents are not engaged in the sale and distribution of any product which affords protection from venereal diseases, and the product "Femeze" is not effective in treating the pains accompanying menstruation.

May 17, 1940
In addition, the complaint charges that the respondents make false and misleading representations to the effect that their products are prescribed or compounded by physicians and bear the endorsement or recommendation of the medical profession, by means of the use of the letters “M.D.” in designating their products and by including in their advertising matter likenesses of nurses and doctors with the figure of a cross in simulation of the Red Cross emblem. The complaint alleges that in truth the products are not prescribed or compounded by physicians and have not received the endorsement of the medical profession.

Use of the term “Laboratories” in their corporate and trade names and in advertising literature, the complaint continues, is also misleading, as the respondents neither own nor control any factory or laboratory wherein their products are compounded or wherein any research activities are conducted, but are merely distributors of products compounded and manufactured by other concerns. (4131)

CEASE AND DESIST ORDERS

Following cease and desist orders have been issued during the past week:

Dermagell, Inc.—See Research Associates, Inc.

Research Associates, Inc.—Two Washington, D. C. corporations, Research Associates, Inc., and Dermagell, Inc., have been ordered to cease and desist from certain misrepresentations. Commission findings are that Dermagell, Inc., 52 O St., N. W., Washington, D. C., prior to 1938, was engaged in the sale and distribution of an organic soap compound designated “Dermagell”. Research Associates, Inc., 3400 Nebraska Ave., N. W., Washington, D. C., until May 1938, controlled the activities of Dermagell, Inc. On May 11, 1938, it divested itself of a large part of the stock of Dermagell, Inc., by sale to parties not named as respondents in this proceeding. At the present time it owns no stock of Dermagell, Inc., and does not control or direct its business policies, practices and activities.

While its activities were under the control of Research Associates, Inc., Dermagell, Inc., the Commission finds, caused false advertisements containing representations and claims with respect to the properties of the compound “Dermagell” to be disseminated. The Commission finds that in newspapers and by other means, the respondents represented, among other things, that “DERMAGELL is a 3-purpose Cleansing Cream and Shampoo—so efficient—so utterly different from anything heretofore obtainable that authorities proclaim it ‘the discovery of the century’”; that “DERMAGELL soothes and heals as it penetrates the innermost recesses of the tender pores without unpleasant reaction”, and that it actually protects your skin. “Dermagell prevents and cures many skin disorders.”

The Commission finds that the product is not substantially different from any other products or soaps designed for a similar use, and that its ingredients are well known and have been known and used for many years in the preparation of soaps and similar products. The Commission further finds that “Dermagell” possesses no special soothing or healing properties, and that other claims made for it are false and misleading.

The respondents are ordered to cease and desist from representing that a certain compound formerly known as “Dermagell” is the discovery of the century; that it soothes and heals or penetrates the innermost recesses of the pores of the skin; that its use will leave the skin and scalp youthfully fresh and invigorated; that its use will give any woman a soft, clear, smooth complexion or beautiful hair; that the benefits obtained from its use are distinct and lasting; that it actually protects the skin, or that it prevents or cures skin disorders. (3651)

F. B. Washburn Candy Corporation, Brockton, Mass., stipulates that it will desist from representing that its candy bars are equal in food value to either two eggs, two baked potatoes, two lamb chops or a glass of milk. The stipulation points out that the respondent’s candy bars, although they contain a source of energy and a small amount of protein and mineral salts, do not also contain the other minerals, vitamins and the quality and quantity of protein to be found in the foods with which such candy is compared. (2803)

Howard Woodward & Company—Howard Woodward, trading as Howard Woodward & Co., 277 East Long St., Columbus, Ohio, in the sale of his leather goods, agrees to cease using in his wholesale catalogs or in any other way, list prices which are not the prices at which the products are actually sold to retail dealers. (2792)

F & K Yarn Company—Joseph A. Keller, trading as F. & K. Yarn Company, stipulates that he will desist from representing
that his knitting yarns are composed of fibers or materials other than those which they actually contain; from using the words "Cashmere" or "Cashiere" or any other word simulating "Cashmere" to designate a product not composed wholly of the hair of the Cashmere goat, and from using the words "Silk" or "Crepe" as descriptive of a product not composed of silk.

The respondent also agrees to cease employing the phrase "Pure Boucle" as descriptive of a product not composed of rayon, or otherwise to advertise or sell an article composed wholly or partly of rayon without clearly disclosing such rayon content. The respondent also stipulated that when a product is composed partly of rayon, it will not fail to disclose such constituent fiber or material in the order of its predominance by weight, beginning with the largest single constituent.

The respondent, not a manufacturer, also agrees to cease using the word "Factory" as descriptive of his business. (2802)

S. C. Sales Company—Samuel Cohen, doing business as S. C. Sales Company, 126 West Baltimore St., Baltimore, engaged in selling a medicinal preparation designated "Mag-Net-O Balm", agrees to cease representing that the preparation is a remedy or competent treatment for varicose veins or leg swellings; that, alone or used in connection with the application of heat, rubbing or exercise, it is a remedy or competent treatment for scatica pain, rheumatic pain, lumbago pain, lambe back, stiff neck, headache, chest colds, earache, or simple sprains, or that the preparation has any therapeutic value in their treatment in excess of a rubefacient and counterirritant; that the preparation penetrates to congested or otherwise affected parts or is an aid in the treatment of deep-seated congestion, and that the preparation, alone or used in connection with the application of heat, rubbing or exercise, is a new method of treatment for varicose veins or leg swellings. (02557)

Textile Laboratories—Harry Telchlauf, trading as Textile Laboratories, 264 West 40th St., New York, in the sale of "Textile" cleaning fluid, agrees to desist from use of the statement "Removes all stains", or any representation of similar implication, when in fact the use of the product will not return to their original appearance all kinds of fabric materials, regardless of the nature of the stain or marking to which the materials have been subjected.

The respondent also stipulates that he will cease employing the statement "It will not leave spots, rings or discoloration" or any similar representation, that is "the" perfect hand lotion; keeps hands young looking, other lotions fail; prevents the nail cuticle from becoming rough and ragged; is "the" perfect hand lotion; keeps hands young looking, or is most always preferred where hand lotions are tested side by side. (2796)

Van Sant, Dugdale & Co., Inc., Court Square Building, Balti¬more, in connection with advertisements disseminated by it concerning "Bliss Native Herbs Tablets", sold by Alonzo O. Bliss Medical Company, Washington, D. C., agrees to desist from representing that these tablets give immediate relief for, or relieve all cases of, upset stomach, gas bloating pains, acid risings, lost appetite, sour stomach and headaches, due to constipation or other causes; that the product will flush the bowel or kidneys, stimulate the liver, cause faster elimination of kidney wastes, or that the representation is limited to such influence as it might make as a stomachic. (02558)

Volume Sales Promotion Company—R. Thomas Lincoln and Henry Thompson, trading as Volume Sales Promotion Company, Denver, Colo., engaged in the sale and distribution of a sales promotion plan known as "Swap for Cash", agree to cease and desist from selling or distributing sales promotion cards or any other device so designed that their use by retail dealers may constitute the operation of a game of chance, gift enterprise or lottery scheme; supplying or placing in the hands of others cards, plans or schemes which may be used without alteration or rearrangement to conduct a lottery, game of chance or gift enterprise when distributed to the consuming public; or representing that prospective agents, salesmen or other representatives can make profits or earnings in excess of the average net profits which have been consistently made in like periods of time by its active, full-time agents, salesmen, distributors, dealers or other representatives in the ordinary and usual course of business and under normal conditions and circumstances. (2804)

Noble Refining Company—Carl L. Ficken, trading as Noble Refining Company, 12910 Taft Ave., Cleveland, in the sale of paint and oil products, agrees to cease using (1) the word "linseed", alone or in connection with the word "blended" or with other words, as descriptive of a product not composed of pure linseed oil or a blend of pure linseed oils; or (2) the word "turpentine", alone or with the word "blended" as descriptive of a product not consisting of pure turpentine or a blend of pure turpentine. The respondent also agrees to cease employing the word "Refining" as part of his trade name and to discontinue using the word "Manufacturers", that it actually owns or controls the plant in which its merchandise is made, when such is not a fact. (2800)

Charles Dallas Reach Company—Charles Dallas Reach, trading as Chas. Dallas Reach Company, 58 Park Place, Newark, N. J., conducting an advertising agency which disseminated advertisements for a hand lotion designated "Frostilla Fragrant Lotion", on behalf of The Frostilla Company, Inc., Elmira, N. Y., has agreed to discontinue disseminating or causing to be disseminated any advertisements representing that the ingredients in "Frostilla Fragrant Lotion" are more costly than those employed in competitive lotions generally, when that fact is not definitely known, and that competitive lotions in general leave a sticky or gummy residue. The respondent also agrees to cease advertising that "Frostilla Fragrant Lotion" accomplishes certain results where other lotions fail; prevents the nail cuticle from becoming rough or ragged; is "the" perfect hand lotion; keeps hands young looking, or is most always preferred where hand lotions are tested side by side. (02554)

Roth, Saltzman & Co., Inc., 147 West 29th St., New York, in the sale of furs, furriers' supplies and silk goods, stipulates that it will discontinue employing on letterheads, invoices or in other ways the phrase "Importers and Manufacturers", alone or in connection with other words as descriptive of its business activities and that it will cease representing, through use of the word "Importers" that it imports products it sells, or through use of the word "Manufacturers," that it actually owns or controls the plant in which its merchandise is made, when such are not the facts. (2794)

Louisville Novelty House—Charles Barash, trading as Louisville Novelty House, 1860 Alfreco Place, Louisville, Ky., in the sale of Indian pattern blankets, cedar chests, electric clocks, wrist watches, floor lamps, and women's wearing apparel, stipulates that he will desist from selling or distributing such articles so packed and assembled that sales to the public are to be or may be made by means of a lottery scheme; from supplying to or
placing in the hands of others such merchandise together with push or pull cards, punch boards or other lottery devices, or such devices with the merchandise or separately, the devices to be used in the sale of such merchandise to the public.

The respondent also agrees to desist from use of the phrase “Pure Dye” or the term “Satin” as applied to any fiber or fabric unless composed exclusively of pure silk without other fiber, weighting, excess finishing or dyeing materials, or loading or adulterating the fiber. If, according to the stipulation, the phrase “Pure Dye” is truthfully used as descriptive of the silk content of a mixed fabric, it shall be accurately disclosed in connection therewith that such term or phrase is used as applying only to the silk content of such mixed fabric; for example, “Rayon and Pure Silk.”

Also, the respondent stipulates that he will desist from branding, labeling or selling any products composed of rayon and other kinds of fiber or substances without full and nondeceptive disclosure of the rayon and other content by accurately designating each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent and giving the percentage of any fiber present in less than a substantial proportion.

Louisville Novelty Manufacturing Company—Agreeing to discontinue supplying devices the use of which may result in the sale of merchandise to ultimate consumers by means of lottery methods, six dealers have entered into stipulations. Respondents are: Archie and Bessie Jacobstein, trading as Louisville Novelty Manufacturing Company, 630 East Brocknerdige St., Louisville, Ky., distributors of novelty merchandise, including lottery devices; Briarcraft, Inc., 347 Fifth Ave., New York, pipe manufacturer; Leo Pevnsner, 5 South Wabash Ave., Chicago, dealer in jewelry, novelty goods and premium merchandise; Nashville Roller Mills, Nashville, Tenn., engaged in the blending, sale and distribution of flour and feedstuffs; Morton J. Friedman, Merchandise Mart Building, Chicago, engaged, under the name of Traders Syndicate, in the sale of distressed or close-out stocks of merchandise, and Dainty Foods Manufacturers, Inc., 666 West Randolph St., Chicago, distributor of a concentrated compound or powder designated “North Pole Ade” for the making of summer beverages.

According to their stipulation, Archie and Bessie Jacobstein, trading as Louisville Novelty Manufacturing Company, sold to retail merchants certain trade stimulators called “jar deals” consisting of glass jars containing a large number of tickets with concealed numbers. The stipulation recites that the plan involved a lottery in the sale of cigarettes by a jar deal designated “Pick-A-Pack.” The respondents agreed to cease supplying to or placing in the hands of others, jar deals or other lottery devices either with assortments of cigarettes or other merchandise, or separately, such devices to be used in selling such cigarettes or other merchandise to the public.

Nashville Roller Mills agreed to cease supplying to or placing in the hands of others premium flour, or other merchandise, to be used to conduct a lottery in the sale of flour or other products, and to discontinue supplying lottery devices, either with assortments of flour or other merchandise, or separately, such devices to be used in selling such flour or other merchandise to the public.

The various other respondents agreed to cease supplying to or placing in the hands of others their commodities, together with lottery devices, or lottery devices with such merchandise or separately, such devices to be used in the sale of such merchandise to the public.

Except for the jar deals and premium flour used by the above mentioned Louisville and Nashville respondents, and prize drawing cards in two instances, the lottery devices commonly employed were push or pull cards and punch boards.

Morton J. Friedman, dealer under the name Traders Syndicate in distressed or close-out stocks of merchandise, also agrees to discontinue use of the word “Syndicate” as descriptive of his business, or of any similar term implying that the respondent’s individual proprietorship is an association or group of persons combining in a financial, industrial or commercial enterprise. He also agrees to cease quoting a fictitious price of any article or item without disclosure to the public.

Further representations which the respondent agrees to discontinue are use of the phrase “Mills” as part of his trade name and the word “Manufacturer” as descriptive of his business, when in fact he is not a manufacturer: use of fictitious designations to indicate that his place of business is at Hickory, N. C., or that his New York office is a sales branch thereof, when in fact his New York office is his only place of business, and representations that the respondent's business sells medicinal preparations which tend to convey the belief to prospective purchasers that the instruments offered for sale under such representations may be purchased without the making of any down payment.

O. R. Chemical Company—See L. B. Allen Company, Inc.

E. E. Forbes & Sons Piano Company, Inc., 403 North 20th St., Birmingham, Ala., engaged in the retail sale of pianos and other musical instruments, in connection with the sale and distribution of its products, agrees to cease and desist from the use in its advertisements, advertising matter of whatever kind or description of the statement “No Money Down,” when in fact a down payment generally is required and insisted upon in the sale of such instruments, and from the use of such words or phrases of similar import to the public, in selling to the public the “Mill to Consumer,” thereby eliminating middlemen’s profits, or that he distributes “our” mills’ production to the many large organizations throughout the entire United States.

Further representations which the respondent agrees to discontinue are use of the word “Silk” to describe products not made wholly of that substance: branding of products composed of rayon and other fibers without full disclosure of the rayon and other content, and certain representations as to prices.

Ted Brooks Clothing Company, Inc., 91 Fifth Ave., New York, N. Y. stipulates that it will cease representing any garments which it sells as being “custom tailored,” when in fact they are not made to order for the persons buying them, and that it will discontinue representing any garment only partially finished by hand as being “hand tailored throughout.” The respondent also agrees to cease and desist from selling any product made of rayon without clear disclosure in all advertising literature, invoices and other forms of the rayon composition.

The stipulation provides that if the word “Celene” is used to designate a product composed of rayon, such word shall be immediately accompanied by the word “Rayon” in equally conspicuous type to indicate clearly

Hollanders, Inc., Brockton, Mass., agrees to cease selling or distributing candies, confectons or other merchandise so packed and assembled that its sale to the public is to be or may be made by means of a lottery or gift enterprise; to discontinue supplying to others confectons, candies or other merchandise, together with push or pull cards, punch boards or other lottery devices, or such devices with the candy or merchandise, or separately, the devices to be used in the sale of such products to the public.

Mrs. Greta J. Leskovar, 507 East 73rd St., New York, engaged in selling a medicinal preparation designated “Peacock’s Garlic Capsules,” agrees to discontinue representing that the preparation is rich in calcine, potassium or phosphorus and other alkaline properties for the human system; that it is of value in the treatment of colon irritation or indigestion, except through any value it may have as a carminative, or in treating high or low blood pressure, except for certain temporary benefits; that it is of no use in treating rheumatism, bronchitis, or other respiratory infections, or is antisepsis or has germ-killing powers when taken internally.

New England Products, Inc., 1601 Payne St., Evanston, Ill., engaged in selling a medicinal preparation designated “Peeaccock’s Garlic Capsules,” agrees to discontinue representing that the preparation is rich in calcine, potassium or phosphorus and other alkaline properties for the human system; that it is of value in the treatment of colon irritation or indigestion, except through any value it may have as a carminative, or in treating high or low blood pressure, except for certain temporary benefits; that it is of no use in treating rheumatism, bronchitis, or other respiratory infections, or is antisepsis or has germ-killing powers when taken internally.

Carolina Hosiery Mills—Trading as Carolina Hosiery Mills, Max Kaufman, 120 West 42nd St., New York, has entered into a stipulation in which he agrees to discontinue certain representations in the jobbing and the retail sale of hosiery.

Among the representations which the respondent agrees to discontinue are use of the phrase “Mills” as part of his trade name and the word “Manufacturer” as descriptive of his business, when in fact he is not a manufacturer: use of fictitious designations to indicate that his place of business is at Hickory, N. C., or that his New York office is a sales branch thereof, when in fact his New York office is his only place of business, and representations that the respondent’s business sells medicinal preparations which tend to convey the belief to prospective purchasers that the instruments offered for sale under such representations may be purchased without the making of any down payment.

O. R. Chemical Company—See L. B. Allen Company, Inc.

E. E. Forbes & Sons Piano Company, Inc., 403 North 20th St., Birmingham, Ala., engaged in the retail sale of pianos and other musical instruments, in connection with the sale and distribution of its products, agrees to cease and desist from the use in its advertisements, advertising matter of whatever kind or description of the statement “No Money Down,” when in fact a down payment generally is required and insisted upon in the sale of such instruments, and from the use of such words or phrases of similar import to the public, in selling to the public the “Mill to Consumer,” thereby eliminating middlemen’s profits, or that he distributes “our” mills’ production to the many large organizations throughout the entire United States.

Further representations which the respondent agrees to discontinue are use of the word “Silk” to describe products not made wholly of that substance: branding of products composed of rayon and other fibers without full disclosure of the rayon and other content, and certain representations as to prices.

O. R. Chemical Company—See L. B. Allen Company, Inc.

E. E. Forbes & Sons Piano Company, Inc., 403 North 20th St., Birmingham, Ala., engaged in the retail sale of pianos and other musical instruments, in connection with the sale and distribution of its products, agrees to cease and desist from the use in its advertisements, advertising matter of whatever kind or description of the statement “No Money Down,” when in fact a down payment generally is required and insisted upon in the sale of such instruments, and from the use of such words or phrases of similar import to the public, in selling to the public the “Mill to Consumer,” thereby eliminating middlemen’s profits, or that he distributes “our” mills’ production to the many large organizations throughout the entire United States.

Further representations which the respondent agrees to discontinue are use of the word “Silk” to describe products not made wholly of that substance: branding of products composed of rayon and other fibers without full disclosure of the rayon and other content, and certain representations as to prices.

O. R. Chemical Company—See L. B. Allen Company, Inc.

E. E. Forbes & Sons Piano Company, Inc., 403 North 20th St., Birmingham, Ala., engaged in the retail sale of pianos and other musical instruments, in connection with the sale and distribution of its products, agrees to cease and desist from the use in its advertisements, advertising matter of whatever kind or description of the statement “No Money Down,” when in fact a down payment generally is required and insisted upon in the sale of such instruments, and from the use of such words or phrases of similar import to the public, in selling to the public the “Mill to Consumer,” thereby eliminating middlemen’s profits, or that he distributes “our” mills’ production to the many large organizations throughout the entire United States.

Further representations which the respondent agrees to discontinue are use of the word “Silk” to describe products not made wholly of that substance: branding of products composed of rayon and other fibers without full disclosure of the rayon and other content, and certain representations as to prices.

O. R. Chemical Company—See L. B. Allen Company, Inc.
that the article is rayon. If the word "Satin" is properly employed as descriptive of the construction of a fabric composed of rayon, such word shall be accurately and non-deceptively qualified by the word "Rayon" in equally conspicuous type; for example, "Celanese Rayon Satin." (2799)

Buhach Producing & Manufacturing Co., 37 East Channel St., Stockton, Calif., in selling an insecticide designated "Buhach", stipulates that it will cease advertising that the preparation is effective in killing all species of moths or all insect pests, and that it will discontinue representing, by use of the words "get rid of", "banish", or other words of similar meaning, that Buhach, when spread across the trails of ants or roaches, kills or repels all of such pests. (02559)

Carnegie-Illinois Steel Corporation, Pittsburgh, has entered into a stipulation in which it agrees to discontinue certain practices in the sale of copper-steel sheets used in the manufacture of articles such as grave vaults and caskets.

The respondent corporation agrees to cease using in its advertising matter or in the advertising supplied to others for their use, statements representing or implying (1) that its copper-steel sheets retain the same degree of resistance to deterioration which is caused by rust, corrosion, or pitting, resulting from their burial in soils generally, as they possess when subjected only to atmospheric conditions above ground; (2) that burial vaults or caskets made of copper-steel sheets are more durable or more resistant to rust, corrosion or pitting (when submerged in the soils), than vaults or caskets made of plain steel sheets of like weight and thickness buried in soils of similar chemical nature or action.

Other representations which the respondent corporation agrees to discontinue are that it has on file records of numerous disinterments which show copper-steel vaults to have been in excellent condition after many years underground; that copper-steel vaults have been completely proved by performances of hundreds of vaults now in use, and that the records show that "U. S. S. Copper Steel Vaults" were still in good condition when disinterred after from 17 to 21 years interment. (2790)

STIPULATIONS

During the week the Commission has entered the following stipulations:

L. B. Allen Company, Inc., trading as O. R. Chemical Company, 6719-6733 Bryn Mawr Ave., Chicago, in the sale of casein glue, agreed to desist from the use on its labels or in any other way of the word "waterproof" or of any other words of similar import as descriptive of a glue which is not, in fact, waterproof, and from use of this word in any way which tends to convey the impression that the product is impervious to water or its effects. (2805)

American Television & Radio Company, 300 East 4th St., St. Paul, Minn., engaged in manufacturing a specialized line of electrical goods consisting of vibrators, vibrator-operated and rectifier power supplies, agrees to discontinue, in connection with the sale of its products, stating or representing in its advertisements and advertising matter that it is the "World's Largest Manufacturer" of the most complete line of electrical goods and supplies above-named, and to desist from the use of the words "World's Largest Manufacturer" or of any words of similar implication which may tend to convey the belief that there are no other manufacturers who make or who are now equipped to make as complete a line of such merchandise as that manufactured by the American Television & Radio Company. (2793)

Arrow Seam Binding Company—Reuben Berman, trading as Arrow Seam Binding Company and Ribbon Seam Binding Company, 590 Eighth Ave., New York, is in the business of cutting fabric materials into binding ribbons which, after they have been carded or wound on spools or bolts, are sold in interstate commerce. The respondent agrees to cease representing that any of his products is composed of fibers or materials other than those of which it actually is made, and to discontinue employing the word "Taffeta" to designate a product not composed of silk. The stipulation provides that if the article is composed in substantial part of silk, the word "Taffeta", if used to designate the silk content, shall be immediately accompanied by other words in equally conspicuous type which indicate clearly that the product is not composed wholly of taffeta or silk, and which also accurately describe each other constituent fiber or material in the order of its predominance by weight, beginning with the largest single constituent.

The respondent also agrees to desist from invoicing, labeling, branding or advertising those of its products composed in part of rayon without clear disclosure of such rayon content, and, when such products are made in part of rayon, from failing to disclose each constituent fiber or material, including rayon, by name, in the order of its predominance by weight, beginning with the largest single constituent. (2791)

I. S. Assin & Company—Isaiah S. Assin and Mac Ancona, trading as I. S. Assin & Co., 9 East 38th St., New York, N. Y., agree to desist from use of the word "Manufacturers" as descriptive of their business. They also agree to desist from use of any other word or words of similar implication the effect of which is to convey the impression that they manufacture the handkerchiefs they sell or own or control the plant in which they are made, when such are not the facts. (2806)
FCC Approves Commercial FM Broadcasting

The FCC gave the green light this week to commercialized FM broadcasting. The television report is still in the mill, but Chairman James Lawrence Fly said he hoped it would be out within a week or ten days.

By three orders (67, 68 and 69) issued May 22, the Commission set aside forty channels in the band 42,000-50,000 kc. for FM broadcasting; dismissed without prejudice existing FM applications; and cancelled existing FM experimental licenses as of January 1, 1941.

Applications for regular (commercial) FM licenses are to be received as soon as the rules, regulations and forms are ready. Meantime, according to Nathan David, assistant to the FCC chairman, FM stations now operating with an experimental license cannot “go commercial” until they receive regular licenses.

Here are the texts of the Commission’s FM report (unanimously adopted) and the memorandum on frequency reallocation in connection with FM:

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.
May 20, 1940.
Docket No. 5805

In the Matter of AURAL BROADCASTING ON FREQUENCIES ABOVE 25,000 Kilocycles Particularly Relating to Frequency Modulation

Report on Frequency Modulation

By the Commission:

Frequency modulation is highly developed. It is ready to move forward on a broad scale and on a full commercial basis. On this point there is complete agreement amongst the engineers of both the manufacturing and the broadcasting industries. A substantial demand for FM transmitting stations for full operation exists today. A comparable public demand for receiving sets is predicted. It can be expected, therefore, that this advancement in the broadcast art will create employment for thousands of persons in the manufacturing, installation and maintenance of transmitting and receiving equipment and the programming of such stations.

Experimental stations have been operating over a number of years on frequencies above 25,000 kilocycles for the development of such frequencies for rendering a regular broadcast service. A number of these stations employed frequency modulation and others employed amplitude modulation. After extensive hearings and investigations, the Commission has concluded that frequency modulation has advantages over amplitude modulation on a commercial basis desirable in the public interest. The Commission believes that this is one of the most significant advances that has been made in aural broadcasting in recent years.

Briefly the basic differences between amplitude and frequency modulation are as follows: Modulation is a process of imparting sound or other signal (intelligence) to a transmitted radio wave. The radio wave has two defining characteristics—amplitude and frequency. With amplitude modulation the sound controls the amplitude of the radio wave transmitted, while the frequency remains constant. In contrast, frequency modulation varies the frequency of the radio wave while the amplitude remains constant.

Up to the present, amplitude modulation has been used exclusively for regular as distinguished from experimental radio communication. The principle of frequency modulation has long been known but its practical use was not demonstrated until recently.

The hearing yielded a vast amount of information as to the use of frequency modulation in broadcasting on high frequencies. Each interested party agreed that frequency modulation is superior to amplitude modulation for broadcasting on frequencies above 25,000 kilocycles. The record leaves no doubt of the fact that a regular broadcast service can safely be initiated on high frequencies. Each interested party agreed that frequency modulation is superior to amplitude modulation for broadcasting on frequencies above 25,000 kilocycles. The record leaves no doubt of the fact that a regular broadcast service can safely be initiated on high frequencies.

The use of a wide band of frequencies makes possible a reduction of noise to a greater extent than attained with amplitude modulation. Man-made electrical and atmospheric noises consist primarily of amplitude variations and therefore frequency modulated signals have an inherent advantage in discriminating against noise. Experimental operations assured another advantage for frequency modulation, namely, that broadcasting stations could be operated on the same channel without objectionable interference with much less mileage separation than is possible with amplitude modulation. FM has the ability completely to exclude all except the strongest signal.

The opening of the new band for commercial broadcast will help to correct numerous defects and inequalities now existing in the standard broadcast band. These inequalities result from the scarcity of frequencies, their technical characteristics and the early growth of broadcasting without technical regulation. There is today a lack of stations in some communities and other communities do not have sufficient choice of program service. The establishment of the new broadcast band in the higher frequencies will enable many such communities to have their own broadcast stations. The licensing of classes of stations in the same area with different frequencies and different power has resulted in a wide disparity in the extent of service to the public. The system of classification now employed in the standard broadcast band will not be used for licensing FM stations. In the rules and regulations and engineering standards to be issued the near future information will be provided whereby applicants may apply for facilities to serve a specified area. Stations will be rated on the basis of coverage rather than power. Competitive broadcast stations in the same center of population will in so far as possible be licensed to serve the same area.

The service range of the new stations while limited will, in many cases, be greater than that obtained from the primary service area of comparable standard broadcast stations. Stations a relatively short distance apart will not create mutual interference of a type that has rendered allocation problems both national and international so difficult in the standard broadcast band.

The coverage will be substantially the same day and night. The present situation of certain stations in the standard broadcast band having large daytime coverage and restricted nighttime coverage
FCC APPROVES COMMERCIAL FM BROADCASTING
(Continued from page 4269)

on duplicated channels will be avoided. However, FM stations have not demonstrated the long distance coverage properties such as obtain with present high powered clear channel stations. Accordingly, amplitude modulation stations in the standard broadcast band may be required indefinitely for the purpose of giving widespread rural coverage. For coverages of centers of population and trade areas, the new class of station offers a distinct improvement.

Experimental FM stations rendering program service have employed a channel of 200 kilocycles. There is testimony to the effect that a band width of less than 200 kilocycles can be used, but this entails a reduction of the noise-discriminating quality which has been established by experimental operations utilizing a channel width of 200 kilocycles. Testimony advocating a narrower band width was not supported by experience in program service. Moreover, the narrower band width would make less feasible multiplexing of facsimile and binaural transmissions on the same channel. In addition, the Commission believes that a regular program service should begin on a 200 kilocycle band basis which can be conveniently reduced if technical developments warrant.

A further question at the hearing was the possible future effect on the service rendered by standard broadcast stations should an additional broadcast band in the high frequencies employing frequency modulation be established. There was agreement that the new and additional service would not supplant the service of standard broadcast stations generally and that, therefore, this service will not make obsolete the receivers now in use. Standard broadcasting is on an entirely different frequency band from that to be occupied by frequency modulation. FM will not interfere with it. Present standard broadcasting will continue, and certainly for a number of years will render full service. The extent to which in future there will be the listener will be attracted away from the standard band cannot be predicted. Testimony at the hearing indicated that the manufacturers will provide receiving sets capable of receiving both standard and the FM broadcasts.

The record is clear that the frequency space heretofore allocated to high frequency broadcasting is not sufficient to establish a wide-spread service employing wide band frequency modulation. The testimony indicates that advantages are to be had by the use of a continuous band for high frequency broadcast stations which includes non-commercial educational stations. Therefore, the Commission deems it in the public interest to allocate a continuous band that will suffice for both commercial and educational stations.

The frequency band of 41,000 to 42,000 kilocycles is now allocated to educational stations on a regular broadcast band, and most of the activity of experimental stations using frequency modulation has been in the band between 42,000 and 44,000 kilocycles. Therefore, testimony to the effect that commercial broadcast stations employing frequency modulation should be permitted to operate in the frequency band between 42,000 and 50,000 kilocycles principally for the reason that this band is particularly suited for rendering an FM broadcast service. The effect of sky wave interference will not be known until additional stations are placed in operation in various parts of the country. If later developments should favor the use of higher frequencies, the Commission will consider the facts at that time. In any event, the record of the hearing clearly indicates that this particular band offers the best solution of the allocation problem at this time.

Therefore, the Commission is making available for regular high frequency broadcast stations and educational stations the frequency band 42,000 to 50,000 kilocycles, in which band forty 200-kilocycle channels are available. Adequate provision will be made for television service as pointed out in our statement on allocations accompanying Commission Order 67. The channels made available by Order 67 to FM broadcast stations, including the multiplexing of facsimile transmission simultaneously with aural broadcasting, are assigned to services as follows:

Non-Commercial Educational Broadcast Stations

</tbody>
</table>

Under the foregoing allocation for FM broadcast stations, the same number of frequencies previously allocated to educational stations has been retained, the only change being that the band for such stations has been placed 1,000 kilocycles higher in the spectrum. This arrangement provides for educational channels in the regular high frequency broadcast band and thus permits the same receiver to be used for the two services. The 1,000 kilocycles set aside in the lower part of the band allocated to commercial broadcast stations for educational stations not only places the educational stations on an entirely independent basis but also gives them the benefit of the developments in the service rendered by the commercial stations.

The few existing non-commercial educational broadcast stations employ amplitude modulation. It is contemplated that they may continue so to operate with the same equipment in the new frequency band 42,000-43,000 kilocycles. It is not contemplated, however, that applications for new educational broadcast stations proposing amplitude modulation will meet the Commission's requirements in the absence of a showing of special necessity for the use of amplitude modulation.

The bands 25,000-27,000 kilocycles and 116,000-118,000 kilocycles will not hereafter be assigned to FM domestic broadcasting. There are pending a number of applications for high frequency broadcast stations on an experimental basis, which were filed pursuant to existing rules and regulations. None of these applications is sufficient for the authorization of a regular broadcast station on a full commercial basis nor are any of them sufficient for the limited experimental service to be authorized. Therefore, these applications will be dismissed, but without prejudice to the filing of new applications for either experimental or regular FM broadcast stations. Rules and regulations for both regular and experimental service will be promulgated by the Commission in the near future.

It also follows that authorizations for existing high frequency experimental broadcast stations which contemplate service to the public should be terminated not later than January 1, 1941, without prejudice to the filing of new applications for either type of service.

Applications for FM broadcast stations will be accepted by the Commission when the new rules and regulations for FM broadcast stations, including standards of good engineering practice, and application forms are issued. This will be done promptly.

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

May 20, 1940.

IN FREQUENCY ALLOCATIONS CONTAINED IN ORDER 67

By the Commission:

As a result of the recent hearings on television, Docket No. 5806, and Aural Broadcasting on Frequencies above 25,000 kc., Docket No. 5805, it became apparent that adequate frequencies for high
frequency broadcasting and television could be provided only by instituting a thoroughgoing study of the use of all frequencies between 25 and 300 Mc. In making the study the Commission has been greatly assisted by the Interdepartment Radio Advisory Committee. This Committee, which is composed of representatives of thirteen Federal agencies, advises the President under the provisions of Section 305 of the Communications Act of 1934, as amended, regarding frequencies for Federal Government operations. The members of this Committee, which is composed of representatives of the various departments of the Federal government, state and municipal government representatives, and persons and organizations representing all classes of radio services and the radio industry generally. As a result of these earlier hearings the Commission amended its Rules and Regulations so as to provide specific channels for each of the recognized services. The exact allocations herefore in effect appear in Appendix B to the General Rules and Regulations of the Commission.

The frequencies which are assigned to the Government departments appear in the Commission's list for information purposes only. These frequencies are assigned for the use of government stations by executive order of the President.

In considering the needs of high frequency broadcasting and also the needs of television, the Commission decided that 40 channels should be allocated to the broadcasting service between 40 and 50 Mc, and 7 channels for television service below 108 Mc. A continuous band is provided for frequency modulation thus assuring a degree of uniformity in the quality of the different frequency modulation channels and tending toward simplicity and economy of frequency modulation receiving sets. It was further decided that wide band frequency modulation channels of 200 kc. in width should be adopted as standard. This will achieve a high standard of high fidelity aural broadcasting and incidentally accommodate the simultaneous multiplexing of facsimile transmissions. On this basis, a total band of 8 Mc is required for FM broadcasting which includes 1 Mc (5 FM channels), for non-commercial educational broadcasting and 7 Mc (35 channels), for commercial broadcast stations. An extensive study has been made by the Commission's engineering staff and by the Interdepartment Radio Advisory Committee—numerous conferences and meetings were held.

The foregoing allocation plan was finally arrived at after thorough consideration of more than a score of allocation possibilities. The following arrangement between the Commission and the Interdepartment Radio Advisory Committee is a part of the plan of allocation as a whole:

1. Non-federal services are to have priority rights between 60 and 66 Mc and 118-119 Mc instead of the Federal government services. A reasonable length of time will be required for the Government to vacate these frequencies; consequently, January 1, 1941 has been set as the date for unlimited operation in these bands by Non-federal services.

2. The Federal Communications Commission agreed to the relinquishment to the Federal government services of the frequency bands 41-42 Mc and 132-140 Mc. It was further agreed that unlimited operation in these bands by Federal government stations will not be authorized prior to January 1, 1941.

In addition, the Commission decided to discontinue television service in the present television channels Nos. 1 and 8; i.e., 44-50 Mc, and 156-162 Mc. Accordingly, since old television channel No. 1 is discontinued, television channel No. 2 will be renumbered television channel No. 1; and a new channel to be known as television channel No. 2, will be assigned from 60 to 66 Mc. There is thus no loss of total space assigned to television below 66 Mc., and there will remain a total of 7 television channels below 108 Mc. Former television channel No. 8, 156-162 Mc, together with frequencies between 116 and 119 Mc, will be used to replace the assignments in the band 132-140 Mc.

Under these arrangements, the new allocations will become effective immediately on a limited basis. After January 1, 1941, the Commission may authorize unlimited time operation for all stations affected by Order No. 67. The new allocations are as follows:

<table>
<thead>
<tr>
<th>Frequncies (Mc)</th>

* The bands 25000 to 27000 kc. and 116000 to 118000 kc. will not hereafter be assigned to FM domestic broadcasting.
Within the band 116-119 Me prior to January 1, 1942. The same time provide an adequate number of channels for frequency modulation. In addition, these and other services will benefit by the changes.

Sky wave interference on frequencies immediately below 50 Me is known to be greater than on the higher frequencies. While it is likewise recognized that the effects of shadows and fading become more pronounced as the frequency increases, it is, nevertheless, believed that such factors are not substantially different on frequencies in the vicinity of 60 Me. Furthermore, it is generally conceded that the problem of diathermy interference is now most acute on frequencies immediately below 50 Me. Thus by allocating 60 to 66 Mc instead of 44-50 Mc to the television service, a good balance has been achieved between the effects of sky wave and diathermy interference on the lower frequencies and the effects of shadows and fading on the higher bands.

Considerable testimony was adduced at the hearing regarding the relative merits of wide band as against narrow band frequency modulation. Additional data were also filed in the briefs submitted by the various parties to the hearing. In weighing the claims and counter-claims regarding the relative value of the two methods of modulation, the Commission decided that the public interest will best be served at this particular stage of development of the art by the assignment of wide channels, thereby affording full opportunity to use the 200 kc band for multiplexing both aural and facsimile transmissions. Should it later appear that channels of lesser width will provide superior service, the Commission can then reopen the matter. By adopting wide band FM channels at this particular time, it will be possible for the public to continue the use of receivers designed for wide band reception even though narrower channels may later be authorized.

The miscellaneous radio services now assigned frequencies between 132 and 140 Mc will benefit by the changes in that 9 Mc are allocated where formerly only 8 Mc were available. Assuming that a 100 kc channeling system is adopted between 116 and 119 Mc and a 150 kc system between 156 and 162 Mc, the miscellaneous services will receive 70 channels as compared with 57 channels in the past. The change has the further advantage of providing frequencies for experimentation with different propagation characteristics in two large blocks.

In considering these changes it was necessary to weigh the particular needs and problems of the various non-federal services as well as the Government’s requirements, analyzed above, and to determine the permissibility of the allocations under our international undertakings; also to have regard for the future of radio operation in the services involved, from an international standpoint, so far as could be foreseen. The changes should result in improved service for all stations which are affected by the Commission’s order and will fully meet the varied situations presented of a national and international character. Rules and regulations and standards of good engineering practice will be promulgated at an early date. Meanwhile, all stations will be continued as at present.

Finally, the Commission wishes to express its appreciation to the Government departments and agencies concerned and to the members of the Interdepartment Radio Advisory Committee and to the Chairman of that Committee, its own Chief Engineer, for the splendid cooperation and assistance rendered in helping to solve this difficult problem. This task required the shifting of assignments for many thousands of Government stations. Without such assistance and the thoroughgoing studies made of every conceivable factor affecting both government and non-government operation, the final plan could not have been worked out with such satisfactory results and uniform concurrence.

MEMBERSHIP CAMPAIGN

NAB is launching—starting Monday next—May 27—an intensive pre-Convention membership campaign. Every broadcaster in every district is going to be propositioned to join up. Each Director is going to do his part by sending out a personally signed invitation. Forty-three of our members in 48 states have been appointed by the Directors and have agreed to serve as State or area Membership Chairmen. They will do their part. We have prepared what we believe to be an effective and appealing series of copy to go out to the non-member broadcasters. If—during the weeks immediately ahead—every member of NAB, in every city and every state will make it a part of his every day duty to “put the bee” on some non-member broadcaster it will help a lot. The NAB needs the active support of every member in getting new members.

AMENDMENT OF BY-LAWS

The attention of all NAB members is directed to the provision of the By-Laws respecting proposed changes. This reads as follows:

“Article XIII—Amendments

“Section 1. These By-Laws may be amended, repealed, or altered, in whole or in part, by a two-thirds vote at any annual meeting of the Association provided the proposed change is submitted by mail to the last recorded address of each member at least thirty days before the time of the meeting which is to consider the change.”

Should any members desire to submit proposed amendments for consideration of the membership, they should be sent in immediately in order that the notice provided may be given the membership of the Association.

BMI Developments

BMI has bought the Hinds, Hayden & Eldredge catalogue. The bill of sale is dated May 21, 1940. The catalogue contains a number of well known songs and a great wealth of material suitable for them, background, and mood music: Some of this material, in arrangements

May 24, 1940

4272
A new name which has been added to the BMI list of composers represents a great European reputation and is as new to the man who bears it as it is to BMI.

Bruno Grant, who has joined the BMI staff, spent his life as Bruno Granichstaedten until he changed his name legally after coming to this country in February. In Europe the name Granichstaedten ranks among those of the leading writers of musical comedies and operettas. His first show, Bub oder Mädel (Boy or Girl), opened the new Johann Strauss Theater in Vienna in 1910 and made such a success that it was brought to New York two years later under the name of Rose Maid. From that time to the present Mr. Grant's operettas have held a prominent place on the stages of Europe. The latest one, Sonily, opened in Luxembourg last October and went from there to Brussels. As far as Mr. Grant has been able to learn, it was still playing in Brussels at the time of the German invasion two weeks ago.

He wrote Bachnacht for Richard Tauber, now of the Metropolitan Opera in New York, who introduced it in Vienna in 1922. It was produced at the Theater an der Wien, the classic operetta house of Vienna, where for years Mr. Grant's music was first presented to the public.

One of his greatest successes was Orloff. It ran for more than 700 performances in Vienna in 1925 and 1926, was produced in London in 1931, and also in Paris, where it was revived for the season of 1938-9. During that revival it reached its 500th Paris performance.

Mr. Grant came to America for the first time in 1931 and went to Hollywood to do the score for a musical picture produced by Samuel Goldwyn. At the end of a year in Hollywood he returned to Europe to do the musical scores for sound pictures being made on the Continent.

He continued also to work on musical shows for the stage. In addition to Sonily he did the music for a play based on the life of Mozart, which was scheduled for production in the fall of 1938 in the government-owned Akademie Theater in Vienna. After the occupation of Austria by Hitler troops in March of that year, this plan was cancelled. In September Mr. Grant left Austria, his very considerable fortune having been entirely confiscated by the Nazis. He arrived in America in February, 1940, and has already applied for citizenship papers.

Through BMI, new songs of this distinguished composer will soon be given to the American public. It is hoped that full-length stage productions with music by him may also be added to the list.

Frank Luther, BMI composer, whose song in memory of Will Rogers has already been mentioned in these columns, begins a new series of programs over the NBC Red Network on July 14th. The programs, which will be heard Mondays and Fridays at 7:15 p.m., Eastern Daylight Saving Time, will trace the history of America in song. Mr. Luther has made the American folk-songs a special field of his own, and he has had great success with them.

His career has been as characteristically American as the music he sings—and writes. It began on a Kansas cattle ranch on August 4, 1907. He exhibited cattle and horses at State Fairs, sang and played on Chautauqua circuits, conducted evangelistic campaigns, studied, boxed, and played football at four colleges, and at the age of twenty-one was minister of a church of a thousand members. He made a concert tour with the De Reszke Singers, a male quartette singing classical music, and another tour with Will Rogers. He has played in musical comedy in New York and London, made nine movies, 2000 phonograph records, and appeared on some 1800 commercial network programs. In the last two years he has written about thirty songs—and in his spare time he does some radio scripts.

This career is typically American, not because many Americans have similar careers, but because it could not happen anywhere except in America and because Mr. Luther seems to wrap up in himself about a dozen different people, all of them as American as corn pone or a dunked doughnut.

If Mr. Grant and Mr. Luther indicate the extent to which BMI is bringing together the best of widely different types of music, the mention of another composer will add still another color to the picture.

Franklin Delano Roosevelt, Jr., in collaboration with Kenrick Sparrow, wrote a song for the University of Virginia show which BMI will publish within about two weeks. The title is The Rest of My Life.

The importance of ending the ASCAP monopoly is being appreciated more clearly every week throughout the entire musical and industrial world. Composers and executives who pay the bills for radio advertising, tavern proprietors and advertising agencies, would ordinarily make strange bedfellows. ASCAP, however, has driven them all under the same blanket.
Now the union musicians are joining them. Recently one large union group sent out a circular letter which expressed the opinion that the ASCAP activities and its exorbitant fees have deprived musicians of employment. The letter asked those who employ musicians to give their cooperation in combating the ASCAP plague.

And that, of course, means more strength for BMI.

---

**Promotion**

**RADIO FESTIVAL**

From the Old Dominion, New York City and Philadelphia to California more cities and more stations report Radio Festival activities and successes.

In Rock Island, Illinois, and Davenport, Iowa, and neighboring cities the broadcasters are engaged in a Festival program dedicated to free speech.

Goldsboro, N. C., comes in. Louisiana’s new fighting Governor proclaims National Radio Festival Week and New Orleans plans big things.

New York listeners will get a good going over as will those in Philadelphia. Sacramento, Calif., is all prepared to launch its Radio Festival on Sunday. Below are the details.

**Davenport, Rock Island and Five Other Cities**

WHBF, Rock Island, Illinois, and WOC, across the Mississippi, in Davenport, Iowa, have arranged a National Radio Festival with the free speech theme uppermost. Radio Festival proclamations will be read by the mayors of Davenport and Bettendorf, Iowa, and by the mayors of Rock Island, Moline, East Moline, Silvis and Milan, Illinois, Monday, June 3, in the first of a series of seven joint broadcasts.

Arrangements were reported by Ivan Streed, WHBF production manager, who said that he and J. Beryl Lottridge, general manager, WOC, “expect to make the people in our listening area really conscious of one of the greatest gifts ever enjoyed by the American public... FREE RADIO AND FREE SPEECH ON THE RADIO.”

Excerpts of the Constitution of the United States will be used in introducing each of the programs. Radio Festival proclamations will be placed in the windows of business establishments which have used Radio Festival as topic for their discussions. Posters will be outlined below, WHBF and WOC will ask the Women’s clubs to introduce each of the programs. In addition to the programs "RADIO." public . . . FREE RADIO AND FREE SPEECH ON THE RADIO.

Gary, WILMA, and WOC, “expect to make the people in our listening area really conscious of one of the greatest gifts ever enjoyed by the American public... FREE RADIO AND FREE SPEECH ON THE RADIO.”

Excerpts of the Constitution of the United States will be used in introducing each of the programs. Excerpts of the Constitution of the United States will be used in introducing each of the programs. Radio Festival proclamations will be placed in the windows of business establishments which have used Radio Festival as topic for their discussions. Posters will be outlined below, WHBF and WOC will ask the Women’s clubs to introduce each of the programs. In addition to the programs "RADIO." public . . . FREE RADIO AND FREE SPEECH ON THE RADIO.

Mrs. John R. Morris, program director, WGBR, will bring National Radio Festival to Goldsboro and environs the week of June 3-8. Talent is occupied rehearsing special programs for an outstanding Radio Festival week.

“We are sponsoring the essay contest suggested by NAB and there is very enthusiastic interest among the high school students in the contest,” wrote Mrs. Morris.

**Louisiana and New Orleans**

No more smoke in Louisiana as reported in this publication last week. The flame is burning brightly. On May 20, reports Henry Dupre, of WWL, came confirmation from newly elected Governor Jones, that National Radio Festival Week would officially cover June 3-10, inclusive. "With assurance of cooperation from all Louisiana stations, we are ready to ride," said Mr. Dupre.

New Orleans’ Mayor Maestri has also proclaimed the date as National Radio Festival Week.

**New York City**

From Halsey V. Barrett, promotion director, WNEW, on May 21:

"With regard to Radio Festival, we are going ahead in this New York area of 12,000,000 people to do our share in showing the value of radio as a public service and a major source of amusement and diversion for contemporary America..."

**Philadelphia**

Radio Festival in Philadelphia has the name "Radio Open House Week" and all of the transportation companies and department stores, Western Union, radio stores, etc., are helping publicize the week with literature, placards, signs, banners and so on, according to Joe Connolly, promotion director, WCAU.

"Each station is concocting its own particular brand of brew and keeping very quiet about plans, but they’re all going to be good,” he said.

**Richmond**

Plans for Richmond’s 4-station National Radio Festival celebration, to be begun on Sunday, June 2, are now perfected, according to D. S. Freeman, vice president, WRNL. In every sense of the word it looks like a big week throughout the “Old Dominion.”

Stations involved in the Richmond promotion are: WMIB, WRNL, WRTD and WRVA. The essay contest will soon be under way as express shipments of “ABC of Radio” have already been made.

**Sacramento**

KROY, the Royal Miller station, Sacramento Hotel, Sacramento, California, will begin National Radio Festival celebration, Sunday, May 26, according to a short note from Will Thompson, Jr., station manager. It will continue throughout the week.

**Missoula OK’s Festival**

National Radio Festival Week in Missoula and at KGVO was pronounced eminently successful by Manager Art Mosby of the station.

“With the theme ‘A Salute to Youth,’ some 200 young people ranging in age from 6th graders to university seniors appeared in special programs on the station during the week. Winning..."
entrants in the NAB essay contest appeared on the air to read
their essays and receive their awards.

"Jimmy Barber, program director of the station, conducted
more than 100 interviews with young people during the special
programs, 'Citizens of Tomorrow,' and 'Man on the Street,' during
the week.

"Fifteen outstanding civic leaders and business men were heard
in talks on various phases of radio in modern life.

"Merchandising tie-ups and special window displays in all downtown
business houses contributed to the success of the event.

"Every department of the station was tied into the celebration,
and cooperated in the production of the special events of the week.

Just in case the bulletin, "More Activity on the Radio Festival
Front," dated May 18, escaped your notice, the following shortened
reports will be interesting to members:

Denver

Governor Ralph L. Carr and Mayor Benjamin F. Stapleton declared
May 19-25 National Radio Festival Week in Colorado.
Whereupon KVOD, KFEL and KOA reallocated Pikes Peak.
Essay contest, talks, special windows, stunts, cooperation of the
radio jobbers, dealers and servicemen, displays of sets, etc., and
visitations to the studios of the three NAB Denver members were
all included in the week's activities.

Huntington

William J. Adams, program director, WSAZ, Huntington, is all
set for the week of June 10-16.

Louisville

Col. Bob Kennett, WHAS, Col. George Patterson, WAVE and
Col. S. A. Cisler, WGRC, all of Louisville, after winning the Derby,
are giving their attention to National Radio Festival. Will be
held the week of June 2.

Miami

Martin S. Wales, WIOD manager, got Radio Festival off to a
flying start on May 25 with a breakfast broadcast from the roof
garden of the Alcazar Hotel. Seven hundred attended, though
demands for tickets were doubled a few days after the broadcast
was announced.

Roanoke

Jack Weldon, program director, WDBJ, has the Roanoke young¬
sters, parents, teachers and citizens generally all steamed up with
the essay contest, preliminary to the Radio Festival proper, June 3-8.

The Mayor, newspaper, merchants are cooperating. Window
displays plans are completed. Studio is prepared to handle big
crowds of visitors. Special programs for afternoons and evenings.

Connecticut

Participation of every Connecticut station in National Radio
Festival establishes a new high record of industry cooperation.
These stations are:

WATERBURY WATR
WATERBURY WBRY HARTFORD WDRC
NEW LONDON WNLC HARTFORD WHTT
NEW HAVEN WELI HARTFORD WTIC
NEW BRITAIN WNBC BRIDGEPORT WICC

Zanesville

"Ohio's Biggest Little Radio Station," WHIZ, Zanesville, com¬
pleted National Radio Festival celebration on May 12. Program
Manager Allen Haid said:

"The week was truly a big success. In many different ways the
Festival impressed our listening audiences with the important
part radio plays in their daily lives. It also turned in a compre¬
hensive selling job on the virtue of the American System of
 Broadcasting."

"RADIO'S RICHES"

Five hundred copies of NAB's "Radio's Riches," sup¬
plied by Major Edney Ridge, director, WBIG, Greensboro,
will be distributed at the dedication of the Univer-

WLS PLUGS AUTO-RADIO

Listeners in the populous WLS territory are learning
how to increase their radio pleasure by the use of auto¬
radio sets. According to Harold A. Safford, program
manager, "WLS has been using the NAB Auto Radio
Announcements regularly and will continue to use them
throughout the summer season."

"GOOD NEIGHBORS"

"When the late evening hours roll around, may we
suggest you lower the volume of your radio? That's one
way of being a good neighbor."

"Why risk disturbing the folks next door? Why not
lower the volume of your radio a little during the late
evening hours?"

These are two of the various announcements which
F. O. Sharp, program manager, WFBM, Indianapolis, is
now using to "educate" his listeners.

Each year when windows are raised to admit the cooling
zephyrs, if any, there are always night owls in the neigh¬
borhood with their radios going full blast.

Stations frequently get the blame instead of the thought¬
less individual and that is what Mr. Sharp is guarding
against.

AFA CONVENTION PLANS

William R. Cline, commercial manager, WLS, Chicago,
who is national chairman of the NAB Sales Managers' Divi¬
sion, has announced the committee of Chicago mem¬
ers to arrange final details for "Broadcasters' Night" Tuesday, June 25, at the thirty-sixth annual convention
of the Advertising Federation of America. An elaborate
radio cabaret entertainment is planned as NAB's con¬
tribution to the AFA Convention, scheduled for the Hotel
Sherman, Chicago, June 23-27.

The program committee is as follows:

Jules Herbeveaux, NBC, Chairman
Stuart Dawson, CBS
Harold Safford, WLS
Bradley R. Eidmann, WAAF
Orrin Weaver, CBS, Chairman
E. C. Carlson, NBC

May 24, 1940
DEPARTMENT STORE ACTIVITY

The National Retail Dry Goods Association has tentatively set Thursday morning, June 20, as the date for its "Radio for Retailers" panel discussion, when prominent representatives of both the radio and retailing industries will again discuss department store radio advertising in a frank, "heart-to-heart" forum. The occasion is the semi-annual convention of NRDGA, scheduled for June 17-20 at the Palmer House, Chicago.

The NAB Bureau of Radio Advertising is cooperating with the NRDGA in arranging an entertaining and effective meeting, to which broadcasters will be welcome. The theme of the radio forum will be "More broadcaster-retailer cooperation for better radio results".

The complete printed transcript of last January's "Radio-Retailer" session is now available to radio stations at $1.50 a copy. Members should write to Joseph E. Hanson, Manager, Sales Promotion Division, National Retail Dry Goods Ass'n., 101 West 31st, New York City, for this interesting and informative discussion of department store radio advertising.

Member stations who have not yet returned the completed questionnaire on department stores sent out May 15th are requested to do so at once, in order that the information may be tabulated and published as early as possible. In this connection, the NRDGA has recently questioned its several thousand store members on radio, and reports excellent returns. These will be coordinated with the NAB data in a complete report which should be highly effective in further developing this important field of local advertising. Fill out your form and return it now to the NAB Research Department.

AAAA OFFICERS

The following new officers and members of the Executive Board were elected (for one-year terms except where noted otherwise) at the Twenty-third Annual Meeting of the American Association of Advertising Agencies, held at the Waldorf-Astoria, New York, May 16:

President—John Benson (reelected for 4 years).
Vice-President—Guy C. Smith, Executive Vice-President, Brooke, Smith & French, Inc., Detroit.
Secretary—David M. Botsford, President, Botsford, Constantine & Gardner, San Francisco.
Treasurer—E. DeWitt Hill (reelected), Vice-President, McCann-Erickson, Inc., New York.
Frederic R. Gamble continues as Executive Secretary.

Distinguished Service Awards For Radio Stations

Designed to give educational recognition for public service by radio, and honoring a distinguished American, the George Foster Peabody Awards were last week established by the Board of Regents of the University System of Georgia. The Awards were set up with the approval and active cooperation of the National Association of Broadcasters.

These awards are designed to provide the field of radio with the same stimulus and incentive to public service that the Pulitzer Awards give to newspapers and literature. They will be administered by the Henry W. Grady School of Journalism of the University of Georgia in Athens, in the same way that the Pulitzer awards are handled by the School of Journalism at Columbia University.

The plans are an outgrowth of a series of conferences participated in by Dr. S. V. Sanford, Chancellor of the University System, Marion Smith, chairman of the Board of Regents; Dr. Harmon W. Caldwell, president of the University; Mrs. Marjorie Peabody Waite, Saratoga Springs, N. Y., daughter of Peabody; John E. Drewry, director of the Henry W. Grady School of Journalism; Lambdin Kay, director of public service for WSB, Atlanta, and Harry Hodgson, Athens, personal friend of the late Peabody.

Several years ago Mr. Kay was appointed to head a committee for the NAB to investigate possibilities of providing national educational recognition for public service in radio. At a meeting early this spring in Atlanta, with Ed Kirby, NAB Director of Public Relations; Dr. John E. Drewry, Director of the Henry Grade School of Journalism of the University of Georgia, and Mr. Kay, plans for the Peabody Awards received the wholehearted cooperation of the industry.

The first awards will be made in 1941, probably at the annual Georgia Press Institute.

The resolution providing for these Peabody Awards reads as follows:

A PLAN WHEREBY THE OLDEST CHARTERED STATE UNIVERSITY WOULD RECOGNIZE AND ENCOURAGE THE SOCIAL RESPONSIBILITIES OF THE YOUNGEST OF THE MEDIA OF COMMUNICATION—AND ALSO HONOR A DISTINGUISHED AMERICAN:

May 24, 1940
Recognizing that the radio is an important medium of information, entertainment and public service, comparable to the press, the University of Georgia (chartered 1785), through the Henry W. Grady School of Journalism and a Board of Advisers, will confer annually, beginning in 1940, THE GEORGE FOSTER PEABODY RADIO AWARDS for the most distinguished and meritorious service rendered by each of three American radio stations, representing the three major types of stations (local, regional and clear channel), and also by a national broadcasting chain, said awards to be given to perpetuate the memory of George Foster Peabody, benefactor and life trustee of the University of Georgia and friend of educational progress everywhere.

These awards will be announced and bestowed publicly by the Regents of the University System of Georgia, upon recommendation of the Advisory Board set up and maintained jointly by the University of Georgia, through the Henry W. Grady School of Journalism, and the National Association of Broadcasters.

The membership of this Advisory Board shall consist of the Chancellor of the University System of Georgia, and eleven other outstanding American citizens who have demonstrated in a notable degree their interest in public affairs, and who also by position and achievement are prepared to evaluate in an impartial and detached manner the contributions of radio stations and chains in connection with this award. The Board is to be self-perpetuating, subject to the approval of the Board of Regents. Nominations for membership are to be made through the office of the Director of the Henry W. Grady School of Journalism. (The initial personnel of the Advisory Board will be submitted for approval by the Board of Regents in a separate resolution, this month.)

Nominations of candidates for these awards shall be made in writing to the Director of the Henry W. Grady School of Journalism, the University of Georgia, Athens, Georgia. Each nomination must be accompanied by complete and self-evident data setting forth clearly the claim to consideration for one of these awards. Program outlines, program transcripts, recordings, letters and other pertinent data should be so presented as to comprise an exhibit which will be a faithful record of the station's particular contribution to public service offered for consideration in this connection.

Competitions for one of these awards will be limited to work done during the calendar year ending December 31 next preceding. The first award will be made in 1941, based on public service programs of 1940.

The closing date for entries will be January 15.

In commenting upon the announcement of the Peabody Award, Lambdin Kay, veteran broadcaster and now Director of Public Service of WSB, Atlanta, Georgia, said:

"Broadcasting has been too busy growing up to acquaint the world with its indispensability in preserving democracy through true public service.

Evolving the technology, economy, sociology and destiny of mankind's mightiest power for human betterment in two turbulent decades has preoccupied the builders of the industry.

Its typically American way of private, independent competitive operation for profit has overshadowed its incalculably greater significance and potentialities in fostering the lives, liberties and happiness of a free people.

Broadcasting stands alone today as the personification of the real meaning of free speech. It is impartial because sovereignty of the air remains with the people. It is all-powerful because it reaches more people more directly than any other mode of expression.

May the George Foster Peabody Radio Awards hasten public acceptance of broadcasting's status as America's basic bulwark and safeguard to Democracy.

When informed of these awards, Neville Miller, president of the NAB, made the following statement:

"American broadcasters are honored that under such distinguished and impartial auspices, annual awards will be bestowed for the most outstanding contributions rendered in the public interest which they are dedicated to serve.

"Without question, the George Foster Peabody Radio Awards to be selected by a group of outstanding Americans representing a cross section of the religious, cultural and economic life of the nation, will become a new and noteworthy standard by which the public service contributions of the broadcasters will be gauged and measured.

"We welcome this new and wholesome influence in broadcasting. Our thanks go out to those individuals and to the University of Georgia whose public spiritedness has combined to bring about this worthy means through which to further perpetuate the noble memory of a great American, George Foster Peabody."

---

**Labor**

Broadcasters who have carefully cooperated with the NAB Labor Relations Department in building up the labor contract service are amazed when they find that all members have not filed all their contracts.

Every broadcaster who has dealt with a labor union appreciates the importance of having at his command the information from other contracts with the same union. Only if he has this information can the broadcaster deal with the union on equal terms, for the union has it.

For many years, the American Newspaper Publishers Association has maintained a complete contract pool for its members. Newspaper publishers think this is one of the ANPA's most valuable services. The NAB wants to give just as complete and valuable service in this respect. To do that, however, the Labor Relations Department must have the cooperation of every member.

Members should talk this over at the coming district meetings.

The Labor Relations Board has ordered a hearing June 3 on charges that Station WCOV, Montgomery, Ala., had engaged in unfair labor practices. The charges were brought by the International Brotherhood of Electrical Workers (A. F. of L.). The hearing will be held in Montgomery.

Samuel R. Rosenbaum, WFIL, has another union problem on his hands—nothing new to Mr. R.

The Robin Hood Dell summer concert series, which Mr. Rosenbaum manages, will open June 18 with a 90-piece symphony orchestra playing Tchaikovsky's "1812 Overture" with the incidental cannon firings included by the composer in his score.

The orchestra association arranged for the loan of three anti-tank cannon from the Pennsylvania National Guard for the performance, whereupon A. Rex Riccardi, secretary of A. F. of M. Local 77 informed Mr. Rosenbaum that "we will require that the cannon be played by a member of Local 77."

Mr. Rosenbaum replied: "Under the circumstances we shall arrange to hold auditions among members of the
local who may apply for the position, in order to select a performer who can play the cannon with due regard for its musical value. Applications should be addressed to us for the position of Symphony Bombardier.”

EXTENDING LICENSES

The reallocation under the Havana Treaty was scheduled for August 1, however, it appears now as if this date cannot be met. If the date is extended to December 1 (the date now being considered) or some other time, then the FCC will automatically extend broadcast station licenses until that date without requiring that renewal applications be filed.

FROM THE FCC MAIL BAG

A letter from Waterloo, Iowa, asks the Commission to order the discontinuance of war dramas on the radio. A New Yorker wants the Commission to impose restrictions on the amount of advertising talk on the air. A Portsmouth, Va., woman would confine Sunday broadcasts to programs “appropriate to the Sabbath.

Ellet, Ohio, resident that there is no provision in the Communications Act or the Commission’s own rules and regulations to prohibit a church-sponsored program from soliciting gifts and contributions from the listening public.

The Commission without jurisdiction to handle complaint of a Mineola, N. Y., man that his radio receiving set is unable to operate in accordance with the representations made for it, so it has transmitted his communication to the Federal Trade Commission. Likewise, the Commission cannot itself help a Waterbury, Conn., man protect the contents of a broadcast program, but suggests procedure through the Copyright Division of the Library of Congress. It also notifies a New York music publisher that it has no say in the relations existing between the radio and music industries.

An enterprising Beverly, Mass., man is told that his plan to organize and sell a radio program service via amateur stations would violate the prohibition against amateur stations being used to broadcast any form of entertainment.

BROADCAST MEASUREMENTS

During the month of April, FCC officials measured 723 broadcast stations leaving 95 not measured.

Six hundred and fifty-eight stations showed a maximum deviation within 0-10 cycles; 53 stations within 11-25 cycles; 12 stations within 26-50 cycles; no stations showed a deviation of over 20 or 50 cycles.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings are scheduled before the Commission in broadcast cases for the week beginning Monday, May 27. They are subject to change.

Monday, May 27

Further Hearing

Tuesday, May 28

APPLICATIONS GRANTED

Birney Imes, Columbus, Miss.—Granted construction permit for new station to operate on 1370 kc., with 250 watts, unlimited time. Exact transmitter site and antenna system to be determined subject to Commission approval.

Middle Georgia Broadcasting Co., Macon, Ga.—Granted construction permit for new station to operate on 1120 kc., 250 watts, unlimited time. Exact transmitter and studio sites and antenna system to be determined subject to Commission’s approval.

WSPA—Virgil V. Evans, trading as The Voice of South Carolina, Spartanburg, S. C.—Granted voluntary assignment of license and construction permit (for auxiliary transmitter) from Virgil V. Evans, d/b/a The Voice of South Carolina, to the Spartanburg Advertising Company, for a consideration of $30,500. Station operates on 920 kc., with 1 KW, daytime.

KGEI—General Electric Co., San Francisco, Calif.—Granted modification of international broadcast station license to add frequency 6190 kc. to the present licensed frequencies—6190, 9530 and 15330 kc., 20 KW, sharing time on 6190 and 9530 kc. with WGEA and 15330 kc. with WGAE.

KSRO—The Press Democrat Publishing Co., Santa Rosa, Calif.—Granted consent to assignment of license of station KSRO from The Press Democrat Publishing Co. to Harold L. Finley, for a consideration of $30,590. Station operates on 1310 kc., 250 watts, unlimited time.

WALA—W. O. Pape, tr/ as Pape Broadcasting Co., Mobile, Ala.—Granted modification of construction permit extending commencement date to June 8, authorizing move of transmitter site locally, installation of vertical radiator, and increase in night power from 250 watts to 1 KW; the completion date remains September 8, 1940.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period ending August 1, 1940:

WDOT—and auxiliary, Roanoke, Va.; WDAY, Fargo, N. Dak.; WDEI, Wilmington, Del.; WECB, Duluth, Minn.; WESC, Ellet, Ohio, resident that there is no provision in the Communications Act or the Commission’s own rules and regulations to prohibit a church-sponsored program from soliciting gifts and contributions from the listening public.

KWLC—Luther College, Decorah, Iowa.—Granted renewal of license on a temporary basis only, for the period ending August 1, 1940, subject to whatever action may be taken upon pending application for renewal of licenses of KGCA and KWLC, and the pending application of KGLO.

WCAM—City of Camden, Camden, N. J.—Granted renewal of license on a temporary basis only for the period ending August 1, 1940, subject to whatever action may be taken upon pending application for renewal of license.

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Denied special temporary authority to rebroadcast a program to be featured Mrs. Roosevelt, Administrator Carmody, and Col. Harrington.

KWLC—Luther College, Decorah, Iowa.—Granted special temporary authority to operate from 3:50 p. m. to 4:30 p. m. and from 5:30 p. m. to 6:30 p. m. EST on May 25, 1940, or until the conclusion of baseball games on May 20, 25, and 27, 1940, and from 1:45 p. m. to 2:30 p. m. and from 3:30 p. m. to 4:30 p. m. CST on May 30, 1940, in order to broadcast baseball games only (provided KGCA remains silent).

WTX—Agreement to sell to Columbia Broadcasting System, Inc., College Station, Tex.—Granted special temporary authority to operate simultaneously with Station WJBO from 10:30 p. m. to 11:30 p. m. CST on May 31, 1940, in order to broadcast program in connection with the Final Ball of the A. & M. Cadet Corps.

W10XEL—RCA Manufacturing Co., Inc., Chicago, Ill.—Granted special temporary authority to operate from 7:30 p. m. to 8:30 p. m. CST on June 6, 1940, in order to rebroadcast the baseball games of the Springfield team of the Eastern League when they are played at night. (B1-S-886)

WBM—Voice of Longview, Longview, Texas.—Granted special temporary authority to operate from 9:15 p. m. EST to 12 midnight on May 29, 1940, in order to broadcast the Annual Military Ball of the Rice Lake unit of the National Guard.

WSPR—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate from 8:45 p. m. EST, until conclusion of games on May 14, 15, 16, 17, 21, 22, 23, 24, 27, 28, 29, and 31, 1940, and from 9 p. m. EST until conclusion of games on June 3, 4, 5, 6, 7, 11, and 12, 1940, in order to broadcast the baseball games of the Springfield team of the East League when they are played at night. (B1-S-886)

WBLY—United Air Lines Transport Corp.—Granted special temporary authority to operate from 7:45 p. m. EST to 10 p. m. EDT at the conclusion of games on 1000 kc., special temporary authority to operate already licensed aircraft radio transmitter as an auxiliary transmitter; 270 kc., 50 kW, auxiliary purposes only (B4-M-991).

WFM—Columbia Broadcasting System, Inc., Chicago, III.—Granted modification of license to change frequency from 1310 kc. to 1340 kc., 1 kw, unlimited time (B4-L-1145).

WMB—Voice of Brooklyn, Inc., New York, N. Y.—Granted modification of license to change name of licensee from Voice of Brooklyn, Inc., to WLB—State of Wisconsin, Dept. of Agriculture, Stevens Point, Wisc.—Granted special temporary authority to operate from 9 p. m. to 11 p. m. EST from July 1, 1940, to the completion of arrangements with station KWLC.

KGD—General motion to dismiss application for modification of license to change frequency from 1300 kc. to 1370 kc., power 100 watts, unlimited time (B4-L-991).

WMB—Columbia Broadcasting System, Inc., Chicago, III.—Granted modification of license to change frequency from 1300 kc. to 1370 kc., power 100 watts, unlimited time (B4-L-1145). Also granted authority to determine operating power by direct measurement of antenna power (B4-Z-99).

MISCELLANEOUS

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted extension of special temporary authority to operate from 9 a.m. to 10 a.m. EST, Monday, Tuesday, Wednesday, Thursday, Friday and Sunday mornings, for the period May 18, 1940, to not later than June 16, 1940, or until the Saginaw Broadcasting Co. is in a position to undertake the time, in order to broadcast non-commercial educational programs; authority to terminate upon commencement of program tests by station WSAM.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted experimental station to operate in the frequency band 112-116 kc., for the purpose of displaying newly developed television viewing tubes, camera pick-up unit, receivers, transmitters and associated gear designed for 600 kc. band, in preparation for a special non-commercial broadcasting program on amateur trade, to set up a complete system and operate it as a part of the RCA Exhibit at the “Board of Trade Show” in Chicago, Ill., for the period June 6, 1940 to not later than June 16, 1940.

WJB—Voice of Brooklyn, Inc., to WLTH—New York, Inc. (Bl-P-2742).

KWLC—Luther College, Decorah, Iowa.—Granted special temporary authority to operate from 7:30 p.m. to 12 midnight on May 29, 1940, in order to broadcast the annual Military Ball of the Rice Lake unit of the National Guard.

WSMR—WSMR, Inc., Springfield, Mass.—Granted special temporary authority to operate from 8:45 p.m. EST, until conclusion of games on May 14, 15, 16, 17, 21, 22, 23, 24, 27, 28, 29, and 31, 1940, and from 9 p.m. EST until conclusion of games on June 3, 4, 5, 6, 7, 11, and 12, 1940, in order to broadcast the basketball games of the Springfield team of the East League when they are played at night. (B1-S-886)

WIMJ—Voice of Brookly, Inc., to WLTH—New York, Inc. (Bl-P-2742).

KFDM—South Dakota State College, Brookings, S. D.—Granted special temporary authority to operate from 2 p.m. to 4:15 p.m. EST on May 18, 1940, for the South Dakota Collegiate Track Meet and on May 25, 1940, in order to broadcast the N. Conference Track Meet; to operate from 7:15 p.m. to 9:15 p.m. CST on June 3, 1940, in order to broadcast State College Graduation Exercises.

WLAB—Hildreth and Rogers Co., Lawrence, Mass.—Granted special temporary authority to rebroadcast a program to be received from High Frequency (Experimental) Broadcast Station WIXO from 1:15 p.m. to 1:30 p.m. EST on May 17, 1940, in connection with a special frequency modulation talk and demonstration for the Lion’s Club of Lawrence, Mass.

WLB—The Bowling Green Broadcasting Co., near Bowling Green, Ky.—Granted modification of construction permit as modified which authorized construction of new broadcast station, for extension of commencement date from December 31, 1939 to February 29, 1940, and completion date from July 1, 1940 to September 1, 1940; assignment, 1310 kc., 250 watts, unlimited time. (B2-MP-978)

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Denied special temporary authority to operate from 1:15 p.m. to 5:15 p.m. EST on May 18, 1940, in order to broadcast a Music Festival in the City Hall.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period May 18, 1940, to not later than June 16, 1940, pending the filing of modification of license and completion of arrangements with station KWLC.

KTRB—Thomas R. McCammany and Wm. H. Bates, Jr., Modesto, Calif.—Granted special temporary authority to operate from 9 p.m. PST, May 17, 1940, to the completion of soft ball game at Modesto and program in connection therewith, only, instead of on May 16, 1940, as authorized by grant of May 11, 1940.

KGDM—E. F. Peifer, Stockton, Cal.—Granted motion to dismiss application for modification of license to change frequency from 1100 kc. to 1350 kc., and hours of operation from daytime only to unlimited, using 1 kW.

Grant Union High School District, North Sacramento, Calif.—Dismissed petition to intervene and consolidate hearing in re application of KGDM for modification of license.

WSPR—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate from 5:30 p.m. to 8:30 p.m. EST on May 20, 1940, in order to broadcast WPA program featuring Mrs. Roosevelt, Administrator Carmody, and Col. Harrington.

KWLC—Luther College, Decorah, Iowa.—Denied special temporary authority to operate from 3:50 p.m. to 4:30 p.m. and from 5:30 p.m. to 6:30 p.m. CST on May 24, 1940, or until the conclusion of baseball games on May 20, 25, and 27, 1940, and from 1:45 p.m. to 2:30 p.m. and from 3:30 p.m. to 4:30 p.m. CST on May 30, 1940, in order to broadcast baseball games only (provided KGCA remains silent).

argument in re application for consent to transfer voluntary control of Vee Bee Corporation, licensee of Station WPAY, Portsmouth, Ohio, the argument to be held at 10 a.m., Thursday, June 6, 1940.

WMVD—Delmarva Broadcast Co., Salisbury, Md.—Granted request for cancellation of construction permit authorized on April 13, 1940, for a new station to operate on 1200 kc., 250 watts power, unlimited time, call letters WMVD. Application will be retied to closed files and call letters deleted.

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—Discharged Order to show cause why the license of WLTH should not be revoked, which was issued by the Commission on July 26, 1939. It appears that the interference conditions existing at the time the order was issued have now been eliminated.

KTOH—Garden Island Publishing Co., Ltd., Lihue, Hawaii.—Granted license to cover construction permit as modified for new broadcast station; frequency 1500 kc., 100 watts, 250 watts night, unlimited time, directional antenna and change in type of transmitter and approval of system and increase in power from 1 to 5 KW and hours of operation from daytime to unlimited time. Class II.

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Construction permit to install new transmitter, increase power, for main and auxiliary transmitters.

WJAR—The Outlet Co., Providence, R. I.—Construction permit to install new transmitter, increase power, for main and auxiliary transmitters.

WBZ—Westinghouse Elec. & Mfg. Co., Boston, Mass.—Modification of construction permit as modified for new transmitter, directional antenna for day and night use; and move of transmitter, for authority to install new type transmitter and make changes in directional antenna system and extend commencement date to 30 days after grant and completion date 180 days thereafter (B3-MP-951).
